INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRAHAM (for himself and Mr. MACK):

S. 2965. A bill to designate the Federal building located at 51 Southwest 1st Avenue in Miami, FL, as the "Claude Pepper Federal Building"; to the Committee on Environment and Public Works.

By Mr. SPECTER (for himself, Mr. SIMON, Mr. DECONCINI, Mr. HATCH, Mr. BIDEN, and Mr. KENNEDY):

S. 2966. A bill to amend title IX of the Civil Rights Act of 1968 to increase the penalties for violating the fair housing provisions of the act, and for other purposes; to the Committee on the Judiciary.

By Mr. BOSCHWITZ:

S. 2967. A bill to amend the Internal Revenue Code of 1986 to provide incentives for the provision of health insurance, and for other purposes; to the Committee on Finance.

By Mr. WALLOP (for himself, Mr. BURNS, Mr. SYMMS, Mr. GRASSLEY, Mr. BOND, Mr. DOLE, Mr. MCCLURE, and Mr. NICKLES):

S. 2968. A bill to exempt certain operators of farm vehicles operating within 600 miles of a farm from the commercial driver's license program; to the Committee on Commerce, Science, and Transportation.

By Mr. GARN (for himself and Mr. HATCH):

S. 2969. A bill to increase the amounts authorized to be appropriated for the Central Utah project, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HUMPHREY (for himself and Mr. RUDMAN):

S. 2970. A bill to amend the Wild and Scenic Rivers Act of 1968 by designating segments of the Lamprey River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HARKIN:

S. 2971. A bill to amend title XVIII of the Social Security Act to provide for coverage of screening mammography from women at high risk of developing breast cancer, and for other purposes; to the Committee on Finance.

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2972. A bill to amend the XVIII of the Social Security Act to provide an additional payment under part A of the Medicare Program for the operating costs of inpatient hospital services of hospitals with a high proportion of patients who are Medicare beneficiaries; to the Committee on Finance.

By Mr. DODD (for himself, Mr. KENNEDY, Mr. PACKWOOD, Mr. METZENBAUM, Mr. HATFIELD, Ms. MIKULSKI, Mr. PELL, Mr. SIMON, Mr. ADAMS, Mr. DECONCINI, Mr. BRADLEY, Mr. KERREY, Mr. MOYNIHAN, Mr. KERRY, Mr. INOUYE, Mr. BURDICK, Mr. BIDEN, Mr. ROCKEFELLER, Mr. GORE, Mr. WIRTH, Mr. LIEBERMAN, Mr. KOHL, Mr. LAUTENBERG, Mr. REID, Mr. SARBANES, and Mr. AKAKA):

S. 2973. A bill to grant employees family and temporary medical leave under certain circumstances, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GRASSLEY:

S. 2974. A bill to amend the Internal Revenue Code of 1986 to extend the excise tax exemption to sales of certain trucks assembled by nonprofit educational organizations; to the Committee on Finance.

By Mr. REID:

S. 2975. A bill to amend title II of the Social Security Act to provide for a more gradual 10-year period of transition to the changes in benefit computation rules enacted in the Social Security Amendments of 1977 as they apply to workers attaining age 65 in or after 1982 (and related beneficiaries) and to provide for increases in their benefits accordingly; to the Committee on Finance.

By Mr. BAUCUS (for himself and Mr. BURNS):

S. 2976. A bill to establish a National Center for Mine Waste Technology Research, Development and Demonstration in Butte, MT; to the Committee on Environment and Public Works.

By Mr. LEAHY:

S. 2977. A bill to prohibit certain RTC asset sales; to the Committee on Banking, Housing, and Urban Affairs.

By Ms. MIKULSKI:

S. 2978. A bill to provide that Federal employees may participate in State and local government programs encouraging the use of public transportation; to the Committee on Governmental Affairs.

By Mr. MITCHELL (for himself, Mr. COHEN, Mr. GORE, Mr. HARKIN, Mr. BRYAN, Mr. DURENBERGER, Mr. EXON, Mr. KERREY, Mr. HEINZ, Mr. REID, Mr. LEAHY, Mr. LIEBERMAN, Mr. KERRY, and Mr. KENNEDY):

S. 2979. A bill to protect the public from health risks from radiation exposure from low-level radioactive waste, and for other purposes; to the Committee on Environment and Public Works.

By Mr. BAUCUS (for himself and Mr. HEINZ):

S. 2980. A bill to amend the Internal Revenue Code of 1986 to modify the provisions permitting certain entities to elect a taxable year other than the required year; to the Committee on Finance.

By Mr. THURMOND:

S. 2981. A bill to amend the Federal charter for the Boys' Clubs of America to reflect the change of the name of the organization to the Boys & Girls Clubs of America; to the Committee on the Judiciary.

By Mr. KOHL (for himself and Mr. KASTEN):

S. 2982. A bill to establish the Fox River National Heritage Corridor; to the Committee on Energy and Natural Resouces.

By Mr. ROTH:

S. 2983. A bill to amend the Internal Revenue Code of 1986 to clarify the application of the passive foreign investment company rules, to repeal the export trade corporation rules, and for other purposes; to the Committee on Finance.

By Mr. BOSCHWITZ:

S. 2984. A bill to amend the Internal Revenue Code of 1986 to provide an income tax credit for eligible child care services; to the Committee on Finance.

By Mr. DECONCINI (for himself, Mr. D'AMATO, and Mr. HARKIN):

S. 2985. A bill to amend the Controlled Substances Act to limit the retention of seized assets by the Attorney General for administration expenses; to the Committee on the Judiciary.

By Mr. KERRY:

S. 2986. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for fees for sewer and water services; to the Committee on Finance.

By Mr. SIMON:

S. 2987. A bill to establish the Lovejoy Building as an African-American Higher Education Center, and for other purposes; to the Committee on Labor and Human resources.

By Mr. MOYNIHAN (for himself, Mr. HEINZ, Mr. BAUCUS, Mr. ROTH, Mr. BOREN, Mr. DANFORTH, Mr. PRYOR, Mr. DURENBERGER, Mr. RIEGLE, Mr. ARMSTRONG, Mr. SYMMS, Mr. SARBANES, Mr. WILSON, Mr. KENNEDY, Mr. COATS, Mr. HELMS, Mr. BURDICK, Mr. BUMPERS, Mr. JOHNSTON, Mr. CRANSTON, Mr. SHELBY, Mr. JEFFORDS, Mr. KERRY, Mr. DIXON, Mr. COCHRAN, Mr. BOND, Mr. BOSCHWITZ, Mr. DODD, Mr. LUGAR, Mr. CONRAD, Mr. LAUTENBERG, Mr. INOUYE, Ms. MIKULSKI, Mr. LIEBERMAN, Mr. SIMON, Mr. MURKOWSKI, Mr. REID, Mr. SANFORD, Mr. LOTT, Mr. HARKIN, Mr. PELL, Mr. SIMPSON, Mr. GLENN, Mr. LEVIN, Mr. KASTEN, Mr. HATFIELD, Mr. HOLLINGS, Mr. COHEN, Mr. NICKLES, Mr. BURNS, Mr. BINGAMAN, Mr. AKAKA, Mr. D'AMATO, Mr. MACK, Mr. BIDEN, Mr. BRYAN, Mr. GORE, Mr. KERREY, and Mr. HEFLIN):

S. 2988. A bill to amend the Internal Revenue Code of 1986 to make the exclusion from gross income of amounts paid for employee education assistance permanent, and for other purposes; to the Committee on Finance.

By Mr. HEINZ:

S. 2989. A bill to amend title XIX of the Social Security Act to provide for an expansion of Medicaid benefits to low-income pregnant women and children, and to raise the tax on cigarettes to fund such Medicaid expansion; to the Committee on Finance.

By Mr. COCHRAN:

S. 2990. A bill to extend the period for credit or refund of certain overpayments of the windfall profit tax on domestic crude oil; to the Committee on Finance.

By Mr. BREAUX (for himself, Mr. LOTT, Mr. INOUYE, Mr. AKAKA, and Mr. MITCHELL):

S. 2991. A bill to reauthorize the Fish and Seafood Promotion Act of 1986; to the Committee on Commerce, Science, and Transportation.

By Mr. DASCHLE:

S. 2992. A bill to amend the Act of December 22, 1944 (known as the "Flood Control Act of 1944") to establish statutory procedures for the preparation of an annual plan for operations of water control projects in the Missouri River Basin, and for other purposes; to the Committee on Environment and Public Works.

S. 2993. A bill to amend the Internal Revenue Code of 1986 to extend the solar, geothermal, ocean thermal energy tax credits through 1995; to the Committee on Finance.

By Mr. KENNEDY (for himself and Mr. HATCH):

S. 2994. A bill to require the Secretary of the Treasury to mint coins in commemoration of James Madison and the bicentennial anniversary of the signing of the Bill of

Rights; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DASCHLE (for himself, Mr. INOUYE, Mr. MCCAIN, and Mr. BURDICK):

S. 2995. A bill to provide that a portion of the income derived from trust or restricted land held by an individual Indian shall not be considered as a resource or income in determining eligibility for assistance under the Social Security Act or any other Federal or federally assisted program; to the Select Committee on Indian Affairs.

By Mr. REID (for himself, Mr. BRYAN, Mr. BOND, and Mr. LIEBERMAN):

S. 2996. A bill to provide for procedural and substantive due process of law for coaches, players, and institutions of higher education subject to suspension as a result of sanctions imposed, or threat of sanctions, upon an educational institution by the National Collegiate Athletic Association; to the Committee on Labor and Human Resources.

By Mr. BOSCHWITZ:

S. 2997. A bill to revise and extend the programs of assistance under title X of the Public Health Service Act, and for other purposes; to the Committee on Labor and Human Resources. .

S. 2998. A bill to amend the Public Health Service Act to revise and extend title X, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. SASSER, from the Committee on the Budget:

S. 2999. An original bill to exclude the Social Security trust funds from the deficit calculation; placed on the calendar.

By Mr. SIMPSON (for Mr. HEINZ):

S. 3000. A bill to strike coins for Pearl Harbor veterans, for the Yosemite National Park Centennial, and for the bicentennial of the United States Constitution, considered and passed.

By Mr. D'AMATO:

S.J. Res. 359. A joint resolution designating the week of beginning September 16, 1990, as "Emergency Medical Services Week"; to the Committee on Judiciary.

By Mr. AKAKA (for himself and Mr. INOUYE):

S.J. Res. 360. A joint resolution to apologize to the Hawaiian people for the overthrow of the kingdom of Hawaii in 1893 and to declare the trust relationship between the United States Government and Native people of Hawaii; to the Committee on Governmental Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. PACKWOOD:

S. Res. 319. A resolution to express the sense of the Senate that the Willamette Meteorite should be returned to the State of Oregon; to the Committee on Rules and Administration.

By Mr. BRYAN (for himself, Mr. HOLLINGS, Mr. ROCKEFELLER, Mr. GRAHAM, Mr. KERRY, Mr. DECONCINI, Mr. REID, Mr. BURNS, and Mr. MCCONNELL):

S. Res. 320. A resolution expressing the sense of the Senate regarding controls by certain European countries on chemicals that are used in the processing of illegal drugs; to the Committee on Foreign Relations.

By Mr. ARMSTRONG (for himself, and Mr. MCCAIN):

S. Con. Res. 144. A concurrent resolution expressing the sense of the Congress regarding the need to account as fully as possible for Americans still missing or otherwise unaccounted for in Southeast Asia and to secure the return of Americans who may still be held captive in Southeast Asia; to the Committee on Foreign Relations.

By Mr. NUNN (for Mr. MITCHELL, for himself, Mr. DOLE, Mr. DOMENICI, and Mr. SIMON):

S. Con. Res. 145. A concurrent resolution to salute and congratulate the people of Poland as they commemorate the 200th anniversary of the Polish Constitution; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BOSCHWITZ:

S. 2967. A bill to amend the Internal Revenue Code of 1986 to provide incentives for the provision of health insurance, and for other purposes; to the Committee on Finance.

ACCESS TO HEALTH INSURANCE ACT

● Mr. BOSCHWITZ. Mr. President, I rise today to introduce the Small Business Access to Health Insurance Act of 1990.

Mr. President, we are all aware that approximately 30 million Americans are without health insurance. Several studies have now been completed which give us a much better picture of who they are and why they are uninsured. According to one recent study by the Employee Benefit Research Institute [EBRI] a majority, 20.6 million, 62 percent worked full-time, all year, and were never unemployed during that period. Another 4.6 million, 13.9 percent worked full or part time with some unemployment, and 3.1 million worked part-year, full or part time. Only 4.9 million of the uninsured, 14.8 percent, Mr. President, were nonworkers. While it is true that some of the uninsured chose not to carry health insurance, the vast majority are uninsured because of the high cost of insurance or its unavailability.

The EBRI study also stated that almost 12 percent of the uninsured are self-employed, and nearly 50 percent are employees of small companies, those with fewer than 25 employees. Currently, there are several tax advantages for large companies who can afford to self-insure. Such companies are allowed to deduct 100 percent of their insurance costs as a business expense. In contrast, the self-employed are allowed to deduct only 25 percent of their costs, and this option expires at the end of this year. Further, those who self-insure are exempt from State mandates and do not have to pay State excise taxes on insurance premiums. In addition, large companies, whether they self-insure or purchase coverage from a carrier, have the advantage of spreading the risk over a wider population, thereby reducing the cost of coverage.

Mr. President, before I came to the Senate I owned and operated a small business. I know that nearly all small businesses want to provide health care for their employees, but in many cases, as the statistics reveal, doing so is financially impossible. Unfortunately, I believe that we in Government have created road blocks for small businesses seeking to purchase health insurance. My small business "Access to Health Insurance Act of 1990" seeks to remove some of these obstacles and to increase affordability and accessibility for small businesses.

DEDUCTION FOR SOLE PROPRIETORS

According to the Small Business Administration [SBA], there are at least 8.6 million self-employed individuals; they in turn employ about 8.2 million workers. The SBA further states that no more than 47 percent of the self-employed and their employees are covered by health insurance, accounting for one out of every four who are uninsured. It is a fact that inadequate profits is the principal reason small firms do not provide health care coverage for their employees. And in the case of sole proprietors, if there is not sufficient incentive to insure the boss, there is no incentive to insure the employee. While we can not legislate adequate business profits, we should not continue a tax policy which denies full deductibility of health insurance cost to the self-employed.

Section 2 of my bill will modify section 162(1) of the Internal Revenue Code of 1986 to phase-in greater tax deductions for health insurance costs incurred by the self-employed. The deduction would increase to 100 percent by 1994.

STATE MANDATES

In a 1989 study, the Health Insurance Association of America [HIAA] stated that each new mandate enacted between 1982 and 1985 lowered by 1.5 percent the likelihood that a small firm would offer coverage to its employees. Currently, there are over 700 State health insurance mandates across the country; my State of Minnesota has 29. While I support the concept of a basic plan that will provide adequate care, I do not believe that a multitude of mandated services and coverages is necessary in every case, especially where they have the effect of making insurance nearly unavailable. It certainly has not been demonstrated to be cost-effective. In fact, some States are now requiring that a cost effectiveness study be completed before new mandates are enacted.

My proposal is aimed at providing health care for those who are uninsured. Consequently, section 3 of the bill will preempt State health care mandates for employers who have not previously provided a health care plan, or due to financial hardships have dis-

continued a health care plan, as long as a "no-frills" package is offered. The State will review all hardship applications before an employer is permitted to offer the basic health plan.

UNINSURABLE POOLS

Finally, Mr. President, some individuals are uninsured because they are a high risk. Because of a physical or emotional condition, their insurance premiums are prohibitively expensive, if they can purchase coverage at all. I believe it is appropriate for the Federal Government to provide assistance to ensure the accessibility and affordability of health insurance for such Americans. Section 4 of my bill authorizes $50 million to establish State uninsurable pools in 1991, and such sums as may be necessary in subsequent fiscal years. Small businesses would be benefited because individual employees who were uninsurable could be covered under the State's uninsurable-pool policies and would not render a small business group uninsurable as a whole.

Mr. President, my proposal is a basic small business health insurance plan. Its purpose is to provide incentives so that health care will be more affordable and accessible for small businesses. I urge my colleagues to join me in this effort by cosponsoring my bill.

Mr. President, I ask unanimous consent that the complete text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2967

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Access to Health Insurance Act of 1990".

SEC. 2. DEDUCTION FOR HEALTH INSURANCE BY SELF-EMPLOYED.

(a) IN GENERAL.—Section 162(l) of the Internal Revenue Code of 1986 (relating to special rules for health insurance costs of self-employed individuals) is amended—

(1) by striking "25 percent of" in paragraph (1), and

(2) by striking paragraph (6) and inserting the following new paragraph:

"(6) PHASE-IN OF ALLOWANCE.—

"(A) IN GENERAL.—In the case of any taxable year beginning in calendar years 1990 through 1993 the amount allowed as a deduction under this subsection (determined without regard to this paragraph) shall be multiplied by the applicable percentage for such year.

"(B) APPLICABLE PERCENTAGE.—For purposes of this paragraph, the applicable percentage shall be determined in accordance with the following table:

"In the case of taxable years beginning in:	The applicable percentage is:
1990 or 1991	25
1992	50
1993	75."

(b) CONFORMING AMENDMENT.—Paragraph (2) of section 7107(a) of the Omnibus Budget Reconciliation Act of 1989 is repealed.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1989.

SEC. 3. PREEMPTION OF STATE MANDATED BENEFITS FOR CERTAIN EMPLOYER PLANS.

Section 514(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1144(b)) is amended by adding at the end thereof the following new paragraph:

"(9)(A) Subsection (a) shall not apply to any provision of law of any State to the extent that such provision mandates or provides any requirement relating to the type or level of benefits that are to be provided under contracts or policies of health insurance issued to or under a plan that—

"(i) constitutes an employee welfare plan (as defined in section 3(1));

"(ii) is established by an employer who—

"(I) has never provided health insurance coverage to the employees of such employer, or

"(II) has not provided such coverage during the 6-month period ending before the establishment of such plan and demonstrates to the appropriate State official that any termination of any previous employee health insurance coverage was for reasons other than to qualify under this subclause;

"(iii) provides minimum benefits for a covered individual equal to—

"(I) 75 percent of the first $2,000 of excess cost,

"(II) 90 percent of such excess cost from $2,001 to $25,000, and

"(III) 100 percent of such excess cost over $25,000;

"(iv) provides that the annual deductible shall not exceed $350 per person, except that such deductible solely with respect to prenatal care costs shall not exceed $200 per person;

"(v) provides that the annual deductible plus the total annual copayment of excess cost shall not exceed $3,150 per person; and

"(vi) provides maximum lifetime benefits of not less than $100,000.

"(B) For purposes of this paragraph, the term 'excess cost' means the cost of covered services in excess of the annual deductible.

"(C) For purposes of this paragraph, the term 'cost of covered services'—

"(i) means the usual and customary charges for—

"(I) hospital and surgical services prescribed by a physician not to exceed 30 days of hospitalization per year, and $200 per day or the average semiprivate rate for room and board, and services and supplies in the amount of 8 times the room and board rate for each stay, and

"(II) professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than dental, which are rendered by a physician or at the physician's direction; and

"(ii) does not mean any charge for—

"(I) care for injury or disease either arising out of an injury in the course of employment and subject to a workers' compensation or similar coverage, for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle, or other liability insurance policy or equivalent self-insurance, or for which benefits are payable under another policy of accident and health insurance, medicare, or any other governmental program,

"(II) treatment for cosmetic purposes other than for reconstructive surgery when such service is incidental to or follows surgery resulting from injury, sickness, or other diseases of the involved part or when such service is performed on a covered dependent child because of congenital disease or anomaly which has resulted in a functional defect as determined by the attending physician,

"(III) care which is primarily for custodial or domiciliary purposes which would not qualify as eligible services under medicare,

"(IV) confinement in a private room to the extent it is in excess of the institution's charge for the institution's most common semiprivate room, unless a private room is prescribed as medically necessary by a physician, or the institution does not have semiprivate rooms, in which case the institution's most common semiprivate room charge shall be considered to be 90 percent of the institution's lowest private room charge,

"(V) services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceed the prevailing charge in the locality where the service is provided, and

"(VI) services or articles the provision of which is not within the scope of authorized practice of the institution or individual providing the services or articles."

SEC. 4. STATE UNINSURABLE POOLS.

(a) IN GENERAL.—Title XIX of the Public Health Service Act (42 U.S.C. 1901 et seq.) is amended—

(1) in the heading of part D, by striking out "Part D" and inserting in lieu thereof "Part C"; and

(2) by adding at the end thereof the following new part:

"PART D—STATE UNINSURABLE POOLS

"SEC. 1941. DEFINITIONS.

"As used in this part:

"(1) MEDICALLY UNINSURABLE INDIVIDUAL.—The term 'medically uninsurable individual' means an individual—

"(A) who is a resident of a State;

"(B) who does not have health insurance coverage on the date on which the individual applies for health insurance coverage under a qualified uninsurable pool in the State;

"(C) who has received—

"(i) a notice of rejection from one or more insurance providers for coverage that is substantially similar to the coverage offered by the qualified uninsurable pool in the State, without material underwriting restriction;

"(ii) a notice of a reduction or limitation in health insurance benefits that substantially reduces benefits compared to benefits available to other individuals, such as a rider that excludes or modifies benefits for a condition for a period that is not less than 6 months; or

"(iii) a notice of an increase in premiums because of medical reasons for substantially similar health coverage, either applied for or in force, that exceeds the premium rate for coverage provided by the qualified uninsurable pool in the State; and

"(D) who is not eligible to receive benefits under title XVIII or XIX of the Social Security Act (42 U.S.C. 1396 et seq.)

"(2) QUALIFIED UNINSURABLE POOL.—The term 'qualified uninsurable pool' means any organization that—

"(A) is a nonprofit corporation established pursuant to and regulated by State law;

"(B) has a membership that may include—

"(i) insurers writing expense-incurred health insurance;

"(ii) hospital and medical service plan corporations;

"(iii) health maintenance organizations; and

"(iv) employers;

"(C) makes available (without regard to health conditions) to all medically uninsurable individuals in a State, levels of health insurance that is similar to the levels of coverage provided in the State by other insurers;

"(D) charges a pool premium rate that is not less than 125 percent, nor more than 150 percent, of the average premium rates for individual standard risks in the State for comparable coverage;

"(E) finances the losses of the pool through general revenue sources; and

"(F) at the option of the State and to the extent practicable, constrains costs through the use of appropriately managed care.

"SEC. 1942. AUTHORIZATION OF APPROPRIATIONS.

"For the purpose of making allotments to States to carry out the activities described in section 1945, there are authorized to be appropriated $50,000,000 in fiscal year 1991, and such sums as may be necessary in each subsequent fiscal year.

"SEC. 1943. ALLOTMENTS.

"(a) IN GENERAL.—From the total amount appropriated under section 1942 for a fiscal year, the Secretary shall allot to each State for such fiscal year an amount that bears the same ratio to the amount appropriated as the population of the State bears to the population of all States, except as provided in subsections (b) and (d).

"(b) LIMITATIONS.—Notwithstanding subsection (a), the allotment of each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands under this section for a fiscal year—

"(1) shall not be less than one-half of one percent of the total amount appropriated under section 1942 for such fiscal year; and

"(2) shall not be more than 3 percent of the total amount appropriated under such section for such fiscal year.

"(c) ACTION BY SECRETARY.—If a State does not submit an application or description of activities in accordance with section 1946 for a fiscal year or does not otherwise establish an uninsurable pool as required under this part, the amount of funds allotted to such State shall be used by the Secretary to establish, through grants or contracts, a qualified uninsurable pool within the State that meets the requirements of this part.

"(d) REVERSION OF FUNDS.—To the extent that all of the funds appropriated under section 1942 for a fiscal year and available for allotment in such fiscal year are not otherwise allotted to States because—

"(1) one or more States have notified the Secretary that they do not intend to use the full amount of their allotment; or

"(2) some State allotments are offset or repaid under section 1947(b)(3);

such excess shall be allotted among each of the remaining States in proportion to the amount otherwise allotted to such States for such fiscal year without regard to this subsection.

"SEC. 1944. PAYMENTS UNDER ALLOTMENTS TO STATES.

"(a) IN GENERAL.—

"(1) AMOUNT OF PAYMENT.—Each State that—

"(A) has an application approved by the Secretary under section 1946(a); and

"(B) demonstrates to the satisfaction of the Secretary that it will provide from non-Federal sources the State share of the aggregate amount to be expended by the State under the application submitted by the State for the fiscal year for which it requests funds;

shall receive a payment under this section for such fiscal year in an amount (not to exceed its allotment under section 1943 for such fiscal year) equal to the Federal share of the aggregate amount to be expended by the State under the application submitted by the State for such fiscal year.

"(2) FEDERAL SHARE.—The Federal share for each fiscal year shall be 75 percent.

"(3) STATE SHARE.—The State share equals 100 percent minus the Federal share.

"(b) AVAILABILITY.—Any amount paid to a State for a fiscal year and remaining unobligated at the end of such year shall remain available for the next fiscal year to such State for the purposes for which it was made.

"(c) REDUCTION OF PAYMENTS.—The Secretary, at the request of a State, may reduce the amount of payments under subsection (a) by—

"(1) the fair market value of any supplies or equipment furnished to the State under this part; and

"(2) the amount of the pay, allowances, and travel expenses of any officer or employee of the Federal Government, when detailed to the State, and the amount of any other costs incurred in connection with the detail of such officer or employee;

if the furnishing of supplies or equipment or the detail of an officer or employee is for the convenience of, and at the request of, the State and for the purpose of conducting activities described in section 1945. The amount by which any payment is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment or in detailing the personnel, on which the reduction of the payment is based. The amount shall be considered to be part of the payment and to have been paid to the State.

"SEC. 1945. USE OF ALLOTMENTS.

"(a) QUALIFIED UNINSURABLE POOLS.—Except as provided in subsection (b), amounts paid to a State under section 1944 shall be used by the State to develop and operate qualified uninsurable pools to provide health insurance for medically uninsurable individuals.

"(b) UNDERWRITING OF COSTS.—If the Secretary determines a qualified uninsurable pool exists in a State during a fiscal year for which the State receives an allotment under section 1943, the State may use any amount paid to the State under section 1944 for such fiscal year to assist in the underwriting of the costs of such pool that may conform with the requirements of this part.

"(c) TECHNICAL ASSISTANCE.—The Secretary may provide technical assistance to States in planning and operating activities to be carried out under this part.

"(d) ADMINISTRATIVE COSTS.—Not more than 10 percent of the total amount paid to a State under section 1944 for a fiscal year shall be used for administering the funds made available under such section.

"(e) USE OF CERTAIN FUNDS.—A State may transfer not to exceed 10 percent of the amounts provided to such State under other parts of this title each fiscal year to carry out the activities described in this section.

"SEC. 1946. APPLICATION AND DESCRIPTION OF ACTIVITIES; REQUIREMENTS.

"(a) APPLICATION.—

"(1) IN GENERAL.—To receive an allotment for a fiscal year under section 1943, a State shall submit an application to the Secretary in such form, by such date, and containing such information as the Secretary shall require.

"(2) REQUIREMENT.—Each application under paragraph (1) for an allotment under section 1943 for a fiscal year shall contain assurances that the State will meet the requirements of subsection (b).

"(b) ASSURANCES.—As part of the annual application required by subsection (a)(1) for an allotment for any fiscal year, the chief executive officer of each State shall—

"(1) certify that the State agrees to use the funds allotted to the State under section 1943 in accordance with this part;

"(2) certify that the State agrees that Federal funds made available under section 1944 for any period will be used to supplement and increase the level of State, local, and other non-Federal funds that would in the absence of such Federal funds be made available for the programs and activities for which funds are provided under such section and will in no event supplant such State, local, and other non-Federal funds;

"(3) certify the aggregate amount that the State intends to spend to carry out this part, including the amount of Federal funds that the State intends to use; and

"(4) provide such other certifications and assurances as the Secretary may require.

"SEC. 1947. REPORTS AND AUDITS.

"(a) REPORTS.—

"(1) ANNUAL REPORT BY STATE.—

"(A) IN GENERAL.—A State that receives funds under this part shall prepare and submit, to the Secretary, at least one report each year concerning its activities under this part.

"(B) FORM AND CONTENTS.—Reports submitted under this paragraph shall be in such form and contain such information as the Secretary determines (after consultation with the States and the Comptroller General) to be necessary—

"(i) to determine whether funds were expended in accordance with this part and consistent with the insurance needs within the State;

"(ii) to secure a description of the activities of the State under this part, including a summary of the insurance services that were provided, the entities involved in the pool, and the individuals who received such services; and

"(iii) to secure a record of the purposes for which the funds were spent, of the recipients of such funds, and of the progress made toward achieving the purposes for which the funds were provided.

"(C) COPIES.—Copies of the report submitted under this paragraph shall be provided, on request, to any interested person (including any public agency).

"(2) BURDENSOME REPORTING REQUIREMENTS.—In determining the information that States must include in the report required by this subsection, the Secretary shall not establish reporting requirements that are burdensome.

"(b) AUDITING PROCEDURES.—

"(1) ESTABLISHMENT OF FISCAL CONTROLS.—Each State shall establish fiscal control and fund accounting procedures as may be necessary to assure the proper disbursal of and accounting for Federal funds paid to the State under section 1944.

"(2) ANNUAL AUDITS.—

"(A) REQUIREMENT.—Each State shall annually audit its expenditures from payments received under section 1944.

"(B) AUDITING ENTITY.—State audits under this paragraph shall be conducted by an

entity independent of any agency administering a program funded under this part and, insofar as practical, in accordance with the Comptroller General's standards for auditing governmental organizations, programs, activities, and functions.

"(C) COPIES.—Not later than 30 days after the date each audit is completed, the chief executive officer of the State shall transmit a copy of such audit to the Secretary.

"(3) REPAYMENTS TO THE UNITED STATES.—Each State shall, after being provided by the Secretary with adequate notice and opportunity for a hearing within the State, repay to the United States amounts found not to have been expended in accordance with the requirements of this part. If such repayment is not made, the Secretary shall, after providing the State with adequate notice and opportunity for a hearing within the State, offset such amounts against the amount of any allotment to which the State is or may become entitled under this part.

"(4) COPIES.—The State shall make copies of the reports and audits required by this subsection available for public inspection within the State.

"(5) EVALUATION OF EXPENDITURES.—The Comptroller General of the United States shall, from time to time, evaluate the expenditures by States of payments under this part in order to assure that expenditures are consistent with the provisions of this part.

"(6) REPORT BY SECRETARY.—Not later than October 1, 1991, the Secretary shall prepare and submit, to the appropriate Committees of Congress, a report concerning the activities of the States that have received funds under this part and may include in such report any recommendations for appropriate changes in legislation.

"(c) OMNIBUS BUDGET RECONCILIATION ACT OF 1981.—Title XVII of the Omnibus Budget Reconciliation Act of 1981 shall not apply with respect to audits of funds allotted under this part.

"(d) DATA AND INFORMATION.—The Secretary, in consultation with appropriate national organizations, shall develop model criteria and forms for the collection of data and information with respect to services provided under this part to enable States to share uniform data and information with respect to the provision of such services.

"SEC. 1948. WITHHOLDING.

"(a) IN GENERAL.—

"(1) NOTICE AND HEARING.—The Secretary shall, after adequate notice and an opportunity for a hearing conducted within the affected State, withhold funds from any State that does not use its allotment in accordance with the requirements of this part. The Secretary shall withhold such funds until the Secretary finds that the reason for the withholding has been removed and there is reasonable assurance that it will not recur.

"(2) INVESTIGATION.—The Secretary shall not institute proceedings to withhold funds under paragraph (1) unless the Secretary has conducted an investigation concerning whether the State has used its allotment in accordance with the requirements of this part. Investigations required by this paragraph shall be conducted within the affected State by qualified investigators.

"(3) RESPONSE TO COMPLAINTS.—The Secretary shall respond in an expeditious manner to complaints of a substantial or serious nature that a State has failed to use funds in accordance with the requirements of this part.

"(4) MINOR FAILURE.—The Secretary shall not withhold funds under paragraph (1) from a State for a minor failure to comply with the requirements of this part.

"(b) INVESTIGATIONS.—

"(1) BY SECRETARY.—The Secretary shall conduct in several States in each fiscal year investigations of the use of funds received by the States under this part in order to evaluate compliance with the requirements of this part.

"(2) BY COMPTROLLER GENERAL.—The Comptroller General of the United States may conduct investigations of the use of funds received under this part by a State in order to insure compliance with the requirements of this part.

"(c) AVAILABILITY OF RECORDS.—Each State that has received funds from an allotment made to a State under this part, shall make appropriate books, documents, papers, and records available to the Secretary or the Comptroller General of the United States for examination, copying, or mechanical reproduction on or off the premises of the appropriate entity on a reasonable request therefor.

"(d) UNREASONABLE REQUESTS.—

"(1) IN GENERAL.—In conducting any investigation in a State, the Secretary or the Comptroller General of the United States shall not make a request for any information not readily available to such State or make an unreasonable request for information to be compiled, collected, or transmitted in any form not readily available.

"(2) JUDICIAL EXCEPTION.—Paragraph (1) shall not apply to the collection, compilation, or transmittal of data in the course of a judicial proceeding.

"SEC. 1949. NONDISCRIMINATION.

"(a) IN GENERAL.—

"(1) CONSTRUCTION.—For the purpose of applying the prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975, on the basis of handicap under section 504 of the Rehabilitation Act of 1973, on the basis of sex under title IX of the Education Amendments of 1972, or on the basis of race, color, or national origin under title VI of the Civil Rights Act of 1964, programs and activities funded in whole or in part with funds made available under this part are considered to be programs and activities receiving Federal financial assistance.

"(2) GENDER OR RELIGIOUS DISCRIMINATION.—No person shall on the ground of sex or religion be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or in part with funds made available under this part.

"(b) FAILURE TO COMPLY.—Whenever the Secretary finds that a State has failed to comply with a provision of law referred to in paragraph (1) or (2) of subsection (a), or with an applicable regulation (including one prescribed to carry out subsection (a)(2)), the Secretary shall notify the chief executive officer of the State and shall request such officer to secure compliance. If within a reasonable period of time, not to exceed 60 days, the chief executive officer fails or refuses to secure compliance, the Secretary may—

"(1) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

"(2) exercise the powers and functions provided by title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975, or section 504 of the Rehabilitation Act of 1973, as may be applicable; or

"(3) take such other action as may be provided by law.

"(c) REFERENCE TO ATTORNEY GENERAL.—When a matter is referred to the Attorney General under subsection (b)(1), or whenever the Attorney General has reason to believe that a State is engaged in a pattern or practice in violation of a provision of law referred to in paragraph (1) or (2) of subsection (a), the Attorney General may bring a civil action in any appropriate district court of the United States for such relief as may be appropriate, including injunctive relief.

"SEC. 1950. CRIMINAL PENALTY FOR FALSE STATEMENTS.

"Whoever—

"(1) knowingly and willfully makes or causes to be made any false statement or representation of a material fact in connection with the furnishing of items or services for which payment may be made by a State from funds allotted to the State under this part; or

"(2) having knowledge of the occurrence of any event affecting the initial or continued right of an individual to any such payment conceals or fails to disclose such event with an intent fraudulently to secure such payment either in a greater amount than is due or when no such payment is authorized;

shall be fined not more than $25,000 or imprisoned for not more than 5 years, or both."

(b) EFFECTIVE DATE.—The amendment made by this section shall become effective on October 1, 1990.●

By Mr. WALLOP (for himself, Mr. BURNS, Mr. SYMMS, Mr. GRASSLEY, Mr. BOND, Mr. DOLE, Mr. MCCLURE, and Mr. NICKLES):

S. 2968. A bill to exempt certain operators of farm vehicles operating within 600 miles of a farm from the commercial drivers license program; to the Committee on Commerce, Science, and Transportation.

COMMERCIAL MOTOR VEHICLES

● Mr. WALLOP. Mr. President, today I introduce legislation to address a particular problem related to the operation of commercial motor vehicles by farmers and ranchers in my State of Wyoming. I am pleased to be joined in this effort by Senators BURNS, SYMMS, SIMPSON, GRASSLEY, BOND, DOLE, MCCLURE and NICKLES. The purpose of my legislation is to amend the Commercial Motor Vehicle Safety Act of 1986 to permit States with a rural population of 30 percent or more to waive application of the act with respect to farm vehicles, provided such vehicles are operating within 600 miles of a home or place of business.

As my colleagues may recall, in 1986, Congress enacted the Commercial Motor Vehicle Safety Act to establish standards for testing and licensing commercial drivers involved in interstate and intrastate commerce. When the Department of Transportation issued regulations in 1988 to implement this law, it gave States the authority to waive commercial drivers license requirements for farm vehicles. It did so, however, if certain conditions

were met. One of those conditions was that farm vehicles could be driven no further than 150 miles from the home or place of business.

Recently several members of the Wyoming Stockgrowers Association complained to me about just how restrictive this 150-mile limit is to the successful operation of their business. For instance, under this restriction, stockgrowers whose place of business is Evanston, WY, cannot travel the distance to Billings, MT, to deliver their stock unless they obtain a commercial license or hire someone to deliver products to market in their behalf.

In drafting this restriction of 150 miles, the Federal Highway Administration wanted to ensure that the waiver was focused on legitimate farm-to-market operations. Mr. President, let me assure you that these operations by the stockgrowers are indeed legitimate farm-to-market movements.

With this in mind, Mr. President, I find this regulatory condition very impractical and extremely burdensome. I would also like to point out that in safety studies done for farm vehicles, the Department of Transportation found that farmers constituted a very small proportion of fatal truck accidents and to be significantly underinvolved in such accidents. I am certain that this statistic holds true whether or not farmers drive 150 miles, 250 miles, or 600 miles from their home or place of business. Therefore, in the interest of fairness and basic States rights, it seems only reasonable that States should be given the freedom to extend the 150-miles limit to 600 miles, thus allowing farmers a more productive and efficient way of doing business.

We are not attempting to turn seasonal farmers and ranchers into commercial, for-hire truck drivers. We are merely asking that these hardworking men and women be allowed to move their products to and from the most lucrative marketplace. This is what free enterprise is all about, Mr. President; it is the American way, and we should not hamper it with excessive regulatory burdens.

Mr. President, this legislation is supported by the Wyoming Stockgrowers Association, the Wyoming Department of Revenue and Taxation, the Wyoming Department of Agriculture, the National Federation of Independent Business, and the National Fertilizer Institute. I urge my colleagues to join me in cosponsoring this important legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in addition to the authority which the Department of Transportation granted to States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to farm vehicles contained in volume 53, pages 37313-37316, of the FEDERAL REGISTER (September 26, 1988), the Secretary of Transportation, acting through the Administrator of the Federal Highway Administration, by regulation, may authorize a State, with a rural population of 30 percent or more, to exempt an operator of a farm vehicle, who uses such vehicle within 600 miles of the farm at which such vehicle is primarily operated, from the commercial driver's license program established pursuant to the Commercial Motor Vehicle Safety Act of 1986.●

By Mr. GARN (for himself and Mr. HATCH):

S. 2969. A bill to increase the amounts authorized to be appropriated for the Central Utah Project, and for other purposes; to the Committee on Energy and Natural Resources.

CENTRAL UTAH PROJECT COMPLETION ACT

● Mr. GARN. Mr. President, I rise with my colleague from Utah, Senator HATCH, to introduce legislation to complete the Central Utah Water Project [CUP] and to increase the authorization ceiling necessary to accomplish that task.

Since the Utah congressional delegation first introduced the CUP completion bill almost 3 years ago, we have endeavored to craft legislation which is sensitive to the new realities of the arid west. We've learned that in order to build water projects, they must be cost-efficient, environmentally sound, and in this case, address the legitimate needs of Native Americans who are participants in the project.

Our delegation has negotiated with our Colorado River Basin State neighbors, environmental groups in Utah and here in Washington, Indian Tribal representatives, Public Power entities, farmers, and urban water users. We have not found reaching an agreement amongst these disparate groups to be easy. In fact, negotiations have been protracted and frustrating. Yet, now, after some 3 years, we do have a bill which we think meets all of those tests which are demanded of westerners who want Federal water projects.

First, by having the Central Utah Water Conservancy District construct the remaining water delivery features, the cost of construction can be reduced substantially. This is borne out by previous experiences where, with the district in charge of contracting authority, construction costs were reduced by over 35 percent from projections made by the Bureau of Reclamation. The bill authorizes completion of both the municipal and irrigation features of the CUP.

Second, the bill establishes what the National Wildlife Federation refers to as one of, if not the most, aggressive water conservation plans for the Central Utah project of any conservation plan in the country. Local water districts have embraced the proposed plan and look forward to stretching out the scarce water supplies the project will provide.

The legislation requires local cost-sharing for the remaining construction features at a rate of 35 percent. This is a substantial sum for the people of Utah to pay. But, Mr. President I believe this burden is one Utahns will bear in order to assure an adequate, long-term water supply for our State.

Finally, the bill will provide for completion of the long neglected environmental mitigation features associated with the CUP and as I mentioned earlier, will honor the Government's commitments to the Ute Indian Tribe. All-in-all, this legislation represents a substantial change in approach to water resource development projects. I believe it reflects the realities of the 1990's while honoring the commitments made by the Government to the people of Utah in the 1950s. This Government will be made to keep its word. Senator HATCH and I, along with our three House colleagues, are pleased to recommend this bill to the Congress and hope that it will be enacted into law before the 101st Congress comes to an end.

Mr. President, I ask unanimous consent that an explanation of the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLANATION OF THE CENTRAL UTAH PROJECT BILL

Section 1. Short Title and Table of Contents.

Sec. 2. Definitions.

TITLE I. CENTRAL UTAH PROJECT CONSTRUCTION

Sec. 101. Authorization of additional amounts for the Colorado River storage project.—Increases the authorized appropriation ceiling for the Colorado River Storage Project (CRSP) by $679,853,537 to allow for completion of the Central Utah Project; requires implementation of certain recommendations of the Inspector General; prohibits expenditure of funds on construction of certain project features; terminates authorization of certain CRSP participating projects after five years unless cost-sharing is agreed to and construction funds are requested.

Sec. 102. Bonneville unit water development. Authorizes appropriations of $150 million for irrigation and drainage system construction; imposes procedural requirements to be met before construction can begin; provides for construction of the project by the Central Utah Water Conservancy District; authorizes four water resource studies; authorizes $69 million to complete construction of the Diamond Fork System by the District.

Sec. 103. Uinta Basin replacement project. Describes projects authorized for construction to increase efficiency, enhance benefi-

cial uses, and achieve greater water conservation within the Uinta Basin; imposes certain procedural requirements to be met before construction can begin; provides for resolution of matters associated with the Uintah Indian Irrigation Project and the Brush Creek and Jensen Unit.

Sec. 104. Non-Federal contribution. Requires 35% cost-sharing from State or local sources.

Sec. 105. Definite plan report and environmental compliance. Requires completion of a Definite Plan Report and environmental impact statement for the Irrigation and Drainage system; requires compliance with environmental laws; requires initiation of repayment.

Sec. 106. Local development in lieu of irrigation and drainage. Provides for optional development of local projects with Federal financial assistance in lieu of construction of the Irrigation and Drainage System.

Sec. 107. Water management improvement. Imposes water conservation planning and management requirements; provides for funding of water conservation plans and programs; requires establishment of a Utah Water Conservation Advisory Board; provides financial incentive for continued implementation of the Water Management Improvement Plan; provides for judicial review and citizen suits.

Sec. 108. Limitation on hydropower operations. Specifies certain requirements regarding the generation of hydroelectric power project water supplies.

Sec. 109. Operating agreements. Encourages the execution of certain operating agreements.

Sec. 110. Jordan aqueduct prepayment. Allows for the prepayment or other disposition of costs associated with construction of the Jordan Aqueduct System.

Sec. 111. Audit of Central Utah project cost allocations. Requires the Comptroller General to audit project cost allocations and requires the Secretary to re-allocate costs as necessary.

Sec. 112. Excess crops. Imposes financial penalties for the use of project water to grow surplus crops.

TITLE 2. FISH, WILDLIFE, AND RECREATION MITIGATION AND CONSERVATION

Sec. 201. Utah Reclamation Mitigation and Conservation Commission. Establishes Commission to oversee funding and implementation of fish and wildlife mitigation activities for Reclamation projects within the State of Utah; requires the Commission to establish plans for fish and wildlife mitigation activities; sets forth funding requirements for Commission activities and projects.

Sec. 202. Increased project water capability. Requires acquisition of water for fish and wildlife purposes.

Sec. 203. Stream flows. Sets forth requirements for certain minimum stream flows.

Sec. 204. Fish, wildlife, and recreation projects identified or proposed in the 1988 definite plan report for the central Utah project. Requires completion of the fish, wildlife, and recreation projects identified or proposed in the 1988 Definite Plan Report.

Sec. 205. Wildlife lands and improvements. Requires acquisition of big game winter range lands to compensate for the impacts of Federal reclamation projects in Utah; requires construction of big game crossings and wildlife escape ramps.

Sec. 206. Wetlands acquisition, rehabilitation, and enhancement. Sets forth requirements for wetlands and sensitive species.

Sec. 207. Fisheries acquisition, rehabilitation, and enhancement. Specifies requirements for fisheries projects and studies.

Sec. 208. Stabilization of high mountain lakes in the Uinta Mountains. Requires stabilization of certain lakes at levels beneficial for fish habitat and recreation.

Sec. 209. Stream access and riparian habitat development. Specifies requirements for stream access and riparian habitat studies and development in the State of Utah.

Sec. 210. Section 8 expenses. Provides for treatment of fish and wildlife expenses under section 8 of CRSP.

Sec. 211. Jordan and Provo River parkways and natural areas. Specifies the development of certain fish and wildlife and recreational projects.

Sec. 212. Recreation. Specifies development of certain recreational projects.

Sec. 213. Fish and wildlife features in the Colorado River storage project. Specifies development of certain projects to provide mitigation and restoration of watersheds and fish and wildlife resources in Utah impacted by the Colorado River Storage Project.

Sec. 214. Concurrent mitigation appropriations. Requires that project construction be concurrent and proportionate with the implementation of the fish, wildlife, and recreation mitigation and conservation schedule.

Sec. 215. Fish, wildlife, and recreation mitigation schedule. Identifies the schedule as Appendix "B" of the Committee report.

TITLE III. UTAH RECLAMATION MITIGATION AND CONSERVATION ACCOUNT

Sec. 301. Findings and purpose.

Sec. 302. Utah Reclamation Mitigation and Conservation Account. Establishes in the Treasury of the United States a Utah Reclamation Mitigation and Conservation Account; sets forth procedures for State, local, and Federal contributions to the account; sets forth procedures for contributions to the account from power revenues; provides for funding of fish and wildlife mitigation projects from the account; sets forth requirements for management of the account.

TITLE IV. UTE INDIAN RIGHTS SETTLEMENT

Sec. 401. Findings.

Sec. 402. Provisions for payment to the Ute Indian Tribe. Sets forth requirements and procedures for financial compensation to the Ute Indian Tribe; provides for the use of project facilities by the Tribe.

Sec. 403. Tribal use of water. Allows the Tribe to enter into a compact reserving waters to the Tribe; states applicability of certain laws.

Sec. 404. Tribal farming operations. Authorizes $45 million for development of Tribal farming operations.

Sec. 405. Reservoir, stream, habitat and road improvements with respect to the Ute Indian Reservation. Authorizes funds for certain improvements to projects and facilities with respect to the Ute Indian Reservation; sets certain minimum stream flow requirements; provides for land transfers and recreation enhancements.

Sec. 406. Tribal development funds. Establishes $125 million Tribal Development Fund.

Sec. 407. Waiver of claims. Authorizes waiver of water rights claims.

TITLES V–XXIV. RECLAMATION PROJECTS AUTHORIZATION AND ADJUSTMENT ACT OF 1990

These titles incorporate the full text of H.R. 2567 as passed by the House of Representatives on June 14, 1990.●

By Mr. HARKIN:

S. 2971. A bill to amend title XVIII of the Social Security Act to provide for coverage of screening mammography for women at high risk of developing breast cancer, and for other purposes; to the Committee on Finance.

BREAST CANCER SCREENING ACT OF 1990

● Mr. HARKIN. Mr. President, today, I am introducing legislation which will save the lives of thousands of women each year and relieve much suffering. The Breast Cancer Screening Act of 1990 would provide elderly and other American women at high risk of developing breast cancer an annual mammography screening.

Breast Cancer is epidemic in our Nation and its rate is escalating. Fully 1 of every 10 American women will develop breast cancer in their lifetime. Over 44,000 American women will die this year alone from breast cancer, making it the leading cause of cancer deaths among women.

Mr. President. This horrible disease preys most heavily on middle-aged and older women. Well over half of the women who lose their lives are age 50 and over. While we have made great strides in reducing the incidence of many forms of cancer, from 1973 to 1986 there has been a 21.8-percent increase in the number of new cases of breast cancer among women age 50 and older. Over that same period, the breast cancer death rate among these women increased nearly 5 percent.

Mr. President, In my own State of Iowa, breast cancer is a large and growing problem. This year alone, as estimated by the American Cancer Society, some 1,800 Iowa women will develop breast cancer. Even more tragically, over 500 women will lose their lives to this incidious disease.

But there is hope, Mr. President, because while there are no known ways of fully preventing breast cancer, early detection through periodic screening mammography can lower a woman's risk of dying for the disease by 30 percent. The National Cancer Institute and the American Cancer Society recommend that all women age 50 and over get a screening mammography every year. The Office of Technology Assessment [OTA] found that if just the women age 65 and over got an annual mammogram, 5,200 lives could be saved each year. Despite this compelling evidence, the National Center Institute reports that only 16 percent of women age 50–74, had had a mammography screening within the past year. Only 39 percent had ever had it.

Why, if so many lives could be saved, so much suffering avoided, is that figure so low? The experts say that cost and lack of information are major barriers. Most health insurance plans, including Medicare, don't cover preventive or screening services. It's just another example of how our health

care system is penny-wise and pound-foolish. Medicare will pay over $10,000 for care necessary to treat a terminal breast cancer victim, but it won't pay the $50 needed to detect the disease before such expensive treatment is necessary. It would be laughable if it wasn't so tragic.

The Medicare Catastrophic Act created a new benefit for periodic screening mammography for Medicare-eligible women which was scheduled to go into effect this past January. While the Senate voted to preserve this vital benefit, the House of Representatives prevailed and Medicare coverage was ended before it got started. Mr. President, I was also proud to have offered, along with my friend from Michigan, Senator LEVIN, an amendment which would have preserved the screening mammography benefit as well as most of the other important benefits while eliminating the controversial surtax. Unfortunately, our plan wasn't accepted. So today, the women of America are left with nothing. That's got to change.

I was pleased to join my distinguished colleague from Maryland, Senator MIKULSKI in sponsoring legislation earlier this year to restore the breast cancer screening benefit. This bill would provide payment for 80 percent of the cost of an annual screening for Medicare eligible women. The legislation I am introducing today goes a step further. It would offer breast cancer screening to all women in the age group at highest risk for developing breast cancer—those age 50 and older. In addition, my plan would address another barrier to getting this life-saving service—information. The Secretary of Health and Human Services would be required to notify each eligible woman of the availability of the screening and to take steps to promote the use of it. In doing so, he must take into account the special circumstances of rural and other medically underserved areas. My proposal also requires that all mammography screening provided follow strict quality controls to assure that tests are safe and accurate.

Mr. President, I want to relay to you and our other colleagues one personal example of why this proposal is so needed and the good that it would do. Mrs. Jean Kelly of Fonda, IA had been a leader in her community in the fight against cancer. She worked to increase awareness among women of the need for breast cancer screening. Jean even set up a program with the local hospital to provide lower cost mammography screenings. Three years ago, she got her first screening as a part of the program she set up. The screening revealed an abnormality which was later confirmed as cancerous. The cancer was caught at a very early stage, thankfully, and surgery and chemotherapy weren't necessary. Shortly after her experience, Jean urged her sister to get a screening. Remarkably she too was found to have breast cancer. Again, though, it was caught at a very early stage and was removed without complication. She says that both their lives were saved by early detection. I am happy to say that Jean and her sister are healthy today and Jean continues her good work in conjunction with the Iowa chapter of the American Cancer Society.

Mr. President, I believe that one story tells it all. We can save lives if we act. I urge my colleagues to join me in supporting this timely and greatly needed legislation.

I ask unanimous consent that a copy of the bill, the Breast Cancer Screening Act, be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2971

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Breast Cancer Screening Act of 1990".

SEC. 2. MEDICARE COVERAGE OF SCREENING MAMMOGRAPHY.

(a) IN GENERAL.—Section 1861 of the Social Security Act (42 U.S.C. 1395x), as revived by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989 and as amended by the Omnibus Budget Reconciliation Act of 1989, is amended—

(1) in subsection (s)—

(A) in paragraph (11), by striking all that follows "(bb))" and inserting a semicolon,

(B) in paragraph (12)(C), by striking all that follows "area)" and inserting "; and", and

(C) by inserting after paragraph (12) the following new paragraph:

"(13) screening mammography (as defined in subsection (jj));"; and

(2) by inserting after subsection (ii) the following new subsection:

"SCREENING MAMMOGRAPHY

"(jj) The term 'screening mammography' means a radiologic procedure provided to a woman for the purpose of early detection of breast cancer and includes a physician's interpretation of the results of the procedure.".

(b) PAYMENT AND COVERAGE.—Section 1834 of such Act (42 U.S.C. 1395m), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended—

(1) in subsection (b)(1)(B), by inserting "and subject to subsection (c)(1)(A)" after "conversion factors", and

(2) by inserting after subsection (b) the following new subsection:

"(c) PAYMENTS AND STANDARDS FOR SCREENING MAMMOGRAPHY.—

"(1) IN GENERAL.—Notwithstanding any other provision of this part, with respect to expenses incurred for screening mammography (as defined in section 1861(jj))—

"(A) payment may be made only for screening mammography conducted consistent with the frequency permitted under paragraph (2),

"(B) payment may be made only if the screening mammography meets the quality standards established under paragraph (3); and

"(C) the amount of the payment under this part shall be equal to 80 percent of the least of—

"(i) the actual charge for the screening,

"(ii) the fee schedule established under subsection (b) or the fee schedule established under section 1848, whichever is applicable, with respect to both the professional and technical components of the screening mammography, or

"(iii) the limit established under paragraph (4) for the screening mammography.

"(2) FREQUENCY COVERED.—

"(A) IN GENERAL.—Subject to revision by the Secretary under subparagraph (C):

"(i) No payment may be made under this part for screening mammography performed on a woman under 35 years of age.

"(ii) Payment may be made under this part for only 1 screening mammography performed on a woman over 34 years of age, but under 40 years of age.

"(iii) In the case of a woman over 39 years of age who—

"(I) is at a high risk of developing breast cancer (as determined pursuant to factors identified by the Secretary), payment may not be made under this part for a screening mammography performed within 11 months after a previous screening mammography, or

"(II) is not at a high risk of developing breast cancer, payment may not be made under this part for a screening mammography performed within 23 months after a previous screening mammography.

"(B) SPECIAL PAYMENT RULE.—Notwithstanding any other provision of this Act, in the case of a woman over 49 years of age—

"(I) payment may be made for screening mammography for such a woman, regardless of whether or not such a woman meets the eligibility requirements of this title (except that if such a woman does not meet the eligiblity requirements of this title, such payment may be made only to the extent that the cost of the screening mammography is not reimbursable by any other public or private health insurance plan); and

"(II) payment for screening mammography for such a woman who does not meet the eligibility requirements of this title shall be made from the Federal Hospital Insurance Trust Fund described in section 1817.

"(C) REVISION OF FREQUENCY.—

"(i) REVIEW.—The Secretary, in consultation with the Director of the National Cancer Institute, shall review periodically the appropriate frequency for performing screening mammography, based on age and such other factors as the Secretary believes to be pertinent.

"(ii) REVISION OF FREQUENCY.—The Secretary, taking into consideration the review made under clause (i), may revise from time to time the frequency with which screening mammography may be paid for under this subsection, but no such revision shall apply to screening mammography performed before January 1, 1993.

"(3) QUALITY STANDARDS.—The Secretary shall establish standards to assure the safety and accuracy of screening mammography performed under this part. Such standards shall include the requirements that—

"(A) the equipment used to perform the mammography must be specifically designed for mammography and must meet radiologic standards established by the Secretary for mammography;

"(B) the mammography must be performed by an individual who—

"(i) is licensed by a State to perform radiological procedures, or

"(ii) is certified as qualified to perform radiological procedures by such an appropriate organization as the Secretary specifies in regulations;

"(C) the results of the mammography must be interpreted by a physician—

"(i) who is certified as qualified to interpret radiological procedures by such an appropriate board as the Secretary specifies in regulations, or

"(ii) who is certified as qualified to interpret screening mammography procedures by such a program as the Secretary recognizes in regulation as assuring the qualifications of the individual with respect to such interpretation; and

"(D) with respect to the first screening mammography performed on a woman for which payment is made under this part, there are satisfactory assurances that the results of the mammography will be placed in permanent medical records maintained with respect to the woman.

"(4) LIMIT.—

"(A) $50 INDEXED.—Except as provided by the Secretary under subparagraph (B), the limit established under this paragraph—

"(i) for screening mammography performed in 1991, is $50, and

"(ii) for screening mammography performed in a subsequent year is the limit established under this paragraph for the preceding year increased by the percentage increase in the MEI for that subsequent year.

"(B) REDUCTION OF LIMIT.—The Secretary shall review from time to time the appropriateness of the amount of the limit established under this paragraph. The Secretary may, with respect to screening mammography performed in a year after 1992, reduce the amount of such limit as it applies nationally or in any area to the amount that the Secretary estimates is required to assure that screening mammography of an appropriate quality is readily and conveniently available during the year.

"(C) APPLICATION OF LIMIT IN HOSPITAL OUTPATIENT SETTING.—The Secretary shall provide for an appropriate allocation of the limit established under this paragraph between professional and technical components in the case of hospital outpatient screening mammography (and comparable situations) where there is a claim for professional services separate from the claim for the radiologic procedure.

"(5) LIMITING CHARGES OF NONPARTICIPATING PHYSICIANS.—

"(A) IN GENERAL.—In the case of mammography screening performed on or after January 1, 1991, for which payment is made under this subsection, if a nonparticipating physician or supplier provides the screening to an individual entitled to benefits under this part, the physician or supplier may not charge the individual more than the limiting charge (as defined in subparagraph (B), or if less, as defined in subsection (b)(5)(B) or as defined in section 1848(g)(2)).

"(B) LIMITING CHARGE DEFINED.—In subparagraph (A), the term 'limiting charge' means, with respect to screening mammography performed—

"(i) in 1991, 125 percent of the limit established under paragraph (4),

"(ii) in 1992, 120 percent of the limit established under paragraph (4), or

"(iii) after 1992, 115 percent of the limit established under paragraph (4).

"(C) ENFORCEMENT.—If a physician or supplier knowing and willfully imposes a charge in violation of subparagraph (A), the Secretary may apply sanctions against such physician or supplier in accordance with section 1842(j)(2).".

(c) CERTIFICATION OF SCREENING MAMMOGRAPHY QUALITY STANDARDS.—

(1) Section 1863 of such Act (42 U.S.C. 1395z), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended by inserting "or whether screening mammography meets the standards established under section 1834(c)(3)," after "1832(a)(2)(F)(i),".

(2) The first sentence of section 1864(a) of such Act (42 U.S.C. 1395aa(a)), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended by inserting before the period the following: ", or whether screening mammography meets the standards established under section 1834(c)(3)".

(3) Section 1865(a) of such Act (42 U.S.C. 1395bb(a)), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended by inserting "1834(c)(3)," after "1832(a)(2)(F)(i),".

(d) CONFORMING AMENDMENTS.—

(1) Section 1833(a)(2)(E) of such Act (42 U.S.C. 1395l(a)(2)(E)), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended by inserting ", but excluding screening mammography" after "imaging services".

(2) Section 1862(a) of such Act (42 U.S.C. 1395y(a)), as restored by section 201(a)(1) of the Medicare Catastrophic Coverage Repeal Act of 1989, is amended—

(A) in paragraph (1)—

(i) in subparagraph (A), by striking "subparagraph (B), (C), (D), or (E)" and inserting "a succeeding subparagraph",

(ii) in subparagraph (D), by striking "and" at the end,

(iii) in subparagraph (E), by striking the semicolon at the end and inserting ", and", and

(iv) by adding at the end the following new subparagraph:

"(F) in the case of screening mammography, which is performed more frequently than is covered under section 1834(c)(2) or which does not meet the standards established under section 1834(c)(3), and, in the case of screening pap smear, which is performed more frequently than is provided under section 1861(nn);"; and

(B) in paragraph (7), by inserting "or under paragraph (1)(F)" after "(1)(B)".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to screening mammography performed on or after January 1, 1991.

SEC. 3. NOTIFICATION OF MAMMOGRAPHY SCREENING ELIGIBILITY.

(a) IN GENERAL.—The Secretary of Health and Human Services shall implement procedures to—

(1) notify all eligible individuals of the availability of medicare coverage for screening mammography as provided under this Act; and

(2) promote the use of such mammography services taking into account the special circumstances of rural and other medically underserved areas.

(b) IMPLEMENTATION DATES.—The Secretary of Health and Human Services shall implement the procedures described in subsection (a), within 60 days of the date of enactment of this Act, or no later than January 1, 1991, whichever date is earlier.

By Mr. HUMPHREY (for himself and Mr. RUDMAN):

S. 2970. A bill to amend the Wild and Scenic Rivers Act of 1968 by designating segments of the Lamprey River in the State of New Hampshire for study for potential addition to the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

LAMPREY RIVER STUDY ACT OF 1990

● Mr. HUMPHREY. Mr. President, on behalf of Senator RUDMAN, and on my own behalf, I am introducing legislation to designate a 9-mile segment of the Lamprey River in New Hampshire for study under the National Wild and Scenic River System.

The Lamprey River, which is a mere 60 miles from Boston is a remarkably untouched scenic and recreational resource. Not only has the National Park Service included this river segment on its nationwide inventory of outstanding rivers published in January 1982, but the New Hampshire Fish and Game Department has identified the Lamprey as the "most important coastal river for anadromous fish in the State." As part of its commitment to maintaining this vital resource, New Hampshire is involved in a major effort to restore Atlantic, coho and chinook salmon as well as shad, and brown trout to the Lamprey.

Located in the seacoast area of New Hampshire, the Lamprey is a 60-mile long river flowing from Lake Pawtuckaway to the Great Bay. Recently, the Great Bay was designated as part of the National Estuarine Research Reserve System, and the Lamprey is a major tributary of this environmentally sensitive area.

The 9-mile river segment flowing through Lee and Durham has been the focus of an aggressive local protection effort. The Lee selectmen, the Durham Town Council, the State commissioner of environmental services, and Gov. Judd Gregg, have all written the New Hampshire congressional delegation urging that the Lamprey be designated by Congress for study. Their letters point out the river's outstanding scenic, recreational, and natural resource assets, as well as the increasingly high growth rates which threaten the area. I ask that a copy of these letters be inserted in the RECORD at the close of my remarks.

Although the New Hampshire Rivers Management Program has recently placed the Lamprey on its priority list for protective action this effort will not prevent the Federal Energy Regulatory Commission [FERC] from proceeding on an application to build a hydro project at Wiswall Falls in Durham. A dam at this site would affect not only the scenic and recreational value of the Lamprey, but it would also have a deliterious effect on an unusual prehistoric native American site adjacent to the project.

The New Hampshire Historic Preservation Office has determined that this site is eligible for listing on the National Historic Register of places, and currently they are taking steps to seek this designation.

Mr. President, as with the recent study of the Wildcat River, in Jackson, NH, it is our intention that the National Park Service pursue a strategy which emphasizes a Federal-State-local government and private landowner partnership to protect the integrity of the river. Given the fact of the land ownership pattern and the needs of the local community, it would seem apparent that Federal land acquisition would not be necessary to protect the river, should it be designated as a component of the Wild and Scenic Rivers System.

I am confident that a thorough study of the Lamprey River will lead to development of a long-term protection plan and will highlight the outstanding features of the Lamprey. I look forward to working with my colleagues to enact this important legislation.

I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Lamprey River Study Act of 1990".

SEC. 2. STUDY RIVER DESIGNATION.

Section 5(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1276(a)) is amended by adding at the end thereof the following new paragraph:

"(106) Lamprey, New Hampshire.—The segment from the southern Lee town line downstream to Packers Falls Road in Durham.".

SEC. 3. STUDY AND REPORT.

Section 5(b) of the Wild and Scenic Rivers Act (16 U.S.C. 1276(b)) is amended by adding at the end thereof the following new paragraph:

"(8) The study of the Lamprey River, New Hampshire, shall be completed by the Secretary of the Interior and the report thereon submitted not later than 3 years after the date of enactment of this paragraph.".

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this Act.●

STATE OF NEW HAMPSHIRE,
OFFICE OF THE GOVERNOR,
Concord, NH, November 14, 1989.

Hon. GORDON HUMPHREY,
U.S. Senate,
Washington, DC.

DEAR SENATOR HUMPHREY: As Governor, I would like to bring to your attention my support for the proposal of a study for the designation of a segment of the Lamprey River as Wild and Scenic under the National Wild and Scenic River System. In our review of the proposal, it would appear that there is wide spread support for the study in the area affected. This is substantiated by support from elected leaders from the region, and public input that we have received.

The Lamprey River Watershed Association has submitted a nomination for a 9.5 mile segment of the river under New Hampshire's Rivers Management Protection Program. I believe that the river's proximity to the Great Bay provides outstanding resources in terms of its scenic beauty, its value for anadromous fish, and its historic contributions. Thus, I would support federal legislation relative to a study for the inclusion of this part of the Lamprey River for Wild and Scenic designation.

Sincerely,

JUDD GREGG,
Governor.

STATE OF NEW HAMPSHIRE, DEPARTMENT OF ENVIRONMENTAL SERVICES, OFFICE OF THE COMMISSIONER,
Concord, NH, October 23, 1989.

FRANK M. GRAHAM,
Lamprey River Watershed Association,
Durham, NH.

DEAR MR. GRAHAM: Thank you for your letter relative to the proposed study of the Lamprey River under the Federal Wild and Scenic Rivers Act. After reviewing the information which accompanied your letter and the strong local support for the legislation, I am very pleased to support your request to the Congressional delegation.

I appreciate the efforts of your organization on behalf of the Lamprey River and look forward to working with the Watershed Association as you pursue state designation of the river under the New Hampshire Rivers Management and Protection Program.

Sincerely,

ROBERT W. VARNEY,
Commissioner.

TOWN OF LEE, NH,
September 14, 1989.

Senator GORDON J. HUMPHREY,
1 Eagle Square, Suite 507,
Concord, NH.

DEAR SENATOR HUMPHREY: The Selectmen of Lee are deeply concerned about the threat posed to the Lamprey River by the proposed construction of a hydropower facility at Wiswall Dam, Durham. We believe this facility has the potential of causing serious and irreversible damage to the quality and character of riverine life, not only in Durham, but in Lee as well.

The Selectmen have long recognized that the Lamprey River provides our residents with many outstanding scenic, recreational, ecological, cultural, historical and other resource opportunities. In order to protect these resources, not only from the threat of hydropower development, but also from the long-term pressures of rapid growth in the Seacoast region, we urge you and other members of the New Hampshire delegation to work toward the enactment of legislation to designate the Lamprey River for study under the provisions of the National Wild and Scenic Rivers Act.

If such legislation is enacted, the Selectmen intend to work with the National Park Service and with other river towns to assist in the preparation of a local conservation plan to protect the Lamprey River and its environs for future generations.

We hope that you and your colleagues will do everything possible to assist us in this important effort.

Sincerely,

JOSEPH P. FORD,
Chairman, Lee Board of Selectmen.

SEPTEMBER 19, 1989.

The Durham Town Council at their meeting on September 18, 1989 approved the attached Resolution which supports a study for the Lamprey River under the provisions of the National Wild and Scenic Rivers Act. The property owners along the Lamprey River and the community at large support the preservation and the protection of the Lamprey River in its current state.

The Town Council urges you to support our efforts in designating the Lamprey River for study. Please contact me on what additional steps the Town of Durham must undertake to achieve this result. Thank you very much for your prompt consideration of this request.

Sincerely yours,

RALPH FREEDMAN,
Town Administrator.

RESOLUTION NO. 89-12

Now comes the Durham Town Council, the governing body of the Town of Durham, and resolves as follows:

Whereas, the majority of landowners along the Lamprey River in Durham, NH, have petitioned by signature the Durham Town Council to pass a resolution requesting members of Congress to enact legislation designating the Lamprey River for study under the provisions of the National Wild and Scenic Rivers Act; and

Whereas, the petitioners and the Durham town Council recognize that the Lamprey River provides residents with many outstanding recreational, ecological, scenic, historic, and other resources; and

Whereas, the local concern about this important river has increased due to a number of factors, including the proposed development of a hydroelectric facility, which may diminish or preclude local control of this resource; and

Whereas, the National Park Service, under the provisions of the National Wild and Scenic Rivers Act, can assist local communities in preparing a long-term protection plan for the Lamprey River which will rely on the use of existing state and local government authorities, as well as voluntary private landowner actions: Now, therefore, be it

Resolved, That the Durham Town Council hereby urges members of Congress to enact legislation to designate that segment of the Lamprey River within the Durham Town boundaries for study under the provisions of the National Wild and Scenic Rivers Act; and be it further

Resolved, That our intent is to protect the river and its important related adjacent land areas for future generations through the development of a locally prepared and controlled river management plan.

UNIVERSITY OF NEW HAMPSHIRE,
Durham, NH, January 29, 1990.

Hon. GORDON J. HUMPHREY,
Hart Senate Office Building,
Washington, DC.

DEAR SENATOR HUMPHREY: Thank you for your recent inqury regarding the University's position relative to the proposed efforts to designate the Lamprey River for study

under the National Wild and Scenic Rivers Act.

The University does indeed enthusiastically support such a study to determine the eligibility of the Lamprey River for such designation; we would welcome your efforts to introduce legislation to accomplish this study.

If there is anything more that we can do in this regard, please do not hesitate to let us know. Thank you for your interest in the efforts to protect the Lamprey River.

Sincerely,

GEORGE E.R. KINNEAR II,
Executive Vice President.

● Mr. RUDMAN. Mr. President, I rise today to cosponsor legislation introduced by my colleague, Senator HUMPHREY authorizing the National Park Service to study a 9 mile segment of the Lamprey River running through Lee and Durham, NH.

This legislation is the culmination of aggressive and carefully coordinated local efforts to protect the Lamprey from hydroelectric development. In response to plans to construct a dam on the Lamprey River, the Lamprey River Watershed Association [LRWA] was born. This organization has actively pursued Federal legislation authorizing a National Park Service study of the Lamprey River and have successfully garnered the strong support of Governor Gregg, the towns of Durham and Lee, the Strafford Regional Planning Commission as well as the vast majority of local residents and landowners.

Mr. President, the Lamprey River is worth protecting. It serves as a major tributary to the recently protected Great Bay which has been designated as part of the National Estuarine Research Reserve System. In order to meet the protection goals for Great Bay, we must carefully manage and preserve the tributaries that feed into it. With this in mind, in August 1989 Governor Gregg stated:

> The whole question of how we address the issue of use of lakes, rivers and Great Bay is a core concern. . . . I look at them as the crown jewels in the State's natural environment.

The Lamprey River and its shoreline serves as an important breeding ground and habitat for anadromous and game fish, mammals, and birds. One Audubon Society observer has noted 140 species of birds in the Lamprey River corridor. The New Hampshire Fish and Game Department have cited the presence of 26 species of commonly seen mammals, including otter, beaver, mink, coyote, red fox and fisher. Moose and signs of black bear have also been reported.

The Lamprey River corridor contains two historically significant sites that are worth noting. In 1987, the Wiswall Falls Mill Site was placed on the National Register of Historic Places, a site which contains extensive remains of a 19th century mill complex. Archeological digs have discovered Indian sites along the river corridor, one of which is estimated to be over 8,500 years old.

Recreational opportunities abound on the Lamprey River—everything from canoeing and kayaking to swimming, tubing, and fishing. In fact, a survey conducted by the New Hampshire Fish and Game Department found that anglers spent 875 fishing-hours on a ¾-mile stretch of river in a single month. The AMC River Guide highlights several portions of the river for canoeing and goes on to note the challenging rapids at Durham's Packers Falls recreation area for those looking for more adventurous canoeing and kayaking.

Enactment of the legislation we are introducing today will mean a careful study by the National Park Service of the outstanding values I noted previously, along with the development of a comprehensive river management plan in conjunction with the State and local governments as well as private groups, citizens, and landowners. This process has worked well in New Hampshire. Let me highlight the very positive experience in Jackson which led to congressional designation of Wildcat Brook as a Wild and Scenic River. The New Hampshire Congressional Delegation continues to be committed to river protection. Senator HUMPHREY and I have jointly introduced the Pemigewasset and Merrimack River bills in the 101st Congress, both of which have passed both the House and Senate and now await Presidential approval.

Passage of this legislation is critical to delaying the construction of a hydroelectric facility at Wiswall Dam in Durham, which has tentatively received a Federal Energy Regulatory Commission license. Barring a reversal by the FERC or a Federal court, the project is expected to go forward. It is obvious to me that an overwhelming majority of the citizens in these two communities oppose this project and support the legislation we are introducing today.

I continue to support local efforts to preserve our natural resources. I am happy to support this legislation and I look forward to the Senate considering it in the very near future.●

By Mr. MACK (for himself and Mr. GRAHAM):

S. 2972. A bill to amend title XVIII of the Social Security Act to provide an additional payment under part A of the Medicare Program for the operating cost of inpatient hospital services of hospitals with a high proportion of patients who are medicare beneficiaries; to the Committee on Finance.

HIGH MEDICARE HOSPITAL RELIEF ACT OF 1990

● Mr. MACK. Mr. President, I am introducing the High Medicare Hospital Relief Act of 1990 with my colleague, Senator BOB GRAHAM. This legislation is designed to assist the approximately 170 urban and 250 rural hospitals throughout the United States which continue to struggle financially on a day-to-day basis, while providing quality health care to an ever growing Medicare patient population. These hospitals, commonly referred to as high Medicare hospitals, are hospitals for which not less than 65 percent of their inpatient days or discharges are attributable to patients who are entitled to benefits under Medicare part A. The hospitals which would benefit from this legislation are vital to our Nation's health care system, to our seniors, and to my home State of Florida, which has more of these institutions than any other State.

High Medicare hospitals are experiencing severely reduced, and, in some cases, negative Medicare operating margins. These hospitals have little or no choice but to either cut back on medical personnel or consider the rationing of services. Additionally, when these hospitals attempt to cost shift, they become less competitive and risk losing the few non-Medicare payers that they have.

In the Omnibus Budget Reconciliation Act of 1989 [OBRA], Congress asked the Prospective Payment Assessment Commission [ProPAC], to study the issue of high Medicare hospitals. In its preliminary findings, ProPAC acknowledged that hospitals with high Medicare shares have greater negative PPS operating margins than other hospitals. ProPAC's recommendation was to withhold action while it continues further study.

I believe closure of many of these Medicare dependent hospitals is a real possibility unless immediate temporary assistance is given. Doctors and administrators of high Medicare hospitals must not be told, "wait until further study can be performed before we can help you." Mr. President, we cannot wait for yet another study, we must act now.

The High Medicare Hospital Relief Act of 1990 attempts to address a critical disparity between the operating margins of high Medicare and non-high Medicare hosptials. This bill works in a simple, yet logical and equitable way. It provides a formula for an additional payment for each Medicare discharge from a high Medicare hospital in both rural and urban areas.

My home State of Florida has many qualities which make it an ideal place for Americans to spend their golden years. However, States, such as Florida, which have a high concentration of Medicare patients, are being undermined by the very system which was designed to provide assistance to hospitals serving the elderly. This issue is not a question of large States versus small States. It is not a question of urban areas versus rural areas. It is, quite simply, a question of fairness

and equity for all hospitals providing health care for America's seniors.

Mr. President, I urge my colleagues to join Senator GRAHAM and me in supporting the High Medicare Hospital Relief Act of 1990.●

● Mr. GRAHAM. Mr. President, I am introducing a bill with Senator MACK to provide relief to hospitals with a high proportion of Medicare patients. These high Medicare hospitals, whose Medicare utilization is 65 percent or more of total inpatient days, concentrate in the care of the aged.

Average Medicare prospective payment system [PPS] operating margins for high Medicare hospitals are significantly lower than for other hospitals, and they are declining rapidly. Although average per case costs are not significantly different, recent data shows that in the fourth year under PPS, high Medicare hospitals received payments per case 11.9 percent lower than the average hospital.

There are approximately 400 high Medicare hospitals in the United States overall, Medicare dependent hospitals receive about 5 percent of total PPS revenues. About 46 of these hospitals are in Florida, representing 9 percent of high Medicare hospitals.

Mr. President, low PPS margins are problematic for facilities where Medicare is the principal source of revenues. These Medicare-dependent hospitals are less able to revenue shift to make up for shortfalls in Medicare payments. In Florida, these hospitals do not have sufficient numbers of non-Medicare patients to whom they can shift costs, and they must face the Florida Health Care Cost Containment Board, whose responsibility it is to help prevent cost shifting.

In Ormond Beach, FL, Ormond Beach Memorial, a provider with 70 percent Medicare utilization, terminated their lifeline program, an emergency beeper system for seniors who need lifesaving trauma care. Seconds can mean a grave difference in the emergency room, where Ormond Memorial now relies solely on phone and radio service. Leesburg Hospital, another Florida high Medicare provider, closed a specialty pharmacy outlet which prescribed drugs often unavailable in pharmacies. In both cases, seniors lost access to health care because hospitals cut services due to financial duress.

Last year, the Omnibus Budget Reconciliation Act required the Prospective Payment Assessment Commission [ProPAC] to study a potential adjustment to PPS payments for hospitals that have a high Medicare utilization level. ProPAC acknowledged that operating margins for Medicare-dependent hospitals are lower than average operating margins for hospitals. ProPAC, however, recommended further study on the issue before supporting a payment adjustment for high Medicare hospitals.

My colleague from Florida and I are convinced that waiting even a year for further analysis would be detrimental to the Nation's Medicare-dependent hospitals, which desperately need interim relief. Even a temporary measure will prevent downsizing or closure by high Medicare hospitals and will allow more time for additional study of the reasons for low and negative operating margins.

That is why Senator MACK and I are introducing a bill to provide an additional payment under Medicare, part A for hospitals with 65 percent of inpatient days or discharges requiring Medicare reimbursement. The high Medicare adjustment percentage would equal the difference between the average Medicare operating margin of non-Medicare dependent hospitals and the average Medicare operating margin for high Medicare hospitals, with separate payment adjustments for urban and rural hospitals.

Medicare eligible Americans will not benefit from downsized or closed hospitals which could not face declining or outright negative PPS operating margins. Medicare eligible Americans and the hospitals which provide their health care deserve temporary financial assistance while ProPAC takes the time to explain their financial distress and to determine a long-term solution for this problem.

Medicare eligible Americans need access to quality health care. With some 33 million Medicare eligible Americans, we cannot allow further irreparable harm to the institutions dependent on Medicare for most of their reimbursement.

Mr. President, I urge my Senate colleagues to join me in cosponsoring this important measure to provide relief to some of our Nation's neediest hospitals.●

By Mr. DODD (for himself, Mr. KENNEDY, Mr. PACKWOOD, Mr. METZENBAUM, Mr. HATFIELD, Ms. MIKULSKI, Mr. PELL, Mr. SIMON, Mr. ADAMS, Mr. DECONCINI, Mr. BRADLEY, Mr. KERREY, Mr. MOYNIHAN, Mr. KERRY, Mr. INOUYE, Mr. BURDICK, Mr. BIDEN, Mr. ROCKEFELLER, Mr. GORE, Mr. WIRTH, Mr. LIEBERMAN, Mr. KOHL, Mr. LAUTENBERG, Mr. REID, Mr. SARBANES, and Mr. AKAKA):

S. 2973. A bill to grant employees family and temporary medical leave under certain circumstances, and for other purposes; to the Committee on Labor and Human Resources.

FAMILY AND MEDICAL LEAVE ACT OF 1990

● Mr. DODD. Mr. President, I wish I were standing before this body to claim victory in our fight to help American families keep their jobs in times of family crisis. Instead, due to the recent Presidential veto, I am today reintroducing the Family and Medical Leave Act which passed both Houses of Congress with strong bipartisan support just 7 weeks ago. I do this with ever stronger commitment to enacting this profamily legislation. I also do this with great frustration.

Seven weeks ago the Senate passed the Family and Medical Leave Act by unanimous voice vote. A month earlier the House passed the bill by a very strong margin. We did so because too many workers across the Nation lose their jobs when they must care for a newborn, or must be home when an adopted child joins the family, or when a child is seriously ill. Similarly, in the absence of a national standard for job protection, too many workers lose their jobs when they must care for their elderly parents or when they themselves are ill.

During his campaign, George Bush agreed. Addressing a women's conference in the fall of 1988, he said:

> We also need to assure that women do not have to worry about getting their jobs back after having a child or during a serious illness. This is what I mean when I talk about a gentler nation. That isn't fair the other way, and it's not right and we've got to do something about it.

Once in office, this campaign promise somehow evaporated. The President has reversed himself on this critical family issue and vetoed the bill. Now he only supports voluntary family leave. So-called voluntary family leave is exactly what we have now. Many employers have excellent policies in place, and I commend them for their leadership. But the vast majority of American workers risk their jobs when they seek unpaid time to care for their families.

The bill I am introducing today picks up where the Senate left off on June 14. Workers would have the right to job protection for up to 12 weeks in times of family crisis—the joyful times of birth or adoption, and the difficult times of family illness. Small businesses are exempt. Any business with fewer than 50 employees is not covered, which means 95 percent of businesses will not be covered. This is a very reasonable proposal, a carefully crafted compromise that addresses concerns raised during eight hearings and extensive debate in the Senate during the 100th and 101st Congresses.

I am very pleased to be joined by a large number of my colleagues as cosponsors, including Senator KENNEDY, chairman of the Committee on Labor and Human Resources, and Senator PACKWOOD. They have both worked long and hard to make this legislation a reality. I also appreciate the support given to family leave legislation in June by so many other colleagues here.

I have pledged to do everything possible to put this bill back on the Presi-

dent's desk. If the press of other Senate business precludes further consideration of the bill again this year, then I hope there will be an opportunity early next year. Every poll on this issue shows that three-quarters of the American people support family leave legislation. At some point, I am confident that the President will respond to the needs of working families and will carry through on his campaign pledge by signing this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2973

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Family and Medical Leave Act of 1990".

(b) TABLE OF CONTENTS.—

Section 1. Short title; table of contents.
Sec. 2. Findings and purposes.
TITLE I—GENERAL REQUIREMENTS FOR LEAVE
Sec. 101. Definitions.
Sec. 102. Leave requirement.
Sec. 103. Certification.
Sec. 104. Employment and benefits protection.
Sec. 105. Prohibited acts.
Sec. 106. Administrative enforcement.
Sec. 107. Enforcement by civil action.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) the number of single-parent households and two-parent households in which the single parent or both parents work is increasing significantly;

(2) it is important for the development of children and the family unit that fathers and mothers be able to participate in early childrearing and the care of their family members who have serious health conditions;

(3) the lack of employment policies to accommodate working parents can force individuals to choose between job security and parenting;

(4) there is inadequate job security for employees who have serious health conditions that prevent them from working for temporary periods;

(5) due to the nature of the roles of men and women in our society, the primary responsibility for family caretaking often falls on women, and such responsibility affects their working lives more than it affects the working lives of men; and

(6) employment standards that apply to one gender only have serious potential for encouraging employers to discriminate against employees and applicants for employment who are of that gender.

(b) PURPOSES.—It is the purpose of this Act—

(1) to balance the demands of the workplace with the needs of families, to promote the stability and economic security of families, and to promote national interests in preserving family integrity;

(2) to entitle employees to take reasonable leave for medical reasons, for the birth or adoption of a child, and for the care of a child, spouse, or parent who has a serious health condition;

(3) to accomplish such purposes in a manner which accommodates the legitimate interests of employers;

(4) to accomplish such purposes in a manner which, consistent with the Equal Protection Clause of the Fourteenth Amendment, minimizes the potential for employment discrimination on the basis of sex by ensuring generally that leave is available for eligible medical reasons (including maternity-related disability) and for compelling family reasons, on a gender-neutral basis; and

(5) to promote the goal of equal employment opportunity for women and men, pursuant to such clause.

TITLE I—GENERAL REQUIREMENTS FOR LEAVE

SEC. 101. DEFINITIONS.

As used in this title:

(1) COMMERCE.—The terms "commerce" and "industry or activity affecting commerce" mean any activity, business, or industry in commerce or in which a labor dispute would hinder or obstruct commerce or the free flow of commerce, and include "commerce" and any activity or industry "affecting commerce" within the meaning of the Labor Management Relations Act, 1947 (29 U.S.C. 141 et seq.).

(2) ELIGIBLE EMPLOYEE.—

(A) IN GENERAL.—The term "eligible employee" means any employee, as defined in section 3(e) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(e)), who has been employed by the employer with respect to whom leave is sought under section 102 for at least—

(i) 1,000 hours of service during the previous 12-month period; and

(ii) 12 months.

(B) EXCLUSIONS.—The term "eligible employee" does not include—

(i) any Federal officer or employee covered under subchapter V of chapter 63 of title 5, United States Code (as added by title II); or

(ii) any employee of an employer who is employed at a worksite at which such employer employs less than 50 employees if the total number of employees employed by that employer within 75 miles of that worksite is less than 50.

(3) EMPLOY; STATE.—The terms "employ" and "State" have the same meanings given such terms in sections 3(g) and 3(c), respectively, of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(g), 203(a), 203(c)).

(4) EMPLOYEE.—The term "employee" means any individual employed by an employer.

(5) EMPLOYER.—

(A) IN GENERAL.—The term "employer"—

(i) means any person engaged in commerce or in any industry or activity affecting commerce who employs 50 or more employees for each working day during each of 20 or more calendar workweeks in the current or preceding calendar year;

(ii) includes—

(I) any person who acts, directly or indirectly, in the interest of an employer to any of the employees of such employer; and

(II) any successor in interest of an employer; and

(iii) includes any public agency, as defined in section 3(x) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(x)).

(B) PUBLIC AGENCY.—For purposes of subparagraph (A)(iii), a public agency shall be considered to be a person engaged in commerce or in an industry or activity affecting commerce.

(6) EMPLOYMENT BENEFITS.—The term "employment benefits" means all benefits provided or made available to employees by an employer, including group life insurance, health insurance, disability insurance, sick leave, annual leave, educational benefits, and pensions, regardless of whether such benefits are provided by a policy or practice of an employer or through an employee benefit plan as defined in section 3(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(1)).

(7) HEALTH CARE PROVIDER.—The term "health care provider" means—

(A) a doctor of medicine or osteopathy that is legally authorized to practice medicine and surgery by the State in which the doctor performs such function or action; or

(B) any other person determined by the Secretary to be capable of providing health care services.

(8) PARENT.—The term "parent" means the biological parent of the child or an individual who stood in loco parentis to a child when the child was a son or daughter.

(9) PERSON.—The term "person" has the same meaning given such term in section 3(a) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(a)).

(10) REDUCED LEAVE SCHEDULE.—The term "reduced leave schedule" means leave scheduled for fewer than an employee's usual number of hours per workweek or hours per workday.

(11) SECRETARY.—The term "Secretary" means the Secretary of Labor.

(12) SERIOUS HEALTH CONDITION.—The term "serious health condition" means an illness, injury, impairment, or physical or mental condition that involves—

(A) inpatient care in a hospital, hospice, or residential medical care facility; or

(B) continuing treatment or continuing supervision by a health care provider.

(13) SON OR DAUGHTER.—The term "son or daughter" means a biological, adopted, or foster child, a stepchild, a legal ward, or a child of a person standing in loco parentis, who is—

(A) under 18 years of age; or

(B) 18 years of age or older and incapable of self-care because of a mental or physical disability.

SEC. 102. LEAVE REQUIREMENT.

(a) IN GENERAL.—

(1) ENTITLEMENT TO LEAVE.—Subject to section 103, an eligible employee shall be entitled to 12 workweeks of leave during any 12-month period—

(A) because of the birth of a son or daughter of the employee;

(B) because of the placement of a son or daughter with the employee for adoption or foster care;

(C) to care for the son, daughter, spouse, or parent of the employee who has a serious health condition; or

(D) because of a serious health condition that makes the employee unable to perform the functions of the position of such employee.

(2) EXPIRATION OF ENTITLEMENT.—The entitlement to leave under subparagraphs (A) and (B) of paragraph (1) shall expire at the end of the 12-month period beginning on the date of the birth or placement involved.

(3) INTERMITTENT LEAVE.—Leave under subparagraph (A) or (B) of paragraph (1) shall not be taken by an employee intermittently unless the employee and the employer of the employee agree otherwise. Subject to subsection (e), leave under subparagraph (C) or (D) of paragraph (1) may be taken intermittently when medically necessary.

(b) REDUCED LEAVE.—On agreement between the employer and the employee, leave under subsection (a) may be taken on a reduced leave schedule. Such reduced leave schedule shall not result in a reduction in the total amount of leave to which such employee is entitled.

(c) UNPAID LEAVE PERMITTED.—Except as provided in subsection (d), leave under subsection (a) may consist of unpaid leave.

(d) RELATIONSHIP TO PAID LEAVE.—

(1) UNPAID LEAVE.—If an employer provides paid leave for fewer than 12 workweeks, the additional weeks of leave necessary to attain the 12 workweeks of leave required under this title may be provided without compensation.

(2) SUBSTITUTION OF PAID LEAVE.—

(A) IN GENERAL.—An eligible employee may elect, or an employer may require the employee, to substitute any of the accrued paid vacation leave, personal leave, or family leave of the employee for leave provided under subparagraph (A), (B), or (C) of subsection (a)(1) for any part of the 12-week period of such leave under such subparagraphs.

(B) HEALTH CONDITION.—An eligible employee may elect, or an employer may require the employee, to substitute any of the accrued paid vacation leave, personal leave, or medical or sick leave of the employee for leave provided under paragraph (1)(D) of subsection (a) for any part of the 12-week period of such leave under such paragraph, except that nothing in this Act shall require an employer to provide paid sick leave or paid medical leave in any situation in which such employer would not normally provide any such paid leave.

(e) FORESEEABLE LEAVE.—

(1) REQUIREMENT OF NOTICE.—In any case in which the necessity for leave under subparagraph (A) or (B) of subsection (a)(1) is foreseeable based on an expected birth or adoption, the eligible employee shall provide the employer with prior notice of such expected birth or adoption in a manner that is reasonable and practicable.

(2) DUTIES OF EMPLOYEE.—In any case in which the necessity for leave under subparagraph (C) or (D) of subsection (a)(1) is foreseeable based on planned medical treatment or supervision, the employee—

(A) shall make a reasonable effort to schedule the treatment or supervision so as not to disrupt unduly the operations of the employer, subject to the approval of the health care provider of the employee or the health care provider of the son, daughter, spouse, or parent of the employee; and

(B) shall provide the employer with prior notice of the treatment or supervision in a manner that is reasonable and practicable.

(f) SPOUSES EMPLOYED BY THE SAME EMPLOYER.—In any case in which a husband and wife entitled to leave under subsection (a) are employed by the same employer, the aggregate number of workweeks of leave to which both may be entitled may be limited to 12 workweeks during any 12-month period, if such leave is taken—

(1) under subparagraph (A) or (B) of subsection (a)(1); or

(2) to care for a sick parent under subparagraph (C) of such subsection.

SEC. 103. CERTIFICATION.

(a) IN GENERAL.—An employer may require that a claim for leave under subparagraph (C) or (D) of section 102(a)(1) be supported by a certification issued by the health care provider of the eligible employee or of the son, daughter, spouse, or parent of the employee, as appropriate. The employee shall provide a copy of such certification to the employer.

(b) SUFFICIENT CERTIFICATION.—Certification provided under subsection (a) shall be sufficient if it states—

(1) the date on which the serious health condition commenced;

(2) the probable duration of the condition;

(3) the appropriate medical facts within the knowledge of the health care provider regarding the condition; and

(4)(A) for purposes of leave under section 102(a)(1)(C), an estimate of the amount of time that the eligible employee is needed to care for the son, daughter, spouse, or parent; and

(B) for purposes of leave under section 102(a)(1)(D), a statement that the employee is unable to perform the functions of the position of the employee.

(c) SECOND OPINION.—

(1) IN GENERAL.—In any case in which the employer has reason to doubt the validity of the certification provided under subsection (a) for leave under subparagraph (C) or (D) of section 102(a)(1), the employer may require, at its own expense, that the eligible employee obtain the opinion of a second health care provider designated or approved by the employer concerning any information certified under subsection (b) for such leave.

(2) LIMITATION.—A health care provider designated or approved under paragraph (1) shall not be employed on a regular basis by the employer.

(d) RESOLUTION OF CONFLICTING OPINIONS.—

(1) IN GENERAL.—In any case in which the second opinion described in subsection (c) differs from the opinion in the original certification provided under subsection (a), the employer may require, at its own expense, that the employee obtain the opinion of a third health care provider designated or approved jointly by the employer and the employee concerning the information certified under subsection (b).

(2) FINALITY.—The opinion of the third health care provider concerning the information certified under subsection (b) shall be considered to be final and shall be binding on the employer and the employee.

(e) SUBSEQUENT RECERTIFICATION.—The employer may require that the eligible employee obtain subsequent recertifications on a reasonable basis.

SEC. 104. EMPLOYMENT AND BENEFITS PROTECTION.

(a) RESTORATION TO POSITION.—

(1) IN GENERAL.—Any eligible employee who takes leave under section 102 for its intended purpose shall be entitled, on return from such leave—

(A) to be restored by the employer to the position of employment held by the employee when the leave commenced; or

(B) to be restored to an equivalent position with equivalent employment benefits, pay, and other terms and conditions of employment.

(2) LOSS OF BENEFITS.—The taking of leave under section 102 shall not result in the loss of any employment benefit accrued prior to the date on which the leave commenced.

(3) LIMITATIONS.—Except as provided in subsection (b), nothing in this section shall be construed to entitle any restored employee to—

(A) the accrual of any seniority or employment benefits during any period of leave; or

(B) any right, benefit, or position of employment other than that to which the employee was entitled to on the date the leave was commenced.

(4) CERTIFICATION.—As a condition of restoration under paragraph (1), the employer may have a policy that requires each employee to receive certification from the health care provider of the employee that the employee is able to resume work, except that nothing in this paragraph shall supersede a valid State or local law or a collective bargaining agreement that governs the return to work of employees taking leave under section 102(a)(1)(D).

(5) CONSTRUCTION.—Nothing in this subsection shall be construed to prohibit an employer from requiring an employee on leave under section 102 to periodically report to the employer on the status and intention of the employee to return to work.

(c) MAINTENANCE OF HEALTH BENEFITS.—During any period that an eligible employee takes leave under section 102, the employer shall maintain coverage under any group health plan (as defined in section 162(i)(2) of the Internal Revenue Code of 1986) for the duration of such leave at the level and under the conditions coverage would have been provided if the employee had continued in employment continuously from the date the employee commenced the leave until the date the employee is restored under subsection (a).

SEC. 105. PROHIBITED ACTS.

(a) INTERFERENCE WITH RIGHTS.—

(1) EXERCISE OF RIGHTS.—It shall be unlawful for any employer to interfere with, restrain, or deny the exercise of or the attempt to exercise, any right provided under this title.

(2) DISCRIMINATION.—It shall be unlawful for any employer to discharge or in any other manner discriminate against any individual for opposing any practice made unlawful by this title.

(b) INTERFERENCE WITH PROCEEDINGS OR INQUIRIES.—It shall be unlawful for any person to discharge or in any other manner discriminate against any individual because such individual—

(1) has filed any charge, or has instituted or caused to be instituted any proceeding, under or related to this title;

(2) has given, or is about to give, any information in connection with any inquiry or

proceeding relating to any right provided under this title; or

(3) has testified, or is about to testify in any inquiry or proceeding relating to any right provided under this title.

SEC. 106. ADMINISTRATIVE ENFORCEMENT.

(a) IN GENERAL.—The Secretary shall issue such rules and regulations as are necessary to carry out this section, including rules and regulations concerning notice of foreseeable leave, service of complaints, notice of hearings, answers and amendments to complaints, and copies of orders and records of proceedings.

(b) CHARGES.—

(1) FILING.—Any person (including a class or organization, on behalf of any person) alleging an act that violates any provision of this title may file a charge respecting such violation with the Secretary. Charges shall be in such form and contain such information as the Secretary shall require by regulation.

(2) NOTIFICATION.—Not more than 10 days after the Secretary receives notice of a charge under paragraph (1), the Secretary—

(A) shall serve a notice of the charge on the person charged with the violation; and

(B) shall inform such person and the charging party as to the rights and procedures provided under this title.

(3) TIME OF FILING.—A charge shall not be filed more than 1 year after the date of the last event constituting the alleged violation.

(4) SETTLEMENT PRIOR TO DETERMINATION BY SECRETARY.—The charging party and the person charged with the violation under this section may enter into a settlement agreement concerning the violation alleged in the charge before any determination is reached by the Secretary under subsection (c). Such an agreement shall be effective unless the Secretary determines, not later than 30 days after the notice of the proposed agreement is received, that the agreement is not generally consistent with the purposes of this title.

(c) INVESTIGATION AND COMPLAINT ON NOTICE OF A CHARGE.—

(1) INVESTIGATION.—Within the 60-day period after the Secretary receives any charge respecting a violation of this title, the Secretary shall investigate the charge and issue a complaint based on the charge or dismiss the charge.

(2) DISMISSAL.—If, while conducting an investigation under paragraph (1), the Secretary determines that there is no reasonable basis for the charge that is being investigated, the Secretary shall dismiss the charge and promptly notify the charging party and the respondent as to the dismissal.

(3) COMPLAINT BASED ON CHARGE.—If, while conducting an investigation under paragraph (1), the Secretary determines that there is a reasonable basis for the charge, the Secretary shall issue a complaint based on the charge and promptly notify the charging party and the respondent as to the issuance.

(4) SETTLEMENT WITH SECRETARY.—On the issuance of a complaint under paragraph (3), the Secretary and the respondent may enter into a settlement agreement concerning a violation alleged in the complaint. Any such settlement shall not be entered into over the objection of the charging party, unless the Secretary determines that the settlement provides a full remedy for the charging party.

(5) CIVIL ACTIONS.—If, at the end of the 60-day period referred to in paragraph (1), the Secretary—

(A) has not made a determination under paragraph (2) or (3);

(B) has dismissed the charge under paragraph (2); or

(C) has disapproved a settlement agreement under subsection (b)(4) or has not entered into a settlement agreement under paragraph (4) of this subsection;

the charging party may elect to bring a civil action under section 107. Such election shall bar further administrative action by the Secretary with respect to the violation alleged in the charge.

(6) COMPLAINT AND RELIEF ON INITIATIVE OF SECRETARY.—

(A) COMPLAINT.—The Secretary may issue and serve a complaint alleging a violation of this title on the basis of information and evidence gathered as a result of an investigation initiated by the Secretary pursuant to section 108.

(B) RELIEF.—On the issuance of a complaint under subparagraph (A), the Secretary may petition the United States district court for the district in which the violation is alleged to have occurred, or in which the respondent resides or transacts business, for appropriate temporary relief or a restraining order. On the filing of any such petition, the court shall cause notice of the petition to be served on the respondent, and the court shall have jurisdiction to grant to the Secretary such temporary relief or restraining order as the court determines just and proper.

(d) RIGHTS OF PARTIES.—

(1) SERVICE OF COMPLAINT.—In any case in which a complaint is issued under subsection (c), the Secretary shall, not later than 10 days after the date on which the complaint is issued, cause to be served on the respondent a copy of the complaint.

(2) PARTIES TO COMPLAINT.—Any person filing a charge alleging a violation of this title may elect to be a party to any complaint filed by the Secretary alleging such violation. Such election must be made prior to the commencement of a hearing.

(3) CIVIL ACTION.—The failure of the Secretary to comply in a timely manner with any obligation assigned to the Secretary under this title shall entitle the charging party to elect, at the time of such failure, to bring a civil action under section 107.

(e) CONDUCT OF HEARING.—

(1) PROSECUTION BY SECRETARY.—The Secretary shall have the duty to prosecute any complaint issued under subsection (c).

(2) HEARING.—An administrative law judge shall conduct a hearing on the record with respect to any complaint issued under this title. The hearing shall be commenced not later than 60 days after the issuance of such complaint, unless the judge, in the discretion of the judge, determines that the purposes of this Act would best be furthered by commencement of the action after the expiration of such period.

(f) FINDINGS AND CONCLUSIONS.—

(1) IN GENERAL.—After a hearing conducted under this section, the administrative law judge shall promptly make findings of fact and conclusions of law, and, if appropriate, issue an order for relief as provided in section 109.

(2) NOTIFICATION CONCERNING DELAY.—The administrative law judge shall inform the parties, in writing, of the reason for any delay in making such findings and conclusions if such findings and conclusions are not made within 60 days after the conclusion of such hearing.

(g) FINALITY OF DECISION; REVIEW.—

(1) FINALITY.—The decision and order of the administrative law judge under this section shall become the final decision and order of the Secretary unless, on appeal by an aggrieved party taken not more than 30 days after such action, the Secretary modifies or vacates the decision, in which case the decision of the Secretary shall be the final decision.

(2) REVIEW.—Not later than 60 days after the entry of the final order of the Secretary under paragraph (1), any person aggrieved by such final order may seek a review of such order in the United States court of appeals for the circuit in which the violation is alleged to have occurred or in which the employer resides or transacts business.

(3) JURISDICTION.—On the filing of the record of an order under this subsection with the court, the jurisdiction of the court shall be exclusive and its judgment shall be final, except that the same shall be subject to review by the Supreme Court of the United States on writ of certiorari or certification as provided in section 1254 of title 28, United States Code.

(h) COURT ENFORCEMENT OF ADMINISTRATIVE ORDERS.—

(1) POWER OF SECRETARY.—If an order of the Secretary is not appealed under subsection (g)(2), the Secretary may petition the United States district court for the district in which the violation is alleged to have occurred, or in which the respondent resides or transacts business, for the enforcement of the order of the Secretary, by filing in such court a written petition praying that such order be enforced.

(2) JURISDICTION.—On the filing of a petition under paragraph (1), the court shall have jurisdiction to make and enter a decree enforcing the order of the Secretary. In such a proceeding, the order of the Secretary shall not be subject to review.

(3) DECREE OF ENFORCEMENT.—If, on appeal of an order under subsection (g)(2), the United States court of appeals does not reverse or modify such order, such court shall have the jurisdiction to make and enter a decree enforcing the order of the Secretary.

SEC. 107. ENFORCEMENT BY CIVIL ACTION.

(a) RIGHT TO BRING CIVIL ACTION.—

(1) IN GENERAL.—Subject to the limitations contained in this section, an eligible employee or any person, including a class or organization on behalf of any eligible employee, or the Secretary may bring a civil action against any employer (including any State employer) to enforce the provisions of this title in any appropriate court of the United States or in any State court of competent jurisdiction.

(2) NO CHARGE FILED.—Subject to paragraph (3), a civil action may be commenced under this subsection without regard to whether a charge has been filed under section 106(b).

(3) LIMITATIONS.—No civil action may be commenced under paragraph (1) if the Secretary—

(A) has approved a settlement agreement or has failed to disapprove a settlement agreement under section 106(b)(4) or 106(c)(4), as appropriate, if such action is based on a violation alleged in the charge and resolved by the agreement; or

(B) has issued a complaint under section 106(c)(3) or 106(c)(6), if such action is based upon a violation alleged in the complaint.

(4) ENFORCEMENT OF SETTLEMENT AGREEMENTS.—Notwithstanding paragraph (3)(A), a civil action may be commenced to enforce the terms of any such settlement agreement.

(5) TIMING OF COMMENCEMENT OF CIVIL ACTION.—

(A) IN GENERAL.—Except as provided in subparagraph (B), no civil action may be commenced later than 1 year after the date of the last event that constitutes the alleged violation.

(B) EXCEPTION.—In any case in which—

(i) a timely charge is filed under section 106(b); and

(ii) the failure of the Secretary to issue a complaint or enter into a settlement agreement based on the charge (as provided under section 106(c)(4)) occurs later than 11 months after the date on which any alleged violation occurred;

the charging party may commence a civil action not later than 60 days after the date of such failure.

(6) AGENCIES.—The Secretary shall not bring a civil action against any agency of the United States.

(7) EXCLUSIVE JURISDICTION ON COMPLAINT.—On the filing of a complaint with the court under this subsection, the jurisdiction of the court shall be exclusive.

(b) VENUE.—An action brought under subsection (a) in a district court of the United States may be brought—

(1) in any appropriate judicial district under section 1391 of title 28, United States Code; or

(2) in the judicial district in the State in which—

(A) the employment records relevant to such violation are maintained and administered; or

(B) the aggrieved person worked or would have worked but for the alleged violation.

(c) NOTIFICATION OF THE SECRETARY; RIGHT TO INTERVENE.—A copy of the complaint in any action by an eligible employee under subsection (a) shall be served on the Secretary by certified mail. The Secretary shall have the right to intervene in a civil action brought by an employee under subsection (a).

(d) ATTORNEYS FOR THE SECRETARY.—In any civil action under subsection (a), attorneys appointed by the Secretary may appear for and represent the Secretary, except that the Attorney General and the Solicitor General shall conduct any litigation in the Supreme Court.

SEC. 108. INVESTIGATIVE AUTHORITY.

(a) IN GENERAL.—To ensure compliance with the provisions of this title, or any regulation or order issued under this title, the Secretary shall have, subject to subsection (c), the investigative authority provided under section 11(a) of the Fair Labor Standards Act of 1938 (29 U.S.C. 211(a)).

(b) OBLIGATION TO KEEP AND PRESERVE RECORDS.—Any employer shall keep and preserve records in accordance with section 11(c) of the Fair Labor Standards Act of 1938 (29 U.S.C. 211(c)) and in accordance with regulations issued by the Secretary.

(c) REQUIRED SUBMISSIONS GENERALLY LIMITED TO AN ANNUAL BASIS.—The Secretary shall not under the authority of this section require any employer or any plan, fund, or program to submit to the Secretary any books or records more than once during any 12-month period, unless the Secretary has reasonable cause to believe there may exist a violation of this title or any regulation or order issued pursuant to this title, or is investigating a charge pursuant to section 106.

(d) SUBPOENA POWERS, ETC.—For the purposes of any investigation provided for in this section, the Secretary shall have the subpoena authority provided for under section 9 of the Fair Labor Standards Act of 1938 (29 U.S.C. 209).

SEC. 109. RELIEF.

(a) INJUNCTIVE RELIEF.—

(1) CEASE AND DESIST.—On finding a violation under section 106, the administrative law judge shall issue an order requiring such person to cease and desist from any act or practice that violates this title.

(2) INJUNCTIONS.—In any civil action brought under section 107, the court may grant as relief against any employer (including any State employer) any permanent or temporary injunction, temporary restraining order, or other equitable relief as the court determines appropriate.

(b) MONETARY DAMAGES.—

(1) IN GENERAL.—Any employer (including any State employer) that violates any provision of this title shall be liable to the injured party in an amount equal to—

(A) any wages, salary, employment benefits, or other compensation denied or lost to such eligible employee by reason of the violation, plus interest on the total monetary damages calculated at the prevailing rate; and

(B) an additional amount equal to the greater of—

(i) the amount determined under subparagraph (A), as liquidated damages; or

(ii) consequential damages, not to exceed 3 times the amount determined under such subparagraph.

(2) GOOD FAITH.—If an employer who has violated this title proves to the satisfaction of the administrative law judge or the court that the act or omission that violated this title was in good faith and that the employer had reasonable grounds for believing that the act or omission was not a violation of this title, such judge or the court may, in its discretion, reduce the amount of the liability provided for under this subsection to the amount determined under paragraph (1)(A).

(c) ATTORNEYS' FEES.—A prevailing party in an action described under this section (other than the United States) may be awarded a reasonable attorneys' fee as part of the costs, in addition to any relief awarded. The United States shall be liable for costs in the same manner as a private person.

(d) LIMITATION.—Damages awarded under subsection (b) shall not accrue from a date that is later than 2 years prior to the date on which a charge is filed under section 106(b) or a civil action is brought under section 107.

SEC. 110. SPECIAL RULES CONCERNING EMPLOYEES OF LOCAL EDUCATIONAL AGENCIES.

(a) IN GENERAL.—Except as otherwise provided in this section, the rights (including the rights under section 104, which shall extend throughout the period of any employee's leave under this section), remedies, and procedures under this Act shall apply to—

(1) any local educational agency (as defined in section 1471(12) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2891(12))) and its employees; and

(2) any private elementary and secondary school and its employees.

(b) LEAVE DOES NOT VIOLATE CERTAIN OTHER FEDERAL LAWS.—A local educational agency and a private elementary and secondary school shall not be in violation of the Education of the Handicapped Act (20 U.S.C. 1400 et seq.), section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), or title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), solely as a result of an eligible employee of such agency or school exercising the rights of such employee under this Act.

(c) INTERMITTENT LEAVE FOR INSTRUCTIONAL EMPLOYEES.—

(1) IN GENERAL.—Subject to paragraph (2), in any case in which an employee employed principally in an instructional capacity by any such educational agency or school seeks to take leave under subparagraph (C) or (D) of section 102(a)(1) that is forseeable based on planned medical treatment or supervision and the employee would be on leave for greater than 20 percent of the total number of working days in the period during which the leave would extend, the agency or school may require that such employee elect either—

(A) to take leave for periods of a particular duration, not to exceed the duration of the planned medical treatment or supervision; or

(B) to transfer temporarily to an available alternative position offered by the employer for which the employee is qualified, and which—

(i) has equivalent pay and benefits; and

(ii) better accommodates recurring periods of leave than the regular employment position of the employee.

(2) APPLICATION.—The elections described in subparagraphs (A) and (B) of paragraph (1) shall apply only with respect to an employee who complies with section 102(e)(2).

(d) RULES APPLICABLE TO PERIODS NEAR THE CONCLUSION OF AN ACADEMIC TERM.—The following rules shall apply with respect to periods of leave near the conclusion of an academic term in the case of any employee employed principally in an instructional capacity by any such educational agency or school:

(1) If the employee begins leave under section 102 more than 5 weeks prior to the end of the academic term, the agency or school may require the employee to continue taking leave until the end of such term, if—

(A) the leave is at least 3 weeks duration; and

(B) the return to employment would occur during the 3-week period before the end of such term.

(2) If the employee begins leave under subparagraph (A), (B), or (C) of section 102(a)(1) during the period that commences 5 weeks prior to the end of the academic term, the agency or school may require the employee to continue taking leave until the end of such term, if—

(A) the leave is greater than 2 weeks duration; and

(B) the return to employment would occur during the 2-week period before the end of such term.

(3) If the employee begins leave under paragraph (A), (B), or (C) of section 102(a)(1) during the period that commences 3 weeks prior to the end of the academic term and the duration of the leave is greater than 5 working days, the agency or school may require the employee to continue to take leave until the end of such term.

(e) RESTORATION TO EQUIVALENT EMPLOYMENT POSITION.—For purposes of determinations under section 104(a)(1)(B) (relating to the restoration of an employee to an equivalent position), in the case of a local educational agency or a private elementary and secondary school, such determination shall be made on the basis of established school board policies and practices, private school policies and practices, and collective bargaining agreements.

(f) REDUCTION OF THE AMOUNT OF LIABILITY.—If a local educational agency or a private elementary and secondary school that has violated title I proves to the satisfaction of the administrative law judge or the court that the agency, school, or department had reasonable grounds for believing that the underlying act or omission was not a violation of such title, such judge or court may, in its discretion, reduce the amount of the liability provided for under section 109(b)(1) to the amount determined under subparagraph (A) of such section.

SEC. 111. NOTICE.

(a) IN GENERAL.—Each employer shall post and keep posted, in conspicuous places on its premises where notices to employees and applicants for employment are customarily posted, a notice, to be prepared or approved by the Secretary, setting forth excerpts from, or summaries of, the pertinent provisions of this title and information pertaining to the filing of a charge.

(b) PENALTY.—Any employer that willfully violates this section shall be assessed a civil money penalty not to exceed $100 for each separate offense.

SEC. 112. REGULATIONS.

Not later than 60 days after the date of enactment of this title, the Secretary shall prescribe such regulations as are necessary to carry out this title (including regulations under section 106(a)).

TITLE II—LEAVE FOR CIVIL SERVICE EMPLOYEES

SEC. 201. LEAVE REQUIREMENT.

(a) IN GENERAL.—(1) Chapter 63 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER V—FAMILY LEAVE

"§ 6381. Definitions

"For purposes of this subchapter:

"(1) 'employee' means—

"(A) an employee as defined by section 6301(2) of this title (excluding an individual employed by the government of the District of Columbia); and

"(B) an individual under clause (v) or (ix) of such section;

who has been employed for at least 12 months and completed at least 1,000 hours of service during the previous 12-month period.

"(2) 'serious health condition' means an illness, injury, impairment, or physical or mental condition that involves—

"(A) inpatient care in a hospital, hospice, or residential medical care facility; or

"(B) continuing treatment, or continuing supervision, by a health care provider;

"(3) 'son or daughter' means a biological, adopted, or foster child, a stepchild, a legal ward, or a child of a person standing in loco parentis, who is—

"(A) under 18 years of age; or

"(B) 18 years of age or older and incapable of self-care because of a mental or physical disability; and

"(4) 'parent' means the biological parent of the child or an individual who stood in loco parentis to a child when the child was a son or daughter.

"§ 6382. Leave requirement

"(a)(1) An employee shall be entitled, subject to section 6383, to 12 workweeks of leave during any 12-month period—

"(A) because of the birth of a son or daughter of the employee;

"(B) because of the placement of a son or daughter with the employee for adoption or foster care;

"(C) in order to care for the son, daughter, spouse, or parent of the employee who has a serious health condition; or

"(D) because of a serious health condition that makes the employee unable to perform the functions of the position.

"(2) The entitlement to leave under subparagraphs (A) and (B) of paragraph (1) for a birth or placement of a son or daughter shall expire at the end of the 12-month period beginning on the date of such birth or placement.

"(3) Leave under subparagraph (A) or (B) of paragraph (1) shall not be taken by an employee intermittently unless the employee and the employing agency agree otherwise. Leave under subparagraph (C) or (D) of paragraph (1) may be taken intermittently when medically necessary, subject to subsection (e).

"(b) On agreement between the employing agency and the employee, leave under this section may be taken on a reduced leave schedule. Such reduced leave schedule shall not result in a reduction in the total amount of leave to which the employee is entitled.

"(c) Except as provided in subsection (d), leave granted under subsection (a) may consist of unpaid leave.

"(d)(1) If an employing agency provides paid leave for fewer than 12 workweeks, the additional weeks of leave necessary to attain the 12 workweeks of leave required under this title may be provided without compensation.

"(2)(A) An employee may elect, or an employing agency may require the employee, to substitute for leave under subparagraph (A), (B), or (C) of subsection (a)(1) any of the accrued paid vacation leave, personal leave, or family leave of the employee for any part of the 12-week period of such leave under such paragraph.

"(B) An employee may elect, or an employing agency may require the employee, to substitute for leave under paragraph (1)(D) of subsection (a) any of the accrued paid vacation leave, personal leave, or medical or sick leave of the employee for any part of the 12-week period of such leave under such paragraph, except that nothing in this Act shall require an employing agency to provide paid sick leave or paid medical leave in any situation in which such employing agency would not normally provide any such paid leave.

"(e)(1) In any case in which the necessity for leave under subparagraph (A) or (B) of subsection (a)(1) is foreseeable based on an expected birth or adoption, the employee shall provide the employing agency with prior notice of such expected birth or adoption in a manner which is reasonable and practicable.

"(2) In any case in which the necessity for leave under subparagraph (C) or (D) of subsection (a)(1) is foreseeable based on planned medical treatment or supervision, the employee—

"(A) shall make a reasonable effort to schedule the treatment or supervision so as not to disrupt unduly the operations of the employing agency, subject to the approval of the health care provider of the employee or the health care provider of the son, daughter, spouse or parent of the employee; and

"(B) shall provide the employing agency with prior notice of the treatment or supervision in a manner which is reasonable and practicable.

"§ 6383. Certification

"(a) An employing agency may require that a claim for leave under subparagraph (C) or (D) of section 6382(a)(1), be supported by certification issued by the health care provider of the employee or of the son, daughter, spouse, or parent of the employer, as appropriate. The employee shall provide a copy of such certification to the employing agency.

"(b) A certification under subsection (a) shall be sufficient if it states—

"(1) the date on which the serious health condition commenced;

"(2) the probable duration of the condition;

"(3) the appropriate medical facts within the knowledge of the provider regarding the condition; and

"(4)(A) for purposes of leave under section 6382(a)(1)(C), an estimate of the amount of time that the eligible employee is needed to care for the son, daughter, spouse, or parent; and

"(B) for purposes of leave under section 6382(a)(1)(D), a statement that the employee is unable to perform the functions of the employee's position.

"(c)(1) In any case in which the employing agency has reason to doubt the validity of the certification provided under subsection (a) for leave under subparagraph (C) or (D) of section 6382(a)(1), the employing agency may require, at its own expense, that the employee obtain the opinion of a second health care provider designated or approved by the employing agency concerning any information certified under subsection (b) for such leave.

"(2) Any health care provider designated or approved under paragraph (1) shall not be employed on a regular basis by the employing agency.

"(d)(1) In any case in which the second opinion described in subsection (c) differs from the original certification provided under subsection (a), the employing agency may require, at its own expense, that the employee obtain the opinion of a third health care provider designated or approved jointly by the employing agency and the employee concerning the information certified under subsection (b).

"(2) The opinion of the third health care provider concerning the information certified under subsection (b) shall be considered to be final and shall be binding on the employing agency and the employee.

"(e) The employing agency may require that the employee obtain subsequent recertifications on a reasonable basis.

"§ 6384. Job protection

"(a) Any employee who takes leave under section 6382 for its intended purpose shall be entitled, upon return from such leave—

"(1) to be restored by the employing agency to the position of employment held by the employee when the leave commenced; or

"(2) to be restored to an equivalent position with equivalent employment benefits, pay, and other terms and conditions of employment.

"(b) The taking of leave under section 6382 shall not result in the loss of any employment benefit accrued prior to the date on which the leave commenced.

"(c) Nothing in this section shall be construed to entitle any restored employee to—

"(1) the accrual of any seniority or employment benefits during any period of leave; or

"(2) any right, benefit, or position of employment other than that to which the employee was entitled to on the date the leave was commenced.

"(d) As a condition to restoration under subsection (a), the employing agency may have a policy that requires each employee to receive certification from the health care provider of the employee that the employee is able to resume work.

"(e) Nothing in this section shall be construed to prohibit an employing agency from requiring an employee on leave under section 6382 to periodically report to the employing agency on the status and intention of the employee to return to work.

"§ 6385. Prohibition of coercion

"(a) An employee shall not directly or indirectly intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce, any other employee for the purpose of interfering with the exercise of the rights of the employee under this subchapter.

"(b) For the purpose of this section, 'intimidate, threaten, or coerce' includes promising to confer or conferring any benefit (such as appointment, promotion, or compensation), or taking or threatening to take any reprisal (such as deprivation of appointment, promotion, or compensation).

"§ 6386. Health insurance

"An employee enrolled in a health benefits plan under chapter 89 of this title who is placed in a leave status under section 6382 of this title may elect to continue the health benefits enrollment of the employee while in leave status and arrange to pay into the Employees Health Benefits Fund (described in section 8909 of this title), through the employing agency of the employee, the appropriate employee contributions.

"§ 6387. Regulations

"The Office of Personnel Management shall prescribe regulations necessary for the administration of this subchapter. The regulations prescribed under this subchapter shall be consistent with the regulations prescribed by the Secretary of Labor under title I of the Family and Medical Leave Act of 1990.".

(2) The table of contents for chapter 63 of title 5, United States Code, is amended by adding at the end thereof the following:

"SUBCHAPTER V—FAMILY LEAVE AND TEMPORARY MEDICAL LEAVE

"6381. Definitions.
"6382. Leave requirement.
"6383. Certification.
"6384. Job protection.
"6385. Prohibition of coercion.
"6386. Health insurance.
"6387. Regulations.".

(b) EMPLOYEES PAID FROM NONAPPROPRIATED FUNDS.—Section 2105(c)(1) of title 5, United States Code, is amended by striking out "53" and inserting in lieu thereof "53, subchapter V of chapter 63,".

TITLE III—COMMISSION ON LEAVE

SEC. 301. ESTABLISHMENT.

There is established a commission to be known as the Commission on Leave (hereinafter referred to in this title referred to as the "Commission").

SEC. 302. DUTIES.

The Commission shall—

(1) conduct a comprehensive study of—

(A) existing and proposed policies relating to leave;

(B) the potential costs, benefits, and impact on productivity of such policies on employers; and

(C) alternative and equivalent State enforcement of this Act with respect to employees described in section 110; and

(2) not later than 2 years after the date on which the Commission first meets, prepare and submit, to the appropriate Committees of Congress, a report that may include legislative recommendations concerning coverage of businesses that employ fewer than 50 employees and alternative and equivalent State enforcement of this Act with respect to employees described in section 110.

SEC. 303. MEMBERSHIP.

(a) COMPOSITION.—

(1) APPOINTMENTS.—The Commission shall be composed of 12 voting members and 2 ex-officio members to be appointed not later than 60 days after the date of the enactment of this Act as follows:

(A) One Senator shall be appointed by the majority leader of the Senate, and one Senator shall be appointed by the minority leader of the Senate.

(B) One member of the House of Representatives shall be appointed by the Speaker of the House of Representatives, and one Member of the House of Representatives shall be appointed by the minority leader of the House of Representatives.

(C)(i) Two members each shall be appointed by—

(I) the Speaker of the House of Representatives;

(II) the majority leader of the Senate;

(III) the minority leader of the House of Representatives; and

(IV) the minority leader of the Senate.

(ii) Such members shall be appointed by virtue of demonstrated expertise in relevant family, temporary disability, and labor-management issues and shall include representatives of employers.

(2) EX-OFFICIO MEMBERS.—The Secretary of Health and Human Services and the Secretary of Labor shall serve on the Commission as nonvoting ex-officio members.

(b) VACANCIES.—Any vacancy on the Commission shall be filled in the manner in which the original appointment was made.

(c) CHAIRPERSON AND VICE CHAIRPERSON.—The Commission shall elect a chairperson and a vice chairperson from among its members.

(d) QUORUM.—Eight members of the Commission shall constitute a quorum for all purposes, except that a lesser number may constitute a quorum for the purpose of holding hearings.

SEC. 304. COMPENSATION.

(a) PAY.—Members of the Commission shall serve without compensation.

(b) TRAVEL EXPENSES.—Members of the Commission shall be allowed reasonable travel expenses, including a per diem allowance, in accordance with section 5703 of title 5, United States Code, when performing duties of the Commission.

SEC. 305. POWERS.

(a) MEETINGS.—The Commission shall first meet not later than 30 days after the date on which all members are appointed, and the Commission shall meet thereafter on the call of the chairperson or a majority of the members.

(b) HEARINGS AND SESSIONS.—The Commission may hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it.

(c) ACCESS TO INFORMATION.—The Commission may secure directly from any Federal agency information necessary to enable it to carry out this Act. On the request of the chairperson or vice chairperson of the Commission, the head of such agency shall furnish such information to the Commission.

(d) EXECUTIVE DIRECTOR.—The Commission may appoint an Executive Director from the personnel of any Federal agency to assist the Commission in carrying out its duties.

(e) USE OF FACILITIES AND SERVICES.—Upon the request of the Commission, the head of any Federal agency may make available to the Commission any of the facilities and services of such agency.

(f) PERSONNEL FROM OTHER AGENCIES.—On the request of the Commission, the head of any Federal agency may detail any of the personnel of such agency to assist the Commission in carrying out its duties.

SEC. 306. TERMINATION.

The Commission shall terminate 30 days after the date of the submission of its report to the Congress.

TITLE IV—MISCELLANEOUS PROVISIONS

SEC. 401. EFFECT ON OTHER LAWS.

(a) FEDERAL AND STATE ANTI-DISCRIMINATION LAWS.—Nothing in this Act or any amendment made by this Act shall be construed to modify or affect any Federal or State law prohibiting discrimination on the basis of race, religion, color, national origin, sex, age, or handicapped status.

(b) STATE AND LOCAL LAWS.—Nothing in this Act or any amendment made by this Act shall be construed to supersede any provision of any State and local law which provides greater employee leave rights than the rights established under this Act or any amendment made by this Act.

SEC. 402. EFFECT ON EXISTING EMPLOYMENT BENEFITS.

(a) MORE PROTECTIVE.—Nothing in this Act or any amendment made by this Act shall be construed to diminish the obligation of an employer to comply with any collective-bargaining agreement or any employment benefit program or plan which provides greater family and medical leave rights to employees than the rights provided under this Act or any amendment made by this Act.

(b) LESS PROTECTIVE.—The rights provided to employees under this Act or any amendment made by this Act shall not be diminished by any collective bargaining agreement or any employment benefit program or plan.

SEC. 403. ENCOURAGEMENT OF MORE GENEROUS LEAVE POLICIES.

Nothing in this Act or any amendment made by this Act shall be construed to discourage employers from adopting or retaining leave policies more generous than any policies which comply with the requirements under this Act or any amendment made by this Act.

SEC. 404. EFFECTIVE DATES.

(a) TITLE III.—Title III shall take effect on the date of the enactment of this Act.

(b) OTHER TITLES.—

(1) IN GENERAL.—Except as provided in paragraph (2), titles I and II and this Act shall take effect 6 months after the date of the enactment of this Act.

(2) COLLECTIVE BARGAINING AGREEMENTS.—In the case of a collective bargaining agreement in effect on the effective date prescribed by paragraph (1), title I shall apply on the earlier of—

(A) the date of the termination of such agreement; or

(B) the date which occurs 12 months after the date of the enactment of this Act.

SEC. 405. REGULATIONS.

The Secretary shall prescribe such regulations as are necessary to carry out this title within 60 days after the date of the enactment of this Act.●

● Mr. PACKWOOD. Mr. President, the President's veto of the Family and Medical Leave Act and the subsequent failure of the House to override that veto, while a setback, should not be seen as the end of our efforts to ensure that working people are able to care for their families and meet basic economic needs.

Today, we are reintroducing the Family and Medical Leave Act. We are sending a signal that we stand firmly behind our Nation's families and our commitment to enact a comprehensive and sound family leave policy.

What we are saying with this bill is simple justice: A single mother shouldn't be forced to lose her job to take care of a dangerously ill child. A father should be able to count on returning to work after taking care of his family's emergency at home.

Fairness in the workplace will pay off for employers, too. Understanding the problems that families face will bring dividends in the way workers feel about their work. Instead of losing valuable productivity on the job, employers with leave policies in place report gains in productivity and retention of a loyal and experienced workforce.

The demographic revolution in the American work force is having a profound effect on the lives of working men and women and their families. Today, more than half of the 45.6 million children in two-parent families have both parents in the work force. The number of women working outside the home has increased 178 percent since 1950. More than one-half of all mothers with infants under 1 year of age now work outside the home. Two-thirds of mothers of children under the age of 3 work outside the home.

We are not strangers to these statistics. We have heard them here before. It is time we face up to the changing reality of our economy—single parents and two wage-earning parents dominate the work force. It is time now to take action, to ensure that no longer will American workers have to face difficult choices as they seek to balance family and workplace responsibilities. The dual goals of family and work are important to our Nation's well-being. It is time we support working parents by providing flexible leave options which promote family stability and job security.

The Family and Medical Leave Act being introduced again today will help ease the tremendous pressures parents face in balancing workplace and family responsibilities. It is essentially the same bill passed by the Senate on June 14 this year. That bill was the result of months of effort and was a carefully-tuned compromise which sought to take into consideration the concerns of business and the needs of our Nation's working families.

This legislation requires companies of 50 or more employees to allow their permanent workers 12 weeks of unpaid leave per year for the birth of a baby or serious family illness. Data from my own State of Oregon, which has a family leave standard of 12 weeks, finds that businesses have had little trouble in complying with the standard.

Under this bill, only workers who have been on the job for a year or more and who have worked an average of half time or more during that year would be eligible for unpaid leave. Employees would be assured of reinstatement to the same or equivalent job upon their return, and would continue to receive health care coverage during their absence. The General Accounting Office estimates the cost of the bill to be no more than $188 million per year, most of which will result from the continuation of health insurance coverage for employees.

This bill is a reasonable approach. It seeks to meet the needs of families while helping businesses plan for workers taking leave. An estimated 95 percent of all firms, those with fewer than 50 employees, would be exempt from the bill's requirements. The Family and Medical Leave Act is not antibusiness. Indeed, many firms that already have leave policies in place report improved employee loyalty, reduced turnover and absenteeism, and enhanced productivity.

It seems clear that business owners and their employees will benefit mutually from an unpaid leave policy such as envisioned in this bill. I urge my colleagues and the Nation to rally behind this long-overdue policy to help our Nation's families strike a balance between the needs of their loved ones and the demands of the workplace.●

● Mr. ADAMS. Mr. President, I am outraged that President Bush has vetoed the family and medical leave bill and terribly disturbed that Congress did not act to override the President's actions. I want President Bush to know that he has not heard the last from us on this issue. Those of use in Congress who are profamily and who want to give working America a helping hand are going to continue the struggle. The reintroduction today by Senator DODD of the family and medical leave bill sends this message out loud and clear. I want my colleague from Connecticut to know that as an original cosponsor, I am behind him all the way.

The family and medical leave bill that President Bush vetoed simply would have ensured that the mother or father of a newborn child will have a period of time to bond with that child after birth and that working people in this country will not have to sacrifice their jobs when their elderly parents or their children are seriously ill.

Families of America deserve no less than required in this bill. President Bush must understand that advocates of family and medical leave will not let up until this bill becomes Federal law. He should also understand that the already overwhelming support for this measure by the American public will only continue to grow.

If we cannot as a nation demonstrate this kind of compassion for our Nation's families, then I would like to know how the President proposes to face the tremendous social, demographic, and economic challenges we must meet in the nineties.●

● Mr. KENNEDY. Mr. President, today I join Senator DODD and others in introducing a new Family and Medical Leave Act. This bill is almost identical to the bill passed with solid bipartisan support in both the House and the Senate, but vetoed by President Bush.

Our message in reintroducing a bill essentially the same as the vetoed measure is clear: this issue is not going away. The President may have violated a campaign promise to working families, but Congress intends to keep it. The failure to override the veto was a pyrrhic victory for the President. The cost of his accommodation of the business lobby is the denial of fundamental fairness to working Americans.

Family and medical leave is too important to be left to the whim of management. President Bush, in his veto message, tried to explain his action by objecting to Government mandates of employee benefits. He claims that the bill "ignores the realities of today's workplace, and the diverse needs of workers". But it is the President who is ignoring the demographics of the 1990's. Women and mothers are working in record numbers—some by choice—some by economic necessity—and it is time to recognize this changing reality of the workplace.

Time off to care for a new baby or a child or parent who is seriously ill is not just another employee benefit. It is a basic protection for workers faced with a family emergency, not a benefit that can be chosen in advance.

The amount of family leave provided in the bill is already made available by many employers. Since the leave is unpaid, the cost to business is minimal.

Senator DODD and I intend to do all we can, with or without the President, to see that reasonable and realistic family leave becomes available for American workers. Just as workers deserve other statutory protections ranging from Social Security to workplace

safety, they deserve protection against unscrupulous employers who refuse to make reasonable accommodations for workers facing family emergencies. In this day and age, no employees should lose their jobs because they needed family leave.●

By Mr. GRASSLEY:

S. 2974. A bill to amend the Internal Revenue Code of 1986 to extend the excise tax exemption to sales of certain trucks assembled by nonprofit educational organizations; to the Committee on Finance.

TAX-FREE SALES OF TRUCKS ASSEMBLED BY EDUCATIONAL ORGANIZATIONS

● Mr. GRASSLEY. Today, I am introducing legislation to address another misguided policy decision by the IRS. This particular problem concerns a vocational technical college in my State.

This college, the Northwest Iowa Technical College, had as part of its curriculum, a truck and diesel program where students assembled a truck from a kit each year. At the end of the year, the completed truck was sold at no profit to help cover the costs of the program.

The program had been proceeding for a number of years until it came to the attention of the IRS. Unfortunately, the IRS claims that this educational program falls under the retailer excise tax and is, therefore, subject to the tax.

Of course the intention behind this tax was to apply it to manufacturers in the business of making and selling trucks. It's preposterous to conclude that Congress intended to impose this tax on a college's educational program.

Mr. President, it's cases such as this that futher erode confidence in the tax system. At this time, I do not know how extensive this problem is around the country, but I do know the problem exists and it needs to be corrected. I am, therefore, introducing this bill, which will add an exemption to the retailer tax for non-profit educational institutions that build trucks as part of its curriculum and sell the trucks to help cover the costs of the program. It just doesn't make sense for the Government to be talking about increasing funds for education and then turn around and tax educational programs.

I urge my colleagues to join me in making this correction by supporting this legislation.●

By Mr. REID:

S. 2975. A bill to amend title II of the Social Security Act to provide for a more gradual 10-year period of transition to the changes in benefit computation rules enacted in the Social Security Amendments of 1977 as they apply to workers attaining age 65 in or after 1982 (and related beneficiaries) and to provide for increases in their benefits accordingly; to the Committee on Finance.

SOCIAL SECURITY TRANSITION BENEFIT COMPUTATION ACT

Mr. REID. Mr. President, I rise today to introduce a "notch" bill.

There are other notch bills pending in both the House and Senate. Why introduce another? Because of the great injustice of this unfair, inequitable problem. Because the only way we will ever pass a bill is if we keep the notch issue at the forefront of everyone's mind, where it should be.

When the notch babies worked and paid into Social Security, they were promised that they would be treated fairly.

Yet, these 7 million Americans born between 1917 and 1921 are not being treated fairly or equally.

No one in their right mind can justify radically different benefit checks for two people who have identical earnings histories, yet happen to have been born a few months apart—one in 1916 and one in 1917.

In some cases, people received hundreds of dollars less than someone a week older—for no other reason than having the wrong birthday in the wrong year.

That is not equal treatment under the law. it is outrageous. And un-American.

The 1972 Social Security Amendments changed the way Social Security benefits were calculated. The intention of Congress was good—to see that benefit levels compensated for inflation.

However, the changes were too drastic and would have resulted in some people earning more in Social Security than they did before they retired. Five years later, in 1977, Congress again tried to fix the Social Security benefit formulas. Again measures taken were too extreme.

The intention that time was to reduce benefit levels by 6 to 10 percent for those born after 1917. A gradual, 5-year transition was created.

The first group affected by the change were those born between 1917-1921—people retiring between 1979 and 1983. That was the cut—1917 to 1921—and these are the people we call notch babies.

What went wrong in 1977? Again, faulty benefit formulas. The reductions were severe—not the 6- to 10-percent goal. Many retirees suffered reductions ranging from 10 to 20 percent.

When someone is living on a fixed income, a 10 to 20 percent pension cut can be a disaster.

It's the difference between buying groceries and not having enough to eat.

It's not having enough money to pay the heating bill on time.

It's not being able to take a bath because you're afraid to run the water—because you can't pay the water bill.

In short, it's the difference between living with dignity and suffering in silence—because nobody cares and Social Security doesn't make up the difference.

I rise today to offer legislation which will reverse this discrimination.

This bill is modeled after H.R. 917, a bill introduced in the House by Congressman ROYBAL and supported by 151 Members of Congress.

My bill would return benefit levels to where they were intended to be. It would eliminate those severe reductions of 10 to 20 percent and bring them in line with what Congress intended—6 to 10 percent.

I wish we could replace all of the missed Social Security earnings of the past 11 years—but there are people who say that the system does not have the money to pay 13-years worth of earnings to all retirees.

The bill I offer is fiscally responsible. It is reasonable. It does not bankrupt the system.

My bill extends the transition formula to 10 years. Further, it determines benefits based on the 1972 formula—the old formula—the one we used before the whole problem began in the first place. The bottom line for beneficiaries would be an estimated increase of between $37 to $114 per month.

Thirty seven to 114 dollars may not sound like much to my colleagues who have good steady incomes, but to that senior citizen on a fixed income, it's money for food, bills, prescription drugs and other necessities.

The cost of this bill can be borne by the Social Security surpluses. By 1992 the surpluses are expected to reach $350 billion. This bill will cost approximately $49 billion over the next 7 years. Surely we can see fit to use a small amount of the trust funds tremendous resources to address the notch inequity.

Those trust fund resources are there for the well being of those who have paid into the Social Security System. We should use those resources to see that Social Security recipients are treated well—treated fairly—treated equitably.

It is time for Congress to take its hands off of the Social Security surpluses. Stop hiding the horrible truth of its fiscal irresponsibility. It is time to return those dollars to the hands of those who earned them: Social Security beneficiaries and future beneficiaries.

In two steps, we can treat those born after 1917 fairly and protect the future of the trust funds.

First, take Social Security off budget; and

Second, pass legislation to correct the notch.

Today, we can address the notch issue.

I urge my colleagues on the Finance Committee to consider and report at least one of the notch bills before them. Let the Congress debate and vote. Allow us to speak for those we represent. Allow us to speak for fairness.

By Mr. LEAHY:

S. 2977. A bill to prohibit certain RTC asset sales; to the Committee on Banking, Housing, and Urban Affairs.

LIMITATION ON RTC ASSET SALES

Mr. LEAHY. Mr. President, I rise today to offer a bill that is a complement to the S&L fraud package that was passed 3 weeks ago in this Chamber as an amendment to the crime bill.

That package was designed to strengthen our efforts at rooting out and prosecuting the swindlers and crooks who helped bring about the collapse of the savings and loan industry. As a result of that collapse, the Resolution Trust Corporation, which is trying to clean up the mess, will become the Nation's largest holder of real estate.

Its portfolio, as of June, included nearly 36,000 properties with a book value of some $15 billion. Some analysts estimate that, before this whole debacle is behind us, the RTC will have to sell more than 300,000 properties.

The RTC is under great pressure to sell these properties quickly and at top dollar.

At the same time, however, the enormous size of the selloff and the pressure to maximize recovery creates a serious risk of abuse.

Already we hear that the same S&L con artists who gambled with borrowed money may now be getting ready to cash in on the sale of properties held by the RTC.

We hear that high-rolling developers who defaulted on loans used to buy property will line up to buy the same property back from the RTC at fire-sale prices.

We hear that S&L executives who drove their institutions into the ground are expected to lineup, too. No doubt they figure they will have a leg up on the bidding thanks to the inside information they have about properties that were held by their own institutions.

We even hear that Charles Keating—the original S&L Kingpin whose failed Lincoln S&L will cost the taxpayers over $1 billion—says the assets of Lincoln should be sold back to him.

This is just unacceptable. The last thing we need now is to open the door to a new round of fraud and chicanery. The American people are outraged at the S&L scandal—angry at the greed and waste; disgusted that they are getting stuck with the bill now that the federally-insured party is over. Most of them, like the frugal people of Vermont where I come from, are blameless. They will not sit idly by if we allow the same wheeler-dealers who fleeced us once to do it again.

I am therefore offering a bill requiring the RTC to establish some minimal rules and regulations governing who can buy RTC properties.

First, any executive of a failed S&L who played a significant role in squandering the assets of his institution would be barred from buying those assets back from the RTC. We are not going to allow those with inside information about the true value of assets once held by their S&Ls to bid against the general public.

Second, anyone who defaulted on a major loan from a failed S&L would be barred from turning around and buying back RTC assets unless he put down cash on the barrelhead. This is no time to take I.O.U.'s from large-scale borrowers who have already defaulted once. As the old saying goes—fool me once, shame on you; fool me twice, shame on me.

In addition, the bill would exclude from the RTC bidding process any deadbeat who has been thrown out of the banking business by a Federal banking agency or who has repeatedly defaulted on bank loans.

The American people have a right to expect that the public trough has closed and that the season for fraud and abuse has come to an end. We owe it to them both to recover as much as we can from the wreckage of the S&L industry and to do it in a fair and honorable way.

This bill says to all those sharp operators who have taken us to the cleaners once—we won't be fooled again.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2977

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECION 1. LIMITATION ON RTC ASSET SALES.

Section 21A(b)(12) of the Federal Home Loan Bank Act (12 U.S.C. 1441a(b)(12)) is amended by adding at the end the following:

"(G) CERTAIN SALES PROHIBITED.—Notwithstanding any other provision of law, the Corporation shall prescribe regulations to prohibit the sale of assets of a failed institution by the Corporation to any person who—

"(i)(I) defaulted on an obligation or obligations in excess of $1,000,000 to a failed institution or was a member of a partnership or an officer or director of a corporation which defaulted on an obligation or obligations in excess of $1,000,000 to a failed institution, and (II) proposes to purchase the asset or assets in question in whole or in part through the use of the proceeds of a loan or advance of credit from the Corporation or from an insured institution subject to the jurisdiction of the Corporation pursuant to paragraph (3)(A),

"(ii) was an officer or director of the failed institution or of any affiliate thereof who participated in a material way in transactions that resulted in a substantial loss to the failed institution or affiliate,

"(iii) has been removed from, or prohibited from participating in the affairs of, any insured depository institution pursuant to any final enforcement action by any appropriate Federal banking agency, or

"(iv) demonstrated a pattern or practice of defalcation regarding obligations to insured depository institutions.

For the purpose of this subparagraph—

"(i) the term 'default' means a failure to make timely payments on a loan or other obligation to such an extent that the property securing the obligation is foreclosed upon; and

"(ii) the term 'affiliate' has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956.".

By Ms. MIKULSKI:

S. 2978. A bill to provide that Federal employees may participate in State and local government programs encouraging the use of public transportation; to the Committee on Governmental Affairs.

ENCOURAGING THE USE OF PUBLIC TRANSPORTATION

● Ms. MIKULSKI. Mr. President, I rise today to introduce legislation to let Federal agencies—and their employees—participate in State and local government programs encouraging the use of public transportation.

As our urban and suburban streets become increasingly congested and our air becomes increasingly polluted, Federal, State, and local governments, along with the private sector, have got to put our heads together. We've got to find ways to get people out of their cars and into trains, trolleys, buses, vanpools, and other forms of mass transit. That's just good common sense.

This legislation opens the door to that kind of cooperation by letting Federal agencies participate in transit incentive programs to which a significant local commitment exists. I hope it will inspire local communities across the country to seek creative commuting alternatives.

Mr. President, I identify with the frustrations of commuters, because I am one myself. Every day, I travel back and forth along the Baltimore-Washington Parkway from my home in Fells Point, Baltimore, to Capitol Hill. And let me tell you, it is stressful. Backups, accidents, road construction delays—it's no wonder that families in my State ask me for help to make that commute easier. I want to help. I think this legislation will begin to help.

The idea for this legislation originated with a local government in my State—the government of Montgomery County, MD—which operates an innovative and highly successful program to encourage employees to ride

public transportation, instead of driving to work.

Under Montgomery County's "Fare Share" program, the County and private employers cooperate to reduce the cost to workers of buying transit fares. For example, under the Fare Share program, the County purchases a $21 Metrorail subway farecard, which it then sells to the employer for $15. The employer sells the farecard to the employee for just $10—cutting the employee's cost of taking public transportation in half.

The Fare Share program celebrated its 100th participating company in the fall of 1989. Some 3,000 employees receive discounted Metrorail, Metrobus, local "Ride-on" bus, and Marc train passes under the program. Half of these are new transit riders.

Montgomery County has sought to expand this program to include Federal Government employees; but has run up against an obstacle: Federal law prohibits Federal employees whose pay is fixed by statute or regulation from receiving additional pay or benefits unless specifically authorized by law.

That's why my bill specifically authorizes agencies to participate in any program established by a State or local government that encourages employees to use public transportation, through discounted transit passes or other incentives.

This is the kind of common-sense program that the Federal Government should encourage and participate in. Getting employees out of their cars and onto public transportation is good public policy.

Mr. President, I ask unanimous consent that the text of the bill be inserted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2978

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FEDERAL PARTICIPATION IN STATE AND LOCAL PROGRAMS TO ENCOURAGE PUBLIC TRANSPORTATION.

(a) AUTHORIZATION OF FEDERAL AGENCY PARTICIPATION.—An Executive agency may participate in any program established by a State or local government that encourages employees to use public transportation. Such programs may involve the sale of discounted transit passes or other incentives that reduce the cost to the employee of using public transportation.

(b) FEDERAL EMPLOYEE PARTICIPATION.—Notwithstanding the provisions of section 5536 of title 5, United States Code, an employee may participate in a program described under subsection (a).

(c) DEFINITIONS.—(1) For purposes of this section the term "Executive agency" shall have the same meaning as such term is defined under section 105 of title 5, United States Code.

(2) For purposes of subsection (b), the term "employee" shall have the same meaning as such term is defined under section 2105 of title 5, United States Code.●

By Mr. MITCHELL (for himself, Mr. COHEN, Mr. GORE, Mr. HARKIN, Mr. BRYAN, Mr. DURENBERGER, Mr. EXON, Mr. KERREY, Mr. HEINZ, Mr. REID, Mr. LEAHY, Mr. LIEBERMAN, Mr. KERRY, and Mr. KENNEDY):

S. 2979. A bill to protect the public from health risks from radiation exposure from low-level radioactive waste, and for other purposes; to the Committee on Environment and Public Works.

RADIATION PROTECTION ACT

Mr. MITCHELL. Mr. President, today I and others are introducing legislation to assure that States are not prevented by the Federal Government from doing more to protect their citizens from the risks of radiation exposure. Representative GEORGE MILLER today is also introducing comparable legislation in the House.

This legislation is prompted by a July 3, 1990, policy statement by the Nuclear Regulatory Commission in which the Commission determined that they would allow some low-level radioactive waste to be deregulated. As a result of this decision, up to 30 percent of radioactive waste could be allowed to be disposed of in landfills.

Not all States agree that this is sound public policy. Maine, Minnesota, Vermont, and Iowa have State statutes that ban disposal of radioactive waste in landfills. The NRC suggests that such State laws are not compatible with the NRC policy and thus may be preempted. Such preemption is unacceptable.

The legislation I am introducing today addresses the problems created by the NRC policy in several ways.

First, it provides that no State may be preempted from imposing more stringent standards on deregulated radioactive waste.

Second, it provides that States would not be preempted from imposing more stringent State standards on regulated low-level waste.

Third, the bill prohibits the NRC from implementing its low-level waste deregulation policy.

The NRC's decision does not protect public health. Richard J. Guimond, Director of the EPA Office of Radiation Programs stated on January 12, 1989 that "we do not believe that, as proposed—the NRC policy—would adequately protect public health and the quality of man's environment."

And the health risks of radiation exposure are greater than estimated when Mr. Guimond made this statement. In December, 1989, the National Research Council of the National Academy of Sciences issued a report entitled "Health Effects of Exposure to Low Levels of Ionizing Radiation," the BEIR [Biological Effects of Ionizing Radiation] V report. In that report, the BEIR committee stated:

[L]ifetime risk of cancer attrributable to a given dose of gamma radiation now appears somewhat larger than formerly estimated (page 5).

The risk from exposure during childhood is estimated to be about twice as large as the risk for adults, but such estimates of lifetime risk are still highly uncertain due to the limited follow-up of this age group (p. 6).

The cancer risk estimates derived with the preferred models used in this report are about 3 times larger for solid cancers (relative risk projection) and about 4 times larger for leukemia than the risk estimates presented in the BEIR III report (p. 6).

The NRC proposes to allow the public to experience greater radiation exposure while at the same time the scientific community determines that the risks of such exposure are greater than previously estimated. The result of the NRC policy would be more people facing a higher cancer risk. I do not support this result.

The second problem with the NRC policy is that it is inconsistent with other policies on this issue. The NRC proposed a 10 millirem per year individual dose limit per exempted practice and a 1,000 person-rem annual collective dose. No one else has adopted such a lenient standard.

The EPA recommends no more than a 4-millirem-per-person exposure. The International Atomic Energy Agency recommends no more than a 100 person-rem annual collective dose: one-tenth of that proposed by the NRC. Canada, the United Kingdom, Japan, Sweden, Italy, and others all have more protective standards than that proposed by the NRC.

The NRC's deregulation policy is in conflict both with previous NRC policy and with the technical recommendations of the NRC staff. In 1986, NRC published a notice stating the individual dose level should be "a few millirem" per exempted practice annually.

The NRC staff recommended a 1-millirem-per-year individual exposure per exempted practice. Staff objections were muted so long as a 100 person-rem annual collective dose limit was being discussed. Unfortunately, the NRC decided to increase the individual and collective exposure limits 10 fold above the staff recommendations.

If the United States were to maintain this ill-conceived policy, we would be endorsing greater cancer exposure than most other developed nations. The United States has for two decades been a leader in protecting the public health and environment. We have some of the most stringent pollution control laws of any nation.

But this policy relegates us to the bottom of the ladder in radiation protection. This policy is not needed—in fact, it is a policy we need not to have.

The last objection I have to this policy is NRC's apparent intention to claim that more stringent State standards are not compatible with the NRC policy. This means that States like Maine, Minnesota, Vermont, and Iowa would not be allowed to ban deregulated radioactive waste from landfills.

On May 23, 1990, the NRC sent to Mr. W. Clough Toppan, manager of the Maine Radiological Health Program a copy of a paper by Donald Silverman, a private attorney, on the limits of State and local authority to regulate low-level waste. Specifically as to the existing Maine law, Mr. Silverman wrote:

Federal law clearly provides that the NRC has exclusive preemptive authority over the regulation of radiological hazards from source, special nuclear and byproduct materials. No State . . . may regulate such hazards. The Maine legislation by its title and express language attempts to achieve that result. As such it is an unconstitutional encroachment on the authority of the Federal government.

What are Maine and other States seeking to do that is so objectionable to the NRC? These States merely want to assure that radioactive waste will not be dumped in landfills. The NRC is prepared to allow up to 30 percent of low-level waste to be dumped in landfills instead of low-level waste disposal sites, as currently required. In New England, we already have too much waste being landfilled. We hardly need to add radioactive waste to the Nation's serious solid waste disposal problems.

The Atomic Energy Act authorizes the NRC to enter into agreements with States so that they may regulate radioactive material. Section 274 of the act provides that States must be "compatible" with NRC regulations. The NRC unfortunately prefers to define compatible as requiring State requirements and standards to be identical to the Federal standards. This is unfortunate and unwise.

I do not believe that the NRC's radioactive waste deregulation policy is sound. It should not be allowed to stand. The NRC should also not be empowered to override States' interests in providing greater public health protection than the NRC is willing to provide. I hope my colleagues will join me in achieving these goals.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2979

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Radiation Protection Act of 1990".

SEC. 2. STATE AUTHORITY TO REGULATE DISPOSAL OF LOW-LEVEL RADIOACTIVE WASTE.

(a) STATE AUTHORITY.—

(1) IN GENERAL.—The Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) is amended by inserting after section 275 the following new section:

"SEC. 276. STATE AUTHORITY TO REGULATE DISPOSAL OF LOW-LEVEL RADIOACTIVE WASTE.

"(a) IN GENERAL.—

"(1) BELOW REGULATORY CONCERN OF COMMISSION.—No provision of this Act, or of any other Federal law, may be construed to prohibit or otherwise restrict the authority of any State to regulate, on the basis of radiological hazard, the disposal of low-level radioactive waste designated a State responsibility for which the Commission does not require disposal in a low-level radioactive waste disposal facility licensed by the Commission or by an Agreement State.

"(2) STATE AUTHORITY.—No provision of this Act, or of any other Federal law, may be construed to preclude or otherwise restrict the authority of any State to impose standards for the protection from radiological hazards more stringent than the Commission for the disposal of low-level radioactive waste in a low-level radioactive waste disposal facility.

"(b) DEFINITIONS.—For purposes of this section:

"(1) LOW-LEVEL RADIOACTIVE WASTE.—The term 'low-level radioactive waste' has the meaning given such term in section 2 of the Low-Level Radioactive Waste Policy Act.

"(2) LOW-LEVEL RADIOACTIVE WASTE DESIGNATED A STATE RESPONSIBILITY.—The term 'low-level radioactive waste designated a state responsibility' means low-level radioactive waste for which the states are responsible for providing for disposal pursuant to section 3 of the Low-Level Radioactive Waste Policy Act.

"(3) LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITY.—The term 'low-level radioactive waste disposal facility' means a facility for the disposal, as defined in section 2 of the Low-Level Radioactive Waste Policy Act, of low-level radioactive waste.

"(4) STATE.—The term 'State' has the meaning given such term in section 274 n.

"(5) AGREEMENT STATE.—The term 'Agreement State' has the meaning given such term in section 2 of the Low-Level Radioactive Waste Policy Act."

(2) CONFORMING AMENDMENT.—The table of contents of the Atomic Energy Act of 1954 (42 U.S.C. 2011 prec.) is amended by inserting after the item relating to section 275 the following new item:

"Sec. 276. State authority to regulate disposal of low-level radioactive waste.".

(c) REVOCATION OF RELATED NRC POLICIES.—The following policy statements of the Nuclear Regulatory Commission, relating to radioactive waste below regulatory concern, shall have no effect after the date of enactment of this Act:

(1) The policy statement published in the Federal Register on July 3, 1990 (55 Fed. Reg. 27522).

(2) The policy statement published in the Federal Register on August 29, 1986 (51 Fed. Reg. 30839).

Mr. REID. Mr. President, I rise in strong support of the legislation introduced by my colleague, Senator GEORGE MITCHELL, addressing the regulation of low-level nuclear waste.

In June, the Nuclear Regulatory Commission announced its approval of a new policy for determining when "radiation levels are so low that they do not warrant further regulatory control." This policy is known as the "below regulatory concern", or BRC proposal.

The BRC proposal does not exempt specific items from regulation. What it does is define radiation levels which the agency feels are so low that they do not warrant the same regulatory controls as do higher levels of radioactivity. The agency believes the protection of public health and the environment would not be compromised.

As proposed in the Federal Register of December 12, 1988, a 10-millirem-per-year individual whole body dose would be established as the limit for BRC determinations. The Nuclear Regulatory Commission press release explaining BRD notes that:

Individuals are exposed to similar levels when they choose to live in a brick rather than a frame house (a difference that can exceed 10 millirem per year).

BRC means that certain practices involving radioactive materials would be exempt from regulatory control. Possible applications of the BRC policy include: Cleanup of contaminated sites; distribution of consumer products containing small amounts of nuclear materials; disposal of very low-level radioactive waste; and recycle or reuse of slightly contaminated equipment and materials. BRC means that certain radioactive materials may be dumped in the local landfill.

At the request of the Senate Environment and Public Works Committee, the Office of Technology Assessment studies the progress made by the States since passage of the Low Level Radioactive Waste Policy Amendments Act 5 years ago to manage low-level waste. According to the OTA study, in 1988, about 1.4 million cubic feet of commercial low-level waste was generated in the United States and disposed of at licensed sites in South Carolina, Washington, and Nevada.

This volume of waste would fill about 390 average-size tractor trailers, forming a line over 3 and a half miles long. This volume contains about 260,000 curies of radioactivity."

Up to 30 percent of this waste could end up in landfills if BRC is adopted and implemented.

Mr. President, the below regulatory concern policy advocated by the Nuclear Regulatory Commission may, in fact, establish the soundest approach to manage low-level radioactive waste and properly protect the public and the environment. But, many questions still remain. First of all, the Environmental Protection Agency advocates a 4-millirem exposure standard. The ability of States and local govern-

ments to control waste disposal is also of concern.

The bill introduced today by Senator MITCHELL will address these issues. The Nuclear Regulatory Commission BRC policy statements could not be implemented. States could impose more stringent standards on BRC low-level waste. The bill I am cosponsoring is prudent and sensible and deserves our support.

Mr. COHEN. Mr. President, I am pleased to be joining my colleague from Maine, Senator MITCHELL, and several other Senators, in introducing legislation to ensure that States will have the authority to set adequate standards for the disposal of low-level radioactive waste.

Our legislation is necessary because several weeks ago the Nuclear Regulatory Commission announced a policy which states that some low-level waste could be found to be below regulatory concern and thus exempt from waste disposal regulations. This label demonstrates great insensitivity on the part of the Commission to public concerns about the difficulty of disposing of hazardous wastes properly.

I do not think that this issue will ever be below the concern of the citizens of Maine. When we are trying to deal with the solid waste disposal problem nationally, adding levels of radioactive waste that are below regulatory concern doesn't make sense. I would note that, in some areas, wastes disposed of in incinerators and landfills already pose a threat to human health and the environment. The NRC's decision would aggravate the problem while heightening citizen concern. Our bill prohibits the NRC from implementing the policy it issued on July 3, 1990.

I am also particularly concerned about indications that the NRC will assert Federal preemption over State regulation of this type of waste. The State of Maine was one of the first in the Nation to enact legislation prohibiting low-level radioactive waste from being disposed of in any facility not licensed by the NRC. Several other States, including Vermont, Iowa, Minnesota, and Pennsylvania, have since passed similar laws, and the State of Virginia has passed a resolution expressing concern about this issue.

I have reviewed a copy of NRC Chairman Carr's response to Commissioner Curtiss' view that State regulation of low-level waste should not be subject to the requirement of strict compatibility with Federal laws, and I am extremely concerned about the direction in which the Commission seems to be headed.

In addition, I have seen a copy of an abstract written by Donald J. Silverman of the firm Newman and Holtzinger, which is being distributed by the NRC. This abstract, on the limits of State and local authority to regulate low-level waste, states that a Maine law prohibiting the disposal of this waste in ordinary landfills is unconstitutional.

There is certainly nothing in the Constitution that prohibits a State from acting to ensure the safety of public health. In fact, most of our major environmental laws allow States to regulate threats to public health with standards stricter than Federal ones. We have not had to amend the Constitution to achieve this goal.

Since the States are held responsible for the disposal of waste, they ought to be able to set the minimum levels of safety that are necessary to protect public health. I think the NRC is completely wrong, if the signals that are being sent are accurate indications of the Commission's intentions. If States want to insist upon more rigid, stringent controls, they ought to be able to do so. The legislation we are introducing today would achieve that goal.

I hope that this legislation will be supported by my colleagues, as it is necessary to ensure the continued protection of public and environmental health from radiation hazards. I look forward to working with my Senate colleagues to see that the bill is considered by the Senate.

Mr. HEINZ. Mr. President, I am pleased today to introduce, along with other of my colleagues, legislation which will help ensure the safe management and disposal of low-level radioactive waste.

The Nuclear Regulatory Commission recently announced its "below regulatory concern" [BRC] policy. The BRC policy effectively deregulates certain low-level radioactive waste materials. As a result of this policy, it is estimated that up to about 30 percent of these low-level waste materials originally slated for disposal in special low-level waste disposal facilities may end up in our municipal waste landfills and incinerators.

Mr. President, from both a public health and environmental protection perspective, this is an unacceptable consequence of the recent NRC ruling.

Further, Mr. President, the existing NRC authority to preempt State regulation of these wastes is wholly inconsistent with national policy established by our Federal environmental law. The Resource Conservation and Recovery Act, written to set the national standard for management of hazardous and non-hazardous wastes, specifically remands to the States authority to set more stringent standards. I believe this policy is sound and should be extended to these low-level radioactive wastes, particularly given that the States bear the greatest direct burden in providing for the safety of their citizens and the protection of their unique environments. By way of example I would note that my home State of Pennsylvania has recently begun the costly development of a special facility to handle these wastes. Pennsylvanians are willingly making considerable investment in the protection of their health and environment; that concerned investment should not be jeopardized.

Mr. President, I urge my colleagues to consider this legislation in a timely manner and I thank my colleagues for their attention.

By Mr. BAUCUS (for himself and Mr. HEINZ):

S. 2980. A bill to amend the Internal Revenue Code of 1986 to modify the provisions permitting certain entities to elect a taxable year other that the required year; to the Committee on Finance.

REFORM OF FISCAL YEAR RETENTION RULES

● Mr. BAUCUS. Mr. President, today I rise to introduce legislation, along with Senator HEINZ, which provides small businesses greater flexibility in electing their taxable year. The increased complexity of the law resulting from the Tax Reform Act of 1986 has resulted in more time being devoted by Montana small businesses and their tax advisors to both the planning and preparation of individual and business tax returns. The requirement that forced many small business taxpayers to a calendar year for tax purposes has further compounded the burdened placed on these individuals. More tax planning and preparation must now be done in a shorter period of time. These problems are occurring throughout the country.

The Tax Reform Act of 1986 imposed a provision requiring many small businesses to adopt a calendar year for tax purposes. The Revenue Act of 1987 modified this requirement by adding section 444 which allowed entities to retain a fiscal year if certain tax requirements were met. The 1987 modification of the law provided some relief to small businesses, but, it did not go far enough. Time has demonstrated that the original section 444 rules need modification.

A nationwide survey conducted by a national organization of certified public accountants indicates that there has been a 20-percent increase in accountants' workload during the period January 1 to April 30 with a corresponding decrease during the remainder of the year. This has historically been a heavy workload period, but it has now become unacceptably heavy for taxpayers and their advisors.

Automatic extensions are available for many returns which provides minimal relief to small business taxpayers and advisors. However, extensions are costly and inconvenient. The tax liability must still be computed with great accuracy by the original due date. Further, it makes it difficult to

obtain the information necessary to estimate the tax liability of owners in order for them to apply for an extension.

This workload compression problem is not limited to tax work. It has become an even greater problem with accounting and auditing work. Owners and creditors typically demand financial statements and audit reports within 90 days after year end. Now this work must also be done between January 1 and April 15.

On average, only about 20 percent of small businesses which were on a fiscal year prior to TRA 1986 remain on a section 444 fiscal year as of December 31, 1989.

The administration of the tax system is also damaged by the resulting uneven workload experienced by the Internal Revenue Service. The IRS, taxpayers, and tax practitioners can better meet tax filing requirements if the demands are spread throughout the year.

With the enactment of the section 444 fiscal year retention rules, Congress acknowledged that there are legitimate business reasons for allowing fiscal years. Fiscal years are ordinarily chosen to coincide with the natural business year of the taxpayer. The year end conformity requirement of TRA 1986 unduly interfered with business operations, and the fiscal year retention rules of the Revenue Act of 1987 did not go far enough in remedying the problem.

The legislation we are introducing today modifies a portion of the rules for fiscal year retention in a way which addresses the continuing problems in this area without sacrificing revenue. The general rules of Internal Revenue Code sections 444, 7519, and 280H would remain relatively unchanged. The proposed legislation would re-open the election process to allow existing entities to either elect, re-elect, or modify an existing election for a fiscal year. The Secretary of the Treasury would prescribe rules consistent with current IRS practices for the frequency of changes and limitations on the utilization of any resulting net operating losses.

In addition, no restriction would be imposed on the length of the deferral period. Entities would be allowed to elect a fiscal year which ends in any month. The proposed legislation would also make minor technical corrections which will ease the administrative burden.

This corrective legislation is intended to be revenue neutural. Preliminary data received from the IRS indicate that the required payments collected from the entities which elected section 444 fiscal years may actually exceed the 1986 revenue estimate. It is anticipated that the proposed changes to the law will sustain the anticipated revenue levels. A revenue estimate on the proposal to confirm this neutrality has been requested. If necessary, the required payment made by taxpayers retaining a fiscal year under section 444 would be adjusted to meet revenue shortfalls.

The proposed legislation would allow taxpayers, tax practitioners, and the Internal Revenue Service to better meet tax filing requirements by spreading work demands throughout the year. Taxpayers, workloads and the administration of the tax system will benefit.

I ask unanimous consent that a copy of the bill appear in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2980

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MODIFICATION OF PROVISIONS PERMITTING ELECTION OF CERTAIN TAXABLE YEARS.

(a) REPEAL OF LIMITATIONS ON TAXABLE YEARS WHICH MAY BE ELECTED.—Subsection (b) of section 444 of the Internal Revenue Code of 1986 is hereby repealed.

(b) MODIFICATION OF ELECTION PROCEDURES.—Subsection (d) of section 444 of such Code is amended to read as follows:

"(d) ELECTIONS; CHANGES IN TAXABLE YEAR.—

"(1) PERSON MAKING ELECTION.—An election under subsection (a) shall be made by the partnership, S corporation, or personal service corporation.

"(2) PERIOD OF ELECTION.—

"(A) IN GENERAL.—Any election under subsection (a) shall remain in effect until the partnership, S corporation, or personal service corporation terminates such election. A change of a taxable year shall not be treated as a termination of such election unless such change is to a required taxable year.

"(B) ELECTION AFTER TERMINATION.—

"(i) IN GENERAL.—If an election under subsection (a) by any partnership, S corporation, or personal service corporation is terminated, such entity (and any successor thereof) shall not be eligible to make an election under subsection (a) for any subsequent taxable year before its 5th taxable year which begins after the 1st taxable year for which such termination is effective, unless the Secretary consents to such election.

"(ii) SPECIAL RULE.—Notwithstanding clause (i), any entity referred to in clause (i) may make an initial election under subsection (a) for any taxable year beginning after the date of the enactment of this clause, without the consent of the Secretary.

"(3) CERTAIN CHANGES IN TAXABLE YEAR PERMITTED.—A partnership, S corporation, or personal service corporation to which an election under this section applies may, without the consent of the Secretary—

"(A) change its taxable year, effective for any taxable year beginning after the date of the enactment of this subparagraph if it has not previously changed its taxable year under this paragraph,

"(B) change its taxable year for any other taxable year if such change is to a required taxable year, and

"(C) change its taxable year effective for any taxable year beginning after the 5th taxable year that the taxable year change pursuant to subparagraph (A) was effective.

"(4) TIERED STRUCTURES.—

"(A) IN GENERAL.—Except as othewise provided in this paragraph—

"(i) no election may be made under subsection (a) with respect to any entity which is part of a tiered structure, and

"(ii) an election under subsection (a) with respect to an entity shall be terminated if such entity becomes part of a tiered structure.

"(B) EXCEPTIONS FOR STRUCTURES CONSISTING OF CERTAIN ENTITIES WITH SAME TAXABLE YEAR.—Subparagraph (A) shall not apply to any tiered structure which consists only of partnerships or S corporations (or both) all of which have the same taxable year.

"(5) LIMITATION ON LOSS FOR SHORT PERIOD RESULTING FROM CHANGE OF YEAR.—

"(A) IN GENERAL.—If any entity to which an election under this section applies changes its taxable year, any loss (including a capital loss) for the short period resulting from such change—

"(i) shall not be allowed as a carryback to any preceding taxable year (or, in the case of a partnership or S corporation, shall not be taken into account by any partner or shareholder for his taxable year in which such short period ends), and

"(ii) shall be taken into account by the entity (or, in the case of a partnership or S corporation, by the partner or shareholder) ratably over the first 6 taxable years beginning after the short period (or over such other period as the Secretary may prescribe)."

(c) INCREASE IN RATE USED IN DETERMINING REQUIRED PAYMENT.—Subsection (b) of section 7519 of such Code is amended by striking "1 percentage point (or, in the case of taxable years beginning in 1987, 36 percent)" and inserting " percentage points".

(d) TECHNICAL MODIFICATIONS.—

(1) INTEREST ON LATE REFUNDS OF REQUIRED PAYMENTS.—Paragraph (3) of section 7519(f) of such Code is amended to read as follows:

"(3) INTEREST.—For purposes of determining interest, any payment required by this section shall be treated as a tax; except that—

"(A) no interest shall be allowed with respect to any refund of a payment made under this section if such refund is made on or before the date prescribed by subsection (c)(3), and

"(B) if such refund is not made on or before such date, interest shall be allowed but only with respect to periods after such date."

(2) CERTAIN CARRYBACKS PERMITTED.—Subsection (e) of section 280H of such Code is amended by adding at the end thereof the following new sentence: "The preceding sentence shall not apply to any net operating loss carryback from a taxable year to which an election under section 444 does not apply."

(3) ADMINISTRATIVE CHANGE.—Paragraph (1) of section 7519(f) of such Code is amended by inserting before the period at the end thereof the following: "; except that the Secretary shall prescribe a separate form for making such payments (or claiming any refund of such payments) and the Secretary may permit such payments to be made through deposits".

(e) CONFORMING AMENDMENTS.—

(1) Subparagraph (A) of section 280H(f)(3) of such Code is amended to read as follows:

"(A) DEFERRAL PERIOD.—Except as provided in regulations, the term 'deferral period'

means, with respect to any taxable year of the entity, the months between—

"(i) the beginning of such year, and

"(ii) the close of the 1st required taxable year (as defined in section 444(e)) ending within such year."

(2) Subsection (g) of section 444 of such Code is amended by striking "or (d)(2)(B)".

(3) Paragraph (1) of section 7519(e) of such Code is amended by striking "section 444(b)(4)" and inserting "section 280H(f)(3)(A)".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of enactment of this Act, except for amendments made by subsections (d)(1) and (d)(2), which shall take effect as if included in section 10206 of the Omnibus Budget Reconciliation Act of 1987.●

By Mr. THURMOND:

S. 2981. A bill to amend the Federal charter for the Boys' Clubs of America to reflect the change of the name of the organization to the Boy's and Girls Clubs of America; to the Committee on the Judiciary.

BOYS' CLUBS OF AMERICAN NAME CHANGE

● Mr. THURMOND. Mr. President, in August 1956, the Congress of the United States recognized the work of Boys' Club of America by presenting to it a Federal charter on the occasion of its 50th anniversary. This outstanding organization has a superlative record of service to youth with a special concern for girls and boys from disadvantaged circumstances.

For 130 years, the young people of this country have benefited from caring people who serve as Board members and staff and who truly believe, "there's no such thing as a bad kid."

In 1860, the first clubs were founded in New England during the height of the industrial revolution. This concept of providing after school and evening growth-enhancing activities for young people grew and in 1906 the national organization, now known as Boys' Club of America, was founded. For the next six decades, local clubs served a growing youth population primarily made up of boys.

Today, there are 1,100 clubs across the country serving 1.4 million girls and boys.

Mr. President, in May of this year the National Council of Boys Clubs of America voted to change the name of the national organization to Boys & Girls Clubs of America in recognition of more than 400,000 girls who are now members of Boys & Girls Clubs across the country. Therefore, I urge my colleagues to join with me in supporting this amendment to the Boys Clubs Federal charter which reflects the change of the name of the organization to the Boys & Girls Clubs of America and also updates the names of the board members.

I ask unanimous consent that the text of this bill be printed in the RECORD after my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2981

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That the Act entitled "An Act to incorporate the Boys' Clubs of America", approved August 6, 1956 (70 Stat. 1052) is amended—

(1) in the title by striking "Boys'" and inserting "Boys & Girls";

(2) in the first section by striking "successors," and inserting "successors: Gerald W. Blakeley, Jr. Boston, Massachusetts; Roscoe C. Brown, Jr., Bronx, New York; Cees Bruynes, Stamford, Connecticut; Honorable Arnold I. Burns, New York, New York; John L. Burns, Greenwich, Connecticut; Hays Clark, Hobe Sound, Florida; Mrs. Albert L. Cole, Hobe Sound, Florida; Honorable Michael Curb, Burbank, California; Robert W. Fowler, Atlantic Beach, Florida; Thomas G. Garth, New York, New York; Moore Gates, Jr., Princeton, New Jersey; Ronald J. Gidwitz, Chicago, Illinois; John S. Griswold, Greenwich, Connecticut; Claude H. Grizzard, Atlanta, Georgia; George V. Grune, Pleasantville, New York; Peter L. Haynes, New York, New York; James S. Kemper, Northbrook, Illinois; Plato Malozemoff, New York, New York; Edmund O. Martin, Oklahoma City, Oklahoma; Donald E. McNicol, Esq., New York, New York; Carolyn P. Milbank, Greenwich, Connecticut; Jeremiah Milbank, New York, New York; C. W. Murchison, III, Dallas, Texas; W. Clement Stone, Lake Forest, Illinois,";

(3) in the first section by striking "Boys'" and inserting "Boys & Girls";

(4) in section 3 by striking "boys" and inserting "youth".

By Mr. KOHL (for himself and Mr. KASTEN):

S. 2982. A bill to establish the Fox River National Heritage Corridor; to the Committee on Energy and Natural Resources.

FOX RIVER NATIONAL HERITAGE CORRIDOR ACT OF 1990

● Mr. KOHL. Mr. President, I am very pleased to introduce legislation to establish the Fox River National Heritage Corridor in Wisonsin.

The bill that Senator KASTEN and I are proposing today has two basic purposes: to federally recognize the Fox River corridor's role in our Nation's development; and to coordinate Federal, State and local efforts aimed at preserving and enhancing the corridor's unique natural, historical, and cultural heritage.

The Fox River winds across Wisconsin, starting in Columbia County, traveling through Portage on its way to Lake Butte des Morts and Lake Winnebago, then continuing northward until it empties into Green Bay—where the river joins Lake Michigan.

Long before European explorers arrived on the scene, native Americans had traveled the Fox River and inhabited its shores. Later, history was made when explorers Marquette and Joliet followed the Fox and Wisconsin Rivers to reach the Mississippi River. After that discovery, the Fox River played a critical role in the opening of the Northwest Territory, serving as a significant transportation corridor for settlers traveling into the Nation's vast interior.

Throughout the 19th and 20th centuries, the Fox River has played a significant role in the commercial and industrial development of this country. Besides serving as a transportation corridor, the Fox River's plentiful water supply attracted various industries to the region. In particular, the Fox River corridor quickly became famous for its concentration of paper mills, attracted by the region's vast forest reserves, access to major markets, and water supply. In fact, the Lower Fox River has the Nation's highest concentration of paper mills along a single stretch of river.

Development in the region was further enhanced by construction of the world's first successful hydroelectric plant, powered by dams along the river. A local residence was the first to get electricity from a centrally located hydroelectric plant.

One of the most significant and historic features of the Fox River is the remarkable system of locks and dams. Although the locks along the Upper Fox were abandoned in 1956, most of the locks along the Lower Fox have been operational for the past 140 years. This lock system has the distinction of being one of only two hand-operated systems in the Nation, and the only one in continual operation since the time of its construction.

But this bill is not intended to focus on the individual parts that make up the Fox River corridor. Instead, the legislation attempts to tie together the many different aspects of the corridor. The Fox River, the locks and dams, the historic buildings and sites, the industrial and cultural heritage which has developed along the corridor—all these parts taken together represent a unique slice of American life which should be preserved for ourselves and future generations. That's why I'm introducing this bill today.

Now more than ever, Americans want to learn more about their history, their roots. We want to know how this great Nation came to be what it is today. Tourism is on the rise, with people looking for new and different educational experiences to share with their families. The Fox River National Heritage Corridor will provide the region with the identity it needs to maximize its tourism potential.

This legislation establishes a Fox River National Heritage Corridor Commission to integrate Federal, State, and local activities aimed at preserving and interpreting the corridor's diverse resources. The Commission will be composed of 21 members representing the State, local governments, and interested members of the general

public. Commissioners will be appointed by the Secretary of the Interior, with input from the Governor of Wisconsin.

The Commission's chief duty will be the development of a cultural heritage and corridor management plan, which will coordinate and consolidate any Federal, State, and local plans in order to present a unified historic preservation and interpretation plan for the Corridor. The Commission will hold public hearings and make every attempt to involve the public in development of the plan.

The plan will define the boundaries of the corridor, provide an inventory of all properties and structures of significance to the corridor, and outline an historic interpretation plan to illustrate the history of the corridor. The plan will also recommend policies for comprehensive resource management throughout the corridor, and contain a program for implementation of those policies.

After review and approval of the plan by the Secretary of the Interior, the Commission will take steps to implement the plan. In so doing, the Commission will work closely with the State and with local governments in the region, as well as with the public. Interpretive materials, like guide brochures and historical markers, will be produced with the help of the Secretary of the Interior.

Finally, I should describe what this bill does not do. It does not involve any land acquisition, unless the land is offered as a donation, or money is donated for the acquisition of a property which has been offered for sale by a willing seller. In such cases, the land will be immediately transferred to whatever public agency is deemed appropriate by the Commission. There will be no condemnation of private lands for purposes of this legislation, and no land will be purchased with public funds.

Furthermore, this bill does not involve a significant expenditure of public funds. The bill authorizes Federal appropriations of up to $350,000 annually, but any Federal dollars spent must be matched by State, local, or private dollars. In other words, this bill will accomplish its goals with very few dollars.

In sum, I believe that this bill represents an impressive commitment on the part of many people living and working in the Fox River corridor. I have already met with many groups and individuals in the area, and I plan to meet with others very soon. I have seen their commitment and resolve toward preserving the region's unique cultural and historical heritage. Through this legislation, I plan to work with the communities in the Fox River corridor to help them achieve their worthwhile goals. In addition, Senator KASTEN and I will work together in the Senate to steer this legislation through Congress, and I am very hopeful that the Fox River National Heritage Corridor will soon become a reality.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2982

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fox River National Heritage Corridor Act of 1990".

SEC. 2. FINDINGS.

The Congress finds the following:

(1) The Fox-Wisconsin waterway is famous as the discovery route of Marquette and Joliet. Connecting the Great Lakes to the Great River, this waterway was critical in the opening of the Northwest Territory, serving as a major artery in bringing commerce to the interior of the Nation and providing a vital communication link for early explorers, missionaries and fur traders.

(2) Within the Fox River corridor are an abundance of historic and archeological sites and structures representing early Native Americans, European exploration, and 19 century transportation and settlement. Today, over 50 jurisdictions and a population of more than half a million inhabit the corridor, located within 300 miles of 22,000,000 people.

(3) Historically tied to the development of the paper industry, the Lower Fox River is noted for having the Nation's highest concentration of paper mills along a single stretch of river. Power generated from the river's early dams was responsible for the first successful hydroelectric plan in the world and the first residence electrified from a centrally-located hydroelectric plant.

(4) The Lower Fox River lock and dam system is the dominant historical element in the corridor. The 140-year old lock system is one of only 2 hand operated systems in the Nation and the only hand operated system continually functioning since its inception. This system represents a distinct era in water transportation technology, falling between the earlier tow-path oriented models and the modern automated systems.

(5) This lock and dam system is under threat of abandonment by the Army corps of Engineers. The lock system has been placed in caretaker status by the Corps and operated by the State since 1984. Despite State and local efforts, there is concern that this system will meet the same fate as the locks and dams of the Upper Fox River, which were abandoned in 1956. On the Upper Fox River, only the Eureka lock still operates, with restoration underway on the Portage Canal, the linkage between the Fox and Wisconsin Rivers.

(6) The full potential of the diverse natural and cultural features of the waterway, extending from Green Bay to Portage, and connecting to the Lower Wisconsin Riverway, will best be realized with assistance from the Federal Government. The unique aspects of the waterway, from heavily developed portions of the Lower Fox River to the pristine expanses of the Upper Fox River, offer an opportunity to establish a nationally significant corridor representative of the Nation's midwest heritage.

SEC. 3. ESTABLISHMENT OF NATIONAL HERITAGE CORRIDOR.

(a) ESTABLISHMENT.—There is established in the State of Wisconsin the Fox River National Heritage Corridor (referred to as the "corridor").

(b) PURPOSE.—It is the purpose of this Act to provide a management framework to assist the State and its political subdivisions in developing and implementing integrated cultural, historical, and natural resource policies and programs that will preserve and interpret for the educational and inspirational benefit of present and future generations the unique and significant contributions to our national heritage of certain historic and cultural lands, waterways, and structures within and surrounding the Fox River.

SEC. 4. BOUNDARIES AND ADMINISTRATION.

(a) BOUNDARIES.—The boundaries of the corridor shall include the lands generally, depicted on the map entitled "Fox River National Heritage Corridor" numbered ———— and dated April, 1990. The map shall be on file and available for public inspection in the offices of the Department of the Interior in Washington, District of Columbia, and the Wisconsin Department of Natural Resources. As soon as practicable after the date of enactment of this Act, the Secretary shall publish in the Federal Register a detailed description and map of the boundaries established under this subsection.

(b) ADMINISTRATION.—The corridor shall be administered in accordance with this Act.

SEC. 5. FOX RIVER NATIONAL HERITAGE CORRIDOR COMMISSION.

(a) ESTABLISHMENT.—There is established the Fox River National Heritage Corridor Commission (referred to as the "Commission"). The Commission shall assist Federal, State, and local authorities in the development and implementation of an integrated resource management plan for the corridor.

(b) MEMBERSHIP.—(1) The Commission shall be composed of 21 members appointed not later than 180 days after the date of enactment of this Act as follows:

(A) The Director of the National Park Service ex officio (or the Director's delegate).

(B) Four persons appointed by the Secretary, who shall represent the Wisconsin Department of Natural Resources, the State Historical Society of Wisconsin, the Wisconsin Department of Development, and the Wisconsin Department of Administration.

(C) Eight representatives of local governments from the State appointed by the Secretary, of whom 6 shall be representatives from the Lower Fox region and 2 shall be representatives from the Upper Fox region.

(D) Eight persons from the general public who are citizens of the State appointed by the Secretary, who shall have knowledge and experience in appropriate fields of interest, relating to the preservation, use, and interpretation of the corridor, of whom 6 shall be residents of the Lower Fox region and 2 shall be residents of the Upper Fox region.

(2) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(c) CONSULTATION.—In making the appointments pursuant to subsection (b), the Secretary shall consult with and seek the advice of the Governor of the State.

(d) TERMS.—Members of the Commission shall be appointed for terms of 3 years and may be reappointed. A member appointed to

fill a vacancy occuring before the expiration of the term of which the member's predecessor was appointed shall be appointed only for the remainder of that term. A member of the Commission appointed for a definite term may serve until the member's successor has taken office.

(e) COMPENSATION.—Members of the Commission shall receive no pay on account of their service on the Commission, but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistance, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

(f) CHAIRPERSON.—The chairperson of the Commission shall be elected by the members of the Commission. The term of the chairperson shall be 2 years.

(g) QUORUM.—(1) Eleven members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(2) The affirmative vote of 6 members of the Commission shall be required to approve the budget of the Commission.

(h) MEETINGS.—The Commission shall hold its first meeting not later than 90 days after the date on which its members are appointed, and shall meet at least quarterly at the call of the chairpeson or 6 of its members. Meetings of the Commission shall be subject to section 552b of title 5, United States Code.

SEC. 6. STAFF OF THE COMMISSION.

(a) IN GENERAL.—(1) The Commission shall have the power to appoint and fix the compensation of such staff as may be necessary to carry out its duties.

(2) Staff appointed by the Commission—

(A) shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service; and

(B) shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(b) EXPERTS AND CONSULTANTS.—Subject to such rules as may be adopted by the Commission, the Commission may procure temporary and intermittent services to the extent authorized by section 3109(b) of title 5, United States Code, but at rates determined by the Commission to be reasoanble.

(c) STAFF OF OTHER AGENCIES.—(1) On request of the Commission, the head of any Federal agency may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out the Commission's duties.

(2) The Commission may accept the services of personnel detailed from the State and any political subdivision thereof and may reimburse the State or such political subdivision for those services.

SEC. 7. POWERS OF COMMISSION.

(a) HEARINGS.—(1) The Commission may hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission considers appropriate.

(2) The Commission may not issue subpoenas or exercise any subpoena authority.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission, if authorized by the Commission, may take any action that the Commission is authorized to take by this Act.

(c) ADMINISTRATIVE SUPPORT SERVICES.—The Administrator of the General Services Administration shall provide to the Commission, on a reimbursable basis, such administrative support services as the Commission may request.

(d) MAILS.—The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) USE OF FUNDS TO OBTAIN MONEY.—The Commission may use its funds to obtain money from any source under any program or law requiring the recipient of such money to make a contribution in order to receive such money.

(f) GIFTS.—(1) Except as provided in subsection (g)(2)(B), the Commission may, for purposes of carrying out its duties, seek, accept, and dispose of gifts, bequests, or donations of money, personal property, or services, received from any source.

(2) For purposes of section 170(c) of the Internal Revenue Code of 1986, any gift to the Commission shall be deemed to be a gift to the United States.

(g) ACQUISITION OF REAL PROPERTY.—(1) Except as provided in paragraph (2) and except with respect to any leasing of facilities under subsection (c), the Commission may not acquire any real property or interest in real property.

(2) Subject to paragraph (3), the Commission may acquire real property, or interests in real property, in the corridor—

(A) by gift or devise; or

(B) by purchase from a willing seller with money given or bequeathed to the Commission on the condition that such money would be used to purchase real property, or interests in real property, in the corridor.

(3) Any real property or interest in real property acquired by the Commission under paragraph (2) shall be conveyed by the Commission to an appropriate public agency, as determined by the Commission. Any such conveyance shall be made—

(A) as soon as practicable after such acquisition;

(B) without consideration; and

(C) on the condition that the real property or interest in real property so conveyed is used for public purposes.

(h) COOPERATIVE AGREEMENTS.—For purposes of carrying out the plan, the Commission may enter into cooperative agreements with the State, with any political subdivision of the State, or with any person. Any such cooperative agreement shall, at a minimum, establish procedures for providing notice to the Commission of any action proposed by the State, such political subdivision, or such person which may affect the implementation of the plan.

(i) ADVISORY GROUPS.—The Commission may establish such advisory groups as it deems necessary to ensure open communication with, and assistance from, the State, political subdivisions of the State, and interested persons.

SEC. 8. DUTIES OF THE COMMISSION.

(a) PREPARATION OF PLAN.—(1) Within 1 year after the Commission conducts its first meeting, it shall submit to the Secretary a Cultural Heritage and Corridor Management Plan.

(2) The plan shall be based on existing Federal, State, and local plans, but shall coordinate and consoldiate those plans to present a unified historic preservation and interpretation plan for the corridor.

(3) The plan shall—

(A) define the specific boundaries of the corridor;

(B) provide an inventory that includes any property in the corridor that should be preserved, restored, managed, developed, maintained, or acquired because of its national State or local historic or cultural significance;

(C) develop a historic interpretation plan to illustrate the history of the waterway and its surrounding area;

(D) recommend policies for resource management that consider and detail the application of appropriate land and water management techniques, including the development of intergovernmental cooperative agreements, that will protect the corridor's historical cultural, scenic, and natural resources in a manner consistent with supporting appropriate and compatible economic revitalization and expansion efforts;

(E) identify activities of mutual interest with the Fox River Management Commission;

(F) detail ways in which local, State, and Federal programs may best be coordinated to promote the purposes of this Act; and

(G) contain a program for implementation of the plan by the State and its political subdivisions.

(b) IMPLEMENTATION OF PLAN.—(1) After review and approval of the plan by the Secretary as provided in section 10(a), the Commission shall implement the plan by taking steps to preserve and interpret the historic resources of the waterway and its surrounding area, and to support public and private efforts in economic revitalization and expansion consistent with the goals of the plan.

(2) The steps that the Secretary may take may include—

(A) assisting the State in preserving and renovating the lock and waterway system;

(B) assisting the State and local governments in designing, establishing, and maintaining visitor centers and other interpretive areas and exhibits in the corridor;

(C) assisting the State, local governments and nonprofit organizations in increasing public awareness of an appreciation of the historical, engineering, architectural, environmental and geological resources and sites in the corridor;

(D) assisting the State, local governments, and nonprofit organizations in the restoration of historic buildings with nationals State or local significance in the corridor;

(E) encouraging enhanced economic and business development in the corridor consistent with the goals of the plan;

(F) encouraging local governments to adopt land use policies consistent with the management of the corridor and the goals of the plan and to take actions to implement those policies;

(G) ensuring that clear, consistent signs identifying access points and sites of interest are placed throughout the corridor; and

(H) establishing corridor recognition by actively promoting the cultural, historical, natural, and recreational resources on a community, regional, state-wide, national, and international basis.

SEC. 9. TERMINATION OF COMMISSION.

(a) TERMINATION.—Except as provided in subsection (b), the Commission shall terminate on the date that is 5 years after the day after the date of the enactment of this Act.

(b) EXTENSIONS.—The Commission may be extended for a period of not more than 5 years beginning on the date of termination specified in subsection (a), if, not later than 180 days before that date—

(1) the Commission determines that an extension is necessary in order to carry out this Act;

(2) the Commission submits a proposed extension to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate; and

(3) The Governor of the State and the Secretary approve the extension.

SEC. 10. DUTIES OF THE SECRETARY.

(a) APPROVAL OF PLAN.—(1) The Secretary shall approve or disapprove a plan submitted by the Commission not later than 60 days after date of receipt.

(2) The Secretary shall approve a plan if the Secretary—

(A) finds that the plan would adequately protect the significant historical and cultural resources of the corridor while providing adequate and appropriate outdoor recreational opportunities and economic activities within the corridor;

(B) determines that the Commission held public hearings and provided adequate opportunity for public and governmental involvement in the preparation of the plan; and

(C) receives adequate assurances from appropriate State officials that the implementation program recommended in the plan will be initiated within a reasonable time after the date of approval of the plan, and that the implementation program will ensure effective implementation of the State and local aspects of the plan.

(b) DISAPPROVAL OF PLAN.—(1) If the Secretary disapproves a plan submitted by the Commission, the Secretary shall advise the Commission in writing of the reasons for the dsapproval and shall make recommendations for revisions in the plan.

(2) The Commission shall, not later than 90 days after receipt of a notice of disapproval, revise and resubmit the plan to the Secretary, who shall approve or disapprove a proposed revision not later than 60 days after the date it is submitted.

(c) INTERPRETIVE MATERIALS.—(1) Following approval of the plan under subsection (a), the Secretary shall assist the Commission in designing and producing interpretive materials based on the plan.

(2) Interpretive materials may include—

(A) guide brochures for exploring the corridor by automobile, train, bicycle, boat, or foot;

(B) indoor and outdoor visitor displays, which may include video presentations, at several locations along the corridor; and

(C) a mobile display describing the history of the corridor, to be used in the corridor, public buildings, libraries, and schools.

(d) TECHNICAL ASSISTANCE.—The Secretary shall, on the request of the Commission, provide technical assistance to the Commission in the preparation and implementation of the plan.

SEC. 11. DUTIES OF OTHER FEDERAL ENTITIES.

Any Federal entity conducting or supporting activities directly affecting the flow of the canal or the natural resources of the corridor shall—

(1) consult with the Secretary and the Commission with respect to those activities;

(2) cooperate with the Secretary and the Commission in carrying out their duties under this Act and, to the maximum extent practicable, coordinate such activities with the carrying out of those duties; and

(3) to the maximum extent practicable, conduct or support those activities in a manner consistent with the plan and this Act.

SEC. 12. AUTHORIZATION OF APPROPRIATIONS.

(a) COMMISSION.—There is authorized to be appropriated annually to the Commission to carry out its duties under this Act $350,000, but the Federal contribution to the Commission shall not exceed 50 percent of the annual costs to the Commission in carrying out those duties.

(b) SECRETARY.—There are authorized to be appropriated annually to the Secretary such sums as are necessary to carry out the Secretary's duties under this Act.

SEC. 13. DEFINITIONS.

For the purposes of this Act—

(1) the term "Commission" means the Fox River National Heritage Corridor Commission established section 5(a);

(2) the term "corridor" means the Fox River National Heritage Corridor established under section 3(a);

(3) the term "plan" means the Cultural Heritage and Corridor Management Plan prepared by the Commission pursuant to section 8(a);

(4) the term "Secretary" means the Secretary of the Interior; and

(5) the term "State" means the State of Wisconsin or a State-designated management agency.

SEC. 14. WISCONSIN RIVER STUDY.

(a) FINDINGS.—The Congress finds the following:

(1) The Fox River was an essential access way into the Nation's heartland.

(2) Movement up the Fox River and subsequent travel along the Wisconsin River created one of the most important corridors opening the Upper Midwest.

(b) ASSESSMENT.—(1) The Secretary, in consultation with the Governor of the State, shall conduct an assessment of the historic linkage of the Fox River corridor and the Lower Wisconsin River.

(2) The assessment required by paragraph (1) shall identify the historic value of the Lower Wisconsin River, including points of special note and threats to the historic integrity of the corridor or points of special note.

(3) The Secretary shall report to Congress the findings of the assessment not later than 2 years after the date of enactment of this Act.●

● Mr. KASTEN. Mr. President, I rise to introduce legislation to create the Fox River National Heritage Corridor. The legislation that Senator KOHL and I are introducing establishes a mechanism to protect and restore the historic Fox River system.

The Fox River has an important and varied history. The Fox River played a key role in the settlement of the Midwest. First discovered by the French Canadians, early explorers and fur trappers paddled their canoes into Green Bay and up the Fox River.

The Fox River was the lynchpin of the establishment of a trade route which allowed the development of commerce throughout the Midwest. Not only did the Fox serve as an important corridor to Wisconsin's heartland, but it granted access to the entire Mississippi basin.

At Portage, WI, the Great Lakes, and Mississippi basins are separated by a distance of only a couple of miles.

By portaging their canoes between the Fox and Wisconsin Rivers, early travelers gained access to the entire Mississippi River system. A link was established to the South reaching to the Gulf of Mexico, and to the West reaching to Montana via the Missouri River.

The Fox River link is the closest thing to a Northwest Passage ever established. It provided an easy means of transport and for the movement of settlers into the heart of America.

With the industrial revolution, the Fox River again played a key historic role. A system of locks and dams were established on the Fox to allow the easy movement of goods.

Shortly thereafter, the Fox became an industrial center.

The Fox River hosted the establishment of the U.S. paper industry. Today, more paper is made in the Fox River Valley than anywhere else in the world. Much of our domestic technology was born there, and the Fox Valley continues to lead the world in the development of paper products.

But the Fox River corridor is not just the home to the modern paper industry, or a monument to the early history of our Nation. It is truly a multiple use waterway.

Today the Fox River system attracts extensive recreational use. Some of the best fishing in the world is in this basin. There is a very high concentration of pleasure boats, as well as the center of commerce.

This legislation will establish a mechanism to protect this valuable resource. Without this legislation, critical historical and natural resources will likely be lost.

We owe it to ourselves and future generations of Americans to protect this fabulous system.

Senator KOHL and I have worked together for months on the crafting of this legislation. It draws a proper balance between preservation and the continued utilization of a dynamic resource.

Over the past 3 years, I have toured the corridor and sought the establishment of such a comprehensive preservation program.

This legislation brings together the need to protect unique historic features, promote tourism, protect natural areas, and support the economic development of the Fox River Valley.

I hope that these years of work can pay dividends.●

By Mr. ROTH:

S. 2983. A bill to amend the Internal Revenue Code of 1986 to clarify the application of the passage of foreign investment company rules; to repeal the export trade corporation rules, and for other purposes; to the Committee on Finance.

EXPORT COMPANY INCENTIVE ACT OF 1990

● Mr. ROTH. Mr. President, today I am introducing the Export Company

Incentive Act of 1990. This bill is important because it clarifies an area of law that clearly the Congress did not address when it passed the Tax Reform Act of 1986. And had the Congress addressed the issue, it certainly would have included this, or similar, legislation as part of the bill.

THE PROBLEM

The problem has resulted because of the overly broad inclusion of income under the passive foreign investment company [PFIC] rules of the 1986 act. The PFIC rules were passed in 1986 because Congress did not believe that tax rules should effectively operate to provide U.S. investors tax incentives to make investments outside the United States rather than inside the United States. Since the tax law at that time generally required current taxation for passive investments in the United States, Congress did not believe that U.S. persons who invest in passive assets should avoid the economic equivalent of current taxation merely because they invest those assets directly through a foreign corporation. Congress believed that the subpart F rules did not act to properly subject this passive income to tax because those rules looked only to the nationality of the owners of controlling interests of a corporation. The PFIC rules were the result of these problems, but we intended the rules to subject entities that were in essence foreign mutual funds or investment vehicles to current taxation.

THE RESULT

The result turned out to be much broader than we intended. The 1986 act defined a PFIC to mean any foreign corporation if 75 percent or more of its gross income for the taxable year consists of passive income, or any foreign corporation if 50 percent or more of the average value of its assets consists of assets that produce, or are held for the production of, passive income. Passive income generally is defined to include dividends, interest and its equivalents, passive rents and royalties, annuities, gains from the disposition of stocks and securities and certain other assets, certain gains from commodity trading, and certain foreign currency exchange gains. Herein lies the problem. Because the definition of a PFIC is so broad, an unintended result has occurred. In short, Congress set out to catch a minnow—offshore investment funds—and it caught a whale.

The PFIC rules specifically excluded income earned by banks, because Congress realized that even though banks earned most of their money from interest, which was normally passive income, the banks were not investors but rather were in an active trade or business, that is, banking. However, banks are not the only entity that we should be concerned with. Other businesses, although active in nature, may be treated as passive under the PFIC rules and therefore unintentionally subject to the PFIC tax rules. Those businesses that were unintentionally harmed are the ones I have to concentrate on in this legislation.

THE SOLUTION

Rather than trying to redefine what constitutes PFIC income, or simply repealing the rules altogether, I have taken a very conservative approach. I limit this bill to resolving the problem faced by U.S. companies which have organized export companies under specific U.S. laws designed to increase trade abroad. What Congress did not realize when it passed the PFIC rules was that it was punishing the very companies it had intended to encourage by specific tax incentives by taxing foreign sales corporations [FSC's] and export trade companies [ETC's]. This is a clear case of Congress throwing the baby out with the bath water, and it makes absolutely no policy sense. As a result, I am introducing this legislation to exempt FSC's and ETC's from the PFIC rules.

In fact, this bill closely mirrors a proposal contained in a letter from the chief of staff of the Joint Committee on Taxation to the chairman of the Ways and Means Committee in the House on April 20, 1990. The letter was sent in response to the chairman's request of the Joint Committee's staff to suggest proposals to simplify the Federal tax laws. As stated in the Joint Committee on Taxation letter, the bill would:

repeal the export trade corporations rules and avoid the application of the PFIC rules (or full deferral elimination regime) to foreign sales corporations. To the extent the FSC rules constitute a desirable export incentive, the export trade corporation rules may be superfluous. Arguably, they also are somewhat arbitrary, since they only apply to a limited number of grandfathered enities.

The Joint Committee proposal does not address the transition rules for existing export trade companies whose status would be terminated. My bill follows the precedent of prior law transitions, especially the 1984 legislation in which the Domestic International Sales Corporation [DISC] Program was replaced with the FSC Program. Consistent with the rules of the 1984 legislation, under my legislation, an existing ETC could elect to be treated as a FSC, transfer its assets to a FSC, or simply stop operating as an ETC. As in 1984, the accumulated earnings of an ETC would be treated as previously taxed income.

I welcome the cosponsorship of my fellow Senators and would encourage them to do so in an effort to continue the longstanding policy of the Senate to encourage the export of U.S. goods and services, and I ask that a copy of the bill be included in the RECORD with my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2983

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Export Company Incentive Act of 1990".

SEC. 2. FOREIGN SALES CORPORATIONS AND EXPORT TRADE CORPORATIONS NOT SUBJECT TO PASSIVE FOREIGN INVESTMENT COMPANY RULES.

(a) IN GENERAL.—Subsection (d) of section 1296 of the Internal Revenue Code of 1986 (defining passive foreign investment company) is amended to read as follows:

"(d) EXCEPTIONS.—For purposes of this part, the term 'passive foreign investment company' does not include—

"(1) any foreign investment company to which section 1247 applies,

"(2) any export trade corporation (as defined in section 971), and

"(3) any FSC (as defined in section 922)."

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if included in the amendments made by section 1235(a) of the Tax Reform Act of 1986.

SEC. 3. REPEAL OF EXPORT TRADE CORPORATION RULES.

(a) REPEAL.—Subpart G of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1986 (relating to export trade corporations) is repealed.

(b) ACCUMULATED ETC INCOME TREATED AS PREVIOUSLY TAXED.—In the case of any export trade corporation (whether or not an election is made by such corporation under subsection (c)), rules similar to the rules of paragraph (2) of section 805(b) of the Deficit Reduction Act of 1984 shall apply to treat actual distributions made by such corporation in taxable years beginning after December 31, 1984, as previously taxed income (within the meaning of section 996(f) of the Internal Revenue Code of 1986), if such income is derived before the first taxable year beginning after December 31, 1990.

(c) ELECTION OF STATUS AS FOREIGN SALES CORPORATION.—

(1) IN GENERAL.—Any export trade corporation may make an election under section 927(f)(1) of the Internal Revenue Code of 1986 to be treated as a FSC with respect to taxable years beginning after December 31, 1990. Such election shall be made by filing a statement of such election signed by each stockholder with the tax return filed with respect to such corporation's last taxable year beginning on or before December 31, 1990.

(2) TERMINATION AS ETC.—Any export trade corporation making an election described in paragraph (1) shall cease to be an export trade corporation for any taxable year beginning after December 31, 1990, under regulations prescribed by the Secretary of the Treasury.

(3) TREATMENT OF TRANSFERS TO FSC.—In the case of any export trade corporation which—

(i) makes an election described in paragraph (1), and

(ii) transfers before the last day of the first taxable year beginning after December 31, 1990, any portion of its property to a FSC in a transaction described in section 351 or 368(a)(1) of the Internal Revenue Code of 1986,

then, subject to such rules as the Secretary of the Treasury or the delegate of the Secretary may prescribe based on principles similar to the principles of subsections (a) and (b) of section 505 of the Revenue Act of 1971, no income, gain, or loss shall be recognized on such transfer or on the distribution of any stock of the FSC received (or treated as received) in connection with such transfer.

(d) EXPORT TRADE CORPORATION.—For purposes of this section, the term "export trade corporation" has the meaning given such term by section 971 of the Internal Revenue Code of 1986.

(e) CONFORMING AMENDMENT.—Subparagraph (A) of section 865(e)(2) of such Code is amended by striking the last sentence.

(f) EFFECTIVE DATE.—The repeal and amendment made by subsections (a) and (e) of this section shall apply to taxable years beginning after December 31, 1990.●

By Mr. BOSCHWITZ:

S. 2984. A bill to amend the Internal Revenue Code of 1986 to provide an income tax credit for eligible child care providers; to the Committee on Finance.

TAX CREDIT FOR CHILD CARE PROVIDERS

● Mr. BOSCHWITZ. Mr. President, I rise today to introduce legislation that will provide an income tax credit for licensed child care providers and for providers that receive additional education.

Both the House and Senate have passed child care legislation, which is currently in conference, in an attempt to enhance the quality of child care. While I support State-controlled licensing and safety regulations, I believe that the best way to increase the quality of child care is by giving incentives for providers to become licensed and to receive additional education.

My proposal would provide a 4 percent tax credit on a provider's gross child care income for those who meet State licensing qualifications and an additional 2 percent tax credit for those providers with a 2-year degree—or its equivalent. The percentages would be based on a provider's gross child care income that does not exceed $20,000.

Mr. President, child care providers do not currently receive any pay raises for being licensed or for upgrading their education. I have traveled throughout my State and have heard repeatedly that additional education is key to keeping providers up-to-date and keeping them in the child care business.

Mr. President, I believe that my proposal provides necessary incentives to increase the quality of child care providers and keep child care providers in the business. I urge my colleagues to join me in supporting this legislation to increase the years of service and quality of child care providers.

Mr. President, I ask unanimous consent that the complete text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2984

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CREDIT FOR ELIGIBLE CHILD CARE PROVIDERS.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1986 (relating to nonrefundable personal credits) is amended by inserting after section 25 the following new section:

"SEC. 25A. CREDIT FOR CHILD CARE PROVIDERS.

"(a) ALLOWANCE OF CREDIT.—

"(1) IN GENERAL.—In the case of an eligible child care provider, there shall be allowed as a credit against the tax imposed by this chapter an amount equal to the applicable percentage of so much of such provider's gross income for the taxable year derived from providing child care services as does not exceed $20,000.

"(2) APPLICABLE PERCENTAGE.—

"(A) GENERAL RULE.—For purposes of this section, the applicable percentage is 4 percent.

"(B) ADDITIONAL CREDIT FOR SPECIALLY TRAINED PROVIDER.—In the case of an eligible child care provider who has completed at least 60 semester or 90 quarter hours of study (or the equivalent) to be determined by the State agency responsible for licensing child care providers, the applicable percentage shall be 6 percent.

"(b) DEFINITIONS.—For purposes of this section—

"(1) ELIGIBLE CHILD CARE PROVIDER.—The term 'eligible child care provider' means an individual who—

"(A) provides child care services for children 13 years of age or younger, and

"(B) owns or is employed by a facility which meets the licensing requirements described in section 280A(c)(4)(B) (to the extent such requirements apply to child care facilities).

"(2) EDUCATIONAL ORGANIZATION.—The term 'educational organization' has the same meaning as under section 170(b)(1)(A)(ii).

"(c) INFLATION ADJUSTMENT FOR YEARS AFTER 1991.—In the case of any taxable year beginning in a calendar year after 1991, the $20,000 amount under subsection (a)(1) shall be increased by an amount equal to—

"(1) $20,000, multipled by

"(2) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which such taxable year begins, by subsituting 'calendar year 1990' for 'calendar year 1987' in subparagraph (B) thereof.

"(d) REGULATIONS.—The Secretary may by regulation establish criteria to be used to determine equivalents to degrees which qualify under subsection (a)(2)(B)."

(b) CONFORMING AMENDMENT.—The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 25 the following new item:

"Sec. 25A. Credit for child care providers."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1990.●

By Mr. DECONCINI (for himself, Mr. D'AMATO, and Mr. HARKIN):

S. 2985. A bill to amend the Controlled Substances Act to limit the retention of seized assets by the Attorney General for administrative expenses; to the Committee on the Judiciary.

USE OF SEIZED ASSETS FOR ADMINISTRATIVE EXPENSES

● Mr. DECONCINI. Mr. President, I rise today with my colleagues, Senators D'AMATO and HARKIN, to introduce a bill that will be of great benefit to our frontline forces in the war against drugs—the State and local law enforcement agencies. These agencies have combined with our Federal law enforcement agencies in an all-out assault upon the scourge of drugs that is ripping apart this country. However, their essential participation in this war has left them in critical need of resources to pursue the battle.

In the 1984 crime bill, we created the asset forfeiture fund. Through this fund, Federal law enforcement agencies were authorized to share proceeds from a drug seizure with the State and local law enforcement agencies that participated in that particular seizure. There is no doubt that local law enforcement agencies benefit greatly from the sharing of the ill-gotten booty of the drug pushers. The sharing of these assets has done more to foster cooperation between the Federal and local enforcement agencies than any other single initiative.

Currently, the Attorney General requires the deduction of 10 percent of the proceeds of a drug seizure for Federal administrative expenses. However, from time to time, the Justice Department has considered increasing the percentage of this administrative surcharge. Such action, quite simply, would greatly jeopardize the cooperative effort that has been achieved between Federal and State and local law enforcement agencies.

My legislation will try to put an end to this process. If passed, this legislation will prohibit the Justice Department from keeping more than 10 percent of the total proceeds derived from forfeitures for administrative expenses. Thus, this measure will retain the incentive for State and local cooperation with Federal law enforcement officials. This relationship is critical to the success of this drug war, for without these agencies' coordination, the war would be lost.

This legislation would also make it possible for financially strapped local agencies to continue their assault on this deadly enemy without having to worry about the Justice Department taking a greater percentage of the forfeiture assets they deserve.

Mr. President, in my State—with its 360 miles of common border with Mexico—city, county, and State officials have worked in concert with Federal agencies to fight the illicit drug

trade. Over the last few years, I have held several drug hearings in Arizona and have heard from local law enforcement officials who have emphatically expressed the importance of asset-sharing as a tool in combating the drug trade. Let me share with you the comments of one local police chief:

It is the use of these monies that allow agencies such as ours to increase in personnel and equipment to help stymie this epidemic. Further, it affords Federal agencies the leverage needed to gather State and local agencies in a cooperative effort to conduct effective investigations.

The assets State and local law enforcement agencies receive from their participation in joint investigations with Federal agencies is critical to their ability to continue to operate as this Nation's front line forces in the war on drugs. It is time to focus on the needs of the local law enforcement agencies. They need an enhancement of resources, not a reduction. This bill will ensure that the State and local agencies entitlement is preserved and that the Justice Department cannot balance its books on the back of the State and local police.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2985

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 511(e)(1) of the Controlled Substances Act (21 U.S.C. 881(e)(1)) is amended by adding at the end thereof the following:

"In determining the equitable share of proceeds for a State or local law enforcement agency from a drug-related asset seizure under subparagraph (A), the Attorney General shall not retain more than 10 percent of the total proceeds to cover the costs of administrative expenses.".●

By Mr. KERRY:

S. 2986. A bill to amend the Internal Revenue Code of 1986 to allow a deduction for fees for sewer and water services; to the Committee on Finance.

DEDUCTION FOR SEWER AND WATER FEES

● Mr. KERRY. Mr. President, I rise today to introduce legislation that will help ease the tax burden of middle-class homeowners throughout the country, by allowing an income tax deduction for user fees and water and sewer services.

Many State and local municipalities are faced with cleanup efforts like the one now confronting my home State of Massachusetts. Under a Federal court mandate, Massachusetts has begun the task of cleaning up Boston Harbor, and I am proud to say the State has met the enormity of this challenge head on. The Massachusetts Water Resources Authority, created to head the cleanup of Boston Harbor, will soon become the largest bond issuer in the country. It will pay off the bonds through revenue raised from user fees on water and sewer services.

The cost of the cleanup will not be cheap, and the Bush administration, despite its rhetoric of the 1988 campaign, has not proposed one dime for the cleanup of Boston Harbor. As a result, State and local governments have been hard pressed for additional revenues and have raised user fees on water and sewer services to raise the necessary funds to come into compliance with Federal water standards. These user fees have increased significantly in the past couple of years and have hit middle-class homeowners hard. In Massachusetts, user fees on water and sewer services have increased by 70 percent over the past 3 years. In the city of Boston, a household of four now pays $600 a year in water and sewer user fees, and the rates are expected to reach well over $1,000 in 5 years.

Massachusetts is not the only State facing the financial problems of complying with Federal water standards. Sioux Falls, SD and parts of New York State, to name a few, face similar problems. As America faces the challenge of cleaning up polluted rivers and contaminated water supplies, user fees on water and sewer services will certainly increase across the country. Therefore, I believe this legislation is critically important if we are to meet the challenges of environmental cleanup and ease the tremendous burden it places on middle-class homeowners.

Traditionally, the moneys raised for cleanup efforts in these areas have come from local real property taxes, which are tax deductible. However, many local and State governments have been forced to use alternative methods, such as user fees on water and sewer services, to raise the revenue for these projects. Therefore, I believe the Tax Code should reflect this change and allow for local water and sewer fees to be deductible in the same manner as local real property taxes.

This bill has been introduced in the House by Congressman DONNELLY. I urge my colleagues to join me in supporting this legislation, which provides significant tax relief for middle-class homeowners while maintaining our commitment to environmental cleanup.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (b) of section 164 of the Internal Revenue Code of 1986 is amended by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively, and by inserting after paragraph (2) the following new paragraph:

"(3) DEDUCTION ALLOWED FOR LOCAL SEWER AND WATER FEES.—

"(A) IN GENERAL.—Local sewer and water fees shall be allowed as a deduction under subsection (a) in the same manner as local real property taxes.

"(B) DEFINITION.—The term 'local sewer and water fees' means any amount imposed by a local government, State government (or any agency or instrumentality thereof), or by the District of Columbia as a charge for sewer or water service."

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1990.●

By Mr. SIMON:

S. 2987. A bill to establish the Lovejoy Building as an African-American Higher Education Center, and for other purposes; to the Committee on Labor and Human Resources.

AFRICAN-AMERICAN HIGHER EDUCATION CENTER

● Mr. SIMON. Mr. President, I introduce legislation to authorize Federal assistance to establish the historical Lovejoy Elementary School Building in Washington, DC, as an African-American Higher Education Center. I am pleaseld to do so as a tribute to the remarkable career of Elijah Parish Lovejoy.

Elijah Parish Lovejoy was a fiery abolitionist, a newsman, and an educator. Born in 1802, his varied career included the founding of an innovative school in St. Louis, MO for African-American children. He suffered many hardships for defending his views against slavery and his belief in the education of all children. He was forced to flee St. Louis and settle in Alton, IL because he stood up and spoke out for what he believed. In Illinois, using his press and editorial skills, he battled for the rights of all Americans. Tragically in 1837, at the young age of 35, Elijah Lovejoy gave his life defending the right to free speech and civil rights.

In addition to being named after Elijah Lovejoy, the Lovejoy Building, located at the corner of 12th and D Streets, NE., in Washington, DC, has an exciting and rich history. Not only was it used as Army barracks during the Civil War, but also it was one of the first schools in the District of Columbia for African-American children. The school has undergone many changes since it was first erected, but it's dedication to education has remained. At present, it is the home of the National Association for Equal Opportunity in Higher Education [NAFEO]—nonprofit, voluntary, membership organization dedicated to promoting and enhancing the participation of minorities in higher education. NAFEO represents 117 historically and predominantly black colleges and universities in the United States.

I commend NAFEO for its efforts to preserve Elijah Lovejoy's legacy by establishing the Lovejoy Building as an African-American Higher Education Center. The African-American Education Center would serve as a research and demonstration center, research training center and think tank for the 117 NAFEO member institutions, as well as other African-American higher education organizations. By providing Federal assistance for this effort, the needed renovation and rehabilitation of this building may be accelerated.

Mr. President, much attention has been paid recently to the status of education quality and opportunity in America. In its recent report, "Education That Works: An Action Plan for the Education of Minorities," the Action Council on Minority Education reported that although the educational attainment of African-Americans during the last 20 years has been impressive, the growth in overall college enrollment for African-Americans has fallen significantly. Furthermore, while African-Americans and Hispanic-Americans make up 21 percent of the population, they are only 2 percent of the doctorates in science and engineering. Of those who hold bachelor's level degrees in science and engineering, African-Americans account for only 5.5 percent.

Mr. President, the establishment of the Lovejoy Building as an African-American Education Center can be a symbol of the progress we have made as a nation in providing a quality education to all and the vital importance of keeping open the doors of educational opportunity.

Mr. President, I ask unanimous consent that following my remarks the full text of the bill be inserted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2987

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. GENERAL AUTHORITY.

In recognition of the remarkable career of Elijah Parish Lovejoy as an abolitionist, educator, and newsman, and in order to enhance the ability of the National Association for Equal Opportunity in Higher Education to properly serve the higher education interest of African-Americans, the Secretary of Education (hereinafter referred to as the "Secretary"), using funds appropriated pursuant to the authority of section 4, shall provide financial assistance to the National Association for Equal Opportunity in Higher Education, located in the District of Columbia, to enable the National Association for Equal Opportunity in Higher Education to establish the Lovejoy Building as an African-American Higher Education Center.

SEC. 2. APPLICATION.

No financial assistance may be provided under this Act unless the National Association for Equal Opportunity in Higher Education submits an application at such time, in such manner and containing or accompanied by such information as the Secretary may reasonably require.

SEC. 3. USE OF FUNDS.

Financial assistance made available pursuant to this Act shall be used for the renovation and rehabilitation of, and the acquisition of necessary equipment for, the African-American Higher Education Center described in section 1.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $4,000,000 for fiscal year 1992, $2,000,000 for fiscal year 1993, and $2,000,000 for fiscal year 1994 to carry out the provisions of this Act. Funds appropriated pursuant to this Act shall remain available until expended.●

By Mr. MOYNIHAN (for himself, Mr. HEINZ, Mr. BAUCUS, Mr. ROTH, Mr. BOREN, Mr. DANFORTH, Mr. PRYOR, Mr. DURENBERGER, Mr. RIEGLE, Mr. ARMSTRONG, Mr. SYMMS, Mr. SARBANES, Mr. WILSON, Mr. KENNEDY, Mr. COATS, Mr. HELMS, Mr. BURDICK, Mr. BUMPERS, Mr. JOHNSTON, Mr. CRANSTON, Mr. SHELBY, Mr. JEFFORDS, Mr. KERRY, Mr. DIXON, Mr. COCHRAN, Mr. BOND, Mr. BOSCHWITZ, Mr. DODD, Mr. LUGAR, Mr. CONRAD, Mr. LAUTENBERG, Mr. INOUYE, Ms. MIKULSKI, Mr. LIEBERMAN, Mr. SIMON, Mr. MURKOWSKI, Mr. REID, Mr. SANFORD, Mr. LOTT, Mr. HARKIN, Mr. PELL, Mr. SIMPSON, Mr. GLENN, Mr. LEVIN, Mr. KASTEN, Mr. HATFIELD, Mr. HOLLINGS, Mr. COHEN, Mr. NICKLES, Mr. BURNS, Mr. BINGAMAN, Mr. AKAKA, Mr. D'AMATO, Mr. MACK, Mr. BIDEN, Mr. BRYAN, Mr. GORE, Mr. KERREY, and, Mr. HEFLIN):

S. 2988. A bill to amend the Internal Revenue Code of 1986 to make the exclusion from gross income of amounts paid for employee educational assistance permanent, and for other purposes; to the Committee on Finance.

EMPLOYEE EDUCATIONAL ASSISTANCE ACT

Mr. MOYNIHAN. Mr. President, I rise today to introduce the Employee Educational Assistance Act of 1990, legislation that will make permanent section 127 of the Internal Revenue Code. This bill ensures that employees will be able to continue to receive up to $5,250 annually in tuition reimbursements or similar educational benefits from their employers on a tax-free basis. It also restores tax-free treatment under section 127 to graduate-level courses. I am pleased to be joined in introducing this legislation by 59 of my distinguished colleagues, including a majority of the members of the Senate Finance Committee. I think the level of support for this legislation speaks for itself, and reflects the importance that so many of us attach to this provision of the Tax Code.

First enacted in 1978, section 127 has enabled over 7 million working men and women to advance their education and improve their job skills without incurring additional income tax liabilities and a reduction in take-home pay. Without this provision, employees would owe taxes on the value of any educational benefits provided by their employers that do not directly relate to the current job held. For example, a clerical worker pursuing a college diplomat who earns $21,000 annually and who receives tuition reimbursement for two semesters of night courses worth $4,270 would owe additional Federal income and payroll taxes of $1,370 on this educational assistance. If the educational benefits are accepted, the employee's annual take-home pay after Federal income and payroll taxes falls from $16,730 to $15,360. It is shortsighted to impose such a tax burden on employees seeking to further their education. For many low- and moderate-income employees, this cut in take-home pay is simply prohibitive, preventing them from enrolling in courses that would upgrade their job skills and improve their future career prospects. Without this investment in our employees' education, the ability of our work force to compete in the global economy erodes. By removing the requirement that educational assistance be job-related, section 127 eliminates the tax burden on workers seeking to further their education and improve their career prospects. Moreover, section 127 removes a tax bias against lesser skilled workers who have greater difficulty proving that educational benefits are directly related to their narrower job descriptions.

Congress has until now only enacted section 127 for temporary periods. It has repeatedly allowed the provision to lapse, only to reextend it on a retroactive basis for another temporary period. Most recently, the Omnibus Budget Reconciliation Act of 1989 provided for a 9-month extension of section 127 through September 30, 1990. Without further action by Congress, the provision will again expire on that date.

It is past time for this cliffhanger approach to cease. Employees cannot plan sensibly for their educational goals, not knowing the extent to which accepting educational benefits from their employers will reduce their take-home pay. And for employers, the fits and starts of the legislative history of section 127 have been a serious administrative nuisance. If section 127 is in force, then there is no need to withhold taxes on the value of educational benefits provided; if not, the "job-relatedness" of the educational assistance must be ascertained, a value assigned, and withholding adjusted accordingly. And we leave everyone to guess until late in the year whether

Congress will extend the provision, or reenact it retroactively if it has already expired. The extension periods have grown shorter, increasing the frequency with which these periods of limbo recur. This is needlessly uncertain and inefficient, and does not reflect well on the legislative process.

The Employee Educational Assistance Act would extend section 127 on a permanent basis. I hope Congress will adopt it in this form, and abandon what has become an inexcusably haphazard approach to the tax treatment of employee education assistance.

The bill would also restore coverage to graduate-level courses—eliminated in 1988—as well as maintain the present-law maximum exclusion under section 127 at $5,250.

Mr. President, I introduced similar legislation in the last session. That bill, S. 260, as well as its companion bill in the House, H.R. 2037, enjoyed wide bipartisan support. Encouraging workers to further their education and to improve their job skills is an important national priority, crucial for preserving our competitive position in the global economy. Permitting employees to receive educational assistance on a tax-free basis, without incurring significant cuts in take-home pay, is a demonstrated cost-effective means to achieve these objectives.

Section 127 is not an extravagant fringe benefit for highly paid executives. Rather, it largely benefits low- and moderate-income employees seeking access to higher education or further job training. A recent survey undertaken by the American Society for Training and Development indicated that 71 percent of recipients of section 127 educational assistance earn less than $30,000 annually. In fact, lower income employees are even more likely to participate in educational assistance programs than those on the higher end of the income scale. Employees earning less than $30,000 participate at a much higher rate than those above that income, and participation rates decline as salary levels increase. Moreover, employees making less than $15,000 participate at almost twice the rate of those who earn over $50,000.

Today, American workers are the most productive in the industrialized and developing world. Yet pressures from international competition and the pace of technological change require continual adjustment by our work force. Section 127 permits employees to adapt and retrain without incurring additional tax liabilities. By removing the tax burden from workers seeking retraining, section 127 will enable employees displaced by foreign competition or technological change to learn new job skills. Retraining will take on an increasing importance in this decade, given that approximately 85 percent of those who will make up the work force in the year 2000 are already working today. Work force growth in the next decade is expected to barely match that during the Great Depression.

Reinstating the tax-free treatment for graduate-level courses would remove impediments against employees' pursuit of advanced degrees and training in vocations such as engineering, health science and nursing, education, and computer science. The American Electronics Association has noted that the United States is experiencing an acute shortage of engineers—some 20,000 engineers between 1981 and 1985. It has also emphasized the troubling fact that the United States produces fewer engineers per capita than many of our major trading partners and has relatively smaller numbers of workers in research and development. To counter this trend, almost half of America's largest electronics firms have initiated educational assistance programs to encourage employees to pursue advanced degrees in electronics. Without section 127, employees who participate in this effort to shore up the Nation's expertise in this field do so at the cost of take-home pay reductions. The Tax Code should not hinder such an effort, and section 127 is designed to make sure that it does not.

Section 127 has also helped to improve the quality of America's public education system, at a fraction of the cost of direct-aid programs. It has enabled thousands of public school teachers to obtain advanced degrees, augmenting the quality of instruction in our schools. A survey by the National Education Association a few years ago found that almost half of all American public school systems provide tuition assistance to teachers seeking advanced training and degrees. Again, the Tax Code should not impose obstacles to this kind of shared effort at improvement. This legislation, by making section 127 permanent, will ensure that it does not.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2988

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Employee Educational Assistance Act of 1990".

SEC. 2. EXCLUSION FOR EDUCATIONAL ASSISTANCE PROGRAMS.

(a) EXCLUSION MADE PERMANENT.—

(1) IN GENERAL.—Section 127 of the Internal Revenue Code of 1986 (relating to educational assistance programs) is amended by striking subsection (d).

(2) CONFORMING AMENDMENT.—Section 7101(a) of the Revenue Reconciliation Act of 1989 is amended by striking paragraph (2).

(b) RESTRICTIONS RELATING TO EDUCATION AT THE GRADUATE LEVEL.—

(1) IN GENERAL.—Paragraph (1) of section 127(c) of the Internal Revenue Code of 1986 is amended by striking the last sentence.

(2) CONFORMING AMENDMENT.—Section 132(h)(9) of such Code (relating to application of section to otherwise taxable employer-provided educational assistance) is amended by striking "or the last sentence of subsection (c)(1) thereof".

(c) EFFECTIVE DATES.—

(1) PERMANENT EXCLUSION.—The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 1989.

(2) GRADUATE LEVEL ASSISTANCE.—The amendments made by subsection (b) shall apply to taxable years beginning after December 31, 1990.

By Mr. HEINZ:

S. 2789. A bill to amend title XIX of the Social Security Act to provide for an expansion of Medicaid benefits to low-income pregnant women and children, and to raise the tax on cigarettes to fund such Medicaid expansion; to the Committee on Finance.

CHILDREN'S HEALTH ACCESS AND PREVENTION ACT

● Mr. HEINZ. Mr. President, I rise today to introduce legislation to deal with this Nation's crisis in maternal and child health. America is indeed a land of opportunity, where a child can dream of becoming an astronaut, a gold medal swimmer, or even a Senator, and make that dream come true. But literally millions of our children, Mr. President, enter life with less than a fair chance at a dream—or grow up with the distinct risk of losing the dream to an accident or an illness. Forty thousand of these children each year never reach their first birthday. These are children whose mothers were likely to have received inadequate prenatal care. Twelve million are children for whom preventative care is unlikely, and necessary care is usually found in a hospital emergency room, not a physician's office. These are our children who lack even minimum health insurance.

The fact is that with all this Nation's wealth and medical expertise, we rank only 22d among industrialized nations in infant mortality, and 29th in the percent of low birthweight babies. Compared to normal birthweight infants, these low-birthweight infants are 40 times more likely to die during their first month of life, are 2-to-3 times more likely to suffer from certain chronic conditions, and face lifelong health and learning impairments. Our incidence of low-birthweight babies is, is large part, the cause of our high infant mortality rates.

The percent of children who die before age 5 ranks us only 21st in the world. A recent national commission found our adolescent children less healthy and less ready than their parents had been at their age to take a

productive role in society. Without adequate health care, both the education and future health status of our children are severely threatened—a double-edged threat to both our Nation's productivity and to our society.

I could go on and on. Consider the large—and growing—disparity in infant mortality rates between white and black babies. Many of our cities have infant mortality rates double our national rates and more than the rates in some Third World countries. The 20 percent of poor children have no physician contact at all in a year. Mr. President, these deaths, impairments, and lack of care are a national tragedy. That we have it in our power to greatly reduce these losses, and do not act, is a national disgrace.

We need no magic medical breakthroughs, no undiscovered pots of gold, to solve these problems. Few health problems are as amendable to simple preventative and routine care as maternal and child health problems. Treatment is simple, inexpensive—and extremely cost-effective over the long term.

For example, the rates of both infant mortality and low-birthweight babies can be greatly reduced through proper prenatal care. One dollar of prenatal care can save over $3 in the first year of life alone, and over $10 over the child's life. Unfortunately, it is estimated that one in three births are to mothers who did not receive prenatal care that is considered adequate, in terms of the number and timing of visits. Some 150,000 infants are born each year to mothers who received prenatal care only in the third trimester—and another 70,000 mothers received none at all. Here, again, the gap between black and white Americans is appalling—in my State of Pennsylvania, less than 45 percent of black infants were born to mothers who have been able to obtain even such minimally adequate care, while over 75 percent of white infants had the advantage of such care.

Through the miracles of medical science, we have immunizations to free us from the scourge of such killers as polio, measles, and mumps. Immunizations are the classic public health intervention, preventing costly and dangerous outcomes by an inexpensive treatment. Unfortunately, millions of children are not properly immunized, and there are indications that the rates of immunizations are dropping. An old foe, polio for example, may again rear its head—over 20 percent of 2-year-olds are not fully immunized.

Mr. President, the United States is at a crossroads in our role as a world leader. Each life that is lost, each life that starts with health or intellectual impairments due to low birthweight, each life that is crippled through not receiving proper preventive or curative care in childhood or adolescence—these are lives lost as fully productive members of our society. These are potential workers, scholars, leaders—the very stuff we need to build on for our Nation's strength in the future.

We are all tired of being compared unfavorably to Japan in economics, but it may come as a surprise to find that we suffer by comparison in health care as well. Japan in the 1950's ranked 17th among industrialized nations in infant mortality, but mounted a nationwide initiative to reduce those deaths. As a result, they now rank first. The State in the United States with the lowest infant mortality—Massachusetts—has a rate 44 percent higher than Japan's. Japan protects their next generation of workers, while we are allowing a significant percentage of ours to die or be handicapped.

The price of this human neglect comes full circle to our economic vulnerability. Let me give an example of the orders of magnitude of the problem. One study found that, each year, our infant deaths represent a future earnings loss of up to $18.9 billion, and the disabilities related to low-birthweight births represent a loss of up to an additional $3.7 billion.

Several of my colleagues and I spent many months as members of the Pepper Commission studying the problems of access of health care and long-term care. We debated many solutions, and issued a set of far-reaching recommendations. Several of us developed our own set of comprehensive solutions to these problems. Our proposals join the many other ideas and reports, from numerous distinguished groups, on possible comprehensive solutions. But, Mr. President, as realists, we know that broad solutions require wide consensus. Candidly, we are a long way off from that level of agreement. Nevertheless that must not be an excuse for total inaction. We must not sit by and watch our children die while we struggle for perfect solutions to the broader issues.

Mr. President, the bill I am introducing today, The Children's Health Access and Prevention Act of 1990 [CHAP], is a positive first step. It is not a perfect solution, and it will not overcome all of the health care access problems in our country. What it will do is to assure Medicaid coverage to low-income pregnant women and children. CHAP would extend Medicaid eligibility to pregnant women and children from birth to age 6 who are between 100 and 200 percent of the Federal poverty level, expanding the current eligibility requirements while also removing some of the current crushing fiscal burden forced on States by previous Federal mandates. It would also cover children 6 to 18 who are under 200 percent of poverty and not otherwise eligible for Medicaid, a significant increase in coverage.

The Nation's Governors have pleaded with us to stop adding Federal mandates to their budgets—they cannot afford any further expansions. CHAP is different in this respect than other Medicaid expansions: the cost for these expansions would be funded totally by the Federal Government, through an increase in the cigarette tax.

Increasing the cigarette tax makes perfect sense in the context of children's health. It is expected to reduce consumption among teenagers, persuading some 500,000 to stop smoking. This alone translates into saving 125,000 premature deaths among our Nation's children. Moreover, one of the groups most affected by passive smoking is young children. If we could eliminate maternal smoking, we could reduce infant mortality by 10 percent, and the incidence of low-birthweight births by 25 percent. Passive smoking has direct impact on the health of infants, contributing to the rates of conditions such as sudden infant death syndome. Reducing consumption will help prevent some of the damage to these inadvertent victims, and will make smokers help pay for some of the remaining damage they cause to children.

CHAP answers many of the objections raised to the Pepper Commission recommendations. It does not require radical changes in who must provide coverage or how coverage is provided. It has clearcut goals and an affordable price tag. Perhaps most importantly to many skeptics of the Pepper Commission, it comes with a specific funding source that covers its costs.

CHAP would have a dramatic effect on reducing the number of uninsured children. Preliminary estimates indicate that in its first year it would cover 4.1 million pregnant women and children, and over 5 million by 1993. In Pennsylvania, where there are an estimated 300,000 uninsured children, CHAP has been estimated to cover 200,000.

There is one more provision of the bill I want to mention, and that is the inclusion of a sunset provision for the revenue source. Mr. President, I don't like the Medicaid Program. It is complicated and confusing, it comes with an unfortunate welfare stigma, and it has numerous intrinsic structural and reimbursement problems. Nevertheless, it is there, and I see no good alternative to getting coverage to these pregnant women and children as quickly as we can using Medicaid. But I do not want to just set up another wrinkle on Medicaid eligibility standards and be done with it. Having the new revenue source sunset will force us to reconsider the issue. It is the guantlet I am throwing down to myself and to our colleagues, saying, "We can do better than this, and the

clock is ticking." Our task is to do something better before the end of the 3 years, and I believe we can.

Mr. President, I look into our future and the picture is not a rosy one. I see a work force crippled by health, educational, and social impairments, ill-equipped to compete internationally or to continue to provide the standard of living for which America is justly known. I see a generation beset with avoidable health and health-related problems. But this picture can be redrawn with an investment now in the health of our children. The CHAP Program is that investment. I urge my colleagues to support this legislation and enact CHAP into law as soon as possible.

Mr. President, I ask unanimous consent that the text of the legislation I offer be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2989

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Children's Health Access and Prevention Act of 1990".

SEC. 2. EXPANSION OF MEDICAID ELIGIBILITY FOR PREGNANT WOMEN, INFANTS, AND CHILDREN.

(a) IN GENERAL.—Section 1902(a)(10)(A)(i) of the Social Security Act (42 U.S.C. 1396a(a)(10)(A)(i)) is amended—

(1) by striking "or" at the end of subclause (V); and

(2) by adding "or" at the end of subclause (VI) and by adding at the end thereof the following new subclause:

"(VII) who are described in section 1905(t);".

(b) ELIGIBLE INDIVIDUALS DESCRIBED.—Section 1905 of such Act (42 U.S.C. 1396d) is amended by adding at the end thereof the following new subsection:

"(t)(1) Individuals described in this subsection are—

"(A) individuals described in subparagraph (A), (B), or (C) of paragraph (1) of section 1902(1) of the Social Security Act (42 U.S.C. 1396a(1)) with an income at a level not less than 100 percent of the income official poverty line (as defined by the Office of Management and Budget, and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) applicable to a family of the size involved and not more than 200 percent of such poverty line, and

"(B) children who have attained 6 years of age but who have not attained 19 years of age and whose family income does not exceed 200 percent of the income official poverty line (as described in paragraph (1)), and who are not otherwise covered under the State plan for medical assistance in effect in the State on September 30, 1990, under an optional category and who are not otherwise eligible to receive benefits under part A of title IV or part A of title XVI.

"(2) Notwithstanding any other provision of this title, for purposes of this subsection, States may apply a resource test in determining the eligibility of individuals described in subparagraphs (A) and (B) of paragraph (1) for purposes of determining such individuals' eligibility for medical assistance under this title, but such resource test applied to such individuals may be no more restrictive than that applied by the State with respect to determining eligibility of individuals described in subparagraph (A), (B), or (C) of paragraph (1) of section 1902(1).

"(3) Notwithstanding any other provision of this title, and in addition to any payments authorized under such title, the Federal share of the expenditures with respect to payments for medical assistance coverage for individuals described in subparagraphs (A) and (B) of paragraph (1) (including any administrative costs for the provision of such coverage) shall be 100 percent of such payments.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to payments for calendar quarters under title XIX of the Social Security Act beginning after September 30, 1990.

SEC. 3. INCREASE IN EXCISE TAX ON CIGARETTES TO FUND 3-YEAR MEDICAID BENEFITS EXPANSION.

(a) RATE OF TAX.—Subsection (b) of section 5701 of the Internal Revenue Code of 1986 (relating to rate of tax on cigarettes) is amended—

"(1) by striking out "$8" in paragraph (1) and inserting in lieu thereof "$16"; and

(2) by striking out "$16.80" in paragraph (2) and inserting in lieu thereof "$33.60".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before October 1, 1990, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $8 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $16.80 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on October 1, 1990, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1986 and shall be due and payable on October 15, 1990, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on October 1, 1990.

(3) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on October 1, 1990, at the place where intended to be sold at retail.

(4) FOREIGN TRADE ZONES.—Notwithstanding the Act of June 18, 1934 (19 U.S.C. 81a et seq.) or any other provision of law—

(A) cigarettes—

(i) on which taxes imposed by Federal law are determined, or customs duties are liquidated, by a customs officer pursuant to a request made under the first proviso of section 3(a) of the Act of June 18, 1934 (19 U.S.C. 81c(a)) before October 1, 1990, and

(ii) which are entered into the customs territory of the United States on or after October 1, 1990, from a foreign trade zone, and

(B) cigarettes which—

(i) are placed under the supervision of a customs officer pursuant to the provisions of the second proviso of section 3(a) of the Act of June 18, 1934 (19 U.S.C. 81c(a)) before October 1, 1990, and

(ii) are entered into the customs territory of the United States on or after October 1, 1990, from a foreign trade zone,

shall be subject to the tax imposed by paragraph (1) and such cigarettes shall, for purposes of paragraph (1), be treated as being held on October 1, 1990, for sale.

(5) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1986.

(c) MEDICAID EXPANSION TRUST FUND.—Subchapter A of chapter 98 of the Internal Revenue Code of 1986 (relating to Trust Fund Code) is amended by adding at the end thereof the following new section:

"SEC. 9511. MEDICAID EXPANSION TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'Medicaid Expansion Trust Fund', consisting of such amounts as may be appropriated, credited, or transferred to the Medicaid Expansion Trust Fund as provided in this section and section 9602(b) (relating to crediting of interest, etc.).

"(b) TRANSFERS TO MEDICAID EXPANSION TRUST FUND.—There are hereby appropriated to the Medicaid Expansion Trust Fund amounts equivalent to the following:

"(1) CIGARETTE TAXES.—50 percent of the taxes received in the Treasury after September 30, 1990, under subsection (b) of section 5701.

"(2) FLOOR STOCK TAXES.—100 percent of taxes received in the Treasury under section 3(b) of the Medicaid Expansion Act of 1990.

"(c) EXPENDITURES FROM TRUST FUND.—There are hereby appropriated and made available amounts in the Medicaid Expansion Trust Fund for payment of medicaid benefits provided under section 2 of the Medicaid Expansion Act of 1990 and for payment of administrative costs of providing and administering such benefits.".

(d) CLERICAL AMENDMENT.—The table of sections for subchapter A of chapter 98 of the Internal Revenue Code of 1986 is amended by adding at the end thereof the following new item:

"Sec. 9511. Medicaid Expansion Trust Fund.".

(e) EFFECTIVE DATE.—

(1) TAX INCREASE.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after September 30, 1990, and before October 1, 1993.

(2) TRUST FUND.—The amendments made by subsections (c) and (d) shall take effect on October 1, 1990.●

By Mr. COCHRAN:

S. 2790. A bill to extend the period for credit or refund of certain overpayments of the windfall profit tax on domestic crude oil; to the Committee on Finance.

EXTENSION OF PERIOD FOR REFUND OF WINDFALL PROFIT TAX OVERPAYMENTS

● Mr. COCHRAN. Mr. President, today I am introducing legislation designed to allow a county in Mississippi to file for a refund of overpayments of

windfall profit taxes which were withheld in the early 1980's.

The Windfall Profits Tax Act of 1980 provided an exemption from the tax for qualified governmental entities. Wilkinson County, MS, was such a qualified entity. However, because the county did not employ a tax counsel, they were unaware of this exemption. As a result, windfall profit taxes were withheld from payments to the county and were forwarded to the Internal Revenue Service.

The 1980 law provided that a taxpayer could file a claim for reimbursement of overpaid windfall profit taxes. Upon learning of this provision, Wilkinson County filed a claim for a refund, but the IRS ruled that the statute of limitations had expired for refund of the 1980-82 taxes withheld. Despite Wilkinson County's assertion that they were not subject to this statute of limitations, the IRS ruled that they had no authority to issue such a refund. In a letter addressed to my colleague in the other body, the gentleman from Mississippi, MIKE PARKER, the Internal Revenue Service's Deputy National Director of Appeals stated, "Although this decision does not seem equitable, the Service is by law precluded from approving this claim."

Mr. President, this bill will remedy this situation by allowing the statute of limitations to be extended only for Wilkinson County, and only for the years prior to 1983. This bill will cost just over $100,000, which is a small expense for the Federal Government but a very significant amount for a small, predominately minority school district.●

By Mr. BREAUX (for himself, Mr. LOTT, Mr. INOUYE, Mr. AKAKA, and Mr. MITCHELL):

S. 2991. A bill to reauthorize the Fish and Seafood Promotion Act of 1986; to the Committee on Commerce, Science, and Transportation.

NATIONAL FISH AND SEAFOOD PROMOTIONAL COUNCIL REAUTHORIZATION ACT

Mr. BREAUX. Mr. President, I rise today to introduce legislation to reauthorize the National Fish and Seafood Promotion Act of 1986, and to provide for the uninterrupted continuation of the successful work done by the National Fish and Seafood Promotional Council created by that act.

The purposes of the Fish and Seafood Promotion Act of 1986 are to: First, strengthen the competitive position of the U.S. commercial fishing industry in the domestic and international marketplace; second, encourage the utilization of all species of fish available for harvest by the U.S. fishing industry; third, encourage the utilization of domestically produced fisheries products through enhancement of markets, promotion, and public relations; fourth, help the U.S. fishing industry develop methods to improve quality and efficiency in the marketplace; fifth, educate and inform consumers on the use of fish; sixth, develop better coordination of fisheries marketing and promotion activities with commercial fisheries research and development programs; and seventh, educate and inform the public about the nutritional value of fish in the diet.

The National Fish and Seafood Promotion Council established by the act has representatives from the harvesting, processing, and marketing sectors of the fishing industry from every coastal region in the country. This Council has responsibility for carrying out of the marketing programs, consumer education, and research dictated by the act. However, the Council needs the additional time provided by this bill to allow it to fully carry out its mandated functions. The regulatory requirements, and delays beyond the control of the Council, have prevented it from realizing its full potential. The final Council appointment was not made until January 1989, and final approval of efforts to contract with an advertising agency was received in February, 1989.

The Council, in meeting the purposes of the act, adopted the straightforward mission of increasing the per capita consumption of fish and seafood in the United States, while strengthening the position of the U.S. fishing industry. Although the full program has been underway for only a brief period of time, it is viewed by the industry as unusually successful. The promotional campaign emphasizes the proven health benefits of increased seafood consumption, and intelligent and health-conscious consumers have responded. The annual per capita consumption of seafood products in 1989 set a new record of 15.9 pounds.

Regrettably, under existing law the Council would terminate on October 1, 1990, just as it has built up momentum, and before its successes can be measured accurately. The bill I am introducing today, along with Senator LOTT, Senator INOUYE, Senator AKAKA, and Senator MITCHELL, provides additional time for the Council to continue its efforts to promote the health of the American public through consumption of seafood products, and to enhance the competitive position of an important contributor to the national economy, the U.S. fish and seafood industry. This bill will go far toward educating the American public and improving the awareness of the health benefits of fish and seafood product. The 1986 act envisioned a 4-year period to commence promotional activities. Due to the delays in initiating activities, the promotion campaign has only been underway for about 1 year.

Mr. President, this is not a give-away program or a free ride. My bill requires the industry to hold a referendum to determine whether this Council should be continued. If the Council and its activities continue, it will be funded through assessments made by the members of the industry upon themselves. Should the referendum fail, the Council and the act would terminate no later than September 30, 1993. In other words, our U.S. fish and seafood industry simply wants the time to establish the Council as a body paid for by the industry, and not by the taxpayers. The minimal level of funding to be authorized for fiscal years 1991 and 1992 will allow them to continue their efforts uninterrupted while preparing for and conducting the referendum.

Mr. President, I urge my colleagues to join me in supporting this important measure, so that the important work being done by the National Fish and Seafood Promotional Council can continue uninterrupted.

By Mr. DASCHLE:

S. 2993. A bill to amend the Internal Revenue Code of 1986 to extend the solar, geothermal, and ocean thermal energy tax credits through 1995; to the Committee on Finance.

RENEWABLE ENERGY TAX CREDITS

● Mr. DASCHLE. Mr. President, as my colleagues are aware, I have long been a supporter of renewable alternative energy sources. I have been especially active in promoting alcohol fuels, which have enormous potential both for their positive environmental effects and their contribution to our energy security.

Today, in continuation of my interest in the area of renewable energy sources, I am introducing legislation to extend through 1995 three tax credits available to businesses that develop energy through solar, geothermal, and ocean thermal technologies.

The late Senator Spark Matsunaga previously championed these three energy credits, and he did so effectively for a number of years. It would be a mistake based on the merits of these measures and a dishonor to his memory to allow these credits to fall by the wayside as a result of his untimely passing. It is with great enthusiasm and pride that I take the baton from my friend and former colleague.

Recent events in the Middle East highlight the need to speed up our development of alternative energy sources. Not to do so would be both foolish and irresponsible. We cannot afford, for example, to sit back and hope for an endless supply of oil. It is a fact that oil reserves will not last forever. Our children and grandchildren will see the depletion of these resources. Nor can we be sure that the flow of imported oil will not be interrupted for political or other reasons. Iraq's current offensive in the Persian

Gulf evokes memories of the oil shocks of the 1970's.

As important as energy supply and security is the need to slow the detrimental effects on our environment of traditional sources of energy. I strongly believe that renewable energy sources are the answer to this need. My colleagues have heard me speak at length on the merits of alcohol fuels, in this regard. Solar, geothermal, and ocean thermal energy have similar potential for the environment.

Let me mention just a few of the environmental pluses of these renewable energy sources. In the solar mode of operation, solar technology has no combustion-related emissions at all. Even using back-up fossil fuel to assure reliability, present generation solar technology produces one-quarter as much carbon dioxide as natural gas, the cleanest fossil fuel alternative, and one-third the nitrous oxide emissions. Geothermal plants emit between 7 and 10 times less carbon dioxide than gas, oil, or coal-fired powerplants for the same electrical output.

I would emphasize that we are not talking here about backyard solar panels. We are talking about business enterprises that are taking the risks necessary to develop solar, geothermal, and ocean thermal facilities on a scale that could ultimately replace, in whole or in part, traditional sources of energy that are polluting the environment and depleting valuable natural resources.

The business energy credits provide the margin of viability needed to keep renewable energy projects in operation. These relatively new technologies already have proven their potential, but they are not yet at the stage where they are commercially viable on their own. We should not pull the rug out from under them at this critical juncture.

Given the harm to our environment from traditional energy sources in the form of global warming and other detrimental effects, it is safe to say that the modest cost of the business energy credits is more than offset by the environmental benefits associated with these technologies. It is also important to know, in this regard, that the credits are only available to projects that are acutally placed in service, and strict recapture rules are triggered if a project fails to remain in service.

I will be working in the weeks and months ahead to see that these credits are extended, and I hope to have the strong support of my colleagues as I do so.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD in full at the close of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2993

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION OF SOLAR, GEOTHERMAL, AND OCEAN THERMAL ENERGY CREDITS.

The table contained in section 46(b)(2)(A) of the Internal Revenue Code of 1986 (relating to energy percentage) is amended by striking "Sept. 30, 1990" in clauses (viii), (ix), and (x) and inserting "Dec. 31, 1995".●

By Mr. DASCHLE (for himself, Mr. INOUYE, Mr. MCCAIN, and Mr. BURDICK):

S. 2995. A bill to provide that a portion of the income derived from trust or restricted land held by an individual Indian shall not be considered as a resource or income in determining eligibility for assistance under the Social Security Act of any other Federal or federally assisted program; to the Select Committee on Indian Affairs.

EXEMPTION FOR CERTAIN PROPERTY OWNED BY INDIANS

● Mr. DASCHLE. Mr. President, I rise to introduce legislation that will restore a measure of equity to the treatment of native Americans under Federal entitlement programs. This bill exempts up to $4,000 per year in income from tribal lands that are held in trust for individual Indians for the purpose of the calculation of benefits under Social Security and other federally assisted programs.

In Indian country, land owned jointly by a number of heirs is often leased to non-Indians by the Bureau of Indian Affairs [BIA] on behalf of those tribal members. The lease payments are, in turn, allocated to the individual heirs based on their specific interest in the land.

In the majority of cases, income from leased tribal lands is not substantial. Nor is it regular in many cases. It is not uncommon for inherited trust lands to be owned by such a large number of heirs that the lease income from them is less than $50 per year. Also, the availability of leasees often changes from year to year, which leaves heirs without income for a period of months or even years.

Under current law, the Federal Government counts each small lease payment from inherited trust lands as income and then reduces the individual recipient's Federal benefits by a corresponding amount. Also, since these calculations are often based on trust income received in the previous year, benefit reductions can be made in years when income is not even received.

Federal programs treat individual trust moneys with such harshness that the Nation's poorest population repeatedly faces distressing and unnecessary benefit denials or reductions, and loss of medical benefits, due to small amounts of unpredictable income from fractionated trust lands. The practical result of current policy is that tribal members frequently end up with neither trust money nor Federal benefits during one or many months of the year.

For example, the SSI program, upon which many tribal elders depend, bases its monthly payments on increasingly inaccurate estimates of future trust income and counts trust income even if it is unavailable, that is, previously assigned with BIA consent. The VA's improved pension program, the AFDC program, and even the BIA's own general assistance program are harsher yet, leaving poor Indian families with inadequate income for months on end by averaging the trust money over several or many months to assure that every dollar of trust money that may arguably be received is offset by loss of equivalent Federal benefits. In many cases, this offset trust income is never received and not even available.

The bill I am introducing today would benefit primarily tribal members, and especially tribal elders, who face continuing financial uncertainty as they seek to supplement small trust income with Federal welfare benefits. A study of income received from land lease rentals on the Rosebud Reservation in South Dakota, conducted by Sinte Gleska College in 1988, found that over 70 percent of those receiving trust income received less than $200 per year. The study also showed that 50 percent received less than $50 per year or no income at all.

The counting of trust income against Federal entitlement benefits is a breach of the fiduciary duty that every Federal agency owes to protect trust income for the benefit of Indian people, and this breach invites endless administrative appeals and repeated litigation. Even without appeals and litigation, the cost to the BIA and other Federal agencies of keeping accurate track of multitudinous small lease and grazing payments for purposes of program eligibility is enormous in terms of program time and money, undoubtedly more than the Federal money saved by resulting reduction in entitlements. Additional costs are transferred to tribes, which try to mitigate the financial and emotional harm to tribal members caused by these policies.

Congress has specifically protected all types of Indian moneys other than trust income, including tribal per capita payments, 1983; and Alaska Native Claims Settlement Act moneys, 1987; from this offset requirement. The bill I am introducing would provide the tribal elders and families who are current heirs to allotted and restricted trust lands with similar protection for their trust income up to $4,000 per year. I hope the Senate will

consider it carefully and move to address this important problem.●

By Mr. BOSCHWITZ:

S. 2997. A bill to revise and extend the programs of assistance under title X of the Public Health Service Act, and for other purposes; to the Committee on Labor and Human Resources.

S. 2998. A bill to amend the Public Health Service Act to revise and extend title X, and for other purposes; to the Committee on Labor and Human Resources.

FAMILY PLANNING AMENDMENTS AND FAMILY PLANNING SERVICES ACT

● Mr. BOSCHWITZ. Mr. President, I rise today to introduce two bills: The Family Planning Amendments Act of 1990 and the Family Planning Services Act of 1990. These bills would reauthorize title X of the Public Health Services Act, which authorizes grants and contracts to organizations that provide family planning services.

Mr. President, the need for comprehensive family planning services is greater now than ever. The problems of unplanned pregnancies, abortions, infant mortality, and sexually transmitted diseases are all growing more prevalent in our society, especially among teenagers and low-income women. Many of these people do not seek family planning services—whether it be for contraceptives, pregnancy counseling or maternal health care—because they are either unaware of its availability or cannot afford the cost.

To make these other services more available, the Federal Government has been appropriating funds for the title X program since 1970. According to the Department of Health and Human Services, title X supports approximately 4,000 family planning clinics through 89 grantees and serves an estimated 4.3 million individuals. Over 85 percent of title X clients are low-income and approximately one-third more are adolescents.

Unfortunately, the title X program has not been reauthorized since 1985 and funding for the program has been cut from $162 million in fiscal year 1981, to about $139 million last year. As a strong supporter of family planning services, I believe that Congress should reauthorize the title X program this year and provide adequate funding to meet the demand for these services.

The reauthorization process, however, has been complicated by the abortion issue. I understand that many family planning advocates are disappointed that S. 110, a bill introduced by Senator KENNEDY to reauthorize the title X program, has not received consideration since it was reported out of committee last July. This delay has been caused, in part, by the objections made by pro-life organizations that S. 110 promotes abortion as a method of family planning, which is strictly prohibited in title X. The involvement of the abortion issue has made this matter a difficult one for Senators like myself who actively support family planning but also oppose abortion. For that reason I have introduced legislation that I hope will expedite the reauthorization process.

Both of the bills that I am introducing today are very similar to S. 110; in fact, that Family Planning Amendments Act of 1990 is almost identical to S. 110. It would reauthorize the title X program for 3 years and increase the funding level from $139 million last year to $171 million for the upcoming fiscal year—a $32 million increase. It would also reauthorize the adolescent family life program—title XX—to promote abstinence projects for young people. The only difference between the Family Planning Amendments Act of 1990 and S. 100 is that my bill removes or clarifies the provisions objected to by pro-life organizations. By doing this, I hope to keep the abortion issue from holding up reauthorization of title X.

The Family Planning Services Act of 1990 is also very similar to S. 110. It too authorizes the increased funding for title X and reauthorizes the title XX program. However, this bill enhances some of the provisions of S. 110. For example, like S. 110, my bill provides grants to train personnel—including technical assistance, clinical training, and training for educators and counselors. But my bill also encourages grants recipients to provide language training for the improvement of counseling services for non-English-speaking people. In addition, it encourages training in the recognition of chemical dependency and sexual abuse as well as treatment referral for these cases.

My bill also replaces the provision in S. 110 earmarking $10 million for contraceptive research with $25 million to develop and operate centers for improving the methods of contraception—those drugs and devices which act to prevent fertilization or implantation. Reports show that the United States is lagging behind many countries in the range of contraceptive choices available. A recent study by the Institute of Medicine reports that some women—teenagers, women over 35 who smoke, breast-feeding women and those who suffer from hypertension and diabetes—find the current array of contraceptives in the United States unreliable or risky. If we do not act now to support contraceptive research, the result will be more unplanned pregnancies and more abortions. I believe that my bill will provide the necessary resources to provide better means of contraception.

By bill also includes some initiatives not found in S. 110; for example, it earmarks $10 million to establish and implement a program to educate people—particularly young people—on the risks of sexually transmitted diseases and to prevent and treat such diseases. Everyone is aware of AIDS and most people know how to prevent the transmission of this disease—even if they do not practice caution. But there are other sexually transmitted diseases—like chylyamydia—that are less notorious but dangerous as well. These diseases are most widespread on college campuses and in low-income neighborhoods. The need for educating people about these diseases and treating those infected must be made a priority and my bill does just that.

In addition, it encourages title X grant recipients to provide access to prenatal care for pregnant women as well as preventive health services for infants and children. The United States ranks 19th out of 36 industrialized nations in infant mortality. According to the national commission on infant mortality, this problem is especially prevalent among poor, minority mothers, many of whom have little knowledge of prenatal care or how to seek it out. For many of these women, the title X program is the only way to receive such care and it is essential that title X recipients offer these health services, in addition to screening for breast and cervical cancer and sexually transmitted diseases.

As I mentioned before, neither of these bills contain the provisions in S. 110 that the pro-life community finds objectionable. Because these provisions have been removed or revised, these bills are ones which all family planning proponents—whether they be pro-life or pro-choice—can support. I believe that the legislation that I am introducing today will help expedite the title X reauthorization process and it is my hope that my colleagues will support these measures to provide family planning services to those Americans who need them most.●

By Mr. D'AMATO:

S.J. Res. 359. Joint resolution designating the week beginning September 16, 1990, as "Emergency Medical Services Week"; to the Committee on the Judiciary.

EMERGENCY SERVICES WEEK

● Mr. D'AMATO. Mr. President, I rise today to introduce legislation designating the week of September 18 through 24, 1990, as "Emergency Medical Services Week."

This legislation recognizes those dedicated men and women who have given their time and talents to providing Emergency Medical Services [EMS]. The American College of Emergency Physicians will be sponsoring events across the country during the week of September 18, and they need our full support to give members of every community the opportunity

to update their knowledge of emergency medical procedures.

Advancements in the speciality of emergency medicine have contributed to a dramatic reduction in the number of accidental deaths due to injury. Statistics from the National Center for Health Statistics indicated that since 1968, the number of persons per 100,000 who have died from automobile accidents has decreased from 27.5 to 19.8; from accidential falls, 9.4 to 4.8; from fires and burns, 3.7 to 1.9; and from drowning, 3.0 to 1.5.

Improvements in the quality and effectiveness of EMS are especially vital to the elderly. Older Americans are more susceptible than any other group to death due to injury. Moreover, they are less likely than others to recover completely from their injuries. It is critical, therefore, that senior citizens become familiar with the steps to take in an emergency medical situation.

EMS is equally important to the welfare of our children. Accidents are the leading cause of death among children under 14 years of age. When appropriate treatment is administered within the first hour of injury, mortalitty, morbidity, and residual disability can be greatly reduced. Timely and effective treatment, therefore, is a must.

Of course, prompt treatment depends on adequate manpower—and many concerned citizens have responded to this need. In fact, in some areas of the country, between 50 and 80 percent of all pre-hospital care is provided by trained volunteer personnel.

Providers of emergency medial services include emergency physicians, nurses, emergency medical technicians, paramedics, educators, administrators, and lay people who have learned CPR and other medical stablization procedures. These men and women, dedicated to the health and welfare of millions of Americans every day, deserve our recognition.

The dedication of September 18–24, 1990, as Emergency Medical Services Week will help provide our EMS providers with this well-deserved recognition, while creating an important opportunity for greater public education about accident prevention and medical emergency management.

I urge my colleagues to consider the importance of this resolution to the health and well-being of all Americans, and to join me in supporting its prompt passage.

By Mr. AKAKA (for himself and Mr. INOUYE):

S.J. Res. 360. Joint resolution to apologize to the Hawaiian people for the overthrow of the Kingdom of Hawaii in 1893 and to declare the trust relationship between the U.S. Government and the native people of Hawaii; to the Committee on Governmental Affairs.

APOLOGY FOR THE OVERTHROW OF THE KINGDOM OF HAWAII

● Mr. AKAKA. Mr. President, it is a deep honor and privilege for me to introduce legislation to formally apologize to the Hawaiian people for the overthrow of the Kingdom of Hawaii and to declare a trust relationship between the United States Government and the Native people of Hawaii.

Mr. President, it was nearly a century ago that the Kingdom of Hawaii was overthrown by an annexation party calling itself the Committee of Safety, and was accompanied by U.S. Armed Forces, consisting of one company of Marines and two companies of sailors, numbering over 100 men. On orders of the United States Minister, John L. Stevens, American troops landed in Honolulu on January 16, 1893, and blockaded the Queen's palace, denying the leadership access to the government building which allowed the insurrectionists to occupy the government building.

Even before the takeover of the Hawaiian Government was complete, the U.S. Minister recognized the new "Provisional Government as the de facto government of the Hawaiian Islands". The Queen was forced to abdicate but did so under protest and subject to a later review of the situation by the American Government. To ensure order, the Marines took custody of the government building and raised the American flag, signifying the demise of the existing government. Queen Lili'uokalani, beloved by her people, refused to risk the lives of her citizens and never stopped believing that the United States would recognize its error and restore her government.

Native Hawaiians were citizens of an aboriginal nation with internal and external attributes of sovereignty. If not for the actions of the United States and its agents in 1893, Native Hawaiians would still be citizens of such a nation and would still exercise those self-governing rights. Native Hawaiians were deprived of the most basic right of nationhood—the right to exist. Those actions were a clear violation of the Hawaiian Kingdom's right to independence and the principle of nonintervention in the affairs of another nation. Additionally, those actions subsequently led to annexation of Hawaii by the United States and to the Federal Government's acquisition of approximately 2 million acres of native land. All of this was accomplished in spite of overwhelming opposition by Native Hawaiians.

In formally acknowledging the wrongdoing of the actions of the United States, the duty then arises on the part of the United States to assume a fiduciary relationship between the Native Hawaiians and the United States. As with other native groups, a portion of the aboriginal lands acquired by the United States was specifically set aside in trust for the protection and rehabilitation of the people whose lands were taken. The second major piece of legislation establishing a trust relationship between the United States and Native Hawaiians is Hawaii's Admission Act, under which the Federal Government gave the fee title to ceded lands—those lands obtained at the time of annexation—to the State, but specified five trust purposes for which those lands and the proceeds and incomes generated therefrom could be used. Among those purposes was the betterment of the conditions of Native Hawaiians. Additionally, the Hawaii Admission Act provides that failure to use the lands and funds as specified "shall constitute a breach of trust, for which suit by the United States may be brought." By placing these restrictions upon the State's use of ceded lands, which originally were the Government and Crown lands acquired by the Federal Government at the time of annexation, the United States implicitly recognized its obligation to the native people of Hawaii.

The United States has continued to recognize Native Hawaiians as an aboriginal group in numerous legislative acts since 1959, including the Administration for Native Americans Act, the American Indian Religious Freedom Act, the Native Hawaiian Education Act, the Native Hawaiian Health Act and others.

Mr. President, the Hawaiian people were dealt a severe psychological blow when their kingdom was overthrown. The fact that the United States has never acknowledged its action or apologized for its insurrection has deepened the wound as exemplified by the poor socio-economic status of Native Hawaiians. Apologizing to the descendants of Native Hawaiians who suffered the loss of their Queen and the sovereignty they have and should continue to enjoy will begin the process of healing the wounds. It is with deep humility that I stand before you on behalf of my people to request this simple but important gesture. I hope we will not have to wait any longer to begin to correct this fundamental injustice that was done to the Hawaiian people nearly 100 years ago.●

● Mr. INOUYE. Mr. President, it is with great honor that I join my colleague, Senator AKAKA, in sponsoring a resolution to apologize to the Hawaiian people for the overthrow of the Kingdom of Hawaii and to declare formally that there is a trust relationship between the U.S. Government and the Native Hawaiian people.

Mr. President, this apology is long overdue. Although it was nearly 100 years ago that the U.S. Government, through the intervention of American Armed Forces, assured the overthrow of the Hawaiian Kingdom, the scars

on the Native Hawaiian people remain. During the first two decades of the 20th century, the already depressed economic conditions of Native Hawaiians deteriorated further, and thus the U.S. Congress enacted the Hawaiian Homes Commission Act to rehabilitate Native Hawaiians by returning them to a pastoral life.

Overall, Native Hawaiians have a death rate that is 34 percent higher than the death rate for the United States all races. While diseases of the heart and cancer account for more than half of all deaths in all races in the general population, the death rate is even higher in Hawaiian and part-Hawaiian populations. Yet history has shown Hawaiians to be a healthy, robust population prior to European contact.

The deep psychological and physical damage that was done to the Native Hawaiians as a result of the loss of their Kingdom will not be undone by an acknowledgement of the illegal activities of the U.S. Government committed 100 years ago or by an apology today. Yet it is crucial that the gesture be made and that the United States formally recoginize what it has done. Only then can we begin the healing. I congratulate Sentor AKAKA on his introduction of this measure.●

ADDITIONAL COSPONSORS

S. 16

At the request of Mr. CRANSTON, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 16, a bill to require the executive branch to gather and disseminate information regarding, and to promote techniques to eliminate, discriminatory wage-setting practices and discriminatory wage disparities which are based on sex, race, or national origin.

S. 849

At the request of Mr. DASCHLE, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 849, a bill to repeal section 2036(c) of the Internal Revenue Code of 1986, relating to valuation freezes.

S. 982

At the request of Mr. REID, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 982, a bill to repeal a provision of Federal tort claim law relating to the civil liability of Government contractors for certain injuries, losses of property, and deaths, and for other purposes.

S. 1007

At the request of Mr. CHAFEE, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of S. 1007, a bill to amend title 23, United States Code, regarding the reduction in apportionment of Federal-aid highway funds to certain States, and for other purposes.

S. 1273

At the request of Mr. BOREN, the names of the Senator from Colorado [Mr. WIRTH], the Senator from Vermont [Mr. JEFFORDS], the Senator from Michigan [Mr. RIEGLE], the Senator from Alabama [Mr. SHELBY], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 1273, a bill to amend the Internal Revenue Code of 1986 with respect to treatment by cooperatives of gains or losses from sale of certain assets.

S. 1636

At the request of Mr. BRYAN, the names of the Senator from California [Mr. CRANSTON] and the Senator from Virginia [Mr. WARNER] were added as cosponsors of S. 1636, a bill to amend the Internal Revenue Code of 1986 to extend the period for issuing small issue bonds for manufacturing facilities through 1991.

S. 1651

At the request of Mr. MCCAIN, the name of the Senator from Mississippi [Mr. LOTT] was added as a cosponsor of S. 1651, a bill to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the United States Organization.

S. 1808

At the request of Mr. BREAUX, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 1808, a bill to amend section 468A of the Internal Revenue Code of 1986 with respect to deductions for decommissioning costs of nuclear powerplants.

S. 2222

At the request of Mr. BRADLEY, the names of the Senator from Kentucky [Mr. FORD], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 2222, a bill to amend the Internal Revenue Code of 1986 with respect to the tax treatment of payments under life insurance contracts for terminally ill individuals.

S. 2258

At the request of Mr. BRYAN, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 2258, a bill to amend the Nuclear Waste Policy Act of 1982 to allow commercial nuclear utilities that have contracts with the Secretary of Energy under section 302 of that act to receive credits to offset the cost of storing spent fuel that the Secretary is unable to accept for storage on and after January 31, 1998.

S. 2283

At the request of Mr. BREAUX, his name was added as a cosponsor of S. 2283, a bill to amend the Public Health Service Act to establish a program of grants for the prevention and control of breast and cervical cancer, and for other purposes.

At the request of Ms. MIKULSKI, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 2283, supra.

S. 2313

At the request of Mr. BIDEN, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 2313, a bill to provide emergency Federal assistance to drug emergency areas.

S. 2415

At the request of Mr. DOMENICI, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 2415, a bill to encourage solar and geothermal power production by removing the size limitations contained in the Public Utility Regulatory Act of 1978.

S. 2462

At the request of Mr. WIRTH, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 2462, a bill to amend the Solid Waste Disposal Act to require producers and importers of tires to recycle a certain percentage of scrap tires each year, to require the Administrator of the Environmental Protection Agency to establish a recycling credit system for carrying out such recycling requirement, to establish a management and tracking system for such tires, and for other purposes.

S. 2663

At the request of Mr. MCCAIN, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 2663, a bill to provide increased and special benefits to individuals involuntarily separated from the Armed Forces, and for other purposes.

S. 2664

At the request of Mr. BENTSEN, the names of the Senator from South Carolina [Mr. THURMOND], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 2664, a bill to provide disaster assistance for agricultural producers, and for other purposes.

S. 2689

At the request of Mr. HEINZ, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of S. 2689, a bill to amend title XVIII of the Social Security Act to provide for Medicare coverage of the costs of home hemodialysis staff assistance, and for other purposes.

S. 2796

At the request of Mr. COHEN, the name of the Senator from Oregon [Mr. HATFIELD] was added as cosponsor of S. 2796, a bill to amend title IV of the Higher Education Act of 1965 to allow resident physicians to defer repayment of their title IV student loans while completing a resident training program accredited by the Accreditation Council for Graduate Medical Education or the Accrediting Committee of the American Osteopathic Association.

S. 2801

At the request of Mr. DOLE, the name of the Senator from Nebraska [Mr. KERREY] was added as a cosponsor of S. 2801, a bill to direct the Secretary of Health and Human Services to phase in the update to the area wage index used to determine the amount of payment made to a hospital under part A of the Medicare Program for the operating costs of inpatient hospital services for inpatient discharges occurring during fiscal year 1991, and for other purposes.

S. 2806

At the request of Mr. HEINZ, the names of the Senator from Mississippi [Mr. COCHRAN], the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Illinois [Mr. DIXON] were added as cosponsors of S. 2806, a bill to redesignate the Interstate Highway System as the Dwight D. Eisenhower Interstate Highway System.

S. 2819

At the request of Mr. MOYNIHAN, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Michigan [Mr. LEVIN], and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of S. 2819, a bill to amend title XVIII of the Social Security Act to provide coverage of services rendered by community mental health centers as partial hospitalization services, and for other purposes.

S. 2903

At the request of Mr. BOND, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Washington [Mr. ADAMS] were added as cosponsors of S. 2903, a bill to establish a National Commission on Financial Institution Reform, Recovery, and Enforcement.

S. 2936

At the request of Mr. LEVIN, his name was added as a cosponsor of S. 2936, a bill to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1990, 1991, and 1992, and for other purposes.

SENATE JOINT RESOLUTION 263

At the request of Mr. HELMS, the names of the Senator from Georgia [Mr. NUNN] and the Senator from North Carolina [Mr. SANFORD] were added as cosponsors of Senate Joint Resolution 263, a joint resolution to designate October 11, 1990, as "National Society of the Daughters of the American Revolution Centennial Day."

SENATE JOINT RESOLUTION 284

At the request of Mr. BYRD, the names of the Senator from Michigan [Mr. LEVIN], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Colorado [Mr. WIRTH], the Senator from Oklahoma [Mr. NICKLES], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of Senate Joint Resolution 284, a joint resolution to designate the week beginning September 16, 1990 as "National Give the Kids a Fighting Chance Week."

SENATE JOINT RESOLUTION 342

At the request of Mr. SIMON, the names of the Senator from Georgia [Mr. NUNN], the Senator from Washington [Mr. ADAMS], and the Senator from Maryland [Ms. MIKULSKI] were added as cosponsors of Senate Joint Resolution 342, a joint resolution designating October 1990 as "Ending Hunger Month."

SENATE JOINT RESOLUTION 351

At the request of Mr. BYRD, the names of the Senator from California [Mr. CRANSTON], the Senator from North Carolina [Mr. HELMS], and the Senator from New York [Mr. MOYNIHAN] were added as cosponsors of Senate Joint Resolution 351, a joint resolution to designate the month of May 1991, as "National Trauma Awareness Month."

SENATE CONCURRENT RESOLUTION 63

At the request of Mr. BREAUX, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Nevada [Mr. REID], the Senator from California [Mr. CRANSTON], the Senator from Arkansas [Mr. BUMPERS], the Senator from Nevada [Mr. BRYAN], the Senator from Arizona [Mr. DECONCINI], the Senator from Hawaii [Mr. AKAKA], the Senator from Illinois [Mr. SIMON], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Oregon [Mr. HATFIELD], the Senator from Ohio [Mr. METZENBAUM], the Senator from North Dakota [Mr. CONRAD], the Senator from Iowa [Mr. HARKIN], the Senator from Ohio [Mr. GLENN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Florida [Mr. GRAHAM], the Senator from Florida [Mr. MACK], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Nebraska [Mr. KERREY], the Senator from West Virginia [Mr. BYRD], the Senator from Massachusetts [Mr. KERRY], and the Senator from South Dakota [Mr. DASCHLE] were added as cosponsors of Senate Concurrent Resolution 63, a concurrent resolution to recognize the uniqueness of and express strong support for the maritime policy of the United States, and to urge the President in the strongest possible terms to ensure that the United States does not propose maritime transportation services for inclusion in the General Agreement of Tariffs and Trade discussions and that any proposal that would consider maritime transportation as an area for negotiation is actively opposed by the United States.

SENATE RESOLUTION 231

At the request of Mr. BRADLEY, the names of the Senator from Kentucky [Mr. FORD] and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of Senate Resolution 231, a resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

SENATE RESOLUTION 296

At the request of Mr. ROTH, the names of the Senator from Indiana [Mr. LUGAR], the Senator from California [Mr. CRANSTON], the Senator from Tennessee [Mr. GORE], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of Senate Resolution 296, a resolution to express the sense of the Senate to the support of Taiwan's membership in the General Agreement on Tariffs and Trade.

SENATE RESOLUTION 313

At the request of Mr. LAUTENBERG, the names of the Senator from North Dakota [Mr. BURDICK] and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Resolution 313, a resolution relating to Vladimir Tsivkin.

SENATE CONCURRENT RESOLUTION 144—ACCOUNTING FOR AMERICANS MISSING IN ACTION

● Mr. ARMSTRONG (for himself and Mr. MCCAIN) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 144

Expressing the sense of the Congress regarding the need to account as fully as possible for Americans still missing or otherwise unaccounted for in Southeast Asia and to secure the return of Americans who may still be held captive in Southeast Asia.

Whereas nearly 2,300 Americans are still missing or otherwise unaccounted for in Southeast Asia;

Whereas by not knowing the fates of their loved ones, the families of those unaccounted for in Southeast Asia have suffered tremendous hardship;

Whereas the United States is committed to resolving the fates of Americans unaccounted for in Southeast Asia as a matter of the highest national priority; and

Whereas the United States must consistently reaffirm that commitment and fulfill its promise to the families of the Americans unaccounted for in Southeast Asia: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the United States should—

(1) continue to give the highest national priority to accounting as fully possible for Americans still missing or otherwise unaccounted for in Southeast Asia and to securing the return of any Americans who may still be held captive in Southeast Asia;

(2) ensure that there is a viable, sustained process of joint cooperation with the Socialist Republic of Vietnam and the Lao People's Democratic Republic to achieve credible answers for the families of America's servicemen and civilians who are missing or otherwise unaccounted for, including pri-

mary-next-of-kin access to all records and information resulting from the process of joint investigations, surveys, and excavations;

(3) develop a means to obtain the fullest possible accounting for Americans who are listed as missing or otherwise unaccounted for in Cambodia, without placing this humanitarian objective into conflict with United States efforts to obtain an acceptable political settlement of the Cambodian situation; and

(4) heighten responsible public awareness of the Americans still missing or otherwise unaccounted for in Southeast Asia through the dissemination of factual data.●

● Mr. ARMSTRONG. Mr. President, I rise today with my distinguished colleague from Arizona, Senator MCCAIN, to introduce a resolution here in the Senate that was introduced in the House of Representatives by my dear friend and colleague, Congressman HANK BROWN. HANK, along with Congresswoman LYNN MARTIN, introduced this resolution which expresses the sense of Congress that the Federal Government must continue to give the highest national priority to accounting for the 2,303 Americans still missing in Southeast Asia.

This resolution comes at an important time in our history. Vietnam, Laos, and Cambodia all, in various ways, seek our support, our trade or our friendship. We must be clear that in the case of these nations, not only will we require their progress toward freedom, democracy, and increased human rights for their own peoples before we can extend our assistance, but we will also require the aid of these governments to resolve the many questions surrounding those still carried as "Missing In Action."

Over the last 2 years, the heartrending uncertainty faced by families of these missing servicemen has taken on a particularly personal note, as Hank and I and others have assisted Mrs. Lillian (Grace) Bickel in her quest to find out the facts surrouding her husband's disappearance in Laos during the Vietnam conflict. Maj. Jim Grace was an Air Force pilot, known for his steely nerves and his extreme devotion to his country. On June 14, 1969, Major Grace left his base on a bombing run from which he never returned. His plane was irreparably damaged by antiaircraft fire and Major Grace and his copilot were forced to eject over the dense Laotian jungle. According to Air Force witnesses, although an attempt was made to retrieve him, Grace fell from the rescue hoist and disappeared into the jungle.

Meanwhile, this incomplete account of Grace's possible death coupled with an unidentified photo of an American prisoner of war has haunted Mrs. Bickel. She and her two children have anguished over the possibility that her husband, their father, may still be alive, held somewhere in Southeast Asia against his will. Only with cooperative efforts by the Lao Government will the mystery of Major Grace's death or secret detention be put to rest. Only through the assistance of the governments of these tiny nations will the uncertainty and accompanying anguish of many American families be extinguished.

It is with great hope I introduce this resolution. With the hope it will send a continuing message of American concern about the resolution of these very sensitive cases. And with the hope of eventual relief for the many American families suffering quietly from uncertainty. I commend Congressman HANK BROWN for his leadership and statesmanship on this very important issue. I urge my colleagues to pass this resolution quickly.●

● Mr. MCCAIN. Mr. President, much consideration has been given lately to how the United States can best affect progress toward peace and stability in Indochina. Often lost in our recent deliberations, has been discussion of how the nations of Indochina that seek improved relations with the United States can best affect American attitudes toward their governments. In short, better relations with Vietnam, Cambodia, and Laos depend upon their cooperation in obtaining the fullest possible accounting for the thousands of Americans who remain missing in action in Southeast Asia. This resolution, Mr. President, seeks to reassert the primacy of Congress' concern for American MIA's in all our discussions of U.S. policies in the region.

I have no doubt that if the Government of Vietnam, Cambodia, and Laos wanted to resolve this outstanding issue, they could do so immediately. We must convince them that it is in their best interest do do so. Until they do, the issue will remain an unbreachable impediment to normal relations with the United States. It is incumbent upon American public officials to impress upon these Southeast Asian governments how seriously committed we and the people who elect us are to the resolution of this matter. This legislation is evidence that Congress takes that obligation seriously.

I can assure my colleagues that this resolution's message will not be misunderstood by its intended audience. Eager for better relations, the highest governing circles of Vietnam, Cambodia, and Laos take very serious notice of congressional expressions on any aspect of our relationships with their countries.

Mr. President, we are elected to represent the concerns of our constituencies. Ask any American what issue should be first addressed in discussions with Southeast Asian governments and the answer almost invariably is MIA's. The U.S. Congress must frequently and without qualifications make clear to the governments of Southeast Asia that resolution of the question which animates so many American attitudes on Southeast Asia will remain the impetus for American policies in the region.

It is with these responsibilities in mind that I join Senator ARMSTRONG to introduce this resolution. And I want to commend my good friend in the other body, Representative HANK BROWN, for the devotion he showed to the cause of America's missing in action by first introducing this measure in the House. His compassion on the subject is appreciated by all those who want to provide relief to the thousands of American families who still suffer from a cruel uncertainty. They know only that their sons, husbands, fathers, and brothers left one day for Southeast Asia and that they did not return. They do not know why. We must help them answer that question. This resolution is a step in that direction. I urge my colleagues to quickly and favorably consider it.●

SENATE CONCURRENT RESOLUTION 145—RELATIVE TO THE TWO HUNDREDTH ANNIVERSARY OF THE ADOPTION OF THE POLISH CONSTITUTION

Mr. NUNN (for Mr. MITCHELL, for himself, Mr. DOLE, Mr. DOMENICI, and Mr. SIMON) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 145

Whereas, the Polish Constitution of 1791 was designed to protect Poland's sovereignty and national unity, and replaced a feudal system of rule in Poland with a progressive constitutional monarchy;

Whereas, the Polish Constitution secured individual freedom for all persons in Poland and guaranteed religious tolerance by assuring "to all persuasions and religions freedom and liberty", and formed a government composed of three distinct powers: Legislative, Executive, and Judicial, while declaring that "all power in civil society should be derived from the will of the people";

Whereas, the Polish Constitution revitalized the parliamentary system by placing preeminent lawmaking power in a House of Deputies, by subjecting the legislative Diet to majority rule, and by granting the Diet the power to remove ministers, appoint commissars, and choose magistrates;

Whereas, the Polish Constitution provided for significant economic, social, and political reforms for its time by removing inequalities between the nobility and bourgeois, recognizing town residents as "freemen" that had judicial autonomy and expanded rights, and extending the protection of law to the peasantry, which previously had no recourse against the arbitrary action of fuedal lords;

Whereas, the Polish Constitution endured and became the symbol around which a powerful new national consciousness was born, helping the Polish nation to survive long periods of misfortune over the next two centuries: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the people of the United States of America salute and congratulate the people of Poland as they commemorate the two-hundredth anniver-

sary of the adoption of the Polish Constitution on May 3, 1991, and recognize that Poland's rebirth as a free nation is supported by the legacy of the Polish Constitution of 1791;

SEC. 2. The Library of Congress is authorized and directed to commemorate this anniversary with appropriate ceremonies and activities.

SEC. 3. The President is requested to issue a proclamation calling upon the Governors of the several States, the chief officials of local governments, and the people of the United States to observe this anniversary with appropriate ceremonies and activities.

SEC. 4. The Secretary of the Senate is directed to transmit copies of this resolution to the President, the Secretary of State, and the Marshalls of the Senate and Sejm of Poland.

SENATE RESOLUTION 319—RELATING TO THE RETURN OF THE WILLAMETE METEORITE TO THE STATE OF OREGON

● Mr. PACKWOOD submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 319

Whereas in 1902, the nation's largest meteorite, known as the "Willamette Meteorite", was found 2 miles west of the city of Willamette, Oregon, on land owned by the Oregon Iron and Steel Company;

Whereas in 1904, the Willamette Meteorite was determined to be the legal property of the Oregon Iron and Steel Company;

Whereas in 1905, the Willamette Meteorite was displayed at the Lewis and Clark Exposition in Portland, Oregon, and then Governor George Earle Chamberlain of Oregon declared that the meteorite always remain within the State;

Whereas in 1906, the Willamette Meteorite was sold to a resident of the State of New York by the Oregon Iron and Steel Company, was subsequently donated to a New York museum, and is presently on display at the American Museum of Natural History's Hayden Planetarium in New York City;

Whereas a group known as the "Help End Willamette Meteorite Absence Committee" (HEWMAC), established by students from the Forest Hills Elementary School in Lake Oswego, Oregon, is presently campaigning to bring the Willamette Meteorite back to Oregon;

Whereas Oregonians, including a coalition of Oregon City businessmen, have attempted without success to have the Willamette Meteorite returned to the State of Oregon for more than 50 years; and

Whereas the Oregon Museum of Science and Industry, scheduled to relocate to new facilities in the city of Portland in 1992, would be an ideal location to display the Willamette Meteorite: Now, therefore, be it

Resolved, That the United States Senate supports the efforts of HEWMAC to have the Willamette Meteorite returned for display to its place of discovery in the State of Oregon.●

● Mr. PACKWOOD. Mr. President, as early as 1880, when local native Americans attributed supernatural powers to the rock, the Willamette Meterorite has had special significance for Oregonians. As the largest meteorite ever discovered in the United States, it has been a source of pride for us. Despite regional enthusiasm, however, the meteorite was sold to a resident of New York City, and in 1936 became part of the Hayden Planetarium collection.

In 1990, the third graders at Forest Hills Elementary School in Lake Oswego, OR, formed a committee, the Help End Willamette Meteorite Absence Committee [HEWMAC], in an effort to return the meteorite to Oregon. The resolution I am introducing today is intended to help these third graders in their quest. Our goal is to see the Willamette Meteorite returned for display to its place of discovery in the State of Oregon.

I am proud of the efforts of these third graders. These young citizens have learned an important lesson in the value of political activism and the difference individuals can make within their communities. I hope they will be successful in their efforts to return the Willamette Meteorite to Oregon for display. I will work with them every step of the way.●

SENATE RESOLUTION 320—RELATIVE TO EUROPEAN CONTROL OF CHEMICALS USED IN PROCESSING OF ILLEGAL DRUGS

Mr. BRYAN (for himself, Mr. HOLLINGS, Mr. ROCKEFELLER, Mr. GRAHAM, Mr. KERRY, Mr. DECONCINI, Mr. REID, Mr. BURNS, and Mr. MCCONNELL) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 320

Whereas it is widely known that chemicals are critical in the processing of illegal narcotics, that chemicals produced worldwide are shipped to Colombia, and that more than 40 percent of these chemicals are being diverted to the drug cartels;

Whereas the United States took positive action in 1988 by passing the Chemical Diversion and Trafficking Act which gives the Drug Enforcement Administration the authority to stop shipments of chemicals not destined for legitimate industrial, commercial, or scientific use;

Whereas the importance of the effort by the United States to control exports of these chemicals is illustrated by the fact that following passage of an earlier Senate Resolution, President Bush raised the issue of chemical control at the drug summit in Houston in July 1990;

Whereas an escalated effort by Latin American countries to restrict imports, exports, and production of chemicals is demonstrated by the recommendations for model regulations to control chemicals used in the processing of cocaine passed by the General Assembly of the Organization of American States in June 1990;

Whereas according to a recent Drug Enforcement Administration report, while United States exports of essential chemicals to Colombia have declined, exports from Europe increased 340 percent;

Whereas it is vital to the worldwide anti-drug abuse effort that chemicals used to process narcotics are controlled and monitored at the source; and

Whereas the Council of Ministers of the European Communities is currently considering a directive for the control of chemicals which, if adopted, would be binding on each member country in the European Community for use as its domestic chemical control legislation: Now, therefore, be it

Resolved, That the Senate—

(1) urges the European Communities' Council of Ministers to adopt a directive that would impose controls as strict as those in current United States law on precursor and essential chemicals used in the production of cocaine, heroin, and other clandestinely produced drugs; and

(2) urges the chemicals producing nations of England, Finland, France, Holland, Italy, Spain, and the Federal Republic of Germany to work with the Drug Enforcement Administration and the international Narcotics Control Board to draft and enact laws as strong as the United States chemical diversion laws.

Mr. BRYAN. Mr. President, I rise today to submit a sense-of-the-Senate resolution urging the European Communities' Council of Ministers to adopt a directive that will impose controls as strict as those in current U.S. law on precursor and essential chemicals used in the production of cocaine and heroin.

The Chemical Diversion and Trafficking Act of 1988 and its regulations on exports of percursor and essential chemicals became effective November 1, 1989. The Chemical Diversion Act covers 12 precursor chemicals—chemicals which must be used in drug manufacturing, and 8 essential chemicals—chemicals that may be used in the processing of drugs.

Exporters of these chemicals must clear their customers in advance with the Drug Enforcement Administration or give DEA 15 days notice prior to shipment. The DEA has the authority to stop a shipment, if the DEA has reason to believe the customer does not have a legitimate need for the chemical.

Mr. President, on February 8, 1990, the Senate passed a sense-of-the-Senate resolution urging President Bush to raise the critical issue of chemical diversion to narcotics producers at the international drug summit in Cartagena.

Since that time, we have made substantial progress in this area. U.S. exports to South America of the essential chemicals used to make cocaine are down from 90,000 metric tons to 40,000 metric tons. However, European exports of essential chemicals to Colombia increased 340 percent. It is clear that the Europeans have filled the void. The U.S. Congress did not pass strict controls on American chemical producers only to see the West European producers reap immense profits.

In June, the General Assembly of the Organization of American States approved a model regulation on chemical diversion which obliges all those who manufacture, trade, or use the 15

precursor chemicals listed to obtain an express permit from the Government. It is evident that the countries of the Western Hemisphere are committed to controlling this flow of chemicals. Regardless, we do not operate in a vacuum. It is imperative that the European nations join us in our effort.

There is some reason to be hopeful. A proposed directive under consideration as part of the EC 92 program will subject some precursor chemicals to notification and seizure. However, control of the essential chemicals used to process cocaine relies solely on voluntary compliance. Unless essential chemicals are strictly controlled, the directive is of little value.

Mr. President, the U.S. Senate has a firm record on restricting chemical diversion. The Senate recently included a measure in the omnibus crime bill cosponsored by Senators Mitch McCONNELL, JOHN KERRY, and myself which calls for the administration to enter into negotiations on controlling foreign sources of chemicals necessary for the production of cocaine. The legislation provides the President with the power to ban foreign producers of chemicals from the American market if they do not assist U.S. efforts to control these chemicals.

Our message to the European chemical producers is help us control the flow of chemicals to the drug cartels or sacrifice the American market.

The scourge of drugs must be stopped. It is critical that all nations work together on this problem. Our European allies must enact strong and comprehensive laws to control the export of these chemicals. I urge my colleagues to pass this resolution. Effective measures are needed to prevent the diversion of precursor and essential chemicals.●

AMENDMENTS SUBMITTED

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

WIRTH (AND OTHERS) AMENDMENT NO. 2514

Mr. WIRTH (for himself, Mr. GLENN, Mr. ADAMS, Mr. AKAKA, Mr. BRADLEY, Mr. CRANSTON, Mr. METZENBAUM, Mr. PACKWOOD, Mr. SIMON, Mr. DODD, and Mr. CHAFEE) proposed an amendment to the bill (S. 2884) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, as follows:

On page 91, between lines 5 and 6, insert the following:

SEC. 705. REPRODUCTIVE HEALTH SERVICES IN UNIFORMED SERVICES MEDICAL FACILITIES.

(a) MEMBERS OF THE UNIFORMED SERVICES.—Section 1074 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(d)(1) A member of the uniformed services stationed outside the United States is entitled to the provision of any reproductive health service in a facility of the uniformed services outside the United States in the same manner as any other type of medical care if the provision of such service is not prohibited under United States law.

"(2)(A) The administering Secretaries shall require a member of the uniformed services referred to in paragraph (1) to pay the cost, including all indirect costs, for any reproductive health service provided to such member in a facility referred to in such paragraph if payment for such service out of appropriated funds is not permitted. Appropriated funds shall be deemed not to have been used for providing a reproductive health service if such service is paid for pursuant to the requirement imposed under this paragraph.

"(B) Amounts paid under this paragraph for provision of a reproductive health service to a member of the uniformed services in a facility of the uniformed services shall be credited to the appropriation account for the provision of care under this chapter by facilities of the uniformed services, shall be merged with funds in such account, and shall be available for the purpose for which funds in such account are available but may be obligated and expended only by or for the facility in which the service was provided.".

(b) DEPENDENTS OF MEMBERS OF THE UNIFORMED SERVICES.—Section 1077 of title 10, United States Code, is amended by adding at the end of the following new subsection:

"(d)(1) A dependent of a member of the uniformed services stationed outside the United States, if such dependent is accompanying such member outside the United States, is entitled to the provision of any reproductive health service in a facility of the uniformed services outside the United States in the same manner as any other type of medical care if the provision of such service is not prohibited under United States law.

"(2)(A) The administering Secretaries shall require a member of the uniformed services referred to in paragraph (1) to pay the cost, including all indirect costs, for any reproductive health service provided to a dependent of such member in a medical facility referred to in such paragraph if payment for such service out of appropriated funds is not permitted. Appropriated funds shall be deemed not to have been used for providing a reproductive health service if such service is paid for pursuant to the requirement imposed under this paragraph.

"(B) Amounts paid under this paragraph for provision of a reproductive health service to a dependent of a member of the uniformed services in a facility of the uniformed services shall be credited to the appropriation account for the provision of care under this chapter by facilities of the uniformed services, shall be merged with funds in such account, and shall be available for the purposes for which funds in such account are available but may be obligated and expended only by or for the facility in which the service was provided.".

CONRAD (AND OTHERS) AMENDMENT NO. 2515

Mr. CONRAD (for himself, Mr. DASCHLE, and Mr. METZENBAUM) proposed an amendment to the bill S. 2884, supra, as follows:

On page 181, line 18, strike out "261,855" and insert in lieu thereof "231,855".

On page 182, between lines 9 and 10, insert the following:

(c) RELATIONSHIP TO AUTHORIZED END STRENGTHS FOR THE ARMED FORCES.—(1) The total number of the authorized end strengths provided in subsection (a) of section 401 and the total number of the authorized end strengths provided in subsection (b) of such section are each reduced by 30,000. The Secretary of Defense shall allocate the total reduction to the authorized end strengths provided in each such subsection as the Secretary considers appropriate.

(2) In the event of a waiver pursuant to subsection (b), the number specified in the first sentence of paragraph (1) shall be reduced by the number, if any, by which the total number of members of the Armed Forces of the United States assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization (NATO) on September 30, 1991, exceeds the number provided in section 1002(c)(1) of the Department of Defense Authorization Act, 1985 (22 U.S.C. 1928 note), as amended pursuant to subsection (a).

MURKOWSKI (AND OTHERS) AMENDMENT NO. 2516

Mr. MURKOWSKI (for himself, Mr. BENTSEN, Mr. MCCLURE, Mr. NICKLES, Mr. GRAMM, Mr. BURNS, Mr. SYMMS, Mr. STEVENS, Mr. DOMENICI, Mr. GARN, Mr. SIMPSON, Mr. BREAUX, Mr. BOREN, Mr. CONRAD, Mr. WALLOP, and Mr. DOLE) proposed an amendment to the bill S. 2884, supra, as follows:

DIVISION D—NATIONAL ENERGY SECURITY

TITLE XLI—NATIONAL ENERGY SECURITY

SEC. 4101. SHORT TITLE.

This title may be cited as the "National Energy Security Act of 1990".

SEC. 4102. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(a) the United States is the leader of the free world and has worldwide responsibilities to promote economic and political security;

(2) the exercise of traditional responsibilities here and abroad in foreign policy requires that the United States be free of the risk of energy blackmail in times of shortages;

(3) the level of the United States oil security is directly related to the level of domestic production of oil, natural gas liquids, and natural gas;

(4) the ability of the United States to exercise its free will and to carry out its responsibilities as leader of the free world could be jeopardized by an excessive dependence on foreign oil imports;

(5) increasing dependence on foreign oil imports has and continues to impose severe risks to the lives of United States service men and women and unacceptable costs to the national defense; and

(6) an emergency national energy security plan should be developed and implemented to ensure that adequate supplies of energy shall be available at all times free of the threat of embargo or other foreign hostile acts.

(b) PURPOSE.—The purpose of this title is to establish an emergency national energy security plan designed to reduce United States dependence on foreign oil suppolies to a level which does not pose an unacceptable threat to the national security.

SEC. 4103. DUTIES OF THE PRESIDENT.

(a) ESTABISHMENT OF CEILING.—There is established a national oil import ceiling (referred to in this title as the "ceiling level") of foreign crude and oil product imports at 50 percent of United States consumption.

(b) REPORT.—(1) The President shall prepare and submit an annual report to Congress containing a national oil security projection which shall contain a forecast of domestic oil and natural gas liquid demand and production, and imports of crude and oil product for the subsequent year. The report shall indicate the likelihood of foreign crude and oil product imports exceeding the ceiling level during the next year and the actions which the President will take to maintain crude and oil product imports below the ceiling level.

(2) At the time of the budget transmitted under Section 1105(a) of title 31, United States Code, by the President to the Congress, the projection prepared pursuant to paragraph (1) shall be presented to Congress with a description of the actions which the President would take under Section 4104.

SEC. 4104. NATIONAL ENERGY PRODUCTION AND SECURITY ACTION PLAN.

(a) ESTABLISHMENT OF ACTION PLAN.—The President shall at all times monitor the level of foreign crude and oil product imports as a share of United States oil consumption. Upon a finding that the ceiling level has been exceeded for any six months within any continuous twelve-month period, the President shall within 30 days submit an Energy Production and Security Action Plan (referred to in this title as the "Action Plan") to the Speaker of the House of Representatives and the President of the Senate. The Action Plan shall indicate specific actions to be taken to reduce crude and product imports below the ceiling level. Notwithstanding any other provision of law, the Action Plan shall be immediately implemented by the President upon enactment of a joint resolution by the Congress approving the Action Plan.

(b) ACTION PLAN.—The Energy Production and Security Action Plan shall include but not be limited to—

(1) a certification by the President that the ceiling level has been exceeded;

(2) a list of Federal land tracts, offshore and onshore, in order of their potential for oil and gas discovery, including any Federal land outside units of the National Park System, currently off-limits to oil and gas leasing;

(3) a schedule for leasing the tracts identified in subparagraph (B) in order of their potential for oil and gas discovery, including number of tracts to be leased and the timing for individual lease sales;

(4) energy conservation actions including improved fuel efficiency for automobiles and the development and utilization of alternative transportation fuels; and

(5) production incentives for domestic oil and gas including recommendations on the imposition of oil import fees, royalty reductions, tax and other incentives for stripper well production and the production of offshore, frontier, and other oil produced with tertiary recovery techniques.

GLENN (AND OTHERS) AMENDMENT NO. 2517

Mr. GLENN (for himself, Mr. MCCAIN, Mr. KENNEDY, and Mr. BRADLEY) proposed an amendment to the bill S. 2884, supra, as follows:

On page 52, line 13, strike out "3.5 percent" and insert in lieu thereof "4.1 percent".

On page 39, line 12, strike out "$77,553,700,000" and insert in lieu thereof "$77,853,700,000".

THURMOND AMENDMENT NO. 2518

Mr. THURMOND proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place, add the following:

CHARTER

SECTION 1. The 82nd Airborne Division Association, Incorporated, a nonprofit corporation organized under the laws of the State of Illinois, is recognized as such and is granted a Federal charter.

POWERS

SEC. 2. The 82nd Airborne Division Association, Incorporated (hereinafter in this Act referred to as the "corporation"), shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall included—

(1) perpetuating the memory of members of the 82nd Airborne Division who fought and died for our Nation,

(2) furthering the common bond between retired and active members of the 82nd Airborne Division,

(3) providing educational assistance in the form of college scholarships and grants to the qualified children of current and former members,

(4) promoting civic and patriotic activities, and

(5) promoting the indispensable role of airborne defense in our national security.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the State or States in which it is incorporated and the State or States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. (a) Subject to subsection (b), eligibility for membership in the corporation and the rights and privileges of members of the corporation shall be as provided in the consitution and bylaws of the corporation.

(b) Terms of membership and requirements for holding office within the corporation shall not discriminate on the basis of race, color, national origin, sex, religion, or handicapped status.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The composition of the board of directors of the corporation and the responsibilities of such board shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The positions of officers of the corporation and the election of members to such positions shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation may inure to the benefit of any member, officer, or director of the corporation or be distributed to any such individual during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual and necessary expenses in amounts approved by the board of directors.

(b) The corporation may not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents whenever such officers and agents have acted within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep, at its principal office, a record of the names and addresses of all members having the right to vote in any proceeding of the corporation. All books and records of such corporation may be inspected by any member having the right to vote in any corporation proceeding, or by any agent or attorney of such member, for any proper purpose at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(74) 82nd Airborne Division Association, Incorporated.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the ac-

tivities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as the report of the audit of the corporation required by section 2 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101). The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND, ALTER, OR REPEAL CHARTER

SEC. 13. The right to amend, alter, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF STATE

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1986.

TERMINATION

SEC. 16. If the corporation fails to comply with any of the restrictions or provisions of this Act, the charter granted by this Act shall expire.

McCONNELL AMENDMENT NO. 2519

Mr. WARNER (for Mr. MCCONNELL) proposed an amendment to the bill S. 2884, supra, as follows:

Amend title XI, by adding new section 1103 as follows:

SEC. 1103. TRANSFER OF EXCESS DEFENSE ARTICLES.

Pursuant to Public Law 100-456, section 1208 and section 372 of title 10, United States Code, the Secretary of Defense shall review the availability of equipment resulting from the withdrawal of U.S. forces from Europe and Asia for the purpose of identifying excess equipment that may be suitable for drug enforcement activities for transfer to appropriate state or local civilian law enforcement authorities.

BUMPERS (AND OTHERS) AMENDMENT NO. 2520

Mr. BUMPERS (for himself, Mr. CHAFEE, and Mr. EXON) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

"Notwithstanding any other provision of law, no funds may be obligated or expended to maintain in active service more than Iowa-class battleship after 30 September 1991;

"Furthermore, the Secretary of Defense shall conduct an analysis of the need for battleships to be used in situations arising in the Third World in which the full capabilities may not be needed or cannot be fully utilized and any other alternative use of the battleships due to the changing nature of the threat facing the United States and its allies.

NUNN (AND WARNER) AMENDMENT NO. 2521

Mr. NUNN (for himself and Mr. WARNER) proposed an amendment to amendment No. 2520 proposed by Mr. BUMPERS (and others) to the bill S. 2884, supra, as follows:

Strike out "1991;" and all that follows and insert in lieu thereof the following: "1991."

"Furthermore, the Secretary of Defense shall conduct an analysis of the need for battleships to be used in situations arising in the Third World in which the full capabilities may not be needed or cannot be fully utilized and any other alternative use of the battleships due to the changing nature of the threat facing the United States and its allies.

DeCONCINI (AND BRADLEY) AMENDMENT NO. 2522

Mr. DeCONCINI (for himself and Mr. BRADLEY) proposed an amendment to the bill S. 2884, supra, as follows:

On page 212, between lines 20 and 21, insert the following new section:

SEC. 1103. MODEL RESIDENTIAL PROJECTS FOR ALCOHOL AND DRUG ABUSING WOMEN AND THEIR CHILDREN.

(a) FINDINGS.—Congress finds that—

(1) research studies strongly suggest that the incidence of drug abuse among women in general and women of childbearing age in the United States is increasing;

(2) drug-abusing women who have children traditionally experience significant barriers to drug abuse treatmet because most residential drug abuse treatment programs do not accommodate the children of such women;

(3) many women with children are either reluctant to seek the drug abuse treatment they need or are forced to put their children in State foster homes at a time when there is a severe shortage of people willing and able to provide foster care in the United States;

(4) for the first time since the turn of the twentieth century, orphanages are filling up primarily because of the growing drug problem; and

(5) there is mounting evidence that women whose children reside with them during treatment for drug abuse consistently stay in treatment longer than women separated from their children, thereby increasing the chances of recovery for women whose children reside with them during drug abuse treatment.

(b) PURPOSE.—It is the purpose of this section to attempt to rebuild economically disadvantaged drug-affected families by—

(1) reducing the barriers to successful drug abuse treatment for economically disadvantaged high-risk mothers by permitting such mothers to bring their children into residential drug abuse treatment programs with them, and

(2) teaching such mothers new behavior and employment skills which can help to break the cycle of drug addiction in the next generation.

(c) ESTABLISHMENT OF PROJECT.—Part A of the title V of the Public Health Service Act is amended by inserting at the end thereof the following new section:

"SEC. 509H. MODEL RESIDENTIAL PROJECTS FOR ALCOHOL AND DRUG ABUSING WOMEN AND THEIR CHILDREN.

"(a) PROJECT AUTHORIZED.—

"(1) IN GENERAL.—The Secretary, acting through the Director of the Office, shall make grants to establish not less than 5 projects in which addicted mothers in residential drug abuse treatment facilities are permitted to have their children reside with them during the course of such treatment. Such residential drug abuse treatment and prevention projects shall target economically disadvantaged addicted women and their children (age 10 years and younger) and shall offer child care, parenting and jobs skills, nutrition, and other health, social, education, and employment services as necessary.

"(2) PERIOD OF OPERATION.—The Secretary, acting through the Director of the Office, shall only award grants under this section for projects which will be operated for a period of at least 3 years.

"(b) APPLICATION.—Each entity desiring a grant under this section shall submit an application to the Director of the Office at such time, in such manner and accompanied by such information as the Director of the Office may reasonably require. Each such application shall include assurances that the mothers selected for participation in such project have been evaluated to ensure that such mothers are committed to remaining in drug abuse treatment and prevention projects assisted under this section.

"(c) EVALUATION.—The Director of the Office shall conduct evaluations to determine the effectiveness of the projects assisted under this section.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $50,000,000 for fiscal year 1991, and such sums as may be necessary for each fiscal year thereafter to carry out the provisions of this of section.".

(d) TRANSFER OF CERTAIN FUNDS.—Of funds appropriated to or for the Department of Defense for fiscal year 1990 and which remain unobligated on September 30, 1990, $100,000,000 shall be transferred to the Department of Health and Human Services and shall remain available until September 30, 1991. Of such amount—

(1) $50,000,000 shall be available for the program established under section 509F of the Public Health Service Act; and

(2) $50,000,000 shall be available for the program established under section 509H of the Public Health Service Act (as added by the amendment made by subsection (c)).

ROTH (AND BIDEN) AMENDMENT NO. 2523

Mr. ROTH (for himself and Mr. BIDEN) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . PROHIBITION ON TRANSFER OF LANDS TO THE DEPARTMENT OF DEFENSE.

(a) IN GENERAL.—(1) Notwithstanding any other provision of law and except as provided in subsection (b)—

(A) the Department of Defense may not procure, purchase, or otherwise acquire any lands; and

(B) a department or agency of the Federal Government may not transfer to, or make available for use by, the Department of Defense any lands under the jurisdiction of that department or agency.

(2) Funds made available to or for the use of the Army National Guard of the United States, the Air National Guard of the United States, or the Reserve components of the Armed Forces may not be used for

the procurement, purchase, acquisition, or transfer of any lands.

(b) EXCEPTIONS.—The prohibition in subsection (a) shall not apply—

(1) to the acquisition or transfer of any parcel of land involving 25 acres or less; or

(2) to lands that have been made available on a regular basis to the Department of Defense by a department or agency in any area before the date of the enactment of this section so long as (A) such lands are made available for the same purpose and for the same period of time as in previous years, and (B) the total acreage of the lands made available to the Department of Defense in that area after the date of the enactment of this section does not exceed the annual average number of acres made available to the Department of Defense by that department or agency in that area in the five years preceding the year in which this section is enacted.

(c) EXPIRATION OF PROHIBITIONS.—The prohibitions in subsection (a) shall expire on September 30, 1991.

ROTH AMENDMENTS NOS. 2524 AND 2525

Mr. ROTH proposed two amendments to the bill S. 2884, supra, as follows:

AMENDMENT NO. 2524

At the appropriate place in the bill, insert the following new title:

TITLE —BASE CONVERSION

SEC. . DEFINITIONS

As used in this title:

(1) The term "military installation" means a base, camp, post, station, yard, center, homeport facility for any ship, or other activity under the jurisdiction of the Secretary of a military department.

(2) The term "Administrator" means the Administrator of General Services.

(3) The term "local community" means the incorporated town, village, city, or similar entity of the State in which a military installation is located or, if the military installation is not located in an incorporated entity, the incorporated entity of the State that has authority under State law to annex the property on which the military installation is located.

SEC. . DISPOSITION OF PROPERTY

(a) IN GENERAL.—The real property constituting each military installation identified by the Secretary of Defense on January 29, 1990, as a military installation in the United States proposed to be closed by the Department of Defense shall, if such installation is closed, be disposed of as provided in this title.

(b) TRANSFER OF PROPERTY TO THE ADMINISTRATOR.—Thirty days after the date on which a military installation referred to in subsection (a) is officially closed by the Department of Defense, the Administrator shall have jurisdiction over the real property constituting the military installation.

(c) PRIORITY FOR DISPOSITION.—Within six months after a military installation referred to in subsection (a) has been closed, the Administrator shall offer title to the real property constituting the military installation to the local community concerned. Title to the property shall be offered subject to the conditions prescribed in this title.

(2) If the local community concerned refuses the property, or fails to notify the Administrator of the community's acceptance of the property within six months after the date on which the Administrator notifies the community in writing of the availability of the property (and the conditions under which the property will be granted to the community), the Administrator shall offer the property to the county in which the military installation is located.

(3) If the county refuses the property, or fails to notify the Administrator of the county's acceptance of the property within three months after the date on which the Administrator notifies the county in writing of the availability of the property (and the conditions under which the property will be granted to the county), the Administrator shall offer the property to the State in which the military installation is located.

(4) If the State refuses the property, or fails to notify the Administrator of the State's acceptance of the property within 60 days after the date on which the Administrator notifies the State in writing of the availability of the property (and the conditions under which the property will be granted to the State), the Administrator shall offer the property to other departments and agencies of the Federal Government.

(5) If no department or agency of the Federal Government requests the property within 30 days after the date on which the notice of the availability of the property is published in the Federal Register, the Administrator shall dispose of the property to the highest responsible bidder.

(d) PROPERTY LOCATED IN MORE THAN ONE LOCAL COMMUNITY.—In any case in which a military installation referred to in subsection (a) is located in more than one local community, the property shall be offered to each of the communities and, if accepted by more than one community, shall be divided among the communities in such manner as may be specified by the laws of the State concerned.

(e) PROPERTY LOCATED IN MORE THAN ONE COUNTY.—In any case in which a military installation referred to in subsection (a) is located in more than one county of a State and the real property constituting the installation is not accepted by the local community concerned, that portion of the installation within each county shall be offered to that county.

SEC. . CONDITIONS

(a) IN GENERAL.—Title to the real property constituting a military installation referred to in section (a) may not be conveyed to a local community, county, or State unless the local community, county, or State, as the case may be, submits to the Administrator, in such manner as the Administrator may prescribe, a plan under which the local community agrees—

(1) to reimburse the United States for the training or retraining of all Federal civilian employees whose employment is terminated as a direct result of the closing of the military installation concerned;

(2) to reimburse the United States for all severance payments made by the United States to employees described in paragraph (1) as a result of the closing of the military installation;

(3) to reimburse the United States for payments made to employees described in paragraph (1), in addition to any other payments to which they may be entitled, an adjustment allowance equal to one week's pay for each year employed, but not more than an amount equal to 10 weeks' pay;

(4) that if the property is sold by the local community, county, or State, as the case may be, within 25 years after the date of the conveyance of the property to the local community, county, or State, to pay to the United States an amount equal to 25 percent of the proceeds from the sale of the property after deducting the costs incurred in carrying out paragraphs (1), (2), and (3), (to the extent the costs have not been deducted from any proceeds referred to in paragraph (5));

(5) to pay to the United States 25 percent of any income realized by the local community, county, or State, as the case may be, from the rental or lease of the property during the first 25 years following the date of the conveyance of the property to the local community, county, or State, after deducting the costs incurred in carrying out paragraphs (1), (2), and (3) (to the extent that the costs have not been deducted from any proceeds referred to in paragraph (4));

(6) to make available to the Comptroller General of the United States such information as may be necessary for the Comptroller General to carry out his duties under section ; and

(7) to such other terms and conditions as the Administrator determines necessary to prevent the local community, county, or State from entering into an arrangement that would postpone payment of part or all of the sale price of the property or postpone payment of part or all of the rental payments so as to avoid any payment to the United States required under paragraph (4) or (5).

(b) REQUIREMENTS REGARDING PLAN.—(1) Property referred to in section (a) may not be conveyed under this title to a local community, county, or State unless the plan submitted by the community, county, or State, as the case may be, is approved by the Administrator, in consultation with the heads of other appropriate departments and agencies.

(2) The Administrator may not approve a plan submitted by a local community, county, or State unless—

(A) the plan describes, in such manner as the Administrator may provide, the manner in which the benefits referred to in subsection (a) will be provided and the manner in which the other conditions prescribed in such subsection will be met by the local community, county, or State; and

(B) the Administrator determines on the basis of the information contained in the plan that there is a reasonable likelihood that the plan will be successful.

(c) APPROVAL OR DISAPPROVAL OF PLAN.—The Administrator shall review each plan submitted pursuant to subsection (b) and shall notify the local community, county, or State concerned of the approval or disapproval of the plan within 30 days after receipt of the plan. If the plan is disapproved, the Administrator shall specify the reasons for the disapproval and the changes necessary to obtain approval of the plan.

SEC. . FAILURE TO COMPLY WITH CONDITIONS.

If a local community, county, or State to which real property is conveyed pursuant to this title fails to comply with any condition provided for in this title, the Administrator, after providing written notice to the community, county, or State, as appropriate, may withhold from any payments otherwise payable to the community, county, or State under any Federal program, such amounts as may be necessary for the United States to meet the expenses of complying with the conditions provided for in section (a). The Administrator may provide any benefit described in section (a) to any employee referred to in paragraph (1) of that section in

any case in which a local community, county, or State, as the case may be, fails to provide that benefit.

SEC. . REVIEW BY COMPTROLLER GENERAL.

The Comptroller General of the United States shall conduct such reviews of the transactions carried out pursuant to this title as may be necessary to determine whether the transactions are in compliance with this title.

SEC. . REGULATIONS.

The Administrator shall prescribe such regulations as may be appropriate to carry out this title.

SEC. . AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this title.

AMENDMENT No. 2525

At the appropriate place in the bill, insert the following new section:

SEC. . MODIFICATION OF REQUIREMENTS FOR NOTICE AND WAIT

Section 2687(a) of title 10, United States Code, is amended—

(1) in paragraph (1), by striking out "300" and inserting in lieu thereof "1,000"; and

(2) in paragraph (2), by striking out "1,000" and inserting in lieu thereof "2,500".

WARNER AMENDMENT NO. 2526

Mr. WARNER proposed an amendment to the bill S. 2884, supra, as follows:

On page 356, lines 10 and 11, strike out "Northern Virginia Regional Correctional Commission" and insert in lieu thereof "Commonwealth of Virginia".

On page 356, lines 17 through 19 strike out "the Northern Virginia Regional Correctional Commission" and all that follows through "to be completed" and insert in lieu thereof "construction of a regional correctional facility on the land be completed".

On page 356, line 21, strike out "and".

On page 356, lines 22 and 23, strike out "by the Northern Virginia Regional Correctional Commission (or any successor governmental entity)".

On page 356, line 25, strike out the period and insert in lieu thereof "; and".

On page 356, below line 25, insert the following new subparagraph:

"(C) the Commonwealth of Virginia offer to Arlington County, Fairfax County, the City of Alexandria, Loudoun County, Fauquier County, Prince William County, Stafford County and Caroline County, Virginia, and any other Virginia county that the Commonwealth of Virginia may choose, the opportunity to participate in the governmental entity created under the law of the Commonwealth of Virginia to construct and operate the regional correctional facility.".

On page 357, strike out lines 1 through 5, and insert in lieu thereof "If a regional correctional facility is not constructed on the land conveyed pursuant to this section in accordance with paragraph (1)(A), such land is used for any purpose other than the purpose specified in paragraph (1)(B), or the counties referred to in paragraph (1)(C) are not offered the opportunity to participate in the entity referred to in such paragraph".

On page 357, line 18, strike out "public".

On page 357, lines 21 through 23, strike out "The cost of such survey shall be borne by the Northern Virginia Regional Correctional Commission.".

BUMPERS AMENDMENT NO. 2527

Mr. BUMPERS proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill insert the following:

"It is the sense of the Congress that the President should provide for the Speaker of the House, the President pro tempore of the Senate, the minority leaders of the House and Senate, and the chairmen and ranking minority members of the Armed Services and Appropriations Committees of the House and Senate to be given annually an overview presentation on the United States' top level military strategy and its implementation by strategic forces, including the impact on targeting requirements, resources, and force structure.".

KENNEDY (AND OTHERS) AMENDMENT NO. 2528

Mr. KENNEDY (for himself, Mr. WIRTH, Mr. HATFIELD, Mr. CRANSTON, Mr. KERRY, and Mr. ADAMS) proposed an amendment to the bill S. 2884, supra, as follows:

At the end of title XXXI (page 380, after line 12), add the following new part (and conform the table of contents accordingly):

PART D—INTERNATIONAL FISSILE MATERIAL AND WARHEAD CONTROL

SEC. 3135. PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR NUCLEAR WEAPONS AND DISPOSAL OF NUCLEAR STOCKPILES.

(a) PRODUCTION BY THE SOVIET UNION.—Congress urges the President and the Supreme Soviet of the Soviet Union—

(1) to cease production by the Soviet Union of plutonium;

(2) to maintain the cessation in production by the Soviet Union of highly-enriched uranium for weapons that was announced on April 7, 1989.

(b) TECHNICAL ASPECTS OF FISSILE MATERIAL MONITORING AND NUCLEAR WARHEAD DISMANTLEMENT.—Should the President determine that future international agreements should provide for dismantlement of nuclear warheads and a ban on further production of fissile materials for weapons, then the Congress urges the President to seek to establish with the Soviet Union a joint technical working group to examine and demonstrate cooperative technical monitoring and inspection arrangements that could be applied to the design and verification of these potential provisions.

(c) REPORT ON VERIFICATION TECHNIQUES.—(1) The Secretary of Energy, in consultation with the Secretary of Defense and in coordination with the Director of Central Intelligence, shall prepare a comprehensive technical report on the verification matters described in paragraph (2) of this subsection.

(2) The report shall describe the on-site monitoring techniques, inspection arrangements, and national technical means that could be used by the United States to verify the actions of other nations with respect to the following:

(A) dismantlement of nuclear warheads in the event that a future agreement between the United States and the Soviet Union should provide for such dismantlement to be carried out in a mutually verifiable manner.

(B) a mutual U.S.-Soviet ban, leading to a multilateral, global ban on the production of additional quantities of plutonium and highly-enriched uranium for nuclear weapons.

(C) the end use or ultimate disposal of any plutonium and highly enriched uranium recovered from the dismantlement of nuclear warheads.

(3) In order to prepare the report required by paragraph (1) of this subsection, the Secretary of Energy, in coordination with the Director of Central Intelligence, shall establish a Technical Advisory Committee on Verification of Fissile Material and Nuclear Warhead Controls, composed of preeminent government and nongovernment experts in the fields of radiation detection, nondestructive examination, nuclear safeguards, nuclear materials production, and nuclear warhead dismantlement. This committee, which shall be established not later than December 31, 1990, shall advise the Secretaries of Energy and Defense, and the Director of Central Intelligence on the availability, utilization, and further development of techniques which could be applied to the verification of the prospective actions described in paragraph (2) of this subsection.

(4) The report required by paragraph (1) shall be submitted to Congress not later than April 30, 1991. The report shall be submitted in unclassified form, with such classified appendices as may be necessary.

SEC. 3136. DEVELOPMENT AND DEMONSTRATION OF MEANS FOR WARHEAD DISMANTLEMENT VERIFICATION.

The Secretary of Energy may use funds available to the Secretary for national security programs of the Department of Energy for fiscal year 1991 to carry out a program to develop and demonstrate a means for verifiable dismantlement of nuclear warheads.

SIMON AMENDMENT NO. 2529

Mr. SIMON proposed an amendment to the bill S. 2884, supra, as follows:

On page 72, line 15, strike out "section:" and insert in lieu thereof "sections:".

On page 74, line 9, strike out the end quotation marks and the period following the end quotation marks.

On page 74, between lines 9 and 10, insert the following:

"§ 1106. Temporary health coverage for persons voluntarily discharged or released from active duty

"(a) IN GENERAL.—The Secretary of Defense shall develop a program for providing health insurance coverage described in subsection (b) for—

"(1) members of the armed forces who are voluntarily discharged or released from active duty after completing two or more years of continuous service and who voluntarily enroll in such program; and

"(2) the dependents of such a member.

"(b) COVERAGE.—The health insurance provided under this section shall cover health conditions existing before the date of the discharge or release, including pregnancy existing before such date, for one year after such date.

"(c) PAYMENT OF PREMIUMS.—A member enrolled in such program shall be responsible for payment of the premiums required for the insurance coverage provided under the program.

"(d) CONTRACT.—The Secretary may enter into a contract with an insurance underwriter to furnish the health insurance under the program.".

On page 74, strike out the matter between lines 12 and 13 and insert in lieu thereof the following:

"1105. Temporary health coverage for persons involuntarily discharged or released from active duty.
"1106. Temporary health coverage for persons voluntarily discharged or released from active duty.".

SIMON (AND OTHERS) AMENDMENT NO. 2530

Mr. SIMON (for himself, Mr. MACK, Mr. GRAHAM, and Mr. DECONCINI) proposed an amendment to the bill S. 2884, supra, as follows:

On page 223, below line 24, insert the following new section:

SEC. 1216. PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA

(a)(1) PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA.—There is hereby established a presidential advisory committee to be known as the Presidential Advisory Committee for Policy Toward Cuba (hereafter in this section referred to as the "Advisory Committee"). The purpose of the Advisory Committee shall be to provide advice and recommendations relating to all aspects of United States policy toward Cuba.

(2) The Advisory Committee shall consist of seven members each of whom shall be citizens of the United States. The President shall appoint such members of the Advisory Committee not later than 60 days after the date of the enactment of this Act. Not more than four of such members may be from the same political party. Each member of the Advisory Committee shall serve for the life of the Advisory Committee.

(3) The President shall appoint one of the members of the Advisory Committee to serve as Chairman. The Advisory Committee shall meet as may be necessary, at the call of the Chairman, or at the call of two-thirds of the members of the Committee.

(4) The Secretary of State shall make available to the Advisory Committee such staff, information, personnel, and administrative services and assistance as it may reasonably require to carry out its activities.

(b) PURPOSE.—(1) It shall be the purpose of the Advisory Committee to advise and make policy recommendations to the President and the Secretary of State on sound policies toward Cuba.

(2) In carrying out the purposes referred to in paragraph (1), the Advisory Committee shall—

(A) make recommendations relating to policy options to encourage freedom for the people of Cuba;

(B) propose a plan for providing appropriate assistance to the people of Cuba in the event the present government is changed; and

(C) make recommendations on immigration and trade between the United States and Cuba.

(c) REPORTS.—(1) The Advisory Committee shall submit annual reports detailing the advice and recommendations referred to in subsection (b).

(2) The Advisory Committee shall submit a final report detailing such advice and recommendations 30 days before its termination date.

(3) The Advisory Committee shall submit a copy of the report referred to in paragraphs (1) and (2) to the President, the Secretary of State, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives.

(d) APPLICATION OF FEDERAL ADVISORY COMMITTEE ACT.—The provisions of the Federal Advisory Committee Act shall apply to the Advisory Committee, except that—

(1) the meetings of the Advisory Committee shall be exempt from the requirements of subsections (a) and (b) of sections 10 and 11 of the Federal Advisory Committee Act (5 U.S.C. App.) (relating to open meetings, public notice, public participation, and public availability of documents), whenever and to the extent it is determined by the President or his designee that such meetings will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of policy toward Cuba; and

(2) meetings may be called of special task forces or other such groups made up of members of the Advisory Committee.

(e) OTHER ACTIVITIES BY MEMBERS OF ADVISORY COMMITTEE.—Nothing contained in this section may be construed to authorize or require any member of the Advisory Committee or any other individual to participate directly in any other official Government meeting on any matter referred to in subsection (b). To the maximum extent practicable, the members of the Advisory Committee shall be informed and consulted before and during any such meetings. Advisory Committee members may be designated as advisors to a United States delegation to such meeting and may be permitted to participate in other international meetings to the extent the President deems appropriate, except that they may not speak or negotiate for the United States at such meetings.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

(g) TERMINATION.—The Advisory Committee shall terminate 3 years after the date of enactment of this Act.

WARNER AMENDMENT NO. 2531

Mr. WARNER proposed an amendment to the bill S. 2884, supra, as follows:

On page 27, between lines 11 and 12, insert the following:

SEC. 321. ENVIRONMENTAL EDUCATION PROGRAM FOR DEPARTMENT OF DEFENSE PERSONNEL

(a) REQUIREMENT TO ESTABLISH PROGRAM.—The Secretary of Defense shall establish a program for the purpose of educating Department of Defense personnel in environmental management.

(b) PROGRAM REQUIREMENTS.—Under the program, the Secretary shall—

(1) in consultation with environmental education personnel of colleges and universities in the United States that offer undergraduate and graduate level courses in a wide range of environmental disciplines, develop a curriculum of environmental management courses offered by such colleges and universities;

(2) provide opportunities for Department of Defense personnel to attend such courses at such colleges and universities; and

(3) develop the criteria for the selection of Department of Defense personnel to attend such courses.

(c) FISCAL YEAR 1991 FUNDING MATTERS.—Of the funds authorized to be appropriated pursuant to section 301, not more than $100,000 shall be available for the program established pursuant to subsection (a).

(d) RECOMMENDATIONS REGARDING CONTINUATION OF PROGRAM AFTER FISCAL YEAR 1991.—Not later than the date on which the President submits the budget for fiscal year 1992 to Congress pursuant to section 1105(a) of title 31, United States Code, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives in writing his recommendations regarding whether the program established under subsection (a) should be continued after September 30, 1991.

WARNER AMENDMENT NO. 2532

Mr. WARNER proposed an amendment to the bill S. 2884, supra; as follows:

On page——, line——, insert the following new section:

SEC. 3XX. USE OF OZONE DEPLETING SUBSTANCES WITHIN THE DEPARTMENT OF DEFENSE.

(a) DOD Requirements for Ozone Depleting Chemicals Other than CFC's—

(1) In addition to the functions of the committee designated by section 356(c) of the National Defense Authorization Act for fiscal year 1990, it shall be the function of the Committee to study (A) the use of methyl chloroform, hydrochlorofluorcarbons (HCFC's) and carbon tetrachloride by the Department of Defense and by contractors in the performance of contracts for the Department of Defense, and (B) the costs and feasibility of using alternative compounds or technologies for methyl chloroform, HCFC's, and carbon tetrachloride.

(2) Within 120 days after the date of the enactment of this Act, the Secretary shall provide the committee with a list of all military specifications, standards, and other requirements that specify the use of methyl chloroform, HCFC's or carbon tetrachloride.

(3) Within 150 days after the date of the enactment of this Act, the Secretary shall provide the committee with a list of all military specifications, standards, and other requirements that do not specify use of methyl chloroform, HCFC's or carbon tetrachloride.

(b) In preparing reports the committee shall work closely with the Strategic Environmental Research Program Council, and shall provide to the Strategic Environmental Research Program Council its reports and recommendation with respect to section (a).

(c) EXTENSION OF REPORTING DEADLINE FOR CFC'S.—The deadline for submitting a final report to the Congress concerning uses of CFC's, established in section 356(d) of the National Defense Authorization Act for fiscal year 1990, is hereby extended to June 30, 1991.

(d) REPORTING DEADLINE FOR METHYL CHLOROFORM, HCFC'S, and CARBON TETRACHLORIDE.—Not later than September 30,

1991, the Secretary shall submit to Congress a report containing the results of the study by the committee authorized under subsection (b)(1) of this section.

BUMPERS AMENDMENT NO. 2533

Mr. BUMPERS proposed an amendment to the bill S. 2884, supra, as follows:

On page 181, insert between lines 8 and 9 the following new section:

SEC. 854. PAYMENT OF MASS TRANSIT COSTS OF EMPLOYEES UNDER CERTAIN GOVERNMENT CONTRACTS

(a) IN GENERAL.—No later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall issue a regulation to provide that mass transit costs incurred by contractor employees in commuting to a place of performance of a contract for the Department of Defense may be treated in the same manner as parking costs of contractor employees are treated under such contract, to the extent that the Secretary deems appropriate, and consistent with otherwise applied cost principles.

(b) MASS TRANSIT COSTS.—The mass transit costs referred to under subsection (a) may include the cost of transit tokens, farecards, or other access devices for an employee commuting on mass transit.

(c) LIMITATION.—The mass transit costs payable to or for an employee under any contract described under subsection (a) may not exceed the parking costs which would be payable to or for an employee under such contract.

ADAMS (AND HATFIELD) AMENDMENT NO. 2534

Mr. LEVIN (for Mr. ADAMS, for himself and Mr. HATFIELD) proposed an amendment to the bill S. 2884, supra; as follows:

On page 380, between lines 12 and 13, insert the following:

SEC. 3135. FUNDING FOR REGISTERING, MONITORING, AND NOTIFYING PERSONS EXPOSED TO RADIONUCLIDES RELEASED FROM THE DEPARTMENT OF ENERGY HANFORD NUCLEAR RESERVATION, HANFORD, WASHINGTON.

Of the funds authorized to be appropriated to the Departmen of Engery pursuant to this title, the Secretary of Energy shall make available to the State of Washington $3,000,000, and to the State of Oregon and the State of Idaho $1,000,000 each for the following purposes:

(1) To implement one or more programs to register and monitor those persons who may have been exposed to radionuclides released from the Department of Energy Hanford Nuclear Reservation, Hanford, Washington, between the years of 1944 and 1972.

(2) To develop procedures for notifying each such person of the potential adverse health effects of such exposure and of any recommended course of medical action regarding such adverse health effects.

DOLE AMENDMENT NO. 2535

Mr. GORTON (for Mr. DOLE) proposed an amendment to the bill S. 2884, supra; as follows:

SENSE OF THE SENATE RELATING TO THE DEVELOPMENT AND PRODUCTION OF WEAPONS AND WEAPON SYSTEMS HAVING STANDOFF ATTACK CAPABILITIES AND EMPLOYING SENSOR-FUSED DEVICES

Findings:

(1) The worldwide proliferation of sophisticated and highly lethal, advanced technology weapons systems continues at rapid pace; and

(2) These increasingly lethal weapons place United States and Allied forces at greater risk; and

(3) The development of standoff weapons to attack highly defended targets while minimizing risk to United States Forces is a high priority; and

(4) The results of research and testing conducted by or for the Department of Defense on weapons and weapon systems having standoff capabilities and employing sensor-fused devices demonstrates that such weapons satisfy such needs; now

The Air Force should complete development of weapons and weapon systems having standoff attack capabilities and employing sensor-fused devices and, upon completion of such development, should proceed with the production of such weapons and weapon systems, and that such production should take place at facilities so selected during the development phase of these weapons.

LEVIN (AND OTHERS) AMENDMENT NO. 2536

Mr. LEVIN (for himself, Mr. BINGAMAN, and Mr. WALLOP) proposed an amendment to the bill S. 2884, supra, as follows:

On page 153, line 23, strike out "(1) Chapter 81 of title 10" and insert in lieu thereof "Section 5532 of title 5".

On page 153, line 24, strike out "inserting before section 1583 the following new section:" and insert in lieu thereof "adding at the end thereof the following new subsection:".

On page 154, strike out line 1 and all that follows through page 155, the matter between lines 7 and 8, and insert in lieu thereof the following:

"(g)(1) Upon a finding by the head of an Executive agency that it is difficult to recruit qualified persons for appointment to a particular scientific, engineering, professional, or managerial position in such Executive agency, the head of such Executive agency may request, and the Director of the Office of Personnel Management may grant, a waiver of the applicability of the other provisions of this section and sections 8344 and 8468 of this title (relating to annuities and pay on reemployment) to any person appointed to such position. There may not be in effect at any time waivers under this paragraph for more than 1,500 employees of the Executive Branch.

On page 155, line 20, strike out "373 of title 10," and insert in lieu thereof "41 of title 5,".

On page 155, line 21, strike out "inserting" and all that follows through line 23 and insert in lieu thereof the following: "adding at the end thereof the following new section:

" '4119. Degree training".

On page 155, line 25, strike out "Department of Defense" and insert in lieu thereof "Executive branch".

On page 156, line 2, strike out "Secretary" and all that follows through line 4, and insert in lieu thereof "Director of the Office of Personnel Management may establish a program for the heads of Executive agencies to furnish financial assistance for an agency".

On page 156, strike out line 9, and insert in lieu thereof the following:

"(2) an academic degree which would enhance the employee's ability to serve the federal government.

On page 156, line 24, strike out "the Secretary of Defense with the concurrence of".

On page 157, line 1, strike out "Secretary of Defense, in coordination with the".

On page 157, line 5, strike out "title 5" and insert in lieu thereof "this title".

On page 157, line 8, strike out "373" and insert in lieu thereof "41".

On page 157, line 9, strike out "inserting" and all that follows through "4021" on line 10 and insert in lieu thereof "adding at the end thereof".

On page 157, in the matter between lines 10 and 11, strike out "4022." and insert in lieu thereof "4119.".

On page 158, line 16, strike out "373" and insert in lieu thereof "41".

On page 158, line 17, strike out "10" and insert in lieu thereof "5".

On page 158, line 18, strike out "inserting" and all that follows through line 20 and insert in lieu thereof the following: "adding at the end thereof the following new section:

" '4120. Student loan repayments".

On page 158, line 23, strike out "Department of Defense, the Secretary of Defense" and insert in lieu thereof "Executive branch, the Director of the Office of Personnel Management".

On page 158, line 24, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 159, line 1, strike out "the department" and insert in lieu thereof "that executive agency".

On page 159, line 7, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 159, strike out lines 11 through 22.

On page 159, line 23, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 160, line 1, strike out "Secretary" and insert in lieu thereof "head of the executive agency".

On page 160, line 3, strike out "by" and all that follows through "Defense" on line 4, and insert in lieu thereof "in the Executive branch".

On page 160, line 14, strike out "Secretary" and insert in lieu thereof "head of the executive agency".

On page 160, strike out lines 15 through 22.

On page 161, line 11, strike out "Secretary" and insert in lieu thereof "head of an executive agency that entered into an agreement with an employee under subsection (a)".

On page 161, line 12, insert "in connection with such agreement" after "this subsection".

On page 161, line 12, strike out "Department of Defense" and insert in lieu thereof "Executive branch".

On page 162, line 1, strike out "by" and all that follows through line 2, and insert in lieu thereof "in the Executive branch; or".

On page 162, line 5, strike out "Secretary of Defense" and insert in lieu thereof "Di-

rector of the Office of Personnel Management".

On page 162, line 7, strike out "Secretary" and insert in lieu thereof "head of an executive agency".

On page 162, line 9, strike out "title 5" and insert in lieu thereof "this title".

On page 162, line 19, strike out "Secretary of Defense" and insert in lieu thereof "Director of the Office of Personnel Management".

On page 162, strike out line 21 and all that follows through line 10 on page 163 and insert in lieu thereof the following:

"(j) In this section, the term 'student loan' means—

"(1) a loan made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 (20 U.S.C. 1071 et seq.);

"(2) a loan made under part E of such title (20 U.S.C. 1087aa et seq.); and

"(3) a health education assistance loan made or insured under part C of title VII of the Public Health Service Act (42 U.S.C. 294 et seq.) or under part B of title VIII of such Act (42 U.S.C. 297 et seq.).

On page 163, line 13, strike out "373" and insert in lieu thereof "41".

On page 163, line 15, strike out "inserting" and all that follows through the end of that line and insert in lieu thereof "adding at the end thereof".

On page 163, in the matter between lines 16 and 17, strike out "4023." and insert in lieu thereof "4120.".

On page 164, line 2, strike out "4022 and 4023 of title 10" and insert in lieu thereof "4119 and 4120 of the title 5".

On page 164, line 6, strike out "Department" and all that follows through line 8, and insert in lieu thereof "civilian workforce in the Executive branch.".

D'AMATO AMENDMENT NO. 2537

Mr. GORTON (for Mr. D'AMATO) proposed an amendment to the bill S. 2884, supra, as follows:

On page 212, between lines 20 and 21, insert the following section:

SEC. . SENSE OF THE CONGRESS REGARDING THE EFFECTIVE UTILIZATION OF COUNTERNARCOTICS FUNDS AND REPORT REQUIREMENT.

(a) FINDINGS.—The Congress finds that—

(1) Secretary Cheney has declared that combatting illegal drugs is a high priority national security mission for the Department of Defense;

(2) All funds authorized and appropriated for Operations and Maintenance and Military Personnel in the Department of Defense's counternarcotics budget for Fiscal Year 1990 have not been obligated;

(3) If such funds are not obligated during Fiscal Year 1990 such funds will no longer be available for counternarcotics efforts; and

(4) Such funds should not be allowed to lapse.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that the Secretary of Defense and the Chairman of the Joint Chiefs of Staff must continue to emphasize the Department of Defense's commitment to this extremely important mission so that the entire chain of command ensures that funds are fully and effectively utilized so as to maximize the military's contribution to the national counterdrug efforts.

(c) REPORT.—Not later than January 15, 1991, the General Accounting Office shall report to the Armed Services Committees of the Senate and the House of Representatives, the Senate Appropriations Subcommittee on Defense, the House Appropriations Subcommittee on Defense, and the Senate Caucus on International Narcotics Control on the Department of Defense's counternarcotics budget, providing the following—

(1) An analysis of the funds authorized and appropriated in Fiscal Year 1989; how these funds were obligated and expended, including a month by month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year;

(2) An analysis of the funds authorized and appropriated in fiscal year 1990; how these funds were obligated and expended, including a month by month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year;

(3) An analysis of whether there is any information available with respect to the obligations and expenditures from the fiscal year 1989 and fiscal year 1990 counternarcotics budget that suggest a systemic problem in reference to the timely obligation and expenditure of counternarcotics funds;

(4) An analysis of the effectiveness of the role of the Department of Defense Coordinator for Drug Enforcement Policy and Support; whether his dual responsibility as Assistant Secretary of Defense for Reserve Affairs and as Drug Coordinator complicates his ability to coordinate all entities within the Department of Defense in the counternarcotics mission; and the adequacy of personnel levels in his Office to meet his responsibility for coordinating these funds and ensuring that the funds are obligated and expended in a timely manner; and

(5) Recommendations for correcting any problems found in the course of this review.

NUNN (AND OTHERS) AMENDMENT NO. 2538

Mr. LEVIN (for Mr. NUNN, for himself, Mr. BINGAMAN, Mr. LEVIN, Mr. THURMOND, Mr. WARNER, and Mr. MCCAIN) proposed an amendment to the bill S. 2884, supra, as follows:

At the end of title XII insert the following new section:

SEC. 1216. ENHANCING PARTICIPATION OF HISTORICALLY BLACK COLLEGES AND UNIVERSITIES AND MINORITY INSTITUTIONS IN DEFENSE RESEARCH.

Section 1207 of the National Defense Authorization Act of Fiscal Year 1987 (10 U.S.C. 2301 note) is amended—

(1) in subsection (a)—

(A) by inserting "(1)" before "Except";

(B) by redesignating clauses (1), (2), and (3) as clauses (A), (B), and (C), respectively; and

(2) by adding at the end the following new paragraph:

"(2) The Secretary of Defense shall establish a specific goal for the award of prime contracts and subcontracts to historically Black colleges and universities and Minority Institutions in order to increase the participation of such colleges and universities in the program provided for by this section."; and

(3) by striking out subsection (c) and inserting in lieu thereof the following new subsection (c):

"(c) TYPE OF ASSISTANCE.—(1) To attain the goal specified in subsection (A)(1), the Secretary of Defense shall provide technical assistance to the entities referred to in that subsection and, in the case of historically black colleges and universities and minority institutions, shall also provide infrastructure assistance.

"(2) Technical assistance provided under this section shall include information about the program, advice in preparation of proposals, and other such assistance as the Secretary considers appropriate. If the resources of the Department of Defense are inadequate to provide such assistance, the Secretary may enter into contracts with minority private sector entities with experience and expertise in the design, development, and delivery of technical assistance services to eligible individuals, business firms and institutions, defense acquisitions agencies, and defense prime contractors. Department of Defense contracts with the entities referred to in subsection (a)(1) shall be awarded annually, based upon, among other things, the number of minority small business concerns, historically Black colleges and universities, and minority institutions that each such entity brings into the program.

"(3) Infrastructure assistance provided under this section may include programs to:

"(A) establish and enhance undergraduate, graduate, and doctoral programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(B) make Department of Defense personnel available to advise and assist faculty at the school in the performance of defense research and in scientific disciplines critical to the national security functions of the Department of Defense;

"(C) establish partnerships between defense laboratories and historically Black colleges and universities and minority institutions for the purpose of training students in scientific disciplines critical to the national security functions of the Department of Defense;

"(D) award scholarships, fellowships, and the establishment of cooperative work-education programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(E) attract and retain faculty involved in scientific disciplines critical to the national security functions of the Department of Defense;

"(F) equip and renovate laboratories for the performance of defense research;

"(G) expand and equip Reserve Officer Training Corps activities devoted to scientific disciplines critical to the national security functions of the Department of Defense; and

"(H) provide other assistance as the Secretary determines appropriate to strengthen scientific disciplines critical to the national security functions of the Department of Defense or the college infrastructure to support the performance of defense research.

"(4) The Secretary shall, to the maximum extent practical, carry out programs under this section at institutions that agree to bear a substantial portion of the cost associated with the programs.".

DOLE AMENDMENT NO. 2539

Mr. GORTON (for Mr. DOLE) proposed an amendment to the bill, S. 2884, supra, as follows:

On page 261, on line 2, strike out "$61,800,000" and insert "$74,300,000".

On page 261, on line 5, strike out "$1,495,150,000" and insert "$1,482,650,000".

NUNN (AND OTHERS) AMENDMENT NO. 2540

Mr. LEVIN (for Mr. NUNN, for himself, Mr. WARNER, Mr. BINGAMAN, Mr. MCCAIN, and Mr. LEVIN) proposed an amendment to the bill, S. 2884, supra, as follows:

On page 181, between lines 8 and 9, insert the following:

SEC. . MENTOR-PROTÉGÉ PILOT PROGRAM.

(a) ESTABLISHMENT OF PILOT PROGRAM.—The Secretary of Defense shall establish a pilot program to be known as the "Mentor-Protégé Pilot Program".

(b) PURPOSE.—The purpose of the pilot program is to provide incentives for major Department of Defense contractors to furnish disadvantaged small business concerns with assistance designed to enhance the capabilities of disadvantaged small business concerns to perform as subcontractors and suppliers under Department of Defense contracts in order to increase the participation of such business concerns as subcontractors and suppliers in Department of Defense contract business.

(c) PROGRAM PARTICIPANTS.—(1) A business concern meeting the eligibility requirements set out in subsection (d) may enter into agreements under subsection (e) and furnish assistance to disadvantaged small business concerns under the pilot program pursuant to such agreement upon making application to the Secretary of Defense and being approved for participation in the pilot program by the Secretary. A business concern approved for participation pursuant to this paragraph shall be known, for the purposes of the pilot program, as a "mentor firm".

(2) A disadvantaged small business concern may obtain assistance from a mentor firm under the program upon entering into an agreement with the mentor firm as provided in subsection (e). A disadvantaged small business concern receiving such assistance shall be known, for the purposes of the program, as a "protégé firm".

(3) In entering into an agreement pursuant to subsection (e), a mentor firm may rely in good faith on a written representation of a business concern that such business concern is a disadvantaged small business concern. The Small Business Administration shall determine the status of such business concern as a disadvantaged small business concern in the event of a protest regarding the status of such business concern. If the business concern is determined by the Small Business Administration not to be a disadvantaged small business concern, assistance furnished such business concern by the mentor firm after the date of the determination may not be considered assistance furnished under the pilot program.

(4) It is not necessary for a disadvantaged small business concern to obtain the approval of the Secretary of Defense before receiving assistance as a protégé firm under the pilot program. However, the Secretary may disapprove the participation of a disadvantaged small business concern in the program on the basis of criteria which the Secretary shall specify in the regulations prescribed pursuant to subsection (k). If the Secretary disapproves the participation of a disadvantaged small business concern in the program, he shall transmit a written notification of such disapproval to the disadvantaged small business concern and the mentor firm furnishing the assistance. Assistance furnished that disadvantaged small business concern by the mentor firm after the mentor firm receives such notification may not be considered as assistance furnished under the pilot program.

(d) MENTOR FIRM ELIGIBILITY.—A business concern generally eligible for award of contracts by the Department of Defense is eligible to enter into an agreement with a protégé firm under subsection (e) and to furnish assistance under the pilot program pursuant to that agreement if, during the fiscal year preceding the fiscal year in which the business concern enters into the agreement, the total amount of the Department of Defense contracts awarded such business concern and the subcontracts awarded such business concern under Department of Defense contracts was equal to or greater than—

(1) $100,000,000; or

(2) such lesser amount as the Secretary specifies in the regulations prescribed pursuant to subsection (k) for application to any business concern which is a disadvantaged small business concern or, except for the size of that business concern, would be a disadvantaged small business concern.

(e) MENTOR-PROTÉGÉ AGREEMENT.—(1) Before furnishing assistance to a protégé firm under the pilot program, a mentor firm shall enter into a mentor-protégé agreement with the protégé firm regarding the assistance to be furnished by the mentor firm to the protégé firm. The agreement shall include the following:

(A) A program of assistance that is designed to develop the capabilities of the protégé firm to perform as a subcontractor or supplier under Department of Defense contracts.

(B) The period, not to exceed four years, during which the mentor firm is to furnish assistance to the protégé firm under the agreement.

(C) Procedures for the mentor firm or protégé firm to terminate the agreement voluntarily and for the mentor firm to terminate the agreement for cause.

(2) A mentor-protégé agreement under this subsection may cover more than one protégé firm.

(f) FORMS OF ASSISTANCE.—A mentor firm may furnish the following assistance to a protégé firm:

(1) Assistance, by using mentor firm personnel or other means, in—

(A) general business management, including organizational management, financial management, and personnel management, marketing, and overall business planning;

(B) engineering and technical matters such as production, inventory control, and quality assurance; and

(C) any other assistance designed to develop the capabilities referred to in subsection (e)(1)(A).

(2) Noncompetitive award of subcontracts under Department of Defense contracts to the protégé firm.

(3) Payment of progress payments for performance of the protégé firm under such a subcontract in amounts as provided for in the subcontract, but in no event may any such progress payment exceed 100 percent of the costs incurred by the protégé firm for the performance.

(4) Advance payments under such a subcontract.

(5) Loans.

(6) Cash in exchange for an ownership interest in the protégé firm, not to exceed 10 percent of the total ownership interest.

(7) Assistance obtained by the mentor firm for the protégé firm from one or more of the small business development centers established pursuant to section 21 of the Small Business Act (15 U.S.C. 648), acting to the maximum extent practicable in cooperation with a historically Black college or university or a minority institution of higher education.

(g) INCENTIVES FOR MENTOR FIRMS.—(1) The Secretary of Defense shall provide for the reimbursement of a mentor firm for the total amount of any progress payment or advance payment made under the pilot program by the mentor firm to a protégé firm in connection with a Department of Defense contract awarded the mentor firm.

(2) The Secretary of Defense shall provide for the reimbursement of a mentor firm for the costs of furnishing assistance referred to in paragraphs (1) and (7) of subsection (f) to a protégé firm. The Secretary shall ensure that payment of reimbursements under this paragraph is provided for in a Department of Defense contract awarded to the mentor firm or in another agreement entered into by the Secretary and the mentor firm. The contract or other agreement shall specify the maximum amount of the reimbursement that may be made. The Secretary and the mentor firm may provide in the contract or other agreement for allocation of the costs to Department of Defense cost-reimbursement contracts awarded the mentor firm.

(3)(A) Any costs incurred by a mentor firm in furnishing assistance to a protégé firm that are not reimbursed pursuant to paragraph (2) shall be counted in the amount for which the mentor firm receives credit for purposes of determining whether the mentor firm attains a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract.

(B) The amount of the credit given a mentor firm for any such unreimbursed costs shall be equal to—

(i) four times the total amount of such costs attributable to assistant described in subsection (f)(7);

(ii) three times the total amount of such costs attributable to assistance furnished by the mentor firm's employees; and

(iii) two times the total amount of any other such costs.

(C) The amount of the credit given for any such unreimbursed costs may not exceed a maximum amount which shall be specified in the contract provision or agreement referred to in paragraph (2).

(4) The Secretary of Defense shall ensure that each Department of Defense contract awarded a mentor firm includes a provision for payment of an incentive or award fee to the mentor firm if the mentor firm exceeds the subcontracting participation goal, if any, applicable to such mentor firm under the contract.

(5) A mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for each subcontract for a product or service awarded under such contract by a mentor firm to a business concern that, except for its size, would be a small business concern owned and controlled by socially and economically disadvantaged individuals, but only if—

(A) the size of such business concern is not more than two times the maximum size specified by the Administrator of the Small Business Administration for purposes of determining whether a business concern furnishing such product or service is a small business concern; and

(B) the business concern formerly had a mentor-protégé agreement with such mentor firm that was not terminated for cause.

(6) Notwithstanding subsection (j), a mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for any subcontract that the mentor firm awards under that contract to a business concern referred to in paragraph (5) within 9 years after the date on which the mentor firm and such business concern entered into the mentor-protégé agreement referred to in clause (B) of such paragraph.

(h) NONAFFILIATION TREATMENT.—For purposes of the Small Business Act, a protégé firm may not be considered an affiliate of a mentor firm solely on the basis that the protégé firm is receiving assistance referred to in subsection (f) from such mentor firm under the pilot program.

(i) PARTICIPATION IN PILOT PROGRAM NOT TO BE A CONDITION FOR AWARD OF A CONTRACT OR SUBCONTRACT.—A mentor firm may not require a business concern to enter into an agreement with the mentor firm pursuant to subsection (e) as a condition for being awarded a contract by the mentor firm, including a subcontract under a contract awarded to the mentor firm.

(j) DURATION OF PILOT PROGRAM.—The Secretary of Defense shall conduct the Mentor-Protégé Pilot Program during the period beginning on October 1, 1991, and ending on September 30, 1995.

(k) REGULATIONS.—The Secretary of Defense shall prescribe regulations to carry out the pilot program. The Secretary shall publish the proposed regulations not later than the earlier of April 1, 1991, or the date 180 days after the date of the enactment of this Act. The Secretary shall promulgate the final regulations not later than June 1, 1991, or the date 270 after the date of the enactment of this Act.

(l) DEFINITIONS.—In this section:

(1) The term "small business concern" means a business concern that meets the requirements of section 3(a) of the Small Business Act (15 U.S.C. 632(a) and the regulations promulgated pursuant thereto.

(2) The term "disadvantaged small business concern" means a small business concern owned and controlled by socially and economically disadvantaged individuals.

(3) The term "small business concern owned and controlled by socially and economically disadvantaged individuals" has the meaning given such term in section 8(d)(3)(C) of the Small Business Act (15 U.S.C. 637(d)(3)(C)).

(4) The term "historically Black college and university" means any of the historically Black colleges and universities referred to in section 1207(a)(2) of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note).

(5) The term "minority institution of higher education" means an institution of higher education with a student body that reflects the composition specified in section 312(b) (3), (4), and (5) of the Higher Education Act of 1965 (20 U.S.C. 1058(b) (3), (4), and (5)).

(6) The term "subcontracting participation goal", with respect to a Department of Defense contract, means a goal for the extent of the participation by disadvantaged small business concerns in the subcontracts awarded under such contract, as established pursuant to section 1207 of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note) and section 8(d) of the Small Business Act (15 U.S.C. 637(d)).

PELL AMENDMENT NO. 2541

Mr. LEVIN (for Mr. PELL) proposed an amendment to the bill S. 2884, supra, as follows:

On page 269, after line 25, add the following:

Newport Naval Underwater Systems Center, $13,700,000.

COATS AMENDMENT NO. 2542

Mr. GORTON (for Mr. COATS) proposed an amendment to the bill S. 2884, supra, as follows:

At an appropriate place in the bill, insert the following new section:

SEC. . AUTHORITY TO REPLACE OR RESTORE LOST OR DAMAGED PROPERTY.

(a) AUTHORITY.—In order to assist the entities described in this section to continue to provide services to the United States, The Secretary of the Army may replace or restore property of a contractor of the United States which was lost or damaged during operation Just Cause begun on December 22, 1989, to the extent—

(1) such property was located on a military installation in Panama pursuant to the requirements of the contract and such military installation was used or occupied by United States Armed Forces prior to December 22, 1989;

(2) such damage was caused by United States Armed Forces; and

(3) such loss or damage was not caused in whole or in part by the negligent or wrongful act of such contractor or an agent or employee thereof.

(b) LIMITATION.—The Secretary of the Army may replace or restore property under this section only if—

(1) a request for such action is presented to the Secretary in writing within two years after such property was lost or damaged;

(2) the Secretary determines that such request is substantiated; and

(3) the Secretary determines that the contractor has made every reasonable effort to obtain compensation, replacement, or restoration of such property through other means.

SIMON (AND BINGAMAN) AMENDMENT NO. 2543

Mr. LEVIN (for Mr. SIMON, for himself and Mr. BINGAMAN) proposed an amendment to the bill S. 2884, supra, as follows:

On page 179, between lines 3 and 4, insert the following:

"(d) In entering into education partnership agreements with public school systems under this section, each director of a defense laboratory shall give a priority to providing assistance to educational institutions serving women, members of minority groups, and other groups of individuals who traditionally are involved in the engineering and science professions in disproportionately low numbers.

On page 181, between lines 8 and 9, insert the following:

(c) DEPARTMENT OF ENERGY PROGRAMS.—The Secretary of Energy may establish programs and award grants for the purpose of enhancing the mathematics, science, and engineering education of students in elementary and secondary schools and institutions of higher education.

HATCH AMENDMENT NO. 2544

Mr. GORTON (for Mr. HATCH) proposed an amendment to the bill S. 2884, supra, as follows:

On page 212, between lines 20 and 21, insert the following new section:

SEC. 1103. STUDY OF UTILITY OF OH-58D HELICOPTER IN DETECTION OF CROSS-BORDER INTRUSIONS BY DRUG SMUGGLERS

(a) STUDY REQUIRED.—The Secretary of Defense shall conduct a study on the feasibility and effectiveness of utilizing OH-58D Scout helicopters for detecting, monitoring, and conducting surveillance of the ground movements of drug smugglers along the southwest border of the United States. In carrying out such study, the Secretary shall consider in particular the following matters:

(1) The suitability of the OH-58D helicopter for performing the missions described in the first sentence.

(2) The feasibility of having personnel of the Army National Guard operate and maintain OH-58D helicopters when such personnel are not in Federal service.

(3) The desirability of having the Army pay for operation and maintenance expenses in connection with the OH-58D helicopters pursuant to a plan developed by the United States Customs Service or having the Secretary of Defense pay such expenses out of funds appropriated for National Guard counterdrug activities pursuant to a plan developed by the Governors of Southwestern States.

(4) The feasibility of coordinating National Guard activities and civilian law enforcement activities though the command, control and intelligence center of the United States Customs Service at Riverside, California.

(b) INTERAGENCY COORDINATION.—The Secretary shall carry out the study required by subsection (a) in consultation with the Commissioner of the United States Customs Service.

(c) SUBMISSION OF REPORT.—The Secretary shall submit to the Committee on Armed Services of the Senate and the House of Representatives a report containing the results of the study required by subsection (a) not more than 180 days after the date of the enactment of this Act. The Secretary shall include in the report the conclusions of the Secretary based on the study together with such comments and recommendation as the Secretary considers appropriate.

MILKULSKI AMENDMENT NO. 2545

Mr. LEVIN (for Ms. MIKULSKI) proposed an amendment to the bill S. 2884, supra, as follows:

On page 302, line 25, strike out $124,530,000" and insert in lieu thereof "$131,830,000".

DOLE AMENDMENT NO. 2546

Mr. GORTON (for Mr. DOLE) proposed an amendment to the bill S. 2884, supra, as follows:

FINDINGS.—The Senate makes the following findings:

(1) The United States and the Soviet Union are engaged in the Strategic Arms Reduction Talks (START).

(2) In the Joint Statement on the Treaty on Strategic Offensive Arms signed in June 1990, the two sides reaffirmed their determination to have the treaty completed and ready for signature by the end of this year.

(3) Under the provisions of a START Treaty, both sides will carry out significant reductions in strategic offensive arms.

(4) In the Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability, the United States and the Soviet Union agreed to pursue new talks on strategic offensive arms, and on the relationship between strategic offensive and defensive arms.

(5) The objectives of these negotiations will be to reduce further the risk of outbreak of war, particularly nuclear war, and to ensure strategic stability, transparency and predictability through further stabilizing reductions in the strategic arsenals of both countries.

(6) The President's effort to negotiate such agreements is dependent upon the maintenance of a vigorous research and development and modernization program as required for a prudent defense posture.

(7) The Soviet Union has maintained a robust strategic modernization program throughout the course of the START negotiations which continues today.

It is the sense of the Senate that—

(1) The Senate fully supports United States efforts to enhance strategic stability.

(2) The United States should pursue stabilizing strategic arms reduction agreements while maintaining a vigorous research and development and modernization program for United States strategic forces.

KERRY (AND OTHERS) AMENDMENT NO. 2547

Mr. KERRY (for himself, Mr. SIMON, and Mr. BUMPERS) proposed an amendment to the bill S. 2884, supra, as follows:

On page 16, between lines 14 and 15, insert the following new section:

SEC. 225. LIMITATION ON FUNDS FOR THE KINETIC ENERGY ASAT PROGRAM

Of the amounts appropriated pursuant to section 201, not more than $77,000,000 may be obligated for research, development, test, and evaluation in connection with the kinetic energy anti-satellite (ASAT) program.

CRANSTON (AND OTHERS) AMENDMENT NO. 2548

Mr. CRANSTON (for himself, Mr. KENNEDY, Mr. PELL, Mr. SANFORD, and Mr. SIMON) proposed an amendment to the bill S. 2884, supra, as follows:

At the end of title XI, add the following new section:

SEC. 1103. ANDEAN ANTI-DRUG EFFORTS.

(a) The Congress finds that—

(1) support for democratic process and civilian governance in Andean countries of Peru, Bolivia, and Columbia, the first two of which have only recently emerged from periods of military rule, is a necessary precondition for the successful fight against narcotics production and traffic and long-term stability in that region;

(2) separation of military and civilian law enforcement functions has historically been a critical element in democracies around the world, including the United States;

(3) there is a need to determine whether existing U.S. policies unduly emphasize assistance to military entities rather than civilian law enforcement entities in the Andean antidrug effort and whether such policies might tend to undermine the dual long-term policy goals of the United States of stopping the traffic of drugs at their sources and the preservation of civilian control over the newly established democracies of this region; and

(4) there is a need to assess the impact that United States assistance in the Andean anti-drug effort will have on reducing drug activity and supporting democratic processes in this region.

(b)(1) Not later than 90 days after the date of enactment of this Act, the Secretary of State and the Secretary of Defense shall, in consultation with the Director of the Office of National Drug Control Policy, jointly submit a report to the Senate and the House of Representatives dealing with current United States policies, anti-narcotics enforcement activities and associated training programs in the Andean region.

(2) Such report shall also include an analysis of the impact of the Andean countries' militaries' role in counternarcotics enforcement on democratic institutions in the region and how civilian institutions might be strengthened in order to assure the successful pursuit of antinarcotics strategy.

(3) Such report shall contain specific legislative recommendations as may be necessary to clarify and streamline United States assistance activities in order to avoid unnecessary duplications and contradictions in meeting United States policy goals in the Andean region.

PRYOR AMENDMENT NO. 2549

Mr. PRYOR proposed an amendment to the bill S. 2884, supra, as follows:

On page 7, between lines 6 and 7, insert the following:

SEC. 113. PROCUREMENT OF THE AIRBORNE SELF PROTECTION JAMMER.

(a) PROHIBITION ON USE OF FUNDS.—Funds appropriated pursuant to this Act may not be obligated or expended for the procurement of the Airborne Self Protection Jammer or of any component or spare part for the Air-borne Self Protection Jammer.

(b) BUDGET LINE ITEM REQUIRED.—If the budget submitted to Congress pursuant to section 1105(a) of title 31, United States Code, for fiscal year 1992 includes funds for the Airborne Self Protection Jammer program, the President shall specify in such budget the amount included for such program.

(c) LIMITATION RELATING TO MILESTONE III DECISIONS.—A decision to proceed with low-rate production of a second or subsequent lot of the Airborne Self Protection Jammer, or to proceed beyond low-rate production of the Airborne Self Protection Jammer, may not be made until the Director of Operational Test and Evaluation has certified to the Committees on Armed Services of the Senate and the House of Representatives that the Airborne Self Protection Jammer—

(1) has undergone thorough and effective operational testing; and

(2) has met or exceeded all operational test criteria.

BUMPERS (AND OTHERS) AMENDMENT NO. 2550

Mr. BUMPERS (for himself, Mr. FORD, Mr. CRANSTON, Mr. MCCONNELL, Mr. LAUNTENBERG, Mr. SHELBY, Mr. PRYOR, and Mr. HOLLINGS) proposed an amendment, which was subsequently modified, to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

CLOSURES AND REALIGNMENTS OF MILITARY INSTALLATIONS

(a) FORCE-STRUCTURE PLAN AND TERMINATION OF OPERATIONS INSTALLATIONS OUTSIDE THE UNITED STATES.—(1) The Secretary of Defense shall formulate a force-structure plan for the Armed Forces of the United States based on an assessment by the Secretary of the probable threats to the national security in the five-year period ending September 30, 1996, and of the anticipated levels of funding that will be available for national defense purposes during such period. Such plan shall include, without any reference directly or indirectly to military installations inside the United States that may be closed or realigned under such plan—

(A) a description of such assessment;

(B) a description (i) of the anticipated force structure during and at the end of such period for each military department (with specifications of the number and type of units in the active and reserve forces of each such department), and (ii) of the units that will need to be forward based (with a justification thereof) during and at the end of such period;

(C) a description of the anticipated implementation of such force-structure plan; and

(D) the plan described in paragraph (2).

(2) The Secretary shall formulate and implement a plan for reducing and terminating military operations by the United States at installations outside the United States.

(b) REPORTING REQUIREMENT.—(1) As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing—

(A) the force-structure plan formulated pursuant to subsection (a)(1);

(B) a description of the actions carried out and to be carried out under subsection (a)(2), including a list of the installations outside the United States at which military operations by the United States will be reduced or terminated and an estimate of the extent of each such reduction;

(C) a legislative proposal containing (i) a fair process, as described in paragraph (2)(A), by which military installations inside the United States could be selected for closure and realignment as part of the implementation of the force-structure plan referred to in subsection (a)(1), and (ii) the policy referred to in paragraph (2)(B); and

(D) a proposal for assistance (including worker retraining and economic conversion assistance) for individuals and communities that will be adversely affected economically by the closure or realignment of military installations inside the United States under

such force-structure plan, including recommendations for any legislative action that the Secretary determines is needed to provide such assistance.

(2) The legislative proposal referred to in paragraph (1)(C) shall provide—

(A) administrative procedures and a methodology which result in a fair and non-partisan process for selecting military installations inside the United States for closure or realignment solely on the basis of objective criteria designed to achieve effectively and efficiently the military objectives of the Department of Defense contained in the force-structure plan transmitted under paragraph (1). The Secretary is urged to consult with Congress on a bipartisan basis as he develops his legislative proposal.

(B) A policy ensuring the prompt environmental restoration of all property that will become excess to the needs of the Department of Defense as the result of a military installation inside the United States being selected for closure or realignment.

(3) The proposal for economic assistance referred to in paragraph (1)(D), in addition to providing for economic assistance generally to individuals and communities adversely affected economically by the closure or realignment of a military installation, shall provide for appropriate economic assistance to State and local governments that made expenditures in reliance on, and in support of, Federal plans to establish or continue to operate a military installation that was not opened or was selected for closure.

(c) MILITARY INSTALLATIONS INSIDE THE UNITED STATES.—(1) None of the funds available to the Department of Defense may, except as provided in paragraph (4), be expended (whether obligated before the date of enactment of this Act or not) to—

(A) identify, through any transmittal to the Congress or through any other public announcement or notification, any military installation inside the United States as an installation to be closed or realigned or as an installation under consideration for closure or realignment; or

(B) close or realign any military installation inside the United States,

until specifically authorized by law during the 102nd Congress or until September 30, 1991, whichever occurs first.

(2) In providing for the repair and maintenance of facilities at military installations inside the United States during fiscal year 1991, the Secretary of Defense and the Secretaries of the military department shall, except as provided in paragraph (4), expend an amount during such fiscal year, with funds appropriated for operation and maintenance pursuant to authorizations made by this Act and with other funds that may be available for such purpose for such fiscal year, for repair and maintenance at each such installation equal to not less than 50 percent of the average annual amount expended for repair and maintenance of facilities at the installation concerned during fiscal years 1985 through 1989.

(3) Paragraphs (1), (2), and (3) shall not apply to—

(A) closures and realignments carried out under title II of Public Law 100-526; and

(B) closures and realignments to which section 2687 of title 10, United States Code, is not applicable.

(d) PROHIBITION AND REMEDIAL ACTION.—The provisions transmitted to the Congress by the Secretary of Defense, date January 29, 1990, identifying certain military installations as candidates for closure, and the provisions of any other proposal (whether transmitted to the Congress or not) developed during the year ending on the date of the enactment of this Act with respect to identifying military installations for closure, shall not be used as the basis for any decision concerning the assignment of mission, personnel, or resources to any installation identified in such provisions.

(2) The Secretary of Defense—

(A) shall review all actions taken during the year ending on the date of the enactment of this Act with regard to any installation identified in any provision referred to in paragraph (1); and

(B) shall take such steps as may be necessary to remedy the damage to such installation that has resulted from any such action.

(e) DEFINITIONS.—(1) For purposes of this section—

(A) the term "military installation" means a base, camp, post, station, yard, center, homeport facility or any ship, or any other activity under the jurisdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility, except that such term shall not include any facility used primarily for civil works, rivers and harbor projects, or flood control projects;

(B) the term "United States" means the several States and the District of Columbia; and

(C) the term "realignment" has the meaning given such term by section 2687(e)(3) of title 10, United States Code.

(2) Section 2687 of title 10, United States Code, is amended—

(A) by striking out paragraph (2) of subsection (a) and inserting in lieu thereof the following:

"(2) any realignment with respect to any military installation referred to in paragraph (1) that would result, during any two-year period, in a reduction of more than 1,000 in, or by more than 50 percent of, the number of civilian personnel authorized to be employed at such military installation at the beginning of the two-year period concerned; or"; and

(B) in subsection (e)(3), by striking out "includes" and inserting in lieu thereof "means".

(3) For the purpose of making determinations with respect to closures and realignments carried out on or after the date of the enactment of this Act, the amendment made by paragraph (2)(A) shall be applied to include reductions of civilian personnel occurring during any two-year period beginning after the date that occurred two years before the date of the enactment of this Act.

(f) CLARIFYING AMENDMENT.—Section 2687 (e)(1) of title 10, United States Code, is amended by striking out "under the jurisdiction of the Secretary of a military department" and inserting in lieu thereof "under the jurisdiction of a department, agency, or other instrumentality of the Department of Defense, including a leased facility,".

MOYNIHAN (AND SPECTER) AMENDMENT NO. 2551

Mr. MOYNIHAN (for himself and Mr. SPECTER) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place insert—

Section 1105(a) of Title 31 of the United States Code is amended to add at the end thereof—

(27) a separate, unclassified statement of the aggregate amount of budget outlays for the prior fiscal year for national and tactical intelligence activities. This figure shall include, without limitation, outlays for activities carried out under the Department of Defense budget to collect, analyze, produce, disseminate or support the collection of intelligence.

GLENN AMENDMENT NO. 2552

Mr. GLENN proposed an amendment to the bill S. 2884, supra, as follows:

On page 321, beginning on line 4, strike out all down through line 19 on page 323.

Redesignate sections 2811 through 2814 as sections 2809 through 2812, respectively.

THURMOND (AND OTHERS) AMENDMENT NO. 2553

Mr. THURMOND (for himself, Mr. LEVIN, Mr. SIMPSON, Mr. GRASSLEY, Mr. MACK, Mr. HELMS, Mr. DOMENICI, Mr. BUMPERS, Mr. DANFORTH, Mr. EXON, Mr. BURNS, Mr. HATFIELD, Mr. LUGAR, Mr. CONRAD, Mr. MCCONNELL, Mr. SIMON, Mr. D'AMATO, Mr. GRAHAM, Mr. NICKLES, Mr. PRYOR, Mr. PRESSLER, Mr. SPECTER, Mr. HEINZ, Mr. FOWLER, Mr. COATS, Mr. STEVENS, Mr. MURKOWSKI, Mr. JEFFORDS, Mr. WILSON, Mr. MCCAIN, Mr. KASTEN, Mr. RIEGLE, Mr. DODD, Mr. LAUTENBERG, Mr. DURENBERGER, Mr. LEAHY, Mr. BAUCUS, Mr. BENTSEN, Mr. DIXON, Mr. BURDICK, Mr. FORD, Mr. BRYAN, Mr. HEFLIN, Mr. MOYNIHAN, Mr. SASSER, Mr. ROTH, Mr. DOLE, Mr. KERREY, Mr. CRANSTON, Mr. DASCHLE, Mr. REID, Mr. ROCKEFELLER, and Mr. DECONCINI) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place, add the following:

That chapter 11 of title 18, United States Code, is amended by—

(1) inserting between sections 219 and 223, the following new section:

"§ 220. Contingency fees in lobbying

"(a)(1) It shall be unlawful for any person to make, with intent to influence, any oral or written communication on behalf of any other person other than the United States, to any department, agency, court, House of Congress, or commission of the United States, for compensation if such compensation has knowlingly been made dependent—

"(A) upon any action of Congress, including but not limited to actions of either the House of Representatives or the Senate, or any committee or member thereof, or the passage or defeat of any proposed legislation;

"(B) upon the securing of an award, or upon the denial of an award, of a contract or grant by establishment of the Federal Government; or

"(C) upon the securing, or upon the denial, of any Federal financial assistance or any other Federal contract or grant.

"(2) The provisions of paragraph (1) shall not apply in any case involving the collection of any amount owed on a debt or on a contract claim owed to a person by the Federal Government.

"(b) Any person who violates the provisions of this section shall be fined not more

than $50,000 or imprisoned not more than 2 years, or both.

"(c) The Attorney General may bring a civil action in any United States district court, on behalf of the United States, against any person who engages in conduct prohibited by this section in lieu of or in addition to an action taken pursuant to subsection (b), and, upon proof of such conduct by a preponderance of the evidence, may recover twice the amount of any proceeds obtained by that person due to such conduct. Such civil action shall be barred unless the action is commenced within six years after the later of (1) the date on which the prohibited conduct occurred, or (2) the date on which the United States became or reasonably should have become aware that the prohibited conduct had occurred."; and

(2) amending the table of sections by striking out the item between the item relating to section 219 and the item relating to section 224 and inserting in lieu thereof the following:

"220. Contingency fees in lobbying.".

SEC. 2. This Act and the amendments made by this Act shall become effective on the date of enactment of this Act and shall apply to any contract entered into on or after such date of enactment.

BINGAMAN (AND OTHERS) AMENDMENT NO. 2554

Mr. GORE (for Mr. BINGAMAN, for himself, Mr. GORE, Mr. MCCAIN, Mr. PELL, and Mr. HELMS) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Missile Technology Control Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the global spread of weapons of mass destruction, accompanied by the proliferation of sophisticated missile delivery systems and missile technology, poses a serious threat to stability and peace in many regions;

(2) the Missile Technology Control Regime (MTCR) was established in 1987 to restrict such proliferation;

(3) notwithstanding the existence of the MTCR, companies situated in countries which are adherents to the MTCR have transferred, in violation of the principles of that agreement, missile equipment and technology to nonadherents;

(4) the MTCR is further weakened as it does not include the Soviet Union, China, Agrentina, North Korea, Brazil, and other countries, which have transferred missiles and missile technology to countries without this capability;

(5) missile proliferation could be better controlled if MTCR adherents shared a common interpretation of the MTCR principles and strictly enforced its provisions;

(6) the spread of missiles can be effectively restricted only if all countries involved in the transfer of such missiles and technology agree to restrict such transfers;

(7) coordination and cooperation between the agencies charged with responsibility for carrying out United States policy on missile control is essential; and

(8) greater consultation between the President and the Congress is needed to ensure that Congress is being kept fully informed about missile proliferation and development, and ongoing measures to halt missile proliferation.

SEC. 3 PURPOSE.

It is the purpose of this Act—

(1) to restrict the proliferation of missiles and missile equipment and technology;

(2) to encourage greater international adherence to the Missile Technology Control Regime (MTCR) of 1987;

(3) to strengthen the MTCR through increased cooperation among adherents to strengthen coordination of export controls;

(4) to seek further bilateral and multilateral agreements which complement the MTCR;

(5) to encourage countries without missiles to forego the development or acquisition of these weapons; and

(6) to require stricter enforcement procedures and improved cooperation among the U.S. agencies responsible for controlling missile and missile technology exports.

SEC. 4. AMENDMENT TO THE ARMS EXPORT CONTROL ACT.

The Arms Export Control Act is amended by inserting after chapter 6 (22 U.S.C. 2795b. et seq.) the following new chapter:

"CHAPTER 7—CONTROL OF MISSILES AND MISSILE EQUIPMENT AND TECHNOLOGY.

"SEC. 71. POLICY.—It is the policy of the United States to improve the control of and reduce the proliferation of missiles and missile equipment and technology by taking all appropriate measures—

"(1) to improve enforcement and seek a common and broader interpretation among Missile Technology Control Regime (MTCR) members of MTCR principles;

"(2) to increase the number of countries that adhere to the MTCR;

"(3) to explore with nations that do not adhere to the MTCR and which export missiles and missile equipment and technology the negotiation of bilateral and multilateral agreements consistent with the principles of the MTCR or which, at a minimum, do not undercut the MTCR;

"(4) to promote the international review of measures and development of common standards to reduce the proliferation of missiles and missile equipment and technology; and

"(5) to seek binding multilateral agreements prohibiting the global spread of missiles that are subject to MTCR guidelines.

"SEC. 72. DENIAL OF THE TRANSFER OF MISSILE EQUIPMENT AND TECHNOLOGY BY UNITED STATES PERSONS.—(a) SANCTION.—If the President determines that a United States person has transferred, or conspired to transfer or facilitated the transfer in violation of the provisions of section 38 of the Arms Export Control Act (22 U.S.C. 2778), section 5 or 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2404, 2405), or any regulations issued under any such provisions of

(1) MTCR category II missile equipment and technology then the President shall deny to such United States person for a period of two years

(A) U.S. government contracts relating to missile equipment and technology, and

(B) licenses for the transfer of missile equipment and technology controlled pursuant to this Act.

(2) MTCR category I missile equipment and technology, then the President shall deny to such United States person for a minimum of two years.

(A) all U.S. government contracts, and

(B) all export licenses and agreements for items on the United States Munitions List.

(b) DISCRETIONARY SANCTIONS.—In the case of any determination made pursuant to subsection (a), the President may pursue any sanctions listed in Section 38(c) of this Act.

(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

(1) the product or service is essential to the national security of the United States; or

(2) such person is a sole supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments;

SEC. 73.—TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY BY FOREIGN PERSONS

(a) SANCTIONS.—If the President determines that a foreign person has transferred, after the date of enactment, MTCR missile equipment or technology that would be, if it were United States-origin equipment or technology, subject to the jurisdiction of the United States under this Act,

(1) within category II of the MTCR annex or the President has made a determination under section 11B(b)(1) of the Export Administration Act of 1979, as amended, then the President shall deny, for a period of two years

(A) U.S. government contracts relating to missile equipment and technology, and

(B) licenses for the transfer to such foreign person of missile equipment and technology controlled pursuant to this Act.

(2) within category I of the MTCR annex, then the President shall deny for a period of not less than two years

(A) all U.S. government contracts with such foreign person, and

(B) licenses for the transfer to such foreign person of all items on the U.S. Munitions List.

(b) DISCRETIONARY SANCTIONS.—If the President determines that a foreign person has transferred missile equipment and technology he may impose any sanction described in Section 11A(b) of the Export Administration Act of 1979, as amended.

(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

(1) in the case of an item the transfer of which has been authorized by an MTCR adherent, after consultation with the licensing government, the transfer did not violate the principles of the MTCR guidelines;

(2) the product or service is essential to the national security of the United States;

(3) such person is a sole source supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments; or

(4) the foreign person has been appropriately sanctioned by its national government.

"SEC. 74. PROHIBITION ON SATELLITE LICENSING.—The United States Government shall not, through the issuance of licenses under this Act, assist any missile program of the People's Republic of China, directly or

indirectly, and shall not, through the issuance of licenses under this Act, permit the export or the shipment of United States satellites for launch on Chinese space launch vehicles and shall revoke any previously issued licenses granted for the export of such satellites unless the President certifies to the Congress that, in the one year prior to the certification, China has not supplied missiles, missile equipment and technology, or chemical or biological weapons, including precursors intended for use in such weapons, to Iran, Iraq, Syria, Libya, or any non-MTCR adherent, and has provided reasonable assurances that no future sales of missiles, missile equipment and technology or chemical or biological weapons to such countries are planned.

"SEC. 75. REPORT ON MISSILE PROLIFERATION.—(a) CONTENTS OF REPORT.—Not later than 90 days after the date of enactment of this Act, and every 180 days thereafter, the Secretary of State shall submit to the Congress a report on international transfers of aircraft which the Secretary has reason to believe may be intended to be used for the delivery of nuclear, biological, or chemical weapons (hereafter referred to as "NBC capable aircraft") and international transfers of missiles and missile equipment and technology to Syria, Iraq, Libya, and Iran, and any other nation seeking to acquire such equipment or technology in violation of MTCR principles, other than those listed in subsection (d) that shall include—

"(1) the status of missile and aircraft development programs in such nations, including efforts by those nations to acquire missiles and missile equipment and technology and NBC capable aircraft and an assessment of the present and future capability of those countries to produce and utilize such weapons;

"(2) a description of particular significant assistance provided, after the date of enactment, to such

"(3) a list of companies which continue to provide missile equipment and technology to such nations, as of the date of the report;

"(4) a description of diplomatic measures that the United States has taken or that other MTCR members have made to the United States with respect to activities of private firms and countries suspected of violating the MTCR;

"(5) an analysis of the effectiveness of the regulatory and enforcement regimes of the U.S. and its MTCR partners to control the export of missile and missile technology; and

"(6) a determination as to whether transfers of missile equipment and technology by any country pose a significant threat to the national security of the United States.

"(b) CLASSIFICATION.—The President shall make every effort to submit all of the information required by subsection (a) in unclassified form. Whenever the President submits any such information in classified form, he shall submit such classified information in an addendum and shall also submit simultaneously a detailed summary, in unclassified form, of such classified information.

"(c) CONSTRUCTION.—Nothing in this section—

"(1) requires the disclosure of information in violation of Senate Resolution 400 of the Ninety-fourth Congress or otherwise alters, modifies, or supersedes any of the authorities contained therein; or

"(2) shall be construed as requiring the President to disclose any information which, in his judgment, would seriously—

"(A) jeopardize the national security of the United States;

"(B) undermine existing and effective efforts to meet the policy objectives outlined in section 71 of this Act; or

"(C) compromise sensitive intelligence operations, with resulting grave damage to the national security interests of the United States.

"(d) EXCLUSIONS.—Australia, Belgium, Canada, Denmark, Federal Republic of Germany, France, Greece, Iceland, Israel, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey and the United Kingdom.

"SEC. 77. DEFINITIONS.—For purposes of this chapter—

"(1) the term 'Missile Technology Control Regime' or 'MTCR' means the policy statement, between the United States, the United Kingdom, the Federal Republic of Germany, France, Italy, Canada, and Japan, announced on April 16, 1987, to restrict sensitive missile-relevant transfers based on annex of missile equipment and technology, and any subsequent amendments;

"(2) the terms 'missile' and 'missile equipment and technology' means those items listed in the MTCR Equipment and Technology Annex, as amended;

"(3) the term 'person' includes the singular and plural and any individual, partnership, corporation, or other form of association; and

"(4) the term 'foreign person' means any non-United States person.

SEC. 5. TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY TO COUNTRIES THAT TRANSFER OR RECEIVE MISSILE EQUIPMENT AND TECHNOLOGY.

(a) SANCTIONS.—If the President determines that as of the date of enactment of this act, or at any time thereafter, a MTCR non-adherent, authorizes the transfer of, receives, or attempts to acquire missiles or missile equipment and technology that contributes materially to the development of missile systems capable of delivering at least a 500 kg payload to a range of at least 300 km, then the President shall deny all export licenses for the transfer of—

(1) all items on the U.S. Munitions List, and

(2) missile equipment and missile technology controlled pursuant to the Export Administration Act of 1979, as amended.

(b) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions pursuant to subsection (a) if the President certifies to Congress that—

(1) to do so would be in the national security interests of the United States; or

(2) the transfer in question was licensed by a government adhering to the MTCR; or

(3) the transfer in question is for an item for which the President has received reliable assurances that that item is intended for civilian end use.

(c) REMOVAL OF SANCTIONS.—The President may remove the sanctions imposed pursuant to subsection (a) if the President determines that the country under sanction has suspended attempts to acquire, transfer or receive missile equipment and missile technology for a period of at least one year.

DIXON (AND OTHERS) AMENDMENT NO. 2555

Mr. DIXON (for himself, Mr. BINGAMAN, Mr. GLENN, Mr. DOLE, Ms. MIKULSKI, and Mrs. KASSEBAUM) proposed an amendment to the bill S. 2884, supra, as follows:

On page 16, line 23, strike out "$22,110,045,000" and insert in lieu thereof "$22,068,345,000".

On page 16, line 24, strike out "$23,359,084,000" and insert in lieu thereof "$23,343,784,000".

On page 17, line 1, strike out "$20,856,814,000" and insert in lieu thereof "$20,845,714,000".

On page 17, line 2, strike out "$8,373,663,000" and insert in lieu thereof "$8,372,263,000".

On page 39, line 21, strike out "$373,280" and insert in lieu thereof "$369,641".

On page 39, line 22, strike out "$329,217" and insert in lieu thereof "$327,897".

On page 39, line 23, strike out "$247,420" and insert in lieu thereof "$246,443".

On page 39, line 25, strike out "$98,717" and insert in lieu thereof "$98,603".

On page 91, between lines 5 and 6, insert the following new section:

SEC. 805. PROVISION OF PAP SMEARS AND MAMMOGRAMS UNDER CHAMPUS.

(a) CARE AUTHORIZED.—Section 1079(a)(2) of title 10, United States Code, is amended by inserting before the semicolon the following: ", except that pap smears and mammograms may be provided on a diagnostic or preventive basis".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1990, and shall apply to the provision of pap smears and mammograms under section 1079 or 1086 of title 10, United States Code, on or after that date.

DIXON AMENDMENT NO. 2556

Mr. DIXON proposed an amendment to the bill S. 2884, supra, as follows:

On page 223, after line 24, insert the following new section:

SEC. 1216. SENSE OF CONGRESS REGARDING THE CLOSURE OF UNITED STATES MILITARY INSTALLATIONS OUTSIDE THE UNITED STATES

(a) FINDINGS.—Congress makes the following findings:

(1) It was reported in the July 28, 1990, European edition of the Stars and Stripes publication that General John R. Galvin, Commander-in-Chief of the United States European Command, has submitted to the Secretary of Defense a list of United States military installations located outside the United States that the General recommends be closed.

(2) During consideration of legislative proposals authorizing appropriations for the Department of Defense for fiscal year 1991 by the Committee on Armed Services of the Senate, General Galvin indicated he would announce a list of 100 United States military installations outside the United States he recommends for closure.

(3) Many members of Congress strongly believe that United States military installations outside the United States should be closed in lieu of closing military installations located in the United States.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of the Congress that—

(1) the Secretary of Defense should make public any recommendations made to the Secretary of Defense by General John R. Galvin regarding the closure of United States military installations outside the United States and any other recommenda-

tions submitted to the Secretary by other commanders of combatant commands regarding the closure of United States military installations outside the United States; and

(2) The closure of such installations located outside the United States should be accomplished at the discretion of the Secretary of Defense at the earliest opportunity.

SPECTER AMENDMENT NO. 2557

Mr. SPECTER proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

It is the sense of the Congress that the President should call for international negotiations for the purpose of agreeing on the establishment of an international strike force to counter major international drug traffickers.

SEC. . CREATION OF A MULTILATERAL COUNTER NARCOTICS STRIKE FORCE.

(a) FINDINGS.—The Congress finds that—

(1) the United States Congress has in the past sought approval for a multilateral strike force dedicated to the war on drugs;

(2) the proposal to create a multilateral, international counternarcotics force as proposed by Prime Minister Michael Manley of Jamaica, is a plan worthy of consideration; and

(3) the Manley plan is the first operative proposal for the use of a multilateral force against the drug cartels in Latin America made by a government leader in the Western Hemisphere.

(b) SENSE OF THE CONGRESS.—It is therefore the sense of the Congress that—

(1) Prime Minister Manley of Jamaica is to be commended for his proposal; and

(2) the United States should work through the United Nations and other multilateral organizations to determine the feasibility of such a force and to assist in the establishment of this force, if it is found to be feasible.

WILSON AMENDMENT NO. 2558

Mr. WILSON proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place, insert the following:

"SEC. . DEADLINE FOR COMPLETION AND EXECUTION OF AGREEMENTS WITH THE ENVIRONMENTAL PROTECTION AGENCY.

"(a) Whenever a Department of Defense facility is proposed to be listed on the National Priorities List pursuant to the Comprehensive Environmental Response, Compensation and Liability Act, as amended, including those facilities proposed for listing as of the date of enactment of this Act, the Secretary of Defense shall, not later than one year after the date of such proposal or the date of enactment of this Act, whichever is later, enter into an interagency agreement with the Administrator of the United States Environmental Protection Agency, which shall be subject to and comply with the Comprehensive Environmental, Response, Compensation and Liability Act, as amended, and shall include, but not be limited to, a procedural framework and schedule for developing, implementing, and monitoring appropriate response actions for any such facility in accordance with the Comprehensive Environmental, Response, Compensation and Liability Act, as amended.

"(b) This section shall be construed consistently with any existing Federal laws, and nothing in this section shall be construed as limiting any rights, authorities, requirements, or obligations of or provided by any existing Federal laws. Nothing in this section shall be construed as preempting, affecting, or modifying any State laws, including, but not limited to, any laws concerning removal or remedial action, enforcement, discharge control, solid waste disposal, or the application of such laws to facilities owned or operated by a department, agency, or instrumentality of the United States.".

BIDEN (AND COHEN) AMENDMENT NO. 2559

Mr. McCAIN (for Mr. BIDEN, for himself and Mr. COHEN) proposed an amendment to the bill S. 2884, supra, as follows:

On page 255, insert between lines 15 and 16 the following new title:

TITLE XV—COUNTER-NARCOTICS TECHNOLOGY CENTER

SEC. 1501. SHORT TITLE.

This title may be cited as the "Counter-Narcotics Technology Act of 1990".

SEC. 1502. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER.

(a) ESTABLISHMENT.—Title I of the Anti-Drug Abuse Act of 1988 (21 U.S.C. 1501 et seq.) is amended by inserting after section 1003 the following new section:

"SEC. 1003a. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER.

"(a) ESTABLISHMENT.—There is established within the Office of National Drug Control Policy, the Counter-Narcotics Technology Assessment Center (hereafter in this section referred to as the 'Center'). The Center shall operate under the authority of the Director of National Drug Control Policy, and shall serve as the central counter-narcotics enforcement research and development organization of the United States Government.

"(b) DIRECTOR.—There shall be at the head of the Center, the Chief Scientist of Counter-Narcotics Technology who shall be appointed by the Director of National Drug Control Policy from individuals qualified and distinguished in areas of science, engineering or technology. The Chief Scientist shall be paid at the highest rate of basic pay set under the provisions of section 5382(b) of title 5, United States Code.

"(c) ADDITIONAL RESPONSIBILITIES OF THE DIRECTOR.—(1) The Director, acting through the Chief Scientist, shall—

"(A) identify and define the short, medium, and long-term scientific and technological needs of Federal, State, and local drug enforcement agencies, including—

"(i) surveillance, advanced tracking, and radar imaging;

"(ii) electronic support measures;

"(iii) communications;

"(iv) data fusion, advanced computer systems and artificial intelligence; and

"(v) chemical, biological, radiological (including neutron, electron, and gravitron) and other means of detection;

"(B) make a priority ranking of such needs according to fiscal and technological feasibility, as part of a National Counter-Narcotics Enforcement Research and Development Strategy;

"(C) oversee and coordinate counter-narcotics technology initiatives with related activities of other Federal civilian and military departments; and

"(D) under the general authority of the Director of National Drug Control Policy, submit reprogramming or transfer requests of funds appropriated for counter-narcotics enforcement research and development to Congress.

"(2) The authority granted to the Director under this section shall not extend to the award of contracts, management of individual projects, or other operational activities.

"(d) COUNTER-NARCOTICS BUDGET SUBMISSION.—Beginning with the fiscal year 1992 budget, the Director of National Drug Control Policy in his budget shall submit a separate and detailed request relating to all Federal agencies for counter-narcotics enforcement research and development programs.

"(e) PERSONNEL.—Subject to subsections (d) and (e) of section 1003 of this Act, the Chief Scientist shall select and appoint a staff of not more than 10 employees with specialized experience in scientific, engineering and technical affairs. The Chief Scientist may appoint and fix the compensation of such personnel without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and such personnel may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at a rate not to exceed the maximum rate authorized by the General Schedule.".

SEC. 1503. EFFORTS BY PRIVATE INDUSTRY.

It is the sense of Congress that providers of electronic communications services and manufacturers of electronic communications equipment should cooperate with law enforcement agencies to ensure that communications systems permit law enforcement agencies to obtain the plain text contents of voice, data, and other communications when appropriately authorized by law.

GLENN (AND OTHERS) AMENDMENT NO. 2560

Mr. DIXON (for Mr. GLENN, for himself, Mr. BENTSEN, Mr. COATS, Mr. HEINZ, Mr. SPECTER, Mr. SYMMS, Mr. D'AMATO, Mr. LAUTENBERG, Mr. GRAMM, Mr. PELL, and Mr. McCAIN) proposed an amendment to the bill S. 2884, supra, as follows:

On page 11, line 18, insert "(1)" after "FUNDS.—".

On page 11, between lines 22 and 23, insert the following new paragraph:

(2) Of the amounts authorized to be appropriated pursuant to section 201(4) for the Defense Agencies, $8,000,000 shall be available for research, development, test, and evaluation in connection with the Special Operations variant of the V-22 Osprey aircraft.

JOHNSTON (AND OTHERS) AMENDMENT NO. 2561

Mr. DIXON (for Mr. JOHNSTON, for himself, Mr. GLENN, and Mr. McCLURE) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill insert the following:

SEC. . RESPONSIBILITIES OF THE SECRETARY OF THE DEPARTMENT OF ENERGY FOR MEDICAL AND ENVIRONMENTAL PROGRAMS IN THE REPUBLIC OF THE MARSHALL ISLANDS.

Effective on the date of enactment of this Act, all responsibilities, of the Secretary of Energy for, and all activities currently underway at the Department of Energy with respect to, medical and environmental programs applicable in the Republic of the Marshall Islands shall be managed, controlled and conducted through the Office of Environment, Safety and Health of the Department of Energy.

GORE (AND WARNER) AMENDMENT NO. 2562

Mr. McCAIN (for Mr. GORE, for himself and Mr. WARNER) proposed an amendment to the bill S. 2884, supra, as follows:

On page 26 strike lines 21 through 26, and on page 27 strike lines 1 through 3, and insert the following:

To the extent provided for in interagency agreements entered into between the Department of Defense and the Environmental Protection Agency, the Secretary of Defense shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Defense facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (42 U.S.C. 9620).

In addition, notwithstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Defense facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Defense.

On page 380 strike lines 4-12 and insert the following:

To the extent provided for in interagency agreements entered into between the Department of Energy and the Environmental Protection Agency, the Secretary of Energy shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Energy facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, (42 U.S.C. 9620).

In addition, notwithstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Energy facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Energy.

BINGAMAN (AND DOMENICI) AMENDMENT NO. 2563

Mr. DIXON (for Mr. BINGAMAN, for himself and Mr. DOMENICI) proposed an amendment to the bill S. 2884, surpa, as follows:

Immediately following section 840, insert the following new section:

SEC. 804a. OTHER TECHNOLOGY TRANSFER MATTERS.

Section 3133(d)(4) of Public Law 101-189 is hereby amended by adding a sentence at the conclusion thereof which shall read as follows:

"Such contract provisions or separate writing shall: (i) include only such provisions as are specifically required by paragraphs (1) and (2) of this subsection 3133(d), and such additional provisions as are deemed necessary by the head of the agency for the purpose of the implementation of this Act but which cannot be effected by the promulgation of regulations, the issuance of agency orders, or other similar administrative processes; (ii) not condition the entering into of cooperative research and development agreements upon the issuance of agency waivers to rights to inventions and intellectual property where such issuance is not required by section 12 of the Stevenson-Wydler Act of 1980; and (iii) not operate to discourage the exercise of rights pursuant to other statutes intended to foster technology transfer, such as the provisions of 35 U.S.C. 202 et seq.".

DOMENICI AMENDMENT NO. 2564

Mr. DOMENICI proposed an amendment to the bill S. 2884, surpa, as follows:

Insert at the appropriate place the following:

SEC. . DEPARTMENT OF ENERGY SCIENCE AND EDUCATION PROGRAMS.

(A) SHORT TITLE.

This section may be cited as the "Department of Energy Science and Education Enhancement Act".

(B) FINDINGS.

The Congress finds that—

(1) scientific, technical, and engineering competence is essential to the Nation's future well being;

(2) the scientific, technical, and engineering capability at the Federal laboratories is unmatched throughout the world;

(3) superb research, development, testing, and evaluation occurs in Department laboratories;

(4) Department laboratories will play an increasing role in assuring that America remains competitive in world markets;

(5) improvements in mathematics, science, and engineering education are needed desperately to provide the trained and educated citizenry essential to the future competitiveness of the United States;

(6) greater effort and funding must be devoted to technology transfer from Department laboratories;

(7) the ability of the Nation to fight disease and overcome human suffering can be greatly enhanced by fully utilizing the health research resources of the Department; and

(8) Department laboratories are in a unique position to take on increased responsibilities in the interest of improving our Nation's competitiveness and our quality of life.

(C) DEFINITIONS.

For the purposes of this Act—

(1) the term "Secretary" means the Secretary of Energy; and

(2) the term "Department" means the Department of Energy.

(D) MISSION.

Section 91(a) of the Atomic Energy Act of 1954 (42 U.S.C. 2121(a)) is amended by adding at the end the following new paragraph:

"(6) use the facilities, equipment, personnel, and other resources of the Department of Energy to the fullest extent possible to enhance educational opportunities in science, mathematics, and engineering for American students and educators so as to improve the scientific literacy and competitiveness of the Nation.".

(E) SCIENCE AND EDUCATION PROGRAMS.

(a) IN GENERAL.—(a) To the extent appropriate, the Secretary may establish programs, to be operated at or through the support of each Department facility, that will use fully the unique scientific resources of the Department to promote—

(1)(A) transfers of federally owned or originated technology to State and local governments, private industry, and universities or other nonprofit organizations so that the prospects for commercialization of such technology are enhanced;

(B) activities enhancing the quality of mathematics, science, and engineering education throughout the Nation, so as to improve the scientific and technical capability and literacy of the Nation and improve the Nation's overall educational capability; and

(C) research, development, and other activities intended to enhance the health and quality of life of the Nation, particularly in areas that pertain to environmental improvement and biomedical research.

(b)(1) The programs described in paragraph (a) shall supplement and be coordinated with current activities of the Department, but shall not supplant them.

(2)(A) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise made available to the Department of Energy for fiscal year 1991, an amount up to the amount described in subparagraph (B) may be made available to a Department of Energy laboratory for the purpose of paragraph (1).

(B) The amount referred to in subparagraph (A) is 10 percent of the amount made available to such laboratory by the Department of Energy in fiscal year 1990.

(F) TECHNOLOGY DEVELOPMENT PROGRAM.

(1) ESTABLISHMENT OF PROGRAM.—(a) The Secretary shall establish a program to develop Department-originated technologies, directed at the stage of technology development beyond the basic research stage.

(b) The program established pursuant to paragraph (a) shall develop technologies, determined by the Secretary to have significant promise for commercial and public benefit to the Nation, to a point where private industry will undertake further scientific and commercial development.

(c)(1) The program established pursuant to paragraph (a) may be conducted at any Department facility and shall enhance the commercial development and transfer to private industry of Department-originated technologies, consistent with the technology transfer mission of the Department.

(2) As a condition for supporting specific projects, the Secretary may require a private sector commitment to future, wholly non-Federal funding of commercial development of particular technologies.

(3) Establishment of the program described in paragraph (a) shall not preclude the Department or its facilities from continuing operation or support of other programs to advance technology development, but all of the technology development pro-

grams of the Department shall be coordinated.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(G) LABORATORY COOPERATIVE SCIENCE CENTERS.

(a) IN GENERAL.—The Secretary of Energy may establish Laboratory Cooperative Science Centers (referred to as the "Centers") as national laboratories operating under the authority of the Department of Energy.

(2) FUNCTION.—The Center shall coordinate both laboratory based and offsite programs designed to advance the purposes of this Act.

(3) ACTIVITIES.—The activities of the Center shall include—

(a) supporting semester-length research appointments for college and university science and engineering students, and faculty/students teams, at the Centers;

(b) supporting research appointments for high school science teachers at the Centers;

(c) supporting research apprenticeship appointments at the Centers for students uderrepresented in science and technology careers;

(d) supporting research experience programs at the Centers for nationally selected high school honor students;

(e) supporting cost-shared projects to encourage more students to pursue careers in precollege science and mathematics teaching;

(f) participating in collaborative projects with other Federal agencies and the private sector to further the objectives of this Act;

(g) operating precollege mathematics and science education programs at the national laboratories;

(h) establishing a museum-based science education program;

(i) establishing collaborative inner-city and rural partnership programs designed to meet the special mathematics and science education needs of students in inner-city and rural areas; and

(j) engaged in other activities to advance the purposes of this Act.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(H) UNIVERSITY-BASED PROGRAMS.

(1) IN GENERAL.—The Secretary may coordinate and sponsor university-based programs directed at encouraging more students to pursue energy-related scientific and technical careers, with a particular focus on the recruitment of women and minority students.

(2) PREFRESHMAN ENGINEERING PROGRAM.—The programs referred to in subsection (a) shall include a prefreshman engineering program in which middle school students attend summer workshops on mathematics, science, and engineering conducted by universities on their campuses.

(3) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

McCAIN AMENDMENT NO. 2565

Mr. McCAIN proposed an amendment to the bill, S. 2884, supra, as follows:

On page 302, line 19, strike out "$175,947,000" and insert in lieu thereof "$177,323,000".

On page 302, line 19, add $3,417,000 to the number shown.

On page 302, line 25, add $2,480,000 to the number shown.

On page 302, line 19, add $11,900,000 to the number shown.

On page 256, line 6, strike $5,600,000 and insert in lieu thereof, $13,900,000.

On page 260, line 3, add $8,300,000 to the number shown.

On page 260, line 6, add $8,300,000 to the number shown.

On page 260, line 6, after the period, add; "Provided, That the expenditure of the construction funds for a school at Fort Wainwright, Alaska are hereby restricted contingent upon agreement from the local education agency to accept ownership for said facility constructed with said funds."

On page 302, line 19, add $5,400,000 to the number shown.

On page 332, beginning with line 21, strike out all down through line 2 on page 338 and insert in lieu thereof the following:

SEC. 2823. TRANSFER OF LANDS TO SECRETARY OF AGRICULTURE

(a) TRANSFER.—Notwithstanding any other provision of law and subject to subsections (b) through (d), the Secretary of the Army shall transfer administrative jurisdiction of approximately 16,707 acres of land at the Pinon Canyon Maneuver Site, Colorado, consisting of all parcels of land identified by the Secretary of the Army as uneconomic remnant lands, to the Secretary of Agriculture for inclusion in the Comanche National Grassland. The Secretary of Agriculture shall administer the transferred lands in accordance with laws applicable to the National Forest system.

(b) DESCRIPTION OF THE PROPERTY.—(1) The exact acreage and legal description of the property to be transferred under this section shall be determined by surveys satisfactory to the Secretary of the Army and the Secretary of Agriculture.

(2) The Secretary of Agriculture, with the concurrence of the Secretary of the Army, shall prepare a map of the lands to be conveyed. These lands shall be known as the Picket Wire Canyonlands (hereafter in this section referred to as the "PWC").

(3) The legal description and map referred to in paragraphs (1) and (2) shall be kept on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION OF LANDS.—(1) The Secretary of Agriculture shall administer the transferred lands so as to conserve and protect the paleontological, archeological, wildlife, vegetable, aquatic, and other natural resources of the area.

(2) The management provisions of this section shall apply only to those parcels of the transferred lands comprising approximately 11,507 acres in the Purgatoire River Canyon.

(3) The Secretary of Agriculture may permit access to the PWC for the purpose of permitting scholarly research, interpretation to the public, and recreational activities to the extent that such access does not—

(A) impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the area is intended to be used by the Army; or

(B) impair the conservation and protection of paleontological, archeological, or natural resources of the area.

(4) The Secretary of Agriculture may permit livestock grazing in the PWC only to the extent that the Secretary determines necessary to benefit the natural resources of the area.

(5) Lands of the PWC are withdrawn from operation of the mining, mineral leasing, and other mineral entry laws of the United States.

(6) No activity shall be permitted in the PWC that would impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the site is intended to be used by the Army or the conservation and protection of the paleontological, archeological, and natural resources of the area, including production of or exploration for oil, gas, or minerals of any kind.

(7) Lands to be transferred may not be used for the storage or processing of nuclear waste, other hazardous waste, or any other waste.

(8) The Secretary of Agriculture, in consultation with the Director of the National Park Service, the Director of United States Fish and Wildlife Service, the Secretary of the Army, the head of the Colorado Department of Natural Resources, and the head of the Colorado State Historic Preservation Office, shall, after notice and opportunity for public comment, develop a management plan for the PWC that includes—

(A) a complete survey and an inventory of the paleontological and archeological resources of the area; and

(B) a strategy for protecting and conserving the dinosaur track way in the Purgatoire River Canyon and other paleontological and archeological resources in the PWC.

(d) INTERAGENCY AGREEMENT.—(1) When the lands referred to in subsection (a) are transferred, the Secretary of the Army and the Secretary of Agriculture shall enter into an interagency agreement providing for—

(A) access to the PWC through the Pinon Canyon Maneuver Site for The Secretary of Agriculture (for the purpose of taking action to conserve and protect the area's resources) and the public (for educational purposes) in such manner, at such times, and to such an extent as will not interfere (as determined by the Secretary of the Army) with the Army's use of the site; and

(B) cooperation between the Army and the Forest Service in the protection and conservation of the paleontological, archeological, and natural resources in the PWC.

(2) In determining whether the manner, time, and extent of access through the Pinon Canyon Maneuver Site for a particular purpose will constitute interference with the Army's use of the site for the purpose of paragraph (1)(B), the Secretary of the Army shall—

(A) with respect to access by The Secretary of Agriculture for management purposes, take into consideration that the high importance of protecting and conserving the resources of the PWC may justify the imposition of some inconvenience to the Army, so long as the inconvenience does not prevent the Army from accomplishing its purposes on the Pinon Canyon Maneuver Site; and

(B) with respect to access by the public, take into consideration comments solicited from the public by the Department of Agri-

culture concerning the need for and the kind of access that should be provided.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Department of Agriculture such sums as are necessary to carry out this section, including such sums as are necessary to pay for—

(1) a study of the paleontological resources of the PWC and action to prevent erosion of the dinosaur track way;

(2) a complete cadastral survey of the PWC; and

(3) an archaeological, paleontological, and historical survey of the PWC.

RIEGLE (AND OTHERS) AMENDMENT NO. 2566

Mr. DIXON (for Mr. RIEGLE, for himself, Mr. PELL, Mr. LIEBERMAN, Mr. KENNEDY, Mr. BINGAMAN, Mr. WIRTH, and Mr. CONRAD) proposed an amendment to the bill, S. 2884, supra, as follows:

On page 223, below line 24, insert the following:

SEC. 1216. NATIONAL DEFENSE ECONOMIC ADJUSTMENT

(a) FINDINGS.—Congress makes the following findings:

(1) There are likely to be significant reductions in the programs, projects, and activities of the Department of Defense during the first several fiscal years following fiscal year 1990.

(2) Such reductions will adversely affect the economies of many communities in the United States and small businesses and civilian workers throughout the United States.

(b) POLICY.—In view of the findings expressed in subsection (a), it is the policy of the United States that—

(1) assistance be provided under existing planning assistance programs and economic adjustment assistance programs of the Federal Government to communities, small businesses, and workers referred to in subsection (a)(2) to the extent necessary to facilitate an orderly transition for such communities, small businesses, and workers from economic reliance on Department of Defense spending to economic reliance on other sources of business, employment, and revenue; and

(2) funding for such programs be increased by amounts necessary to meet the needs of such communities, small businesses, and workers without reducing the funding that would otherwise be available under those programs by reason of causes unrelated to the reductions referred to in subsection (a)(1).

(c) ACTIONS OF THE SECRETARY OF DEFENSE.—(1) The Secretary of Defense, through the Office of Economic Adjustment of the Department of Defense shall—

(A) identify each community in the United States likely to experience significant economic dislocation as a result of the reductions referred to in subsection (a)(1), including a loss of at least 2,500 civilian jobs (in the case of an urban community), 1,000 civilian jobs (in the case of a rural community), or a number of civilian jobs equal to at least one percent of the total number of civilian jobs in the community;

(B) transmit to the governments of each such community (and to the Governor of the State in which such community is located) advance notification of the planned reductions referred to in subsection (a)(1) that are likely to affect such community adversely, including an estimate of the number of jobs that will be lost in the community as the result of the planned reductions;

(C) transmit to the President a list of all such communities;

(D) make community planning assistance grants to such communities in order to assist such communities in planning for economic diversification likely to minimize the adverse economic effects referred to in subsection (a)(2) and to facilitate economic recovery from any such adverse effects.

(2) For fiscal year 1992 and each fiscal year thereafter, the Secretary of Defense—

(A) shall—

(i) in the budget proposals of the Department of Defense prepared for submission to the President for such fiscal year, identify those communities that are likely to experience significant economic dislocation described in paragraph (1)(A) in the event that such budget proposals are enacted into law; and

(ii) upon the submission of the budget for such fiscal year to Congress pursuant to section 1105(c) of title 31, United States Code, provide the notifications required by paragraph (1)(B); and

(B) upon the enactment of an appropriations Act providing funds for programs, projects, and activities of the Department of Defense for such fiscal year, shall identify the communities likely to experience significant economic dislocation described in clause (A) of paragraph (1) as a result of the funding levels contained in such Act and take the actions required by clauses (B) and (C) of such paragraph.

(d) ACTIONS OF THE SECRETARY OF COMMERCE.—The Secretary of Commerce shall furnish community adjustment assistance under title IX of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3241 et seq.), and such other assistance as may be provided under programs administered by the Economic Development Administration of the Department of Commerce, to communities receiving a notification pursuant to subsection (c)(1)(B) in order to carry out the policy set out in subsection (b)(1).

(e) ACTIONS OF THE ADMINISTRATOR OF THE SMALL BUSINESS ADMINISTRATION.—(1) The Administrator of the Small Business Administration shall furnish assistance to small businesses described in paragraph (2) for the purpose of facilitating the development of business plans for diversifying into commercial activities other than the furnishing of products or services for the Department of Defense.

(2) A small business referred to in paragraph (1) is a small business that derives a significant portion of its gross receipts from the direct and indirect furnishing of goods or services for the Department of Defense.

(3) To be eligible for the assistance referred to in paragraph (1), a small business shall be required to submit to the Administrator an application for assistance containing a preliminary business diversification proposal applicable to such small business.

(f) ACTIONS OF THE SECRETARY OF LABOR.—The Secretary of Labor shall furnish retraining, job placement, and relocation assistance pursuant to the Job Training Partnership Act (29 U.S.C. 1501 et seq.) and other employment services to workers referred to in subsection (a)(2) in order to carry out the policy set out in subsection (b)(1).

(g) ACTIONS OF THE PRESIDENT.—(1) In the preparation of the budget for a fiscal year for submission to Congress pursuant to section 1105(a) of title 31, United States Code, the President shall—

(A) take into consideration the needs of the communities identified by the Secretary of Defense pursuant to subsection (c)(1) and the small businesses and workers referred to in subsection (a)(2) and include in such budget proposed funding levels for the assistance and services referred to in subsections (c) through (f) sufficient to carry out the policy set out in subsection (b)(2); and

(B) include in the justifications and supporting information transmitted to Congress in connection with such budget—

(i) a discussion of the extent to which the proposed funding for such programs is sufficient to carry out such policy; and

(ii) a list of the communities that are to receive a notification from the Secretary of Defense pursuant to subsection (c)(1) in connection with such budget.

(2) It is the sense of Congress that, in order to ensure that paragraph (1) and subsections (c) through (f) are carried out effectively—

(A) the President should direct the interagency committee known as the President's Economic Adjustment Committee to carry out coordinating and oversight activities with respect to the development of budget requests for and the furnishing of assistance under the programs referred to in such paragraph and subsections and to keep the President currently informed regarding the effectiveness of the programs; and

(B) the President should implement a systematic, continuous procedure to collect and analyze information necessary to evaluate the adequacy and identify the sources of industrial capacity and capability in items and technologies essential to the execution of the national security strategy of the United States, including the industrial capacity and capabilities of Department of Defense prime contractors and at least the first two tiers of subcontractors.

(h) AUTHORIZATIONS OF APPROPRIATIONS.—(1) There is authorized to be appropriated for the fiscal year beginning October 1, 1990 such sums as may be necessary for carrying out subsections (c)(1)(D), (d), (e), and (f).

(2) Amounts authorized to be appropriated under paragraph (1) are in addition to any amounts authorized to be appropriated for activities and programs referred to in such subsections for such fiscal year under any other provision of law.

LEVIN AMENDMENT NO. 2567

Mr. DIXON (for Mr. LEVIN) proposed an amendment to the bill, S. 2884, supra, as follows:

On page 16, line 23 strike "$22,068,345,000" and insert in lieu thereof "$22,008,345,000".

On page 16, line 24, strike "$23,343,784,000" and insert in lieu thereof "$23,283,784,000".

On page 17, line 1, strike "$20,845,714,000" and insert in lieu thereof "$20,785,714,000".

On page 27, between lines 11 and 12, insert the following new section:

REDUCTION IN STOCK FUND OBLIGATIONS

SEC. . The Secretary of Defense may not incur obligations against the Department of Defense stock funds during fiscal year 1991, except for obligations for fuel and subsistence items, in excess of 80 percent of the sales from such stock funds during that fiscal year, except for sales for fuel and subsistence items.

GLENN (AND OTHERS) AMENDMENT NO. 2568

Mr. GLENN (for himself, Mr. ROTH, Mr. GRASSLEY, Mr. PRYOR, and Mr. KOHL) proposed an amendment to the bill, S. 2884, supra, as follows:

At the appropriate place, insert the following:

SEC. . CONTROLS ON THE AVAILABILITY OF APPROPRIATION ACCOUNTS.

(a) AMENDMENTS TO TITLE 31.—

(1) IN GENERAL.—Subchapter IV of chapter 15 of subtitle 2 of title 31, United States Code, is amended by striking sections 1552 through 1556 and inserting the following:

"§ 1552. Procedure for appropriation accounts available for definite periods

"(a) On September 30th of the 5th fiscal year after the period of availability of an appropriation account available for obligation for a definite period ends, the account is closed and any remaining obligated and unobligated balance is canceled and thereafter shall not be available for obligation or expenditure for any purpose.

"(b) Collections authorized to be credited to an appropriation, but not received before closing of the account under subsection (a) or section 1555 of this title shall be deposited in the Treasury as miscellaneous receipts.

"§ 1553. Availability of appropriation accounts to pay obligations

"(a) After the end of the period of availability of an appropriation account available for a definite period and prior to closing of that account under section 1552(a) of this title, the account shall remain available for recording, adjusting, and liquidating obligations properly chargeable to that account. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

"(b)(1) Subject to the provisions of paragraph (2), after closing of an account under section 1552(a) or section 1555 of this title, obligations and adjustments to obligations that would have been chargeable to that account prior to closing and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose.

"(2) The total of charges to any current account under paragraph (1) shall not exceed—

"(A) An amount equal to one percent of the total appropriations for that current account; or

"(B) the amount of the original appropriation, whichever amount is less.

"(c)(1) Obligations under this section may be paid without prior action of the Comptroller General.

"(2) This subchapter does not—

"(A) relieve the Comptroller General of the duty to make decisions requested under law; or

"(B) affect the authority of the Comptroller General to settle claims and accounts.

"(d)(1) If an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount of such obligations during a fiscal year for contract changes for that program, project, or activity to exceed $4,000,000, the obligation may only be made if the obligation is approved by the head of the agency (or an officer of the agency within the Office of the head of the agency to whom the head of the agency has delegated the authority to approve such an obligation).

"(2) In a case in which an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount so obligated during a fiscal year for that program, project, or activity to exceed $25,000,000, the obligation may not be made until—

"(A) the head of the agency submits to the appropriate authorizing committees of Congress and the Committees on Appropriations of the Senate and the House of Representatives a notice in writing of the intent to obligate such funds, together with a description of the legal basis for the proposed obligation and the policy reasons for the proposed obligation; and

"(B) a period of 30 days has elapsed after the notice is submitted.

"(3) As used in this subsection, the term 'contract change' means a change to a contract under which the contractor is required to perform additional work. Such term does not include adjustments to pay claims or increases under an escalation clause.

"§ 1554. Audit, control, and reporting

"(a) Any audit requirement, limitation on obligations, or reporting requirement that is applicable to an appropriation account shall remain applicable to that account after the end of the period of availability of that account.

"(b)(1) The head of each Federal agency shall provide an annual report to the President and the Department of the Treasury regarding the unliquidated obligations, unobligated balances, and adjustments made to such accounts during the completed fiscal year. The report shall be provided no later than 15 days after the President's budget submission.

"(2) The report required by this subsection shall—

"(A) provide a description, with reference to the fiscal year of appropriations, of the amount in each account, its source, and an itemization of the appropriations accounts;

"(B) describe all current and expired appropriations accounts;

"(C) describe any payments made under section 1553 of this title;

"(D) describe any adjustment of obligations during that fiscal year pursuant to section 1553 of this title;

"(E) contain a certification by the head of the agency that the obligated balances in each appropriation account of the agency reflect proper existing obligations and that expenditures from the account since the preceding review were supported by a proper obligation of funds and otherwise were proper;

"(F) describe all balances canceled under sections 1552 and 1555 of this title; and

"(G) be provided to the Appropriations Committees of the Senate and the House of Representatives, to the House of Representatives Committee on Government Operations and the Senate Committee on Governmental Affairs, and other appropriate oversight and authorizing committees of the House and Senate.

"(c) The Congressional Budget Office shall—

"(1) annually estimate the outlay impact on the Federal deficit on an agency-by-agency basis, of payments and adjustments with respect to sections 1552 and 1553 of this title; and

"(2) include estimates required by paragraph (1) in the annual report of the Congressional Budget Office to Congress entitled 'The Economic and Budget Outlook', and its report entitled 'The Economic Budget Outlook: An Update'.

"(d) Each agency head shall establish internal controls to assure that an adequate review of obligated balances has been performed to support the certification required by section 1108(c) of this title.

"§ 1555. Closing of appropriation accounts available for indefinite periods.

"An appropriation account available for an indefinite period shall be closed and any remaining obligated or unobligated balance shall be canceled and thereafter shall not be available for obligation of expenditure for any purpose—

"(1) when the head of the agency concerned or the President decides that the purposes for which the appropriation was made have been carried out; and

"(2) when no disbursement is made against the appropriation for 2 consecutive fiscal years.

"§ 1556. Comptroller General reports on appropriation accounts.

"(a) In carrying out audit responsibilities, the Comptroller General shall report on operations under this subchapter to—

"(1) the head of the agency concerned;

"(2) the Secretary of the Treasury; and

"(3) the President.

"(b) A report under this section shall include an appraisal of unpaid obligations under appropriation accounts the period of availability of which has ended.".

(2) EXTENSION OF AVAILABILITY.—Section 1551 of title 31, United States Code, is amended by adding at the end the following new subsection:

"(c) The limitations on availability for expenditure prescribed in this subchapter shall apply to all other appropriations unless otherwise authorized by subsequent law that specifically—

"(1) identifies the appropriate account to be extended;

"(2) provide that such account shall be available for recording, adjusting, and liquidating obligations properly chargeable to that account; and

"(3) extends the availability for expenditure of the obligated balances.".

(b) EFFECTIVE DATE.—

(1) APPLICATION OF AMENDMENTS.—The amendments made by subsection (a) shall apply to any appropriation account the obligated balance of which, on the date of enactment of this section, has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section.

(2) RESTORATION OF CERTAIN UNOBLIGATED AMOUNTS.—On the date of enactment of this section, the balance of any unobligated amount withdrawn under section 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section, from an account the obligated balance of which has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, is hereby restored to that account.

(3) CANCELLATION OF UNOBLIGATED BALANCES.—Thirty days after enactment of this section, all balances of unobligated funds withdrawn from any account under subsection 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section, (other than funds restored under paragraph (2)) are canceled.

(4) CANCELLATION OF OBLIGATED BALANCES.—On the 3rd September 30th after enactment of this section, all obligated balances transferred under subsection 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, are canceled.

(5) OBLIGATIONS AND ADJUSTMENT OF OBLIGATIONS.—(A) After cancellation of unobligated balances under paragraph (3) or cancellation of obligated balances under paragraph (4) and subject to the provisions of subparagraph (B), obligations and adjustments to obligations that would have been chargeable to those balances prior to such cancellations and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

(B) Any charge made pursuant to subparagraph (A) shall be subject to the maximum amount chargeable subsection (b) under section 1553 of title 31, United States Code, as amended by this section, and shall be included in the calculation of the total amount charged to any account under that section.

(c) ANTI-DEFICIENCY ACT.—Section 1341(a)(1)(A) of title 31, United States Code, is amended by inserting before the semicolon the following: ", including an obligation exceeding the original obligation and the use of such obligation for new obligations".

GARN AMENDMENT NO. 2569

Mr. MCCAIN (for Mr. GARN) proposed an amendment to the bill S. 2884, supra, as follows:

On page 4, line 21, strike out "$354,400,000" and insert in lieu thereof "$365,700,000".

On page 9, line 12, strike out "$5,746,723,000" and insert in lieu thereof "$5,741,723,000".

On page 3, line 18, strike out "$6,749,657,000" and insert in lieu thereof "$6,743,357,000".

MOYNIHAN (AND OTHERS) AMENDMENT NO. 2570

Mr. DIXON (for Mr. MOYNIHAN, for himself and Mr. D'AMATO) proposed an amendment to the bill S. 2884, supra, as follows:

On page 359, line 4, change to "$1,042,775,000."

On page 378 between lines 14 and 15, insert the following new section:

SEC. 3131. INTERNAL CONFINEMENT FUSION PROGRAM.

Of the funds authorized to be appropriated pursuant to section 3101(1)(A) $167,900,000 shall be made available for the purpose of inertial confinement fusion.

WIRTH (AND WILSON) AMENDMENT NO. 2571

Mr. DIXON (for Mr. WIRTH, for himself and Mr. WILSON) proposed an amendment to the bill S. 2884, supra, as follows:

On page 17, line 16, strike out "$1,017,000,000" and insert in lieu thereof "$1,062,527,000".

On page 359, line 17; strike out "$302,043,000" and insert in lieu thereof "$292,043,000".

On page 361, strike out lines 20 through 22.

On page 362, line 7, strike out "$19,600,000" and insert in lieu thereof "$9,600,000".

On page 362, line 25, strike out "$128,587,000" and insert in lieu thereof "$106,806,000".

On page 364, strike out lines 4 through 6.

NUNN (AND OTHERS) AMENDMENT NO. 2572

Mr. NUNN (for himself, Mr. WARNER, Mr. DOLE, and Mr. THURMOND) proposed an amendment to the bill S. 2884, supra, as follows:

SEC. . HONORING GENERAL MATTHEW B. RIDGWAY.

(a) FINDINGS.—The Congress finds that—

(1) General Matthew Bunker Ridgway, United States Army (Retired) served his country with great honor and distinction for more than 40 years;

(2) during World War II, General Ridgway commanded the 82d Airborne Division and later the XVIII Airborne Corps, leading his soldiers in some of the toughest fighting of the European theater to achieve Allied victories in North Africa, Sicily, Italy, the Normandy invasion, the Battle of the Bulge, and the crossing of the Rhine and Elbe Rivers.

(3) in Korea, during the depths of the bitter winter of 1950, General Ridgway took command of the seriously demoralized 8th Army, motivated and inspired it to "Stand and Fight," and led it on the offensive again;

(4) under his leadership, the military forces of the United Nations Command in Korea recaptured territory that had been lost earlier to overwhelming enemy forces and forced the onset of armistice negotiations; and

(5) after his commands in the Korean war, General Ridgway continued his outstanding service to his country by serving in the positions of Supreme Commander of Allied Powers in Europe and Chief of Staff of the United States Army.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of the Congress that—

(1) General Ridgway deserves the highest honor and utmost respect of the United States and its citizens for his extraordinary service and dedication to their security; and

(2) a Congressional Gold Medal should be struck in honor of his lifetime of superior achievements.

SPECTER AMENDMENT NO. 2573

Mr. SPECTER proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following: it is the sense of the Senate that:

"In the event Iraqi hostilities continue and action is not instructed under Article 42 of the United Nation Charter to force cessation of such hostilities, and the President determines the National Security interest at the United States may be directly throught the President of the United States should initiate negotiations to create a multilateral air, sea and land force outside the United Nations to furnish such assistance as may be necessary to restore international peace and security in Kuwait."

REID (AND BRYAN) AMENDMENT NO. 2574

Mr. REID (for himself and Mr. BRYAN) proposed an amendment to the bill S. 2884 , supra, as follows:

On page 223, below line 24, insert the following:

SEC. 1216. REPEAL RELATING TO CONTRACTOR LIABILITY FOR INJURY OR LOSS OF PROPERTY ARISING OUT OF ATOMIC WEAPONS TESTING PROGRAMS.

(a) REPEAL.—Section 1631 of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2646; 42 U.S.C. 2212) is repealed.

(b) RELATIONSHIP TO STATUTES OF LIMITATIONS.—(1) The period during which section 1631 of the Department of Defense Authorization Act, 1985 was in effect shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to any civil action for an injury, loss of property, personal injury, or death described in subsection (a)(1) of such section.

(2) In the case of any civil action referred to in paragraph (1) which was filed before October 19, 1984, and was subsequently dismissed pursuant to the provisions of section 1631 of the National Defense Authorization Act, 1985, the period beginning on the date of the initial filing of such action and ending on the date of the enactment of this Act shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to such civil actions.

(3) If the period provided in any Federal or State statute of limitations applicable to a civil action referred to in paragraph (1) expires within the one-year period beginning on the date of the enactment of this Act, the action shall not be barred by such statute, but shall be forever barred if not commended within one year after such date.

BREAST AND CERVICAL CANCER MORTALITY PREVENTION ACT

MIKULSKI AMENDMENT NO. 2575

Mr. NUNN (for Ms. MIKULSKI) proposed an amendment to the bill (H.R. 4790) to amend the Public Health Service Act to establish a program of grants for the detection and control of breast and cervical cancer, as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Breast and Cervical Cancer Mortality Prevention Act of 1990".

SEC. 2. ESTABLISHMENT OF PROGRAM OF GRANTS TO STATES FOR PREVENTION AND CONTROL OF BREAST AND CERVICAL CANCER.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by inserting after title XIV the following new title:

TITLE XV—PREVENTIVE HEALTH MEASURES WITH RESPECT TO BREAST AND CERVICAL CANCERS

"SEC. 1501. ESTABLISHMENT OF PROGRAM OF GRANTS TO STATES.

"(a) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control, may make grants to States on the basis of an established competitive

review process for the purpose of carrying out programs—

"(1) to screen women for breast and cervical cancer as a preventive health measure;

"(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services;

"(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

"(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

"(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

"(6) to evaluate activities conducted under paragraphs (1) through (5) through appropriate surveillance or program-monitoring activities.

"(b) GRANT AND CONTRACT AUTHORITY OF STATES.—A State receiving a grant under subsection (a) may expand the grant to carry out the purpose described in such subsection through grants to, and contracts with, public or nonprofit private entities.

"SEC. 1502. REQUIREMENT OF MATCHING FUNDS.

"(a) IN GENERAL.—The Secretary may not make a grant under section 1501 unless the State involved agrees, with respect to the costs to be incurred by the State in carrying out the purpose described in such section, to make available non-Federal contributions (in cash or in kind under subsection (b)) toward such costs in an amount equal to not less than $1 for each $3 of Federal funds provided in the grant. Such contributions may be made directly or through donations from public or private entities.

"(b) DETERMINATION OF AMOUNT OF NON-FEDERAL CONTRIBUTION.—

"(1) IN GENERAL.—Non-Federal contributions required in subsection (a) may be in cash or in kind, fairly evaluated, including equipment or services (and excluding indirect or overhead costs). Amounts provided by the Federal Government, or services assisted or subsidized to any significant extent by the Federal Government, may not be included in determining the amount of such non-Federal contributions.

"(2) MAINTENANCE OF EFFORT.—In making a determination of the amount of non-Federal contributions for purposes of subsection (a), the Secretary may include only non-Federal contributions in excess of the average amount of non-Federal contributions made by the State involved toward the purpose described in section 1501 for the 2-year period preceding the first fiscal year for which the State is applying to receive a grant under such section.

"(3) INCLUSION OF RELEVANT NON-FEDERAL CONTRIBUTIONS FOR MEDICAID.—In making a determination of the amount of non-Federal contributions for purposes of subsection (a), the Secretary shall, subject to paragraphs (1) and (2) of this subsection, include any non-Federal amounts expended pursuant to title XIX of the Social Security Act by the State involved toward the purpose described in paragraphs (1) and (2) of section 1501(a).

"SEC. 1503. REQUIREMENTS WIH RESPECT TO TYPE AND QUALITY OF SERVICES.

"(a) REQUIREMENT OF PROVISION OF ALL SERVICES BY DATE CERTAIN.—The Secretary may not make a grant under section 1501 unless the State involved agrees—

"(1) to ensure that, initially and throughout the period during which amounts are received pursuant to the grant, not less than 60 percent of the grant is expended to provide each of the services or activities described in paragraphs (1) and (2) of section 1501(a), including making available screening procedures for both breast and cervical cancers;

"(2) subject to subsection (b), to ensure that—

"(A) in the case of breast cancer, both a physical examination of the breasts and the screening procedure known as a mammography are conducted; and

"(B) in the case of cervical cancer, both a pelvic examination and the screening procedure known as a pap smear are conducted;

"(3) to ensure that, by the end of any second fiscal year of payments pursuant to the grant, each of the services or activities described in section 1501(a) is provided; and

"(4) to ensure that not more than 40 percent of the grant is expended to provide the services or activities described in paragraphs (3) through (6) of such section.

"(b) USE OF IMPROVED SCREENING PROCEDURES.—The Secretary may not make a grant under section 1501 unless the State involved agrees that, if any screening procedure superior to a procedure described in subsection (a)(2) becomes commonly available and is recommended for use, any entity providing screening procedures pursuant to the grant will utilize the superior procedure rather than the procedure described in such subsection.

"(c) QUALITY ASSURANCE REGARDING SCREENING FOR BREAST CANCER.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will assure the quality of any screening procedure for breast cancer conducted pursuant to such section and, in the case of mammography, will provide that—

"(1) the equipment used to perform the mammography will be specifically designed for mammography and will meet appropriate radiologic standards for mammography;

"(2) the mammography will be performed by an individual who—

"(A) is licensed by a State to perform radiological procedures; or

"(B) is certified as qualified to perform radiological procedures by an appropriate organization;

"(3) the results of the mammography will be interpreted by a physician who—

"(A) is certified as qualified to interpret radiological procedures by an appropriate board; or

"(B) is certified as qualified to interpret screening mammography procedures by an appropriate program for assuring the qualifications of the individual with respect to such interpretations; and

"(4) with respect to the first screening mammography performed on a woman for which payment is made pursuant to section 1501(a), there are satisfactory assurances that the results of the mammography will be placed in permanent medical records maintained with respect to the woman.

"(d) QUALITY ASSURANCE REGARDING SCREENING FOR CERVICAL CANCER.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will assure the quality of any screening procedure for cervical cancer conducted pursuant to such section and, in the case of the pap smear (or other cytological screening procedure replacing the pap smear pursuant to subsection (b)), will provide—

"(1) the maximum number of cytology slides that any individual may screen in a 24-hour period;

"(2) requirements that a clinical laboratory maintain a record of—

"(A) the number of cytology slides screened during each 24-hour period by each individual who examines cytology slides for the laboratory; and

"(B) the number of hours devoted during each 24-hour period to screening cytology slides by such individual;

"(3) criteria for requiring rescreening of cytological preparations, such as—

"(A) random rescreening of cytology specimens determined to be in the benign category;

"(B) focused rescreening of such preparations in high risk groups; and

"(C) for each abnormal cytological result, rescreening of all prior cytological specimens for the patient, if available;

"(4) periodic confirmation and evaluation of the proficiency of individuals involved in screening or interpreting cytological preparations, including announced and unannounced on-site proficiency testing of such individuals, with such testing to take place, to the extent practicable, under normal working conditions;

"(5) procedures for detecting inadequately prepared slides, for assuring that no cytological diagnosis is rendered on such slides, and for notifying referring physicians of such slides;

"(6) requirements that all cytological screening be done on the premises of an appropriately qualified laboratory;

"(7) requirements for the retention of cytology slides by laboratories for appropriate periods of time; and

"(8) requirements of periodic inspection of cytology services by persons capable of evaluating the quality of cytology services.

"(e) ISSUANCE BY SECRETARY OF GUIDELINES WITH RESPECT TO QUALITY OF MAMMOGRAPHY AND CYTOLOGICAL SERVICES.—

"(1) IN GENERAL.—The Secretary shall establish guidelines for assuring the quality of any mammography and cytological screening procedure conducted pursuant to section 1501(a). Such guidelines with respect to mammography shall include the provisions of paragraphs (1) through (4) of subsection (c), and such guidelines with respect to cytological screening procedures shall include the provisions of paragraphs (1) through (8) of subsection (d).

"(2) APPLICABILITY WITH RESPECT TO GRANTS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will, with respect to any mammography or cytological screening procedure conducted pursuant to such section, ensure that the procedure is conducted in accordance with the guidelines issued by the Secretary under paragraph (1).

"(3) RESPONSIBILITY OF STATES IN ABSENCE OF GUIDELINES.—With respect to circumstances in which a State receives a grant under section 1501 before the issuance of guidelines under paragraph (1), this subsection may not be construed to affect in such circumstances the obligation of the State pursuant to subsection (a)(1) to provide for screening procedures and referrals or the obligations under subsections (c) and (d) with respect to providing for quality in the screening procedures.

"SEC. 1504. ADDITIONAL REQUIRED AGREEMENTS.

"(a) PRIORITY FOR LOW-INCOME WOMEN.—The Secretary may not make a grant under

section 1501 unless the State involved agrees that low-income women will be given priority in the provision of services and activities pursuant to paragraphs (1) and (2) of section 1501(a).

"(b) LIMITATION ON IMPOSITION OF FEES FOR SERVICES.—The Secretary may not make a grant under section 1501 unless the State involved agrees that, if a charge is imposed for the provision of services or activities under the grant, such charge—

"(1) will be made according to a schedule of charges that is made available to the public;

"(2) will be adjusted to reflect the income of the woman involved; and

"(3) will not be imposed on any woman with an income of less than 100 percent of the official poverty line, as established by the Director of the Office of Management and Budget and revised by the Secretary in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981.

"(c) STATEWIDE PROVISION OF SERVICES.—

"(1) IN GENERAL.—The Secretary may not make a grant under section 1501 unless the State involved agrees that services and activities under the grant will be made available throughout the State, including availability to members of any Indian tribe or tribal organization (as such terms are defined in section 4 of the Indian Self-Determination and Education Assistance Act).

"(2) WAIVER.—The Secretary may waive the requirement established in paragraph (1) for a State if the Secretary determines that compliance by the State with the requirement would result in an inefficient allocation of resources with respect to carrying out the purpose described in section 1501(a).

"(d) RELATIONSHIP TO ITEMS AND SERVICES UNDER OTHER PROGRAMS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the grant will not be expended to make payment for any item or service to the extent that payment has been made, or can reasonably be expected to be made with respect to such item or service—

"(1) under any State compensation program, under an insurance policy, or under any Federal or State health benefits program; or

"(2) by an entity that provides health services on a prepaid basis.

(e) COORDINATION WITH OTHER BREAST AND CERVICAL CANCER PROGRAMS.—The Secretary may not make a grant under Section 1501 unless the State involved agrees that the services and activities funded through the grant shall be coordinated with other federal, state and local breast and cervical cancer programs.

"(f) LIMITATION ON ADMINISTRATIVE EXPENSES.—The Secretary may not make a grant under section 1501 unless the State involved agrees that not more than 10 percent of the grant will be expended for administrative expenses with respect to the grant.

"(g) RESTRICTIONS ON USE OF GRANT.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the grant will not be expended to provide inpatient hospital services for any individual.

"(h) RECORDS AND AUDITS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that—

"(1) the State will establish such fiscal control and fund accounting procedures as may be necessary to ensure the proper disbursal of, and accounting for, amounts received by the State under such section; and

"(2) upon request, the State will provide records maintained pursuant to paragraph (1) to the Secretary or the Comptroller of the United States for purposes of auditing the expenditures by the State of the grant.

"(i) REPORTS TO SECRETARY.—The Secretary may not make a grant under section 1501 unless the State involved agrees to submit to the Secretary such reports as the Secretary may require with respect to the grant.

"SEC. 1505. DESCRIPTION OF INTENDED USES OF GRANT.

"The Secretary may not make a grant under section 1501 unless—

"(1) the State involved submits to the Secretary a description of the purposes for which the State intends to expend the grant;

"(2) the description identifies the populations, areas, and localities in the State with a need for the services or activities described in section 1501(a); and

"(3) the description provides information relating to the services and activities to be provided, including a description of the manner in which the services and activities will be coordinated with any similar services or activities of public or nonprivate entities; and

"(4) the description provides assurances that the grant funds will be used in the most cost-effective manner.

"SEC. 1506. REQUIREMENT OF SUBMISSION OF APPLICATION.

"The Secretary may not make a grant under section 1501 unless an application for the grant is submitted to the Secretary, the application contains the description of intended uses required in section 1505, and the application is in such form, is made in such manner, and contains such agreements, assurances, and information as the Secretary determines to be necessary to carry out this title.

"SEC. 1507. TECHNICAL ASSISTANCE AND PROVISION OF SUPPLIES AND SERVICES IN LIEU OF GRANT FUNDS.

"(a) TECHNICAL ASSISTANCE.—The Secretary may provide training and technical assistance with respect to the planning, development, and operation of any program or service carried out pursuant to section 1501. The Secretary may provide such technical assistance directly or through grants to, or contracts with, public and private entities.

"(b) PROVISION OF SUPPLIES AND SERVICES IN LIEU OF GRANT FUNDS.—

"(1) IN GENERAL.—Upon the request of a State receiving a grant under section 1501, the Secretary may, subject to paragraph (2), provide supplies, equipment, and services for the purpose of aiding the State in carrying out such section and, for such purpose, may detail to the State any officer or employee of the Department of Health and Human Services.

"(2) CORRESPONDING REDUCTION IN PAYMENTS.—With respect to a request described in paragraph (1), the Secretary shall reduce the amount of payments under the grant under section 1501 to the State involved by an amount equal to the costs of detailing personnel (including pay, allowances, and travel expenses) and the fair market value of any supplies, equipment, or services provided by the Secretary. The Secretary shall, for the payment of expenses incurred in complying with such request, expend the amounts withheld.

"SEC. 1508. EVALUATIONS AND REPORTS.

"(a) EVALUATIONS.—The Secretary shall, directly or through contracts with public or private entities, provide for annual evaluations of programs carried out pursuant to section 1501.

"(b) REPORT TO CONGRESS.—The Secretary shall, not later than 1 year after the date on which amounts are first appropriated pursuant to section 1509(a), and annually thereafter, submit to the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Labor and Human Resources of the Senate, a report summarizing evaluations carried out pursuant to subsection (a) during the preceding fiscal year and making such recommendations for administrative and legislative initiatives with respect to this title as the Secretary determines to be appropriate.

"SEC. 1509. FUNDING.

"(a) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out this title, there are authorized to be appropriated $50,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993.

"(b) SET-ASIDE FOR TECHNICAL ASSISTANCE AND PROVISION OF SUPPLIES AND SERVICES.—Of the amounts appropriated under subsection (a) for a fiscal year, the Secretary shall reserve not more than 20 percent for carrying out section 1507.

EXCELLENCE IN MATHEMATICS, SCIENCE AND ENGINEERING EDUCATION ACT

KENNEDY AMENDMENT NO. 2576

Mr. NUNN (for Mr. KENNEDY) proposed an amendment to the bill (H.R. 996) to establish the congressional scholarships for science, mathematics, and engineering, and for other purposes, as follows:

Strike out all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Excellence in Mathematics, Science and Engineering Education Act of 1990".

SEC. 2. TABLE OF CONTENTS.

The table of contents is as follows:

Sec. 1. Short title.
Sec. 2. Table of contents.
TITLE I—NATIONAL GOAL AND POLICY FOR MATHEMATICS, SCIENCE AND ENGINEERING EDUCATION
Sec. 101. Findings and objectives.
Sec. 102. Declaration of policy and principles.
Sec. 103. National goals for the year 2000.
TITLE II—SCIENTIFIC AND TECHNICAL LITERACY
PART A—INFORMATION DISSEMINATION IN MATHEMATICS AND SCIENCE EDUCATION
Sec. 201. National clearinghouse for mathematics, science and technology education.
PART B—REGIONAL MATHEMATICS AND SCIENCE EDUCATIONAL PROGRAMS
Sec. 211. Regional mathematics and science education consortia.
PART C—TECHNOLOGY AND LEARNING
Sec. 221. National Center of Technology and Learning.
Sec. 222. Start Schools Telecommunications Demonstration Program.

PART D—INFORMAL MATHEMATICS, SCIENCE AND TECHNOLOGY EDUCATION PROGRAMS
Sec. 231. Museums, planetariums, libraries and zoos.
PART E—GRANTS TO LOCAL EDUCATIONAL AGENCIES FOR SYSTEMIC REFORM
Sec. 241. Systemic reform.
PART F—TECHNICAL AMENDMENT
Sec. 251. Technical amendment.
TITLE III—EDUCATION OF SCIENTISTS AND ENGINEERS
PART A—UNDERGRADUATE PROGRAMS
SUBPART 1—INSTRUCTION IMPROVEMENT
Sec. 301. Centers of excellence.
Sec. 302. National mathematics-science teacher corps.
SUBPART 2—NATIONAL SCIENCE SCHOLARS PROGRAM
Sec. 311. National science scholar's program.
Sec. 312. Conforming amendments.
PART B—GRADUATE FELLOWSHIPS AND TRAINEESHIPS
Sec. 321. Statement of purpose.
Sec. 322. Graduate fellowships.
Sec. 323. Graduate traineeships.
TITLE IV—WOMEN AND MINORITIES IN MATHEMATICS, SCIENCE AND ENGINEERING
Sec. 401. Statement of purpose.
Sec. 402. Distinguished visiting professors.
Sec. 403. Faculty awards for women and minorities.
Sec. 404. Alliances for minority participation.

TITLE I—NATIONAL GOAL AND POLICY FOR MATHEMATICS, SCIENCE AND ENGINEERING EDUCATION

SEC. 101. FINDINGS AND OBJECTIVES.

(a) FINDINGS.—The Congress finds that—

(1) America's competitive position in the global economy is eroding, and it is paramount that the competitive position of the United States be restored;

(2) advances in science and technology depend, in large part, on the quantity and quality of the Nation's mathematicians, scientists, and engineers;

(3) international comparisons show American students are consistently behind their foreign counterparts in mathematics and science achievement;

(4) currently 60,000 teachers in the fields of mathematics, science and engineering are not fully qualified to teach in such fields, and by the year 2000 the Nation must produce an additional 300,000 mathematics, science and engineering teachers;

(5) projections by the National Science Foundation estimate a shortage of 675,000 scientists and engineers by the year 2000; and

(6) women and minorities are significantly underrepresented in the fields of mathematics, science and engineering, and this is unacceptable if all citizens are to have equal opportunity to pursue careers of their choosing.

(b) NATIONAL OBJECTIVES.—The Congress, as a consequence of the findings described in subsection (a), declares that it shall be a national objective to—

(1) encourage American students to pursue careers in mathematics, science and engineering;

(2) improve the quality of teaching in mathematics and science made available to all Americans;

(3) have American students rank first in the world in mathematics and science;

(4) substantially increase the number of graduates with degrees in mathematics, science and engineering; and

(5) substantially increase the number of women and minorities pursuing careers in mathematics, science and engineering.

SEC. 102. DECLARATION OF POLICY AND PRINCIPLES.

(a) POLICY.—The Congress declares that it shall be the policy of the United States to—

(1) improve the academic performance of all elementary and secondary school students in mathematics and science;

(2) recognize the special value to the Nation of, and meet the special requirements for, educating and training sufficient numbers of mathematicians, scientists and engineers; and

(3) devote the necessary resources to stimulate and foster the education, training, and substantially increased participation of women and minorities in mathematics, science and engineering.

(b) PRINCIPLES.—The Congress further declares that the policies described in subsection (a) shall be implemented in accordance with the following principles:

(1) The strength of the American educational system stems from the system's grounding in local communities, the diversity of educational approaches employed by State governments, the voluntary participation of the private sector, and informal education through public television, museums, and other community programs.

(2) In order for the Federal Government to carry out its role more effectively, the Federal Government should improve the exchange of information and coordination among the National Science Foundation, the Departments of Education, Energy, and Defense, the National Aeronautics and Space Administration, and other Federal agencies that have mathematics, science and technology education programs.

(3) It shall be a priority of the Congress to adequately fund existing programs in mathematics and science education in the Department of Education, the National Science Foundation, and other Federal departments and agencies.

SEC. 103. NATIONAL GOAL FOR THE YEAR 2000.

(a) DECADE DESIGNATION.—The Congress declares that the period from January 1, 1990 through December 31, 1999, shall be designated as the "Decade of Excellence in American Mathematics, Science and Engineering Education".

(b) NATIONAL GOAL.—The Congress declares that it shall be a paramount national goal of the United States to achieve the objectives set forth in section 101(b) by the beginning of the year 2000.

(c) ASSESSMENT AND ACHIEVEMENT.—In order to assess progress toward, and achievement of, the goal set forth in subsection (b) of this section, the National Science Foundation, the Department of Education, and the Science Adviser to the President, shall—

(1) set forth the objectives described in section 101(b) in sufficient detail so that such objectives provide for—

(A) acceptable standards of public literacy in mathematics, science and technology,

(B) increase student interest and academic performance in mathematics and science,

(C) the professional development of sufficient numbers of mathematicians, scientists, and engineers,

(D) the attraction and retention of sufficient numbers of fully qualified teachers in the fields of mathematics, science and engineering, and

(E) greater participation of women and minorities in the fields of mathematics, science and engineering;

(2) develop and disseminate appropriate criteria and guidelines to assess the extent of the Nation's achievement of such objectives;

(3) collect relevant statistics and other necessary data throughout the decade described in section 103(a), and analyze such information to assess progress toward the goal set forth in subsection (b);

(4) sponsor an international survey in 1999, to determine whether American students have improved their academic performance and surpassed their counterparts in other nations in knowledge and understanding of mathematics, science and engineering; and

(5) provide a final report to the President and the Congress which provides a comprehensive assessment of the extent to which such national goal has been achieved by the year 2000.

TITLE II—SCIENTIFIC AND TECHNICAL LITERACY

PART A—INFORMATION DISSEMINATION IN MATHEMATICS, SCIENCE AND ENGINEERING EDUCATION

SEC. 201. NATIONAL CLEARINGHOUSE FOR MATHEMATICS, SCIENCE AND TECHNOLOGY EDUCATION

(a) CLEARINGHOUSE AUTHORIZED.—(1) The Secretary, in consultation with the Director, is authorized to award a grant or contract to establish a National Clearinghouse for Mathematics, Science and Technology Education (hereinafter referred to as the "Clearinghouse".

(2) The grant or contract awarded pursuant to paragraph (1) shall be made on a competitive, merit basis.

(3) The grant or contract awarded under this section shall be awarded for a period of 5 years and shall be reviewed by the Secretary no later than 30 months from the date the grant or contract is awarded.

(b) USE OF FUNDS.—(1) The grant or contract awarded under this section shall be used to—

(A) maintain a permanent repository of mathematics, science and technology education instructional materials and programs which shall—

(i) emphasize elementary school teachers preparation materials, and

(ii) include all materials and programs developed in whole or in part with Federal funds;

(B) compile information on all mathematics, science and technology education administered by each Federal agency or department;

(C) coordinate with identifiable and existing data bases containing mathematics, science curriculum and instructional materials, including Federal and non-Federal data bases; and

(D) disseminate instructional materials and programs.

(2) The Clearinghouse, in carrying out the provisions of this section, shall ensure compliance with the provisions of title 17 of the United States Code.

(c) PROGRAMS AND MATERIALS.—Each Federal agency or department which develops mathematics, science and technology education instructional material or programs, including the National Science Foundation, and the Department of Education, shall submit to the Clearinghouse copies of such material or programs.

(d) APPLICATION.—Each entity desiring to establish and operate the Clearinghouse authorized in subsection (a) shall submit an application to the Secretary at such time, in such manner and accompanied by such information as the Secretary may reasonably require.

PART B—REGIONAL MATHEMATICS, SCIENCE AND EDUCATIONAL PROGRAMS

SEC. 211. REGIONAL MATHEMATICS, SCIENCE AND EDUCATION CONSORTIA.

(a) PROGRAM ESTABLISHED.—(1) The Secretary, in consultation with the Director, is authorized to award grants or contracts to eligible entities to establish and operate regional mathematics, science and education consortia for the purpose of—

(A) disseminating exemplary mathematics, science and technology education instructional materials; and

(B) providing technical assistance for the implementation of teaching methods and assessment tools for use by elementary and secondary school students, teachers and administrators.

(2) The Secretary shall, in accordance with the provisions of this section, award at least 1 grant or contract to an eligible entity in each region.

(3) If the amount appropriated pursuant to the authority of section 621(b) is less than $4,500,000, then the Secretary may waive the provisions of paragraph (2) and award grants or contracts of sufficient size, scope and quality to carry out the provisions of this section.

(4) The Secretary shall carry out the provisions of this section in consultation and cooperation with the Director.

(5) Grants or contracts awarded under this section shall be awarded for a period of 5 years and shall be reviewed by the Secretray no later than 30 months from the date the grant or contract is awarded.

(6) Each Regional Consortium, in carrying out the provisions of this section, shall ensure compliance with the provisions of title 17 of the United States Code.

(b) DEFINITIONS.—For purposes of this section—

(1) the term "eligible entity" means—

(A) a private nonprofit organization of demonstrated effectiveness;

(B) an institution of higher education;

(C) an elementrary or secondary school;

(D) a State or local educational agency;

(E) a regional educational laboratory and the research and development center established under section 405(d)(4)(A) of the General Education Provisions Act; or

(F) a combination of the entities set forth in subparagraphs (A) through (E);

with demonstrated expertise in mathematics, and science education;

(2) the term "region" means a region of the United States served by a regional education laboratory that is supported by the Secretary pursuant to section 405(d)(4)(A)(i) of the General Education Provisions Act; and

(3) the term "Regional Consortium" means each regional mathematics, science and education consortium established pursuant to subsection (a).

(c) USE OF FUNDS.—Funds provided under this section may be used by a Regional Consortium, under the direction of a regional board established pursuant to subsection (f), to—

(1) disseminate information on exemplary precollege mathematics, science education instruction materials, teaching methods and assessment tools;

(2) assits, train and provide technical assistance to classroom teachers, administrators, and other educators to identify, implement or adapt the instructional materials, teaching methods and assessment tools described in paragraph (1);

(3) provide for the training of classroom teachers to enable such teachers to instruct other teachers, administrators, and educators in the use of the instructional materials, teaching methods and assessment tools described in paragraph (1) in the classroom;

(4) when necessary, provide financial assistance to enable teachers and other educators to attend and participate in the activities of the Regional Consortium;

(5) enable highly qualified mathematics and science teachers, designated as Roving Master Teachers, to visit a number of elementary and secondary schools throughout the region to conduct special classes in mathematics and science in each such school, including—

(A) utilizing experiments, demonstrations, and audio visual displays to stimulate student interest in mathematics and science; and

(B) conducting periodic workshops for teachers in the schools visited;

(6) assist elementary and secondary schools in restructuring mathematics, science and technology instruction, and in organizing teacher training programs;

(7) implement programs and activities designed to meet the needs of groups that are underrepresented in, and underserved by, mathematics, science and technology education;

(8) help State and local educational agencies or consortia thereof assess the need for and the desirability of regional mathematics, science and technology academies;

(9) develop and disseminate early childhood education mathematics and science instructional materials; and

(10) develop intergenerational projects to train senior citizen volunteers in the implementation of interactive science processes and activities for use by elementary and secondary school students.

(d) APPLICATION AND REVIEW.—Each eligible entity desiring a grant under this section shall submit an application to the Secretary at such time, in such manner, and accompanied by such additional information as the Secretary, in consultation with the Director, may reasonably require. Each such application shall—

(1) demonstrate that the eligible entity has demonstrated expertise in the fields of mathematics and science education;

(2) demonstrate that the eligible entity shall implement and disseminate mathematics and science education instructional materials, teaching methods and assessment tools;

(3) demonstrate that emphasis will be given to programs and activities designed to meet the needs of groups that are underrepresented in, and underserved by, mathematics, science and education;

(4) demonstrate that the business community in the region served by the Regional Consortium will play an integral role in designing and supporting the Regional Consortium's work;

(5) demonstrate that the eligible entity will consider the resources of existing Star Schools consortia in carrying out the provisions of this part, where appropriate.

(e) APPROVAL OF APPLICATION.—(1) The Secretary, in consultation with the Director, shall approve applications submitted pursuant to subsection (d) in accordance with the criteria and procedures established under paragraph (2).

(2) The Secretary, in consultation with the Director, shall develop procedures and criteria designed to ensure that grants or contracts are awarded on a competitive, merit basis as determined by the peer review process described in paragraph (3).

(3) The Secretary, in consultation with the Director, shall establish for each region a panel which shall conduct the technical review of the applications from such region for grants or contracts under this section and submit its recommendations to the Secretary and Director. The Secretary and Director shall each appoint one-half of the members of each panel, who, to the extent feasible, shall reside in the region for which applications are being considered.

(4) The Secretary, in consultation with the Director, shall establish a national panel, or to the extent necessary, panels, to review the recommendation made by each regional technical review panel and submit to the Secretary and Director final recommendations for awards under this section. The Secretary and the Director shall each appoint one half of the members of such panel or panels.

(f) REGIONAL BOARDS.—Each eligible entity receiving a grant or contract under this section shall establish a regional board to oversee the administration and establishment of program priorities for the Regional Consortium established by such eligible entity. Such regional board shall be broadly representative of the agencies and organizations participating in the Regional Consortium.

(g) PAYMENTS: FEDERAL SHARE; NON-FEDERAL SHARE.—(1) The Secretary shall pay to each eligible entity having an application approved under subsection (e) of this section the Federal share of the cost of the activities described in the application.

(2) The Federal share—

(A) for the first and second years in which an eligible entity receives assistance shall be 90 percent;

(B) for the third and fourth such years shall be 75 percent; and

(C) for the fifth and each succeeding year shall be 50 percent.

(3) The non-Federal share of the cost of activities described in the application submitted pursuant to this section may be in cash or in kind, fairly evaluated.

(h) EVALUATIONS.—(1) The Secretary, through the Office of Educational Research and Improvement, shall collect sufficient data on, and evaluate the effectiveness of, the activities of each Regional Consortium.

(2) The evaluations described in paragraph (1) shall include an assessment of—

(A) student development as measured by achievement gains; and

(B) the effectiveness of the Regional Consortium in meeting the needs of the schools, teachers, administrators and students in the region.

(3) At the end of each grant or contract period, the Secretary shall submit to Congress a report on the effectiveness of the programs conducted at each Regional Consortium.

(i) AMENDMENT TO GENERAL EDUCATION PROVISIONS ACT.—Section 405(d)(4) of the General Education Provisions Act is amended by inserting at the end thereof the following new subparagraph:

"(G) The Secretary shall only award a grant or enter into a contract for a regional educational laboratory if such regional educational laboratory is to be located in the region of the Nation served by such regional educational laboratory.".

PART C—TECHNOLOGY AND LEARNING

SEC. 221. NATIONAL CENTER OF TECHNOLOGY AND LEARNING.

(a) PROGRAM AUTHORIZED.—The Secretary, through the Office of Educational Research and Improvement, is authorized to award a grant or contract to a private nonprofit institution or organization for the establishment and management of a National Center of Technology and Learning (hereafter in this section referred to as the "Center").

(b) DUTIES.—The Center shall conduct interdisciplinary research on the processes by which individuals learn and the ways in which advanced technologies can be utilized to facilitate such processes and shall widely disseminate the results of such research.

(c) INTERDISCIPLINARY RESEARCH.—In conducting the interdisciplinary research described in subsection (b), the Center shall utilize state-of-the-art developments in advanced technologies and research findings in all relevent fields, including the social sciences, cognitive sciences, computer science, communications technology, information storage and retrieval and audio-visual technologies.

(d) APPLICATION.—Each private nonprofit institution or organization desiring a grant or contract pursuant to subsection (a) shall submit an application at such time, in such manner and accompanied by such information as the Secretary may reasonably require.

SEC. 222. STAR SCHOOLS TELECOMMUNICATIONS DEMONSTRATION PROGRAM.

(a) PROGRAM AUTHORIZED.—The Director is authorized to award grants on a competitive basis to partnerships consisting of State educational agencies, public television, institutions of higher education, and local school districts, for projects that demonstrate statewide or multi-state application of innovative telecommunications and computer networking technology that will provide effective mathematics and science education programs to rural and urban areas which are underserved in fields of mathematics and science institution or to areas which have a high number or percentage of students below the poverty line.

(b) USE OF FUNDS.—Grants awarded under subsection (a) may be used for—

(1) purchasing and updating equipment;

(2) the development of interactive linkages with several school districts;

(3) teacher training; or

(4) other appropriate projects that will improve math and science education in such underserved areas.

(c) DEFINITION.—For the purpose of this section, the term "poverty line" means the income official poverty line (as defined by the Office of Management and Budget and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) applicable to a family of the size involved.

PART D—INFORMAL MATHEMATICS, SCIENCE AND TECHNOLOGY EDUCATION PROGRAMS

SEC. 231. MUSEUMS, PLANETARIUMS, LIBRARIES, AND ZOOS.

(a) IN GENERAL.—(1) The Director is authorized to award grants to museums, planetariums, libraries, zoos, and other science-technology centers to enable such organizations to—

(A) develop more effective, hands-on, interactive mathematics, science and technology programs and activities;

(B) make such programs and activities more widely available throughout the surrounding community, giving special attention to the needs of female and minority children and economically disadvantaged areas; and

(C) report on such programs and activities to the Clearinghouse established under section 201 for subsequent dissemination through the Regional Consortia established under section 211.

(2) Grants awarded pursuant to subsection (a) shall be awarded on a competitive basis.

(b) SPECIAL CONSIDERATION.—In awarding grants pursuant to subsection (a), the Director shall give special consideration to programs designed primarily for elementary school-aged children.

(c) GEOGRAPHIC DISTRIBUTION.—In awarding grants pursuant to subsection (a), the Director shall, to the extent practicable, ensure an equitable geographic distribution of such grants.

PART E—GRANTS TO LOCAL EDUCATIONAL AGENCIES FOR SYSTEMIC REFORM

SEC. 241. SYSTEMIC REFORM.

(a) IN GENERAL.—The Director is authorized to award grants to local educational agencies in urban and rural areas for projects that implement system-wide improvement in elementray or secondary school mathematics and science education.

(b) IMPROVEMENT COMPONENTS.—Each project for which a grant is awarded pursuant to subsection (a) shall include the following components:

(1) increased student achievement;

(2) improvements in organizational structure and decision-making;

(3) modifications in the provision and allocation of resources;

(4) improvement in the recruitment, retention and continuing professional development of teachers and other educators;

(5) improved curriculum content and learning goals; and

(6) other systemic reform issues as appropriate.

(c) SPECIAL RULE.—In awarding grants pursuant to subsection (a), the Director shall—

(1) to the extent practicable, ensure an equitable geographic distribution of such grants; and

(2) give priority to school districts whose improvement plans place a strong emphasis on increasing the academic achievement of females and minority students.

PART F—TECHNICAL AMENDMENT

SEC. 251. TECHNICAL AMENDMENT.

Section 14(f) of the National Science Foundation Act of 1950, is amended by inserting "or education" after "research".

TITLE III—EDUCATION OF SCIENTISTS AND ENGINEERS

PART A—UNDERGRADUATE PROGRAMS

Subpart 1—Instruction Improvement

SEC. 301. CENTERS OF EXCELLENCE.

(A) STATEMENT OF PURPOSE.—It is the purpose of this section to strengthen undergraduate teaching of mathematics, science and engineering at institutions of higher education that do not have strong departments in such fields.

(b) PROGRAM AUTHORIZED.—(1) The Director is authorized to award grants to institutions of higher education to establish centers of excellence for the purpose described in subsection (a).

(2) Grants made pursuant to paragraph (1) may be made for institution-wide projects or for projects to be carried out within a specific department or by several departments of an institution of higher education.

(c) SPECIAL RULE.—In awarding grants pursuant to subsection (b), the Director shall—

(1) to the extent practicable, ensure an equitable geographic distribution of such grants; and

(2) ensure that priority is given to institutions that educate a large number of women and minorities.

SEC. 302. NATIONAL MATHEMATICS-SCIENCE TEACHER CORPS.

(a) ESTABLISHMENT OF PROGRAM.—The Director is authorized to make awards to students enrolled in a baccalaureate degree program in mathematics, science or engineering who are willing to commit themselves to teach elementary or secondary mathematics or science as provided in this section.

(b) ELIGIBILITY.—Awards under this section shall only be made to students who are—

(1) majoring in mathematics, science or engineering;

(2) in the last 2 years of a baccalaureate degree program; and

(3) enrolled in an institution of higher education which is accredited by a nationally recognized accrediting agency or association.

(c) CRITERIA FOR SELECTION.—Students shall be selected to receive awards under this section primarily on the basis of academic merit, with consideration given to financial need and to the goal of increasing the participation in elementary and secondary mathematics and science teaching of minorities, women, and individuals with disabilities.

(d) AMOUNT OF AWARD.—(1) Awards under this section shall be $5,000 per year, except that no grant may exceed the cost of attendance at the institution of higher education as defined in section 472 of the Higher Education Act of 1965. Except as provided in paragraph (2) of this subsection, a student may receive a maximum of 2 awards under this section.

(2) An individual may receive a maximum of 3 awards under this section if such individual has completed requirements for the baccalaureate degree but requires additional credits in education courses in order to obtain certification to teach.

(e) GRANT AGREEMENT.—Each individual receiving an award under this section shall enter into an agreement with the Director. Each such agreement shall require the individual to complete, within 6 years after graduation from the baccalaureate degree program for which the award was made, at least 2 years of service as an elementary or secondary mathematics or science teacher for each award received. Service required under this section shall be performed at a school described in section 465(a)(2)(A) of the Higher Education Act of 1965.

(f) FAILURE TO COMPLETE SERVICE OBLIGATION.—If an individual who has received an award under this section—

(1) fails to maintain an acceptable level of academic standing in the educational institution in which he is enrolled;

(2) is dismissed from such educational institution;

(3) withdraws from the baccalaureate degree program for which the award was made before the completion of such program; or

(4) fails to fulfill his service obligation under this section,

such individual shall be liable to the United States for repayment of the award received under this section, plus interest at a rate and on a schedule to be determined by the Director.

Subpart 2—National Science Scholars Program

SEC. 311. NATIONAL SCIENCE SCHOLARS PROGRAM.

Part A of title IV of the Higher Education Act of 1965 (hereafter in this subpart referred to as the "Act") is amended—

(1) by redesignating subparts 7 and 8, as subparts 8 and 9, respectively; and

(2) by inserting after subpart 6 the following new subpart:

"Subpart 7—National Science Scholars Program

"PURPOSE

"SEC. 419L. (a) It is the purpose of this subpart—

"(1) to establish a National Science Scholars Program to recognize student excellence and achievement in the physical, life, mathematics, computer sciences, and engineering;

"(2) to encourage role models in physical, life, mathematics, computer sciences and engineering fields for young people by offering opportunities to pursue a postsecondary education in such fields;

"(3) to strengthen the leadership of the United States in the fields of physical, life, mathematics, computer sciences and engineering; and

"(4) to assist students who have demonstrated outstanding academic achievement in continuing their education in these fields of study.

"SCHOLARSHIPS AUTHORIZED

"SEC. 419M. (a) PROGRAM AUTHORITY.—(1) The Secretary is authorized, in consultation with the Director of the National Science Foundation (hereinafter referred to as the 'Director') and in accordance with the provisions of this subpart, to carry out a program of awarding scholarships for the study of the life, physical, mathematics, computer sciences or engineering.

"(2) The Director, in consultation with the Secretary, shall establish and implement a merit-based program for annually awarding scholarships for the study of physical, life, mathematics, computer sciences or engineering to—

"(A) one male and one female from each congressional district of the United States, the District of Columbia, and Puerto Rico; and

"(B) one male and one female from Guam, the Virgin Islands, American Samoa, Palau, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Commonwealth of the Northern Mariana Islands.

"(3) Wherever possible in awarding scholarships, special consideration shall be given to economically disadvantaged students or students from groups traditionally underrepresented in the life, physical, mathematics, computer sciences and engineering professions.

"(b) NOTIFICATION OF SECONDARY SCHOOLS.—The Secretary shall notify all public and private secondary schools and all institutions of higher education in each State and in each of the entities set forth in subsection (a)(2)(B) annually of the availability of scholarships under this subpart.

"(c) CRITERIA AND PROCEDURE FOR NOMINATION AND SELECTION.—(1) Individuals shall be nominated and selected for scholarships under this subpart on the basis of the student's—

"(A) academic achievement in the life, physical, mathematics, computer sciences or engineering;

"(B) promise of outstanding academic achievement in physical, life, mathematics, computer sciences or engineering;

"(C) potential to successfully complete a postsecondary program in physical, life, mathematics, computer sciences or engineering; and

"(D) motivation to pursue a career in physical, life, mathematics, computer sciences or engineering.

"(2) The Director, in consultation with the Secretary, shall appoint a National Science Scholars Program Board (hereinafter referred to as the 'Board'), composed of scientists, mathematicians, educators, engineers, and representatives of the business community, to—

"(A) recommended to the Director specific academic achievement criteria for use in the nomination of scholars; and

"(B) make recommendations for awarding scholarships to the Director.

The Director, in consultation with the Secretary, shall review the Board's recommendations and the Director and the Secretary shall each publish the appropriate academic achievement criteria in the Federal Register.

"(3) The Director, in consultation with the Secretary, is authorized to establish, either directly or by contract, a procedure for nominating at least 4, but not more than 10 students from each congressional district and from each of the entities set forth in subsection (a)(2)(B), for scholarships under this subpart. The Director shall ensure that such nominations shall be made in consultation with educators, scientists, mathematicians, engineers, and representatives of the business community.

"(4) After considering the students nominated under paragraph (3), the Director, in consultation with the Board, shall recommend to the President one male and one female from each congressional district of the United States, and one male and one female from each of the entities set forth in subsection (a)(2)(B), for scholarships under this subpart.

"(d) DISBURSAL OF SCHOLARSHIP PROCEEDS.—Scholarship proceeds shall be disbursed by the Secretary on behalf of students who receive scholarships under this subpart to the institutions of higher education at which the students are enrolled. No scholarship proceeds shall be disbursed on behalf of a student until the student is enrolled at an institution of higher education.

"(e) NATIONAL SCIENCE SCHOLARS.—(1) Students awarded scholarships under this subpart shall be known as 'National Science Scholars'.

"(2) Students nominated under subsection (c) but not awarded scholarships under this subpart shall be known as 'National Science Scholarship Finalists'.

"(f) NATURE AND AMOUNT OF SCHOLARSHIPS.—(1) Scholarships shall be limited to a maximum of $5,000 per student, per year, for a period not to exceed 4 years.

"(2) In the event that funds available in a fiscal year are insufficient to fully fund all awards under this subpart, the amount paid to each student shall be ratably reduced.

"(g) USE OF EXCESS FUNDS.—If the funds available under this subpart for any fiscal year exceed the amounts required for initial and continuing awards under this section, additional scholarships may be awarded by the President, in consultation with the Director, to students selected as National Science Scholarship Finalists for the award year.

"(h) RELATION TO COST OF ATTENDANCE AND OTHER GRANTS AND SCHOLARSHIPS.—(1) The amount of a scholarship awarded under this subpart shall be reduced by the amount that the scholarship exceeds the student's cost of attendance, as defined in section 472 of the Act.

"(2) Notwithstanding any other provision of law, the award made under this subpart shall be considered as income for the purposes of awarding Federal student financial aid.

"(i) SPECIAL RULE.—The Director shall encourage the support and assistance of civic groups, the business community, professional associations, institutions of higher education, and others in providing scholarship assistance to National Science Scholarship Finalists.

"(j) ANNOUNCEMENT AND AWARD OF SCHOLARSHIPS.—The selection process shall be completed, and the announcement of the selection of National Science Scholars will be made by the President prior to January 1st of each fiscal year. The Secretary shall notify Members of Congress of selections before the public announcement by the President. Presentation of scholarships shall be made in a public ceremony.

"ELIGIBILITY OF SCHOLARS

"Sec. 419N. (a) REQUIREMENTS FOR INITIAL AWARD.—To be eligible to receive a scholarship under section 419M, a student shall—

"(1) be scheduled to graduate from a public or private secondary school, or to obtain the equivalent of a certificate of graduation (as recognized by the State or entity in which the student resides), during the school year in which the award is made;

"(2) be a citizen or national of the United States or the entities set forth in subsection (a)(2)(B), or be an alien lawfully admitted to the United States for permanent residence; and

"(3) have applied, or intend to apply, for admission to an institution of higher education in the United States or an institution of higher education in the entities set forth in subsection (a)(2)(B), that is accredited by a nationally recognized accrediting agency or association in accordance with the provisions of section 1201(a) of the Act.

"(b) MAINTAINING ELIGIBILITY.—(1) In order to maintain eligibility to receive funds pursuant to a scholarship awarded under this subpart, a student must—

"(A) be enrolled at an institution of higher education that is accredited by a nationally recognized accrediting agency or association in accordance with the provisions of section 1201(a) of the Act;

"(B) major in any field of physical, life, mathematics, computer science or engineering;

"(C) maintain academic performance in good standing, as determined by such institution; and

"(D) except as provided in paragraph (2), carry a full-time academic work load, as determined by the institution in which the student is enrolled under standards applicable to all students enrolled in that student's program.

"(2) The Secretary shall make exceptions to the requirement under paragraph (1)(D) in the case of a student who—

"(A) is on active duty as a member of the armed services;

"(B) has a disability or serious injury as certified by a qualified physician; or

"(C) has exceptional personal circumstances or emergencies, as determined by the Secretary.

"(c) FAILURE TO MEET ELIGIBILITY REQUIREMENTS.—In the event that the student fails to meet the requirements of this section, the student's eligibility to receive further scholarships (or scholarship proceeds) under this subpart shall be determined in accordance with the regulations of the Secretary.

"SUMMER EMPLOYMENT OPPORTUNITIES FOR SCHOOLS

"SEC. 4190. (a) PRIORITY FOR SUMMER EMPLOYMENT.—To the extent that they are otherwise qualified, students receiving scholarships under this subpart shall be given priority consideration for federally financed summer employment in federally funded research and development centers, that, to the maximum extent practicable, complements and reinforces the educational program of these students.

"(b) FEDERAL AGENCY COOPERATION.—Federal agencies shall cooperate fully with the Secretary and participate actively in providing appropriate summer employment opportunities for such students.

"EFFECTIVE DATE

"SEC. 419P. The amendments made by this subpart shall be effective on October 1, 1990, for award year 1991-1992 and each succeeding award year thereafter.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 419Q. There are authorized to be appropriated $6,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993 to carry out the provisions of this subpart.".

SEC. 312. CONFORMING AMENDMENTS.

(a) IN GENERAL.—Section 401(b) of the Act is amended by striking out "subparts 1 through 8," and inserting in lieu thereof "subparts 1 through 9,".

(b) CONFORMING AMENDMENT.—Section 481(a)(1) of the Act is amended by striking out "except subpart 6" and inserting in lieu thereof "except subparts 6 and 7".

PART B—GRADUATE FELLOWSHIPS AND TRAINEESHIPS

SEC. 321. STATEMENT OF PURPOSE.

It is the purpose of this part to avert the substantial shortage of American scientists and engineers projected to occur over the next 15 years by significantly increasing the number of graduate fellowships awarded by the National Science Foundation and to institute a program of graduate traineeships.

SEC. 322. GRADUATE FELLOWSHIPS.

(a) IN GENERAL.—The Director is authorized to increase the number of graduate fellowships awarded by the Foundation, so that, in fiscal year 1993 and each fiscal year thereafter, at least 1,200 fellowships are awarded annually.

(b) SPECIAL RULE.—In awarding fellowships pursuant to subsection (a), the Director shall ensure that a substantially increasing number of fellowships shall be awarded to women and minorities in fiscal year 1991 and in each succeeding fiscal year through fiscal year 2000.

(c) GRADUATE FELLOWSHIPS.—Section 10 of the National Science Foundation Act of 1950 is amended in the second sentence by striking "or nationals" and inserting ", nationals or lawfully admitted permanent resident aliens".

SEC. 323. GRADUATE TRAINEESHIPS.

(a) IN GENERAL.—The Director is authorized to carry out a program of awarding grants to institutions of higher education to enable such institutions to conduct traineeship programs which encourage promising students, especially women and minorities, to continue their education and research in mathematics, science, and engineering.

(b) SPECIAL RULE.—In awarding grants pursuant to subsection (a), the Director shall, to the extent practicable, ensure—

(1) an equitable geographic distribution of such grants;

(2) that institutions of higher education receiving such grants demonstrate experience in, and a commitment to, educating and graduating a significant number of women and minority students from traineeship programs in mathematics, science and engineering;

(3) that special consideration is given to institutions of higher education that have historically been attended by relatively few students who receive National Science Foundation fellowships; and

(4) that special consideration is given for awarding traineeships in academic disciplines experiencing the greatest shortages of scientists and engineers.

TITLE IV—WOMEN AND MINORITIES IN MATHEMATICS, SCIENCE AND ENGINEERING

SEC. 401. STATEMENT OF PURPOSE.

It is the purpose of this title to expand and enhance National Science Foundation program activities that are specifically focused on increasing the educational and professional participation of women and minorities in the field of mathematics, science and engineering.

SEC. 402. DISTINGUISHED VISITING PROFESSORS.

The Director is authorized to make grants to institutions of higher education to enable such institutions to make awards to distinguished women and minority faculty members in mathematics, science and engineering to enable such faculty members to serve as "Distinguished Visiting Professors" at academic institutions that do not have sufficient resources to attract and retain faculty members of such professional statute on a permanent basis.

SEC. 403. FACULTY AWARDS FOR WOMEN AND MINORITIES.

The Director is authorized to award grants to institutions of higher education, other than research universities, to enable such institutions to recruit and retain women and minority faculty members in the fields of mathematics, science and engineering, and to obtain equipment and facilities necessary for the research activities of such faculty members.

SEC. 404. ALLIANCE FOR MINORITY PARTICIPATION.

(a) IN GENERAL.—The Director is authorized to award grants to institutions of higher education to enable such institutions of higher education to establish or maintain alliances, partnerships, or other cooperative arrangements between institutions of higher education with predominately minority enrollments and institutions of higher education with high quality research programs in mathematics, science or engineering.

(b) SPECIAL RULE.—In awarding grants prusuant to this title, the Director shall, to the extent practicable, ensure—

(1) an equitable geographic distribution of such grants; and

(2) that institutions of higher education receiving such grants demonstrate experience in, and a commitment to, educating and graduating a significant number of women and minority students from programs in mathematics, science and engineering.

* * * * *

(2) oversee education partnership programs established in accordance with section 504; and

(3) coordinate, and collect and disseminate information on, all agency programs that promote scientific academic study or the development of the scientific and engineering work force.

(b) CRITICAL ACADEMIC AREAS.—Each mission agency shall identify each area of scientific academic study that is critical to the mission of the agency.

SEC. 503. EDUCATION PROGRAMS AND TRAINING.

(a) UNDERGRADUATE AND GRADUATE EDUCATION PROGRAMS.—(1) Each mission agency shall establish or designate not less than 2 programs for the purpose of awarding grants to institutions of higher education to enhance undergraduate or graduate education in critical academic areas.

(2) An institution of higher education may use grants provided under paragraph (1) to develop—

(A) undergraduate and graduate scholarship programs for critical academic areas;

(B) minority research grants or fellowships;

(C) cooperative programs; and

(D) institutional support.

(3) In awarding grants under this subsection, the education official of a mission agency shall give priority to projects designed to attract women and minorities into the scientific and engineering work force.

(4) To be eligible to receive a grant under paragraph (1), an institution of higher education shall submit an application to the education official of a mission agency at such time, in such manner, and containing such information as the education official shall by regulation provide.

(b) ELEMENTARY AND SECONDARY EDUCATION PROGRAMS.—(1) Each mission agency shall establish or designate not less than 2 programs for the purpose of enhancing the mathematics and science knowledge and abilities of elementary and secondary school faculty and students.

(2) The mission agency may establish programs under this section to develop—

(A) workshops, seminars, or summer employment programs for faculty or students;

(B) science and math resource materials; and

(C) formal, informal, or volunteer outreach programs.

(3) In order to enable elementary and secondary school teachers to participate in programs established under this subsection, each mission agency may compensate the teachers who participate in the programs.

(4) In awarding grants under this subsection, the education official of a mission agency shall give priority to projects designed to attract women and minorities into scientific academic study.

(c) TRAINING OF AGENCY EMPLOYEES.—Notwithstanding section 4107 of title 5, United States Code, under regulations prescribed by the Director of the Office of Personnel Management, a mission agency is authorized to provide training, or payment or reimbursement of the costs of training, for agency employees in critical academic areas in order to—

(1) assist in the recruitment or retention of employees with skills in critical academic areas; and

(2) train employees to provide services in accordance with subsections (a) and (b) and section 504.

SEC. 504. EDUCATION PARTNERSHIPS.

(a) AUTHORITY.—Each Federal laboratory director shall, to the extent practicable, enter into education partnership agreements with elementary and secondary schools and institutions of higher education for the purposes of promoting and enhancing scientific academic study at all educational levels.

(b) REVIEW.—A Federal laboratory director who enters into a partnership agreement under subsection (a) shall submit the agreement to the education official of the mission agency for review. Within 30 days after the submission of a partnership agreement, the education official and the appropriate government contracting official shall review the agreement and, on the basis of the review, approve or make specific objection to the agreement.

(c) MODEL AGREEMENTS.—Each mission agency shall develop and provide to the laboratories of the mission agency one or more model education partnership agreements, for the purposes of standardizing practices and procedures and enabling review of proposed agreements to be carried out in a routine and prompt manner.

(d) CONTENTS.—Education partnership agreements may include provisions under which a Federal laboratory agrees to—

(1) provide equipment, services, and support to elementary and secondary schools and institutions of higher education;

(2) provide personnel;

(3) appoint or employ in established summer and academic year research participation programs at the Federal laboratory—

(A) elementary, secondary, undergraduate and graduate mathematics, science and engineering faculty; and

(B) elementary school, secondary school, undergraduate and graduate students;

(4) establish research projects for academic credit in a Federal laboratory involving students and faculty from an institution of higher education; and

(5) establish mentorships, guidance, and assistance for elementary and secondary students, as a part of school curricula or approved extracurricular activities, to promote and enhance interest in scientific academic study.

(e) MINORITY AGREEMENTS.—Each Federal laboratory director shall make every effort to reach education partnership agreements with historically black colleges and universities and other institutions of higher education that serve Hispanic and other minority populations.

(f) AGENCY OR CONTRACTOR PERSONNEL.—Agency or contractor personnel may participate in programs under an education partnership agreement to the extent considered appropriate by the Federal laboratory director consistent with the mission of the laboratory.

SEC. 505. LOCATION.

In carrying out this title, each mission agency and Federal laboratory is authorized to conduct or fund educational activities at either an agency site, contractor site, or any other appropriate location.

SEC. 506. REPORTING REQUIREMENTS.

Not later than 1 year after the date of enactment of this title, each mission agency shall submit a report to Congress and the President that describes the actions taken to carry out this title.

TITLE VI—GENERAL PROVISIONS AND AUTHORIZATION OF APPROPRIATIONS

PART A—EVALUATION PROGRAMS

SEC. 601. DEPARTMENT OF EDUCATION EVALUATION PROGRAM.

The Secretary shall conduct evaluations of the programs, activities, and responsibilities of the Secretary authorized under this Act and shall report the findings from such evaluations to the Congress on September 30, 1995.

SEC. 602. NATIONAL SCIENCE FOUNDATION EVALUATION PROGRAM.

The Director shall conduct evaluations of the programs, activities, and responsibilities of the Director authorized under this Act and shall report the findings from such evaluations to the Congress on September 30, 1995.

PART B—DEFINITIONS

SEC. 611. DEFINITIONS.

As used in this Act—

(1) the term "consortium", refers to a combination of school districts, colleges, universities, other formal or informal educational entities, State and local governments, professional organizations, community groups, businesses and industries, or any combination thereof;

(2) the term "critical academic area" means, with respect to a mission agency, an area of academic study identified by the agency under section 505(b);

(3) the term "Director", unless otherwise specified, shall refer to the Director of the National Science Foundation;

(4) the term "education office" means, with respect to a mission agency, the office established or designated in section 505(a);

(5) the term "education official" means, with respect to a mission agency, the official responsible for administering the education office;

(6) the term "elementary school" has the same meaning given that term in section 1471(8) of the Elementary and Secondary Education Act of 1965;

(7) the term "Federal laboratory" means any laboratory, any federally funded research and development center, or any center established under section 7 or 9 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3705 or 3707) that is owned and funded by a mission agency, whether operated by the Government or by a contractor;

(8) the term "Federal laboratory director" means—

(A) the director of a Government-operated Federal laboratory of a mission agency; or

(B) to the extent that an agency-approved joint work statement permits administration of programs established in accordance with this Act, the director of a contractor-operated Federal laboratory of the agency;

(9) the term "Foundation" refers to the National Science Foundation;

(10) the term "informal education" refers to educational activities, materials, exhibits, and demonstrations which may be used to supplement or enhance specific curriculum in the classroom or which may be used outside the classroom in voluntary or recreational settings;

(11) the term "institution of higher education" has the same meaning given that term in section 1201(a) of the Higher Education Act of 1965;

(12) the term "local educational agency" has the same meaning given that term in section 1471(12) of the Elementary and Secondary Education Act of 1965;

(13) the term "minorities" refers to members of those racial and ethnic groups underrepresented in mathematics, science and engineering including, American Indians, black Americans, Hispanic Americans, Native Alaskans, or Native Pacific Islanders;

(14) the term "mission agency" means the Department of Defense, the Department of Energy, the Department of Agriculture, the Department of Labor, the Department of Health and Human Services, the Department of Transportation, the National Aeronautics and Space Administration, the Environmental Protection Agency, or the Department of Commerce;

(15) the term "roving master teacher" refers to teachers who specialize in mathematics and science and who travel from one school to another teaching specialized classes in mathematics and science to elementary and middle school children;

(16) the terms "scholarship" and "fellowship" refer to a financial award made to a student which enables a student to pursue a desired course of study at an institution of higher education;

(17) the term "scientific academic study" means the study of mathematics, science or engineering.

(18) the term "secondary school" has the same meaning given that term in section 1471(21) of the Elementary and Secondary Education Act of 1965;

(19) the term "Secretary", unless otherwise specified, refers to the Secretary of the Department of Education;

(20) the term "State educational agency" has the same meaning given that term in section 1471(23) of the Elementary and Secondary Education Act of 1965; and

(21) the term "traineeship" means a form of financial support provided to an institution of higher education to—

(A) be used to provide stipends to graduate students selected by such institution; and

(B) help defray educational costs of educating such graduate students.

PART C—AUTHORIZATION OF APPROPRIATIONS

SEC. 621. AUTHORIZATION OF APPROPRIATIONS.

(a) SECTION 201.—There are authorized to be appropriated $5,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of section 201.

(b) SECTION 211.—There are authorized to be appropriated $19,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and

1995 to carry out the provisions of section 211.

(c) SECTION 221.—There are authorized be appropriated $3,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of section 221.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 for fiscal year 1991 and such sums as necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of section 222.

(e) SECTION 231.—There are authorized to be appropriated $10,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of section 231.

(f) SECTION 241.—There are authorized to be appropriated $10,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of section 241.

(g) SECTIONS 301, 302, 322, AND 323.—There are authorized to be appropriated $44,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of sections 301, 302, 322, and 323.

(h) SECTIONS 402, 403, AND 404.—There are authorized to be appropriated $17,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of sections 402, 403, and 404.

(i) SECTIONS 502, 503, 504, 505 AND 506.—There are authorized to be appropriated such sums as may be necessary for fiscal years 1991, 1992, 1993, 1994 and 1995 to carry out the provisions of sections 502, 503, 504, 505 and 506.

SEC. 622. AVAILABILITY OF APPROPRIATIONS.

Funds appropriated pursuant to the authority of section 621 shall remain available until expended.

PART D—EFFECTIVE DATE

SEC. 631. EFFECTIVE DATE.

The provisions of this Act shall take effect on October 1, 1990, or the date of enactment of this Act, whichever is later.

NATIONAL INDIAN FOREST AND WOODLAND ENHANCEMENT ACT

McCAIN AMENDMENT NO. 2577

Mr. SIMPSON (for Mr. McCAIN) proposed an amendment to the bill (S. 1289) to improve the management of forests and woodlands and the production of forest resources on Indian lands, and for other purposes; as follows:

On page 21, line 3, strike out "8,500,000" and insert thereof "8,700,000".

On page 28, line 23, immediately after "removing", add "or damaging".

On page 39, beginning with line 9, strike out all through line 2 on page 40 and insert in lieu thereof the following:

SEC. 207. SPECIAL INDIAN FOREST LAND ASSISTANCE ACCOUNT.

(a) ESTABLISHMENT.—At the request of any reservation's recognized tribal government, the Secretary may establish a special Indian forest land assistance account for such tribal government to fund the Indian forest land management activities of such tribal government.

(b) DEPOSITS AND EXPENDITURES.—(1) The Secretary may deposit into an Indian forest land assistance account established pursuant to subsection (a) any funds in his possession or available to him, including any unobligated annual appropriations, for the purpose of conducting forest land managment activities on Indian forest lands of such tribe. The Secretary shall notify the reservation's recognized tribal government of his intent to deposit funds into such account and shall not deposit Federal or tribal funds into such account without the consent of the reservation's recognized tribal government.

(2) Funds in the Indian forest land assistance account and any interest or other income earned thereon shall remain available until expended and shall not be available to otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands. No funds shall be expended from such account without the approval of the Indian tribe for which the account was established.

(c) AUDITS.—At the request of the Indian tribe for which the special Indian forest land assistance account was established or upon the Secretary's own volition, the Secretary shall conduct audits of the Indian forest land assistance account and shall make the results of such audits available to the Indian tribe for which the account was established.

On page 40, line 14, immediately after "of", insert "levels of".

On page 42, line 2, strike out "PROGRAMS" and insert in lieu thereof "ACTIVITIES".

On page 42, line 9, strike out "practices" and insert in lieu thereof "activities".

On page 43, line 15, strike out "programs" and insert in lieu thereof "activities".

On page 44, line 4, strike out "practices" and insert in lieu thereof "activities".

On page 49, strike out line 7 and insert in lieu thereof "agrees to accept employment for one year for each year for which the Secretary pays the recipient's educational costs,".

On page 51, line 9, strike out "Indian" and insert in lieu thereof "tribal".

On page 51, line 13, strike out "Indian" and insert in lieu thereof "tribal".

On page 51, line 18, strike out "Indian" and insert in lieu thereof "tribal".

On page 52, line 13, strike out "Indian" and insert in lieu thereof "tribal".

On page 52, line 21, strike out "Indian" and insert in lieu thereof "tribal".

On page 53, line 2 strike out "Indian" and insert in lieu thereof "tribal".

On page 53, line 4, strike out "Indian" and insert in lieu thereof "tribal".

INDIAN CHILD PROTECTIVE SERVICES AND FAMILY VIOLENCE PREVENTION ACT

McCAIN AMENDMENT NO. 2578

Mr. SIMPSON (for Mr. McCAIN) proposed an amendment to the bill (S. 2340) to develop and improve child protective service programs on Indian reservations and to strengthen Indian families, as follows:

On page 16, line 16, strike out "and".

On page 16, between lines 16 and 17, insert the following:

(4) establish tribally operated programs to protect Indian children and reduce the incidences of family violence in Indian country; and

On page 16, line 17, strike out "(4)" and insert in lieu thereof "(5)".

On page 17, line 5, immediately after "employee", insert "or volunteer".

On page 21, line 7, immediately after "neglect", insert a comma and the following: "and to the extent practical, coordinate with institutions of higher education, including tribally controlled community colleges, to offer college-level credit to interested trainees"

On page 22, between lines 4 and 5, insert the following:

(f) The Secretary shall establish, for each Indian Child Resource and Family Services Center, an advisory board to advise and assist such Center in carrying out its activities under this Act. Each advisory board shall consist of 7 members appointed by the Secretary from Indian tribes and human service providers served by an area office of the Bureau of Indian Affairs. The advisory board shall assist the Center in coordinating programs, identifying training materials, developing policies and procedures relating to family violence and child abuse and neglect.

On page 22, line 5, strike out "(f)" and insert in lieu thereof "(g)".

On page 22, line 18 following the period insert the following: "This section shall not preclude the designation of an existing child resource and family services center operated by a tribe or tribal organization as an Indian Child Resource and Family Services Center if all of the tribes to be served by the center agree to such designation."

On page 22, line 19, strike out "(g)" and insert in lieu thereof "(h)".

On page 22, line 13, beginning with "served", strike out all through "office" on line 14, and insert in lieu thereof "to be served under the contract".

On page 25, between lines 6 and 7, insert the following:

(C) provide for the coordination and cooperation of law enforcement, courts of competent jurisdiction, and tribal, Federal, and State agencies through intergovernmental or interagency agreements that define and specify each party's responsibilities;

On page 25, between lines 6 and 7, insert the following:

(4) the development of tribal child protection codes and regulations;

On page 25, line 7, strike out "(4)" and insert in lieu thereof "(5)".

On page 26, line 1, strike out "(5)" and insert in lieu thereof "(6)".

On page 26, line 4, strike out "(6)" and insert in lieu thereof "(7)".

CONGRESSIONAL COMMEMORATIVE MEDALS

HEINZ AMENDMENT NO. 2579

Mr. SIMPSON (for Mr. HEINZ) proposed an amendment to the bill (H.R. 2575) to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941, to provide for the striking of medals in commemoration of the centennial of Yosemite Nation-

al Park, and for other purposes, as follows:

At the end of the bill add the following:

SECTION . DENOMINATIONS, SPECIFICATIONS, AND DESIGN OF COINS.

Subsection (d)(1) of section 5112 of title 31, United States Code, is amended by striking the fourth sentence.

SEC. . DESIGN CHANGES REQUIRED FOR CERTAIN COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(3) The design on the reverse side of the half dollar, quarter dollar, dime coin, 5-cent coin and one-cent coin shall be selected for redesigning. One or more coins may be selected for redesign at the same time, but the first redesigned coin shall have a design commemorating the two hundredth anniversary of the United States Constitution for a period of 2 years after issuance. After that 2-year period, the bicentennial coin shall have its design changed in accordance with the provisions of this subsection. Such selection, and the minting and issuance of the first selected coin shall be made not later than 1 year after the date of the enactment of this paragraph. All such redesigned coins shall conform with the inscription requirements set forth in paragraph (1) of this subsection."

SEC. . DESIGN OF OBVERSE SIDE OF COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(4) Subject to paragraph (2), the design on the obverse side of the half dollar, quarter dollar, dime coin, 5-cent coin, and one-cent coin shall contain the likenesses of those currently displayed and shall be considered for redesign. All such coin obverse redesigns shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. . SELECTION OF DESIGNS.

The design changes for each coin authorized by the amendments made by this Act shall take place at the discretion of the Secretary and shall be done at the rate of one or more coins per year, to be phased in over 6 years after the date of the enactment of this Act. In selecting new designs, the Secretary shall consider, among other factors, thematic representations of the following constitutional concepts: freedom of speech and assembly; freedom of the press; right to due process of law; right to a trail by jury; right to equal protection under the law; right to vote; themes from the Bill of Rights; and separation of powers, including the independence of the judiciary. The designs shall be selected by the Secretary upon consultation with the United States Commission on Fine Arts.

SEC. . REDUCTION OF THE NATIONAL DEBT.

Subsection (a)(1) of section 5132 of title 31, United States Code, is amended by inserting after the third sentence the following: "Any profits received from the sale of uncirculated and proof sets of coins shall be deposited by the Secretary in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.".

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

METZENBAUM (AND OTHERS) AMENDMENT NO. 2580

Mr. NUNN (for Mr. METZENBAUM, for himself, Mr. D'AMATO, Mr. PELL, Mr. DOLE, and Mr. MCCAIN) proposed an amendment to the bill (S. 2884) to improve the effectiveness of economic sanctions against the Republic of Iraq in response to its invasion of the State of Kuwait, as follows:

At the end of the bill, add the following section:

"Notwithstanding any other provision of law, the President shall have the authority to restrict the importation of goods and services to the United States from any nation which continues to maintain economic relations with the Republic of Iraq in violation of economic sanctions against the Republic of Iraq imposed by the international community as a whole, or by the United States.".

AMERICAN INDIAN, ALASKAN NATIVE, AND NATIVE HAWAIIAN CULTURE AND ART DEVELOPMENT ACT

INOUYE AMENDMENT NO. 2581

Mr. NUNN (for Mr. INOUYE) proposed an amendment to the bill (H.R. 5256) to amend the bill so as to authorize the establishment of the Richard Jewell Ka'ilihiwa-Gladys Ainoa Brandt Fellowship Program for Studies in Excellence; as follows:

At the end of the bill, add the following new section:

SEC. . FINDINGS.

The Congress finds that—

(1) previous research into the history of Native Hawaiians, including their migration to the area now known as the Hawaiian Islands, their culture, and their practices, is being found to be inaccurate and inadequate;

(2) the oral history and traditions of Native Hawaiians are becoming lost as older generations pass on before they can handdown their knowledge;

(3) when the Hawaiian language became a written language, Native Hawaiians became highly literate and produced extensive literature, including newspapers, journals, and other writings about their history and their culture; however, few people today speak the Hawaiian language and many of these documents have not been translated and therefore have not been studied;

(4) since the overthrow of the Hawaiian monarchy in 1893, the socioeconomic status of the Native Hawaiian people have been steadily declining, and as Hawaiians have become increasingly aware of their loss of culture and knowledge about their past they are endeavoring to preserve and revitalize their culture;

(5) unless the history and traditions of the Native Hawaiian people are studied and understood from a Native Hawaiian perspective, and the knowledge of the older generations are preserved, the Native Hawaiian people may never fully know their history and understand their past; and

(6) it is appropriate that the Federal Government participate in the commitment of the Native Hawaiian people to correct historical inaccuracies and to fully research all historical material about the history of the Native Hwaiian people and their culture and practices to assure that Native Hawaiians have the same opportunities as other Americans to learn about their past.

SEC. . FELLOWSHIP PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Education shall establish the Richard Jewell Ka'ilihiwa-Gladys Ainoa Brandt Fellowship Program for Studies in Excellence (hereinafter referred to as the "Fellowship Program").

(b) In establishing the Fellowship Program, the Secretary shall provide for fellowships for—

(1) research into Native Hawaiian history and culture;

(2) Native Hawaiian cultural practioners;

(3) translating Hawaiian language documents into English;

(4) researching history or cultural practices;

(5) writing workshops;

(6) video production;

(7) teaching; and

(8) other similar or like purposes.

(c) AWARDS.—Fellowships may be awarded by the Secretay of Education to individuals nominated by the Fellowship Selection Committee for a maximum of 2 years; except that teaching fellowships may be awarded on a 6-week basis. Fellowships under this section shall be awarded at such times, in such amounts, and for such purposes as the Secretary of Education, by regulation, shall prescribe, and shall be awarded only to Native Hawaiians as defined in section 4009(1) of the Act of April 28, 1988 (20 U.S.C. 4909(1)).

(d) SELECTION COMMITTEE.—(1) There is established the "Fellowship Selection Committee" which shall be composed of 5 individuals appointed by the Secretary of Education as follows:

(A) one designated by the Board of Trustees of the Native Hawaiian Culture and Arts program (authorized under Public Law 99-498; 20 U.S.C. 4441);

(B) one designated by the Board of Trustees of the Kamehameha Schools/Bernice Pauahi Bishop Estate;

(C) one designated by the Board of Trustees of the Office of Hawaiian Affairs (established by the constitution of the State of Hawaii);

(D) one designated by the Center of Hawaiian Studies of the University of Hawaii at Manoa, Honolulu, Hawaii, and

(E) one designated by the Board of Directors of 'Aha Punana Leo Inc., a nonprofit organizaton incorporated under the laws of the State of Hawaii by that name on February 14, 1983, for educational purposes relating to the Hawaiian language.

(2) Nothing in this section shall be construed as prohibiting any member of an entity referred to in paragraph (1) from serving on the Fellowship Selection Committee.

(3) A member of the Fellowship Selection Committee shall serve for a term of 2 years, but may be reappointed. A vacancy on the committee shall be filled in the same manner as the original appointment.

(4) The Committee shall—

(A) advise and make recommendations to the Secretary of Education regarding the es-

tablishment of general policies for the program pursuant to this section and assist in overseeing its operation;

(B) advise and make recommendations to the Secretary of Education regarding the establishment of general criteria for the distribution of fellowships; and

(C) prepare and submit to the Congress, at least once in every 3-year period, a report on any modifications in the program that the Committee determines are appropriate.

(5) In carrying out its responsibilities, the Committee shall consult on a regular basis with the Secretary of Education and representatives of institutions of higher education and associations of such institutions, learned societies, and professional and other appropriate organizations.

(6) The Secretary shall call the first meeting of the Committee, at which the first order of business shall be the election of a Chairman and a Vice Chairman, who shall serve until one year after the date of their appointment. Thereafter each officer shall be elected for a term of 2 years. In case a vacancy occurs in either office, the Committee shall elect an individual from among the members of the Committee to fill such vacancy.

(7) A majority of the members of the Committee shall constitute a quorum.

(8) The Committee shall establish such policies and adopt such bylaws as it determines necessary to carry out its functions.

(9) The Committee shall meet at the call of the chairman, and as provided in its bylaws.

(e) EXECUTIVE DIRECTOR.—The Committee shall appoint an executive director. The executive director shall serve at the pleasure of the Committee. Subject to the availability of funds, the executive director shall be compensated in an amount determined by the Committee. Subject to the availability of funds, the Committee is authorized to hire such employees as it determines necessary.

(f) CONTRACTS.—Subject to the availability of funds, the Secretary of Education is authorized to enter into a contract with the Kamehameha Schools Association for the purpose of utilizing such Association in assisting the Secretary in carrying out the purposes of this section, including the administration of the fellowship program.

(g) AWARDS.—The Secretary of Education is authorized to make grants in connection with subsection (f) and in connection with fellowships awarded under this section. Such grants shall be in such amounts and subject to such terms and conditions as the Secretary of Education shall prescribe. Grants pursuant to subsection (f) may be conditioned—

(1) on the Kamehameha Schools Association establishing an endowment fund for use in carrying out programs within the purview of this Act, or similar thereto; and

(2) on such Association providing matching funds from a non-Federal source.

(h) AUTHORIZATIONS.—(1) For the purpose of assisting the Fellowship Selection Committee in carrying out its functions under this Act for fiscal year 1991, there is authorized to be appropriated to the Secretary of Education $1,000,000, to remain available until expended.

(2) For the purpose of carrying out the provisions of subsection (f) and making grants under this section, there is authorized to be appropriated to the Secretary of Education $2,500,000, to remain available until expended.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

SIMPSON AMENDMENTS NO. 2582 AND 2583

Mr. SIMPSON proposed two amendments to amendment number 2574 proposed by Mr. REID (and Mr. BRYAN) to the bill S. 2884, supra; as follows:

AMENDMENT No. 2582

SEC. 4. (a) *Provided, however,* That in no event shall an award of attorney fees for actions brought under this title exceed 10 percent of the award of actual damages;

(b) *Provided further,* That nothing in this section shall act to preclude a contract for legal representation for a lesser amount.

AMENDMENT No. 2583

SEC. 5. (a) With respect to actions filed under this section, the United States shall forever indemnify, hold harmless, and guarantee payment of any judgments entered for any claimant;

(b) In the event that any private contractor to the United States is successful in defending a claim brought under this act, the United States shall likewise indemnify and reimburse said contractor for all costs, attorney fees, and litigation related expenses incurred in defending said action;

(c) *Provided further,* That in the event an action is settled prior to litigation or a consent decree is entered pursuant to a settlement agreement, the United States shall reimburse said contractors for all reasonable costs associated with the settlement.

STEVENS (AND OTHERS) AMENDMENT NO. 2584

Mr. STEVENS (for himself, Mr. FORD, Mr. THURMOND, Mr. INOUYE, Mr. DECONCINI, Mr. BOND, Mr. JOHNSTON, Mr. KASTEN, Mr. LOTT, Mr. BUMPERS, and Mr. COCHRAN) proposed an amendment to the bill (S. 2884) to authorize levels for active Guard and Reserve; as follows:

Strike the text from page 36, line 1, thru page 37, line 9, and insert in lieu thereof:

(A) The Army National Guard of the United States, 24,820.

(B) The Army Reserve, 12,673.

(C) The Naval Reserve, 21,848.

(D) The Marine Corps Reserve, 2,781.

(E) The Air National Guard of the United States, 8,045.

(F) The Air Force Reserve, 623.

(2) In order to meet the national security requirements of the United States, the Secretary of Defense may reallocate the numbers authorized for the reserve component specified in paragraph (1) in such manner as the Secretary determines appropriate, except that the total numbers reallocated may not exceed the number equal to 10 percent of the total number authorized for the reserve components under such paragraph.

(3) The table referred to in subsection (b) is as follows:

Fiscal year:	*Reserves on Active Duty in Support of Reserves*
1992	66,664
1993	62,959
1994	59,255
1995	55,550
1996	51,845

(b)(1) Within the end strengths authorized by legislation enacted after the date of enactment of this Act for each of the fiscal years listed in paragraph (2), the Reserve components of the Armed Forces are authorized the total number of members specified in such table for such fiscal year to be serving on full-time Active duty or, in the case of member of the National Guard, full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the Reserve components.

(c)(1) IMPLEMENTATION OF REDUCTIONS.—In implementing the reduction in the end strengths for reserves on active duty in support of the reserves required in this section, no member of the Reserves serving on full-time active duty on the date of enactment of this Act, or in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, instructing or training the Reserve components may be involuntarily separated.

(2) DEFINITION.—As used in this section, the term "involuntarily separated" shall have the same meaning as the meaning of that term under Section 844 of this Act.

(3) AUTHORITY TO EXCEED PRESCRIBED END STRENGTHS.—The end strengths prescribed in subsections (a) and (b) may be exceeded to the extent necessary to comply with this subsection, as determined under regulations prescribed by the Secretary of Defense.

(4) ACTIVE DUTY IN SUPPORT OF THE RESERVES.—Accessing of members of the Reserves to be serving on full-time active duty or, in the case of members of the National Guard on full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the Reserve components for a fiscal year shall be 2 percent of the total authorized end strengths provided in this section for such fiscal year.

DASCHLE AMENDMENT NO. 2585

Mr. NUNN (for Mr. DASCHLE) proposed an amendment to the bill (S. 2884) to authorize direct communications between Air Force scientists conducting the Ranch Hand Study and the Ranch Hand Study Advisory Committee, to limit intervention into such communications by other employees of the Government, to require annual reports on the activities of such scientists, and for other purposes, as follows:

On page 223, below line 24, insert the following new section:

SEC. 1216. CONSULTATION AND REPORT REQUIREMENTS RELATING TO RANCH HAND STUDY OF DEPARTMENT OF AIR FORCE

(a) CONSULTATION WITH ADVISORY COMMITTEE.—The Ranch Hand Advisory Committee may consult directly with and provide information and recommendations directly to the Department of the Air Force scientists conducting the Ranch Hand Study, and such scientists may consult directly with and provide information and recommendations directly to the Ranch Hand

Advisory Committee. No officer or employee of the Federal Government may intervene in or impair direct communication between the Ranch Hand Advisory Committee and such scientists under this section except as may be necessary to prevent an inappropriate disclosure of classified information.

(b) ANNUAL REPORTS.—(1) Not later than February 1 of each year, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the activities of the Air Force scientists referred to in subsection (a) during the calendar year preceding the year in which a report is submitted. The first such report shall be submitted not later than February 1, 1991.

(2) Each report referred to in paragraph (1) shall include the following:

(A) A discussion of the progress made in the Ranch Hand Study during the period covered by the report.

(B) A summary of the scientific activities conducted during that period and the findings resulting from those activities, to be prepared by the scientists conducting those activities.

(3) Such a report need not contain (A) a discussion of progress discussed in any other report prepared by the Department of Defense (under this section or otherwise) regarding the Ranch Hand Study, or (B) a scientific summary included in any other such report, unless modification of such discussion or summary is appropriate for completeness, accuracy, and currency.

(c) DEFINITIONS.—In this section:

(1) The term "Ranch Hand Advisory Committee" means the committee known as the "Advisory Committee on Special Studies Relating to the Possible Long-term Health Effects of Phenoxy Herbicides and Contaminants" established by the Secretary of Health and Human Services to monitor the conduct of the Ranch Hand Study.

(2) The term "Ranch Hand Study" means the special study conducted by the Secretary of the Air Force relating to the possible long-term effects of phenoxy herbicides and contaminants on Air Force personnel who participated in Operation Ranch Hand in the Republic of Vietnam during the Vietnam era.

NUNN (AND WARNER) AMENDMENT NO. 2586

Mr. NUNN (for himself and Mr. WARNER) proposed an amendment to the bill (S. 2884) to authorize additional funds for other purposes, as follows:

On page 216, between lines 9 and 10, insert the following new section:

SEC. 1206. ADDITIONAL AUTHORIZATION OF APPROPRIATIONS

(a) ARMY.—(1) In addition to the amount authorized to be appropriated by section 101(5), there is hereby authorized to be appropriated for fiscal year 1991 for the Army for procurement of the Nuclear Biological, Chemical Reconnaissance System $36,914,000.

(2) Notwithstanding section 201(1), not more than $5,691,323,000 is authorized to be appropriated for the Army for fiscal year 1991 for research, development, test, and evaluation.

(b) NAVY.—In addition to the amount authorized to be appropriated by section 102(a)(1), there is hereby authorized to be appropriated for fiscal year 1991 for the Navy for procurement of the Battle Group Passive Horizon Extension System $5,163,000.

(c) AIR FORCE.—(1) Notwithstanding section 103(2), not more than $6,728,957,000 is authorized to be appropriated for fiscal year 1991 for the procurement of missiles.

(2)(A) In addition to the amount authorized to be appropriated by section 201(3), there is hereby authorized to be appropriated for fiscal year 1991 for the Air Force for research, development, test, and evaluation $4,000,000.

(B) Of the amount authorized to be appropriated pursuant to subparagraph (A) of this paragraph and section 201(3), not more than $15,000,000 shall be available for the Advanced Electro-Optical System.

(d) DEFENSE AGENCIES.—In addition to the amount authorized to be appropriated by section 201(4), there is hereby authorized to be appropriated for fiscal year 1991 for the Defense Agencies for research, development, test, and evaluation for single-pulse excimer laser technology $30,000,000.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER AND POWER

Mr. BRADLEY. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Water and Power of the Senate Committee on Energy and Natural Resources. The purpose of the hearing is to receive testimony on the following four bills:

S. 2657. The Reclamation Wastewater and Groundwater Study Act;

S. 2858. The Central Valley Project Improvement Act;

S. 2870. The Fort Hall Indian Water Rights Act of 1990; and

H.R. 4148. A bill to authorize the Secretary of the Interior to acquire certain water rights for the settlement of Indian water rights claims in the State of Arizona.

The hearing will take place on September 13, 1990, at 9 a.m. in room SD-366 of the Senate Dirksen Office Building in Washington, DC.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the subcommittee, SD-364, Washington, DC 20510.

For further information, please contact Tom Jensen, counsel for the subcommittee at (202) 224-2366.

Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Water and Power of the Senate Committee on Energy and Natural Resources to receive testimony on S. 2969, a bill to provide for completion of the central Utah project.

The hearing will take place on September 18, 1990, at 9 a.m., in room SD-366 of the Dirksen Senate Office Building, Washington, DC.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the subcommittee, SD-364, Washington, DC 20510.

For further information, please contact Tom Jensen, counsel for the subcommittee at (202) 224-2366.

Mr. BRADLEY. Mr. President, I would like to announce for the public that a field hearing has been scheduled before the Subcommittee on Water and Power of the Senate Committee on Energy and Natural Resources to receive testimony on S. 1996, the Western Water Policy Review Act of 1989.

The hearing will take place in Portland, OR, on August 27, 1990. The exact location and time of the hearing will be announced in the near future.

Those persons wishing to submit written statements for the hearing record, but who do not plan to attend the hearing, should mail two copies of the statement to the Subcommittee on Water and Power, United States Senate, 364 Dirksen Building, Washington, DC, 20510.

For further information, please contact Tom Jensen, counsel for the subcommittee at (202) 224-2366.

COMMITTEE ON SMALL BUSINESS

Mr. BUMPERS. Mr. President, I would like to announce that the Small Business Committee will hold a field hearing on Thursday, August 16, 1990, to examine education and the U.S. economy. The hearing will be held in room 2B of the Legislative Office Building in Hartford, CT, and will commence at 9 a.m. For further information, please call Susan Grad of Senator LIEBERMAN's office 224-4041.

ADDITIONAL STATEMENTS

HONORING THE BOSTON TECHNICAL CENTER

● Mr. KERRY. Mr. President, I rise today to honor the Boston Technical Center and its graduates, past, present and future. Since 1977, the Boston Technical Center has been a training arm of the Economic Development and Industrial Corp. of Boston. BTC is a nonprofit, postsecondary business and trade school, licensed by the Commonwealth of Massachusetts Department of Education and accredited by the Accrediting Council for Continuing Education and Training.

For 13 years, the BTC has provided the essential skills instruction to those in our communities who have been denied access to postsecondary education due to a lack of financial resources or academic credentials. Since its inception in 1977, the BTC has trained over 2,500 Boston area low- and moderate-income residents through intensive training programs in occupational areas. The BTC is constantly working to meet the needs of

Boston area industries for skilled personnel. Such placement provides strong incentives for companies to remain in the metro Boston area and contributes to a productive, healthy economy. In the face of plant closings and mass layoffs, BTC has retrained hundreds of dislocated workers giving them the chance to reenter the work force with new skills and a renewed sense of pride.

While the BTC operates many programs, I would like to highlight just a few. One very special example is Project Advance. This is an individualized program which is competency based and training related. It prepares individuals, including our many newcomers, who lack basic math, reading and writing skills, to enter the several job training programs. BTC is also currently operating an office skills program for people who live in homeless shelters throughout the city.

The BTC has afforded many people in the Boston area the opportunity to receive an education, gain self-worth through employment and be contributing members of society. I congratulate the Boston Technical Center for its exemplary work for the people of the Commonwealth of Massachusetts and extend my heartiest congratulations to the 1990 graduates. With their education, they have the ability to make their future and fulfill their dreams. I wish them the best of success in all of their endeavors.●

COLORADO UTE INDIAN WATER RIGHTS SETTLEMENT ACT

● Mr. ARMSTRONG. Mr. President, last session this Congress authorized the Colorado Ute Indian water rights settlement. That act resolved water rights claims between Indians and non-Indians and involved the States of New Mexico and Colorado, numerous communities and water districts, and the U.S. Departments of the Interior and Justice.

The Southern Utes and the Ute Mountain Utes cannot make use of the water apportioned to them without storage. So, the keystone of this Indian water rights resolution is the Animas-La Plata water project.

Consequently, I am pleased the Senate has given full funding to the Animas-La Plata Project in southwest Colorado. An important part of the water rights settlement is a mandated funding and construction schedule for the project. The funding in the fiscal year 1991 energy and water appropriations bill meets that mandate for fiscal year 1991.

Ten years of litigation and 2 years of settlement negotiations among numerous parties with the tribes preceded 2 years of final negotiations in Congress. Major project modifications during that 2 years included curtailing irrigation to marginal land, and eliminating Federal funding for the second half of the project.

Also, prior to coming to Congress for authorization of their settlement, parties extensively studied alternatives to the project. Those alternatives included "Indian only" projects. But, due to the limited benefits for one tribe or the other, and the exclusion of non-Indian and some Indian water needs, the "Indian only" project alternatives were rejected.

Now that the Indian water rights settlement has been authorized by Congress and the project's funding schedule continues to be met, another challenge has presented itself. The Colorado squawfish, an endangered species, has been found in the San Juan River upstream from the inlet to Lake Powell.

A number of events have contributed to the decline of the squawfish—introduction of non-native species, water development's changes in the flow and temperature of our streams and rivers, and the methodical killing of that species in western rivers by the U.S. Fish and Wildlife Service in the 1960's.

A U.S. Fish and Wildlife draft biological opinion released in May recommends halting all further depletions in the San Juan River Basin to allow study of squawfish habitat requirements. Further, the draft opinion notes "no reasonable and prudent alternatives have been identified as a result of this consultation."

To give our colleagues some perspective, the Animas-La Plata project is in the extreme southwest corner of Colorado on the Animas River about 45 miles above its junction with the San Juan River. Discovery of squawfish has occurred downriver several miles from that junction.

These determinations—no further depletions pending a study, and no reasonable alternatives to the project—have significant impact. Three States are involved when the USFW recommends halting all further depletions or "further commitments to deliver water from projects" in the entire San Juan River Basin until a study is completed. At least four Indian tribes' authorized or pending water rights settlements are jeopardized. The study is estimated to take a minimum of 7 years once the current drought has ended.

As hard as so many local, State, and Federal parties worked on the project over so many years, it is unreasonable to determine "no reasonable or prudent alternatives exist." Consequently, USFW scientists now are working with project proponents' biologists, and hydrologists to find a way to allow the project and protect the squawfish.

The Endangered Species Act is very clear. Biological considerations come first under that statute. In section 2(b) of the act, the act makes clear:

> The purposes of this chapter are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved.

However, the act also provides in section 2(c)(2):

> It is further declared to be the policy of Congress that Federal agencies shall cooperate with State and local agencies to resolve water resource issues in concert with conservation of endangered species.

While the act's directive makes biological considerations supreme, Congress was aware of the West's distinctive water concerns and the resulting need for cooperation.

I am hopeful the current cooperation among USFW scientists with project proponents achieves a balance to protect the squawfish and the water rights settlement so hard-won by the Ute Tribes. When Congress authorized the Ute Indian water rights settlement last session, we were very aware of the extensive negotiations and broad public interests addressed by so many different groups at all levels of government. Just as that was a very difficult process and was ultimately successful, I believe we can resolve this issue due to the urgent need to reconcile important interests.

As Colorado's and New Mexico's Senators stated in their joint letter urging Appropriations Committee members to fully fund the fiscal year 1991 request for the Animas-La Plata project, "We feel confident a resolution can be found allowing the project to go forward and the Colorado squawfish to exist."

The Indians need water. Future non-Indian water needs must be addressed, and current water rights must be protected. And the question of habitat for the endangered squawfish is critical.

Consequently, I am grateful not only to the Appropriations Committee for recommending funding requested for the project, but to those biologists and hydrologists working so hard to address competing values.●

● Mr. WIRTH. Mr. President, I want to thank the senior Senator from Colorado for his eloquent statement on the need for the Animas-La Plata project, and to associate myself with his remarks. I also want to take this opportunity to once more thank the chairman of the subcommittee, Senator JOHNSTON, and the ranking member, Senator HATFIELD, for supporting the appropriation of funds for the Animas-La Plata project.●

CONGRESSIONAL BUDGET OFFICE ESTIMATE ON S. 2362

● Mr. JOHNSTON. Mr. President, on July 12, the Committee on Energy and Natural Resources reported S. 2362, the Insular Areas Recovery Act of 1990. The committee submitted a report on this bill but the budget impact statement from the Congres-

sional Budget Office was not ready at the time of submittal. That estimate is now ready and I ask that it be printed at this point in the RECORD.

The estimate follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, July 30, 1990.

Hon. J. BENNETT JOHNSTON, Jr.,
Chairman, Committee on Energy and Natural Resources
United States Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached cost estimate for S. 2362, the Insular Areas Recovery Act of 1990.

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

ROBERT D. REISCHAUER.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: S. 2362.

2. Bill title: Insular Areas Recovery Act of 1990.

3. Bill status: As reported by the Senate Committee on Energy and Natural Resources on July 12, 1990.

4. Bill purpose: The bill would authorize the appropriation of such sums as may be necessary to construct facilities to protect health and safety or to enhance the survivability of essential infrastructure in the event of disasters in insular areas, such as Puerto Rico and the U.S. Virgin Islands. S. 2362 also would expand the Federal Emergency Management Agency's (FEMA) hazard mitigation program and the Rural Electrification Administration's (REA) loan programs to assist insular areas in facilities construction and infrastructure improvements. In addition, the bill would allow the head of government of an insular area to use low-income home energy assistance funding for disaster recovery purposes.

5. Estimated cost to the Federal Government: The following table shows the amounts that would be authorized under this bill for the needs of the Virgin Islands after Hurricane Hugo. Additional costs that would be authorized for other insular areas and to deal with future disasters cannot be estimated and are not shown here.

[By fiscal year, in millions of dollars]

	1991	1992	1993	1994	1995
Department of the Interior and other agencies:					
Estimated authorization level	42				
Estimated outlays	24	13	5		
Rural Electrification Administration:					
Estimated authorization level	14	6	11	10	
Estimated outlays	1	4	8	8	7
Bill total:					
Estimated authorization level	56	6	11	10	7
Estimated outlays	25	17	13	8	7

The costs of this bill fall within budget functions 270, 450, and 800.

BASIS OF ESTIMATE

Department of the Interior and Other Agencies' Costs. S. 2362 would provide an open-ended, indefinite authorization for the appropriation of the sums necessary to construct health and safety facilities and to improve infrastructure in insular areas. Under this authorization, the Congress could appropriate funds to the Department of the Interior or to any other agency, such as the Department of Transportation, the Army Corps of Engineers, or the Department of Health and Human Services, that builds roads, ports, hospitals, or other facilities sought by the insular areas.

Under current law, funds to prevent hazards to infrastructure are available only from FEMA, only after a disaster has occurred, and are limited to 10 percent of FEMA's public assistance program grants. FEMA also provides funds, as available from its capital program, for public health and safety construction on a case-by-case basis.

To the extent that funds for these purposes are limited under current law, S. 2362 would provide the authorization for additional funding. CBO cannot estimate the amounts that the Congress would appropriate under this authorization because we do not have historical data on unmet disaster needs of insular areas and we cannot predict what these areas would request in the future. The potential costs could be larger, however. On the other hand, increased spending for hazard mitigation could reduce the losses an area would suffer during a disaster, thereby reducing the government's disaster payments in the future.

For example, we estimate that the authorization would allow the appropriation of at least $42 million to the Virgin Islands in 1991. After the Virgin Islands was hit by Hurricane Hugo, its government identified about $64 million of health and safety costs, of which about $31 million remains unfunded. In addition, the Virgin Islands government has identified about $95 million in necessary hazard mitigation projects. Of this amount, $17 million is available under current law. Of the remaining $78 million, $67 million in loan assistance could be made available under the REA provision in S. 2362. If the Virgin Islands uses the REA loans, this open-ended authorization could be used to appropriate the additional $11 million that the Virgin Islands would need in addition to the existing FEMA funds. If REA loans were not used, this authorization could cover the full $78 million. We assume that the REA loans would be used and that this bill would authorize the appropriation of at least $31 million for health and safety projects and $11 million for hazard mitigation for the Virgin Islands in 1991. Of course, the other insular areas could have needs that would require additional appropriations in the future.

REA Costs. S. 2362 would amend the Rural Electrification Act to allow REA to make loans to borrowers in any insular areas in which the President declares a disaster. Based on information provided by the Virgin Islands Water and Power Authority (WAPA) and REA, CBO estimates that federal outlays would increase by approximately $28 million over the 1991-1995 period as a result of the REA provision. This provision would make WAPA eligible for $41 million in federal loans to construct new electricity generation and transmission (G&T) facilities, and $52 million for electricity distribution projects. Only the G&T funding would increase federal spending, relative to current law.

CBO expects the Administration to continue lending for electricity distribution projects at the annually legislated loan floors, so that WAPA would compete with other REA borrowers for these funds. In contrast, there is insufficient demand to reach the annual floor for G&T loans, so that approval of the G&T funds sought by WAPA would yield an increase in this REA lending program. Using historical loan advance data and information provided by WAPA. CBO estimates that the government would advance approximately 70 percent of the $41 million in G&T loans over the 1991-1995 period, and remaining 30 percent after 1995. No significant amount of loan repayments would occur until after 1995.

FEMA Costs. Based on information provided by FEMA, CBO does not expect that this bill, if enacted, would lead to any significant additional expenditures by FEMA. FEMA's authority under current law is similar to that provided by S. 2362

6. Estimated cost to State and local governments: None.

7. Estimate comparison: None.

8. Previous REA estimate: None.

9. Estimate prepared by: James Hearn, Michael Sieverts, and Peter Fontaine (226-2860)

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.●

S. 2398, TO AUTHORIZE CONTINUATION OF THE NATIONAL SENIOR OLYMPICS

● Mr. DANFORTH. Mr. President, on June 27 the U.S. National Senior Sports Organization [USNSSO] and the U.S. Olympic Committee [USOC] successfully concluded negotiations regarding USNSSO's use of the phrase "the Senior Olympics" in the title of a national athletic competition for senior citizens. I commend both parties for resolving this matter.

The USNSSO was established in 1985 as the U.S. National Senior Olympics, an organization dedicated to staging a national multisport athletic competition for senior citizens. The first National Senior Olympics were held in St. Louis in 1987. This highly successful event attracted over 5,000 competitors from 44 States. Following the 1987 games, the USOC informed the Senior Olympic organization that it could no longer use the Olympic name. The Supreme Court upheld the USOC's authority to prohibit any unauthorized use of the Olympic name under the Amateur Sports Act of 1978. The USOC alone has this authority.

Since the 1987 games, the Senior Olympic Organization has sought to continue to use the Olympic name through an agreement with the USCO. Earlier this year, I introduced S. 2398, legislation to amend the Amateur Sports Act, to permit the National Senior Olympics to continue to use the Olympic name. Legislation was necessary because negotiations had not resolved the issue and, although the 1989 senior Olympic games were held, any future competition was to be prohibited from using the Olympic name.

During the June 22 Consumer Subcommittee hearing on S. 2398, I stated that legislation would be unnecessary if the USNSSO and the USOC could reach an agreement. On June 27, the Commerce Committee favorably reported the bill by voice vote. S. 2398 as reported also provides that the USNSSO is permitted to register its

trademark. Later that day, the two parties entered into a formal agreement to permit the USNSSO to use the Olympic name while limiting the right of the event's sponsors to use the Olympic name for commercial purposes.

Mr. President, under the agreement, each of the parties accomplished its objectives. The Senior Olympic Organization may continue to hold its Olympic competition for senior citizens. The USOC has protected the trademark for the Olympic name and symbols that Congress granted it under the Amateur Sports Act. As a result of this agreement, Mr. President, I will not ask that the Senate consider S. 2398, which is now on the Senate Calendar.●

FARM CREDIT ADMINISTRATION ORDER VIOLATES CONGRESSIONAL INTENT

Mr. BOREN. Mr. President, as you know I was chairman of the Agricultural Credit Subcommittee of the Senate Agriculture Committee in the 100th Congress. Our subcommittee held hearings on the need to restructure the Farm Credit System, and crafted the Senate version of the Agricultural Credit Act of 1987 (Public Law 100-233, 101 Stat.) the 1987 Farm Credit Act. A number of our colleagues offered leadership on that legislation. Among them were the distinguished ranking minority member of our subcommittee, Senator BOSCHWITZ, and the current very able chairman of the subcommittee, Senator CONRAD.

Unfortunately, the Farm Credit Administration [FCA] has interpreted a part of the 1987 Farm Credit Act in a manner completely contrary to our intent. The FCA's former Acting Chairman ruled that section 410 of the 1987 Farm Credit Act requires the involuntary merger of a bank in the 5th Farm Credit District into the farm credit bank in the 10th Farm Credit District, without permitting votes by the stockholders of these banks. The plain language and legislative history of the 1987 Farm Credit Act make it clear that Congress did not intend section 410 to require the merger of banks in different districts without stockholder votes.

Indeed, the Senate and House conferees on the 1987 act specifically rejected a provision which would have led to the involuntary consolidation of the then-existing 12 farm credit districts. The FCA's attempted misuse of section 410 to force the merger of the Federal Intermediate Credit Bank of Jackson [Jackson Bank] and Farm Credit Bank of Texas [Texas Bank] into a single bank effectively consolidates the Jackson and Texas farm credit districts, reducing the congressionally established 12 farm credit districts to 11. The FCA's interpretation, therefore, is contrary to the statutory framework and legislative intent of the 1987 act.

Mr. President, I am bringing this matter to the attention of the Senate at this time because this FCA decision has been the subject of much controversy, and some may wonder why we are not considering new legislation to correct the FCA's error. The simple answer is that the present law is clear—it simply has been misapplied by the FCA.

Members of both Houses of Congress have urged the FCA to reconsider its position, which was made when the Board was without a quorum. I understand we soon will receive nominations from the President and consider two new nominees for confirmation to the FCA Board. The FCA's leadership then will be totally different from when the erroneous decision was made, so it is important to urge the new FCA Board to take a fresh look at the earlier decision. The problem can best be solved by following the present law rather than pasing a new law.

I. THE STATUTORY SCHEME

To be clear, Mr. President, the forced merger of the Jackson Bank into the Texas Bank and the elimination of the Fifth Farm Credit District is prohibited by both the plain language of the 1987 act and the entire statutory scheme.

A. THE 1987 FARM CREDIT ACT PROVIDED A COMPREHENSIVE STATUTORY SCHEME GOVERNING MERGERS OF SYSTEM INSTITUTIONS AND FARM CREDIT DISTRICTS

Prior to the 1987 Farm Credit Act, there was only limited authority for bank mergers within the Farm Credit System. These provisions were broadened and new procedures for mergers were added in the 1987 act in title IV—"Restructuring of the Farm Credit System." Title IV created a comprehensive scheme for restructuring the existing Farm Credit System and providing financial assistance to restore the restructured system to financial health.

Subtitle A of title IV, section 401 of the act, dealt principally with the creation and goverance of the new farm credit banks, which were to be created in each farm credit district to replace the existing Federal land bank and Federal intermediate credit bank.

Subtitle B of title IV provided specific requirements for the merger of System institutions to facilitate restructing of the System. Prior to the 1987 Farm Credit Act, Congress had divided the Nation into 12 farm credit districts, each focused exclusively on the needs and interests of the farmers and ranchers within the district. Each district contained a Federal land bank, a Federal intermediate credit bank, a bank for cooperatives, and at least one Federal land bank association and production credit association. Subtitle B of title IV established the prerequisites for the merger of each of these various institutions:

Section 410. "Mandatory Merger"—mandating the merger of the Federal Land Bank and Federal Intermediate Credit Bank in each District to form a Farm Credit Bank in that district, and providing that the Board of Directors of the former banks will be the Board for the new Farm Credit Bank;

Section 411. "Merger of Productions Credit Associations and Federal Land Bank Associations";

Section 412. "Consolidation of Farm Credit System Districts"—subject to the approval of the shareholders in each District;

Section 413. "Voluntary Merger of the Banks for Cooperatives";

Section 416. "Merger of System Institutions"—subject to shareholder approval.

As is evident from this list, section 410 was not the sole provision in the 1987 act dealing with mergers of banks. Each of the other sections sets out specific "prerequisites"—most importantly a vote of the shareholders in each district. Section 410 was never intended to be used to effectuate the forced merger of districts.

B. SECTION 410, BY ITS PLAIN LANGUAGE, IS APPLICABLE ONLY TO THE MERGERS OF FEDERAL LAND BANKS AND FEDERAL INTERMEDIATE CREDIT BANKS

The FCA's decision distorts the words of section 410. The term "Federal land bank" as used in section 410 is in no way ambiguous. The term "Federal land bank" is congressionally defined in the Farm Credit Act of 1971 as those banks "established pursuant to section 4 of the Federal Farm Loan Act [of 1916]." (12 U.S.C. 2011 (Sup. IV 1986) (repealed in the 1987 act).) Thus, when Congress used the term "Federal land bank" in section 410, it was referring to the specific banks as defined in the existing statute. The Farm Credit Bank for the 10th District, created pursuant to section 1.3 of the Farm Credit Act of 1971 as amended by section 401 of the 1987 act, is plainly not the same entity as the Federal land bank specified in section 410(a).

The merger required by section 410(a) was to take place between the Federal land bank and the Federal intermediate credit bank which already shared the same governing board, were headquartered in the same city, and, indeed, the same building, and historically shared most or all of the same management. Thus, the merger of the two banks within the same district could be accomplished without altering the exclusive concentration of the banks on the needs of the farmers in the district. Such a merger of banks sharing the same district boundaries raises no question of the reallocation of the assets of the banks to assist farmers outside of the district. The merger of the Federal land bank and Federal intermediate credit bank in each district would preserve the assets

of the farmers for their own exclusive use.

The congressional purpose of section 410 to create a farm credit bank serving exclusively the farmers in each of the 12 farm credit districts is further established in the rest of section 410. Section 410(b) governs the continued rights of shareholders of the Federal land bank and the Federal intermediate credit bank in the new farm credit bank after the merger is complete; section 410(c) mandates financial assistance to each new farm credit bank to bring it to sound financial footing to serve the district; and section 410(d) provides that the former district board shall constitute the initial Board of the farm credit bank. Each of these provisions is clearly predicated on the creation of a farm credit bank which continues to be exclusively responsive to the farmers in that district.

II. THE LEGISLATIVE HISTORY

Mr. President, the legislative history of the 1987 Farm Credit Act demonstrates that Congress limited section 410 to mergers of banks within the same district and rejected forced consolidations of farm credit districts.

Section 410 grew out of a compromise by the House and Senate conferees to harmonize the competing proposals for restructuring the Farm Credit System included in both the House and Senate versions of the 1987 act. A review of the legislative history of this compromise clearly demonstrates that section 410 was never intended to apply outside of the precise merger it specified and that the FCA's attempt to use section 410 to force a consolidation of the Jackson and Texas district is directly contrary to congressional intent.

The Senate bill specifically authorized voluntary mergers of banks within the same district, subject to the approval of the board and stockholders of the affected institutions. At the heart of the Senate's restructuring approach was a means to give the System "the flexibility necessary to adapt to changing conditions while preserving the principle of borrower control of the System." (S. Rep. No. 230, 100th Cong., 1st Sess. 30 (1987).) The Senate version of the 1987 legislation did not mandate any mergers.

In contrast, the companion bill passed by the House of Representatives would have, first, mandated the consolidation of the 12 Farm Credit System districts into 6 new "Farm Credit System Service Banks" and, second, dissolved the 12 existing Federal land banks and Federal intermediate credit banks. These provisions would have required consolidation of districts and merger of their banks without stockholder consent.

The House and Senate conferees on the 1987 act specifically rejected the mandatory consolidation of districts contemplated by the House bill: "The conference substitute deletes the text of the House provision and adopts a new provision."

The conferees adopted a comprehensive scheme addressing the merger of all types of System institutions in chapter IV, subpart B of the 1987 act. The scheme accepted by the conferees had three major elements. First, the conferees adopted section 410 of the 1987 act, mandating the merger of the Federal land bank and Federal intermediate credit bank within each of the 12 farm credit districts. Second, the conferees adopted the substance of the Senate voluntary merger provisions, requiring board and stockholder approval of all other bank and association mergers (sections 411, 413-416). Third, the conferees adopted section 412 of the 1987 act—a provision establishing a special committee to develop a proposal on the consolidation of farm credit districts, but requiring that any such proposal be submitted to stockholders for approval.

In rejecting the approach of the House bill, the conferees ensured that stockholders retained control over mergers of banks in different districts. For example, Senator BOSCHWITZ, who was the ranking minority member of our subcommittee, explained:

> Under this conference bill each Federal Land Bank and Federal Intermediate Credit Bank in each district would be required to merge. We have maintained the fundamental cooperative principal [sic] of stockholder participation in FCS *by requiring that farmer/borrowers vote on all other proposed mergers* whether at the district or association levels. (133 Cong. Rec. S18465 (daily ed. Dec. 19, 1987) (*emphasis* added)).

Likewise, Senator DOLE emphasized that:

> The conferees agreed to allow stockholders of a District to vote on whether they will merge with another district (*See* 133 Cong. Rec. S18463 (daily ed. Dec. 19, 1987)).

And Senator HARKIN stated:

> The bill provides for a reorganization of System institutions through a series of voluntary mergers based on stockholder approval. *Id.*

Conferees from the House were equally emphatic in emphasizing that nothing in title IV of the 1987 act would lead to forced consolidation of the existing 12 districts. In a colloquy on the House floor regarding the conference report, Representative GLICKMAN asked:

> One part of the bill deals with the reorganization of the system, and I just want to make sure that nowhere in this bill is there any forced reorganization of systemwide districts. I realize there is some reorganization of land banks into intermediate credit banks in each district, but *nowhere are we in Congress mandating that the district banks merge with each other, is that correct?*

After Representative DE LA GARZA, chairman of the House Committee on Agriculture, responded in the affirmative, Representative GLICKMAN stated:

> I think it is important to recognize because there were great fears that some of the banks would be merged out of existence through an act of Congress. *All of that is to be determined by the decision of the banks and the stockholders themselves.* . . . (133 Cong. Rec. H11870 (daily ed. Dec. 18, 1987) (*emphasis* added)).

Thus, the legislative history of the 1987 act could not be more emphatic that Congress specifically rejected mandatory mergers in every instance except the specific mergers of Federal land banks and Federal intermediate credit banks necessary to create a farm credit bank in each existing district.

III. THE FCA MAY NOT IGNORE THE LAW TO SOLVE A POLICY PROBLEM

Finally, Mr. President, the FCA is not justified in ignoring the law we passed simply because it has chosen this way to address financial problems with the Jackson Federal Land Bank, which is now in receivership. The FCA in fact had several options open to it that would still fulfill the mandate of section 410 and also take into account the fact that the Jackson Federal Land Bank was insolvent or in receivership. The most simple course would have been for the Financial Assistance Board to provide financial assistance earlier to the Jackson Federal Land Bank, prior to its merger with the Jackson Federal Intermediate Credit Bank. An alternative would have been to merge the two Jackson banks under section 410 and then provide financial assistance to the new farm credit bank as required by section 410(c). As an alternative, the FCA had the power to charter a new Federal Land Bank for the Fifth District after the existing Federal land bank was placed in receivership. The FCA could have then ordered the Jackson Federal Intermediate Credit Bank to merge with that new entity to form the Farm Credit Bank for the Fifth District without interfering with the liquidation of the existing Jackson Federal Land Bank. Under any of these options, the essential congressional purpose of creating a financially sound Farm Credit Bank for the Fifth District would have been accomplished without doing violence to the plain language of the 1987 act or the clearly expressed legislative intent.

At the June 19, 1989, hearing on the FCA's implementation of the 1987 Farm Credit Act, our subcommittee chairman, Senator CONRAD, summed up the views of the Senators questioning the FCA's decision to force the merger of the Jackson Bank into the Texas Bank:

> Well, we have a question of what is the law of the land. That is the underlying, the dominant question here. I think Senator Boren and I are of like mind on what was the clear intent of Congress. I don't know what else we could tell you other than what our clear understanding was at the time we

wrote the law. (Subcommittee Transcript of Proceedings at 47.)

The clear underpinning of the restructuring provisions of the 1987 Farm Credit Act was the right of the shareholders of these privately owned institutions to control their own destiny. There is no reason for a new law. The FCA should implement the law we already passed.●

A TRIBUTE TO THE ASSOCIATION FOR THE ADVANCEMENT OF THE BLIND AND RETARDED, INC.

● Mr. MOYNIHAN. Mr. President, in the past weeks both the House and Senate have expended immense energies to develop a bill that protects those who are in need of and deserving of our special care. That bill, the Americans With Disabilities Act, was signed by President Bush on July 26, 1990. It is an important step in ensuring that those with physical and mental handicaps can lead fuller and more productive lives.

I would now like to take this opportunity to commend an organization which has been dedicated to assisting the physically and mentally handicapped for over 32 years. The Association for the Advancement of the Blind and Retarded is a private organization that serves young adults and adults that are afflicted with multiple handicaps, including blindness and severe mental retardation. AABR treats these individuals with great enthusiasm and provides them with 24-hour-a-day attention to help them develop and participate in full and productive lives.

AABR has developed an enormously successful program. This is largely due to the wonderful sense of caring and dedication of the directors, managers, and staff at AABR's facilities. With compassion and understanding they care for nearly 100 blind and retarded young adults who live in spacious, well-kept residences in communities throughout New York City. In addition, AABR maintains 2-day treatment centers where AABR's handicapped clients and others from the community receive extensive therapy and personalized attention.

Unfortunately, there are far too few programs that provide intensive services to these handicapped individuals, especially once they reach the age of 21. That AABR is able to fill this gap and, through love and caring, help these people to gradually reach their potential should serve as an inspiration to us all.

I would also like to take this opportunity to pay tribute to the Metropolitan Club Managers Association. In 1974 the MCMA held the first of what was to be many charity golf and tennis tournaments on behalf of AABR. In the past 17 years the MCMA's dedication has never faltered and I am pleased to announce that on September 24 of this year they will be hosting the 17th Annual Charity Golf Tournament and Dinner Dance. This type of private sector support and encouragement has been instrumental in helping AABR become the success it is today.

Over the years, AABR has received constant recognition as a leader in providing care and treatment for the neediest of our Nation's citizens. I am sure that my colleagues will join me in extending best wishes for an enjoyable event and much continued to success to AABR and its supporters.●

S. 1025, REAUTHORIZATION OF THE MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

● Mr. IKAKA. Mr. President, I rise today to advise my colleagues of S. 1025, legislation to reauthorize the Magnuson Fishery Conservation and Management Act, and to strongly urge my colleagues to support this vital bill.

In my home State of Hawaii, many earn their living from the sea and rely on fair and ready access to its bounty. The same is true of other coastal States. Indeed, Senators from other coastal States will no doubt agree on the need to eliminate artificial boundaries and needless restrictions which deny our fishermen, workers in the seafood industry, and private citizens full access to the sea.

Among its many provisions, S. 1025 would direct the Secretary of State to evaluate the effectiveness of our international fishery agreements pertaining to fishing for highly migratory species such as tuna. To effectively manage the fishery, we will require information on the number of vessels involved, the type and quantity of fishing gear used, the species of fish involved and their location, the quantities of fish caught in the fishery, and the condition of our fish stock.

I am especially concerned about obtaining information on fishing gear employed. In Hawaii, long-line fishing has become a growing concern. The number of long-line fishing vessels in Hawaiian waters has nearly tripled from only 37 3 years ago to over 100 today. Many of these boats, recent arrivals from the U.S. mainland, are now homeported in Hawaii. These boats and their operators have been forced by economic necessity to leave the mainland long-line fisheries whose stocks are declining rapidly.

Likewise, driftnet fishing has become a prime concern. Driftnet fishing practices, whether they occur within or just outside the U.S. exclusive economic zone, not only threaten our fishing stock but take a terrible and wasteful toll on other marine life, including marine mammals, endangered sea turtles, birds, and several threatened or endangered species. On a brighter note, Mr. President, I wish to commend the Government of Japan for its recent announcement that it will cease driftnet fishing operations in the South Pacific in the 1990-91 season.

Mr. President, S. 1025 would also level the playing field, so to speak, and give our fishermen as fair a chance to earn a living as those of other countries. The bill we introduce today would seek equitable arrangements to provide U.S. fishing vessels access to certain highly migratory species, such as tuna, within the exclusive economic zones of other nations. At the same time, the United States would begin negotiations for an extension of the official Treaty of Fisheries between the Governments of Certain Pacific Island States and the Government of the United States of America.

The foundation of the bill, however, lies in more effective Government control and oversight. S. 1025 would for the first time grant the U.S. Government control over domestic and foreign tuna fleets within the U.S. 200-mile exclusive economic zone. Stronger Government regulation and powers of enforcement would allow the United States to more effectively manage our tuna and other species of fish and thereby ensure the strength of the fishery. I should point out, however, that tuna would not be included until January 1, 1992, so as to allow the U.S. tuna fleet a reasonable amount of time to prepare for U.S. jurisdiction.

I am also pleased to announce that this bill would renew the life of the National Fish and Seafood Promotional Council for another year. The Council has proven invaluable in enhancing the competitiveness of the U.S. fish and seafood industry while promoting a healthier diet for all Americans.●

IRAQ INVASION OF KUWAIT

● Mr. MURKOWSKI. Mr. President, Iraq's invasion of Kuwait focused national attention on how dependent our Nation has become on foreign oil imports. Actions of the last 24 hours have raised serious questions about U.S. energy security.

A Presidential order requires a total embargo on all purchases of petroleum and petroleum products from Iraq. Further, United States oil companies cannot purchase Iraqi oil for export through a third country.

QUESTIONS WE HAVE TO ASK

Will the ban on imports extend to Kuwait oil now that Iraq controls those fields?

What is the United States obligation to keep oil flowing through the Persian Gulf? Dedication of 7th Fleet?

What actions will we have to take to secure oil supplies?

Should the United States take any further steps to protect other Persian Gulf oil producers? For example, Saudi Arabia?

What is the status of U.S.-flagged tankers and U.S. crews? Will those tankers be seized under the provisions of the Executive order freezing Kuwaiti assets?

Will OPEC policies be controlled by gun diplomacy in the future? Will OPEC now become a tool of Iraq?

What will be required to protect the flow of oil to countries like Japan which receives 59 percent of its oil from the Middle East?

NOT WITHOUT WARNING

At a May 28 Arab League summit key note speech, Saddam Hussein called on fellow Arab leaders to declare that strong support for Israel "precludes American friendship with the Arabs" and suggested using oil as a lever to force a change in United States policy in the Middle East.

Hussein said:

We have to announce in the loudest voice possible that nobody, and I repeat nobody, has the right to enjoy our resources while it opposes us. What I am calling for is to employ all our resources and potential, and if we do that, we do not need battles.

DECREASING OIL SECURITY IS A SERIOUS PROBLEM

Oil is a powerful geopolitical weapon.

Oil embargoes are not relics of the past.

The Soviet Union effectively embargoed Lithuania.

The embargo of 1973 by countries providing only 6 percent of U.S. oil supplies.

Today those same countries provide 30 percent of U.S. oil supplies.

The Persian Gulf alone provides 17 percent of U.S. supply.

Compare this with 3 percent in 1985.

IRAQ OIL STATISTICS

Iraq is second only to Saudi Arabia in oil reserves.

Iraq exports 2.7 million barrels per day.

Iraq provides 600,000 barrels per day to the United States. This may go up to 1 million barrels this month. The United States is Iraq's largest oil customer.

The United States obtains 8 to 10 percent of oil imports from Iraq.

Japan obtains 5 percent of oil imports from Iraq.

Western Europe obtains 10 percent of oil imports from Iraq.

KUWAIT OIL STATISTICS

Kuwait exports 1.8 million barrels per day.

Kuwait provides 120,000 barrels per day to the United States.

The United States obtains less than 2 percent of oil imports from Kuwait.

Japan obtains 6 percent of oil imports from Kuwait.

Western Europe obtains almost 5 percent of oil imports from Kuwait.

PROBLEM OF U.S. OIL DEPENDENCY

The U.S. consumes 16 million barrels of oil per day, and produces 7.4 million barrels per day.

In January 1990 the United States imported 9.13 million barrels per day.

We are over 50 percent dependent on other countries.

INCREASED WORLD OIL PRICES AFFECT THE U.S. TRADE DEFICIT

The U.S. trade deficit is $109 billion. Oil imports last year amounted to $45 billion—40 percent of our trade deficit. We spend twice as much on foreign oil imports as on Japanese cars. The trade deficit with OPEC countries tripled in the last year, from $475 million to $1.8 billion.

THE COST OF OUR MILITARY OBLIGATION IS A REAL COST OF IMPORTED OIL

Costs incurred to protect Persian Gulf oil was over $14 billion in 1987.

Taking military costs into account, this oil costs over $52 per barrel—over three times its nominal cost.

The carrier, *Independence* is now headed toward the gulf.

WE MUST CONSIDER THE UNMEASURABLE COST OF IMPORTED OIL

The tragic loss of 37 American seamen aboard the U.S.S. *Stark*.

We should not let our energy policy failures cost us young American lives in securing a supply of oil from the Middle East.

INDICATORS OF A FAILURE TO HAVE A FORWARD LOOKING ENERGY POLICY

First, the drop in U.S. oil production: U.S. oil production is at its lowest point in 26 years—currently 7.4 million bbls/day and dropping; production has dropped over 500,000 bbls/day since early 1986, a 20-percent reduction; Prudhoe Bay production dropped 10 percent in 1989; and future U.S. crude oil production could fall 4 million bbls/day by 2010.

Second, the increase in U.S. oil imports: The United States imports are higher now than during the oil crises of the 1970's; the 1989 yearly average for the United States was 46 percent of consumption; in January 1990, imports reached a record 54 percent; and predictions for 2010 call for imports of 54 percent to 67 percent of consumption.

WHAT ARE WE DOING TO REDUCE OUR DEPENDENCE ON IMPORTED OIL?

We have withdrawn over two third's of our public lands from mineral leasing; we have placed moratoriums on leasing in off-shore areas; and the Chukchi Sea OCS oil lease area may contain billions of barrels of oil.

TRANS ALASKA PIPELINE FLOW IS DECLINING

From a capacity of 2.1 million barrels per day—28 percent of U.S production—it is now carrying 1.7 million barrels per day, declining 10 percent per year; in the year 2000, the flow will have decreased to 500,000 barrels per day without new discoveries; and at current prices, 300,000 barrels per day is necessary to operate the pipeline, and if it is not operating, the law requires the line to be removed.

ANWR REMAINS OFF-LIMITS

ANWR could reduce the U.S. trade deficit by some $900 billion; ANWR is 19 million acres, the size of the State of South Carolina, and less than one-tenth of 1 percent would be impacted at full production; the average estimates are 3.4 billion barrels of reserves. Endicott, the sixth largest oil field in the United States producing 110,000 bbls/day, has a footprint of only 55 acres, the size of a small family farm.

INCREASING CONSUMPTION AND DECREASING CAPACITY WORLDWIDE PUT SADDAM HUSSEIN IN THE DRIVER'S SEAT

The Middle East is already producing in excess of 90 percent of capacity—the only limitation is infrastructure. The region is now producing 23 to 24 million barrels per day. OPEC's sustainable capacity today is a little in excess of 25 million barrels per day, and the call on OPEC is growing at over a million barrels per day each year. OPEC will soon reach capacity, with supply shortages and price shocks.

CHANGING POLITICAL AND ECONOMIC STRUCTURE OF SOVIET UNION AND EASTERN EUROPE

The Sovet Union is the world's largest oil producer—11.4 million bbls/day—and is a major supplier of oil to the United States.

Upheavals in the U.S.S.R. have decreased production 300,000 to 400,000 bbls/day in 1990 after declining by a similar amount in 1989.

The Soviets are less willing to provide cheap oil to Eastern European neighbors, so Eastern European countries rely more on world market oil supplies. A more productive Eastern Europe will demand more oil in the future.

GROWTH IN OIL CONSUMPTION IN THE FAR EAST

Japan is increasing its oil demand 4 to 5 percent per year; the developing Far East is increasing oil demand 6 to 10 percent per year.

CONCLUSION

OPEC has fed us cheap oil like a drug dealer developing a dependency. Just like a drug addict, at nearly 40 percent dependent on Middle East oil, we will be willing to pay anything to keep the oil flowing.

And just like a drug addict whose body is wasting away, so too is our domestic oil industry and our energy security.

What price are we willing to pay if Saddam Hussein increases the price of oil or turns off the tap? What sacrifices will have to be made with an oil supply reduced by 40 percent? Will more American lives be lost?

These are important questions which this body must address.●

TRIBUTE TO LOEUNG KHI

● Mr. BOSCHWITZ. Mr. President, I extend my congratulations to a Minnesotan recognized for his outstanding contributions to community service.

Loeung Khi has been recognized by KARE-TV as one of the "11 Who Care," in honor of his outstanding volunteer work. He's spent more than 10 years working with Cambodian youth through 4-H and other organizations in an effort to ease the cultural and language barriers of resettlement in the United States.

I must say I am always impressed by the dedication and hard work of refugees, and believe it's important they get the recognition they so richly deserve. As the only refugee in the U.S. Senate, I take great interest in refugee and immigration legislation and issues. The plight of refugees from Southeast Asia has been of particular concern to me.

I ask that an article from "Extenovations," published by the Minnesota Extension Service, highlighting Loeung Khi's accomplishments, be printed in the RECORD.

The article follows:

LOEUNG KHI CITED BY KARE-TV AS ONE OF "11 WHO CARE"

(By Deedee Nagy)

Loeung Khi, an MES Citizens' Advisory Committee member and organizer of the Khmer Youth Leadership Program and the Khmer Association, was recognized by KARE-TV for his outstanding volunteer efforts on behalf of the community. He was cited as one of the "Eleven Who Care" volunteer recognition by the station. The award includes an $1,100 personal award and a similar donation to the non-profit organization designated by the winner.

The televised award presentation was held in March at the Radisson Hotel in Bloomington. Loeung also recently received the 1989 McKnight Human Service Award.

For more than ten years, he has worked with Cambodian youth through 4-H and other organizations in the metropolitan area. His goal has been to help them bridge the cultural and language barriers of resettlement to the U.S. His wife, Phalla Keo, is a community program assistant with the Ramsey County Expanded Food and Nutrition Education Program (EFNEP).

Loeung was working in the American Embassy in Phnom Penh when the Cambodian Republic fell to the Khmer Rouge communists in 1975. With millions of others, Loeung and his family were sent to a slave labor camp. Two of his children died from deprivation and he was separated from his wife for about four years. When the Vietnamese invaded Cambodia and ended the Khmer Rouge "reign of terror" in 1979. Loeung and his wife were reunited. They fled to Thailand. There he began his social work in a refugee camp where he was chief of the Separated Family Reunification Unit.

Of his work in this country with refugee children, Loeung says, "Kids must learn to connect with the community. We must educate and unify them . . . . They must know their own heritage, culture and history—and they must learn self-sufficiency so they do not become victimized by the system."●

REAUTHORIZATION OF THE CARL D. PERKINS VOCATIONAL AND APPLIED TECHNOLOGY EDUCATION ACT (H.R. 7)

● Mr. JEFFORDS. Mr. President, I rise in support of the conference report on the reauthorization of the Carl D. Perkins Vocational and Applied Technology Education Act.

The conference report is the result of numerous hearings, lengthy negotiations, and compromise by both House and Senate, Republicans and Democrats. It is a good bill, and deserves to be supported.

The bill sets forth a new direction for vocational education. It emphasizes that in today's changing world and global marketplace, vocational education must be elevated to a status equal to it's education counterparts. For too long, vocational education has been left behind by the back-to-basics reform movement of the last decade and neglected in budget packages.

The bill adapts old-line vocational programs to meet the needs of our future workforce. It places a strong emphasis on the integration of academic and vocational curricula—essential to reduce the stereotype of vocational education as a nonacademic track and to ensure that our work force is adequately prepared for the challenges of the future.

It targets disadvantaged and at-risk students by taking a dramatic departure from past bills to eliminate the set-asides for special populations. While the specific monetary set-asides have been abolished the commitment to these populations has not. Perkins funds will continue to serve four important populations: economically disadvantaged, disabled, limited English proficient, and men and women with interest in nontraditional jobs. The conference agreement allows for flexibility of funding while providing for the necessary accountability measures to ensure that populations are served.

Although, the conferees moved a hold harmless provision regarding the small minimum from the 1989 to 1991, the House provision placing a 150-percent cap on per pupil expenditure was retained. The result of such a cap on six small States will have serious ramifications. In effect, the cap will level fund the basic grant for these States until such time as the basic grant total appropriations reaches sufficient size. The inclusion of the 1991 hold harmless will cushion the impact of such a cut on these States.

A number of other provisions were retained in the final version of the bill that are worth noting. Among them, the formula to safeguard the directing of funds to area vocational centers. This provision will allow Vermont, a State which as adopted a system of area vocational centers because of its rural nature, to continue its program and best serve it's student population.

Another important provision is the inclusion of provisions to draw qualified individuals from business and relevant fields into vocational classrooms. This program, known as the Mentor Program, encourages highly qualified teachers to serve as mentors to less experienced teachers. The results of this program have been extremely positive in my own State of Vermont which has already embarked on such an innovative teacher training program.

The highly publicized Technology-Prep Program was also included as part of the final bill. This successful program encourages consortia linking local education agencies or area vocational centers with community colleges or postsecondary vocational technical schools to offer a 2-year degree or apprenticeship program. These partnerships offer a degree or certificate in a condensed timeframe to encourage students to remain in school and force institutions to work cooperatively to reduce duplication of classwork.

While, I would have preferred to see the Senate provision prevail and have the Technology Prep Program administered by the State using a portion of the State funds rather than be administered at the national level, I am glad that the program was included and hope that small States will be considered equitably when applying for such funds.

The final bill reflects the intent of the recommendations of most major educational reports that have been released during the past months. It addresses the needs of that segment of our population that business and industry representatives have targeted as needing to be better prepared for the workplace.

Individuals with economic or educational disadvantage, minority groups, women and the handicapped, who in the past were destined to low-paying jobs, now have a better chance of receiving due recognition, due training and adequate compensation in highly skilled jobs because of this bill. It reiterates the fact that vocational education is not for those unwilling or unable to go onto a traditional 4-year institution of higher education—it is a viable and worthy education, essential to maintaining America's competitive edge in the future. I am glad to be a cosponsor of the original bill and encourage my colleagues to support final passage.●

NATIONAL HIGHWAY FATALITY AND INJURY REDUCTION ACT

● Mr. D'AMATO. Mr. President, I rise today to support legislation introduced

by Senator CHAFEE, S. 1007, the National Highway Fatality and Injury Reduction Act. This legislation aims not only to reduce the number of injuries and fatalities that occur on our highways each year, but also to decrease the many other costs our society must face due to these tragedies.

Each year, injuries and fatalities number in the tens of thousands due to automobile and motorcycle accidents. Following these deaths and injuries, society not only suffers emotional trauma, but also suffers lost productivity, lost workdays, and staggering legal and medical costs. More and more we find taxpayers bearing the burden of these costs through rising insurance rates and burgeoning costs for Medicaid and Medicare Programs. Yet, a large number of these tragedies could be easily avoided through the widespread use of safety belts and motorcycle helmets.

Presently, more than two-thirds of the population are required by State law to use automobile safety belts and motorcycle helmets. Making use mandatory has not only increased use, but has also decreased fatalities and injuries.

The National Highway Traffic Safety Administration and many other interested groups have produced numerous studies indicating how effective safety belts and motorcycle helmets are in saving lives. The NHTSA has said that when safety belts are worn, they can reduce the risk of fatal injury by approximately 45 percent. When motorcycle helmets are worn, the NHTSA has determined that the risk of fatality is reduced by approximately 29 percent. These statistics translate into thousands of fatalities and injuries that can be prevented each year.

This bill recognizes the great number of tragedies that could be avoided through simple safety procedures. It would give States 3 years to implement auto safety belt and motorcycle helmet laws and provides for $95 million in grants for education and enforcement. In addition, it provides $5 million for the NHTSA to assist States in their efforts. If, after 3 years, a State has failed to comply, they stand to lose 5 percent of their Federal highway construction funds after the first year and 10 percent thereafter.

The number of fatalities and injuries taking place on our highways each year is ample cause for the protection provided by this bill. The issue of wearing a safety belt or motorcycle helmet is no longer a personal one. It has become an issue of national significance which must be dealt with. Making safety belt and motorcycle helmet use mandatory can only help to make our highways safer places.●

TRIBUTE TO PATRICK BUTLER

● Mr. DURENBERGER. Mr. President, I wish to acknowledge the passing of a Minnesotan who was possessed of great dignity, compassion and spirituality. Patrick Butler was called the heart of Hazelden, the world-renowned chemical dependency treatment center in Center City, MN. He died on July 28, 1990, at the age of 89.

Patrick Butler was born in St. Paul in 1900. In 1908, he moved to Virginia, MN, where his family started Butler Bros., a successful iron-mining business. Mr. Butler graduated from Yale University and joined the family business in 1922. He eventually took the lead and directed the company until its sale in 1948.

In 1950, Patrick Butler took a brave and important step. Embattled by an addiction to alcohol, Mr. Butler sought help from what was then called Hazel's Den, a 1-year-old treatment center located on a small farm in east central Minnesota. He left the center in the summer of 1950 with a commitment to forgo alcohol and to the center's method of treating alcoholics in a dignified and kind manner.

The Butler family's support helped the center survive financial difficulties in the early 1950's. Then, in the mid-1960's, Mr. Butler bought what we now call Hazelden for $50,000. Under his guidance, the center grew into a $50 million nonprofit organization. Hazelden produces more self-help literature than any other publisher.

Those who knew Mr. Butler said his goal was not to make Hazelden big and well known. It was, instead, his goal to help as many people as he could. He did that by recognizing the needs of women and men suffering from chemical dependency and finding ways to meet those needs.

For his contribution to the health and wellness of many people in Minnesota and across the United States and the world, I posthumously thank Patrick Butler. And, I extend my condolences to his wife Aimee, his daughter Kate Peterson, his sons Peter and Patrick, Jr., his grandchildren and great-grandchild, and his brother Cooley. Society has benefitted from his life's work; we are poorer for his passing.●

TRIBUTE TO MARY ABIGAIL McCARTHY

● Mr. DURENBERGER. Mr. President, the Senate has lost a member of its extended family. I wish to acknowledge the death of Mary Abigail McCarthy on July 28, 1990, after a long illness. She was the daughter of Eugene McCarthy, the former U.S. Senator from Minnesota, and Abigail Quigley McCarthy.

Mary Abigail McCarthy was a gifted young woman who, as a college student, actively campaigned among her peers during Mr. McCarthy's Presidential bid in 1968. She was a youth leader who, according to columnist Mary McGrory, interpreted the candidate to the young and the young to the candidate.

Ms. McCarthy was a student at the Convent of the Visitation School in St. Paul and Stone Ridge Country Day School in Washington. She graduated from Radcliffe College of Harvard University and New York University Law School. In a small Washington-based private practice, she carried on her family's and her own tradition of service by representing low-income clients.

Ms. McCarthy was working as a public defender in a federally funded program in Washington when she was asked to teach at Yale University. During her decade of service, she introduced courses on the disabled and on immigration law. Her students also benefited from her supervision of their trial work.

Mary Abigail McCarthy did her generation of Minnesotans and Americans proud. She will be missed. I extend condolences to her parents, her sisters Ellen and Margaret, and her brother Michael.

WISCONSIN'S CONTRIBUTIONS TO NASA

● Mr. KASTEN. Mr. President, I rise today to recognize the contributions of the great State of Wisconsin to the Nation's space effort. I have recently had an opportunity to focus on this subject in conjunction with NASA Administrator Adm. Richard Truly who was a guest on my cable television show, "Speak Out, Wisconsin."

Since the future of America's space program, and the future of America's competitiveness in an increasingly technological world, will depend upon the performance of our young people in the science, space, and technology area, I was pleased that 20 young students from Wausau, WI, were able to participate by asking questions of Admiral Truly.

Their concerns were much the same as those of most Americans today, with many questions focusing on the problems of the Hubble space telescope, the space station Freedom, the possibility of sending astronauts to Mars, and the concerns about math and science education in this country.

Wisconsin has made numerous contributions to NASA's programs.

The University of Wisconsin-Madison developed one of the five isntruments on the Hubble space telescope—the high speed photometer [HSP]. It is used to precisely measure brightness of celestial bodies in several spectral bands of ultraviolet [UV] and visible light, it targets pulsars, supernova, white dwarfs, binary stars, and rings

around outer planets, and will help identify sizes, shapes, masses and temperatures of these objects.

The Wisconsin ultraviolet photo-polarimeter experiment [WUPPE] utilizes an instrument developed by the University of Wisconsin-Madison. It will fly on the next space shuttle mission, and is designed to study the way light is polarized and conducts spectroscopy. Further, it will provide information about the size and shape of celestial bodies and the strength of their magnetic fields.

Wisconsin is the home of two NASA regional teacher resource centers [RTRC's]—Discovery World Museum in Milwaukee, and the University of Wisconsin-LaCrosse. RTRC's are repositories of educational material which are established at educational institutions, museums, or other organizations.

As we look into the future, the Wisconsin Center for Space Automation and Robotics is creating technologies capable of enhancing our ability to live, travel and explore in space.

NASA has proposed a major effort to better understand the nature of global change. It is called the "Mission to Planet Earth," and will help to gain predictive capability so that we can understand how what we are doing is affecting our ecosystems. One important component of this program is the Earth observing system [EOS], a series of two polar satellite platforms designed to make a variety of measurements of the Earth's atmosphere, oceans, land and life.

Four Wisconsin researchers serve as members of the seven facility instruments teams for EOS.

Two Wisconsin graduate students were among those chosen to receive "Global Change Research Fellowships." The Fellowship Program is designed to encourage and train the next generation of Earth scientists. Selected were David W. Bolgrien of the University of Wisconsin-Milwaukee and Randolph J. Wynne of the University of Wisconsin-Madison.

The University of Wisconsin-Madison, with over $9.4 million, ranked 19th on the list of total NASA awards to educational institutions.

The Cray Computer Corp. located in Chippewa Falls, WI, has provided supercomputers for NASA.

The Ladish Corp. in Cudahy, WI, makes steel forgings for the space shuttle's solid rocket motors and will also be the source for similar forgings for the advance solid rocket motor.

It was a pleasure to have Admiral Truly as our guest on "Speak Out Wisconsin" and I certainly enjoyed the opportunity to hear from our student viewers from Wausau. It was also an inspiration to exchange ideas with these young scientists who are the future of America's Space Program.●

THE NATIONAL INSTITUTE FOR ENVIRONMENTAL RESEARCH BILL

● Mr. BRADLEY. Mr. President, it is an unfortunate fact of life that most of our environmental policy is reactive: it is the disasters which repeatedly show our inadequacies and our imperfect understanding of man's relationship to the environment.

Not long ago, I stood on the banks of the Arthur Kill in New Jersey. This heavily traveled waterway has been the site of not one but multiple oil spills just this year. And each of these spills exposed loopholes in the laws that protect our environment.

My hope is to look to the future, to build a foundation to address the major environmental challenges we will face and to assess what steps we can take now to prevent environmental disasters tomorrow. We know too well that our everyday actions have implications far beyond tomorrow, the next year, or the next decade. The Superfund law—of which I am quite proud—is a multibillion dollar effort to address an unfortunate inheritance of industrial and public environmental neglect. This sort of inheritance is not what I have in mind for our children. We can do better and a National Institute for Environmental Research is part of that effort.

Mr. President, the legislation promotes a simple concept: a rational and steadfast approach to long-term environmental research. It is time to acknowledge through a comprehensive research program that we humans have many neighbors who often are overlooked. If we are to continue living in a healthy world, with its diversity of species and natural beauty, we need to learn better how to treat our collective home with respect and understanding.

Clearly, the National Institute Research proposal is intended to supplement and complement our existing programs and efforts. These existing research efforts, which must continue, have been dominated by media-specific issues—for example, air or water pollution—and human health concerns. In spite of the recent increase in funding for global warming research, which itself underscores how ill-prepared we are to set or maintain research priorities, ecological and global concerns remain glaring holes in our research agenda. For example, our efforts to address oil spills focus on short-term aquatic effects. But in the estuarine ecosystem, oil wastes often settle and destroy shellfish, disrupt the food chain, obliterate nesting areas, and kill off food sources for birds and important sport and commercial fishes. These subtle effects are often easy and convenient to disregard. If we underestimate the costs of our actions, both inadvertent or otherwise, we will inadequately safeguard our natural legacy. We cannot estimate these costs until we appreciate the subtle effects and changes in natural systems.

I believe that the National Institute of Health [NIH] can be an effective model for a comprehensive research strategy. A National Institute for Environmental Research could, like NIH, consist of problem-oriented institutes or centers. The institutes would encourage and support funding for competitive research by academic institutions, nonprofit organizations, and industry. These efforts would have two positive results. First, competitive research efforts would yield the best and most effective use of funding. And, second, by working through our educational institutions, we would insure the development of a necessary intellectual infrastructure. As we consider the mounting challenges ahead, this last component should not be underestimated.

Mr. President, my legislation calls on the National Academy of Sciences to examine these issues and report to Congress on the feasibility, merits, and general need for this National Institute. This report will be due in one year. It is clear that many agencies and independent scientists can and should play a role in the establishment of this Institute. The EPA, the National Oceanic and Atmosperhic Administration, the National Science Foundation, the U.S. Geological Survey, the Forest Service, the Fish and Wildlife Service, and the President's Council on Environmental Quality are among the many Federal groups that have a legitimate role to play and deserve the opportunity to contribute to the Institute's development. The National Academy is perhaps the organization that is best-equipped to assemble the Nation's finest minds and develop the critical review and research strategy.

In the scheme of things, this legislation appears to be a small fish. The EPA, in testimony before the House Science Committee, lauded the goals of this effort, but opposed action. According to the agency, the "EPA is developing proposals for alternative institutional arrangements * * *. EPA has recently embarked on an effort to strengthen long-term research." Maybe things are getting better, Mr. President, but I do not take their word for it. Dedicated young professionals and scientists are starving for necessary support. A National Institute, which reaches out to our universities and students, which advocates the global perspective, which promotes a balanced and steadfast research agenda, is an essential part of a strategy for a healthier planet.

Mr. President, I urge the Senate to approve this legislation.●

THE LOUISBURG CAFE

● Mr. BOSCHWITZ. Mr. President, I rise today to salute a group of Minnesotans who have found an innovative solution to a problem, and at the same time, have made a statement of sorts about midwestern ingenuity, and the preservation of a way of life.

Louisburg, MN, is a small town in the western part of our State. It is a small town that sprang up many years ago as a railway stop, along with a grain elevator. There are dozens and dozens of such towns in Minnesota, and over the years, many have shrunk in size and some have even withered away.

The 1970s were tough times for Louisburg, as they were for many communities. The town's implement dealership closed, then its gas station shut down, along with the grocery store. About the only commercial entity left in the town was its cafe, and in 1988, that, too, shut down.

Let me say, Mr. President, that in rural small towns, the local cafe is much more than just a place to get a meal. It often becomes the focal point of a town's social life. It is the place to catch up on local chat, or to discuss politics, or to compare farming notes with one's neighbors. It is the place where coffee is drunk, and where the donuts are fresh each morning and where the food is always good.

I might add that I find small-town cafes a great place to stop during my travels around the State. For all of the experts and "think tanks" we have here in Washington, I find that the best place to find out what people are thinking, the best place to get a little common sense advice, is around a table in a cafe in Minnesota.

For many towns, the loss of a cafe was the final straw that broke their economic back. The good folks of Louisburg, however, were not ready to let that happen.

About 50 of the local residents pooled their money, raised about $4,500 in contributions, and reopened their cafe. They found a nice couple, Harold and Emily Hansen, to run the place, and in mid-April, they reopened.

I wonder, Mr. President, how many others in this situation would have not bothered to make the effort, or who would have looked to the Government for some kind of solution. These people, however, simply took matters into their own hands and got the job done.

Today, despite a few bumps along the way, the Louisburg cafe, where you can get service with a friendly smile, is open and thriving and providing a hub for the people of the area.

I think it's a remarkable story, Mr. President, and I'm extraordinarily proud of those constituents of mine who have made this possible. I wanted to take a moment to salute their efforts, and to add that I hope soon to travel to their part of the State and have a donut and a cup of coffee with the people of Louisburg.●

U.S. COAST GUARD ANNIVERSARY

● Ms. MIKULSKI. Mr. President, I would like to take a moment to mark the 200th anniversary of the U.S. Coast Guard—the unsung heroes of the Armed Forces. On August 4, 1790, the U.S. Congress authorized the building of "a fleet of cutters" to protect the revenue and patrol the coast of the new Nation.

For 200 years, while we grew from a short string of cities between Boston Harbor and Georgia's Sewanee River into a great, international seagoing power, the Coast Guard has quietly carried out its critical missions.

The Coast Guard has patrolled our waters, seizing contraband and stopping smugglers—even battling pirates.

It has lit our rocky shores and marked our bays and inlets—allowing the largest ocean liners and the smallest pleasure craft to safely navigate passage.

It has ensured the safety of our sailors and their vessels, testing pilots and crewmen, inspecting vessels, and enforcing the regulations that protect the lives of America's 73 million recreational boaters.

It has kept commercial sealanes open, protecting the trade that connects us to the rest of the world.

And the U.S. Coast Guard has fought in every major national conflict since 1790. On this anniversary we should remember the Coast Guard sailors who gave their lives in defense of this Nation. They are unsung, but not forgotten. When the Coast Guard Veteran's Association named me Senator of the Year recently, I was moved and filled with a special gratitude.

I grew up in the port city of Baltimore, and I have always felt a great pride in the men and women who kept the harbor running. We are all proud that the new Commandant of the Coast Guard, Adm. John William Kime, is a Baltimore native. He grew up standing his days the way I sometimes did—watching the steamers coming in to the Light Street docks.

Admiral Kime went on to become the Captain of the Port of Baltimore, making sure all those ships made it in and out safely. And I went on to become a U.S. Senator, where I fought to save the U.S. Coast Guard Yard at Curtis Bay, MD.

For 90 years, Curtis Bay has been the yard for the Coast Guard's shipbuilding and repairs. Three generations of Marylanders have worked at the yard, becoming a part of the great Coast Guard tradition that we are celebrating today. The sailors of the Coast Guard and the civilians at the yard built a unique relationship, becoming an important part of Maryland that we were not about to lose.

We worked together and we kept the Coast Guard repair yard where it belongs—in Maryland. We won another fight this year, when the Coast Guard agreed to move a major supply center to Curtis Bay—just a couple miles down the Patapsco River from Admiral Kime's old neighborhood of Highlandtown. That is a tribute to every single Coast Guardsman and civilian who make such a great team at the yard.

I want to wish Admiral Kime the best of luck. The Coast Guard has always had a tough job.

When winter storms rage off the Maryland coast, when sleet and cold rain have driven most of us indoors, the Coast Guard is on the water, pulling people out of the Atlantic Ocean. In fair weather or foul, the Coast Guard is on duty, saving 500 people a month, and 2 million dollars' worth of ships and cargo every day.

When ruthless drugrunners pilot high-powered smuggling craft through the Gulf of Mexico, the Coast Guard is there, risking their lives to stop the plague those smugglers carry to America's shores.

When a tanker oozes oil off California's rocky coast, the Coast Guard is once again our first line of defense, working around the clock to contain and clean up the spill. Six hundred times a month, the Coast Guard responds to chemical or hazardous material spills.

From monitoring icebergs to maintaining the 50,000 buoys and lighthouses that mark our coast, the Coast Guard is there.

On this, their anniversary, I would just like to say, to all the men and women in the Coast Guard, "thank you."●

THE CYRUS SCHOOL SYSTEM

● Mr. BOSCHWITZ. Mr. President, I rise today to speak about some of the educational challenges facing small towns in Minnesota, and across the Nation, and about the unique way in which one of my Minnesota communities has risen to that challenge.

Many small towns have faced enormous pressure in recent years as their population base has eroded. Some school districts have been forced to close their schools, or to consolidate with other school districts. Many are forced to pare back their course offerings.

But in little Cyrus, a small town in the west-central part of the State, the parents responded to the challenges in a different way. They took their only school—an elementary school with only 95 students—and turned it into a math-science-technology school that is

attracting students from towns in the area.

In a town of only 300 people, Mr. President, the children are receiving what seems to be a remarkable education. A bright, innovative group of eight teachers has designed a non-traditional curriculum that relies heavily on involvement with computers. Most schools have one computer for every 15 students, but in Cyrus, there is a computer for every 3 students.

The computers are used for writing, math and science, and in a variety of ways. In a less-structured, non-traditional classroom setting, the students of Cyrus are flourishing.

The school even has a mascot—"Dr. Megabyte"—whose image has come to represent the outstanding education efforts of this town.

It has been a remarkable turnaround for the town, Mr. President, and if I may say so, it represents the kind of innovation and determination that I think is a trademark of Minnesotans. The people of Cyrus saw a challenge, and rose to meet that challenge, and I am very, very proud of what they have done, and proud to represent them in the U.S. Senate.●

CONGRATULATIONS ON THE 150TH ANNIVERSARY OF THANKFUL BAPTIST CHURCH OF AUGUSTA, GA

● Mr. FOWLER. Mr. President, I congratulate Thankful Baptist Church on its 150th anniversary. The founding of Thankful Baptist Church which was first called Independent Baptist Church on April 26, 1840 was an historical occasion for Augusta as well as Georgia. Christian brothers and sisters congregating during this country's most arduous time in history was propitious and instrumental to the progress made in civil and human rights in America.

Thankful is most fortunate to have had only 11 ministers during the period of 150 years. From Reverend Samuel Bell, the first minister of Thankful, to Reverend Nathaniel Young, a well-known minister and leader in Augusta and throughout the State of Georgia, Thankful has been the impetus of many struggles in our society such as hunger and homelessness. Rev. Young who is a former member of the Richmond County Board of Education and graduate of Morehouse College has witnessed the development of a day care center, three choirs—the N.T. Young youth choir, senior choir and gospel choir, a Sunday School department with two divisions and the recent purchase of a 46-passenger church bus.

It is said where there are good leaders there are also good followers. Thankful's members are truly on the word and under the cross. The Augusta community has truly benefited from the kind and generous hearts of this congregation. Your christian deeds remain in the hearts of your members both near and far as well as the Augusta community.

I am sincerely proud to represent such a progressive, thoughtful and accomplished congregation in the U.S. Senate. I congratulate Reverend Young and each and every one of the members of Thankful Baptist Church on the occasion of their 150th Anniversary celebration.●

THE MINNEAPOLIS AIR TRAFFIC CONTROL CENTER

● Mr. BOSCHWITZ. Mr. President, I rise today to salute a group of more than 400 Minnesotans who make up part of our Nation's air traffic control system, and who have recently been recognized for their outstanding work.

The men and women of the Minneapolis center were honored in 1988 when they were chosen as the "National En Route Facility of the Year."

Rather than resting on their laurels, however, the men and women of the center went back to work more determined than ever. And now, Mr. President, they have been honored again, as the "National En Route Facility of the Year" for 1989, an unprecedented back-to-back win of this prestigious honor.

The Minneapolis center gained national attention in July of 1989, when a United Air Lines flight lost engine power, and hydraulic power over northeastern Iowa. The Minneapolis Control Center took charge of the emergency, talked to the pilots and did everything possible to assist in the emergency.

However, the center is not only at its peak during an emergency. Excellence is visible in the day-to-day operations as well. In 1989, despite a traffic increase of about 4 percent, the Minneapolis Center achieved a decrease in operational errors of eight percent. That equals, Mr. President, a rate of one error for each 140,664 operations. That is truly remarkable.

The Minneapolis Center has designed and utilized a number of innovative programs for both internal communications, and in communicating with pilots in the area. These programs have led to increased morale within the center, and an outstanding working relationship within the people served by the center.

I say with some pride, Mr. President, that it's not at all unusual for Minnesotans to lead the Nation. Minnesotans have a very strong work ethic, and a spirit of achievement that shows up in virtually everything they do. The men and women of the Minneapolis Air Traffic Control Center have proven that again, and I'm honored to represent them in the U.S. Senate and I'm proud to have them as my constituents.●

HEARINGS ON STATUS OF WILD SALMON RUNS IN THE SNAKE AND COLUMBIA RIVERS

● Mr. PACKWOOD. Mr. President, when I was in my home State of Oregon during the Fourth of July recess, I held a series of seven hearings across the State to look into the effects of listing certain species of Columbia and Snake River salmon as threatened or endangered under the Endangered Species Act [ESA]. My colleagues may be unaware that several petitions have been filed with the National Marine Fisheries Service to list five species of salmon under the ESA.

The purpose of my hearings was to heighten public awareness of the economic and sociological effects of a potential listing. The Columbia River is a critical resource to the Northwest. It meets power, irrigation, commercial and sport fishing, recreation, navigation, and wildlife habitat needs. Clearly, our goal is to allow for the continuation of all of these uses of the river. However, this may not be possible if salmon runs are listed as threatened or endangered.

The hearings I conducted were held over a 4-day period in Astoria, St. Helens, Portland, Hood River, The Dalles, Pendleton, and Ontario. Each hearing explored all aspects of the listing issue, including the hazards facing salmon populations, what can be done to protect them, and all the implications of providing additional protection for certain species. Witnesses testified from the fishing, aluminum, and agriculture industries; environmental groups; port authorities, and local government agencies.

I found the testimony presented at these hearings enlightening and thoughtful. Therefore, Mr. President, I ask that the attached testimony from the July 2 and 3 hearings be inserted in today's RECORD. I will submit the remaining testimony for tomorrow's RECORD.

The testimony follows:

TESTIMONY ON ENDANGERED SPECIES ACTIONS AT AN INFORMATIONAL HEARING

(Testimony of Brig. Gen. Pat M. Stevens IV, U.S. Army Corp of Engineers)

I welcome this opportunity to present the Army Corps of Engineers' views on the ongoing review process to consider certain Columbia River Basin salmon species for listing under the Endangered Species Act. The corps recognizes that the potential impact on the region is significant and widespread and we will fully cooperate in the process.

There are three major points I am going to emphasize today:

The corps has a longstanding commitment to the Columbia River fish resources.

We fully support objective, scientific studies and will fully participate to determine if a listing is appropriate and to identify ac-

ceptable actions for rebuilding any depleted salmon runs.

Fish passage at the dams is one element in rebuilding salmon runs. A full solution will require a comprehensive analysis of other impacts such as hatchery disease, ocean and river fisheries and habitat degradation.

The corps' eight lower Columbia and Snake River Water Resource projects serve a variety of needs: hydropower, flood control, navigation, recreation, and fish and wildlife conservation. Because adult and juvenile salmon must pass through or around these projects the corps has, since construction of Bonneville Dam in 1938, provided for fish passage. We have pioneered and built effective adult fish ladders and continued development and installation of juvenile fish bypass systems. Since 1980 we have been transporting juvenile fish, up to 20 million annually, collected at upriver dams past all downstream projects. Where losses could not be avoided, hatcheries have been constructed. Ten of these hatcheries are now operating and releasing over 40 million fish annually. Another one is scheduled for completion in 1991. Put in perspective, the corps has, through 1989, invested over $550 million in fish facilities at its Columbia Basin projects. This represents nearly 13 percent of the total investment at the corps' eight lower Columbia and Snake River projects. I want to emphasize the cooperative nature of these accomplishments. They have been the result of teamwork with Federal, State and tribal agencies.

In spite of these efforts, some salmon runs have declined and National Marine Fisheries Service is now considering petitions calling for several salmon stocks to be listed as threatened or endangered.

What can we in the Pacific Northwest do to assist National Marine Fisheries Service in this effort?

First we must approach the process in an atmosphere of mutual trust and concern. It will require an open, objective, scientific analysis to determine if listing is appropriate to protect specific stocks and to identify and implement acceptable actions necessary to rebuild any depleted fish runs. There is a pressing need for a more complete understanding of the fishes' life history if we are to formulate effective remedies that are considered necessary to rebuild the population of any listed species. It must be a reasoned scientific process.

We all have a role in that process if we are to obtain the best possible knowledge upon which to act.

In that regard, I applaud the initial steps taken by National Marine Fisheries Service in establishing a technical coordinating committee with wide, interagency membership, setting up a highly credible academic team to aid in the scientific review and, importantly, conducting the review process in a public forum.

I can only speculate on what future actions may be needed to rebuild any depleted salmon runs. I can tell you that the corps is presently carrying out a series of activities which I believe will further benefit these runs:

The President's fiscal year 1991 budget presents a commitment to continue a program of juvenile fish bypass installation estimated at $139 million and requests $14.8 million to continue design and construction of juvenile bypass facilities at four of the mainstem projects and $1 million to evaluate additional measures at other corps dams which could contribute to increased fish survival.

Flow augmentation—better known as the water budget—is being provided in the Snake and Columbia Rivers during the spring migration period to increase survival of juvenile fish migrating to the ocean.

New fish transport barges and facilities are being brought on-line to permit more juvenile fish to be hauled from the uppermost dams past all of the downstream reservoirs and dams.

Over $3 million each year in research is being funded by the corps to develop and improve means of assisting migrating fish.

The corps is participating with Bonneville Power Administration and the Bureau of Reclamation in a comprehensive review of the operation of the multi-purpose Columbia River projects. That review will consider system operating scenarios that may further assist Columbia Basin Fish and Wildlife Resources.

I recognize that the corps' activities focus on in-river assistance to the fish. That represents only one fact of the life cycle of these fish. Diseases continue to decimate hatchery stocks, over-harvesting continues to diminish the stocks, mixed-stock fisheries impact depleted runs, and habitat degradation from several activities continues. All of these fish survival questions must be addressed. I am confident that together we can seek solutions with the cooperative efforts of Federal, State, tribal, and public interests in this worthwhile endeavor.

Again we pledge our support in this effort. Thank you.

TESTIMONY OF TOM ROBINSON, MANAGER, OREGON SALMON COMMISSION

Ours is a state agricultural commodity commission created by legislative action in 1985, to provide beneficial services to Oregon's ocean going commercial salmon trollers. We are funded through assessments on those trollers, each of whom pays 1.5% of the value of their catch into this Commission. The Commission itself consists of seven volunteer members, five of whom are commercial trollers and two seafood processors. In addition to regular market promotion and quality assurance activities, this Commission dedicates a good deal of its resources towards participation in a myriad of governmental and regulatory proceedings on behalf of the industry. Both the depth and breadth of these political involvements continues to increase dramatically especially since the advent of the Magnuson's Fishery Conservation Act and the state's own Wild Fish Policy including specific management plans for coho and chinook harvests, during the last 15 years. The Commission's increasing involvement in the political arena is reflective of increasing stresses simultaneously upon the industry and upon the salmon we harvest. The Commission's thrust continues to be aimed at achievement of productive harvests through viable management and conservation strategies. We have been continuously involved in conservation programs, enhancement programs, management programs, environmental protection, land use planning, etc., etc., etc. in keeping our philosophy that continued productive harvests will depend on effective management and protection of the salmon stocks we harvest.

The Troll Fleet

Today Oregon's troll fishing fleet consists of approximately 2700 vessels. Typically, each vessel employs 1 to 3 persons including the skipper during the troll fishing season which runs from May through October annually. About half of these vessels fish on a daily basis only, running out of the various ports along the coast and returning to deliver the day's catch when weather and regulation permit fishing. This day fleet provides the very freshest salmon product available to market. Since day fishing can be done in smaller vessels, typically 18'-30' in length, it has often been an entry level fisher, providing newcomers and young people with opportunity to begin a career in other fisheries. Also, many day fishermen are part-time fishermen holding other jobs during off seasons. The other half of the fleet consists of trip boats 30'-50' in length, capable of fishing trips of several days in duration ranging from Alaska to Central California. Most typically a salmon trip vessel is owned and operated by a single individual or family. Many times an entire family or a husband/wife team will fish the boat. The greater size and sea-going capabilities of these vessels make them adaptable for other fisheries as well. Historically, salmon trolling has been combined with tuna trolling and winter crabbing to provide a family with a year round fishery income.

Fishing Operations

Troll fishing is unique yet ancient. Trollers use no nets. Instead each boat is rigged with a system of down riggers to which hook and line lures or baits are attached, then trolled through the water at slow speeds. Trollers, like sport fishermen, rely on skill and luck to bring salmon to the hook for the catch. The troll method of harvest brings a super high quality of samon to market. One reason lies in the fact that each salmon is caught, landed, cleaned and iced aboard the boat by individual handling, rather than by bulk handling. Also, since trollers take salmon at sea while they are feeding on natural bait fish, the condition of each salmon is at its peak of brightness, firmness, and marketability. For those reasons, troll salmon have historically brought top market prices to the Oregon industry.

Commercial fishermen have always pointed to their career as more than a livelihood, but a way of life. Trollers are no exception. Trolling began to develop along the Oregon coast during the early part of the century when gasoline engine power became dependable and affordable. Many fishermen who had been involved in gillnetting operations during fall runs began to explore the open sea outside the river mouths with almost immediate success. Market advantages were discovered by extending the period of time over which salmon could be made available to waiting customers. Somewhat later, when gillnetting was removed from all but one of Oregon's coastal rivers, the troll industry expanded. Even from those early times until modern times it has been understood that trolling itself, is a conservation method helping to assure conservation of the resource. Given a wide range of open ocean and traditional opportunity to fish between May and October, the fishing pressure of the troll fleet tends to spread itself over the entire expanse of ocean from the shoreline out to a distance of up to 50 miles and north and south along the entire coastline. This kind of spreading tends also to spread impacts on any particular stock of fish emanating from any particular river system. Even with today's increased efficiency on fishing vessels, impacts on all available stocks are to some degree limited by this method of harvest as it is subjected to natural weather and ocean condition events.

Troll Salmon Processing

When trollers deliver their catch to dockside buyers, they are delivering a partially processed product in that the fish has already been cleaned and iced. Most dockside buyers, numbering over 100 along the entire Oregon coast, then take another step in processing before selling to regional distributors or to wholesalers in other parts of the state, the nation, and the world. Salmon are inspected, graded, repacked and shipped within a matter of hours. Each of these primary processors requires a staff of employees to do the work. The number of employees depends upon the size of the operation. A small buyer may be an individual with one or two helpers. A large buyer could employ several dozen salmon handlers. Of course, most buyers also handle other fish products, increasing their labor force as necessary when an abundance of any fish product appears. The primary processors feed into approximately two dozen regional distribution houses in the state of Oregon. These distributors then process the salmon again, often cutting the product into fillets, steaks, etc. for ultimate retail display and sale. Again, a fairly large labor force is required in order to handle the troll salmon product during the season. Distributors will move their product to retail outlets quickly since salmon shelf life is only about two weeks maximum. It is a well oiled machine that moves each salmon through the market route from vessel to consumer. At each stage employees are necessary and profits are made.

Economics of Trolling

It is difficult to say how many jobs are created in any one community or in the entire state by the catching and processing and sale of troll caught salmon. Approximately 5000 shoreside jobs are held by persons directly involved in the processing of seafood along the Oregon coast. That labor force, combined with other commerical fishing incomes along the Oregon coast, generates $250-$350 million annually, making commercial fishing the second highest source of earned income on the coast, second only to timber jobs, and leading tourism by nearly $100 million dollars in 1987. Salmon trolling is generally the #1or #2 highest source of that fishing income, alternating with shrimp fishing for the top contribution spot, at around 25 percent of the total commercial fishing benefit dollar.

As with all manufactured or processed agricultural products, regional income benefits increase at each step of processing and sale for profit. For troll salmon, the formula was recently developed by Drs. Hans Radtke and William Jensen for the West Coast Fisheries Development Foundation, which shows the relative increase in regional personal incomes derived from the catch and sale of the salmon. That study, based on the 1986 harvest, showed that the relationship of the ultimate regional impact benefit to the ex-vessel price of troll salmon was approximately 2.5 to 1. The 1987 and 1988 troll seasons, for example, brought $18 million and $22.4 million to the fishermen and correspondingly brought about $48 million and $56 million in economic benefits to the state of Oregon from the sale and processing of 7.7 million pounds and 7.6 million pounds of troll caught salmon, respectively.

Troll Salmon Market.

In the seafood industry, all salmon is regarded as a high margin item. It is also subject to highly volatile market conditions. The major market route for Oregon's troll salmon is through major distribution centers in California to the entire western United States. However, a significant quantity of Oregon salmon is routed to foreign markets, primarily in Japan and in Europe. Also, a small but significant portion of the troll product remains in the state of Oregon for consumption by the Oregon public. It is that product going out of state which brings to Oregon the greatest benefit in terms of dollars, since these dollars generated are new dollars. Often, as was the case with Japanese exports during the last five years, exports bring an additional bonus in terms of exchange rates and balance of trade benefits.

Also, during the five years, the world has seen a tremendous increase in the supply of salmon from farm or pen-rearing operations. In many cases, over production by these farms has resulted in stress on salmon markets and has effectively driven prices down for Pacific troll caught salmon including Oregon's salmon. However, our salmon is beginning to rebound, given its superior quality and its 100% natural feeding attributes. The Salmon Market Newsletter, an international trade magazine, recently published results of a poll of American wholesalers which revealed that the Pacific troll product has superior ratings for consumer preferences in taste, texture, appearance, etc. but received inferior ratings in terms of consistency of supply. In short, our major market problem is not from competition on quality, but from competition on consistency of quantity.

Therefore, the industry now realizes that any interruptions in product flow, any decreases in salmon availability, continue to result in increased market stress, decreasing profitability for the Oregon industry and increasing imports of foreign products. Customers will simply not tolerate delays, shortages, or excuses, all of which are immediately capitalized upon by our foreign pen-rearing competitors. The general rule of thumb for seafood distributors is that once a customer is lost, he's lost for good.

Currently, the Oregon industry is managing, but barely managing to maintain its market share and market niche in the face of stringent regulatory constraints. For example, during the period of 1971 to 1980, the Oregon troll fleet brought an average of 800,000 to over 1 million coho to market annually. During those years, lucrative markets were discovered and serviced in Europe and in the Orient. Those harvests and the market consistency which they provided, brought $10 to $29 million to the fishermen and two to three times that amount to the state of Oregon in personal income impacts (1989 dollar equivalencies). However, in the late 1970's trollers began to participate in a conservation program to protect Oregon Coastal Natural (OCN) or so called "wild" coho stocks along the Oregon coast. A Coho Plan was developed which called for an escapement of 200,000 adult coho to natal streams along the coast annually. Calculations were made pre-season and harvest quotas were set to allow that spawn escapement. The immediate result was a loss of opportunity to harvest other coho stocks from hatcheries which swim freely amongst the OCN stocks in the ocean. Since trollers fish on all stocks available in the ocean, it was determined that an overall harvest constraint was necessary in order to protect the spawing escapement goal called for in the Coho Plan. Those harvest constraints cost the troll industry and the state of Oregon dearly in terms of lost harvest revenues.

The record shows that the value of an average year's harvest of coho before 1980 was $10.7 million (1989 dollar values). After 1980 during continuing harvest constraints on coho, the average harvest has been only $4.8 million to fishermen. The drop to the regional economy has been from about $25 million annually to about $10 million annually. It is further testimony to the fact that market profits are in part a function of product availability to see the decline in the ex-vessel price per pound which also occurred during those years of decreased product availability. During the 1970's, (pre-coho management constraint), the unit price on coho averaged $2.00 per pound, after the constraint and corresponding fall in product availability, the unit price dropped to an average of $1.60 per pound reaching its lowest point in 1989 at an average unit price of $1.07 per pound; the lowest on record since 1971!

A similar situation exists in chinook harvests on the south coast. In the mid 1980's the Klamath River Management Zone became pivotal in determining chinook harvest not only in that area, but also along the entire Oregon coast. Chinook quotas were established in order to guarantee a certain point of each annual run to be set aside for Indian fisheries and for spawn escapement. The result on the ocean was again costly and immediate. From 1971 to 1985 the Brookings area of the coast harvested an average of 55,000 chinook. It was generaly regarded as one of the most productive areas of the state. Often bringing 30-50% of the chinook caught in Oregon to market. The Brookings area combined with the Coos Bay area consistently provided the bulk of chinook in the annual troll harvest. After the Klamath constraint commenced in the mid 80's, Brookings area dropped to an average of 33,000 fish per year while overall chinook abundance greatly increased. The effect on the south coast area was a drop to a harvest representing sometimes less than 10% of the coastwide harvest. Those constraints have also greatly affected the Coos Bay area during the last three years when constraints on Klamath chinook reached all the way to Cape Arago. Again a decline in the unit price per pound of chinook salmon for the fishermen was seen. Again a decline in the overall benefit to the state of Oregon for each pound of salmon landed on the coast was seen.

All records indicate what trollers have known throughout the progression of increasing constraints and decreasing profitability; the troll industry has paid dearly and the effect has been felt by the entire state.

Relationship of Columbia River Salmon stocks to the ocean troll harvest.

The importance of the Columbia River system in terms of its salmon production and corresponding contribution to salmon harvests is well documented. Representatives of the PFMC and the Oregon Department of Fish and Wildlife will undoubtedly address that significance. The troll industry is also well aware that Columbia stocks are a major contributor to our annual harvest. Most important in terms of direct harvest by Oregon fishemen landing into Oregon ports are the south-turning coho stocks emanating from Columbia River hatcheries. Both ODFW and the federal government operate hatcheries which provide fish to the public as mitigation for damage caused by dams now in place on the river. Each year while Oregon coho ocean harvests are limit-

ed by OCN constraints, they are conversely expanded by the numbers of hatchery coho from the Columbia system. These fish have a built-in navigational system which causes them to migrate southward at sea returning to the near coastal waters during the summer months usually appearing first off the north coast of California, then migrating along shore towards the Columbia River where they return in late August and September. They made up the bulk of the coho harvest for the Oregon troll industry. Most Columbia River chinook stocks, however, are north turning stocks which do not contribute heavily along the entire Oregon coast. Such is the case of the Snake River spring stocks in question. Rather they contribute to the Oregon troll harvest incidentally throughout the summer and increasingly in the late summer off the north coast. There are some exceptions and it is well understood by managers that the Columbia stock chinook are a significant portion of all ocean harvests from Alaska to central California. The Snake River fall chinook in question, may be more likely to appear in Oregon and California troll catchers.

Stock and Harvest Management Relationships.

Under current fisheries management by the PFMC and by the state of Oregon Fish and Wildlife, the ocean troll industry limits its take of salmon on the ocean to a level which provides for both in-river sport and commercial harvest and subsequent spawn escapement for continuation of hatchery and natural runs. Under these state and federal jurisdictions, the troll industry also limits harvests to provide for conservation of critical stocks in particular areas. Formulas for determining harvest levels for the ocean fishery are complex and probably esoteric for this report. But an overview of the workings of the management strategies and their effects on the troll industry will be helpful.

Ocean harvest management always begins with an estimated prediction of the ocean abundance of mature adult salmon in any given year. Once that number is determined, by adding increments of all stocks from all river systems and hatcheries, portions of the total abundance are systematically set aside. Spawning escapement goals are subtracted. In-river user allocations are subtracted. Then a harvestable surplus number is determined to be divided between ocean fisheries. The reductions are dramatic and often extensive. For example, as is now the case with coho stocks, any stock of critical concern such as the OCN stocks, or certain Washington coast coho stocks, become the driving force around which all other coho harvest must revolve. Sometimes, despite a very large healthy abundance of coho on the ocean, harvests must be greatly curtailed in order to show numerical protection of a single stock from a single river source. For example, the 1990 ocean troll harvest season was designed according to a pre-season prediction of an abundance of 1.3 million adult coho available in the ocean. Of that number nearly half was projected to be hatchery stocks primarily from the Columbia system. Those hatchery stocks could withstand a combined ocean and river harvest rate of up to 90% or a number around 800,000 fish to harvest. Of that number, the ocean troll industry would normally take approximately half or around 400,000 coho. Instead, due to constraints to protect OCN stocks, and to protect some Washington coastal stocks, the ocean troll quota was set at around 170,000 coho. That harvest is about 85% reduced from pre-management averages and about 50% reduced for available hatchery stocks. In other words, the cost to the troll fishery for conservation of "wild" coho sits currently between $1.9 million and $5.3 million and between $4.5 million and $13.5 million lost to the state economy. In 1990 does not represent a large coho abundance year!

Although neither the State of Oregon nor the PFMC currently regulates Oregon toll chinook harvests for specific stream by stream spawn escapement or allocation goals as it does with coho, there is a corollary in the Klamath River Management Zone, where harvest constraints on ocean chinook fishing have cost the state significantly in terms of fish lost to harvest.

Besides these direct losses, the constraints can also create waste. In the case of coho, those hatchery fish which are not taken by the ocean fishery, become abundance which then provides excess of fish to the hatcheries which cannot be used. Surplus fish therefore do not spawn, and are sold at a greatly reduced quality for human consumption or worse, for animal food or other uses which do not provide equal benefit to the people of the State of Oregon. Overabundances of spawning chinook salmon have also been seen in the Klamath River drainage and other Oregon coastal streams where chinooks have overcrowded streams and cannot successfully spawn without destroying the redds of other salmon.

When management strategies include specific stock constraints, the repercussions can also be widespread. Ironically, and also astonishingly, the fewer salmon of a particular constraining stock which are available for harvest in any area the greater becomes the cost to the industry and the state to protect those salmon by constraining ocean harvests. It's a mathmatical puzzlement with a very high price tag. The problem is best visualized with small numbers. If 100 salmon are available for harvest but 10 of them are a critical stock to be protected to the point where only 4 can be caught, then all harvest management gears to those 4 salmon. Of the original 100 fish, 1 of every 10 is a critical stock. Therefore to protect 4 of those, 40 of the fish must be protected, leaving 60 for harvest. The cost then to the fishery is not simply the 4 fish, but 10 times that number. This is the basic concept of critical stock management which is already in place in salmon fishery conservation.

Effects of Proposed T & E Status Listings

It is quite clear that listing of the Idaho chinook stocks and Oregon coho stocks as petitioned by Oregon Trout et al could greatly increase harvest constraints and the resulting geometric progression of economic losses not only to the Oregon troll industry and to the people of the state of Oregon, but also to all ocean salmon fisheries both sport and commercial from central California to Alaska.

In the case of the Idaho chinook, spring runs, being primarily north turning and generally not available to Oregon ocean harvesters, the Oregon implications could be minimal. However, the States of Washington and Alaska and the province of British Columbia would definitely be affected. Listing of the Idaho fall chinook would definitely bring severe harvest constraints to the Oregon ocean fishery. Since Lions Ferry coded wire tags have appeared in the harvest as far south as California, it is conceivable that the full burden of weak stock management ironies could also fall on that fishery.

The listing of the lower Columbia coho stocks would undoubtedly cause devastating constraints. According to industry and ODFW harvest managers, such a listing could make the OCN constraint pale by comparison. In other words, our current losses could be increased to the point of a total loss. Under a scenario which supposed endangered species status for all stocks named in the petitions, it is quite feasible that all ocean fishing for all salmon could be halted from Horse Mountain, California to central Alaska, thereby eliminating the major troll industry of the world from the marketplace. The resulting loss in economic terms is nearly incalculable. A ball park figure would show as annual direct personal income loss of about $125,000,000.00 for Oregon, Washington and California alone. Including British Columbia and Alaska could easily treble that loss. To include secondary repercussions on sport fishing, tourism, ancillary services and replacement of product by foreign suppliers becomes calculator-boggling. At best, massive dislocation of existing jobs would occur in attempts to recoup some of the losses by terminal fishing at hatchery gates for vastly inferior salmon.

Moreover, in addition to zeroing our harvest, thereby eliminating our current contribution to the economy of the State of Oregon, all incentives to rebuild OCN stocks and restore hatchery programs to full production levels would be lost. The Oregon Salmon Commission has submitted a proposal to ODFW to rebuild ocean coho harvests to an annual yield of 1 million fish and chinook to 400,000. If successful, our contribution to the state's economy would approach $60 million annually. Included in that harvest scenario are the current plans of the Northwest Power Planning Council which is now dedicated to "doubling" the Columbia River fish runs by the year 2000, the state's new Restoration and Enhancement project, which has doubled its assessment on commercial landing poundage fees and increased commercial license fees by 650% and wihch is dedicated to and actively involved in rebuilding all aspects of Oregon's salmon production. At jeopardy too, would be continued Federal funding of the Columbia River mitigation hatcheries which would suddenly be deluged with an unmanageable surplus of coho. With the loss of sport and commercial harvests, where is the incentive to continue such programs?

In conclusion, we do not support nor agree with the approach these petitions take for protecting the stocks in question. Rather we support continued effort by all agencies and fisheries to achieve protection and enhancement through existing management regimes. Our dedication and sacrifice is already clearly at its limits and survival of an important aspect of Oregon's economy and heritage is in jeopardy if these petitions are successful.

TESTIMONY OF JAY L. RASMUSSEN, DIRECTOR, OREGON COASTAL ZONE MANAGEMENT ASSOCIATION, INC.

As director of this thirty-six member association of local coastal governments, I appreciate the invitation to participate in this hearing regarding the Endangered Species Act (ESA) and Oregon's anadromous fish—particularly salmon.

The debate over old growth forests, timber harvesting and the potential listing

of the spotted owl under the Endangered Species Act, serves to illustrate the potential social, political and economic affects that can be rendered from highly focussed biological determinations.

After considering the anticipated listing of the spotted owl under the Endangered Species Act and the recent petition to list several stocks of Columbia River salmon, the Oregon Coastal Zone Management Association, Inc. (OCZMA), at its June 15 meeting in Astoria, unanimously expressed a paramount concern over the dislocations of our communities and of our natural resource planning and management programs from the application of specific mandates such as the Endangered Species Act. Oregon's coastal communities—dependent as they are on timber, fish, and other natural resources—are particularly vulnerable.

In this regard, I would like to talk about the possible effects of the application of the ESA to anadromous fish and about ways of working with the Act that might assist both the fate of threatened or endangered species and our human environment.

Effects of the Act

Management Dislocations: We are of the opinion that the administration of and confidence in forest or fish management plans cannot be maintained if specific management forms such as the Endangered Species Act, however valid, are selectively, unexpectedly and unilaterally applied outside those larger management plans. Nor can the productivity of our timber, wildlife and fisheries be efficiently utilized under this eclectic management approach.

Oregon has witnessed decades of active planning for land uses, for forest and fishery resources and, most recently, for ocean resources. This concerted effort by Federal, State and local governments was and is heavily predicated on the assumption that natural resource planning ensures wise use and protection of those resources and offers predictability and consistency in our interactions with those resources. The argument should not be about the validity of protecting our earth's species from human-induced extinction, but about a system that allows so much investment in human resources to be so dislocated by selective applications of single management concerns.

One example is the petition by Oregon Trout. The Act is petition-driven, not systematic. Its approach seems less oriented to the merits of all living species under its jurisdiction than to spot species identified to the respective agencies. Not included are other anadromous species that Oregon Trout has reported as endangered, threatened or of special concern.[1] This does not appear to be in the best interests of species or the overall management and uses of our natural resources. Until such time that the Act is broadly and wisely implemented, it would appear that neither species nor our uses of natural resources are very secure.

Economic Implications: Anadromous species of fish make up only a portion of the state's recreational and commercial fisheries. For the Oregon coast, commercial fishing alone constitutes approximately 19% of the total earned personal income.[2] I will leave to others more qualified a discussion of these potential impacts.

While our immediate focus is on Columbia River salmon, application of the Act does portend serious problems for many sport and commercial fisheries—not just salmon—on the lower Columbia River, on the Oregon and adjacent state's coasts, and on the high seas.

Ramification for many fisheries are easy to contemplate when noted that, with an listed species, it is unlawful under Section 9 of the Act to: import into or export from the U.S.; take within the U.S. or the territorial sea of the U.S.; take upon the high seas; possess, sell, deliver, carry, transport, or ship by any means whatsoever; deliver, receive, carry transport, or ship in interstate or foreign commerce by any means whatsoever and in the course of a commercial activity; sell or offer for sale in interstate or foreign commerce; and, violate any pertaining regulation.

Working With the Act

Fishery Management Plans: As early as 1980, a report commissioned by the Marine Mammal Commission examined several fishery management plans (FMPs) developed under the Fishery Conservation and Management Act. Although none of the reviewed plans involved the Pacific Fishery Management Council or salmon, it noted that such plans tend to be single species rather than ecosystem-oriented management concepts and may not effectively incorporate potential impacts on non-targeted species in determining optimum fishery yields.[3]

While that study may be dated and perhaps not entirely germane to the activities of the Pacific Fishery Management Council, the process that culminates in adopted and amended plans for species such as salmon would appear to be the place where the larger views and interests are served as well as those mandated by the ESA.

It may be advisable to do more work on identifying requirements and procedures for ensuring that fishery management plans (FMPs) are consistent with the ESA rather than depending on the petitioning approach and its dislocations.

Oregon's Wild Fish Approach: Over the past year, this organization worked closely with the Oregon Department of Fish and Wildlife and with Oregon Trout to establish effective rules on wild fish management and natural production. Adopted in January of this year, the rules attempt to strike a harmonious balance between preservation and use, between ecology and economy. The rules meet Oregon statutory language which calls for "optimum populations and production of fish in waters of the state while maximizing the benefits to Oregon citizens." In fact, maintaining optimum levels and benefits prevents the serious depletion of a fish species or the productive capacity of natural production and also helps ensure continued support for the wide variety of restoration and enhancement programs throughout the state.

One extremely important aspect of the rules was the understanding of the need for an early diagnosis of those critical populations [4] within the myriad of distinct fish species that exist in this state. In implementing the rules, the Oregon Department of Fish and Wildlife is obligated to follow a prescribed and detailed course of action.

The rules also address a major need in fisheries management—a clearly articulated process on what corrective mechanisms the Department shall pursue in support of its wild fish management goals. The rules provide direction, public accountability, and an accent on recognizing that overly restrictive harvest management—as the perennial solution of wild fish and natural production problems—does not meet the public mandate for optimum benefits. The rules also establish some priority and accountability to the state's effort on habitat and other operating principles that will be routinely reviewed in a public forum.

Since the State of Oregon and other Pacific Northwest States have the jurisdiction and the ability to protect wild fish—including threatened and endangered species—it may be useful to explore some type of cooperative effort between federal government and the states on how to manage these problems.

Conservation Hatcheries: An intriguing concept of augmenting natural populations of salmon with hatchery fish without degrading the reproductive capacity of natural populations was put forward to the Northwest Power Planning Council by Bill Bakke, Executive Director of Oregon Trout.

In short, conservation hatcheries are operated in such a way that they are integrated into the natural system they are intended to augment. "In this way, the native stock being supplemented retains its survival capacity in the wild and genetic losses are minimized. The widespread use of conservation hatchery practices could greatly reduce the negative impacts of hatchery production on native stocks in the Columbia River Basin." [5]

While certainly not the only answer to declining populations, the concept of conservation hatcheries implies some ability to match ecology with economy. Healthy populations help ensure not only some insurance from extinction but also the potential for using these fish for important recreational and commercial fishing industries.

Along with the continuous discussion of reprogramming and funding issues of federal and state hatcheries on the Columbia River, the merit this concept offers also deserves consideration.

Other Salmon Production Potential: South turning stocks of coho salmon released by the Columbia River system have, for years, been the bread-and-butter stock for our coastal sport salmon fishery and often for the commercial fishery as well.

If, under the ESA approach, management of salmon stocks in the middle and upper Columbia system does seriously erode the productive capacity and harvet potential of certain stocks of salmon, the Oregon Aqua-Foods' hatchery facility in Springfield

---

[1] According to the Spring 1990 issue of the Riverkeeper (Oregon Trout publication), "The American Fisheries Society has identified 56 threatened resident and anadromous fishes in Oregon." Further, the publication notes that "this report identifies 31 threatened populations of native salmon and steelhead in Oregon. If a population has made the list they are of great concern so for the purposes of this report populations that are classified as endangered, threatened and special concern have been lumped together as threatened." See Attachment A for listing.

[5] Letter, Bill Bakke to the Northwest Power Planning Council, July 19, 1988, citing an unpublished paper by John D. McIntyre, John M. Emlen, and Reginald Reisenbichler entitled "Management of Genetic Stocks of Pacific Salmon."

offers some opportunity for maintaining or enhancing our river and ocean fisheries.

Coupled with rearing and release facilities on the lower Columbia and Young's Bay, opportunities that were explored between 1985 and 1988 for state or cooperative operation of the private hatchery facilities might be revived. Young's Bay provides a rare opportunity to enhance production and harvest with few of the restraints imposed elsewhere because of genetics, mixed stock fishery problems, habitat, treaty obligations and other factors.

Federal funding assistance, however, may be required for the initial purchase of the Oregon Aqua Foods facility. Congressional interest in the beneficial uses of the Oregon Aqua-Foods facility would undoubtedly rekindle the considerable coastal enthusiasm for such a project.

Examining Equity of Applications: In fairness to our natural resources and to our planning processes, some assessment of the adequacy of both of these interrelated regimes ought to be undertaken. For those in the Pacific Northwest who believe that the act is being selectively applied, perhaps for other agendas, an assessment may shed light on whether or not this feeling is correct.[6] For species or populations not so well enshrined as salmon or owls, such an assessment may prove to be forsightful.

Specifically, the review might ascertain the consistency of ESA provisions and applications on several levels including geography, species selection, the petition process, "recovery plans," federal funding, the allocation of funds, status of the "cooperative endangered species fund," the functioning of the Endangered Species Committee, the "exemption" process, and, the permitted exceptions policy and its potential use in fishery management (rather than marine mammal management).

The General Accounting Office (GAO) might be one possibility for such an examination of the implementation of the Act. This would remove the influence of the respective mandated agencies—the Departments of the Agriculture, Commerce, and Interior—in presiding over an evaluation of their own performance.

While it may not solve all of our dilemmas, a review of the consistency of application and the implementation of the Act may shed additional light on this most difficult issue. Extra light surely would be beneficial.

Implementing Provisions of the Act: Assuming that the exemption process and the hardship exceptions, are at best, short term and severely limited relief mechanisms under the ESA, the act does contain two provisions that may provide some realistic implementation. They are the incidental taking permit process and the cooperative agreements with States to assist in the development of programs for the conservation of endangered and threatened species.

Section 10 of the Act provides for an exception permitting process for "taking otherwise prohibited by section 9(a)(1)(B) if such taking is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity." The applicant for a permit, perhaps a state agency, must submit a conservation plan; however, this may allow for some redress to what otherwise might involve a major shutdown of many existing fisheries.

Federal and state agencies should pursue the requirements and opportunities of permitted incidental taking with at least one Columbia River salmon stock under petition before ESA determinations are made.

Though it may be only laudable statutory language and consist of either little federal funding or a significant financial burden to the states, provisions of the Act do provide for the use of cooperative agreements with states "to assist in development of programs for the conservation of endangered and threatened species. . . ."

With the existing ability of the State of Oregon and other Pacific Northwest States to protect threatened and endangered species, perhaps some form of agreement could be forthcoming to allow for state, or multiple-states assumption of the Act. We recognize that similar assumption under the Marine Mammal Protection Act have not been productive; however, the involvement, knowledge and regulatory capabilities of states regarding anadromous fish already are substantial.

Finally, the potential use of interstate compacts created to handle larger and more difficult issues such as ESA should be investigated. Perhaps positive federal overtures to the affected states would help induce an examination of this prospect.

Summary

We have expressed a concern over the dislocations of our communities—dependent as they are on timber, fish, and other natural resources. While anadromous species of fish make up only a portion of the state's recreational and commercial fisheries and while our immediate focus is on Columbia River salmon, application of the Act does portend serious problems for many of the state's sport and commercial fisheries and other natural resource uses—the backbone of the coastal economy of timber and forest products, commercial fishing, agriculture, and tourism including sport fishing.

We continue to express concerns over the dislocation of our natural resource planning and management programs from the application of the Endangered Species Act. The possible effects of the application of the ESA to anadromous fish include threats to the administration of and confidence in forest or fish management plans if specific management forms such as the Endangered Species Act, are applied in a scatter-shot fashion. The productivity of our timber, wildlife and fisheries cannot be efficiently utilized under this management system.

Working with the Act to assist both the fate of threatened or endangered species and our human environment, we believe the following are concepts worthy of pursuit by state and federal officials:

Identify requirements and procedures for ensuring fishery management plans (FMPs) are consistent with the ESA as an alternative to depending on the petitioning approach and its dislocations.

Explore cooperative efforts between the federal government, the State of Oregon and other Pacific Northwest States on the jurisdiction and protection of wild fish—including threatened and endangered species.

Examine the merits of conservation hatcheries during discussion of reprogramming and funding issues of federal and state hatcheries on the Columbia River.

Solicit Congressional interest in the beneficial uses of the Oregon Aqua-Foods facility for production supplementation to the lower Columbia River and the Oregon coast.

Request a review of the consistency (including reviews by geography and species) of application and implementation of the Act.

Investigate, before ESA determinations are made, the requirements and opportunities of permitted incidental taking of anadromous species of fish.

Examine concept of agreements that would allow for state, or multiple-states assumption of the Act.

Consider interstate compacts as a mechanism to handle aspects of certain issues such as ESA.

Senator Packwood, we appreciate this opportunity to discuss our preliminary ideas on this critical subject.

Attachment A

According to the Spring 1990 issue of the Riverkeeper (Oregon Trout publication), "The American Fisheries Society has identified 56 threatened resident and anadromous fishes in Oregon."

Further, the publication notes that this report identifies 31 threatened populations of native salmon and steelhead in Oregon. If a population has made the list they are of great concern so for the purposes of this report populations that are classified as endangered, threatened and special concern have been lumped together as threatened. The anadromous fish classified as threatened in Oregon are:

Roger River tributary fall chinook.
Euchre Cr. fall chinook.
Coquille R. spring chinook.
South Umpqua R. spring chinook.
South coast coho (include the Rogue R.).
Chum (south of Netarts Bay).
Winchuck R. fall chinook.
Pistol R. fall chinook.
Hunter Cr. fall chinook.
Yachats R. fall chinook.
Alsea R. spring chinook.
Siletz R. spring and summer chinook.
Nehalem R. summer chinook.
North and central coast coho.
Coos R. fall chinook.
Yaquina R. fall chinook.
Sandy R. fall chinook.
Sandy R. coho.
Hood R. fall chinook.
Hood R. spring chinook.
Hood R. coho.
Hood R. winter steelhead.
Lower Columbia R. coho (tribs below below Willamette).
Grand Ronde R. coho (thought to be extinct).

[6] For a brief listing of Oregon's forest species other than the spotted owl, see Attachment B which contains the article "The Spotted Owl is Not Alone in the Forest," by David B. Marshall in the June 24, 1990 issue of The Sunday Oregonian. Marshall states that "the spotted owl is just one example of the conflict between existing timber-harvesting practices and the continued viability of wildlife species dependent on old trees."Other species noted are the three-toed woodpecker and the great gray owl of lodgepole pine forests, the marbled murrelet of the Coast Range and Klamath Mountains, the fisher and marten (of the weasel family). Marshall continues: "The species discussed above represent some of the more obvious examples of Oregon forest species that may not make it through the next century without more attention. There are more, including bats and amphibians. . . . The single-species-management approach to protecting wildlife can work for species having very limited ranges—such as desert fishes that occur in springs—but is charged with problems for species that range over a wide area. Unfortunately, our wildlife laws, including the Endangered Species Act, are based on protection of individual species rather than ecosystems."

Clackamas R. late run coho.

Attachment B—Oregon's Administrative Rules and Wild Fish

OAR 635-07-529 (1) Within one year of the effective date of these rules, the Department shall develop, for approval by the Commission, a provisional statewide list of populations of wild fish. This list shall be made available to the public for review prior to Commission consideration and approval.

(2) It is the intent of the Commission that, to the extent any basin and/or species plan currently adopted plan shall now be governed by these rules. As existing plans are reviewed and new plans are adopted, the Commission intends that they be explicitly brought into conformity with these rules.

(3) Basin plans presented to the Commission after the adoption of the Wild Fish Management Rules shall present at least one alternative strategy per wild population that is consistent with wild fish management. For those basins with existing hatchery programs, two alternatives consistent with wild fish management shall be presented; one without hatchery supplementation and one with hatchery supplementation.

(4) The Department shall not stock hatchery fish into wild fish populations not currently being stocked, without authorization in a basin plan approved by the Commission or an exemption of the wild population in accordance with OAR 635-07-528.

(5) Progress toward achieving consistency with these Wild Fish Management Rules shall be reported to the Commission during the first six months of each biennium, prior to preparation of the next biennial budget. Beginning in 1991, each biennial report shall include, by species, the following information:

(a) Documentation of the management history of each wild population based on best available information. This shall include the current status of the population and a history of habitat change, harvest, and hatchery introductions;

(b) A list of populations of wild fish not currently managed consistent with the Wild Fish Management Rules;

(c) Identification and description of the problems preventing the Department from achieving consistency with the Wild Fish Management Rules for each of these populations;

(d) A description of the short- and long-term strategies and associated funding necessary to solve these problems; and

(e) A list of Commission actions, as appropriate, necessary to implement strategies identified in (d).

(6) The Department shall develop a gene conservation policy and a program to monitor the genetic status of representative populations. f. & ef. 1-24-90

Attachment C

[From the Sunday Oregonian, June 24, 1990]

THE SPOTTED OWL IS NOT ALONE IN THE FOREST

(By David B. Marshall)

The spotted owl is just one example of the conflict between existing timber-harvesting practices and the continued viability of wildlife species dependent on old trees. Implementation of the Jack Ward Thomas interagency committee report on the spotted owl will not solve other forest wildlife problems.

Other species that could be equally in trouble run the gamut of timber types in the Northwest. The ranges or habitats of many of them do not overlap the spotted owl, and in other cases partially overlap.

The wood products industry, Forest Service and Bureau of Land Management hierarchies are headed for a repeat of the spotted owl episode if they do not properly plan for other declining wildlife species now. The task force report demonstrated how inadequate existing forest plans can be for wildlife.

The flammulated owl and white-headed woodpecker inhabit pondersoa pine forest types east of the Cascades. While they are not old-growth-dependent, they require an abundance of large snags exceeding 100 years of age for nesting cavities.

White-headed woodpeckers forage on the largest old ponderosa pines where deep bark crevices harbor beetles and pine seed crops are highest. Sixty- or 80-year cutting cycles will not handle future needs of those species. Saving large snags today, assuming they are not illegally cut by woodcutters, will not take care of their future needs.

In Oregon, the three-toed woodpecker inhabits forests containing lodgepole pine. The three-toed woodpecker is a Forest Service indicator species for lodgepole pine. However, it remains to be determined if the service's plans are realistic with respect to maintaining viable populations of this species, as required by the National Forest Management Act. Research on the bird has been limited, but that which has been done suggests each pair of these birds needs nearly 600 acres of mature and old-growth lodgepole pine that is exempt from commercial or salvage harvest.

In Central Oregon, the three-toed woodpeckers excavate nest cavities in large old lodgepole pines having heartrot, and feed on wood-boring insects in dying or recently dead trees. They roost in cavities in very soft snags located in dense unlogged stands of lodgepole pine or mixed conifer with lodgepole. Conversion of existing lodgepole pine stands of young trees that are relatively free of heartrot and bark beetles, as now being practiced, is not conductive to maintaining this species.

Another resident of lodgepole pine is the relatively rare great gray owl, America's largest owl. In Central Oregon, this owl establishes territories in mature or old-growth stands of lodgepole pine near meadows. In Northeast Oregon, it associates with other tree species as well, but the majority of nest sites are in so-called overmature forest stands. Fortunately, the bird will feed in partially logged stands.

In forests of the Coast Range and Klamath Mountains is the marbled murrelet, a small seabird that ranges at least 35 miles inland to nest in mature and old-growth trees that greatly exceed the age of trees planned for future "managed forests." While this species is being studied, cutting of mature forest stands known to be inhabited by murrelets continues. Like the spotted owl, the species awaits a decision by the Fish and Wildlife Service for protection under the Endangered Species Act.

Almost gone in Washington and Oregon is the fisher, a 6- to 12-pound member of the weasel family. This solitary furbearer, which does not associate with fish, has been largely ignored in Oregon forest plans, probably because of its rarity.

While not an old-growth dependent, the fisher requires continuous blocks of heavy cover near water that contain an abundance of large standing and downed snags having cavities for denning and an abundant food supply in the form of snowshoe hares, porcupines and other small mammals. The home range size of the highly territorial male fisher generally exceeds that of Oregon spotted owl pairs and can be up to 10 or 15 square miles.

Like the spotted owl, the Forest Service correctly considers the marten an indicator species for old-growth. During the coldest days of winter, this slim, lean, kitten-sized edition of the fisher maintains body heat below the snow surface in the warmth of cavities under or inside large, old decaying logs and stumps. Here it associates with Douglas or red squirrel middens and travels snow tunnels made by squirrels and other small mammals upon which it feeds. Where old-growth habitat destruction has been highest in Oregon, specifically the Coast Range, the marten is virtually gone.

While no marten studies have taken place in Oregon, enough radios have been attached to martens in other states and Canadian provinces to tell us that in most areas a male marten ranges over an area exceeding 1,000 acres—this varies with food availability and can be much greater. However, the Forest Service planning process calls for preservation of only 180-acre habitat units for martens. Oregon Department of Fish and Wildlife director Randy Fisher formally expressed his department's concern about inadequate provisions for marten habitat in a letter to the regional forester early last year.

Predator territories cannot be compressed. The delicate balance between food availability and energy required to capture prey dictates territory size and population numbers. These animals will not survive over time by giving them only a half or a fourth of what they require, nor will individuals or groups of these species survive over time in habitat islands if such islands are not interconnected. Existing wilderness areas are just as inadequate for protecting these species as they are for the spotted owl.

The species discussed above represent some of the more obvious examples of Oregon forest species that may not make it through the next century without more attention. There are more, including bats and amphibians. Our knowledge of the biology and habitat requirements of many of these resembles what we knew of the spotted owl in the early 1970s.

Most are not as specifically oriented to old-growth as the spotted owl and could survive with different timber harvesting practices than generally employed in the Northwest. However, clear-cutting—the harvest of many so-called overmature trees and piling and burning of woody debris with its attendant soil disturbances following timber harvesting—is not compatible with their survival.

The single-species-management approach to protecting wildlife can work for species having very limited ranges—such as desert fishes that occur in springs—but is charged with problems for species that range over a wide area. Unfortunately, our wildlife laws, including the Endangered Species Act, are based on protection of individual species rather than ecosystems.

Preservation of the forest and all its components rather than free-farm and single-species wildlife management approaches is needed if we are to realistically preserve wildlife such as the above over time. Those of us who have traveled, played and worked in Oregon's national forest before World War II know how little habitat remains for species like them.

TESTIMONY OF THE HONORABLE PAUL HANNEMAN, OREGON HOUSE OF REPRESENTATIVES

I would like to invite your consideration of an opportunity that offers at best great enhancement of our salmon producing and harvesting capabilities and at worst mitigation for losses of Columbia River production threatened by actions such as the Oregon Trout petition.

I am speaking about the creative and productive uses of the hatchery facility of Oregon Aqua-Foods in Springfield for release of salmon into the lower Columbia River at Youngs Bay and other release points.

In 1985, after more than a decade of discussion about private salmon ranching, I concluded that:

1. The Oregon Aqua-Foods facilities at Springfield and Yaquina Bay must remain in operation as part of this state's salmon production program along with support for natural production.

2. The facilities should remain exclusively for coastal and lower Columbia river fisheries production and harvest.

3. Stocks of salmon that significantly contribute to Oregon's offshore fisheries should be produced.

4. The facilities must be operated for maximum production now and in future years when propagation abilities improve.

5. Stocks of salmon produced should be compatible with native stocks (or with a minimum of possible depletion effect) as well as enhance, rather than reduce, ocean harvest opportunities.

6. Economic benefits should be geographically broadly based as well as among user and producer groups.

7. Any final operational system should significantly reduce or eliminate coastal conflicts and acrimony between producer and harvesters and among harvester types.

An abbreviated production plan was prepared by the Oregon Department of Fish and Wildlife in late 1985 (copy attached) and I joined with Governor Atiyeh to suggest the State of Oregon acquire an option to purchase those facilities in Springfield and on Yaquina Bay. A proposal, acceptable to Weyerhaeuser as the owner of the facilities, was made by the Executive Department before the Joint Ways and Means Committee in March of 1986. Because of some unresolved funding issues, the Department was asked to return again. Regretfully, Weyerhaeuser, in need of quick action, sought other possibilities, one of which was Oregon Salmon Development Company which acquired the facilities for salmon ranching for profit later that year.

Increasingly, however, the activities and success of the non-profit salmon aquaculture programs in Alaska offered some ideas on the use of these private-for-profit facilities. In 1987 a bill to create a private cooperative corporation was passed by the Oregon Legislature but vetoed by Governor Goldschmidt.

Once again we are faced with the demise of the for-profit operation. On the coast and on the lower Columbia River, we are also faced with losses of production and harvest of Columbia River-produced salmon. The Endangered Species Act petition on lower Columbia River coho imperils our production and our harvest.

Just several months ago, a meeting of selected agency, sport and commercial representatives met to discuss our coho crisis (listing of participants attached). One leading suggestion was to revive the Oregon Aqua-Foods potential both for enhancement and supplementation but also as a way to ensure basic production and harvest should the wild fish or endangered species implications cause major disruptions.

I am very supportive of some type of plan that would work toward the purchase of the Oregon Aqua-Foods facilities which would enhance salmon production and harvesting capabilities not only for the Oregon Coast, but also the Columiba River area.

TESTIMONY OF BOB EATON, EXECUTIVE DIRECTOR, SALMON FOR ALL

Introduction

Good morning Senator Packwood. My name is Bob Eaton, I am Executive Director of Salmon For All, Inc. located in Astoria, Oregon. Salmon For All is a non-profit corporation supported by and representing commercial fishermen and fish processors on the Columbia River from Bonneville Dam to the mouth. Our task is to represent their interests in both education and legislation in Oregon, Washington and in any arena which affects the commercial fishing on the Columbia River. We have approximately 640 fishermen members, 40 processor members, and 120 associate members. The organization has been in existence for over 30 years, but in the last couple of years has reorganized and taken on a new proactive stance in it's approach to fisheries related issues. We are involved with the Columbia River's water quality issues; are involved with both Oregon and Washington in water allocation discussions; have members who serve on a variety of state committees and task forces related to fisheries enhancement, restoration and marketing. We have also produced and supported a number of videos which explain the importance of the commercial fishery both on the Columbia River and for the entire state.

Background

Salmon For All is not just the name of our organization, it is our philosophy. Over the years the commercial industry has been involved with issues that relate to better returns of salmon. Maintaining a supportive aquatic environment on the river has been very important. We also supported efforts in Oregon and Washington during the last legislative session that established higher license fees earmarked for fish enhancement and restoration projects. We have developed working relationships with others, including sportfishing groups, to find common ground on issues of mutual concern. The thrust of the commercial industry has been to support, whenever biological and environmental factors dictated it, the additional management needed to protect a stock of concern. In some cases, harvest of stocks has been curtailed completely. In other instances, guidelines for limited harvest of certain stocks have been identified and put into practice. The commercial industry has agreed to other management plans which limit harvest at certain times and places on the river, or call for mesh size restrictions to provide selective harvest. All this and more has been done and agreed to by the commercial industry as a way of protecting identified as stocks of concern. We want runs to grow and prosper.

Salmon For All was not asked to support the petitions being filed for Threatened & Endangered Species, nor would we have. We feel the filing is dramatic and unnecessary at this time. We understand the frustrations of those who have filed the petitions, and we understand the altruism that has gone into the filing of those petitions. We feel that work put into developing new coalitions to bring about management changes would have been more positive, and with success would have made filing petitions unnecessary. We do not oppose the petitions. They are filed and will have a life of their own now as they go through the process that NMFS must take to reach the conclusions that have to be made. To oppose the petitions would be negative and time wasting. The positive approach is to immediately put together a management plan that will meet the needs of the resource. I'll come back to that in a moment.

Concerns

The commercial industry has a number of concerns about Threatened & Endangered status. The first is that this becomes a public process, open to a variety of agendas, many of which may have nothing to do with restoration of the resource. There are people in both Oregon and Washington who have suggested an end to all commercial salmon fishing. Quite frankly we are concerned that this provides yet another opportunity for those people to attach their agenda onto something that should be pro-resource, not anti-commercial fishing. Biological data and environmental fact are the key ingredients upon which decisions should be based.

A second concern has to do with developing a management plan that does not unnecessarily focus on harvest. It seems clear that the problems faced by these runs are clearly, and almost exclusively, ones of habitat and problems related to dam smolt mortality and water flow. I have seen nothing that indicates that harvest by either sport or commercial fishermen has contributed in any significant way to a T&E status. In fact, for two of the proposed runs, late coho and summer chinook, there is no commercial harvest. The fall chinook has always been commercially harvested and has shown growth in numbers over the last six or so years, especially in the up-river bright populations. The spring chinook population has also increased, protected by a harvest limitation plan now in effect. The early run coho is one that little is known about. I understand that the state of Washington is doing a study right now to determine what is a wild lower river coho. With the state's determination years ago to produce hatchery raised coho, there is a significant question as to what constitutes a wild and natural coho. So it would be our desire to have any management plan consider these other factors before making unnecessary harvest changes.

Another concern has to do with predation. The more we learn about the predators on the river, the more we learn how impacted are the anadramous runs. The States of Oregon and Washington have initiated plans to reduce the squawfish in the reservoirs behind the dams. Squawfish are voracious and may contribute to a factor of four times their body weight daily to the destruction of salmon and stealhead smolts migrating down river. A bounty has been placed on squawfish and there have been fishing derbies held to help solve the problem. More must be done. At the mouth of the river, NMFS tells us that in 1980, there were an estimated 10,000 sea lions and seals working the Columbia River estuary. Their 1990 estimate is 20,000 seals and sea lions, a 100% increase in ten years. It is possible that the success of the National Marine Mammal Protection Act may be contributing significantly to the decline of some stocks in the

Columbia River. In fact, it may be time to focus on our national policies related to what's happening with the marine environment. The Magnuson Act aims to enhance the nations fisheries; the Marine Mammal Act seeks to protect marine mammals; and the third Act mandates strict protection for species which are declared endangered or threatened. In viewing these comprehensively, it may mean that some of these will need to change to be more compatible, and to provide more continuity in our national policy and philosophy.

A last concern has to do with the livelihood and viability of our industry. Gillnet fishing on the Columbia River is older than the State of Oregon. There are families who have fished for four and five generations. Each gillnetter is an independent businessman who provides a service for the public by supplying fish to the consumer who can not or does not want to fish. As a business person, these fishermen must understand the biological/environmental issues that shape the ability to earn a living, invest capital in his or her business, take risks, and work long hours when there are fish to harvest. It's all part of Oregon's pioneer spirit and the tenacity of a small business person. While no job or occupation is guaranteed, there is a realization that through T&E status this industry may be unnecessarily threatened.

Action

There is no reason to wait for Threatened & Endangered status to be determined. We call on you Senator and others to name and convene within thirty days a special T&E task force whose task woud be to propose and develop a management plan within ninety days. The Task Force would be tri-state in nature, and inter-agency including federal, tribal, and private interests. These same agencies will be responsible for solving the problem after T&E may be initiated—let's get them started right now while the petitions are considered. Focusing on the resource and not the politics should insure that the best of plans can be quickly developed and implemented. Much funding is already in place, such as those for placing dam screens, and need only be made a priority in the management scheme.

Salmon For All will be a positive, responsible player in development of a management plan that is responsive to the needs of the resources as defined by biological and environmental factors.

Thank you for the opportunity to speak this morning. I will attempt to answer any questions you may have.

TESTIMONY OF LARRY SIX, EXECUTIVE DIRECTOR, PACIFIC FISHERY MANAGEMENT COUNCIL

The Pacific Fishery Management Council (Council) is very concerned over the depressed status of several naturally produced salmon stocks which occur in Pacific Ocean fisheries under Council jurisdiction. At the present time, the Sacramento River winter-run chinook stock is listed as "threatened" under the Federal Endangered Species Act (ESA). In addition, five salmon stocks of the Columbia River Basin are being reviewed for possible listing. Formal petitions have been filed seeking status review of Snake River sockeye salmon, Snake River spring, summer and fall chinook salmon, and late spawning lower Columbia River coho salmon.

We are encouraged by the interest in these hearings to focus serious attention on the hazards which face the various salmon stocks and the implications which the ESA review may hold for fishing and other affected industries. The Council-managed ocean fisheries harvest from a mix of salmon stocks and are heavily dependent on a complimentary balance of natural and hatchery production to allow for optimal harvest. The Council has acted to constrain ocean fisheries to maintain long-term production of viable, naturally producing salmon stocks which play an important role in the long-term health and abundance of our fisheries and the wealth of our Nation. We recognize the critical need to achieve habitat restoration to make our efforts effective and are anxious to avoid crisis type management actions which are often ineffective, poorly focused and may result in very negative social and economic impacts on the ocean salmon fisheries and the communities which they support.

Impacts of Ocean Fisheries on Stocks of Concern

The Council was created by the Magnuson Fishery Conservation and Management Act of 1976 and is charged to conserve and manage marine and anadromous fishery resources within the exclusive economic zone (3 to 200 miles) off the coasts of Washington, Oregon and California. The Council manages the ocean salmon fishery under a framework fishery management plan which is implemented through regulations issued by the National Marine Fisheries Service (NMFS) and complimentary regulations adopted by the coastal states.

The Council's salmon plan includes spawning escapement goals for hatchery and naturally produced stocks of chinook, coho, and pink salmon. These goals tend to reflect estimates of maximum sustainable yield for the stocks. Each year the Council sets ocean salmon seasons which are coordinated with inside fisheries (regulated by the states) to achieve the harvest allocation and spawning objectives of its salmon plan. In recent years, ocean salmon fisheries under Council jurisdiction have been constrained to achieve hatchery spawning escapement goals for Spring Creek Hatchery fall chinook and natural spawning escapement goals for Klamath River fall chinook, Oregon coastal natural coho, upper Columbia River spring and summer chinook (includes Snake River stocks), and naturally producing coho stocks of the Queets and Skagit rivers. Because the Council bases its management on the weakest stock with a specified spawning escapement goal, stocks without specified goals are also provided significant protection against overfishing.

Within Council-managed waters, the ocean fishery impacts on the stocks in question are believed to be relatively insignificant. This is a result of the ocean distribution of the stocks and of specific actions by the Council to limit fishery impacts. The fishery north of Cape Falcon, Oregon, which, under Council jurisdiction is the primary area of concern for Columbia River chinook stocks, provides an example of the constraint under which the ocean fishery is managed. To meet allocation and spawning escapement goals, the length of the commercial ocean salmon season north of Cape Falcon has been reduced by about two-thirds in comparison to the seasons prior to 1982. The recreational season in this area has experienced a similar reduction. Halting all ocean fisheries off the coasts of Washington, Oregon and California is not likely to resolve the basic problem of low survival for depressed natural stocks.

The Council does not set any seasons to specifically harvest sockeye salmon, and the incidental catch of sockeye in chinook and coho fisheries is rare. Records of the Washington Department of Fisheries indicate that the harvest of sockeye salmon in Council managed fisheries averages fewer than one-hundred sockeye salmon each year. It is unlikely that any of these fish are of Snake River origin.

Council fisheries in the area believed to be utilized by lower Columbia River coho are restricted by impacts on Washington and Oregon coastal natural coho stocks, even though the hatchery produced fish found in the same area could sustain a much higher harvest rate.

Snake River spring, summer and fall chinook has been harvested at fairly high rates off southeast Alaska and Canada. However, under the Pacific Salmon Commission, which was created by the U.S.-Canada Treaty, the impacts of these fisheries have been limited.

The opening of Council-managed fisheries which impact Snake River spring chinook have been delayed until most of the mature fish are already in the Columbia River. Therefore, the Council's ocean salmon fishery impacts on Snake River spring chinook are very slight and difficult to estimate since fish from this stock appear only irregularly in stock composition samples. Impacts on summer chinook stocks are slightly higher. Of the total chinook catch from Council fisheries north of Cape Falcon (total catch of 94,700 in 1989), generally less than four percent consists of upper Columbia River summer chinook (includes Snake River stock). Impacts on upper river fall chinook may be somewhat higher than for summers, though still below a level which might be believed to limit recovery. These upper river stocks were never major contributors to the ocean fishery off Washington and the timing and restricted season length of present Council fisheries helps maintain very limited impacts.

The Council participated in an informal consultation with NMFS to assure no adverse impacts of the 1990 ocean seasons on Sacramento River winter-run chinook. Restrictive actions included no opening of the commercial fishery off California prior to May 1 (same date as used in recent years) and the closure of a special conservation area for the recreational fishery around the mouth of San Francisco Bay during March, April and November. Formal consultation will be initiated for the 1991 season. At present, the ocean commercial fishery off California is more limited by impacts on Klamath River fall chinook than by those on Sacramento River winter-run chinook.

Assessment of the Problem

All of the Pacific salmon stocks currently listed under the ESA, or petitioned for review, share the common history of suffering significant and continued damage to their spawning, rearing or migratory habitat. Indeed, all stocks of salmon have been impacted from urbanization, pollution, hydroelectric development, water diversion, fishing, and mining and forestry practices. Even our hatchery mitigation programs have often resulted in additional negative impacts on the stocks they were intended to restore. However, the specific stocks currently under review have been especially hard hit by habitat degradation.

The Snake River salmon stocks must surmount eight dams on their migrations to and from the ocean. Hells Canyon Dam blocks Snake River fall chinook from the vast majority of their former spawning

areas. Important segments of the lower Columbia River coho stock must also negotiate dams, are impacted by intensive timber harvest which reduces the productivity of their spawning and rearing areas, and compete with other transplanted coho stocks. Sacramento River winter-run chinook have been hard hit by the Red Bluff Diversion Dam and extensive water diversion from the Sacramento River in general. Only through habitat restoration, resolution of dam passage problems, and, in some instances, carefully planned hatchery mitigation, can we hope to sustain viable populations of these stocks of concern.

While fishing has certainly helped deplete some stocks at various times, our present management regimes are generally capable of providing the controls we need to protect identified stocks of concern. Some hatchery programs may be in need of modification. However, our major problem today is not controlling harvest and production, but restoring habitat and assuring survival of both downstream and upstream migrants around the eight dams on the Snake and Columbia rivers. Providing a "water budget" to facilitate passage of downstream migrants must be an especially high priority. If we are unable or unwilling to restore habitat for natural production and improve passage conditions in the rivers, all the fishery restraints in the world will not rebuild the depressed stocks. Additional fishery restraints would, however, wreak unnecessary havoc on the ocean fishing industry.

Summary

The Council's salmon fishery management plan was developed with participation of the pertinent fishery management entities of the Pacific Northwest and California and the affected public. The plan contains spawning escapement goals for what have been deemed to be the significant hatchery and natural salmon stocks within the Council's jurisdiction. While not every stock is, or could be included in the salmon plan, even those not specifically included are provided a measure of protection by the Council's practice of managing to achieve the spawning escapement goal of the weakest stock. Despite this management, many naturally produced salmon stocks have remained consistently depresesd and some are now cause for special concern under the ESA.

The Council can directly constrain ocean fisheries and seek complimentary measures by the states and Indian tribes to assure that spawning escapements are met. Some work remains to establish appropriate limits in Canadian and Alaskan fisheries through the Pacific Salmon Commission. However, what appears to be primarily frustrating the recovery of depressed stocks is a lack of success in achieving habitat restoration, dam passage and flow programs. These are difficult problems to overcome and it takes many years for habitat to recover, even under the best of programs. However, many of these programs are falling short or have not been initiated because agencies with habitat or water management jurisdiction are not fully implementing the recommendations of the fish agencies and Indian tribes. Without this cooperation, or more direct habitat authority, we believe there is little more the fishery management entities can do to resolve ESA issues in any productive way.

Thank you very much for this opportunity to provide our comments on this important issue.

TESTIMONY OF DOUGLAS DEHART, OREGON DEPARTMENT OF FISH AND WILDLIFE

The Oregon Department of Fish and Wildlife recently completed a review of available information on the historic and present distribution and abundance of spring, summer, and fall chinook salmon and sockeye salmon in the Snake River basin, and coho salmon returning to tributaries of the Columbia River below Bonneville Dam. This review did not attempt to project future trends or status of these fish runs. The principle results of that review are summarized by run type.

Snake River Spring Chinook Salmon

Spring chinook historically spawned in tributaries of the Snake River from the lower river tributaries in Washington to the upper tributaries in Idaho and southeastern Oregon. Spring chinook presently exist in the Tucannon River, Washington, the Grande Ronde and Imnaha rivers in Oregon, the mainstem Snake River below Hells Canyon Dam, and the Clearwater and Salmon rivers in Idaho.

Counts of spring chinook salmon at Ice Harbor Dam have shown decreases since the late 1960s. These counts do not accurately reflect trends in natural production because hatchery fish have comprised an increasing proportion of the run through time. Escapement of spring chinook to the Grande Ronde and Imnaha river subbasins has been on a decline since the early 1970s. In 1989 the escapements to these subbasins were among the lowest on record. Estimated spring chinook spawning escapement in 1989 was 338 fish for the Grande Ronde subbasin and 412 fish for the Imnaha subbasin.

The best existing information to index natural population abundance in Idaho is annual redd counts in the Salmon River subbasin. Natural population levels have declined dramatically from the early 1960s to present. Present natural population levels in the Salmon and Clearwater subbasins are severely depressed. The number of redds observed on spawning ground surveys in the Salmon River subbasin in 1981 was six percent of the peak number observed in 1961. Natural escapement in 1989 was near the lowest observed in history.

Snake River Summer Chinook Salmon

Summer chinook salmon historically existed in numerous tributaries of the Snake River in Idaho and Oregon. In Oregon, chinook salmon with summer race characteristics exist only in the Imnaha River. These fish have been called spring chinook for many years and are discussed in the spring chinook section. Summer chinook populations exist today in the Salmon River and possibly the Clearwater River subbasins of Idaho and have been eliminated from all other subbasins in the Snake River.

Counts of summer chinook at Ice Harbor Dam have shown decreases since the late 1960s. Salmon River subbasin redd counts (five year averages) since 1959 have also decreased. In 1989 only 501 summer chinook redds were counted in the subbasin. Annual escapement to the subbasin averaged 20,000 summer chinook salmon between 1962 and 1970. The summer chinook escapement over Lower Granite Dam was 4,213 fish in 1989, compared to the recent peak of 30,917 observed in 1969.

Snake River Fall Chinook Salmon

Prior to construction of dams on the Snake River, fall chinook spawned in the mainstem from the confluence with the Columbia River to Shoshone Falls and in the major tributaries such as the Tucannon, Grande Ronde, Imnaha, and Clearwater rivers. The present spawning distribution in the mainstem is limited to 102 miles in the free flowing section between Lewiston and Hells Canyon Dam. In addition, a very small number of fish spawn in the Tucannon, Clearwater, Grande Ronde, and Imnaha rivers.

There are no data sources available to assess historic abundance. The first counts of fall chinook were provided when Brownlee Dam was under construction in 1957, which was well after a significant portion of the habitat has been blocked by Swan Falls Dam. Annual counts began at Ice Harbor Dam in 1962 and the peak count occurred in 1962 at 27,700. Escapement past Ice Harbor Dam was stable through the 1960s and then declined steadily through the early 1980s. There has been a moderate increase in adult escapement for the 1985-1988 years; however, this increase is attributable primarily to hatchery returns.

Counts at lower Granite Dam provide a better index for natural escapement than counts at Ice Harbor Dam because most natural production occurs above Lower Granite. Escapement past Lower Granite has been very low since counting began in 1975. The adult escapement for the 1983-1989 run years was below 1,000.

Snake River Sockeye Salmon

Historic accounts describe runs of sockeye salmon of up to 3 million fish returning to the Columbia River basin. The surface area of nursery lakes available today is only four percent of that before construction of Columbia and Snake River dams. Of the eight primary lake-riverine systems in the basin that contributed a majority of fish to sockeye salmon runs in the early 1900s, only three populations remain. Adult sockeye salmon presently spawn in the Okanogan and Wenatchee river systems in the upper Columbia River, Washington, and Salmon River system, Idaho.

No historical data are available for estimating the number of sockeye salmon returning to the Snake River prior to construction of Ice Harbor Dam. The number of adults returning to the Wallowa Lake area is presumed to have been very large, as evidenced by the presence of canneries in the 1890s. Historic accounts of the lakes at the headwaters of the Salmon River before 1900 report the area as important spawning grounds for sockeye salmon. Lakes and streams in the Stanley Lake basin were described as being "teeming with redfish". Escapement of sockeye salmon to the Snake River has declined dramatically in recent years. Yearly counts at Ice Harbor Dam have dropped from 1276 in 1964 to 4 in 1989. Fewer than 70 fish have been observed each year in the past five years.

Lower Columbia River Coho Salmon

Coho salmon formerly spawned upstream to the Spokane River in the Columbia River and to the Grande Ronde River in the Snake River, but were principally found in tributaries of the lower Columbia River below Bonneville Dam. Wild coho salmon above Bonneville Dam have essentially disappeared and the few remaining runs exist in tributaries below Bonneville Dam at the present time.

Naturally produced coho salmon currently persist in accessible tributaries of the lower Columbia River within their historic range of distribution. It is unknown if they are genetically different from existing hatchery

39-059 O-91-26 (Pt. 16)

coho, however, for the purposes of this review, are considered wild fish.

Annual spawning fish survey counts have been conducted in lower Columbia River tributaries since 1949 to index the abundance of spawning coho salmon in Oregon. Between 1949 and 1968, there was no discernible upward or downward trend in escapement, although considerable annual fluctuations occurred. From 1969 through 1977, there was a significant collapse in the population. During this nine-year period, the run declined at an average annual rate of 32.1 percent per year and has remained at very low levels since that time.

The escapement of wild adult coho salmon above North Fork Dam on the Clackamas River has been counted since 1958. The number of wild coho salmon returning to North Fork Dam has remained fairly stable at about 1200 adults and has not shown the same decline as populations in tributaries further downstream.

The complete report of this review is available from the Oregon Department of Fish and Wildlife upon request.

TESTIMONY OF JIM HARRIS, COLUMBIA RIVER PROCESSORS

Good morning Senator Packwood. My name is Jim Harris and it is a pleasure for me to be able to address Threatened and Endangered Species on behalf of the Columbia River processors. I'm here representing 18 processors who have tens of millions of dollars invested in their facilities and plants on the Columbia River from Bonneville Dam to the mouth. Some of us are independently owned, some are family owned, some are regional plants for larger companies. We employ collectively thousands of people year round with payrolls in the millions. We are told that our industry is an economic necessity for the survival of many Columbia River communities, smaller communities where the revenue generated through fisheries is absolutely critical and irreplaceable by any other known industry. For example, Ilwaco Fish Company is the largest private employer in Pacific County and has an annual payroll worth more than the peninsula's cranberry crop. We also represent public access to the public resource. Since fewer than 10% of Northwest residents sport fish for salmon, commercial fishermen become the provider of salmon to the other 90%.

I'm here today because, as processors, we have a number of concerns about Threatened & Endangered Species status for Columbia River salmon and coho runs. None of us, to a company, wants to see any species become extinct. None of us expects to stay in business at the expense of the resource. It is only the health of the resource that allows us to remain in business. The goal of the processors and the goal of Salmon for All, probably matches the goals of the State of Oregon, the State of Washington, the Northwest Power Planning Council, and others. We want not only to increase the fish runs, we want to see them return as, once again, viable species. That is our goal. Through that, we feel we can maintain a viable industry. It is our understanding that the criteria used to determine Threatened & Endangered Secies status will be environmental and biological and that is as it should be. At the same time, without looking at the economic impacts that come from a run receiving threatened and or endangered status, the task of gathering data is complete.

In 1988, the last year for which we have complete figures, the Columbia River commercial fishing industry generated 32 million dollars in contributions to personal income on both sides of the river, Oregon and Washington, from Bonneville Dam down. We would expect that number to be smaller, certainly, for 1989 when there was less of abundance and the price for fish dropped on a world wide market. Ours is a fluctuating industry. Price is based upon the world market, and as with many other resource related industries, there are no guarantees. The one thing that we have worked hard at over the years, as an industry, is to support the agencies who are responsible for funding and operating hatcheries. The Columbia River, for 40 years or more, has been managed as a hatchery operated system. Now, after four decades of investment into hatchery infrastructure, the Threatened & Endangered status threatens to reverse the management of fish runs on the Columbia River, giving emphasis to wild and the natural stocks. Our concern is that should this happen, there will be little or no incentive to continue producing salmon in the hatcheries at the abundance levels necessary for a viable commercial and, for that matter, a sport fishery. It would appear to us that Mitchell Act Funds could be in jeopardy, that the restoration and enthancement programs initiated in the last two years by the state of Oregon and also by the state of Washington, would be in jeopardy; as would a plan adopted by the state of Washington to double salmon runs by the year 2000, and the plan by the Northwest Power Planning Council to double runs by the year 2000. These are all in jeopardy, if the Columbia River changes to management for wild and natural fish.

The processors on the Columbia River too do not rely totally on Columbia River fish for their livelihood. Most of us are involved with the processing of other species, for some that's crab, shrimp or bottom fish, but the mix of product is absolutely critical to our viability as an industry. The products come at different times, and because of that, we are able to employ people full-time year round with full-time jobs. Eliminate any one of those, such as Columbia River salmon and coho and our investments are jeopardized. Our ability to maintain economic viability is jeopardized. Our ability to maintain employment rates is jeopardized. Harvesters, we believe, have not contributed to the decline of these stocks. Summer Chinook returning to Idaho are a good case. There has been no sport or commercial harvest for decades and the numbers have declined. The Spring Chinook numbers have grown with harvest controlled on up river fish. We feel that screening of dams, habitat, and water flows are the significant contributors to declining stocks.

The other issue we want to bring up about economics has to do with the dollars spent to implement a management plan for a particular Threatened or Endangered Species and our concerns are best expressed, probably, by questions. At what point does public policy say that a specie is no longer saveable? How many millions of dollars are willing to be spent to protect a particular run when those same millions would do tremendous advantage to other runs? The economics of restoring a fish run on the Columbia River have to be looked at and judged against the extent to which good public policy can be developed supporting those kinds of costs. We understand that action taken to protect a stock of concern would also serve to enhance stocks, perhaps, for which there is less concern. For example, any further and additional screening of dams to allow smolt passage heading toward the ocean would benefit all species of anadromous runs of upper Columbia and Idaho origin. So that expense is not incurred solely because of one threatened or endangered specie. On the other hand, preservation or restoration of habital, might relate only to one specie that returns to a particular stream or tributary. That doesn't make that expense unnecessary but it does have to be reviewed in the light that only one specie may be benefitted.

In closing, let me summarize by saying that the Columbia River processors share a common concern about the future of the Columbia River salmon industry as projected against potential Threatened & Endangered Species status for runs. The worse case scenario from naming of a Threatened & Endangered Species, would be total harvest curtailment, for both sport and commercial, not only on the Columbia River but in ocean waters from Alaska to Northern California. The consequences are significant and potentially far reaching, affecting billions of dollars to the regional economy.

We encourage all groups and all agencies, be they federal, state, or tribal to begin working immediately to find the solutions that will bring a win/win situation to all concerned; to the resource, to those who care about the resource, and to those who rely on the economic benefits of utilization of that resource. We feel this is possible. The Corps of Engineers should be made to place dam screens that are and have been funded. Pick the most severely impacted chinook run and plan for it's future. In so doing, the other runs will benefit. There are positive steps that can and should be taken now. We feel that it can be done without the threat of Threatened & Endangered status and that it needs to begin immediately. Thank you for the opportunity to make my comments this morning. If there are any questions, I would be happy to respond.

TESTIMONY OF BOB LOVELL, PORT OF ASTORIA COMMISSIONER

Hello, I'm Bob Lovell, a Port of Astoria Commissioner and member of the Pacific Northwest Waterway Association, and I'm here to speak in support of the PNWA's position on proposed protective measures for some Columbia River salmon species.

The PNWA is supportive of both a biological status review of the river's salmon runs as well as continued management of the Columbia and Snake River system for multiple uses, including power generation, navigation, flood control, fish and wildlife, irrigation and recreation.

The association advocates an open review process of the river system salmon runs, with all parties waiting for the outcome of that process before suggesting or imposing any protection measures.

This open process should include biologists and scientists from outside the National Fisheries Service on a technical advisory committee and also a peer review committee of the best available scientists from regional universities. Included on the technical advisory committee should be representatives from the Bonneville Power Administration, the Pacific Northwest Utilities Conference Committee, Direct Services Industries Inc., and the ports.

If protective measures are required, the PNWA feels they should embrace the multi-

ple-use concept that has long guided development and management of the Columbia-Snake river system. This is not and should not become a fish versus jobs issue.

TESTIMONY OF DONALD V. RISWICK

My name is Donald V. Riswick, I have been a commercial fisherman for sixty years here in Astoria and fished on the Columbia River all of my life. I also studied fisheries at Oregon State College during the time 1935 and 1940 when Bonneville and Coulee Dams were being built. For the past 20 years I have also edited the paper the "Columbia River Gillnetter" for the fishermen's union here in Astoria.

I would like to pass along to you some of my thoughts on this subject of sockeye and salmon and coho fish.

The sports fishermen have been reading about the fried owl of late, so are trying to take advantage of the situation by getting fish runs declared endangered, hoping to get commercial gillnetters off the river. They are Johnny come lately—why didn't they speak up years ago when all the dams were being built. When Coulee dam was built without fish ladders over half of the spawning area for sockeye and the Royal Chinook Salmon was eliminated forever. Yet the sockeye has continued to come back even with less area to spawn in. In 1965 the run was 55,200 fish. In 1983 the run was 100,500 fish. In 1985 the run was 200,400 fish. This run has always fluctuated up and down according to conditions. The same thing happens to farmers on many of their crops. So it is not endangered, even though there is not one sockeye hatchery on the Columbia River System.

Lets talk about the Coho. In 1986 there was a return of 1½ million Coho—the largest run in this century. Does this sound endangered? In 1987 there was a run of 700,000 fish.

Lets talk about the winter run of salmon. The Willamette winter salmon has doubled in the last 10 years, going from 43,500 fish in 1980, to 133,000 fish in 1990. People are catching 20-lb salmon out of their hotel windows along the river in downtown Portand.

One reason for the Willamette River success was because in 1935 the CRFPU at Astoria, Oregon started the pollution cleanup by initiating the first legal action on a broad scale against 100 known polluters along the Columbia and Willamette rivers. Then with the help of Wendell Wyatt and Julia Butler Hansen, got Congress to appropriate three and a half million dollars for a fish ladder at Oregon City Falls and also to help on the pollution cleanup.

The CRFPU was also solely responsible for getting Bonneville Dam laddered. The Corps of Engineers built the dam without a ladder and then said we don't have time to play nurse maid to a bunch of fish.

Now we will discuss the *May spring run of salmon.* The gillnetters haven't fished this run for 16 years. In May 1969 the escapement over Bonneville Dam was 173,600 fish then in 1979 dropped to 51,500 fish. In 1986 it was back to 125,000 fish so this run is slowly coming back. Fluctuations in runs have been caused by poor stream habitat, drought in 1977 caused severe juvenile mortality (hot water), nitrogen problems at the dams from high turidity. Pollution, no screens on turbines and irrigation ditches, drain off of water for irrigation to the point there was no water left for the fish.

The *June/July Summer run* we haven't fished for over 30 years. This is one run that hasn't improved much. The spring run is coming back though, and I think the barging of the fingerlings downstream past the dams is the main reason.

Idaho was asked over 30 years ago to join a tri-state compact to help regulate fisheries, but they chose to ignore us. They wanted dams and power, not fish. Now they are suffering, and dams in Idaho have blocked their runs. How can we say endangered specie now? Idaho will never have the fish runs they used to mainly because of the three dams Black Canyon Dam, Brownlee Dam, Owyhee Dam, all unladdered since the 1940's.

After reviewing these runs, I see no reason to declare any run endangered. I do see, however, that more than one run can be enhanced by swifter action by the Corps of Engineers on all dams to get all turbines screened. They have been dragging their feet it seems to me. Maybe it is a good thing this endangered business come up so it will light a fire under some of the agencies.

My other recommendations would be:

1. Ladder all dams possible.

2. The area around St. Helens and Clatskanine, Oregon—the streams and creeks should be cleared of silt and logs from logging.

3. A strict crackdown on all pulp mills who put dioxini in the Columbia river.

4. Order a study to see if there would be any way to build a fish ladder around Coulee dam. If possible this would open a immense spawning area.——

TESTIMONY OF DANIEL ROHLF, NORTHWEST ENVIRONMENTAL DEFENSE CENTER

Thank you for the opportunity to share our perspective on management of fishery resources in the Columbia River Basin. The following constitute our written comments submitted in conjunction with the July 2, 1990 Field Hearing.

For thousands of years the Columbia and Snake River Basins provided habitat for more salmon than any other river system in the world. But in the time period since white settlers arrived in the Northwest, salmon runs have been reduced by about 80%. Moreover, the majority of fish that remain are artificially produced in hatcheries; disease and genetic deficiencies are common among these stocks.

The drastic decline of wild salmon stocks in the Columbia and Snake Basins has taken a devastating economic toll on the Northwest, a toll which could mount in the future if runs continue to decline or become extinct. Once lucrative commercial and sport fisheries on upriver stocks have been virtually eliminated. Indian tribes and other fishers must compete for the remaining fish—which are available largely due to expensive hatchery programs.

Loss of wild runs also threatens the very spirit of the Northwest. Salmon play an important role in the cultures of tribal peoples and other residents as well. These species, which travel thousands of miles and overcome overwhelming obstacles to return to their native streams to spawn and die, are a unique part of what makes the Northwest special. If humans wipe out these species, we will impoverish our land and ourselves.

The Northwest currently faces the challenge of maximizing economic uses of its anadromous fish and hydropower resources while insuring that those uses are sustainable within the biological constraints of the Columbia and Snake River ecosystems. In facing this task, political leaders and resource managers must do a better job of understanding and taking into account both economic and ecological complexities. For example, the Northwest's political leaders have been quick to condemn Southern California's plans to acquire water from the Columbia, in part because loss of water would harm the region's anadromous fish. Nevertheless, politicians have ignored or even tacitly supported the Bonneville Power Administration's efforts to regulate Columbia River flows in order to maximize power sales to California, even though such flows could also have devastating impacts on salmon. For the Northwest to achieve a balance between economic benefits and environmental needs, creative and informed leadership—not dire predictions of doomsday scenarios—will be imperative.

NEDC firmly believes that measures to protect and enhance wild salmon runs are compatible with economic prosperity in the Northwest. Salmon depend on adequate water flows to thrive. Hydropower generation also requires flows. Commercial and sport fishers need plentiful and healthy fish stocks. Clearly, therefore, many supposedly "competing" interests actually overlap. The task ahead is to identify and strengthen areas of compatibility between the needs of fish and the needs of people.

We cannot successfully accomplish this task by clinging to the status quo or by attempting to avoid current problems. Regulatory schemes and management policies which currently govern use of the Columbia and Snake Rivers' resources—including the Northwest Power Act—clearly have not worked. It is time to stop and rethink old approaches to water and fisheries management by asking new questions: How can we run hatcheries to enhance rather than jeopardize wild runs? How can we structure power usage and marketing to compliment rather than work against needs of anadromous fish? How can we convince federal agencies such as BPA to implement policies which provide more benefits to Oregon and the Northwest?

In order to find answers, as well as ask the right questions, it will be necessary to move away from entrenched bureaucratic interests and avoid an "either-or" approach to issues. Agencies and commercial interests have traditionally been reluctant to stray from business as usual. This creates a zero-sum game: for example, some agencies and power interests argue that providing flow benefits to fish will necessarily lead to substantial losses of power production capability. This type of thinking leads to drastic predictions that helping fish will wreak economic havoc. Such posturing merely polarizes and slows what should be a constructive dialogue aimed at solving rather than creating problems.

We need a far reaching plan to maximize benefits for fish and people—to provide for environmentally sustainable economic prosperity in the Northwest. Unfortunately, in recent years no such plan has been successfully implemented, the principle reason NEDC and other groups chose to petition the National Marine Fisheries Service to list the most critically imperiled salmon stocks as threatened or endangered. This action has galvanized interest in exploring ways to sustainably manage the Columbia and Snake Rivers' resources, already a step in the right direction.

In addition to Endangered Species Act protections, there are many ways to move toward benefiting wild salmon while sustaining and enhancing the region's economic well-being. NEDC, with other groups, is currently working with BPA to examine how to coordinate fishery and power needs.

BPA has expressed interest and an initial commitment to use its Systems Operation Review to accomplish this goal. Congresional oversight hearings on the Northwest Power Act could also encourage realization of that statute's twin goals of fish and wildlife conservation and enhancement and hydropower production.

NEDC firmly believes that its petitions to list four salmon stocks under the ESA are biologically warranted, and that ESA protection will benefit fish withcut causing significant economic hardship to the region. Indeed, with some short term investments, providing protection to wild fish in the Columbia and Snake Basins will have long term regional economic benefits. The ESA, since it applies to all federal agencies and to some extent to state and private entities, will facilitate long term solutions by encouraging cooperation among diverse interests and agencies with overlapping jurisdictions. Section 7 of the ESA also has important implications for resource management in the Northwest. That section provides for development of reasonable and prudent alternatives to actions which harm listed species. Clearly, acting now to devlop a plan for managing the Northwest's fishery and other resources could have a substantial influence over development of those alternatives. By exercising such forethought, Oregon's leaders could be confident that the ongoing ESA process will benefit the state's people as well as its environment and natural resources.

TESTIMONY OF ERIC DAHLGREN, PORT COMMISSION PRESIDENT, PORT OF ST. HELENS

Thank you, Sen. Packwood, for providing this forum at which all of the issues surrounding the proposed listing of the Columbia River Salmon as an endangered species can be presented and discussed.

As a steward of public resources, the Port of St. Helens has a vital interest in seeing all of Oregon's tremendous resources used to their fullest, most responsible extent.

Many factors play into our efforts to accomplish that goal here in Columbia County. The Columbia River is, for obvious reasons, one of the key elements in our strategy for economic development and public enjoyment of the Northwest Oregon region. Therefore, we have a very natural interest in all issues that affect our resources.

When determining how to best utilize those resources, we often must evaluate competing uses. We approach this issue no differently. We believe that a multiple-use philosophy must govern all decisions regarding Oregon's resources—from trees to fish.

Be assured, Senator, that the Port of St. Helens stands firmly behind careful, scientific evaluation of environmental concerns surrounding the Columbia River Salmon. Those efforts must be based entirely on the "best available technology."

Until such a determination is made, however, the Port respectfully requests that the process remain fair and open, guaranteeing that no interests are given special atttention at the expense of another. Thank you.

TESTIMONY OF JIM CALNON, PRESIDENT, ST. HELENS MARINE, INC.

Introduction

St. Helens Marina has been in existence as a small-boat basin under current ownership since 1976. Operation of this site as a small-boat basin can be traced through several different owners to the early 1940's with sportfishing as the primary revenue source.

Nearby, a salmon cannery was operated by Bumblebee Seafoods until economic forces and declining catch rates forced its closure in the mid 1970's. Commercial fishing continues to operate here on a seasonal basis on a small scale and without any permanent facilities.

As shipping, barging, longshoring and other industrial uses have vanished from the St. Helens waterfront, the only remaining water dependent use for waterfront properties is as a small-boat mooring basin. The recreational boaters who make up the customer base for these small-boat moorages are engaged in sportfishing for most of the boater/day/trips that originate here.

Discussion

Local fishermen use parts of the main Columbia River, the Lewis River, and Willamette River for salmon and steelhead. Most trips originating in St. Helens will have destinations consisting of well-known fishing spots with recent histories of high productivity. On the Columbia, the distance traveled can be as far as Goble, Or, which is eleven miles downstream, or fourteen miles upstream to Frenchman's Bar. This part of the Columbia is a good producer of Chinook and Steelhead. When the season closes on the Columbia, angling pressure is focused on a branch of the Willamette River called the Multnomah Channel, and the last seven miles of the Lewis River system in Washington. Most anglers prefer to fish the Columbia, when the seasons are open, because of the scenic value, sense of open space and a chance to catch a larger variety of species when salmon and steelhead are not present.

The spring Chinook season begins in late January, with catch rates at a very low level until early March when the Willamette run begins to increase to substantial numbers. Lewis River spring Chinook begin to appear in a smaller but more intense fishery as these hatchery fish return. The Lewis does not have a naturally occurring spring run and all of the Chinook entering this river in March and April are planted hatchery fish.[1] Conflicts with upriver runs of salmon have caused the regulatory agencies to close the season on the Columbia River for salmon and steelhead on April first every year since the mid 1970's, and anglers targeting the Willamette spring Chinook must condense into the Multnomah Channel upstream of St. Helens. Springers can usually be caught in the Channel until late May and early June. At this same time, steelhead begin to enter the Willamette and Lewis Rivers in sufficient numbers to attract anglers.

The summer steelhead season allows retention of fin marked fish from May 16 to October 31, providing escapement for the unmarked wild fish. Most anglers will wait until late June and early July before going after steelhead in the main Columbia. This fishery can be exciting as the larger wild steelhead begin to come in along with the hatchery fish during late July and August. The possibility of hooking, playing out and then releasing a 25 pound upriver steelhead while fishing for fin marked hatchery fish provides the motivating factor for many local anglers. Additional excitement is added when the fall Chinook begin to appear in late August and Early September.

All of this stops in mid-September with the onset of gillnetting, when the sport catch drops to nothing during the season's first week. Anglers begin going out in early November when the nets pull out and the few remaining fall Chinook begin to filter in from the ocean. Winger steelhead are running in good numbers, and a hooked fish has an even chance of being a steelhead or a salmon.

One interesting note to interject is that silver salmon are quite rare in the sport catch here. The gillnet catch consists of many more silver salmon than Chinook, proving their presence, but sport tackle seems to be ineffective as a harvest method.

The sport salmon and steelhead fisheries are the most important in the local area from an economic point of view. The early spring run on the main Columbia, January through March, is the best economic contributor followed closely by the Willamette springers in April and May, then augmented by the fall Chinook and steelhead. If the economic impact of these fisheries is apportioned on a value per fish basis, the fall Chinook will have the highest number of dollars spent per fish in the local area, followed closely by the Williamette spring Chinook. The value per fish is not estimated for fall Chinook at this time, but for Williamette spring Chinook the gross revenue per fish at St. Helens Marina is about $75.00. To reflect the recirculating effect of dollars spent at one business in the local economy, the commonly recognized economic multiplier of seven can be applied to arrive at a value per fish of about $525.00. This figure does not include the dollars spent by out-of-town anglers who also buy meals, lodging and make incidental purchases at other local businesses. When the number of spring Chinook totals slightly over one thousand at the St. Helens Marina boat landing site, the impact of the sport angling season on the local economy is obviously significant and important.

The existence of St. Helens Marina is dependent on the sport angling fishery, especially salmon and steelhead. Seasons and catch limits are already severely restricted in order to provide protection from harvest for fish runs that are either suffering declining return rates or are earmarked as property of Indian tribes. Further regulation resulting in more reductions in fishing opportunities will strangle the already depressed sportfishing industry in St. Helens.

Bayport Marina is located just outside of St. Helens on the Multnomah Channel, and they are more dependent on the spring salmon season than St. Helens Marina. The owners state that accounting records prove that Bayport would have to close the doors if the spring season is reduced. Fishing license records show that visitors from 43 states purchased Oregon angling licenses at Bayport during the last spring season, and their staff provides hotel/motel booking services for those out-of-town guests requiring rooms. Last fall, when the gillnet fleet boycotted the first week of the season because of selling price arguments, the increase in sport angling for fall Chinook provided almost one full inventory turn for Bayports retail convenience store. Tis experience is congruent with the position previously stated that the fall Chinook is a potentially more valuable sport fishery when compared on a value per fish basis.

Conclusions

The wild Chinook runs are probably decreasing in numbers, but the sport angler on the Columbia River is not causing depletion of this resource in any way. When these diminishing runs are present in the Columbia River system, the sport anglers are prevented from harvesting any of these strains of Chinook, silver salmon or steelhead through regulatory restrictions. Further reductions in angling opportunities through regulating

will probably not result in any increased benefit for the fish runs, but will definitely have a major negative impact on the local economy of the city of St. Helens.

The primary causes of fish run losses are probably spawning bed losses caused by erosion, and fish passage losses caused by the dam systems. Gillnet fishing could possibly impact the silver salmon runs because it is an effective harvest method for fall silvers, and the steelhead because it is not capable of differentiating between fin-marked hatchery fish and unmarked wild fish. While the impact of gillnetting may be measurable, it is likely quite small and short term in nature.

In contrast, the sport anglers not only are already prevented from having an impact on depleted runs, they are providing a funding source to support regulatory agencies and accompanying restoration efforts through license fees.

TESTIMONY OF JEANNIE DODSON-EDGARS, COLUMBIA RIVER PEOPLE'S UTILITY DISTRICT

Thank you for inviting Columbia River's People's Utility District to this hearing. We appreciate your demonstrated concern for your constituency and the desire to hear from us.

Columbia River People's Utility District is six years old. We are a full requirements customer of Bonneville's Power Administration serving 7,450 customers of east Columbia County. This includes industrial, commercial and residential customers. Anything that affect Bonneville also affects the people and the industries in our district. The proposed listing of certain salmon species as threatened or endangered species would certainly have a costly impact on our customers.

First, we say to Congress and the National Marine Fisheries Service: Look before you leap. Before we propose or comment on solutions, we need to know the problem: We want:

1. A thorough and credible scientific review of the status of the petitioned salmon species.

2. A thoughtful and complete look at the causes of the identified species decline.

3. An evaluation of current fishery management practices.

4. The products of the reviews and evaluation be made available to the decision makers.

As customers of Bonneville, we accept our responsibility to stabilize and enhance the Columbia River basin salmon runs that are affected by hydroelectric facilities. We view the salmon and other migrating fish as an important regional resource that must be preserved.

Our actions speak louder than words. Since we began operating six years ago, our ratepayers have contributed to the $1 billion the region has paid for fish enhancement efforts over the last 10 years. Those dollars range from $25 per year for a residential customer to $180,000 per year for an industrial customer in our district.

We must now answer the question: What has our billion dollar investment provided us in terms of positive movement toward the regional goal of doubling the fish runs? Fishery agency data reveals that runs above Bonneville Dam are generally no longer decreasing. In some cases, the species have increased population. We need to take a closer look at our fish management practices. We need to learn from our success and apply them to identified declining fish species. We may even need to look at new fish management practices for solutions. We need to base our decisions on "good science." What we must not do is leap to the conclusion that more water over the dam will solve any perceived fish problem.

In March 1990, the fishery agencies and tribes published a request for a significant increase in flow and water budget. The existing water budget calls for improved flow between April 15 and June 15 of each year. Its purpose is to speed fish migration between dams, thereby improving smolt survival. But, the fishery agencies and tribes want more.

They are now calling for minimum flow constraints in the Snake and Columbia Rivers throughout the year. They also requested high reservoir levels during the spring and summer for resident fish. They did not give biological evidence that additional flows will improve smolt survival. "Good science" was not the bases for their request.

The status of the petitioned species and water flows in the Columbia and Snake Rivers are not dependent issues. Increasing flow over the dam is a generic approach that does not selectively enhance any particular species of fish. The impacts on the petitioned salmon specifies are specific. And, once the problem and its causes have been identified, the solutions need to be specific and based on science.

We have yet another concern. The National Marine Fisheries Service, of the Department of Commerce, is the Federal agency charged with evaluating the petition and developing the recovery plan. It also helped develop and now supports the fishery agency and tribe's flow proposal. We agree that the flow issue must be resolved, but this must be done in a forum separate from the National Marine Fisheries Service status review of the petitioned fish.

The Columbia River and its sister rivers are the lifeblood of the Northwest. The river provides us with recreation, irrigation, fish, navigation and power. We play in the river, we water our crops with the river, we export our harvested fish from the river, we move goods to other ports on the river, and we capture our power from the river. The river is our livelihood. It is the bases for our environment. Any decision affecting our river needs to made in a cooperative atmosphere. Private, commercial and governmental interests need to work together to study the status of the petitioned fish. Together our region needs to identiy the problem. Together we need to create balanced solutions.

Thank you for this opportunity to share our views with you in this citircal topic. We appreciate your time in considering these issues and your recognition of the importance they have on our region and the people of Oregon.

TESTIMONY OF DIANE DILLARD, HUMAN RESOURCES COORDINATOR, BOISE CASCADE CORPORATION

Boise Cascade Corporation is extremely concerned over the possibility of listing certain salmonid species under the federal Endangered Species Act. Virtually every water dependent use associated with the Columbia River and its tributaries could be adversely affected by any recovered plan implemented following such a listing:

These potential impacts include:

Massivie increases in the cost of electricity to all consumers, particularly those like Boise Cascade Corporation with energy intensive manufacturing processes;

Limitations on recreational opportunities for our employees and the public who cherish fishing in the river;

Reduced commercial agricultural activity with the attendant loss of tax revenues and increased consumer prices; and

Additional restrictions on forest operations at a time when a timber supply crisis already exists.

The Pacific Northwest has already taken a huge hit from the listing of the Northern Spotted Owl as a threatened species. Further listing of the Colubmia River Salmon species has the potential for virtually destroying the remainder of the manufacturing economy along the Columbia and severely impacting the farming community which so heavily depends on these waters.

We urge you to seek other less draconian ways to rebuild these Columbia Rivers salmon stocks.

TESTIMONY OF DR. WILLIAM B. CONERLY, FIRST INTERSTATE BANK OF OREGON, N.A.

As the federal government considers protection of various salmon runs in the Columbia and Snake rivers, economists will be asked to assess the economic impact of such protection. To this question, I have a long answer and a short answer.

The short answer is, "I don't know."

But let me adhere to a long-standing tradition among economists, by elaborating. I will try to be brief.

We can probably expect salmon protection to entail less electricity production from dams (or less in the "firm" category), resulting in reduced availability of electricity to industrial users or higher electricity prices. We may find less water available for irrigation. We may find water levels or flows that impede commercial or recreational navigation. We may find logging hampered by new environmental or transportation issues resulting form some salmon protection program. However, we do not know that any of these effects will occur.

Based on the information I have been able to collect, there are no real answers yet. As the controversy heats up, wild guesses will grow, and partisans will present extreme numbers, but it will be quite a while before a careful, realistic appraisal is possible.

This uncertainty is real and has real effects itself. It is to this issue that I would like to draw your attention. Every day, business managers and financiers are making decisions about the future. Those decisions will be based, in part, on the price and availability of electricity and water. The future is always uncertain, but these two key resources are being thrown into far greater uncertainty than is normal. This uncertainty will not only reduce businesses' inclination toward capital spending, but it will make potential financiers nervous, whether those capital sources be commercial banks, venture capital firms, or informal sources.

Uncertainty will extend from firms directly dependent on water or electricity to their suppliers, their employees, and eventually the whole community.

Let me offer an example of uncertainty's effects, drawn from another area of public controversy. In January, Rohr Industries announced plans to construct a plant in Eugene, to eventually employ 250 people. Some critics claimed that Rohr's presence would violate Eugene's nuclear-free zone ordinance. Others said that Rohr's activities would be permissible. The critics also claimed that the proposed site included wetlands that had to be protected; others

claimed that there was no wetlands problem. The company decided not to wait around for a decision; Rohr changed its mind and moved to Texas.

There will be similar stories about electricity and water in the coming years. New business and expansion of existing business will suffer during the period of uncertainty.

A second important issue is the speed at which change occurs. The Oregon economy can adjust to whatever federal policy makers throw at it. How much pain is suffered in the adjustment depends largely on how much time we have to adjust. Gradual change, with adequate warning, will be much easier on businesses and workers than sudden, unforeseen change.

The federal government has a major impact on Oregon's economy. It owns over half of the land in the state. The Corps of Engineers generates a large portion of the electricity used in the state. Federal timber lands account for 57 percent of our timber harvest. Federal rules affect most commercial fishing in Oregon. It is regrettable that we have less and less certainty about federal action, and we find federal policy more prone to suddent turnabout.

Senator Packwood, it is not news to you that our decision-making process has sometimes generated lengthy delays and prolonged uncertainty. My recommendation is that you give priority to evaluation and improvement of the decision-making process regarding use of federal resources.

Thank you for giving me this opportunity to discuss such an important issue.

TESTIMONY OF JOHN W. MITCHELL, U.S. BANCORP

1. At the present time we have no specific plan to look at, but rather the knowledge that various Salmon Runs are being considered for listing under the Endangered Species Act. Thus, answers have to be rather vague and conjectural at this point.

2. A few years ago the EPA when looking at the Pacific Northwest economy said that it could be explained as the result of the natural resources of falling water, arable land, timber and minerals and the legacy of war. At this point we should probably throw in the footloose industries that have located here due to the lifestyle. Thus, one can explain the ag and food processing, fishing, the forest products sector, Hanford, Boeing, high teach, and tourism-retirees. The river system ties many of these activities together-irrigation-transportation-power generation-recreation.

3. One of the basic industries in the region faces the prospects of accelerated shrinkage due to environmental concerns—the forest products sector. This will weaken performance in portions of the region and the overall performance temporarily.

4. This fish measure has the potential to result in similar kinds of disruptions over a broader region—more changes in forest practices, changes in water management with the potential of declines in hydro power production—hastening the day for thermal or more nuclear capacity, changes in power rates affecting ag, metals as well as other industrial and residential users and declines in fishing activity downriver and offshore to enable more of specified runs to return.

5. Most of us probably do not spend a lot of time looking at things like input-output tables which are like a cat scan of an economy showing the linkages between sectors—but that is where one can see the connections—where the electricity goes, the transportation services purchased by the ag and forest products sectors, and the barge and truck construction that results from these purchases.

6. We have in this case, as in the case of the National Forest or the BLM lands, a publicly-owned resource which means that the decisions are going to be made in the national arena reflecting the national agenda—which at the moment is green with disruptions in lives and industry far removed from decisionmakers. Call it option value or biodiversity or whatever.

7. We are moving into new territory with ESA not just affecting a specific project such as the Tellico Dam but activity over multi-state regions that the Red Fish Lake salmon cover. As anyone who has had an Economics class knows after the first week—when you do one thing with scarce resources, you give up the alternatives—there is no free lunch. The London Economist recently said environmental policies that take no heed of economics will backfire: so will economic policies that ignore the environment.

TESTIMONY OF JAMES J. JURA, BONNEVILLE POWER ADMINISTRATION, U.S. DEPARTMENT OF ENERGY

Senator Packwood, my name is Jim Jura, and I am the Administrator of the Bonneville Power Administration (BPA). We appreciate the opportunity to appear before you today to discuss the issues raised by the petitions to list several species of Columbia River salmon under the Endangered Species Act.

I would like to briefly summarize the key points in my testimony. To the extent hydroelectric operations impact fish resources in the Columbia River System:

BPA is committed to protecting and enhancing the Columbia River Basin's fishery resources.

We do not want to lose sight of the major environmental benefits of the Pacific Northwest hydrosystem.

We endorse a full scientific review involving a public process that enables all viewpoints to be presented and debated, so that any actions taken will find regional acceptance as sound solutions.

BPA, along with other Federal agencies, will be a positive, active participant in that process.

BPA IS COMMITTED TO FISH AND WILDLIFE

In the ten years since Congress passed the Pacific Northwest Electric Power Planning and Conservation Act, tremendous progress has been made. The region, led by the Northwest Power Planning Council, has forged a productive, flexible Fish and Wildlife Program. This Progam is based upon the participation of state and Federal fishery agencies, Indian Tribes, utilities, and other regional interests.

Since passage of the Act, BPA has devoted $1 billion in electricity ratepayer revenues to protecting and improving the basin's fishery resources. Since almost 40 cents of every dollar committed to fish and wildlife in the Pacific Northwest comes from BPA ratepayers, we are concerned about the status of those species. No agency in the Pacific Northwest invests more in fish and wildlife than we do.

Our efforts have contributed to positive results in the Columbia Basin. I would like to share with you a number of accomplishments.

Umatilla Basin: This year, a record number of spring chinook entered central Oregon's Umatilla River. So far, 2,100 fish have been counted—a remarkable number considering that only 13 came back in 1988, and 164 in 1989.

Spill Agreement: Last year, BPA, the state and Federal fishery agencies, and the Tribes signed a landmark 10-year Memorandum of Agreement. Under the Agreement, BPA will spill water at Federal projects to provide for fish passage until effective bypass screens are installed. We stand behind that agreement and are pleased by the inclusion of funds—to be repaid by BPA—in the Administration's budget for bypass screens at those Federal projects where prototype testing has demonstrated the screens will be effective.

Water Budget: Under the Water Budget program, BPA and the Corps of Engineers have released water in the spring to speed the downstream migration of juvenile fish. Normally this water would have been used at another time of the year in order to generate electricity during periods of high demand.

Hypothetically, the volume of water we release for fish during the spring months could create a river the averae size of the Willamette as it flows by Portland. This "Water Budget River" could flow for fish, day in and day out, for two and a half months.

We fully intend to continue our commitment to the Columbia Basin's fish and wildlife resources. As species are reviewed under the Endangered Species Act, BPA and other Federal agencies will be active, positive participants. We are aware that the Endangered Species Act could carry significant implications for our operation of the River.

IT IS TOO EARLY TO SPECULATE HOW A LISTING MIGHT AFFECT THE REGION

BPA and the interested parties do not know how much a listing might affect the Northwest. Guessing the impacts would be premature and speculative until: The status review is completed; the region understands all of the factors that may be affecting each species' decline; and we know what may be effective in addressing each of those factors.

WE ARE CONFIDENT NMFS WILL CONDUCT AN OPEN SCIENTIFIC PROCESS

The National Marine Fisheries Service (NMFS) has invited BPA and persons representing a wide variety of interests to participate in its status reviews. A broad review is crucial to the Endangered Species process. We welcome this invitation and look forward to NMFS continuing with these important steps to bring all of the interests to the table. The Columbia River is a regional asset that provides benefits to many users—irrigators, industries, recreation, fisheries, and the infrastructure that relies on these activities. An open, scientific process will encourage the development of a sound, supportable basis for decisions by NMFS. The entire region needs to understand and participate in the status reviews.

We believe NMFS should follow these principles:

1. All meetings of the committees NMFS will use to assist in its review should be public.

2. NMFS should perform the studies necessary to produce data where the region's knowledge is incomplete. These studies should produce the best scientific basis for decisions. Some of the scientific issues that need to be resolved are addressed later in my testimony.

3. NMFS should develop a reasonable schedule that allows interested parties sufficient time to analyze and comment on the

issues, and for NMFS to consider this input before reaching conclusions.

4. NMFS should provide a public forum where scientists can interact directly and test their views.

Under these principles, the region will be assured of a broad-based approach that will produce the best science and the best results.

The status reviews for each species will raise difficult, puzzling questions. These questions will involve historical and current activities in many sectors: utilities, irrigated agriculture, fisheries, recreation, navigation—in short, any activity that is tied to the waters of the Columbia and Snake Rivers.

THE REVIEW WILL RAISE AND MUST RESOLVE DIFFICULT BIOLOGICAL ISSUES

It is not enough to know that the candidate species have declined from levels in the 1960s. We must ask why. Why are the returns of coho on the lower river so low? These fish have no dams to contend with. And why are upriver brights—which must pass four dams on the Columbia River—doing so well? In 1989, the number of upriver brights returning to spawn in the Hanford Reach on the Columbia River surpassed the escapement goals used by fishery managers to manage the run.

The petitions raise difficult biological issues. For example, what is a species? Are fish that spawn a hundred yards up a tributary to the Salmon River distinct from those which spawn just downstream from the point where the creek enters the River? Have hatchery and other fishery management programs harmed wild fish? BPA believes an active scientific debate and further studies are necessary to resolve these issues, and we are prepared to work with all of the interests in the region to address them.

This is not the time for simple, incomplete solutions. There is time to consider a measured response.

IT IS NOT TOO LATE TO INVESTIGATE POTENTIAL CAUSES AND SOLUTIONS

Given the schedule and structure provided under the Endangered Species Act, it is important that the bulk of our efforts be devoted to conducting the status review and addressing the issues that are raised by those reviews. This includes a scientifically based approach to determine all of the factors that have contributed to the declines. For example, the efforts should seek to understand the impact of the international drift net fishery and how other factors affect the survival of Columbia River fish. But the status review need not be the only focus during the first year. In the short term, it may be possible to consider the tools Federal, state, and local bodies have at hand to address problems with specific stocks.

BPA would support a reivew of potential for accelerating activities under the Northwest Power Planning Council's Program that could lead to improving the productivity and survival of the stocks under consideration for listing. Historically, the Council's Fish and Wildlife Program has focused in a general way on doubling salmon and steelhead runs in the Columbia Basin. Given the status of some stocks, it may be appropriate to focus efforts on specific actions that can be taken to increase wild fish stocks. For example, it may be possible to consider a captive brood stock program for sockeye salmon, or consider accelerating a review of the planning efforts in the Salmon River basin to increase the production of sockeye and chinook smolts.

We are aware that some would identify Columbia River streamflows as an issue in the NMFS study. We expect to address streamflows in a comprehensive review of hydrosystem operations which we are undertaking with the U.S. Army Corps of Engineers and the U.S. Bureau of Reclamation. BPA believes that the region lacks a complete understanding of the interactions among the various factors that contribute to the decline of Columbia River salmon. Therefore, it would be premature to undertake in the short term, significant revisions in the operation of the hydrosystem. We continue to support studies that will help the scientific community and the region to determine the efficacy of flow augmentation on fish survival.

CONCLUSION

For years, the Northwest has been aware that several salmon species in the Columbia Basin are in decline. The region has sought to address these declines in a number of ways: Signing a treaty with Canada governing fish harvest; settling legal claims among the States and Indian Tribes; funding fish bypass systems at Federal dams; enacting legislation such as the Mitchell Act, the Lower Snake River Fish and Wildlife Compensation Plan (authorized by the Water Resources Development Act of 1976), the Magnuson Fishery Conservation and Management Act, and the Pacific Northwest Electric Power Planning and Conservation Act; and implementing the Northwest Power Planning Council's Fish and Wildlife Program.

The Council's Fish and Wildlife Program incorporated dramatic and comprehensive measures to protect and enhance the Basin's fishery resources. We can demonstrate clear successes under this Program. But these successes are not shared among all species in the basin. We need to understand why some species are doing well and others are not.

Northwest hydropower is a national asset. It provides major environmental benefits. The hydro system ensures clean air and protects our land and water resources from acid rain. It not only protects the air and water of the Northwest, but also displaces generation in the Southwest that relies on fossil fuels.

The region has yet to undertake a rigorous review of all the causes contributing to the declines. The Endangered Species Act petitions offer an opportunity and incentive to conduct scientific studies to identify actions that will increase the number of fish returning to the Basin. And, the petitions place the responsibility for addressing these questions on all of the interests in the Northwest.

This concludes my testimony. I would be pleased to answer any questions you may have.

TESTIMONY OF NANCY RYLES, OREGON PUBLIC UTILITY COMMISSION

Good morning. I am Nancy Ryles, an Oregon Public Utility Commissioner. I am grateful for the opportunity to testify today on a matter that could have significant impact to the citizens of the state of Oregon.

The Columbia River and its tributaries provide the region with a multitude of benefits including fish habitat, irrigation, navigation, and electrical power production. Focusing on the latter, the Pacific Northwest power system is capable of producing about 19,500 average megawatts of firm energy on an annual basis. Of this amount, about 12,450 average megawatts or 64 percent comes from the region's hydropower dams, the vast bulk of which are in the Columbia and its tributaries. The remaining energy is supplied by thermal generation consisting of coal plants for 3,129 average megawatts or 16 percent, two nuclear plants for 1,549 megawatts for 8 percent, and combustion turbine plants for 456 average megawatts or about 2 percent. In addition to the regional resources, about 1,584 average megawatts or 8 percent is imported while the remaining 2 percent comes from cogeneration and small power producers.

The above figures reflect the firm or guaranteed output of hydro projects, that is, the output that would occur if the drought conditions of the early 30's were to reoccur. Under average river conditions, the hydroelectric resource base produces an additional 4,000 average megawatts for a total of about 75 percent of the region's total electrical energy supply.

It is this large dependence on hydroelectric resources that prompts my concern. If the hydro system operations were required to change significantly in a manner that reduced the energy generation capability, that energy shortfall would be met primarily by increased operation of coal-fired generation plants at substantially higher costs. In addition, the energy surplus we have enjoyed over the last several years has all but vanished, and the region is currently at load/resource balance. Loss of significant hydro resources would advance the need for construction of new generation plants. Both Oregon and Washington are currently engaged in least-cost planning activities to meet future energy needs in the most economic manner.

Of course, it is speculative at this stage to discuss the possible impacts on water flows and generating capability. However, the possibility exists that hydroelectric power could be impacted resulting in higher cost resources being required to sustain the region's energy needs. Obviously, it would be of concern to the Oregon Commission since we are charged with the responsibility of ensuring that ratepayers receive adequate and reliable power at fair and reasonable rates. In Oregon, we are responsible for regulating the rates for about 75 percent of all customers of electric energy in the state. In setting fair and reasonable rates, we must recognize legitimate costs that are incurred by utilities in providing electric energy. This includes recognizing the costs of undertaking measures that may be necessary to protect our natural resources.

Mainly, the bulk of any impacts on hydro operations on the Columbia River system would be borne by the customers of the Bonneville Power Administration (BPA) due to the dominance of federal facilities.

BPA's costs, however, would impact the IOUs in two ways. First, the IOUs purchase energy from the BPA when hydro conditions are better than critical. The amount of this resource could decrease and its price could increase. Second, through the exchange provisions of the Pacific Northwest Electric Power Planning and Conservation Act, the benefits of BPA's low cost hydro to the IOU's residential and farm customers could be reduced. Idaho Power Company, which serves a portion of Eastern Oregon and two-thirds of the customers of the State of Idaho, could be substantially impacted by any changes in the operation of their hydro facilities on the Snake River which provides about 67 percent of their total energy.

The impact on publicly owned utilities would be greater since a far larger share of their energy is purchased directly from BPA. While Oregon has only about 25 percent of its customers served by publicly owned utilities, the state of Washington has about 55 percent of its customers served by publicly owned utilities and, thus, is even more vulnerable to changes in the Columbia River hydro system.

While it is premature to draw any regulatory conclusions at this time, the PUC will follow the review process very closely because of the potential impacts on the ratepayers of this state as well as the entire region.

Again, I thank you for the opportunity to bring my concerns to your attention. I am available to answer any questions you may have.

Thank you.

TESTIMONY OF AL WRIGHT, PACIFIC NORTHWEST UTILITIES CONFERENCE COMMITTEE

Senator Packwood, my name is Al Wright, Executive Director of the Pacific Northwest Utilities Conference Committee (PNUCC). PNUCC is a non-profit association of public and private electric utilities and direct service industries in Oregon, Washington, Idaho, and Montana. We represent these three major Bonneville Power Administration customer groups on regional power and environmental issues. We appreciate your inviting us to express our views on the endangered species petitions for Columbia Basin salmon.

Congress recognized the significant declines in the Columbia River salmon run sizes of the late 1970s. Therefore, during the development of the Pacific Northwest Electric Planning and Conservation Act in 1980, Congress included a provision mandating the development of a fish and wildlife program to protect, mitigate, and enhance the Columbia River fish runs affected by hydropower development and operation. The Northwest Power Planning Council set as the goal of its Fish and Wildlife Program to double the size of the 1980 fish run (2.5 million fish).

PNUCC does not believe that a crisis regarding any solmon run exists. While some salmon runs have declined, we do not believe there is any need, between now and the time that National Marine Fisheries Service (NMFS) completes its status review, to take any sudden actions for any species of fish. The Fish and Wildlife Program has been in place since 1982, and it is working. The region has worked diligently on fisheries issues over the past 10 years and has made substantial progress. Overall, the number of adult salmon and steelhead returning to the Columbia River has increased by about 300,000 fish annually.

Over the last 10 years, PNUCC has been heavily involved in analyzing, reviewing, and commenting upon fishery agencies and tribal proposals to the Northwest Power Planning Council for Fish and Wildlife Program measures. Implementation of these measures, which are funded by the Northwest's electric ratepayers, has already resulted in direct expenditures and foregone revenues of about $1 billion. In addition, Northwest generating utilities have also spent hundreds of millions of dollars mitigating and enhancing fish at their non-federal hydropower projects. These were not the first actions taken to address impacts to fish. Since 1937, ratepayer dollars have been paying for fish hatcheries, ladders, and screens to mitigate the impacts of the federal Columbia River dams. Electric ratepayer expenditures represent the vast majority of all fisheries mitigation and enhancement expenditures on the Columbia River system.

On June 1, 1990, Oregon Department of Fish and Wildlife and the National Marine Fisheries Service submitted a report entitled "Past and Present Abundance of Snake River Sockeye, Snake River Chinook, and Lower Columbia River Coho Salmon" to Senator Hatfield. While the report provides useful information, some of the data in the report is presented in such a way that it could be misinterpreted by the lay person. For example, the report depicts redd counts (nests of eggs) for spring and summer chinook in five-year averages, but treats 1989 as a single-year data point. While 1989 was a decline from the upward trend of 1985-1988, using a single-year data point exaggerates the decline. In fact, 1989 counts were higher than some earlier counts. Viewed in consistent five-year averages, redd counts are actually up in the five-year period ending in 1989. We expect, based on dam counts of chinook, that Snake river spring chinook redd counts should be up sharply this year.

While fish runs have been trending upward since 1980, certain wild stocks of fish continue to decline. In attempting to increase the overall Columbia River runs, the needs of these specific wild stocks may have been overlooked. The successes in increasing the overall runs may be part of the problem. The focus of state and federal programs has largely been on producing fish for harvest.

The measures that have been implemented have produced more hatchery fish for people to harvest, but may be adversely impacting wild stocks. It is thought that release of tens of millions of hatchery fish into the Columbia River system may result in (1) hatchery fish out-competing wild fish for space and food, (2) hatchery fish infecting wild fish with disease; and, (3) overharvest of the smaller runs of wild fish in fisheries targeted at the large numbers of hatchery fish. If this is true, current efforts can be focused to address these issues and the specific problems of wild fish stocks that will require very specific solutions.

The Snake River sockeye run provides a good example of why specific impacts must be taken into account and why specific solutions are needed. NMFS is currently reviewing the status of these fish and PNUCC supports that process. A preliminary review by PNUCC of the scientific information indicates that while the sockeye run is depressed, it is not in danger of extinction. This is because the Redfish Lake, Idaho sockeye and the Redfish Lake kokanee constitute a single population. (Kokanee and sockeye are the same species, *Oncorhynchus nerka*. Sockeye are the anadromous form of the species and kokanee can go to sea and become sockeye.) The Redfish Lake kokanee population appears to be in no danger and evidence indicates these fish are supplying sockeye for the Snake River run. If desired, these kokanee could be used to increase that sockeye run.

Several circumstances appear to be impacting these fish. First, current harvest management in the Columbia River ignores the escapement needs of the Snake River sockeye, since the harvest level is based on the total Columbia River sockeye run, which includes a sizeable run destined for the Wenatchee and Okanogan rivers. Second, sockeye habitat in the Snake River drainage was severely reduced when Idaho Department of Fish and Game poisoned-out sockeye from Yellowbelly, Petit, and Stanley lakes in the early 1960s and converted them to trout lakes. Barrier dams were placed at the entrance to these lakes to assure that sockeye did not enter and become reestablished. Third, irrigation withdrawals prevent sockeye from entering Alturus Lake, which could be used by the sockeye. And, fourth, Water Budget flows are used to move hatchery fish between the hydropower projects instead of assisting the Snake River wild sockeye, which migrate later in the year.

Several measures could be taken to increase the size of the sockeye run: (1) change harvest levels or practices to allow more adult Snake River sockeye to return and spawn; (2) allow sockeye to reestablish in the trout lakes; (3) limit irrigation withdrawals to allow sockeye access to Alturus Lake; and, (4) target Water Budget flows to move the wild sockeye instead of hatchery fish.

Of course, we need to allow the NMFS' process and its in-depth scientific review to ascertain the status of the fish runs and the adverse impacts for all the petitioned species. I am not suggesting that we jump ahead of this process. The point is, if stock declines and specific problems are identified, these can be resolved, but all who contribute to the problem must participate in the solution.

With that in mind, I'd like to point out that the status of the petitioned species and additional water flows for fish in the Columbia and Snake rivers are separable issues. Providing more flows is a generic approach that does not selectively help any particular species of fish. Any strategy to help wild fish that focuses solely on increasing fish passage at the hydroelectric dams is not likely to be effective because it does not address problems specific to the wild stocks. The impacts to these fish are specific and the solutions to the problems must also be specific. Flows have been discussed for over a decade. We have sizably derated the firm power generating capability of the hydroelectric system to increase spring flows for fish. If the fisheries agencies are still dissatisfied with the flow levels, this issue needs to be resolved, but not in the context of endangered species.

PNUCC would like to see the following occur during the endangered species process:

1. A thorough and credible scientific review of the status of the petitioned salmon species. It is important for NMFS to have the funding and staff available to do the work that needs to be done. It is equally important that the scientific review be an open and public process where all interested parties are allowed to contribute their views directly and to participate.

2. A thoughtful and complete book at the causes of selected species declines. Additional information on all the adverse impacts to these fish is needed.

3. Investigation of measures to better protect and enhance the wild species that can be implemented within the existing fisheries management system.

PNUCC urges the Northwest Delegation to take a leadership role in assuring that the NMFS process is allowed to work and, especially, that all the scientific information is on the table before any decisions are made. We ask for your assistance in insuring that NMFS has Congressional support, funding, and staff to maintain the open and public process it has assured us will be provided. NMFS has organized both technical and peer review committees, which will

allow for direct participation by interested parties in the status review. This is an innovative and open procedure, and one that we believe will lead to a better conclusion. It is important that we all give NMFS our support during this status review process.

TESTIMONY OF DALE C. PEARSON, OREGON TROUT, INC.

On May 30, 1990, Oregon Trout, Oregon Natural Resources Council, Northwest Environmental Defense Center, American Rivers Council and the Idaho and Oregon chapters of the American Fisheries Society announced the submission of petitions, pursuant to the Endangered Species Act of 1972, to the National Marine Fisheries Service of the United States Department of Commerce. These petitions are for four runs of Columbia River salmon; the lower Columbia River coho and the spring, summer and fall Snake River chinook. These petitions were received by the National Marine Fisheries Service on June 7th, 1990.

The decision to petition for status determination was made after considerable thought and careful study indicated that these runs have declined to such low levels that they may warrant listing. The decline in indigenous, naturally-spawning populations of these salmon indicate that less then one adult fish returns to spawn for each parent spawner and that these populations are at precariously low levels. This decision was not made lightly. Evidence reveals a long-term and steep decline for these fish since the 1970's. Various recovery actions and the expenditure of millions of dollars have failed to restore these salmon and the cultural and economic benefits they provide. It is clear and should be of no surprise to anyone that extraordinary action is required to save these fish from their plunge toward extinction.

A Broad Based Recovery Plan Is Needed

A broad based and integrated recovery plan is essential if these salmon are to be returned to a strong and healthy condition. We believe that solving just one or two of the problems facing the salmon will not lead to a sustainable recovery. It is vital that all agencies, companies, individuals and institutions that have responsibility or authority over the use of the river use their ingenuity and talents to address solutions to the continuing decline of our salmon rather than to create roadblocks and battle-lines. We believe it is possible to bring back our salmon from the brink of extinction without draconian impacts on river users if we emphasize cooperation and creative problem-solving over conflict and factionalization throughout the listing process. We have every indication that such cooperation is occurring.

The Snake River chinook were first reviewed for ESA listing in the 1970's. That review was suspended because it was hoped and believed that the passage of the Northwest Power Act in 1980 would provide the recovery measures and funding necessary to restore these salmon. The actions of the Power Planning Council pursuant to this act have not resulted in the recovery of either the Snake River chinook nor the lower Columbia River coho. Since the passage of the Power Act and the resultant expenditure of nearly one billion dollars, two Snake River salmon runs have gone extinct and twenty two others are considered in jeopardy.

Salmon are a managed resource with important cultural and economic values for the Northwest. Since the development of the Columbia River began, over 250 salmon and steelhead populations have gone extinct. This is an incredible reduction in the productive capacity of the river and a severe loss to society. Historically, the Columbia River sustained runs of over eleven million, and perhaps as great as sixteen million salmon and steelhead annually. Today these runs have diminished to just 2.5 million fish annually. Wild fish are only a fifth of that. Clearly the region is faced with an ecological crisis of major proportions that has gone largely unheralded.

The petitioning groups have one interest foremost in mind. We hope that this action will result in the recovery of these salmon runs so that we all can celebrate their return to a strong and healthy condition. The health of our salmon resource is a measure of our ability, as one of many species inhabiting this planet, to maintain a rich and diverse habitat for ourselves and our children.

The condition of the salmon of the Columbia River is raising a very disturbing question. If the lands and waters of the Northwest, their ancestral home, are no longer fit to sustain the salmon, how bright and interesting can our own future be?

Oregon Trout Petitions

On May 30, 1990, Oregon Trout filed petitions with the National Marine Fisheries Service (NMFS) requesting determination of status under the Endangered Species Act of 1972 (ESA) for four runs of Columbia River salmon. Joining them in the petitions are the Oregon and Idaho Chapters of the American Fisheries Society (AFS), the Oregon Natural Resources Council and the Northwest Environmental Defence Center. The runs specified are the lower Columbia River coho and the spring, summer and fall runs of Snake River chinook.

This dramatic announcement, made at a press conference today, has the potential to monopolize the news of the Northwest over the coming months. Few residents are untouched by the plight of the salmon. Many rely on them for food and livelihood, while others will feel their livelihood threatened by listing. No one can remain insensitive to the drama and pathos of the annual spawning runs of this noble creature; finding their way mysteriously across vast distances of ocean to their native streams, defying a myriad of natural and manmade obstacles, only to die on the very spawning beds where they have buried the eggs that are the future of their race. They are an irreplaceable part of our Northwest heritage.

The idea that some Columbia River salmon runs may be eligible for listing is not a new one. In 1894, the Federal Government undertook studies because of the declining commercial harvest. More recently, in 1973, status reviews were begun but, because of the high hopes for the NW Power Act, they were discontinued in 1980 with the passage of that Act.

Why List Now?

Oregon Trout believes that there is no assurance that the Northwest Power Planning Council (NWPPC) will bring the Columbia River salmon back from the brink of extinction. We must reinstate the ESA process. The compelling reasons are:

1. The native salmon runs are in desperate trouble and clearly in a downward trend.

2. All other remedies of the past 25 years have failed to improve the condition of the runs.

3. The rehabilitation plan of the NWPPC holds little promise for the recovery of the native salmon runs.

4. There is no realistic alternative that can force the responsible institutions to rapidly develop and implement the needed recovery plan.

5. There is time to develop a recovery plan without draconian impacts on fisheries and other water users—but time is running out.

6. Federal power and water managers are relentlessly foreclosing options and limiting the flexibility of the regional system to accommodate the needs of the salmon.

7. Major hatchery programs have masked the precarious conditions of the natural stocks and lulled the public into a false sense of security.

We are at the crossroads. The manner in which we handle the deteriorating situation of the native Columbia River salmon will determine the very nature of our Northwest ecosystem.

The Columbia River Basin

One hundred years ago, the Columbia River Basin was one of the world's most productive ecosystems. In the past century, the system has been markedly altered by developments of hydropower, agriculture, forestry, and mining; transforming the once mighty Columbia into a series of slow water reservoirs.

Wild adult salmon runs approached 16 million fish annually. At present, adult salmon production on the Columbia is about 2.5 million fish annually, one fifth of its historical value and predominantly composed of hatchery fish. Wild stocks are about one fiftieth, or 2%, of pre-development levels.

The Columbia River is an example of technology gone mad. The ecosystem has been dramatically changed not only by economic development but also by a technology—hatcheries—designed to buffer the darker side of economic development. Hatcheries, unfortunately, have become a narcotic to pacify society, to block society's awareness of what is really going on in the Columbia Basin. How did we arrive at this unhappy state of affairs? A quick review of history is in order.

A Columbia River Chronology

1850—Pre-development run sizes of 10 to 16 million wild salmon and steelhead annually.

1859—The first Columbia Basin irrigation project.

1878—The first hatchery starts up on the Clackamas River.

1880—Payette River sockeye are commercially extinct.

1894—Investigations begun by US Government due to "an alarming decrease in the salmon catch of the Columbia River in recent years."

1918—Willamette River closed to commercial fishing.

1928—Peak chum harvest of 700,000 fish.

1933—Rock Island Dam completed (with fish passage problems).

1938—Bonneville Dam completed. The Chief of the Army Corps of Engineers is alleged to state, "We will not play nursemaid to the fish!"

1941—Grand Coulee Dam completed without fish passage and 1100 miles of habitat are lost.

1957 to 1967—Pelton, Brownlee, Oxbow and Hell's Canyon dams completed without fish passage. Massive habitat loses result.

1973—First review of upper river salmon and steelhead under the ESA begins.

1974—Dworshak Dam completed without fish passage. More habitat is lost.

1975—Chum harvest is down to 500 fish.

1977—Run declines are documented: summer chinook, 75%; spring chinook, 50%; Snake River fall chinook, 90%. Smolt losses through eight dams is estimated at 95%.

1980—NW Power Act is passed and endangered status review is suspended. It is believed that the Act will be effective in recovering the runs.

1982—Annual hatchery smolt releases number 161 million, yet runs are described as declining.

1987—The NWPPC declares the Snake River coho to be extinct and lists 22 other Snake River stocks as being in jeopardy. Oregon Trout estimates that 31% of the stream miles, or 4,600 total miles, and 55% of the watershed has been lost.

1989—Only two Snake River sockeye salmon cross Lower Granite Dam on their way to Red Fish Lake in Idaho. Bill Bakke of Oregon Trout states, "The extinction of this salmon run represents a stunning failure by state, federal and tribal fish management agencies to protect salmon runs."

January 28, 1990—The Oregon Trout board of directors directs that NMFS be petitioned for status determination for several salmon runs under the ESA. Oregon Trout begins petition preparation.

February 21, 1990—In a letter to Randy Fisher, Director, Oregon Department of Fish and Wildlife, and nineteen agencies and tribes, Oregon Trout advises of its intent to petition. The letter states, in part, "We view petitioning under the ESA as an extreme, last chance opportunity to restore populations that are threatened with extinction. Management has failed to provide the stewardship necessary to perpetuate the health of these populations. Because we have failed to provide good management, we are delivered to the extreme measures represented by the ESA."

March 19, 1990—The Idaho Chapter of the AFS endorses the Oregon Trout petition.

March 30, 1990—The Shoshone-Bannock Tribes petition for listing of the Snake River sockeye.

April 14, 1990—Senator Mark Hatfield requests immediate assessment of the four salmon runs that have been petitioned for ESA status by Oregon Trout. The issue "has the possibility of becoming another spotted owl." Hatfield says.

May 18, 1990—The Oregon Chapter of the AFS endorses the Oregon Trout petition.

May 30, 1990—Oregon Trout and co-petitioners hold a press conference to announce their petitions for listing of the spring, summer and fall Snake River chinook and the lower Columbia River coho.

What Happens Next?

Once a petition is submitted, NMFS has 90 days to determine if there is sufficient scientific or commerical data to warrant listing. If there is, a status review is conducted, and a decision made to list or not, within twelve months of submission.

Listing implications.—Federal actions must not be likely to jeopardize the species or its critical habitat.

Federal agencies must use their authorities in furtherance of the conservation of listed species.

A recovery plan must be developed and implemented.

Protection of a listed species can not be a cost-effectiveness issue.

Limited exemptions are possible through cabinet level review.

No "taking" of an endangered species.

The Federal Government "shall cooperate to the maximum extent practicable" with the states.

The Federal Government can enter into cooperative agreements to assist the states and financial assistance of 75% to 90% is authorized.

The Recovery Plan

The determination of a specific status for any Columbia River salmon run is not our main goal. Listing does nothing, per se, to reverse the sad march to extinction. Oregon Trout's goal is to compel the creation and execution of a recovery plan as provided for by the ESA. This plan must be broad based and involve good faith efforts from all who rely on and enjoy the bounty of the river.

The plan must address flows, screening and bypass, harvest, habitat degradation, genetic conservation and hatchery practices. Power generation, irrigation, recreational and commercial fishing, timber, mining, and hatchery interests must put the old ways to rest and all work together. No single group should bear the brunt of recovery. No single approach holds all the answers. Tribes, state and federal agencies, special and private interests must work together constructively if our salmon are to have a future.

Flows.—The most critical period of a young salmon's life is that time when it migrates to the sea. Salmon undergo a process at that time that changes them physiologically from a fresh water to a salt water creature. The time required to complete this transformation is closely tied, through centuries of evolution, to the time required for the salmon to complete their journey. They must not complete this change before reaching salt water or they'll die.

The Columbia River has undergone a rapid change into a series of slow water reservoirs. The resultant loss of flows slows the seaward journey of the salmon and results in excessively high mortality. Adequate flows must be provided by water and power managers if the up-river runs are to avoid extinction. Only through an ESA recovery plan can the agencies in control of water flows and main-stem dam operations be compelled to make the changes necessary to save the fish.

Screening and bypass.—Juvenile mortality of out-migrating salmon at each unscreened dam is estimated at 15%, principally due to fish passing through the turines. Half of this loss is from the physical damage of the spinning blades. The other half is due to the predation of gulls and squawfish on the disoriented and injured fish that have just passed through the turbines. Slow water conditions above the dams additionally give predators an unnatural advantage.

Effective screening and bypass facilities are essential to enable the salmon to avoid the turbines. Adequate flows are necessary to restore natural predator/prey relationships and insure effective operation of the screening equipment.

Harvest.—The over-harvest of native salmon in mixed-stock fisheries is a well-known factor in the decline of the wild salmon. Continued harvest of substantial numbers of lower river coho in the attempt to harvest excessive hatchery output of that species, or imprudent harvests of upriver chinook to utilize the heavy output of the Willamette River chinook hatcheries are a blueprint for disaster. We must devise and embrace innovative changes in techniques and seasons to ease this situation.

Habitat degradation.—The loss of the productive capacity of the salmon's habitat is a major factor in their decline. Vast areas of spawning and rearing habitat have been closed to the salmon by dams without fish passage. The loss of productive habitat through mining, logging and irrigation activities is staggering. The public's perception of this problem is masked by their support and involvement in stream restoration work.

Stream restoration, like hatcheries, has become a narcotic that blocks our awareness of the real problem, the continued loss of productive habitat. Recent research on the North Umpqua River indicates that man-made habitat improvements are not very cost-effective and could only enhance production by about 2%. Habitat productivity is dependent on the depth, velocity, quality and temperature of the water. When these are degraded through watershed and riparian destruction, recovery periods in excess of 20 years are required to restore their former productivity. A recovery plan based solely on restoration is doomed to failure. We can't keep up with the losses. Development and exploitation can only be permitted if the health of the stream is adequately protected.

Gene conservation.—According to Dr. Bill Liss of Oregon State University, the salmon species is a system of continuously evolving stocks, and those stocks are a system of continuously developing life history patterns. The persistence, distribution and abundance of the salmon depends upon a diversity of stocks adapted to a multitude of stock habitats.

The fish agencies have tried to replace a diversity of natural stocks with a few hatchery stocks that do not survive well in nature. Hatchery salmon, when they spawn with wild salmon, disorganize and destabilize them. Scientific research proves that wild stocks are 9 times more effective in producing the next adult generation as are hatchery fish spawning naturally.

The conservation and rehabilitation of endangered salmon runs under the ESA depends on maintaining stock diversity. We must keep the stocks we now have in good health, and we must protect the habitats to which they are adapted.

Hatcheries—Not the Answer!

Emphasis on hatchery production has failed to compensate for continuing losses. Downward trends in hatchery efficiency are raising fears about their long-term viability. Mounting evidence suggests that survival rates for hatchery fish are very poor in relation to wild fish. So poor, in fact, that questions are being raised as to whether the minimal net gains are justified in light of skyrocketing costs. In addition, current hatchery practices have inflicted severe damage on wild stocks through reduction of genetic fitness and increased competition.

All our efforts to nurture and protect young hatchery salmonids cannot protect them from that age-old nemesis of all wards of the state—the budget ax. It can't happen here??? Between 1929 and the early 1940's, all but three of the federal government's 18 hatcheries were closed, replaced or turned over for state operation. Virtually all hatcheries in Alaska, Canada and California were closed. Dare we trust the future of our salmon runs to Gramm/Rudman and the environmental conscience of Manual Lujan?

Increased hatchery production is not the answer to the declining native populations of salmon in the Columbia River Basin. Dramatic changes are required in hatchery practices merely to erase their negative effects on wild stocks. While hatcheries will

remain an important factor in Columbia River fish production, substantial improvements are required if they are to play a constructive role in recovery.

Northwest Power Planning Council

The NWPPC has instituted the largest biological rehabilitation plan ever undertaken. Their short-term goal is to double salmonid production in the Basin. A billion dollars or more will be poured into this effort. Will this plan restore our native salmon runs?

The Council got off to a good start, with innovative actions on "protected areas" and "water budgets." In implementation, however, they are falling far short of their laudable goal of giving priority to the enhancement of the native runs. Rather than protecting existing habitat, the emphasis is now on habitat restoration. Rather than encouraging recovery of will stocks, the emphasis is now on hatchery effectiveness and disease control, and fish bypass and transportation. The major focus is on an engineering/technology fix, not a biological one. Therein lie the seeds of its failure.

The condition of our wild salmon populations is a barometer of our stewardship of the Columbia River Basin. Wild salmon are the canary in the mine shaft. If they are allowed to be snuffed out then we have gone too far.

The deterioration of our Columbia River salmon runs raises an important question for the future of mankind in the Northwest: If the salmon can not survive here, in their ancestral home, how bright and interesting can our own future be?

TESTIMONY OF GORDON REEVES, AMERICAN FISHERIES SOCIETY, OREGON CHAPTER

My name is Dr. Gordon Reeves and I am the current president of the Oregon Chapter of the American Fisheries Society (AFS). AFS is one of the oldest professional societies in North America. There are 430 fishery biologists and aquatic resource professionals in the Oregon Chapter.

Oregon Chapter has joined in a petition to the National Marine Fisheries Service to review the status of several stocks of salmon in the Columbia River basin for possible listing under the Endangered Species Act. Our decision to co-sign this petition reflects a deep concern of many scientists and resource professionals about the future of Pacific salmon in the Columbia.

The decline of native salmon runs in the Columbia basin is a local manifestation of what scientists have termed a planetary environmental crisis that is evidenced by rates of species extinction unprecedented within the last 65 million years (Wilson 1988). Although recent attention has focused on losses of terrestrial species, Dr. Peter Moyle of the University of California at Davis suggests that fish are the group of vertebrate animals that are being lost most rapidly worldwide.

In the past 100 years, 40 known taxa or groups of North American fishes have become extinct through changes caused by human development, and rates of extinction are expected to increase (Miller et al. 1989). AFS currently lists 364 North American freshwater taxa as threatened, endangered, or in need of special concern (Williams et al. 1989). This includes 139 new taxa that recently were added to the list since it was first published a decade ago (Deacon el al. 1979). Anadromous salmon and trout were not considered in this listing. Only 26 taxa were removed from the original list, and 10 of these deletions were the result of extinction. Significantly, none of these taxa warranted removal because of successful recovery efforts. Twenty-five of the taxa on the AFS list occur in Oregon. More than half of these occur exclusively in Oregon.

In addition to the threat to freshwater fishes, there has been a serious loss of diversity and decline in abundance of many naturally spawning populations of native Pacific salmon in Oregon (Mullen 1981; ODFW 1982; NPPC 1986; ODFW and WDF 1989; Nehlsen, et al. 1990). Because anadromous salmonids tend to return from the ocean to their natal streams to spawn, species are composed of numerous breeding populations or stocks that have adapted through time to local environmental conditions. The ability of a species to survive environmental change throughout its geographic range is dependent upon a diversity of healthy, locally-adapted stocks. Stock diversity therefore is critical to the long-term viability of Pacific salmon and steelhead.

The problem of stock diversity in Oregon is perhaps best illustrated in the Columbia basin, where many native populations have declined to very low levels of abundance. One recent estimate suggests naturally reproducing salmon and steelhead run sizes in the Columbia basin may be as low as 2 percent of predevelopment levels (Francis 1990). The four groups of salmon listed in the petition to the National Marine Fisheries Service have shown significant decreases over the past several decades. Coho salmon spawning ground surveys conducted on 10 Oregon streams in the lower Columbia River have declined from approximately 23 fish/mile in the 1960s, to less than 1 fish/mile in more recent years. Counts of spring chinook spawning redds in 11 Salmon River streams show a similar downward trend from 4100 redds in the 1960s to only 525 redds in the 1980s. Summer chinook redd counts for 7 Idaho streams have declined from an average of 2,390 redds in the 1960s to 535 in the 1980s. Fall chinook passing the uppermost dams of the Snake River have numbered a thousand or less since 1974 (ODFW and WDF 1989).

Extinctions of fish species or stocks are rarely the result of single causes. Restoration of depressed stocks in the Columbia River will likely require multiple corrective actions aimed at multiple causes of decline. In the Columbia basin, chinook salmon, for example, have lost about a third of their historical habitat from hydropower development, irrigation, logging, mining, and other causes (NPPC 1986). Direct mortalities of fish also result from inadequate passage and altered flows from numerous dams on the Columbia and Snake rivers. While production of fish from hatcheries has compensated for some of the impacts of losses on fisheries in certain areas, many wild stocks continue to decline in mixed stock fisheries that are regulated to harvest more abundant hatchery fish. Since 1969, harvest rates for stocks of lower Columbia River coho, for example, have commonly ranged between 85% and 94% (ODFW and NMFS 1990). There is cause for concern whether severely depressed native stocks can continue to sustain themselves at such high rates of harvest. Increasing hatchery production in the Columbia basin is not a substitute for the many values of wild stocks.

In conclusion, abundance and diversity of native stocks of salmon and steelhead in the Columbia River basin have been reduced to a fraction of predevelopment levels. This decline is an indicator of a general decline in the health and integrity of the Columbia River ecosystem. Traditional, single species approaches to management may not be sufficient to solve these problems. Integrated management of the entire Columbia basin and maintenance of diverse, naturally spawning populations are needed to sustain a healthy Columbia River with healthy runs of salmon. It is our hope that a review of the status of several depressed runs of native salmon in the Columbia River basin will help to prevent an accelerating decline in the diversity and health of aquatic resources in Oregon.

Thank you for the opportunity to comment.

TESTIMONY OF ANDY KERR, OREGON NATURAL RESOURCES COUNCIL

Salmon are an indicator of environmental health. The salmon runs of the Columbia Basin are very sick. In addition to overall declines, the vast majority of the remaining fish are hatchery stock—inferior to wild,

real salmon and dependent upon expenditures from the federal treasury.

No one factor is to blame for the decline. Too many salmon are being caught. Too much water is being taken out of the stream for irrigation. Too much hydroelectric power is being produced. Too much logging, grazing and mining are destroying spawning habitat.

We must save the Northwest's salmon runs. It will not be without some costs to ourselves. But the costs will be immeasurably greater if we allow the salmon to slip into extinction.

The salmon runs are a critical indicator of the quality of life of the Pacific Northwest. At the top of the aquatic food chain, the salmon reflects the condition of our streams, which reflects the condition of our environment, which reflects our own condition.

There will be short-term economic effects of listing these salmon runs under the Endangered Species Act. To save the salmon we will have to produce a bit less hydroelectricity, catch a few less fish, use a little less irrigation water, log graze and mine a bit less.

We northwesterners use about twice as much electricity per capita as the national average and pay about one-half the going rate for it.

We let too much irrigation water evaporate in the hot summer air before it touches a crop.

We log off our forested streamsides for short-term greed, even though they are more valuable in the long term as perennial producers of salmon than as sporadic producers of wood products.

We subsidize ranchers who run their cows on the public's land, ruining the public's streams and the public's fish runs.

We must become less wasteful. In the long run, increased efficiency will improve our economy. The Pacific Northwest's comparative economic advantage is not government subsidies to business; nor is it cheap electrical power. The true competitive advantage of the Pacific Northwest economy is our quality of life, which is to a large part dependent on the quality of our environment—a natural resources that is potentially infinite. By restoring the salmon runs we will do much to restore the quality of our environment and do much to improve the economic well-being of the Pacific Northwest.

When I was a boy, the salmon ran up and down the river. A few years ago, the US Army Corps of Engineers began trucking fish around the dams. Now they have switched to barges. While I'm glad that our salmon are now off our highways and back on the river, ONRC won't rest until salmon are back in the river.

Working together, we can come up with acceptable solutions, if we keep the common goal of conservation of the species in mind at all times. Solutions will involve compromise from power, irrigation, navigation, logging, grazing, mining and other interests whose pursuit of self-interest have put the salmon into this sorry state. But there can be no compromise from the side of the salmon. Many runs have already been lost and many more runs have been so compromised that they now face extinction.

I am wary of plans for new initiatives whose goal is not to recover the salmon, but to avoid listing under the Endangered Species Act. The salmon can not afford more committees, commissions, task forces or studies. That was the response in the past when the plight of the salmon was raised.

The Northwest Power Act of 1980 was supposed to balance the production of fish and electricity and to get the overlapping and often conflicting jurisdictions to work more in concert on behalf of both. While the Pacific Northwest Power Planning Council has done much good, it has not done much for wild salmon. Perhaps the money, power and politics of the region prevents any body or anybody from protecting the salmon. Federal listing will break the deadlock and establish endangered salmon as the clear priority.

ONRC will not look favorably on new cooperative or inter-agency efforts if their motivation or likely result is to avoid or delay listing, rather than recover the species from the edge of extinction. Pledges to cooperate are easily made—witness the many pledges that have been made, and broken, before. We fear that these new pledges are being made more from fear of the Endangered Species Act than from concern for salmon.

The Endangered Species Act is very powerful—and rightly so. For when a species makes the list, it is at the brink of extinction and all the power of the federal government should be used, if necessary, to bring it back from the precipice.

If the salmon are listed under the Endangered Species Act, the federal government's actions regarding the Columbia River would have a new and clear priority. Priority does not mean exclusivity. The other uses would still be considered. But it is not a question of balance. Fish were supposed to have been balanced all along. It hasn't worked.

If society deems it too expensive to society to prioritize fish until the balance is restored, the solution is not to avoid listing the salmon under the Endangered Species Act. As a built-in pressure relief value built into the Act, referred to as the "God Squad," any federal activity can be exempted from provisions from the Act.

As many have pointed out, we can learn much from the spotted owl experience and hopefully avoid many of the difficulties that process has brought us.

Let us avoid the demagoguery we have seen with the listing of the spotted owl.

Let us avoid denial that the salmon are in trouble and get on to reversing that fact.

Let us not misread or mischaracterize economic change for economic decline or disaster.

Let us avoid the one-sided economics which recognizes only the cost of species protection, ignoring both the benefits of conservation and the costs of extinction.

As we look to the various sectors of the economy to give a bit so the salmon may survive, we should take special notice of the aluminum industry. That industry consumes approximately 20 percent of all the electricity in the region. It produces less than 10,000 jobs, a mere one-quarter of one percent of the approximately 4,0000,000 jobs in the Pacific Northwest. Its electricity is provided at a subsidized rate through a socialistic program funded by the ratepayers.

The Northwest Power Planning Council is contemplating acquiring new electric resources at up to four times the costs that ratepayers are now paying. We throw away enough aluminum every year in this country to rebuild the entire commercial air fleet four times. Recycling an aluminum can requires 90 percent less energy than making a virgin one. Very little aluminum recycling takes place in this region.

Downsizing the aluminum industry in the region may be one of the most positive economic and environmental actions that we could take. Massive savings of electricity could be split between new economic growth and fish and wildlife. This energy is cheaper than conservation, cheaper than renewable power resources and cheaper than nuclear or other environmentally destructive forms of thermal power.

The alternative to listing the salmon under the Endangered Species Act is extinction. If we are to save the salmon, we all must be willing to sacrifice a bit of the quantity of our consumption to regain some of the quality of our life. The wild salmon runs are sacred to most Northwesterners, even if their ancestors were born on other continents. They are a legacy that we must pass on to our children.

TESTIMONY OF BOB WOODELL, EXECUTIVE DIRECTOR, PORT OF PORTLAND

Good morning, Senator Packwood, and welcome to the Port of Portland. Thank you for giving me the opportunity to participate in the discussion related to the petitions that recently were filed with the National Marine Fisheries Service to list certain Columbia and Snake River salmon species under the Endangered Species Act.

For the record, I am Bob Woodell, Executive Director of the Port of Portland. For nearly 100 years, the port of Portland has been an economic development public agency. Its first assignment was rather straight forward in scope, but very important to this community. It was to dredge a navigational channel to the sea, thus assuring the growth of this region as a transportation and trade center.

Through the generations, the Port's responsibilities have expanded to include airports, shipyards, marine terminals, and real estate. But certainly, the roots of this organization are planted in the area of maritime. Trade is the foundation of this region's economy. It is the foundation and the purpose for Portland's existence. As a matter of fact, the most recent economic impact study indicates that the economic benefit from marine activities alone amounts to more than $1 billion a year.

Because of our intimate involvement in this important segment of our community, we have a vital interest in what's happening to the Columbia/Snake system. Over the years, we have worked hard to develop the river as a major transportation system because of the many benefits it provides this community. At the same time, we have worked and worried about the health and stability of this natural resource.

For example, back in the 1970s, when we were fighting to keep the ship repair industry alive in Portland in order to save thousands of jobs, we recognized that we needed to develop a process to deal with some major pollution concerns. The biggest was the discharge of ballast water from the oil tankers. To solve this, we developed a treatment plant that extracts the oily ballast, processes it, and returns only clean water back to the Willamette.

More recently, we responded to concerns relating to dock construction and its effects on the health of aquatic life on the Willamatte River. When there was a question about whether certain types of structures, such as docks, adversely affected migrating fish, the Port responded by working with the Oregon Department of Fish and Wildlife to develop a scientific study to measure the impact of a variety of structures.

To date, the Port has spent over $450,000 on the study, which will result in guidelines being developed for future structural development in the Willamette River that will minimize adverse affects or, in some cases, enhance aquatic life.

I give you those two examples as a way of pointing out that, for this region to continue to grow as an international center, we need to approach the river in a balanced fashion. We should not see the Columbia River from any single perspective. It fulfills many roles as a source of irrigation, recreation, transportation, power, and natural habitat. It is only common sense that to ensure continued growth of this region's trade possibilities, we need to ensure the environmental stability and integrity of this natural resource. We at the Port are committed to be an active partner toward that end.

There is no question that the Columbia has many diverse uses, not the least of which is the subject of your hearing today. The Port of Portland stands ready to support in any way we can the effort to gather scientific data on whether certain Columbia River salmon species are in danger of going extinct. I am not qualified to make the kinds of scientific evaluations that will be carried out by the National Marine Fisheries Service (NMFS) under the guidelines established by the Endangered Species Act. Those evaluations will have to be done by experts who are able to separate emotional arguments from scientific facts. It is our hope that NMFS will act quickly to assemble a panel of experts that can give us an unbiased evaluation of the wild salmon stocks.

Just as the spotted owl has served to focus attention on the forests of the Pacific Northwest, the recent filing to examine several species of salmon under the Endangered Species Act will focus the public's attention on the importance of the Columbia/Snake River system and its many uses.

If the spotted owl debate has taught us anything, it is that all factions must cooperate. The issue before us will have a tendency to stress the various interests related to the Columbia/Snake River system. I believe it should be the goal of all parties to resist narrow self-interest in order that this region can find a balanced approach to preserve the species as well as other economic interests that depend on the river.

In your hearings this week, you will be considering the opinions of many diverse groups. I believe it is essential that we all work together to find a method to ensure the continued survival of these species. The Port wants to work with all interested parties in developing plans that will protect wild fish stocks and minimize adverse economic impacts on this region. We think that the two items are not mutually exclusive, and that we can manage the river system both for economic and environmental benefits.

TESTIMONY OF CAPT. RUDY PESCHEL, U.S. COAST GUARD

I am Captain Rudy Peschel, Chief of Staff of the Thirteenth Coast Guard District, which consists of Oregon, Washington, Idaho and Montana. I am speaking on behalf of the District Commander, Rear Admiral Joseph E. Vorbach. Our offices are in Seattle.

The 465-mile Columbia/Snake River system is one of this nation's primary commercial and recreational waterways. Most of the Columbia River downstream from the dams is deep, with a controlled depth of 40 feet from the Pacific ocean to Portland at mile 105. Because of the river's shoals, banks, and turns, the U.S. Coast Guard maintains 265 federal aids to navigation from the entrance bar to greater Portland and 505 aids from Portland to the limit of the interstate waterway at Lewiston, Idaho. These federal aids range from large lighted buoys, ranges, and shore lights to simple daybeacons and unlighted buoys. These aids are necessary as the ship channels are directly adjacent to areas where the bottom rises sharply or where currents can rapidly push mariners into extremis. Anchorages in the river are charted. With the average draft of ocean going vessels at thirty-some-odd-feet, they can be vulnerable when current or changing tides cause them to swing on their anchors into passing traffic or shallow water.

In 1989, the Merchants Exchange of Portland counted 2166 ocean-going foreign and U.S. flag ships which called at ports within the system. 29.4 million tons of primarily bulk cargoes, including grain and lumber, were exported and 4.5 million tons of petroleum, iron and steel, alumina, cement, autos, and other products were imported. These tonnages exceeded all other major ports on the West Coast, including Puget Sound, San Francisco, and Los Angeles-Long Beach. One-third of the grain exported from the U.S. leaves by way of the Columbia. Over 121,000 twenty-foot equivalent container units were transported. Of significance is the fact that, unlike other West Coast ports, experts say there is considerable room for expansion of port facilities as the Pacific Rim trade continues to grow. The private sector states there are presently 25,000 acres among the various ports for sale or lease.

Tug and barge operations also play a significant role in the Columbia-Snake trade. Four major towboat companies move large quantities of bulk cargoes such as fertilizer, diesel fuel, gasoline, and caustic soda upriver while grain, wheat, and wood chips are moved down. Sand and gravel are moved within the system for the manufacture of concrete. Finally, a substantial container trade via barge traffic has been established with over 20,000 containers moved within the system last year.

Recreational boating and fishing activity has grown tremendously on the Columbia/Snake system over the last several years. We estimate there are 26,000 pleasure boaters presently using the river. In 1985, there was one boat for every 19 Oregonians. In 1989, there was a boat for every 16. The Hood River region on the Columbia has become a world-wide mecca for sailboarders and this segment of the boating public has recently seen an immense increase in activity.

Considering the commercial importance of the Columbia/Snake system and the environmental sensitivity and natural beauty of the region, the Coast Guard, the states of Oregon and Washington, and industry have conceived a number of projects and initiatives to enhance navigation safety and improve our pollution prevention and response posture. These include:

1. An improved communication system on the Columbia to eliminate "blind spots" and to facilitate the report of vessel collisions or fires.

2. A system of "announcing points" for larger commercial vessels, including tugs and tows, so vessel positions and intentions are better known and traffic becomes more compatible.

3. Examination of the need for improved oversight of pilots, possible closer regulation of tow boat towing equipment and methods, escort of tankers, and emergency means of tanker towing.

4. Reduction in the small boat congestion caused by the "Buoy 10" salmon fishery held annually at the mouth of the Columbia.

5. Better education of boaters and fishermen operating and anchoring in the ship channels and impeding large vessel traffic; and the education of windsurfers and jet skiers with regard to their operation in proximity to deep-draft vessels and tugs and tows.

6. Upgrade in contingency plans and the pollution response posture on the rivers. This has included a recent spill drill and activity to preposition more booms, skimmers, and other response equipment.

7. A continued high level of activity on the part of the Maritime Fire and Safety Association to improve the responsiveness of industry and government agencies to a major ship fire on the Columbia.

These projects and initiatives are in various stages of development and are excellent examples of what can be achieved through the cooperative efforts of industry, the states, and the federal government.

Thank you for the opportunity to comment on behalf of the U.S. Coast Guard.

TESTIMONY OF PETER J. BRIX, CHAIRMAN, BRIX MARITIME CORP.

Good morning. I am Peter J. Brix, Chairman and owner of Brix Maritime Corporation, of Portland. I want to thank you for the opportunity to testify this morning on the issue of the potential economic impact of a finding that certain Columbia River fish species are threatened or endangered. My comments will address the potential impact from implementing a recovery plan which results in changes in the manner in which river levels are managed.

From what I understand about the operation of the Endangered Species Act, no one in the room today, and no one from whom you will hear over the several days of hearings on this issue, has a clear picture of what will happen if a recovery plan for species regeneration is implemented. As a result, Senator, you probably will not hear testimony focusing clearly and precisely on the impact of this future decision. Precise forecasts cannot be made, exact dollar losses cannot be calculated, and only estimates of the economic ripples across our regional economy can be offered at this time. I hope this encourages moderate and thoughtful discussions, free from some of the harsher rhetoric that has marked public debate on the spotted owl in recent months. At the same time, however, the great uncertainties lying ahead for all those who may be impacted from an endangered fish recovery plan create public uneasiness—an edginess resulting from the lack of specifics and clarity. Unfortunately, this makes it easier for manipulation by extremists from either side. I hope that respected data—both scientific and economic—can be put before the public as soon as it can be developed.

After this digression, let me thank you for holding these field hearings up and down the Columbia River this week. From all I have seen and read about the issue of the spotted owl, the public policy debate on that issue would have been much advanced if a similar approach had been used early in debate over that issue. After you have gath-

ered and reviewed all this testimony from your field hearings, I ask you to consider inserting everyone's testimony into the CONGRESSIONAL RECORD, perhaps over a period of a few days. In this way, more of your constituents and other interested parties in the Northwest can have access to this broad information base. It will help us all address the many complexities of this issue.

I also want to salute your work several years ago in efforts to prevent a draconian system of inland waterway user fees from strangling our industry. You and Senator Hatfield worked hard to educate your Senate colleagues about the complexities of that issue. As you know, our fuel tax now is 11.1 cents a gallon, and will continue to climb. In addition, we thank you for your specific help on the issue of collection of diesel fuel taxes. It was another issue that threatened to disrupt our ability to provide the lowest cost transportation option for upriver shippers.

The River Is a Shared Resource

Before turning to specifics about our towboat and barge industry on the Columbia River, I want to offer a basic observation: our Columbia River is a shared resource. The men and women who work in our industry spend more time out on the river itself than any other witnesses from whom you will hear in any of your field hearings. We know the river, we respect it, and we recognize its many values for all users. The Columbia is the centerpiece of our region. To use the metaphor of a tree, the Columbia is the trunk, from which all the other branches and leaves grow and flower.

The river now serves many users. We in the river transportation business serve many communities and companies from the mouth of the river to points 475 miles inland on the Snake River. Towns and cities use the river to provide municipal and industrial water supplies. Utilities tap its flow for power to provide reasonably priced energy supplies which strengthen our Northwest economy. Those Oregonians old enough to recognize the name Vanport and recall the devastation caused by that flood appreciate the role Federal hydro projects play in flood control. Farms and ranches use river water for irrigation, and have changed the face and the economy of Eastern Oregon and Washington. Commercial and sport fishermen and women, Indian tribal fishing interests granted under various statutes and treaties, recreational boaters, sailboarders, swimmers and shoreside campers all depend on the river for their living and their recreation. Towns whose economies are tied to tourism, grain elevator operators, river port facilities—all are more groups who depend on the Columbia.

We who share this resource have benefitted to date because no single use for the river was dominant. Certainly, the declining fish stock of certain species is cause for concern, but I worry that the equilibrium now existing will be upset if a single dominant use pushes to the side the others whose uses have interwoven over time a web of interdependency. Let me make clear that I, and I think I can speak for my industry colleagues, support a plan for fish species regeneration, as long as it measured in scope so as not to create severe economic imbalances among other river users.

Towboat Industry

The Columbia River towboat and barge industry has been a integral part of life on and along the river for more than a century. Our industry has grown and prospered as the river has increased as an avenue of commerce. As you know, Senator, the main entrance to the Columbia County Courthouse in St. Helens faces the river—recognition when the courthouse was built of the importance of the river to the county. In today's interdependent economic world, the reach of the river extends far from its shoreline, as transportation, irrigation and population growth all have expanded the geographic area dependent on the river.

Our company began as Knappton Towboat in 1910, operating in the lower river providing towing and barge services and helping communities prosper along the river banks. My competitors also have long histories of service in the Columbia and Willamette Rivers. Tidewater, Western, Shaver, Bernhert and Brix Maritime are the five major towboat and barge companies serving customers along the Columbia River and its tributaries. Together, I estimate that we have 80 towboats and 225 barges, and we employ some 650 people on the water and in our offices. My company, for example, provides barging for grain, oil, logs, construction and other equipment, pulp and paper, wood chips, containers and sand and gravel. We also tow logs and provide ship assist services in the harbors. In addition, my competitors and I provide longer haul services, moving Oregon and Washington products for delivery in Puget Sound, Alaska, California, Hawaii, and elsewhere.

After Federal hydropower projects expanded slackwater navigation farther and farther upriver, we now can serve the Port of Lewiston, Idaho—which was only a dream to our grandfathers. Of course, the Port of Lewiston is not as far from an ocean as the Port of Tulsa. In both cases, a multipurpose Federal investment has enabled American products to compete in a global market by providing a low-cost transportation alternative that helps increase US exports.

The Petitioner's Perspective

The petitioners filing these fish petitions certainly will claim that there has been a price for this economic development, and will offer evidence of reduced fish totals as evidence. All of us who make our living on the river—and people from the other groups who use the river—and those others in the Northwest who value the river are concerned by the decline in the number of fish in these petitioned species. We do not want the concerns of these petitioners to be ignored or minimized. What we caution against is a recovery plan that creates severe economic dislocation to these many other users of the river.

Everything we can say about the problems we may face is hypothetical, for we do not yet have to use as a benchmark a "Jack Ward Thomas Report for Threatened or Endangered Fish of the Columbia River". I presume that a recovery plan will shift more attention to spilling water to increase the survivability of upriver migration of the species for which petitions have been filed. We are concerned about the impact of such an approach on our ability to serve our customers.

Northwest Export Products

At your hearing in Eastern Oregon, you will hear from some of our industry's customers—whose agricultural products need the lowest priced method to move their bulk cargoes down river to ocean terminals on the lower river. Once there, these Northwest products enter world commerce. These products are subject to intense global competition, as you know as a former Chairman of the Senate Finance Committee. If our industry's ability to provide reliable and relatively inexpensive cargo transportation for our customers were interrupted, critical export markets would be lost. Senator, you know how difficult it was to regain those foreign markets lost to Northwest agricultural producers during the time of the high dollar in the early 1980's.

For the most part, our customers carry price sensitive cargo, not high value added products where cost increases due to uncertainties in river transportation can be passed on and absorbed by a buyer to whom a small cost increase doesn't detract from the high value and cost of the product he is receiving. In the case of Columbia River cargo, America's competitors in Canada, Argentina, and Australia are ready to take advantage of any disruption in our ability to provide reliable and price competitive transportation to our customers. Their products already compete with Northwest exports in third country markets.

Specific Examples

To a traveller viewing the river from the highway, it may be hard to imagine that the impact of uncertain river levels could be severe. To a casual observer, it looks like a series of slackwater pools behind the dams. We can point to a threatening experience last summer as an example of how fluctuating river levels can wreak havoc with our ability to serve some of our customers. Senator, you recall our industry problems at Schultz Bar, where the drought had caused low river levels and created a serious navigation hazard in the Snake River above Ice Harbor Dam in Goose River Reservoir below Lower Granite Dam. In fact, your staff was particularly helpful in our negotiations with the Corps of Engineers. Future low water levels for this pool might be imposed if water levels are set by what is best only for upriver fish migration. The short-term resolution we reached with the Corps—a promise to keep the water levels at a certain height during low flow periods—might be jeopardized. (I will add that the Corps plans to dredge this area during their window from December through March.) In fact, as the ESA is explained to me, if a similar problem arises in the future, the solid commitments to our industry by the Corps then could be overridden by other Federal officials enforcing the rigid demands of an ESA recovery plan.

My own company faced another situation in our log towing operating on Dworshak Lake behind Dworshak Dam. It is one of the upper-most dams in the river system, so that when water from this pool is spilled to assist fish migration, or to sell power, the impact is immediate and devastating. Last summer, BPA lowered the water level so much that our log towing season was severely curtailed in providing logs to a Potlatch mill below the dam. In addition, the small town of Orofino, Idaho, faced a terrible problem. The town depends on summer water-based tourism, but the marina docks were high on the mud for much of the summer, due to the low water levels. For this summer, the Corps has told community leaders in Orofino that water levels will be kept higher to avoid these devastating consequences. What happens to these assurances in future years if a fish recovery plan calls for greater spillage from such reservoirs? I think BPA could be overruled. Other communities along Columbia system reservoirs whose livelihood comes from water-based tourism could face similar ca-

tastrophes if water level reductions during the tourist season to help fish migration leave marinas and boat launches high and dry—or at least high and muddy.

Barging Juvenile Salmon Today

I also am proud that Brix Maritime has been a partner in current Federal efforts to replenish fish stocks on the Columbia River system. We now barge juvenile salmon from upriver hatcheries to below Bonneville Dam. Even with the various efforts made to protect the downstream migration of these young salmon past the various river dams, the survival rate for these fish is enhanced when we bypass all their hazards to deliver these young fish back into the river below Bonneville. In the past two years, we have transported something over 25 million young salmon! Perhaps that qualifies us for recognition in the mass transit sector.

Conclusion

To conclude, we hope that some creative thinking can avoid the worst scenarios that you will hear described over the next few days. If twelve species, or even five species, are listed, the impact from the most draconian recovery plans could cut a swatch across the Northwest and cripple many sectors of our economy.

Although some high value products might be able to pass on increased costs of doing business resulting from imposition of severe fish recovery plans, sales of the products I know the most—those using barges for transportation—could be crippled. Our cargo is usually very cost sensitive. If our customers cannot meet a world price, or at least a coast-wide price, a sale can be lost. In the case of a severe recovery plan, exports could fall, markets from Alaska to California could be lost, and costs of cargo shipped between local ports could rise.

On behalf of our industry, I hope you can find a middle ground that supports a recovery plan that increases stocks of the threatened species, but is one that does not turn our regional economy upside down to do so.

Thank you for this opportunity to appear before you today. I will be pleased to answer any questions.

TESTIMONY OF TED HALLOCK, NORTHWEST POWER PLANNING COUNCIL

Mr. Chairman, my name is Ted Hallock. I am an Oregon member of the Northwest Power Planning Council, and I am here today representing the Council. As you know, the Council is an interstate compact agency created by the 1980 federal Northwest Power Act and the states of Washington, Oregon, Idaho and Montana.

The Council is charged with protecting and enhancing fish and wildlife in order to mitigate for damage caused by construction and operation of Columbia River Basin hydropower facilities. We are directed by Congress to pursue this mission while assuring the region an adequate, efficient, economical and reliable power supply. In short, we have a central and difficult role in balancing fish and power needs in the Columbia River system.

The Council is currently updating its regional power plan to address a need for new conservation and generating resources. In addition, the Council is nearing the end of an extensive basinwide salmon and steelhead planning effort that will identify future production levels of all stocks in the Columbia River Basin.

We are pleased to have this opportunity to testify before you. We appreciate the fact that the petitions recently filed under the Endangered Species Act will require careful consideration of a number of complex and controversial issues. This is a multi-faceted problem which involves power system operations, harvest regimes, water storage and flows, fisheries management, and potential conflicts among other water users such as irrigation, navigation and recreation interests. We believe that, as a body, the Council should not prejudge whether the National Marine Fisheries Service ultimately will decide to list species as threatened or endangered, however, we do intend to monitor carefully the National Marine Fisheries Service deliberations. Rollie Schmitten, Region Ten Director, has a difficult job to do, and we will help in this process. We believe it is essential that his deliberations be based on the best scientific information available. We understand he will involve a broad range of technical experts as advisors to ensure that the scientific basis for his decisions is solid.

The Council is fully committed to avoiding the extinction of salmon and steelhead, and we believe the Council can play a constructive role in the Endangered Species Act process.

I would like to discuss with you several Council activities that are relevant to your oversight of the Endangered Species Act process. At the beginning of the decade, the basin's annual salmon and steelhead runs were at an all-time low, an estimated 15 percent of the run size a century before. In the mid-1980s, salmon and steelhead runs improved—thanks in major part to a treaty between the United States and Canada to limit ocean salmon harvests. While last year's runs were down, the trend seems to point to improved runs for some salmon. Major efforts to complement treaty achievements have been put in place through the Council's fish and wildlife program.

Since 1982, the Council has launched three major fish and wildlife programs, with each subsequent edition adding measures designed to improve survival or increase production of fish and wildlife. Many of these measures have been implemented during the last decade. These include a water budget—stored waters released during the spring migration to help juvenile fish migrate to the sea, an historic 10-year agreement signed last year to spill water to secure safe fish passage over the dams, additional work on fish bypass systems at a number of dams, hatcheries, habitat restoration, and research projects. The Council also has designated 44,000 miles of Northwest streams as areas to be protected from hydropower development because of their important fish or wildlife habitat.

As the decade ends, the Council is at work on another major new component of the fish and wildlife program. We are now developing a systemwide plan for the 31 major subbasins that make up the Columbia Basin. The objective of this plan is to produce an integrated program and determine whether we can incerase salmon and steelhead runs in a biologically sound manner.

Mainstem Survival

As we have discussed with the Congressional delegation in the past, one of our priorities is to improve mainstem passage and survival in the Columbia River system as soon as possible. For the past nine years, the Council has emphasized the importance of improved passage at and between hydroelectric dams in the mainstem Columbia and Snake rivers. The Council's current program works to improve juvenile fish survival in the mainstem of the Columbia and Snake rivers in four ways: (1) screens to deflect young fish from turbine intakes, and bypass channels to route fish safely past dams are called for at all mainstem dams; (2) until these are in place and operational, a portion of the fish are passed over dams through spillways; (3) a water budget has been instituted to increase flows between dams during the April 15 through June 15 migration or when the majority of spring migrants are moving downstream; and (4) certain stocks are collected at upriver dams and transported downstream in barges and trucks to be released below Bonneville Dam.

Bypass Facilities

In 1990, the Pacific Northwest obtained a new ally in its attempts to improve salmon and steelhead survival in the mainstem of the Columbia. Funding for bypass improvements—channels through dams and underwater screens to divert fish from turbines—was incorporated into the president's budget for the first time in many years. Generally speaking, once installed, these bypass systems are expected to cut in half the number of fish killed at each dam. In an unscreened system, where fish may pass as many as nine dams before reaching the sea, more than three-quarters of the young migrants can be killed in the turbines.

Some of the major dams still have no screens or bypass channels. Others have systems that could and should be upgraded. Bonneville, John Day, McNary, Little Goose and Lower Granite dams all have bypass systems or are in the process of developing or improving their systems. Lower Monumental, Ice Harbor and The Dalles dams are unscreened. On the Mid-Columbia, Wells Dam has a unique design that enables fish to pass safely, and operators at Priest Rapids, Wanapum, Rocky Reach and Rock Island dams are all in the process of developing and testing prototype screening and bypass systems at their projects.

Protecting young salmon and steelhead as they migrate from their upriver spawning grounds to the sea is the Council's number one fish-related priority. Gaining support from the federal budgetary process this year has been a tremendous boost to the salmon recovery effort in the region. However, the $14.8 million allocated in the administration's 1991 budget to bypass facilities only covers Lower Granite, Little Goose, Lower Monumental and McNary dams. Work at Ice Harbor and The Dalles dams is not included in that budget.

We deeply appreciate the substantial support from all the members of our Congressional delegation in expediting the installation and upgrading of these facilities. Without that support, historical opposition of the U.S. Army Corps of Engineers and the Federal Office of Management and Budget could have delayed these facilities well into the next century.

We are seeking additional funds in 1991 to expedite screening projects at Ice Harbor and The Dalles dams. At these two projects, the Corps of Engineers has argued that installation of bypass screens is not economically justified. The Council has urged consistently that properly conducted economic analysis, coupled with the national and international importance of salmon and steelhead runs in the Columbia River system, argues strongly for the early installation of these facilities. It is our fervent hope that mechanical bypass facilities can be completed at these projects in the mid-1900's. This will improve the survival of mi-

grating fish. In addition, effectively operating screens also will permit the region to eliminate spill and associated lost power system revenues each year.

Spill Plan

Until permanent bypass systems are in place and functioning properly at all mainstem dams in the path of migrating fish, the Council has called on project operators to spill water to carry fish away from dam turbines. Because the fish-laden water is dumped over the dams rather than run through turbines to generate electricity, spills are costly in terms of lost power revenues. Depending on power prices and customer demand, spilling water costs the Northwest approximately $15 million each year. (Total fish and wildlife program costs run about $100 million each year.) Consequently, the Council and other fishery interests in the region are pushing the Corps of Engineers to hasten plans to add permanent fish passage improvements for all the dams.

In 1989, after 18 months of negotiations, a long-term spill plan was developed by state and federal fish and wildlife agencies, basin Indian tribes, utilities, the Bonneville Power Administration and the Council. It calls for specific spill levels to carry juvenile fish to the sea past Lower Monumental, Ice Harbor, John Day and The Dalles dams—all operated by the U.S. Army Corps of Engineers. The Corps has only agreed to comply with the spill agreement on a year-to-year basis. In 1989 and 1990, the spill agreement was implemented.

Water Budget

The third aspect of the fish and wildlife program's mainstem passage strategy is the water budget—a specific amount of water that is made up of natural runoff and releases from upriver dams on the Columbia and Snake rivers to help fish move rapidly through the system. The water budget is essential, because fish undergo an adaptation from freshwater to saltwater environments. They must be in saltwater by the time their bodies have completed this transformation.

In the past, spring runoff has been held in the dams so it may be 'used' for power generation later in the year. With the water budget, part of the spring runoff is released when the majority of the fish are migrating out of the basin. This speeds the fish through the system, helping them make the trip in the correct amount of time and protecting them from long delays that also expose them to predators, warmer water and diseases.

The water budget on the Columbia River has not been controversial in recent years. The mainstem Columbia has substantial storage in Grand Coulee and other headwater reservoirs which enables us to provide the full water budget. However, the water budget on the Snake River is made up largely from natural flows. In recent low-flow years, adequate water for fish has not always been available.

In the Snake River, we can store only about one-third of the water budget flows. The remaining two-thirds depends upon snowpack, precipitation and runoff. We have been forced to rely on the weather for much of the flow in the Snake River.

The Council's program calls for federal project operators to evaluate the feasibility of improving water budget flows by modifying flood control requirements, constructing new reservoirs, and using uncontracted storage water. More work needs to be done by the federal agencies in the area to evaluate all options for improving water flows in the Snake River.

The Council is ready to consider proposals to improve passage survival in the Snake River leg of the system. The flow proposal developed by the Columbia Basin Fish and Wildlife Authority focuses particular attention on the Snake River. The Council has urged the Authority to provide more specific documentation of the biological benefits expected from the proposed increased flows. We will forward a copy of these materials to you as soon as we receive them.

Transportation

The fourth aspect of the fish and wildlife program's effort to improve fish survival during downstream migrations is the Corps' fish transportation program. In 1989, the Corps completed work on two new barges, to bring its fish transport fleet to six. Funds added by Congress in prior years were crucial to obtaining these barges. With the new barges and improved fish handling facilities, the Corps this year expects to transport a record number of young steelhead and chinook from the upper reaches of the Snake and Columbia rivers to be released below Bonneville Dam.

Producing More Fish

The Council's program supports a three-part approach to producing more salmon and steelhead through a combination of natural poduction, hatchery production, and supplementation of wild and natural fish produced by releasing hatchery fish into natural habitats. To advance this effort, the Council has adopted measures to provide water flows and temperatures suitable for natural and wild propagation, inprove habitat and tributary passage, increase knowledge of appropriate timing and sites for release of hatchery fish, improve existing artificial production facilities, and build new hatcheries, mostly as outplanting facilities.

Bonneville funds have completed some 30 sets of projects to improve tributary passage and repair habitat for salmon and steelhead in the Clearwater, Deschutes, Grande Ronde, John Day, Salmon, Umatilla, Wenatchee, Willamette and Yakima River subbasins. There are more than 80 other projects to improve natural and wild production of salmon and steelhead. More than 2,000 miles of streams have been improved for salmon and steelhead. Typically, these projects involve fencing and replanting streambanks and restoring structure in the streams to provide cover, rearing areas and other essential elements of habitat. Another 1,000 miles of habitat have been opened to fish production by improving passage at or removing barriers.

System Planning

As I mentioned earlier, the region is currently involved in a process to identify additional ways to increase salmon and steelhead runs basinwide. This will be the first detailed basinwide plan for the Columbia River. It was initiated in 1987 and is scheduled for completion in 1991. As a planning target, we have been driven by an aim to increase the runs of salmon and steelhead in the basin by some 2.5 million additional fish, approximately doubling current runs. However, we are not simply seeking to increase the numbers of fish. The Council is convinced of the need to conserve genetic resources of the naturally producing and hatchery salmon and steelhead in the Columbia River Basin.

The historical salmon and steelhead losses experienced in the Columbia River Basin cannot be described simply as a sizeable loss in the number of fish produced in this river system. We also lost an enormous amount of genetic diversity, including entire runs of fish that spawned primarily in the upper reaches of the river system. Prior to 1850, when the Columbia River system was home to some 10 to 16 million returning adult salmon and steelhead each year, these fish were 100% wild spawners. At the present time, with fish runs reduced to some 2.5 million fish, nearly 80% of the runs are produced in hatcheries. Considerably fewer than one million fish are spawning naturally.

To protect naturally spawning populations, we have called on the Columbia River Basin fishery managers (who are preparing our proposed salmon and steelhead plan under contract) to identify clearly the salmon and steelhead stocks which, in their opinion, should be addressed as the highest priority. We have asked that two types of priorities be identified: 1) stocks that are marginal and need immediate help and 2) stocks that have the potential to increase significantly and add to the population of fish in the basin. We believe the marginal stocks are of critical importance and should be addressed on an expedited schedule.

We are scheduled to receive the agencies and tribes' final Columbia Basin system plan by the end of the year. A draft will be available this summer. Existing data on Columbia River salmon and steelhead runs have been assembled and analyzed over the last two years, and the status of these runs and trends in their productivity are now being determined. We anticipate that this information will be used by the National Marine Fisheries Service in its status review under the Endangered Species Act.

With this information in hand, the Council is committed to move quickly to address marginal stocks. It is important to note that any Council actions in this area would not be intended to prejudge the outcome of the deliberations under the Endangered Species Act. They would be a continuation of the Council's current effort to help high priority fish stocks and habitat. In addition, any early implementation activities under our system plan will be designed so that they will not undermine a coordinated basinwide approach to salmon and steelhead recovery.

Willamette River and Salmon River Actions

In recent months, the Council has taken two actions to address areas of the basin where specific stocks appear to need high priority attention. First, while we are encouraged that the Willamette River Basin spring chinook run is returning in large numbers and supports a highly visible fishery in the spring of the year, we also are aware that the naturally spawning component of this run is quite small and is primarily found in the McKenzie and Santiam tributaries to the Williamette system. Federal dams on those tributaries have altered river temperatures in a way that delays adult chinook migration in the spring and accelerates juvenile salmon emergence and migration in the early winter. These temperature changes reduce the survival levels of these important stocks. As a result, we have urged the U.S. Army Corps of Engineers to conclude expeditiously its temperature control studies in those basins and proceed as soon as practicable with the installation of temperature control devices at Blue River and Cougar dams in the McKenzie system and Detroit Dam in the Santiam. We have urged that additional funds be provided in fiscal

years 1991 and 1992 to expedite the conclusion of the studies and necessary design work. Protection of these valuable naturally spawning fish will help ensure that the Williamette River chinook run is sustainable over the long term. I cite this as an example of the kind of activity we hope to pursue basinwide as the system plan is reviewed.

More recently, the Council has reviewed early drafts of the Salmon River subbasin plan being prepared under our comprehensive system planning effort. That plan suggested a couple of ways that the beleaguered Salmon River sockeye run might be rehabilitated. One involves the use of indigenous, landlocked kokanee in the upper Salmon to rebuild the migrating sockeye run. A second alternative, one that would be pursued only if the first could not be implemented, would involve the reintroduction of sockeye stock from elsewhere. The Council has corresponded with the Idaho Department of Fish and Game, the Shoshone-Bannock Tribes and the Nez Perce Tribe urging that they expedite their review of these alternatives. The Council has indicated a willingness to consider them for amendment into the fish and wildlife program if they are found feasible and prudent to implement. The Council and other parties have expressed an interest in developing other early implementation activities as needed to address critical stocks in the basin. Once again, I must emphasize that these actions are not taken to prejudge the outcome of Endangered Species Act deliberations; they are part of our planning process started over two years ago with the intention of identifying marginal stocks and the actions to protect and rebuild them.

Conclusion

The region, working together and with the help of Congress, has accomplished much in the last nine years, but obviously, more remains to be done. We have established a "water budget" which increases flows each spring during downstream fish migration. We have developed a spill program at the dams to aid fish migration until bypass screens are installed. We have pushed hard for installation of new and improved screens and bypass facilities at the federal dams. We established protected areas to ban hydro development in critical fish habitat. We have invested substantially in fish habitat protection and restoration projects throughout the basin. We now are speeding measures on marginal stocks through the system planning process.

The endangered species issue, however, cannot be adequately addressed by the region in a comprehensive manner solely through the Council's Fish and Wildlife Program. Any comprehensive approach must include all the divergent interests in the basin, all the managers and users of the Columbia River system. The fishery managers, the irrigators, the waterway and recreation interests, the harvest regulators, the utilities, the dam and reservoir operators, and others must all take part in any effort to address this issue in a thorough way.

The Council is ready to assist in any way we can to address the salmon and steelhead issues we face in the Columbia River Basin. We look forward to working with you, the other members of our Congressional delegation and those in the region in resolving these significant concerns. Thank you for the opportunity to testify, and I will be happy to answer any questions you might have.●

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. NUNN. Mr. President, on behalf of the majority leader, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: All nominations on the Executive Calendar except Calendar No. 876 and 903, and all nominations reported today with the exception of the nomination of Burt W. Corneby to be Superintendent of the Mint.

I further ask uanimous consent that all nominees be confirmed en bloc, with any statements appearing in the RECORD as if read; that the motions to reconsider be laid upon the table en bloc; and that the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

NATIONAL LABOR RELATIONS BOARD

Clifford R. Oviatt, Jr., of Virginia, to be a Member of the National Labor Relations Board for the remainder of the term expiring August 27, 1993.

Dennis M. Devaney, of Maryland, to be a Member of the National Labor Relations Board for the term of five years expiring December 16, 1994.

THE JUDICIARY

Hart T. Mankin, of Delaware, to be an Associate Judge of the United States Court of Veterans Appeals for the term of fifteen years.

Ronald M. Holdaway, of Wyoming, to be an Associate Judge of the United States Court of Veterans Appeals for the term of fifteen years.

Donald L. Ivers, of New Mexico, to be an Associate Judge of the United States Court of Veterans Appeals for the term of fifteen years.

Jonathan R. Steinberg, of Maryland, to be an Associate Judge of the United States Court of Veterans Appeals for the term of fifteen years.

DEPARTMENT OF VETERANS AFFAIRS

James Wilson Holsinger, Jr., of Virginia, to be Chief Medical Director, Department of Veterans Affairs, for a term of four years.

DEPARTMENT OF STATE

Philip S. Kaplan, of California, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, for the rank of Ambassador during his tenure of service as Deputy United States Representative to the Negotiations on Conventional Armed Forces in Europe (CFE).

Thomas W. Simons, Jr., of the District of Columbia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Poland.

Hugh Kenneth Hill, of California, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Bulgaria.

Aurelia Erskine Brazeal, of Georgia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federated States of Micronesia.

Roy M. Huffington, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Austria.

DEPARTMENT OF ENERGY

Paul L. Ziemer, of Indiana, to be an Assistant Secretary of Energy (Environment, Safety and Health).

Calvin A. Kent, of Texas, to be Administrator of the Energy Information Administration.

OFFICE OF THE NUCLEAR WASTE NEGOTIATOR

David H. Leroy, of Idaho, to be Nuclear Waste Negotiator.

DEPARTMENT OF COMMERCE

Barbara Everitt Bryant, of Michigan, to be Director of the Census, vice John G. Keane, resigned, to which position she was appointed during the last recess of the Senate.

DEPARTMENT OF VETERANS AFFAIRS

Stephen Anthony Trodden, of Virginia, to be Inspector General, Department of Veterans Affairs.

THE JUDICIARY

Paul V. Niemeyer, of Maryland, to be United States Circuit Judge for the Fourth Circuit.

Randall R. Rader, of Virginia, to be United States Circuit Judge for the Federal Circuit.

John H. McBryde, of Texas, to be United States District Judge for the Northern District of Texas.

Michael Boudin, of the District of Columbia, to be United States District Judge for the District of Columbia vice John H. Pratt, retired.

Carol Bagley Amon, of New York, to be United States District Judge for the Eastern District of New York vice Mark A. Costantino, retired.

William M. Skretny, of New York, to be United States District Judge for the Western District of New York vice John T. Curtin, retired.

Fred I. Parker, of Vermont, to be United States District Judge for the District of Vermont vice Albert W. Coffrin, retired.

NATIONAL TRANSPORTATION SAFETY BOARD

Christopher A. Hart, of the District of Columbia, to be a Member of the National Transportation Safety Board for the remainder of the term expiring December 31, 1992.

NATIONAL SCIENCE FOUNDATION

Arden L. Bement, Jr., of Ohio, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1994.

ACTION AGENCY

Richard V. Bertain, of California, to be Associate Director of the ACTION Agency.

NATIONAL LABOR RELATIONS BOARD

John N. Raudabaugh, of Georgia, to be a Member of the National Labor Relations Board for the remainder of the term expiring December 16, 1992.

HARRY S TRUMAN SCHOLARSHIP FOUNDATION

Elmer B. Staats, of the District of Columbia, to be a Member of the Board of Trustees of the Harry S Truman Scholarship

Foundation for the term expiring December 10, 1995.

NATIONAL MEDIATION BOARD

Kimberly A. Madigan, of Illinois, to be a Member of the National Mediation Board for the term expiring July 1, 1993.

DEPARTMENT OF JUSTICE

Fred L. Foreman, of Illinois, to be United States Attorney for the Northern District of Illinois for the term of four years.

Stanley A. Twardy, Jr., of Connecticut, to be United States Attorney for the District of Connecticut for the term of four years.

Joe D. Whitley, of Georgia, to be United States Attorney for the Northern District of Georgia for the term of four years.

Anthony L. Bennett, of Minnesota, to be United States Marshal for the District of Minnesota for the term of four years.

Lynn H. Duncan, of Georgia, to be United States Marshal for the Northern District of Georgia for the term of four years.

STATE JUSTICE INSTITUTE

Keith McNamara, of Ohio, to be a Member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992.

U.S. POSTAL SERVICE

LeGree Sylvia Daniels, of Pennsylvania, to be a Governor of the United States Postal Service for the term expiring December 8, 1998.

DEPARTMENT OF LABOR

Julian W. De La Rosa, of Texas, to be Inspector General, Department of Labor, vice James Brian Hyland, resigned.

THE JUDICIARY

Mary Ellen Abrecht, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Kaye K. Christian, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Frederick D. Dorsey, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Ellen Segal Huvelle, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Jose M. Lopez, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Joan Z. McAvoy, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Gregory E. Mize, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Patricia A. Wynn, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

OFFICE OF PERSONNEL MANAGEMENT

Patrick E. McFarland, of Virginia, to be Inspector General, Office of Personnel Management.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Wallace Elmer Stickney, of New Hampshire, to be Director of the Federal Emergency Management Agency.

THE JUDICIARY

John Henry Bayly, Jr., of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

Linda Turner Hamilton, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

OFFICE OF PERSONNEL MANAGEMENT

Stephen D. Potts, of Maryland, to be Director of the Office of Government Ethics for a term of five years.

U.S. INFORMATION AGENCY

George F. Murphy, Jr., of Maryland, to be Inspector General, United States Information Agency.

THE JUDICIARY

Stephen G. Milliken, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of fifteen years.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. RIEGLE, from the Committee on Banking, Housing, and Urban Affairs:

Timothy John McBride, of Michigan, to be an Assistant Secretary of Commerce; and

C. M. Schauerte, of Texas, to be Federal Insurance Administrator, Federal Emergency Management Agency.

By Mr. LEAHY, from the Committee on Agriculture, Nutrition, and Forestry:

Wendy Lee Gramm, of Texas, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1995; and

Wendy Lee Gramm, of Texas, to be Chairman of the Commodity Futures Trading Commission.

By Mr. PELL, from the Committee on Foreign Relations:

Kenneth Noel Peltier, of Texas, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Federal and Islamic Republic of the Comoros.

Townsend B. Friedman, Jr., of Illinois, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Mozambique.

Edward William Gnehm, Jr., of Georgia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the State of Kuwait.

Genta Hawkins Holmes, of California, a Career Member of the Senior Foreign Service, Class of Minister Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Namibia.

*Lieutenant General Claude M. Kicklighter, USA, to be reassigned in the grade of lieutenant general (Reference No. 825)

*In the Naval Reserve there is 1 promotion to the grade of rear admiral (lower half) (Lyle R. Hall) (Reference No. 976)

*In the Naval Reserve there is 1 promotion to the grade of rear admiral (lower half) (William A. Heine III) (Reference No. 977)

*In the Naval Reserve there is 1 promotion to the grade of rear admiral (lower half) (Roger W. Triftshauser) (Reference No. 978)

**In the Navy there are 956 promotions to the grade of lieutenant commander (list begins with Motaz Albahra) (Reference No. 1425)

**In the Army Reserve there are 76 promotions to the grade of colonel and below (list begins with Richard H. Clark) (Reference No. 1426)

TOTAL.—7,439.

NOMINATIONS OF ASSOCIATE JUDGES OF THE U.S. COURT OF VETERANS APPEALS

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I urge confirmation of the nominations of Hart T. Mankin, Ronald M. Holdaway, Donald L. Ivers, and Jonathan R. Steinberg to be associate judges on the U.S. Court of Veterans Appeals. Hearings were held by our committee on February 8, 1990, to consider the Mankin and Holdaway nominations and on June 15, 1990, to consider the Ivers and Steinberg nominations. On June 19, all 11 members of the committee voted unanimously to report these nominations favorably en bloc.

BACKGROUND

Today's action is yet another significant milestone in the 14-year effort to provide judicial review of VA decisions denying benefits claims. Earlier this year, on February 7, the court heard its first oral argument and on February 23, issued its ruling in that case. The confirmation and appointment of these nominees would bring the number of judges sitting on the Court of Veterans Appeals to its full complement of seven.

It has been especially gratifying to me and to the other members of the committee to witness the inauguration of this court. For all of us who have been a part of its development, and for veterans across the Nation, the court's existence embodies our Nation's commitment to providing to all who answered the call a full measure of justice in their relations with their Government.

I would like to summarize briefly the qualifications of each of the four nominees, all of whom are very well qualified to serve on this court.

HART T. MANKIN

Mr. President, Hark Mankin received his undergraduate degree from the University of the South in 1954, and his law degree from the University of Houston in 1960. He was on active duty in the U.S. Air Force from 1954 to 1957, the last 2 years of which were spent with the 3750th Transportation Squadron at Sheppard Air Force Base, TX. He continued to serve in the Air Force Reserve until he was discharged as a captain in 1965.

His professional career has included considerable time as a practicing attorney in the private sector as well as two periods of high Federal service—from 1969 to 1971, as general counsel for the General Services Administration, where he was honored by a Special Achievement Award, and from 1971 to 1973, as general counsel for the Department of the Navy, where he received a Distinguished Public Service Award. From 1973 to 1989, he served as vice president and assistant general counsel and later as general counsel of the Columbia Gas System Service Corp., a registered public utility holding company in Wilmington, DE. Following his retirement from Columbia Gas, he joined the faculty of the Widener University School of Law in Wilmington as an adjunct professor of law.

Hart Mankin has also devoted significant time and energy to many civic organizations, including the Delaware Humanities Council, the Delaware State Chamber of Commerce, and the American Center for Enterprise Education.

At the committee's confirmation hearing, Mr. Mankin answered satisfactorily my questions regarding the need for the appearance, as well as the reality, of fairness and objectivity on the part of the court's judges. When asked whether his work as the top attorney for the General Services Administration and later for the Department of the Navy might suggest a pro-Government bias, he stressed that he would view each case before him on its individual merits.

Mr. President, I have every confidence, as should potential appellants to the court, that as a judge Hart Mankin would retain the independence of thought and judgment that has been so evident throughout his entire career. His distinguished background, coupled with the obvious legal skills he would bring to the bench, will contribute to the court's stature, and I believe he is intent on working to ensure that the court fulfills its mandate to provide a full measure of justice to our Nation's veterans.

Mr. Mankin completed the committee's basic questionnaire for Presidential nominees and the extensive supplemental questionnaire for nominees to the court, and the committee received an October 27, 1989, letter form the Office of Government Ethics certifying that he is in compliance with applicable laws and regulations governing conflicts of interest. The published writings of the nominee were reviewed by committee staff. I reviewed the FBI reports on Mr. Mankin and found no bar to his confirmation.

RONALD M. HOLDAWAY

Mr. President, Ron Holdaway received both his undergraduate and law degrees from the University of Wyoming in 1957 and 1959, respectively. He retired, in 1989, from the U.S. Army as a brigadier general in the Judge Advocate General Corps after 33 years of distinguished service, During his long service, he gained substantial experience with the broad range of legal problems and issues to which service personnel and their families are exposed.

During his Army career, he served as judge advocate for the U.S. Army in Europe, assistant judge advocate general for civil law, and the executive officer to the Judge Advocate General. He also taught criminal law in the

JAG school and from 1969 to 1970, served as staff judge advocate for the 1st Calvary Division in Vietnam.

Ron Holdaway's military education included attendance at the National Defense University, the U.S. Army Command and General staff College, and the Judge Advocate General's School. He has received two Distinguished Service Medals, the Legion of Merit, the Bronze Star, the Meritorious Service Medal, the Air Medal, the Army Commendation Medal, the Vietnam Service Medal, and the Vietnam Campaign Medal with four campaign stars.

His last assignments were as commander of the U.S. Army Legal Counsel Services Agency and chief judge of the U.S. Army Court of Military Review, the Army's highest appellate tribunal, from 1987 to 1989. His experience on this highest Army court should serve him well on the court of Veterans Appeals.

At his confirmation hearing, Ron Holdaway responded well to my questions regarding the need for the appearance, as well as the reality, of fairness and objectivity on the part of the court's judges. When asked if his 33-year military career might possibly have left him with a pro-Government bias, Ron Holdaway noted that many aspects of his military career—such as his 7 years as a defense counsel for military personnel accused of wrongdoing and the many recommendations he made while a staff judge advocate not to pursue charges against accused individuals—illustrate his basic sense of fair play and concern for the individual.

Mr. President, I was very impressed by the thoughtful and direct manner in which Ron Holdaway addressed my concerns. I am convinced—both by his outstanding military career and by his studied responses to my hearing questions—that he will bring to the court a strong sense of fairness and independence and true dedication. Appellants to the court should feel secure that cases before the court will receive his objective consideration.

Ron Holdaway completed the committee's basic questionnaire for Presidential nominees and the extensive supplemental questionnaire for nominees to the court, and the committee received a letter from the Office of Government Ethics dated January 31, 1990, certifying that he is in compliance with applicable laws and regulations governing conflicts of interest. His published writings, as well as the Army performance evaluations he supplied to the committee, were reviewed by committee staff. I reviewed his FBI report and found no bar to his confirmation.

DONALD L. IVERS

Mr. President, Don Ivers graduated from the University of New Mexico in June 1963, and in August of that year entered the Army. During his 5 years on active duty, he served tours in West Germany as a tank platoon leader, reconnaissance platoon leader, and battalion operations officer. First Lieutenant, and then Captain, Ivers later served as basic training company commander at the U.S. Army Training Center at Fort Campbell, KY. He then spent 7 months at Fort Knox as a troop commander and troop executive officer to the 3d Squadron of the 17th Air Calvary. He went with that squadron when it shipped out to Vietnam in October 1967, and served as its assistant operations officer and liaison officer in Vietnam. Captain Ivers was honorably discharged in 1968, having been awarded the Bronze Star, the Air Medal, the Army Commendation Medal, and the Joint Services Achievement Medal.

After discharge from the Army, Don attended American University's Washington College of Law, from which he received his law degree in 1971. Throughout his last year of law school and following graduation, he was a law clerk at the District of Columbia Superior Court, and then served a 14-month clerkship with the District of Columbia Court of Appeals. Don then worked for 6 years as an attorney in private practice and served 3 years as the chief counsel to the Republican National Committee. Since 1981, he has held a series of positions in the executive branch—chief counsel to the Federal Highway Administration, Director of the Safety Review Task Force at the Department of Transportation, and, from 1985 to 1989, general counsel of the Veterans' Administration and acting general counsel of the Department of Veterans Affairs. Currently, he is serving as Assistant to the Secretary of Veterans Affairs.

Don Ivers was questioned extensively, both at his confirmation hearing and in prehearing questions, about his ability, if confirmed, to render an impartial decision in a case involving an issue on which he had worked in his previous capacity as VA general counsel. His responses indicated a sensitivity to the great importance of the appearance of impartiality that could arise if he were to judge matters on which he had previously expressed an opinion. Mr. Ivers indicated that he has already begun to take steps to establish a system whereby cases involving general counsel opinions issued during his tenure at the VA would be identified and called to both his attention as well as that of the parties. He also indicated at the hearing that he would continue to reflect on this issue and consult with others in the further development of his policy in this area.

Mr. President, I believe Don Ivers' responses reflect the independence of thought and judgment so vital to all judges and to the credibility of this court. The nominee's statements, when viewed with his distinguished record of public service, have convinced me, and should convince potential appellants to the court, that he would give any case before the court fair and objective consideration. Secretary of Veterans Affairs Edward J. Derwinski said at Don Ivers' hearing that the nominee would bring a "tremendous knowledge of the VA claims process to the bench" and that he is particularly well-suited to serve as a judge on this new court.

Mr. Ivers completed the committee's basic questionnaire for Presidential nominees and the extensive supplemental questionnaire for nominees to the court, and the committee received a February 6, 1990, letter from the Office of Government Ethics certifying that he is in compliance with applicable laws and regulations governing conflicts of interest. I reviewed the FBI reports on Mr. Ivers and found no bar to his confirmation.

JONATHAN R. STEINBERG

Mr. President, Jon Steinberg graduated from Cornell University in 1960. He then attended the University of Pennsylvania Law School, from which he graduated cum laude and as a member of the Order of the Coif in 1963. He served as research editor of the University of Pennsylvania Law Review, and a student article he wrote for the law review was published in 1962. After law school graduation, Jon served for 11 months as law clerk to then-Judge Warren Burger of the U.S. Court of Appeals for the D.C. Circuit, who, of course, went on to become the Chief Justice of the United States.

After completing his clerkship, Jon server 4½ years at the Peace Corps, first as an attorney advisor and then as deputy general counsel. In 1969, I hired John as counsel to the Subcommittee on Veterans' Affairs of the Senate Committee on Labor and Public Welfare. From 1971 to 1973, Jon was counsel to both the Subcommittee on Railroad Retirement and the Subcommittee on Human Resources, and he continued as counsel of the latter until 1977.

In 1977, when I had the honor of assuming the chairmanship of the Veterans' Affairs Committee, Jon became the committee's staff director and chief counsel. He remained in that position until 1981, when the Republican Party became the majority party in the Senate and Jon became minority chief counsel and staff director. In 1987 the Democrats once again became the majority party in the Senate and Jon resumed the position of staff director and chief counsel—a position he has held since.

Jon has proven himself to be a tireless advocate for veterans—all veterans. I cannot begin to describe the tremendous positive impact Jon has had on veterans law and programs and the

enormous wealth of knowledge he has regarding veterans laws and their history in the Congress. His nomination to be a judge on the U.S. Court of Veterans Appeals is testament to his brilliance, his creativity, his energy, and his hard work. I know he will be a distinguished judge.

Jon has played a major role in the development of every piece of veterans' legislation enacted by the Congress in the last 21 years, as well as many significant measures in other areas on which he has assisted me during this time. He also engaged in very extensive, effective oversight of veterans programs to ensure that congressional intent was carried out and that the programs were implemented effectively and with high regard and compassion for individual veterans and their families. In addition, he has assisted me in my ongoing efforts to secure adequate funding for veterans programs.

Throughout his work in the Senate, Jon's commitment to the veteran, his devotion to duty, his love of country, his total dedication to the institutions of our democracy, and to fair play for all individuals, have never been in question.

At the committee's confirmation hearing, we heard testimony from a wide range of veterans leaders, administration officials and committee members on behalf of Jon Steinberg's nomination. All pointed to Jon's impressive legal qualifications and to his 21 years of dedicated service on behalf of our Nation's veterans.

Secretary of Veterans Affairs Ed Derwinski spoke of the "total excellence" Jon would bring to the court, and the Secretary noted that much of the law dealing with veterans "came from the mind and pen and energy of Jon Steinberg." Deputy Secretary Tony Principi echoed Secretary Derwinski's high praise, noting the long and close working relationship he has had with Jon since 1984, when Tony became the committee's chief counsel and staff director and Jon was his minority counterpart.

A panel of former top VA officials—Max Cleland, former Administrator of Veterans Affairs; Charles Hagel, former VA Deputy Administrator; Thomas Harvey, also a former VA Deputy Administrator; Dr. Donald Custis, a former VA Chief Medical Director; and Dr. John Gronvall, also a former VA Chief Medical Director—all testified as to his total commitment to veterans and their families, with Max Cleland stating that "there has been no one in America more strong and forthright in the aid of veterans." Another former VA Administrator, Harry Walters, stated in written testimony he submitted, "I found [Jon] to be honest, respectful, and professional. He has great vitality, a keen mind and an aggressive style."

A most illustrious panel of veterans' advocates also appeared on Jon's behalf: Oliver Meadows, former staff director of the House Committee on Veterans' Affairs; Cooper Holt, past commander-in-chief of the Veterans of Foreign Wars and former executive director of the VFW; Butch Joeckel, national adjutant of the Disabled American Veterans; and Jack Powell, executive director of the Paralyzed Veterans of America. Each recounted their many years of working with Jon and each lauded Jon's outstanding achievements on behalf of veterans and their families.

All but one of the witnesses I have mentioned are veterans. Oliver Meadows fought in World War II and received the Purple Heart, Bronze Star, and the Combat Infantryman's Badge, and spent 2 years in military hospitals as a result of injuries sustained in combat; Cooper Holt was awarded the Combat Infantryman's Badge and the Bronze Star for his World War II service; and Ed Derwinski served during World War II as well. Tony Principi, an Annapolis graduate, was a member of the River Patrol Force in Vietnam; Max Cleland served in Vietnam, was involved in the Tet offensive, and was wounded at Khe Sahn, eventually spending 1½ years in military and VA hospitals due to injuries which resulted in the amputation of both legs and one arm; Charles Hagel received two purple hearts and other decorations for his service in Vietnam; Butch Joeckel was wounded in the Tet offensive in 1968, and received the Silver Star, the Purple Heart, and the Navy Commendation Medal during his Vietnam service; Jack Powell has two tours of duty in Vietnam and received combat wounds which left him paralyzed; and Tom Harvey spent 2½ years in Vietnam and received the Silver Star, the Purple Heart, and many other decorations. Don Custis served on active duty in both World War II and Vietnam and was Surgeon General of the Navy.

Jon's former colleague at the Peace Corps, William Josephson, who was general counsel of the Peace Corps from 1961 to 1966, described Jon as "one of the most intelligent, careful, meticulous, indefatigable professionals that I have ever worked with."

Sargent Shriver, head of the Peace Corps when Jon went to work there, stated in written testimony submitted for the hearing that Jon had been "a most valued member of the Peace Corps General Counsel's staff" and "was one of the most diligent, tenacious and effective advocates the Peace Corps ever had."

Committee members DECONCINI, MITCHELL, SIMPSON, THURMOND, AKAKA, and SPECTER all made statements in strong support of Jon's nomination, as did Senator ROCKEFELLER in a statement he submitted for the hearing record.

Jon responded well to my questions regarding the need for the appearance, as well as the reality, of fairness and objectivity on the part of the court's judges. He was questioned extensively, both at the hearing and in prehearing questions, about his ability, if confirmed, to render an impartial decision in a case involving an issue on which he had worked at any time during his two decades as a Senate employee. I believe his responses were excellent, and indicate a sensitivity to the appearance of impartiality that could arise if he were to judge matters on which he had previously expressed an opinion.

Jon Steinberg completed the committee's basic questionnaire for Presidential nominees and the extensive supplemental questionnaire for nominees to the court, and the commitee received a May 30, 1990, letter from the Office of Government Ethics certifying that he is in compliance with applicable laws and regulations governing conflicts of interest. I reviewed the FBI reports on Jon and found no bar to his confirmation.

Mr. President, before closing, I would like to take a moment to address three issues which were raised—totally without substantiation—at Jon's confirmation hearing. Not only were all allegations of or allusions to supposedly undesirable traits or misconduct on Jon's part completely without any basis in evidence—no witnesses were called to provide such evidence—but an overwhelming body of testimony from the impressive array of witnesses supporting Jon, all of it under oath, refutes each such charge.

The first concerned alleged anti-Vietnam war or pro-Viet Cong activities. I asked every witness I mentioned earlier who was present whether he had "any personal knowledge of any pro-Viet Cong or anti-Vietnam war activities by Jon Steinberg? All answered firmly in the negative.

Bill Josephson, when asked for his views of such allegations, characterized them as "baseless" in his knowledge.

Jon Steinberg stated under oath:

> I am at a loss to understand the basis for these allegations. I can state categorically to the Committee under oath today that I have never at any time participated in a protest or demonstrated or other activity in support of or against the United States foreign policy with respect to the Vietnam conflict.

Later, testifying that there was "[a]bsolutely nothing" to any such accusations, he added:

> [D]uring the period of time that I was working for the Peace Corps I was very mindful of the Peace Corps' policy . . . [prohibiting] public statements by Peace Corps volunteers serving overseas that might in any way involve them in commenting either

on host-country political matters or on United States polical matters.

I thought it was my obligation, serving on the staff of the Peace Corps in Washington, to follow the same injunction and to do whatever I could to maintain the apolitical stance of the Peace Corps, and I did follow it in every respect.

The record was also replete with strong, unanimous testimony as to Jon's high regard for the Americans who served their country in the Vietnam war.

A second set of issues raised at the hearing concerned allegations of leaks by the committee and by Jon and implications that Jon may have passed to the press information about Secretary Derwinski while his nomination was pending before the committee.

Deputy Secretary Principi emphasized that he had "no first-hand knowledge" of any leaks from the committee or any committee staff member. Secretary Derwinski testified that he had no evidence or knowledge of any leaks occuring in connection with his nomination and that, in fact, he had been "treated in a very professional fashion" by the members and staff of the committee. Jon testified that he "never did anything to in any way provide information to the press in connection with Secretary Derwinski's nomination."

Jon was also asked to comment on an allegation by Thomas Pauken, former Director of the ACTION Agency, who did not appear at the hearing, that Jon "passed information" from Mr. Pauken's military record to a UPI reporter in an attempt to derail [Pauken's] nomination." This, too, Jon categorically denied under oath, and no evidence whatever was offered to support the accusation.

The final issue raised at the hearing which I would like to comment upon concerns Jon's draft status during the 1950's and 1960's. The questions implied that Jon's lack of military service was evidence of an unpatriotic attitude or an illegality on Jon's part. Both implications are utter nonsense.

The uncontradicted evidence was that, when Jon turned 18 in 1957, he promptly registered at his draft board in Philadelphia and given a II-S student deferment. As I recounted earlier, he attended Cornell until his graduation in the spring of 1960, and then continued through 3 years of law school at the University of Pennsylvania, from which he graduated in June 1963. After graduation, Jon clerked for 11 months for then-Judge Warren Burger, for which he was given a III-A deferment. Records Jon provided to the committee, in combination with records provided by the Selective Service System, showed that in October 1964, he applied for, and was granted, a III-A deferment based on the birth of a son to him and his wife. There is absolutely no evidence that Jon Steinberg ever sought to avoid military service through any improper conduct. At one point, it was implied that, in 1964, Jon went to work for the Peace Corps in order to avoid the draft. There was, of course, no truth at all to that. As records show, he had been given a III-A deferment as a husband and father.

Moreover, Jon's service in the Peace Corps general counsel's office—as part of a most impressive 27-year career of Federal service to date—is evidence of his loyalty to the Nation and his dedication to public service.

Furthermore, the staunch, enthusiastic support that I referred to ealier which he received from such illustrious leaders in the veterans community—including combat and service-disabled veterans—further refutes and discredits any suggestion that Jon is anything other than a deeply patriotic American.

Mr. President, I have been in the U.S. Senate for over 21 years now and I can honestly say that I have never seen a nominee better qualified for the post to which he has been nominated than is Jon Steinberg.

CONCLUSION

Mr. President, I am pleased to recommend to the Senate the confirmation of Hart T. Mankin, Ronald M. Holdaway, Donald L. Ivers, and Jonathan R. Steinberg to serve as associate judges on the U.S. Court of Veterans Appeals and to urge that my colleagues vote unanimously in support of these distinguished nominees. It has been an honor to play a role in the establishment and inception of this court. It is my conviction and fervent hope that this new institution will stand as a testament to the precept that those who have served and sacrificed in the defense of our Nation must be treated with complete fairness and honor by their Government.

STATEMENT ON THE NOMINATIONS OF DENNIS M. DEVANEY, CLIFORD R. OVIATT AND JOHN N. RAUDABAUGH

Mr. KENNEDY. Mr. President, although I have decided to support the confirmation of Dennis M. Devaney, Clifford R. Oviatt, and John N. Raudabagh as members of the National Labor Relations Board, I wish to make clear that I do so with some reluctance and with serious concerns about the consequences of the action we take today.

My concerns do not result from any doubts about the nominee's character or professional stature as a general matter. From all indications, they are honorable and accomplished labor lawyers.

Rather, what troubles me is that in approving these appointments, we are approving the creation of a National Labor Relations Board whose members are overwhelmingly drawn from the management world, and on which there is not even a pretense of balance and diversity of background.

With the addition of Mr. Raudabagh, an absolute majority of the Board will consist of individuals whose prior professional careers were devoted exclusively to the representation of employers' interest vis a vis their employees. In contrast, not a single member of the Board has had experience representing workers or worker organizations. Because of the sensitive nature of the NLRB's role in administering our labor law—and given that these laws are, as the Supreme Court has stated, uniquely "the result of conflict and comprise between strong contending forces and deeply held views on the role of organized labor in the free economic life of the Nation"—such an appearance of partisanship for one side over the other is, in my judgment, questionable in the extreme.

It is essential to the fair formulation and administration of national labor policy—and to the public perception of fairness in this area—that the NLRB not be dominated by persons associated exclusively with either management or organized labor. One way to achieve fairness is to appoint a board whose members, by virtue of past experience, are viewed as distinguished neutrals in the field of labor relations. Another way is to appoint a board on which former management representatives and former labor representatives sit in roughly equal numbers. Certainly, however, neither fairness nor the perception of fairness can be achieved by appointing a board whose members are overwhelmingly associated with an employer perspective.

This is not to suggest that these nominees, or any of the other former management representatives currently serving on the Board, conceive their roles on the Board in partisan terms. I trust that they do not. But it is fact of life that individuals' perceptions are in large part the product of their experiences. Labor relations is, as we know, an area in which employers' perceptions of their best interest are often sharply at odds with employees' perceptions of their best interests. It is, therefore, particularly important that the perspectives of both sides be represented when it comes to the adjudication and resolution of labor disputes.

Because I had not, prior to consideration of Mr. Raudabagh's nomination by the Labor and Human Resources Committee earlier this week, raised the issue of balance with the committee or the administration, it is not my intention to act upon my concerns with respect to these nominees or with respect to other members currently serving on the Board. I do, however, wish to state for the record that I do intend to act on these concerns with respect to any future NLRB nominee whose background is such that his or her appointment to the Board would

create or perpetuate the kind of imbalance that I have expressed concern about today.

With that understanding, I am prepared to support the appointment of Mr. Devaney, Mr. Oviatt, and Mr. Raudabaugh to the National Labor Relations Board.

STATEMENT ON THE NOMINATION OF JAMES W. HOLSINGER

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I am pleased to urge my colleagues to support the nomination of Dr. James W. Holsinger, Jr., to be the first Chief Medical Director appointed to the Department of Veterans Affairs by the President under legislation which last year elevated VA to Cabinet status.

Mr. President, Dr. Holsinger is an outstanding nominee who, over a period of 18 years, has already proven himself to be a great asset to the Department of Veterans Affairs. On June 19, 1990, our committee conducted a hearing on his nomination and on June 28 voted unanimously in support of the nomination. If Dr. Holsinger is confirmed by this body, I anticipate that he will provide strong and effective leadership to the Veterans Health Services and Research Administration [VHS&RA].

As head of VHS&RA, Dr. Holsinger would be the principal VA executive responsible for the VA health-care system and would oversee a budget totaling over $11.5 billion in the current fiscal year—well over one third of VA's annual expenditures.

VHS&RA operates the largest health-care system in the country—with 172 medical centers and 339 outpatient clinics providing over 22 million outpatient visits and 1.2 million inpatient stays in fiscal year 1989 and with over 200,000 employees. It also operates 196 vet centers, community-based centers which offer readjustment counseling to Vietnam-era veterans. As World War II veterans age, VA has become a crucial part of the Nation's long-term care capability. VA medical centers include specialized programs for treating veterans with post-traumatic stress disorder, substance-abuse disabilities, and spinal cord injuries, and also include such long-term-care facilities as 122 nursing homes, 28 domiciliary facilities, and approximately 30 Alzheimer's units. In addition, VA offers such extended-care services as adult day health care, community-based residential care, hospital-based home care, respite care, and geriatric evaluation units, as well as hospice care. VA also provides care to many hundreds of thousands of veterans, generally lacking health insurance, who fall into the mandatory-care categories because of low income.

Mr. President, Dr. Holsinger's qualifications are impressive. A graduate of Duke University Medical School, Dr. Holsinger received his M.D. in 1964 and his Ph.D. in 1968. A specialist in cardiology and thoracic surgery, Dr. Holsinger also attained an M.S. degree in health care administration from the University of South Carolina in 1981. He has served in the Army Reserve since 1961 and holds the rank of major general. During his distinguished career with VA, Dr. Holsinger has served on the staff of six different VA medical centers across the country, including serving as chief of staff at two centers. Since July 1981, Dr. Holsinger has served as director of the Richmond VA Medical Center, an 814-bed facility affiliated with the Medical College of Virginia [MCV], a part of the Virginia Commonwealth University [VCU]. He also holds the titles of professor of medicine and professor of health care administration at MCV and, in 1985, was appointed assistant vice president for health sciences at VCU. In addition, Dr. Holsinger served as director of VA Medical District 7, composed of five VA medical centers with a combined budget of $250 million.

I want to point out that Congress, in the Department of Veterans Affairs Act, which elevated Va to a Cabinet department, quite deliberately chose to keep for the position of Chief Medical Director the same title that has been attached to it for some 44 years. Although the Chief Medical Director position is of Under Secretary rank as an Executive Level III position, it is not in any way a traditional, political Under Secretary position to be filled in the traditional manner that sub-Cabinet jobs throughout the Government typically are filled. Aside from the counterpart position of VA Chief Benefits Director, I know of no position in the Federal Government that has the same degree of statutorily-prescribed independence from the political selection process that has been awarded to the Chief Medical Director.

I note that Dr. Holsinger answered the committee's questions concerning his qualifications and plans in a timely and thoughtful manner. A June 18, 1990, letter from the Office of Government Ethics concluded that he is in compliance with applicable laws and regulations governing conflicts of interest. In addition, I have reviewed the FBI report on Dr. Holsinger and have found no bar to confirmation in his case.

Mr. President, I fully support Dr. Holsinger's nomination and urge his confirmation.

Assuming he is confirmed, I look forward to working with Dr. Holsinger on behalf of all of our Nation's veterans who have earned our enduring gratitude.

STATEMENT ON THE NOMINATION OF FRED I. PARKER

Mr. LEAHY. Mr. President, today I am honored to commend to the Senate Fred I. Parker, who has been nominated to the U.S. district court judge for the district of Vermont. The seat became vacant last year when Judge Albert Coffrin announced his intention to retire. Judge Coffrin's shoes will be difficult to fill—he served Vermont and the rest of the country well. We Vermonters pride ourselves on our superb judiciary. As the newest addition to the state's federal bench, Fred Parker will continue this longstanding tradition.

I have known Fred Parker in various capacities throughout my adult life. We studied together at Georgetown University Law Center, where Fred distinguished himself as a top-notch-student. After graduting from law school in 1965, Fred joined the Boston law firm of Lyne, Woodworth & Everts. He could not resist the temptation of the Green Mountains, however, and moved to Vermont in 1966 to continue his career as a practicing attorney. Fred took a break from private practice in 1969 to serve as then-Vermont Attorney General Jim Jeffords' Deputy Attorney General, a position which Fred held for 3 years. In 1972, Fred joined the Vermont law firm of Langrock and Sperry—now known as Langrock, Sperry, Parker & Stahl. First as an associate and later as a partner, Fred handled some of the most important litigation in the state. Fred's outstanding reputation as a deliberative, ethical attorney is well-known.

The Judicial Nominating Advisory Commission that Senator JEFFORDS, the Vermont Bar Association and I appointed to evaluate candidates for the U.S. District Court vacancy recognized Fred Parker's qualifications and placed him at the top of the list of potential nominees. The American Bar Association's Standing Committee on the Federal Judiciary unanimously gave Fred the highest rating of well qualified to serve on the bench.

Fred Parker's credentials speak for themselves. He is an intelligent, well-educated lawyer with extensive trial experience. I am confident that he will bring to the bench an understanding of and respect for what is required of a federal judge: neutrality, compassion and a solid knowledge of the law. Fred will make a first class U.S. district judge. I am proud to welcome him to Vermont's judiciary.

STATEMENT ON NOMINATION OF STEPHEN A. TRODDEN

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I am pleased to urge the Senate to confirm Stephen A. Trodden of Virginia to be the first inspector general appointed to the Department

of Veterans Affairs by the President under legislation which last year elevated VA to Cabinet status. If confirmed as head of VA's Office of Inspector General, Mr. Trodden will assume responsibility for direction of audit and investigative activities for the Department, thus fulfilling a vital role established by the Inspector General Act of 1978. The Veterans' Affairs Committee voted to report this nomination favorably at a June 28 meeting and the Governmental Affairs Committee reported the nomination on July 25.

Through our committee's hearing process—including pre- and post-hearing questions and the Committee's June 19 hearing—Mr. Trodden demonstrated that he is an outstanding nominee. He showed a keen understanding of the importance of the inspector general's mission, as well as the critical need for the inspector general's independence, and showed himself to be both well-equipped and eager to carry out that mission effectively. He demonstrated a particularly high degree of professionalism, a strong personal sense of the importance of basing inspector general findings and recommendations on sound criteria and objective data, and a positive attitude toward his own accountability and intention to establish a public record of inspector general office activities and to be answerable for it. I am satisfied that he will provide strong and effective leadership for VA's Office of inspector general.

Mr. Trodden's credentials clearly suit him very well for VA's inspector general position. He received a Bachelor of Science degree in industrial engineering from the University of Michigan and then earned his law degree from the Georgetown University Law Center in 1965. Beginning in 1962, he worked for the Army at Gravelly Point, VA, first as an industrial engineer and later as a project manager's staff officer. In 1969, he came to the Pentagon as a technical advisor, setting out on a series of positions of increasing responsibility at the Department of Defense. In 1975, he became Deputy Director for Research and Development, after which he became Deputy Director, and then Director, for Procurement. He has served since 1983 in DOD's Office of the Defense Inspector General, first as Deputy Assistant Inspector General and Director for Major Acquisitions, and currently as Assistant Inspector General for Audit.

In closing, I note that the nominee has answered the committee's questions concerning his qualifications and objectives in a timely and thoughtful manner. A May 15 1990, letter from the Office of Government Ethics indicates that the nominee is in compliance with applicable laws and regulations governing conflicts of interest and my review of the FBI report on Mr. Trodden has revealed no bar to confirmation. I fully support Mr. Trodden's nomination.

STATEMENT OF NOMINATION OF JONATHAN STEINBERG

Mr. ROCKEFELLER. Mr. President, I wish to express my support for the nomination of Jonathan R. Steinberg to the distinguished position of associate judge on the U.S. Court of Veterans Appeal.

I had the fortune to obtain a seat on the Senate Veterans' Affairs Committee when I joined the Senate in 1985. Consequently, I have worked closely with Jon Steinberg for more than 5 years. From the very first day, I have been impressed with Jon's intellect, integrity, and professionalism.

The country is fortunate to have a public servant as dedicated and capable as Jon Steinberg. The President's decision to nominate Jon for the U.S. Court of Veterans Appeals is a wise one. As a member of the court, Jon will be able to draw upon a reservoir of knowledge about the relevant laws and legislative history pertinent to that court. And we can count on Jon to perform this role with the integrity, honesty, and fairness that he has demonstrated throughout his career.

Mr. President, I know we share the hope that this new court, the U.S. Court of Veterans Appeals, will serve as a judicial body that will guarantee justice and fairness in the application of laws affecting America's veterans. The addition of Jon Steinberg to this court will make a major contribution in fulfilling this crucial objective. The veterans of this country, their families, and all Americans are fortunate that such an addition is close at hand. Again, I express my enthusiasm for Jon Steinberg's nomination, and I warmly wish him the very best.

STATEMENT ON THE NOMINATION OF JONATHAN STEINBERG

Mr. GRAHAM. Mr. President, I wish to associate myself with the remarks of the distinguished chairman of the Senate Veterans' Affairs Committee with regards to the nomination of Jonathan Steinberg to be an Associate Judge on the Court of Veterans' Appeals.

In the 3 years that I have served on the Veterans' Affairs Committee, I have found Jon to be a wise and fair advisor on veterans' policy issues.

Upon his nomination to the bench, I had the opportunity to thoroughly review the records of this professional career. His wealth of knowledge on his issue will certainly benefit the court.

Mr. President, it is a pleasure to support this nomination and I encourage the Senate to move to consideration of the nomination expeditiously.

STATEMENT ON THE NOMINATION OF JONATHAN STEINBERG

Mr. DECONCINI. Mr. President, I am pleased to rise in strong support of the nomination of Jonathan Steinberg to be a judge on the new Court of Veterans Appeals. I have reached this determination after having reviewed Jon's FBI report, and after having read and listened to the testimony presented during his long and thorough confirmation hearing. I find absolutely nothing in the record to disqualify Jon for the position for which he has been nominated. On the contrary, the record is replete with information on why Jon is perhaps the most qualified nominee that this body will ever have the opportunity to approve for this new court.

I have had a close working relationship with Jon over the course of the last ten years while serving as a member of the Senate Committee on Veterans' Affairs. During this period, I have come to know Jon as an extremely intelligent, extraordinarily competent, highly motivated and creative individual who fulfilled his responsibilities as staff director of the committee with the utmost professionalism. Jon's keen legal mind coupled with his analytical abilities and intimate knowledge of the law relating to veterans make him an outstanding candidate for the court and I commend the President for having the courage to send this nomination to the Senate for confirmation. It is never easy for a Republican administration to nominate a Democrat for a seat on the bench. But I am certain that the President concluded, as I do, that there is no person more qualified for this final seat on the Court of Veterans Appeals than Jon Steinberg. The strong support for Jon's nomination from both Republicans and Democrats alike attests to those qualifications. And the strong support he received from both current and former high level career employees and political appointees in the Department of Veterans Affairs, including that of the Secretary, is further testament to Jon's exceptional abilities.

Jon has spent his entire professional career in public service and he has done so with great distinction and integrity. Throughout his career in the Senate, Jon has been dogged in his pursuit of ensuring that all veterans of this Nation receive the benefits to which they are entitled under the law. He has been intimately involved in the writing of all veterans legislation over the past 20 years. In fact, I would be surprised if Jon did not know most of title 38 by heart. Perhaps the greatest compliment I can extend to Jon is that if I were a veteran pursuing a claim before the Court of Veterans Appeals, I would be comforted to know that Jon Steinberg was sitting on that bench.

Jon and I have had a warm and productive relationship over the past ten years. Arizona veterans and I owe him

an enormous debt of gratitude on one issue in particular, the incorporation of the Arizona State Veterans Cemetery into the National Cemetery System. Without his help and assistance that dream would never have become a reality. My staff and I will miss Jon's counsel and advice. The committee will miss his leadership. And the Senate will miss an outstanding employee. But our loss is the court's gain. I commend Jon for his long and illustrious service in the Senate and I wish him every success as he assumes his new responsibilities on the court. And I extend my congratulations to his lovely wife, Shellie, and his children, Amy and Andrew without whose love and support this day would never have been possible.

STATEMENT ON THE NOMINATION OF PAUL L. ZIEMER

Mr. McCLURE. Mr. President, on July 25, 1990, the Committee on Energy and Natural Resources favorably reported the nomination of Paul L. Ziemer to be an Assistant Secretary of Energy for Environment, Safety, and Health by a vote of 16-0.

Dr. Ziemer's background in the field of radiation-health research is an extensive and impressive one and makes him well-qualified for the position to which he has been nominated. For the past 30 years he has been directly involved in the health physics profession. He currently serves as Purdue University's professor of health physics and head of the School of Health Sciences. He served as a physicist with the U.S. Naval Research Laboratory in Washington and as a health physicist at DOE's Oak Ridge National Laboratory. He holds a B.S. from Wheaton College in physics; an M.S. from Vanderbilt University in radiological physics; and a Ph.D. from Purdue University in bionucleonics. His major areas of current research are radiation dosimetry and environmental radon risks.

Mr. President, I urge my colleagues to join me in supporting Dr. Ziemer's confirmation as an Assistant Secretary of Energy.

STATEMENT ON THE NOMINATION

Mr. COATS. Mr. President, I would like to take this opportunity to commend my colleagues for their swift action in the confirmation of my Hoosier colleague, Dr. Paul Ziemer, to be Assistant Secretary of Energy for Environmental Safety and Health.

Before receiving this important nomination from President Bush, Dr. Ziemer was a professor at Purdue University in Indiana for the past several years, and has distinguished himself in the health arena. Clearly with the increasing realization that the health of our environment has a direct effect on the health care of our Nation, Dr. Ziemer's experience makes him an obvious choice for the position of Assistant Secretary of Energy for Environmental Safety and Health.

Dr. Ziemer has a long and distinguished resume of service to Purdue, to Indiana and to this country. I wholeheartedly support the nomination of my fellow Hoosier for this important post.

STATEMENT ON THE NOMINATION OF CALVIN A. KENT

Mr. McCLURE. Mr. President, on July 25, 1990, the Committee on Energy and Natural Resources favorably reported the nomination of Calvin A. Kent to be Administrator of the Energy Information Administration by a vote of 16-0.

Dr. Calvin Kent has widespread experience in the area of energy and utility regulation. He currently holds the Herman W. Lay Chair of Private Enterprise at Baylor University where he also directs the Center for Private Enterprise and is adjunct professor of law at the Baylor Law School. Previously, he was professor of economics at the University of South Dakota and chief economist to the South Dakota Legislature. Dr. Kent holds both an MA and a Ph.D. in economics from the University of Missouri.

Mr. President, I urge my colleagues to join me in supporting Dr. Kent's confirmation as Administrator for the Energy Information Administration.

STATEMENT ON THE NOMINATION OF DAVID H. LEROY

Mr. McCLURE. MR. President, on July 25, 1990, the Committee on Energy and Natural Resources favorably reported the nomination of David H. Leroy to be Nuclear Waste Negotiator by a vote of 16-0.

I am very pleased with the President's decision to nominate David Leroy to the new position of Nuclear Waste Negotiator. I have known Mr. Leroy for some time and believe him to be extremely well-qualified to take on the most difficult task of uncovering a site that will become a temporary or permanent repository for this Nation's high-level nuclear waste. Mr. Leroy is a former Lieutenant Governor and attorney general of Idaho, and currently practices law in Boise. He earned his JD from the University of Idaho and his LLM from New York University.

Mr. Leroy's experience in State politics will be invaluable in his dealings with Governors, Indian tribal leaders and others in an aggressive search for a technically sound repository site in a location where there may be an interest in accepting the repository voluntarily.

As Mr. Leroy has said, this position may, in fact, make him "The most unpopular person in America;" but this mission, which he has chosen to accept if confirmed, is one of utmost importance to this Nation; and I believe we all wish him luck in reaching the goals set forth by Congress.

Mr. President, I urge my colleagues to join me in supporting Mr. Leroy's confirmation as Nuclear Waste Negotiator.

STATEMENT ON THE NOMINATION OF JOHN L. RYAN

Mr. COATS. Mr. President, today the Senate has before it the President's nomination of Ms. Legree Daniels to the Board of Governors of the U.S. Postal Service.

Although such matters are usually lost in the shuffle, I want to use this nomination as an opportunity to focus the attention of this body on the exemplary public servant who Ms. Daniels will be replacing—John L. Ryan.

It is true that John Ryan comes from Indianapolis, and therefore I would have a special interest in his career, but John Ryan has had a long and distinguished career of public service to the Nation that deserves our very special recognition at this time.

John Ryan was originally nominated to the Board of Governors of the U.S. Postal Service by President Ronald Reagan and confirmed by the U.S. Senate on May 6, 1983, and has served over the past 6 years. He was elected Vice Chairman of the Board on June 3, 1986, reelected in January 1987, January 1988, and January 1989. While on the Board of Governors, John Ryan also served for many years as Chairman of the Board's vitally important Committee on Labor Relations.

In a thousand ways, through his wisdom, his perspective, his humor, and his good will, he has left his mark on this $35 billion plus corporation.

Service on the Board of Governors was only the most recent of John Ryan's postal experience, as he was a charter member and second Chairman of the Postal Rate Commission from 1971 to 1973.

John Ryan is known as being among the most prominent and knowledgeable of the proponents of the repeal of monopoly conferred upon the Postal Service by the Private Express Statutes. Despite holding this position, which was not shared by many others at the Postal Service, John Ryan has been universally respected in the mailing community. His intellect and personality makes it difficult for others to not hold him in high regard, even when they disagree.

John Ryan was born in Indianapolis, IN, on July 16, 1921. He graduated from Harvard College in 1943 with an AB degree in biology. He served in the field artillery of the U.S. Army for 3 years during World War II and was awarded the Bronze Star Medal.

He served as chairman of the Indiana Public Service Commission from 1969 until 1971. He is past president of the Marion County, IN, Welfare Board and was formerly a public member of the Administrative Conference of the United States. John Ryan also is a past president and trustee of the

Philadelphia Society and was for 8 years a trustee of Hillsdale College.

My final observation is that Washington, DC, is richly populated with people who have been the recipient of the kindnesses of John Ryan. For his entire career, John Ryan has felt that it was among his reasons for being to help others along in their careers. There are many people who count John Ryan as being among the finest people that they have ever known.

The departure of John Ryan from the Board of Governors will no doubt only open up new avenues for his boundless energy and good will. He continues to serve on the board of trustees of the Intercollegiate Studies Institute, and continues to work with many other organizations such as the Philadelphia Society.

It is my earnest hope that John Ryan, and his wife Jane, will be heard from by this body again and again on postal matters, and on other matters, and that they would have God's richest blessings in the many years that lay ahead for them both.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now resume legislative session.

NOMINATION OF RUSSELL F. MILLER TO BE INSPECTOR GENERAL OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY

Mr. NUNN. Mr. President, as if in executive session, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of the nomination of Russell F. Miller to be Inspector General of the Federal Emergency Management Agency; that the Senate proceed to the immediate consideration of the nomination; that the nominee be confirmed; that any statements appear in the RECORD as if read; that the motion to reconsider be laid upon the table; and that the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

BREAST AND CERVICAL CANCER MORTALITY PREVENTION ACT OF 1990

Mr. NUNN. Mr. President, I ask unanimous consent that the Labor Committee be discharged from further consideration of H.R. 4790, a bill to establish a program of grants for the detection and control of breast and cervical cancer.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 4790) to amend the Public Health Service Act to establish a program of grants for the detection and control of breast and cervical cancer.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2575

Mr. NUNN. Mr. President, on behalf of Senator MIKULSKI, I send a substitute amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN] for Ms. MIKULSKI (for herself, Mr. KENNEDY, Mrs. KASSEBAUM, Mr. PELL, Mr. METZENBAUM, Mr. DODD, Mr. SIMON, Mr. ADAMS, and Mr. BINGAMAN) proposes an amendment numbered 2575.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Breast and Cervical Cancer Mortality Prevention Act of 1990".

SEC. 2. ESTABLISHMENT OF PROGRAM OF GRANTS TO STATES FOR PREVENTION AND CONTROL OF BREAST AND CERVICAL CANCER.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by inserting after title XIV the following new title:

"TITLE XV—PREVENTIVE HEALTH MEASURES WITH RESPECT TO BREAST AND CERVICAL CANCERS

"SEC. 1501. ESTABLISHMENT OF PROGRAM OF GRANTS TO STATES.

"(a) IN GENERAL.—The Secretary, acting through the Director of the Centers for Disease Control, may make grants to States on the basis of an established competitive review process for the purpose of carrying out programs—

"(1) to screen women for breast and cervical cancer as a preventive health measure;

"(2) to provide appropriate referrals for medical treatment of women screened pursuant to paragraph (1) and to ensure, to the extent practicable, the provision of appropriate follow-up services;

"(3) to develop and disseminate public information and education programs for the detection and control of breast and cervical cancer;

"(4) to improve the education, training, and skills of health professionals (including allied health professionals) in the detection and control of breast and cervical cancer;

"(5) to establish mechanisms through which the States can monitor the quality of screening procedures for breast and cervical cancer, including the interpretation of such procedures; and

"(6) to evaluate activities conducted under paragraphs (1) through (5) through appropriate surveillance or program-monitoring activities.

"(b) GRANT AND CONTRACT AUTHORITY OF STATES.—A State receiving a grant under subsection (a) may expand the grant to carry out the purpose described in such subsection through grants to, and contracts with, public or nonprofit private entities.

"SEC. 1502. REQUIREMENT OF MATCHING FUNDS.

"(a) IN GENERAL.—The Secretary may not make a grant under section 1501 unless the State involved agrees, with respect to the costs to be incurred by the State in carrying out the purpose described in such section, to make available non-Federal contributions (in cash or in kind under subsection (b)) toward such costs in an amount equal to not less than $1 for each $3 of Federal funds provided in the grant. Such contributions may be made directly or through donations from public or private entities.

"(b) DETERMINATION OF AMOUNT OF NON-FEDERAL CONTRIBUTION.—

"(1) IN GENERAL.—Non-Federal contributions required in subsection (a) may be in cash or in kind, fairly evaluated, including equipment or services (and excluding indirect or overhead costs). Amounts provided by the Federal Government, or services assisted or subsidized to any significant extent by the Federal Government, may not be included in determining the amount of such non-Federal Contributions.

"(2) MAINTENANCE OF EFFORT.—In making a determination of the amount of non-Federal contributions for purposes of subsection (a), the Secretary may include only non-Federal contributions in excess of the average amount of non-Federal contributions made by the State involved toward the purpose described in section 1501 for the 2-year period preceding the first fiscal year for which the State is applying to receive a grant under such section.

"(3) INCLUSION OF RELEVANT NON-FEDERAL CONTRIBUTIONS FOR MEDICAID.—In making a determination of the amount of non-Federal contributions for purposes of subsection (a), the Secretary shall, subject to paragraphs (1) and (2) of this subsection, include any non-Federal amounts expended pursuant to title XIX of the Social Security Act by the State involved toward the purpose described in paragraphs (1) and (2) of section 1501(a).

"SEC. 1503. REQUIREMENTS WIH RESPECT TO TYPE AND QUALITY OF SERVICES.

"(a) REQUIREMENT OF PROVISION OF ALL SERVICES BY DATE CERTAIN.—The Secretary may not make a grant under section 1501 unless the State involved agree—

"(1) to ensure that, initially and throughout the period during which amounts are received pursuant to the grant, not less than 60 percent of the grant is expended to provide each of the services or activities described in paragraphs (1) and (2) of section 1501(a), including making available screening procedures for both breast and cervical cancers;

"(2) subject to subsection (b), to ensure that—

"(A) in the case of breast cancer, both a physical examination of the breasts and the screening procedure known as a mammography are conducted; and

"(B) in the case of cervical cancer, both a pelvic examination and the screening procedure known as a pap smear are conducted;

"(3) to ensure that, by the end of any second fiscal year of payments pursuant to the grant, each of the services or activities described in section 1501(a) is provided; and

"(4) to ensure that not more than 40 percent of the grant is expended to provide the services or activities described in paragraphs (3) through (6) of such section.

"(b) USE OF IMPROVED SCREENING PROCEDURES.—The Secretary may not make a

grant under section 1501 unless the State involved agrees that, if any screening procedure superior to a procedure described in subsection (a)(2) becomes commonly available and is recommended for use, any entity providing screening procedures pursuant to the grant will utilize the superior procedure rather than the procedure described in such subsection.

"(c) QUALITY ASSURANCE REGARDING SCREENING FOR BREAST CANCER.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will assure the quality of any screening procedure for breast cancer conducted pursuant to such section and, in the case of mammography, will provide that—

"(1) the equipment used to perform the mammography will be specifically designed for mammography and will meet appropriate radiologic standards for mammography;

"(2) the mammography will be performed by an individual who—

"(A) is licensed by a State to perform radiological procedures; or

"(B) is certified as qualified to perform radiological procedures by an appropriate organization;

"(3) the results of the mammography will be interpreted by a physician who—

"(A) is certified as qualified to interpret radiological procedures by an appropriate board; or

"(B) is certified as qualified to interpret screening mammography procedures by an appropriate program for assuring the qualifications of the individual with respect to such interpretations; and

"(4) with respect to the first screening mammography performed on a woman for which payment is made pursuant to section 1501(a), there are satisfactory assurances that the results of the mammography will be placed in permanent medical records maintained with respect to the woman.

"(d) QUALITY ASSURANCE REGARDING SCREENING FOR CERVICAL CANCER.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will assure the quality of any screening procedure for cervical cancer conducted pursuant to such section and, in the case of the pap smear (or other cytological screening proceducre replacing the pap smear pursuant to subsection (b)), will provide—

"(1) the maximum number of cytology slides that any individual may screen in a 24-hour period;

"(2) requirements that a clinical laboratory maintain a record of—

"(A) the number of cytology slides screened during each 24-hour period by each individual who examines cytology slides for the laboratory; and

"(B) the number of hours devoted during each 24-hour period to screening cytology slides by such individual;

"(3) criteria for requiring rescreening of cytological preparations, such as—

"(A) random rescreening of cytology specimens determined to be in the benign category;

"(B) focused rescreening of such preparations in high risk groups; and

"(C) for each abnormal cytological result, screening of all prior cytological specimens for the patient, if available;

"(4) periodic confirmation and evaluation of the proficiency of individuals involved in screening or interpreting cytological preparations, including announced and unannounced on-site proficiency testing of such individuals, with such testing to take place, to the extent practicable, under normal working conditions;

"(5) procedures for detecting inadequately prepared slides, for assuring that no cytological diagnosis is rendered on such slides, and for notifying referring physicians of such slides;

"(6) requirements that all cytological screening be done on the premises of an appropriately qualified laboratory;

"(7) requirements for the retention of cytology slides by laboratories for appropriate periods of time; and

"(8) requirements of periodic inspection of cytology services by persons capable of evaluating the quality of cytology services.

"(e) ISSUANCE BY SECRETARY OF GUIDELINES WITH RESPECT TO QUALITY OF MAMMOGRAPHY AND CYTOLOGICAL SERVICES.—

"(1) IN GENERAL.—The Secretary shall establish guidelines for assuring the quality of any mammography and cytological screening procedure conducted pursuant to section 1501(a). Such guidelines with respect to mammography shall include the provisions of paragraphs (1) through (4) of subsection (c), and such guidelines with respect to cytological screening procedures shall include the provisions of paragraphs (1) through (8) of subsection (d).

"(2) APPLICABILITY WITH RESPECT TO GRANTS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the State will, with respect to any mammography or cytological screening procedure conducted pursuant to such section, ensure that the procedure is conducted in accordance with the guidelines issued by the Secretary under paragraph (1).

"(3) RESPONSIBILITY OF STATES IN ABSENCE OF GUIDELINES.—With respect to circumstances in which a State receives a grant under section 1501 before the issuance of guidelines under paragraph (1), this subsection may not be construed to affect in such circumstances the obligation of the State pursuant to subsection (a)(1) to provide for screening procedures and referrals or the obligations under subsections (c) and (d) with respect to providing for quality in the screening procedures.

"SEC. 1504. ADDITIONAL REQUIRED AGREEMENTS.

"(a) PRIORITY FOR LOW-INCOME WOMEN.—The Secretary may not make a grant under section 1501 unless the State involved agrees that low-income women will be given priority in the provision of services and activities pursuant to paragraphs (1) and (2) of section 1501(a).

"(b) LIMITATION ON IMPOSITION OF FEES FOR SERVICES.—The Secretary may not make a grant under section 1501 unless the State involved agrees that, if a charge is imposed for the provision of services or activities under the grant, such charge—

"(1) will be made according to a schedule of charges that is made available to the public;

"(2) will be adjusted to reflect the income of the woman involved; and

"(3) will not be imposed on any woman with an income of less than 100 percent of the official poverty line, as established by the Director of the Office of Management and Budget and revised by the Secretary in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981.

"(c) STATEWIDE PROVISION OF SERVICES.—

"(1) IN GENERAL.—The Secretary may not make a grant under section 1501 unless the State involved agrees that services and activities under the grant will be made available throughout the State, including availability to members of any Indian tribe or tribal organization (as such terms are defined in section 4 of the Indian Self-Determination and Education Assistance Act).

"(2) WAIVER.—The Secretary may waive the requirement established in paragraph (1) for a State if the Secretary determines that compliance by the State with the requirement would result in an inefficient allocation of resources with respect to carrying out the purpose described in section 1501(a).

"(d) RELATIONSHIP TO ITEMS AND SERVICES UNDER OTHER PROGRAMS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the grant will not be expended to make payment for any item or service to the extent that payment has been made, or can reasonably be expected to be made, with respect to such item or service—

"(1) under any State compensation program, under an insurance policy, or under any Federal or State health benefits program; or

"(2) by an entity that provides health services on a prepaid basis.

"(e) COORDINATION WITH OTHER BREAST AND CERVICAL CANCER PROGRAMS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the services and activities funded through the grant shall be coordinated with other Federal, State, and local breast and cervical cancer programs.

"(f) LIMITATION ON ADMINISTRATIVE EXPENSES.—The Secretary may not make a grant under section 1501 unless the State involved agrees that not more than 10 percent of the grant will be expended for administrative expenses with respect to the grant.

"(g) RESTRICTIONS ON USE OF GRANT.—The Secretary may not make a grant under section 1501 unless the State involved agrees that the grant will not be expended to provide inpatient hospital services for any individual.

"(h) RECORDS AND AUDITS.—The Secretary may not make a grant under section 1501 unless the State involved agrees that—

"(1) the State will establish such fiscal control and fund accounting procedures as may be necessary to ensure the proper disbursal of, and accounting for, amounts received by the State under such section; and

"(2) upon request, the State will provide records maintained pursuant to paragraph (1) to the Secretary or the Comptroller of the United States for purposes of auditing the expenditures by the State of the grant.

"(i) REPORTS TO SECRETARY.—The Secretary may not make a grant under section 1501 unless the State involved agrees to submit to the Secretary such reports as the Secretary may require with respect to the grant.

"SEC. 1505. DESCRIPTION OF INTENDED USES OF GRANT.

"The Secretary may not make a grant under section 1501 unless—

"(1) the State involved submits to the Secretary a description of the purposes for which the State intends to expend the grant;

"(2) the description identifies the populations, areas, and localities in the State with a need for the services or activities described in section 1501(a);

"(3) the description provides information relating to the services and activities to be provided, including a description of the manner in which the services and activities will be coordinated with any similar services

or activities of public or nonprivate entities; and

"(4) the description provides assurances that the grant funds will be used in the most cost-effective manner.

"SEC. 1506. REQUIREMENT OF SUBMISSION OF APPLICATION.

"The Secretary may not make a grant under section 1501 unless an application for the grant is submitted to the Secretary, the application contains the description of intended uses required in section 1505, and the application is in such form, is made in such manner, and contains such agreements, assurances, and information as the Secretary determines to be necessary to carry out this title.

"SEC. 1507. TECHNICAL ASSISTANCE AND PROVISION OF SUPPLIES AND SERVICES IN LIEU OF GRANT FUNDS.

"(a) TECHNICAL ASSISTANCE.—The Secretary may provide training and technical assistance with respect to the planning, development, and operation of any program or service carried out pursuant to section 1501. The Secretary may provide such technical assistance directly or through grants to, or contracts with, public and private entities.

"(b) PROVISION OF SUPPLIES AND SERVICES IN LIEU OF GRANT FUNDS.—

"(1) IN GENERAL.—Upon the request of a State receiving a grant under section 1501, the Secretary may, subject to paragraph (2), provide supplies, equipment, and services for the purposes of aiding the State in carrying out such section and, for such purpose, may detail to the State any officer or employee of the Department of Health and Human Services.

"(2) CORRESPONDING REDUCTION IN PAYMENTS.—With respect to a request described in paragraph (1), the Secretary shall reduce the amount of payments under the grant under section 1501 to the State involved by an amount equal to the costs of detailing personnel (including pay, allowances, and travel expenses) and the fair market value of any supplies, equipment, or services provided by the Secretary. The Secretary shall, for the payment of expenses incurred in complying with such request, expend the amounts withheld.

"SEC. 1508. EVALUATIONS AND REPORTS.

"(a) EVALUATIONS.—The Secretary shall, directly or through contracts with public or private entities, provide for annual evaluations of programs carried out pursuant to section 1501.

"(b) REPORT TO CONGRESS.—The Secretary shall, not later than 1 year after the date on which amounts are first appropriated pursuant to section 1509(a), and annually thereafter, submit to the Committee on Energy and Commerce of the House of Representatives, and to the Committee on Labor and Human Resources of the Senate, a report summarizing evaluations carried out pursuant to subsection (a) during the preceding fiscal year and making such recommendations for administrative and legislative initiatives with respect to this title as the Secretary determines to be appropriate.

"SEC. 1509. FUNDING.

"(a) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of carrying out this title, there are authorized to be appropriated $50,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993.

"(b) SET-ASIDE FOR TECHNICAL ASSISTANCE AND PROVISION OF SUPPLIES AND SERVICES.—Of the amounts appropriated under subsection (a) for a fiscal year, the Secretary shall reserve not more than 20 percent for carrying out section 1507.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2575) was agreed to.

BREAST AND CERVICAL CANCER MORTALITY PREVENTION ACT OF 1990

Ms. MIKULSKI. Today we send a message—American women do not have to die unnecessarily. Passage of the Breast And Cervical Cancer Mortality Act of 1990 is another step toward ending the apathy and neglect that have for too long marked our Nation's attitude toward women's health issues. Finally, we have said that we are willing to bring the resources of the Federal Government into the fight against these terrible diseases, which together claim more than 40,000 lives a year.

I feel as though we have sent a get well message to Marilyn Quayle and the first lady of Baltimore, Dr. Pat Schmoke.

I am proud to have sponsored the Breast and Cervical Cancer Mortality Act, along with 52 of my colleagues.

But I hope this bill will be remembered not for our efforts, but for the efforts of Rose Kushner, Jill Ireland and Nina Hyde—all the women who have fought the good fight against breast cancer.

To the end, they held within themselves a special kind of courage, that carried them beyond their own life-and-death struggles and into the fight for all woman's lives.

Like many woman, I was touched by their selfless dedication. Their tireless efforts and special advocacy for women's health live on in the thousands of women whose lives they saved. I would like to thank my colleagues for joining me in carrying on their struggle.

Cervical cancer will strike over 13,000 women in 1990, most of them poor. Breast cancer is this Nation's second leading cause of death among women—one in every ten women will develop it in their lifetime.

Yet, even though an aggressive, comprehensive program can reduce breast cancer deaths by 30 percent, the United States has had no such program. Medicare will not pay for screenings, and in most States neither will Medicaid. Women are dying needlessly because they do not have access to basic medical services.

The Breast and Cervical Cancer Mortality Prevention Act begins to change that. It is an aggressive program, combining education—both of women and of health care professionals; payment for services; coordination with private organizations; and proper followup in a single package. And it delivers these services to the poor women, who need it most.

The purpose of this bill is to ensure that States with an inadequate availability of services and activities related to breast and cervical cancer will be better able to provide these services. It is my hope that the Centers for Disease Control will take into account the severity of the problems that the grants are meant to address and the current availability of services in awarding grants.

Further, it is my understanding that the Centers for Disease Control has always attempted to distribute grants equitably among the principal geographic regions of the United States, and it is my expectation that they will continue to do so in implementing this program.

This is a thorough and comprehensive bill—we have seen what happens when the system doesn't follow through. My clinical lab bill was signed into law almost 2 years ago, yet women are still dying from misread pap smears.

And in New York City, 2,000 poor women were tested for cervical cancer by the Department of Health. They were never told the results. No news is not good news for these women, some of them may be dying.

The Breast and Cervical Cancer Mortality Act is a part of the larger legislative package I introduced earlier this week, The Women's Health Equity Act of 1990. That package addresses the wide ranging inequities that still permeate our nation's health care establishment.

Women are systematically excluded from clinical medical studies around the country. Women have to be sicker than men before physicians will perform heart bypass operations—their complaints are ignored. The U.S. Government's own National Institutes of Health completely ignore obstetrical and gynecological research. As women enter the 21st century, they are still the victims of 14th century attitudes.

I am working to change that. With this bill we have begun to send a message to the Nation's health care establishment: we will not be treated like second-class citizens.

Mr. ADAMS. As a cosponsor of the Breast and Cervical Cancer Mortality Prevention Act, I rise in support of the measure and in support of the compromise amendment that has been worked out between the bill's original supporters and Senator HATCH. It is my strong desire to see this measure pass the Senate and subsequently adopted by the House and sent to the President as quickly as possible. I want to add that as chairman of the District of Columbia Appropriations Subcommittee, we included a similar provision that will also provide mammography and pap smear services to low-income women in the District who are not cov-

ered for these services under any other health care plan.

Passage of the bill before us now will be both significant and symbolic. Significant because the services provided to low-income women through this measure are so desperately needed. Symbolic because it will be the first bill, among 17 other priority measures included in the Women's Health Equity Act package, to pass the Senate. Let me add that I intend to do everything I can to see that we pass as many of the measures in the women's health package as possible before adjourning for the year. Support behind these women's health bills is strong and continues to grow. I am very encouraged that the Labor and Human Resources Committee just this Wednesday supported an NIH Reauthorization bill that includes a proposal that I have sponsored which is also part of the Women's Health Equity Act, the Clinical Trials Fairness Act. Also included in the NIH Reauthorization is the establishment of an Office of Women's Health Care which will develop a plan to establish a Center for Women's Health Research by 1993. I hope that the NIH Reauthorization bill will be brought up for consideration soon after we return in September and that the reauthorization bill will be passed as soon as possible so that women's health research will become the priority it should be at NIH.

Regarding the measure before us now, I want to ask this question—how many times have we all heard the familiar phrase, "an ounce of prevention is worth a pound of cure"? Countless times, I dare say. It it high time for society to endorse this simple principle. 43,000 women died of breast cancer and about 6,000 women died as a result of cervical cancer during 1989. I have heard these figures time and time again, yet still I find it shocking that the rate of mortality for these cancers is so high. It is even more tragic when you realize that a large percentage of these deaths could have been prevented by early detection through mammography or pap smears.

By supporting this measure, we can act now to save thousands of lives in the coming years. Let me relate some important statistics. 150,000 women will develop breast cancer this year. 1 in every 9 American women is currently diagnosed with the disease compared with 1 in every 20 in 1961. Breast cancer takes 40,000 American lives every year. The tragedy is that one-fifth of those deaths are preventable by early detection with a mammogram. As indicated in a fact sheet circulated by the American Cancer Society, the 5-year survival rate for localized breast cancer has risen from 78 percent in the 1940's to 90 percent today. If the breast cancer is not invasive, the survival rate increases to 100%. The survival rate then plummets to 68 percent if the cancer has spread regionally and to 18 percent for severe cases. The preventive measures contained in this bill will help move us toward the day when breast cancer is no longer a killer. The same is true for cervical cancer. The 5-year survival rate for all cervical cancer patients is 67 percent. When diagnosed early, as set forth in this bill, the survival rate increases to 88 percent and if the cancer has not yet become invasive, this increases to almost 100 percent. We must strive for this 100 percent survival rate for both breast and cervical cancer. We have the tools available to us. It is absolutely inexcusable for us not to begin using these tools as effectively as possible. The Breast and Cervical Cancer Mortality Prevention Act will bring us closer to this objective.

The challenge before us is to strengthen this area of public health policy and make quality mammography and pap smears more accessible. The focus of this bill is on low-income women because we know that cost is a major reason why many women do not receive these vital preventive services. As a consequence of this cost barrier, irreversible breast and cervical cancer strikes a disproportionately large number of low-income women. The bill before us addresses this access problem. Under this measure, a matching grant program will be established which will require states to use 60 percent of the funding for actually providing mammography and pap smear screening services. The remaining 40 percent may be used for training, technical assistance and quality assurance and monitoring.

Let me take a moment to speak about the funds this bill will direct toward training and quality assurance of mammography and pap smear screening services. We cannot underestimate the need for this money and the importance of the activities it will support. It does us absolutely no good to increase access to mammography and pap smear screening if we cannot rely on the test results. Many of you are aware of the work Senator Mikulski and I did together on the clinical laboratory improvement amendments [CLIA]. In crafting this bill, which is now federal law, we sought to stem the rising tide of inaccurate laboratory test results. Among the laboratory tests that fueled the public outcry for this bill was the pap smear. This initiative relies on the CLIA for its pap smear quality assurance provisions. Let me add that the Health Care Financing Administration is in the process of collecting public comment on its proposed final regulations to implement CLIA, and it is my hope that the final regulations will be tightly drawn to ensure accurate test results and will be workable for the laboratories and personnel that are required to adhere to the new law.

Quality assurance for mammography cannot be overlooked either. A month or so ago, one of the major networks devoted several segments to the incidence of inaccurate mammography results. The report told of cases where obsolete equipment was used, unqualified personnel were reading mammography results, and cases where women were simply told by their doctors that they didn't need mammography at the time. Congress sought to correct this problem last year when it included the mammography screening benefit and mammography quality assurance provisions as part of the Medicare Catastrophic Coverge Act. Unfortunately, with the repeal of that law, we were also forced to repeal the mammography quality assurance provisions. The measure before us will reinstate these important requirements.

I hope everyone here shares my strong desire to see this bill enacted into law. With that, I urge my colleagues to support this important measure.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading and passage of the bill.

The bill (H.R. 4790) was ordered to a third reading, was read the third time, and passed.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONGRESSIONAL SCHOLARSHIPS FOR SCIENCE, MATHEMATICS, AND ENGINEERING

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 762, H.R. 996, the Excellence in Mathematics and Science bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 996) to establish the congressional scholarships for science, mathematics, and engineering, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2576

Mr. NUNN. Mr. President, I send a Kennedy substitute to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN] for Mr. KENNEDY, proposes an amendment numbered 2576.

Mr. NUNN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment is printed in today's RECORD under "Amendments Submitted.")

THE EXCELLENCE IN MATH, SCIENCE, AND ENGINEERING EDUCATION ACT—S. 2114

Mr. KENNEDY. Mr. President, over the last 18 months, math and science education has been the focus of our work in the Labor Committee. We held several days of hearings on this important issue and have received comments from many organizations and individuals. In February, I introduced S. 2114, along with Senator HATFIELD and 15 other colleagues. It is a revised version of this bill that we will consider today.

This vitally important legislation has three themes. First, it focuses on improving math-science education at the elementary and secondary school level. There is no dispute about the need to make improvements in this area. Indeed, one of our national education goals is to have American students first in the world in math and science by the year 2000.

This bill contains several provisions that will help us meet that challenge. It creates a National Clearinghouse for Science, Mathematics, and Technology Materials authorizes regional science, mathematics and technology education consortiums, and authorizes grants for local school systems to make systemic reforms in math and science education.

This bill also authorizes grants for museums, planetariums, zoos, and libraries to enable them to develop hands-on, interactive educational activities for elementary school-aged children. I was deeply impressed by what we learned about the science museums during the course of our hearings and thier great potential for showing schoolchildren the possibilities of science. The bill authorizes $10 million for these programs. I wish to emphasize that this authorization is expected to be in addition to the funds that the National Science Foundation is currently spending in this area. The Nation needs to draw on the resources of these kinds of facilities much more extensively. I hope that this modest initiative will encourage that.

Second, the bill is designed to increase the number of individuals studying for advanced degrees in science, mathematics, and engineering. According to a National Science Foundation study, the Nation will face a shortage of 675,000 scientists and engineers by the year 2006. To avoid this shortage—and the negative consequences for our economic competitiveness—we must begin to train more men and women in these desciplines immediately.

Therefore, the bill authorizes a doubling of the highly successful NSF graduate fellowship program. It also establishes a traineeship program, so that graduate schools that do not currently have a large number of NSF graduate fellows will be able to attract highly talented students. Finally, this section of the bill authorizes a math-science teacher corps and the National Science Scholars Program to attract more academically talented undergraduates into math and science.

The third goal of the bill is to increase the participation of women and minorities in science, mathematics, and engineering. We all know that women and minorities are seriously underrepresented in scientific and technical careers. Fairness demands that we address this problem. And so does our national self-interest.

The bill authorizes several specific initiatives designed to improve minority participation in math-science, as well as emphasizing increased participation of women and minorities throughout its titles. Their participation in scientific careers has been a longstanding interest of mine, and I regard this emphasis in the bill as vitally important.

I also hope that we can find a way to do more in the area of informal education. I am especially impressed with what we have learned about this issue. I know that the administration is developing a math and science bill to be submitted next year, and I hope that we will be able to consider some of the excellent ideas that we have not been able to incorporate here.

Despite this, I believe this bill is an excellent start on improving the Nation's math-science education. Upgrading elementary-secondary education, training graduate level scientists and engineers, and increasing the participation of women and minorities are all central issues that urgently need our attention.

This bill has been developed with bipartisan support. I particularly commend Senator HATFIELD for his leadership on this issue that is so essential to the Nation's future. On the Labor Committee, I especially commend Senators HATCH, PELL, and KASSEBAUM for their assistance in fashioning a bill that enjoys widespread support. I appreciate the assistance we received from their staff members in the development of this measure. I also want to thank the majority leader for his strong interest in this legislation. I hope that my colleagues will join me in voting to pass this important bill.

Mr. HATFIELD. Mr. President, I am delighted to rise with my colleague from Massachusetts, Mr. KENNEDY, and other members of the Senate Labor Committee, in support of S. 2114, the Excellence in Mathematics, Science and Engineering Education Act of 1990. I urge the Senate to move to final passage of this legislation.

Mr. President, I have traversed a long path over the past 2 years in developing and advancing legislation to enhance the Federal role in improving science and mathematics education. I rise with great pride in support of legislation which represents the cornerstone of the Federal blueprint for bettering our children's achievement in these critical subject matters.

My colleague from Massachusetts, Mr. KENNEDY and I clearly stand committed to this extremely pressing issue. And now we have the attention of our colleagues. In the last 2 years, the mathematics and science education crisis has risen from virtual obscurity to political center stage. For example, the resolution Senator GLENN and I introduced 2 years ago calling on Congress to make mathematics and science education a top priority received only a handful of cosponsors, and generated little interest.

Today, however, it is nearly impossible to pick up a newspaper or magazine, or turn on the television without hearing the latest statistics about the crisis. This heightened visability has paved the way for the most comprehensive mathematics and science education legislation in this decade; S. 2114, which is before us today.

I recently learned of a situation, Mr. President, which further amplifies the needs of our Nation in the mathematics and science fields: A simple math mistake—somebody added when he or she should have subtracted, or vice versa—caused the Hubble Space Telescope to miss its target stars and point to the wrong spot in the heavens. The telescope missed its target by one-half of a degree—or about the width of a full moon as seen from Earth, causing a 1-week delay in publication of the first star pictures.

This is not a monumental error. However, it serves to illustrate the point that even the most basic mathematics and science skills are critical to almost everything imaginable—from watching the heavens to turning on our headlights. And quite frankly, our children are just not measuring up in these crucial areas.

I have recited the dismal statistics on this floor many times. Virtually everyone has heard about the standardized mathematics and science tests given to young people in more than a dozen industrialized countries: American students ranked at or near the bottom of every single one. No matter how we as policymakers interpret

these results, they do not befit our superpower status.

The reasons behind these statistics are obvious. Over 7,000 high schools in the United States do not even offer a course in physics, 4,000 do not offer chemistry, and 2,000 do not offer biology. Seventy-five percent of all junior high school science teachers in the United States today do not meet the minimum certification requirements of the National Science Teacher's Association. And most distressingly, one-third of our high schools do not offer enough mathematics courses to prepare even the best students to enter engineering school.

Additionally, we can no longer rely on the traditional pool of 22-year-old white males to enter science—the number are declining drastically. Clearly, we must develop an inclusive strategy to expand our pool of potential scientists and engineers to include vastly increased numbers of students, particularly women and minorities. And I believe that the Federal Government must lead the way.

While some people may think of mathematics and science as isolated and removed subjects, they literally have an effect on everything: From our productivity at home to our competitiveness abroad—as well as on the quality of life we enjoy in this country. Yet, in the absence of dramatic and immediate change, the Office of Technology Assessment predicts a shortfall of 700,000 trained scientists and engineers within the next decade. We must act.

And we must not underestimate the critical importance of the visibility this issue now has: In Washington—where 1,001 important issues are competing for attention—this issue is now at the top of the agenda. Our challenges is to seize this opportunity and implement dramatic initiatives now. Mobilization of our Federal resources is imperative if we are to substantially impact on this crisis.

S. 2114 is a bill built on cooperation and bipartisanship. I would like to take this opportunity to thank Senator KENNEDY for his leadership in moving this legislation to the forefront of the congressional agenda. I also commend Senators HATCH and KASSEBAUM, and the rest of the Senate Labor Committee, for their cooperation and support of these critical issues. Finally, Senator GLENN has my gratitude for the attention he has brought to mathematics and science education.

Many long hours were expended on this legislation by the talented staff of the Members involved. I would like to specifically thank Becky Rogers, Laurie Chivers, Terry Hartle, Ellis Mottur, Amanda Broun, Nick Littlefield, Ann Young, and Kevin Bruns. I am grateful for the assistance and support received from the Senate Labor Committee.

Mr. President, we have talked a great deal on this floor about expenditures for education—some of money, others of time and energy. I have little patience with those who say we cannot afford these expenditures. Frankly, we cannot afford to continue without them. Our children are our future. That line is repeated so often it has become just another cliche within our political culture. But we must never lose sight of the fact that our children—the individual children of this Nation—hold tomorrow in their hands. A young science student in Missouri once said "Science class is where we learn how tomorrow happens." Indeed it is, and our investment in all education is, very literally, our investment in the future.

Mr. COCHRAN. Mr. President, at a time when science and technology are playing an increasingly important role in the lives of all citizens, the average high school student in the United States is taking fewer math and science classes. The 10th grade is the last time most high school students in the United States are exposed to science and mathematics. American students take one-half to one-third fewer courses in science and mathematics than their counterparts in other highly developed countries. Recent international mathematics and science surveys indicate that United States students are scoring well below students from Japan, West Germany, East Germany, and the Soviet Union.

Qualified teachers of mathematics and science are hard to find, particularly in rural areas where shortages are critical. Women and minorities are vastly under-represented in the field. There are fewer graduate and doctoral candidates in engineering and science fields, and universities are finding that the number of foreign born students obtaining advanced degrees in these areas is rapidly increasing. Often these students return to their homeland upon completion of the doctoral degree.

We are not ensuring that our students are equipped with a good basic understanding of mathematics and science. We are not doing enough to encourage women and minorities to enter these courses of study at the college level, and not enough undergraduates are continuing to obtain graduate degrees and post graduate degrees.

Then Excellence in Mathematics, Science, and Engineering Education Act under consideration today addresses these needs through several new programs which are designed to set forth national policies and objectives, help local school districts improve the quality of their math and science programs, encourage more undergraduate and graduate students to study math, science and engineering and attract more women and minorities into the field.

I am particularly supportive of the graduate traineeship section of the bill authorizing grants to emerging institutions classified as group II organizations by the National Science Foundation. This will assist those academic institutions that historically have received relatively little Federal fellowship funding to offer graduate traineeships. This program will increase the numbers and diversity of individuals entering and completing graduate and doctoral programs in mathematics, science, and engineering and will enhance the capacity of emerging academic institutions which have in the past received relatively limited Federal support but which have demonstrated academic excellence in in mathematics, science, and engineering.

In addition, a modest new program has been added to authorize the National Science Foundation to make star schools telecommunication demonstration grants to States or multi-State areas experiencing shortages of math and science teachers in elementary and secondary schools. The grants will be used to demonstrate Statewide or regional application of two-way audio and video interactive telecommunication and computer linkages between the State educational agency, public television, and elementary and secondary schools to provide math and science programs, particularly in rural areas experiencing teacher shortages in math and science. Grants are to be awarded on a competitive basis for the purpose of purchasing equipment, developing interactive linkages, training teachers, and funding other costs associated with the development and implementation of interactive telecommunication math and science classes. Those States having high percentages of individuals living in rural areas and with a high percentage of students eligible for chapter 1 programs have particularly difficult problems and should be given special consideration in applying for a grant.

Mr. President, I commend the members of the committee, and our staff members, for their work on this bill, and I urge the Senate to approve it.

S. 2114 AND H.R. 996

Mr. SIMON. Mr. President, I rise in support of the Excellence in Math, Science, and Engineering Education Act of 1990. The number of science, engineering, and technical jobs requiring competence in math will increase 36 percent by the year 2000, but the number of college students currently geared to those types of careers will not meet the demand. This bill represents an excellent first step toward narrowing this gap in our country's technological literacy.

Last November, Dr. Leon Lederman, Nobel laureate in physics, testified before the Labor and Human Resources Committee about his proposal for an academy to improve the math and science teaching skills of Chicago's teachers. Education is not a new endeavor for Dr. Lederman. He was the driving force behind the highly acclaimed Illinois Mathematics and Science Academy, a high school which last year had the highest average American college test score of any school in the country.

With the support and encouragement of the Secretary of Energy, Adm. James Watkins, Dr. Lederman proposed tapping the human and technological resources of the Department of Energy's laboratories, Fermi and Argonne, to help the Chicago public schools. In partnership with area universities, the school system, the city, the State, and the labs, the academy will develop the math and science teaching skills of more than 15,000 teachers in Chicago.

I am pleased to announce that the academy now has a building, the beginning of a staff, and some startup funds. The Illinois Institute of Technology, with some building renovations, will house the academy; Dr. Gordon Berry is on loan from Argonne National Laboratory as the acting director; and the Department of Energy has announced a planning grant of $215,000 for the academy, with a matching grant of about $200,000 from the National Science Foundation.

Mr. President, this project could well become a model for inner-city school systems across the country, and I am pleased that S. 2114 will help the academy, and projecs like it, in a number of ways.

First, title V of the bill is the Federal Laboratories Education Partnerships Act of 1990, which I developed with Senator BINGAMAN. It provides the Department of Energy with the authorization that it needs to move forward with the academy and other projects across the country. We have also moved on a parallel track with an amendment to the defense bill to give DOE this authorization. In addition, title V requires other agencies and laboratories to participate in efforts to improve math and science education, from kindergarten through college.

Second, S. 2114 provides assistance to school districts undergoing systemwide reform of their math and science curricula. The overhaul planned by the academy's program, combined with the recent Chicago school reform, is perhaps the most dramatic reform in the Nation. It is crucial that the Federal Government provide incentives to these kinds of efforts.

Third, the regional consortiums in title II of the bill would provide just the types of services that are planned at the academy. Indeed, with the focus on women and minorities that is called for in S. 2114, Chicago seems to be the perfect candidate for the center that will serve that region of the country.

Finally, S. 2114 establishes a number of other programs to improve access to hands-on math and science education activities, and encourage more people to go into mathematics, science, and engineering professions, including teaching. The committee modification also includes a Star Schools Telecommunications Program, to help provide effective math and science education programs to rural and other areas that would otherwise not have access to them.

Mr. President, I would like to commend the members of the Labor and Human Resources Committee for working together to develop a bipartisan bill, directed towards the Nation's most urgent needs. Virtually every program includes a specific focus on disadvantaged students, women, and minorities, and appropriate focus given the alarming gender and racial disparities in math and science professions.

I urge an "aye" vote.

Mrs. KASSEBAUM. Mr. President, I am pleased that the Senate is considering S. 2114, the Excellence in Math, Science and Engineering Education Act. This legislation is the first step in placing the United States once again at the forefront of leadership in the fields of math and science.

A lot of attention has been given to the decline of American students entgering the science and engineering fields. Reports show that Americans are lagging behind other nations in obtaining the skills to go into these fields. One survey found four-fifth of elementary school math teachers were not fully qualified to teach math and two-thirds of elemenatory school science teachers were not fully qualified to teach science. This is a tragedy. The legislation before the Senate today seeks to mend this situation and put American students back in the scientific pipeline.

I am especially pleased that the National Science Scholars Program was included in this bill. This merit-based program awards students who have demonstrated outstanding academic achievement at the secondary level and encourages them to pursue a course of study in the math, science, or engineering fields at the postsecondary level. I think this is an important step in restoring the United States to the position it enjoyed only 20 years ago. At that time, the United States led the world in the number of scientists and engineers per capita. Today, we fall behind other countries with populations equal to half of ours.

The United States' leadership in the fields of math, science, and engineering is a vital national priority. Even as we celebrate the 20th anniversary of man's landing on the moon, we realize that our leadership is being challenged on many fronts. We must respond aggresively to the intense competition we face in high technology fields. Morris Cohen once said that "(s)cience is a flickering light in our darkness, it is but the only one we have and woe to him who would put it out." This legislation ensures that the light will keep burning.

I would like to thank Senator HATFIELD for his leadership on this bill. His long standing interest and personel commitment to the advancement of math and science education has been the backbone of this bill. I am grateful for his efforts and appreciate his help, and that of his staff, Sue Hildick, in seeing this bill to fruition.

I would also like to commend and recognize the hard work done by members of my staff and other staff of the subcommittee on this bill. They have all put in very long hours, and I appreciate all that they have done. Many thanks to Susan Hattan, Becky Rogers Voslow, Lydia Spencer, and Darren Dennis of my staff; Ann Young of Senator PELL's staff; Laurie Chivers with Senator HATCH; Terry Hartle, Amanda Brown, Micheal Epp, and Rusty Barbour with Senator KENNEDY; Doris Dixon with Senator COCHRAN; Kevin Bruns with Senator GLENN's, staff and Mark Sigurski with legislative counsel.

Mr. HATCH. Mr. President, we all must acknowledge the need to encourage our young people, especially minorities and women, to excel in mathematics, science, and engineering. Recent international comparisons have shown that the United States must redirect its attention to the importance of math and science competency among our students.

Utah, as you know, has a long history of involvement in major initiatives in science. People in Utah are not afraid of taking risks to explore new ideas. Doctors at the University of Utah developed the artificial heart. Scientists in Utah are doing unprecedented research on genetic diseases that is possible because of the capability of the researchers and the genealogical records available to them through the Mormon Church. Research is continuing on cold fusion. All of these studies are making, and will make, a major contribution to the body of knowledge available to mankind. I am very proud of the research being done in Utah.

This bill is intended to help meet the need for new mathematics, scientists, and engineers; and, of course, this need can only be met by improving the math and science education of our young people and by encouraging them to pursue careers in these fields.

I had hoped that our consideration of this bill would be postponed until the administration had its proposal

available to us. I believe it is important to identify what remains to be done for which there is no existing authority. However, the committee has chosen to proceed with his bill; and, indeed, I believe the bill does provide for some needed coordination in education and for an increase in our efforts at the National Science Foundation. I also look forward to receiving the administration's recommendations in the near future.

Mr. NUNN. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment.

The amendment (no. 2576) was agreed to.

Mr. McCAIN. I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall the bill pass?

So the bill (H.R. 996), as amended, was passed.

Mr. McCAIN. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read: "To promote excellence in American mathematics, science and engineering education; enhance the scientific and technical literacy of the American public; stimulate the professional development of scientists and engineers; increase the participation of women and minorities in careers in mathematics, science, and engineering; and for other purposes.".

Mr. NUNN. I move that the Senate insist on its amendment and request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate.

There being no objection, the Chair appointed Mr. KENNEDY, Mr. PELL, Mr. DODD, Mr. HATCH, and Mrs. KASSEBAUM conferees on the part of the Senate.

POLLUTION PROSECUTION ACT

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 687, S. 2176, the Polluton Prosecution Act.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 2176) to provide better enforcement of the environmental laws of the United States, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Environment and Public Works, with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets and the parts of the bill intended to be inserted are shown in italics.)

S. 2176

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Pollution Prosecution Act of 1990".

SEC. 2. EPA OFFICE OF CRIMINAL INVESTIGATION.

[The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall increase the number of professional criminal investigators assigned to its Office of Criminal Investigations in fiscal year 1991, and in each of the next following 4 fiscal years. The increase in each such fiscal year shall be at least equal to 30 percent of the aggregate number of criminal investigators assigned to that office during the prior fiscal year. For fiscal year 1991, and in each of the next following 4 fiscal years, the Administrator shall provide additional support staff to the Office of Criminal Investigations.]

(a) The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall increase the number of criminal investigators assigned to the Office of Criminal Investigations by such numbers as may be necessary to assure that the number of criminal investigators assigned to the office—

(1) for the period October 1, 1991, through September 30, 1992, is not less than 72;

(2) for the period October 1, 1992, through September 30, 1993, is not less than 110;

(3) for the period October 1, 1993, through September 30, 1994, is not less than 123;

(4) for the period October 1, 1994, through September 30, 1995, is not less than 160; and

(5) beginning October 1, 1995, is not less than 200.

(b) For fiscal year 1991 and in each of the next following 4 fiscal years, the Administrator shall, during each such fiscal year, provide increasing numbers of additional support staff to the Office of Criminal Investigations.

SEC. 3. CIVIL INVESTIGATORS.

The Administrator, as soon as practicable following the date of the enactment of this Act, but no later [than fiscal year 1991, shall hire 50 civil investigators to assist the Office of Enforcement and Compliance Monitoring] *than September 30, 1991, shall increase by 50 the number of civil investigators assigned to assist the Office of Enforcement* in developing and prosecuting civil and administrative actions and carrying out its other functions.

SEC. 4. NATIONAL TRAINING INSTITUTE.

The Administrator shall, as soon as practicable but no later than [fiscal year 1991,] *September 30, 1991* establish within the Office of Enforcement [and Compliance Monitoring] the National Enforcement Training Institute. It shall be the function of the Institute, among others, to train Federal, State, and local lawyers, inspectors, civil and criminal investigators, and technical experts in the enforcement of the Nation's environmental laws.

SEC. 5. FUND.

(a) There is estabilshed in the Treasury of the United States the Pollution Prosecution Fund (hereinafter referred to as the "fund").

[(b) Commencing with fiscal year 1991, and each fiscal year thereafter, the Secretary of the Treasury shall transfer to the fund an amount equal to the greater of (1) $10,000,000, or (2) an amount determined by the Secretary to be equal to 50 percent of all moneys (other than moneys specifically earmarked by law for other purposes) deposited in the general revenues of the Treasury during the preceding fiscal year from penalties imposed in connection with the violation of laws administered by the Environmental Protection Agency.]

(b) The Secretary of the Treasury shall transfer to the fund amounts determined by the Secretary as follows:

(1) for fiscal year 1991, an amount equal to 50 percent of all moneys deposited in the general revenues of the Treasury during the preceding fiscal year from civil and criminal penalties imposed in connection with the violation of laws administered by the Environmental Protection Agency (other than moneys specifically earmarked by law for other purposes), or $13,000,000 of such moneys so deposited, whichever is less;

(2) for fiscal year 1992, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $18,000,000 of such moneys, whichever is less;

(3) for fiscal year 1993, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $20,000,000 of such moneys, whichever is less;

(4) for fiscal year 1994, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $26,000,000 of such moneys, whichever is less; and

(5) for fiscal year 1995, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $33,000,000 of such moneys, whichever is less.

(c) Moneys in the fund shall be available, in such amounts as are provided in appropriation Acts, for use in carrying out the provisions of this Act. Moneys in the fund, to the extent determined by the Administrator to be in excess of the amounts needed for purposes of this Act, shall be returned to the general revenues of the Treasury.

(d) Nothing in this Act shall be construed as reducing or otherwise modifying or limiting any other authorization for appropriations available to the Environmental Protection Agency.

SEC. 6. AUTHORIZATION.

[For the purpose of meeting the initial needs of this Act for fiscal year 1991, there is authorized to be appropriated $10,000,000.]

(a) For the purpose of carrying out the provisions of this Act, there is authorized to be appropriated from the fund for each of the fiscal years 1991 through 1995, an amount equal to the amount transferred to

the fund by the Secretary of the Treasury for such fiscal year pursuant to section 5.

(b) In the event the amount transferred to the fund pursuant to section 5 is less than $13,000,000 for fiscal year 1991, $18,000,000 for fiscal year 1992, $20,000,000 for fiscal year 1993, $26,000,000 for fiscal year 1994, or $33,000,000 for fiscal year 1995, there is authorized to be appropriated to the Environmental Protection Agency from the general revenues of the United States for each such fiscal year such sums as may represent the difference between the amount transferred for that fiscal year and the specified dollar amounts for such fiscal year.

THE POLLUTION PROSECUTION ACT

Mr. LIEBERMAN. Mr. President, I rise in support of S. 2176, the pollution prosecution bill, which I introduced along with Senators LAUTENBERG, CHAFEE, DURENBERGER, JEFFORDS, WILSON, and SIMON. I am pleased that the House of Representatives has recently passed a companion bill as part of the EPA Cabinet bill and that the House sponsor indicated during the floor debate that the administration supports the bill. We saw that support in the Senate as well, when EPA's Assistant Administrator for Enforement testified on April 24, 1990 concerning S. 2176 that, "EPA believes that the bill is timely and important to improving environmental enforcement and compliance in our Nation."

Mr. President, during my experience as attorney general of Connecticut, I became acutely aware that having tough laws and regulations in place is only half the battle toward achieving compliance with our environmental laws. Ensuring that the laws are enforced is the second critical part of any truly effective system of environmental laws.

One especially important and relatively new approach to environmental enforcement is the use of criminal penalties and imprisonment of individuals who violate our environmental laws.

Those who violate such laws have been called green collar criminals, and I believe people who pollute should face the possibility of doing time in jail. Monetary penalties against a company often do not represent enough of a deterrent to prevent environmental crimes; they can be too easily written off as another cost of doing business.

Mr. President, Attorney General Dick Thornburgh recently stressed the importance of criminal prosecution as a means of deterring deliberate noncompliance with our environmental laws. He stated:

> With callous disregard for our actions and an almost hostile view toward the environment, for nearly 200 years we seemed not to care and America took a very long journey down the road of indiscriminate pollution.

The laws we have enacted are tough. Under the Clean Water Act, the oil-spill legislation passed by the Senate and the Clean Air Act provisions passed by the Senate, a violator can go to jail and face large civil and criminal penalties for each violation.

But, while the Attorney General's words are tough, the program at EPA does not provide enough tools to follow up on these words. The backbone of EPA's criminal enforcement program is its investigators, who provide EPA with the ability to collect evidence about environmental violations. Yet, unbelievably, EPA only has approximately 50 criminal investigators throughout the Nation—in essence, less than one investigator for each State. Some individual States have devoted almost that many investigators to enforcement of state criminal environmental laws. And other law enforcement agencies, such as the Fish and Wildlife Service, have more than four times the number of investigators which EPA has.

Some of the impetus for this bill resulted from the testimony we heard last November before Senator REID's subcommittee. Deputy Administrator Habicht, EPA Inspector General John Martin, and District Attorney Don Mielke, Chairman of the Environment Protection Committee of the National District Attorneys Association, emphasized the need to improve training opportunities for investigators, inspectors, lawyers, and technical staff. Other witnesses stressed the importance of an increase in criminal investigators.

I am especially pleased that the National District Attorneys Association, in a resolution to the President, supported an increase in the number of EPA criminal investigators to 175 and the establishment of a National Enforcement Training Institute.

Jud Starr, who is the former head of the Justice Department's environmental crimes section pointed out during hearings the weaknesses in EPA's program created by the inadequate number of investigators. Currently, he testified, cases are investigated by EPA only after the violations are discovered and the harm is done. This means that EPA is always in a reactive posture and that few cases are the product of reasoned or targeted focus on suspected wrongdoing. He testified that, "as a consequence, EPA's limited resources are not directed toward uncovering practices which would provide the greatest public exposure and deterrence." However, with more criminal investigators, EPA would be able to bring cases that would have greater deterrent value than those currently being brought.

With the proposed increase in the number of criminal and civil investigators and an increased emphasis on training of law enforcement personnel, I am hopeful that the enforcement of our environmental laws will be strengthened and greater compliance with the laws will occur.

Finally, I believe the proposal to authorize EPA to hire 50 civil investigators will not only strengthen compliance with our laws, but will do so in a cost-effective manner. Investigators are used to track down witnesses; they also provide critical support for court cases. Currently, however, EPA is too often required to rely on outside consultants to help develop cases. As a member of the Governmental Affairs Committee, I have heard extensive testimony that EPA's reliance on contractors is not cost effective. This legislation will help ensure that EPA's reliance on outside consultants is decreased.

Mr. President, I also believe the mechanism for the funding as set forth in S. 2176 will be sufficient to get the job done.

Mr. President, I wish to thank Senators BURDICK, BAUCUS, and CHAFEE of the Environment and Public Works Committee and their staffs for their assistance in advancing this legislation.

Mr. NUNN. I ask unanimous consent that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2176

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

The Act may be cited as the "Pollution Prosecution Act of 1990".

SEC. 2. EPA OFFICE OF CRIMINAL INVESTIGATION.

(a) The Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall increase the number of criminal investigators assigned to the Office of Criminal Investigations by such numbers as may be necessary to assure that the number of criminal investigators assigned to the office—

(1) for the period October 1, 1991, through September 30, 1992, is not less than 72;

(2) for the period October 1, 1992, through September 30, 1993, is not less than 110;

(3) for the period October 1, 1993, through September 30, 1994, is not less than 123;

(4) for the period October 1, 1994, through September 30, 1995, is not less than 160; and

(5) beginning October 1, 1995, is not less than 200.

(f) For fiscal years 1991 and in each of the next following 4 fiscal years, the Administrator shall, during each such fiscal year, provide increasing numbers of additional support staff to the Office of Criminal Investigations.

SEC. 3. CIVIL INVESTIGATORS.

The Administrator, as soon as practicable following the date of enactment of this Act,

but no later than September 30, 1991, shall increase by 50 the number of civil investigators assigned to assist the Office of Enforcement in developing and prosecuting civil and administrative actions and carrying out its other functions.

SEC. 4. NATIONAL TRAINING INSTITUTE.

The Administrator shall, as soon as practicable but no later than September, 30, 1991 establish within the Office of Enforcement the National Enforcement Training Institute. It shall be the function of the Institute, among others, to train Federal, State, and local lawyers, inspectors, civil and criminal investigators, and technical experts in the enforcement of the Nation's envionmental laws.

SEC. 5. FUND.

(a) There is established in the Treasury of the United States the Pollution Prosecution Fund (hereinafter referred to as the "fund").

(b) The Secretary of the Treasury shall transfer to the fund amounts determined by the Secretary as follows:

(1) for fiscal year 1991, an amount equal to 50 percent of all moneys deposited in the general revenues of the Treasury during the preceding fiscal year from civil and criminal penalties imposed in connection with the violations of laws administered by the Environmental Protection Agency (other than moneys specifically earmarked by law for other purposes), or $13,000,000 of such moneys so deposited, whichever is less;

(2) for fiscal year 1992, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $18,000,000 of such moneys, whichever is less;

(3) for fiscal year 1993, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $20,000,000 of such moneys, whichever is less;

(4) for fiscal year 1994, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $26,000,000 of such moneys, whichever is less; and

(5) for fiscal year 1995, an amount equal to 50 percent of such moneys deposited in the general revenues during the preceding fiscal year, or $33,000,000 of such moneys, whichever is less.

(c) Moneys in the fund shall be available, in such amounts as are provided in appropriation Acts, for use in carrying out the provisions of this Act. Moneys in the fund, to the extent determined by the Administrator to be in excess of the amounts needed for purposes of this Act, shall be returned to the general revenues of the Treasury.

(d) Nothing in this Act shall be construed as reducing or otherwise modifying or limiting any other authorization for appropriations available to the Environmental Protection Agency.

sec. 6. authorization.

(a) For the purposes of carrying out the provisions of this Act, there is authorized to be appropriated from the fund for each of the fiscal years 1991 through 1995, an amount equal to the amount transferred to the fund by the Secretary of the Treasury for such fiscal year pursuant to section 5.

(b) In the event the amount transferred to the fund pursuant to section 5 is less than $13,000,000 for fiscal year 1991, $18,000,000 for fiscal year 1992, $20,000,000 for fiscal year 1993, $26,000,000 for fiscal year 1994, or $33,000,000 for fiscal year 1995, there is authorized to be appropriated to the Environmental Protection Agency from the general revenues of the United States for each such fiscal year such sums as may represent the difference between the amount transferred for that fiscal year and the specified dollar amounts for such fiscal year.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF NATIONAL AIR AND SPACE MUSEUM

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 657, S. 2636, regarding an extension of the Air and Space Museum at Dulles Airport.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 2636) to authorize the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. ROBB. Mr. President, I rise in support of S. 2636, legislation authorizing the planning and design of an extension to the Smithsonian's Air and Space Museum at Dulles International Airport.

This legislation represents a critical step in making this expansion a reality. As anyone who has visited the Smithsonian's Garber facility, where the extra pieces of the museum's collection are currently warehoused, knows, the existing National Air and Space Museum building on The Mall is just not big enough for all the remarkable things the museum owns.

As we all know, the Federal Government and the Smithsonian are both going to have to do some belt-tightening. We may not be able to do everything we want to do right away, but I am confident this museum will be built, and this authorization is both an important beginning and a statement about what the Smithsonian will do in the future.

I urge my colleagues to support this measure, and hope that we can prevail upon the House to act upon it quickly.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2636

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Board of Regents of the Smithsonian Institution is authorized to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport.

SEC. 2. Effective October 1, 1991, there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution $9,000,000 to carry out the purposes of this Act.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR COMPLETION OF RENOVATION OF GUAM MEMORIAL HOSPITAL

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 719, S. 2841, regarding renovation of the Guam Memorial Hospital.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (S. 2841) to authorize the appropriation of $2,500,000 to complete the renovation of the Guam Memorial Hospital.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources, with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 2841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

That there is authorized to be appropriated $2,500,000 to complete the renovation of the Guam Memorial Hospital.

TITLE II—DISPOSAL OF EXCESS FEDERAL LANDS ON GUAM

SEC. 201. DISPOSITION OF TRANSFERRED REAL PROPERTY.

(a) ESTABLISHMENT OF COMMISSION.—As a prerequisite for the transfer of excess lands under section 202, the Government of Guam must enact legislation which—

(1) establishes an excess lands commission the purpose of which shall be to dispose of lands received pursuant to this title to promote economic self-sufficiency and private sector development in Guam;

(2) provides that the Commission shall have the power—

(A) to hold all right, title, and interest in and to all real property transferred under section 202;

(B) to dispose of real properties or interests therein transferred under section 202 in accordance with the laws of Guam and the priorities set forth in the enabling legislation as required pursuant to paragraph 4 of this subsection;

(C) to resolve conclusively all issues related to lands transferred under section 202 and without appeal to any other agency or court of law except as otherwise expressly provided by the laws of Guam; and

(3) provides that the Commission shall make annual reports to the Senate Committee on Energy and Natural Resources and the Committee on Interior and Insular Affairs of the United States House of Representatives, on or before February 15 of each year, on the disposition of lands transferred pursuant to this title and on the activities and actions of the Commission during the reporting period; and

(4) establishes priorities for the distribution and disposal of the excess lands.

(b) UNITED STATES PERSON.—(1) As used in this title, the term "United States person" means—

(A) any citizen, national, or permanent resident alien of the United States,

(B) any partnership, corporation, or other entity organized under the laws of the United States, any of the several States, the District of Columbia, or any Commonwealth, territory, or possession of the United States, in which citizens, nationals, or permanent resident aliens of the United States beneficially own or control (directly or indirectly) more than 50 per centum of the outstanding voting securities or other voting interest of the partnership, corporation, or other entity, or

(C) the government of any of the several States, the District of Columbia, or any Commonwealth, territory, or possession of the United States.

(2) A partnership, corporation, or other entity described in paragraph (1)(B) shall be presumed to be controlled by individuals who are citizens, nationals, or permanent resident aliens of the United States if—

(A) such individuals are a majority of the partners of the partnership or a majority of the members of the board of directors of the corporation or other entity; or

(B) such individuals have the authority to appoint a majority of the members of the board of directors of the corporation or other entity.

(c) OWNERSHIP OF UNITED STATES PERSONS OF LAND HELD IN TRUST.—For the purposes of this section, the term "ownership of United States persons" means, in the case of a portion of land held in trust, the legal and the beneficial interests of such trust must be held by United States persons.

SEC. 202. TRANSFER OF EXCESS FEDERAL LAND LOCATED ON GUAM.

Except for lands within the boundaries of the War in the Pacific National Historic Park, the Administator of General Services shall transfer, without consideration and without encumbrances, all right, title, and interest of the United States (together with any improvements thereon) in and to any real property on Guam which is determined to be excess under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.) to the Commission to be established by the laws of Guam for disposition in accordance with section 201. Any property subject to this title shall not be subject to Public law 100-77(101 Stat. 482). Title to any real property conveyed pursuant to this title shall revert to the United States if the Commission attempts to convey or otherwise transfer ownership of such property other than to a United States person.

SEC. 203. REPEAL OF CERTAIN CONDITIONS ON LAND TRANSFERRED TO GUAM.

Section 818(b)(2) of Public Law 96-418 (94 Stat. 1782), as amended, is hereby repealed.

Mr. JOHNSTON. Mr. President, I am pleased to support passage of S. 2841, the Omnibus Territories Act of 1990. Each year Congress has typically consolidated legislative provisions regarding the insular areas into one bill. This year is no exception. This year's bill, however, is more brief than is usually the case. There are only two provisions and they represent language transmitted to Congress by the administration.

Title I of S. 2841 authorizes $2.5 million for renovations to the Guam Memorial Hospital; a very worthy project, and one desperately needed to continue to assure that adequate healthcare is available to the people of Guam. The administration transmitted this language to the Congress on June 5, 1990, and the President has requested the appropriation of the needed funds in his fiscal year 1991 budget.

Title II provides for the disposal of excess Federal lands on Guam. This is an issue that has been before the Committee on Energy and Natural Resources for many years, having first been introduced in 1984. It is of keen interest to my colleague, Senator MCCLURE, who was chairman of the committee at that time. It is also of great interest to my friend from Hawaii, Senator INOUYE, who has been more recently involved in the issue through his travel to Guam as chairman of the Defense Appropriations Subcommittee.

I believe that it is fair to say that we all would have liked faster responses from the administration on this matter. However, I was pleased to receive a letter from the Secretary of the Interior on June 19, 1990, with the language, except for minor changes, of title II.

These two executive communications are set forth in the Committee's report on this bill, Senate Report 101-392, and I refer my colleagues to the report for more details on this bill.

There is one point I would like to add with respect to title II, however. It is possible, pursuant to title II of this act, that the Government of Guam, and the Commission to be established pursuant to section 201, could dispose of excess Federal lands to previous landowners of that excess land. While this act is specifically not intended to affect any claims that such landowners, or their heirs, may have against the United States, it is a fact that such claims are the subject of court consideration. It is expected that, should a previous landowner obtain an award as a result of a claim and should also obtain lands pursuant to this act, that the court, when determining the size of any award, will take into account the fact that land has also been received by the claimant. I do not know whether such a coincidence would, in fact, occur, but if it does, I feel that a certain measure of equity should apply.

S. 2841 is an important bill. Title I responds to pressing public healthcare needs, and title II takes a large step toward resolving the long-standing and highly sensitive issue of excess Federal lands in Guam.

Mr. President, I want to thank Senator MCCLURE for his leadership on this measure, and I also want to recognize the commitment and patience of the Delegate from Guam, Hon. BEN BLAZ, in resolving these issues. I urge my colleague's full support for S. 2481 and look forward to its prompt enactment.

Mr. NUNN. I ask unanimous consent that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

SEC. 101. AUTHORIZATION OF APPROPRIATIONS

There is authorized to be appropriated $2,500,000 to complete the renovation of the Guam Memorial Hospital.

TITLE II—DISPOSAL OF EXCESS FEDERAL LANDS ON GUAM

SEC. 201. DISPOSITION OF TRANSFERRED REAL PROPERTY.

(a) ESTABLISHMENT OF COMMISSION.—As a prerequisite for the transfer of excess lands under section 202, the Government of Guam must enact legislation which—

(1) establishes an excess lands commission the purpose of which shall be to dispose of lands received pursuant to this title to promote economic self-sufficiency and private sector development in Guam;

(2) provides that the Commission shall have the power—

(A) to hold all right, title, and interest in and to all real property transferred under section 202;

(B) to dispose of real properties or interests therein transferred under section 202 in accordance with the laws of Guam and the priorities set forth in the enabling legislation as required pursuant to paragraph 4 of this subsection;

(C) to resolve conclusively all issues related to lands transferred under section 202 and without appeal to any other agency or court of law except as otherwise expressly provided by the laws of Guam; and

(3) provides that the Commission shall make annual reports to the Senate Committee on Energy and Natural Resources and

the Committee on Interior and Insular Affairs of the United States House of Representatives, on or before February 15 of each year, on the disposition of lands transferred pursuant to this title and on the activities and actions of the Commission during the reporting period; and

(4) establishes priorities for the distribution and disposal of the excess lands.

(b) UNITED STATES PERSON.—(1) As used in this title, the term "United States person" means—

(A) any citizen, national, or permanent resident alien of the United States,

(B) any partnership, corporation, or other entity organized under the laws of the United States, any of the several States, the District of Columbia, or any Commonwealth, territory, or possession of the United States, in which citizens, nationals, or permanent resident aliens of the United States beneficially own or control (directly or indirectly) more than 50 per centum of the outstanding voting securities or other voting interest of the partnership, corporation, or other entity, or

(C) the government of any of the several States, the District of Columbia, or any Commonwealth, territory, or possession of the United States.

(2) A partnership, corporation, or other entity described in paragraph (1)(B) shall be presumed to be controlled by individuals who are citizens, nationals, or permanent resident aliens of the United States if—

(A) such individuals are a majority of the partners of the partnership or a majority of the members of the board of directors of the corporation or other entity; or

(B) such individuals have the authority to appoint a majority of the members of the board of directors of the corporation or other entity.

(c) OWNERSHIP OF UNITED STATES PERSONS OF LAND HELD IN TRUST.—For the purposes of this section, the term "ownership of United States persons" means, in the case of a portion of land held in trust, the legal and the beneficial interests of such trust must be held by United States persons.

SEC. 202. TRANSFER OF EXCESS FEDERAL LAND LOCATED ON GUAM.

Except for lands within the boundaries of the War in the Pacific National Historic Park, the Administrator of General Services shall transfer, without consideration and without encumbrances, all right, title, and interest of the United States (together with any improvements thereon) in and to any real property on Guam which is determined to be excess under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.) to the Commission to be established by the laws of Guam for disposition in accordance with section 201. Any property subject to this title shall not be subject to Public Law 100-77 (101 Stat. 482). Title to any real property conveyed pursuant to this title shall revert to the United States if the Commission attempts to convey or otherwise transfer ownership of such property other than to a United States person.

SEC. 203. REPEAL OF CERTAIN CONDITIONS ON LAND TRANSFERRED TO GUAM.

Section 818(b)(2) of Public Law 96-418 (94 Stat. 1782), as amended, is hereby repealed.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE 25TH ANNIVERSARY OF THE OLDER AMERICANS ACT OF 1965

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Senate Concurrent Resolution 99, regarding the 25th anniversary of the Older Americans Act of 1965, just reported by the Labor Committee.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 99) expressing the sense of the Congress concerning the 25th anniversary of the Older Americans Act of 1965.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. PRYOR. Mr. President, I rise to support a concurrent resolution commemorating the 25th anniversary of the Older Americans Act. I am very pleased to be joined by many of my distinguished colleagues in celebrating the important contributions made by the Older Americans Act over the past quarter century, and to reaffirm our Nation's commitment to the elderly. I would especially like to thank Senator KENNEDY, chairman of the Committee on Labor and Human Resources and Senator HATCH, ranking minority member; Senator ADAMS, chairman of the Committee on Labor and Human Resources Subcommittee on Aging, and Senator COCHRAN, ranking minority member.

I also wish to thank Representative THOMAS DOWNEY, chairman of the House Select Committee on Aging Subcommittee on Human Services, who took the initiative in drafting this important resolution and who has served as an unfailing advocate for our Nation's senior citizens for so many years. He has introduced a companion resolution in the House which assures that the achievements of the Older Americans Act, and of thousands of dedicated professionals and volunteers who provide social services to seniors, receive proper recognition.

July 14 marked the silver anniversary of the Older Americans Act, the principle Federal vehicle for delivering critical social services to the elderly. In reflecting upon the past 25 years, it is safe to say that the act has been a tremendous success. Today, an aging network—consisting of units on aging in each of the 50 States, 670 area agencies on aging, and 25,000 service providers—is working together to offer a wide range of social services to the elderly. Although virtually static funding over the past 10 years has strained the aging network, it remains a viable and needed force in the lives of older Americans.

A remarkable feature of the Older Americans Act is the diversity of services that are provided to senior citizens. Unlike many complex Federal benefit programs, this act places trust in the creativity and resourcefulness of State and local agencies to address the diverse needs of their communities.

However, I believe that one theme ties these many diverse services together: the Older Americans Act is a hand that helps elderly persons maintain independence and dignity. This helping hand can be seen in many ways and in many places across our Nation:

A helping hand that delivers hot meals to a senior citizen determined to remain in her own home;

A helping hand to defend and assert the legal rights of an elderly woman who is striving to keep her apartment;

A helping hand to guide an elderly man through the bureaucratic maze of Federal benefit programs;

A helping hand from an ombudsman to advocate on behalf of a nursing home resident whose rights and dignity have been violated;

A helping hand to assure that minority elderly persons are treated with the fairness and respect that is their birthright;

A helping hand extended to an elderly father and his daughter who need information about human services programs available in their community; and

A helping hand to obtain meaningful employment for an older man who needs to supplement his income.

Of course, this is just a sampling of the diverse and creative services offered through the Older Americans Act. But, these examples illustrate what, I submit, should be the guiding principle of the Older Americans Act: helping senior citizens maintain or restore their independence and dignity.

The goals of the Older Americans Act serve as a continuing challenge to all Americans. This very successful legislation has made a positive contribution to the lives of our elderly citizens. I hope this anniversary is not only a time to recognize past achievements, but also a time to reaffirm our national commitment to the objectives envisioned by the Older Americans Act.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 99) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 99

Whereas 1990 marks the 25th anniversary of the enactment of the Older Americans Act of 1965;

Whereas during the past 25 years, the implementation of the Older Americans Act of 1965 has contributed to the economic well-being of millions of older Americans, and has improved the quality of life for such individuals;

Whereas one of the key elements contributing to the successful implementation of the Older Americans Act of 1965 has been the establishment of an aging network composed of State and local aging agencies, providers of congregate and home-delivered nutrition, and many other community service providers;

Whereas the Administration on Aging in the Department of Health and Human Services was created by the Older Americans Act of 1965, and has been empowered to act as an effective advocate for the concerns and needs of older individuals;

Whereas many older individuals, and the individuals who serve the needs of such older individuals, have benefited greatly from the research, training, and education that programs established under the Older Americans Act of 1965 have provided;

Whereas services authorized under the Older Americans Act of 1965 have provided important part-time community service employment opportunities for low-income elderly individuals;

Whereas some of the programs under the Older Americans Act of 1965 were designed to address the special needs, of older Native Americans;

Whereas some of the programs authorized under the Older Americans Act of 1965 were created to address the specific concerns of those older Americans with the greatest social and economic needs especially minority older Americans;

Whereas many services under the Older Americans Act of 1965, including long-term care ombudsman and legal services providers, have acted as powerful advocates for elderly individuals;

Whereas in recognition to the changing needs of a rapidly aging society, the Older Americans Act of 1965 has been periodically amended;

Whereas the Older Americans Act of 1965 has brought together thousands of dedicated professionals and volunteers and has provided inspiration for such individuals;

Whereas the Older Americans Act of 1965 serves as a model for the development of community-based services, including services that provide alternatives to the institutionalization of older individuals; and

Whereas the Older Americans Act of 1965 serves as the foundation for an effective human services policy for millions of Americans as this Nation enters the 21st century: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) the 25th anniversary of the enactment of the Older Americans Act of 1965, and the successful implementation of such Act should be recognized;

(2) the many and varied contributions at all levels of the aging network fostered by the Older Americans Act of 1965 should be recognized; and

(3) the Congress and the citizens of this Nation should reaffirm support for the Older Americans Act of 1965, and the primary goals of such Act of providing services to maintain the dignity of older individuals in the United States, and promoting the independence of such individuals.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HOTEL AND MOTEL FIRE SAFETY ACT

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 754, H.R. 94, the Hotel and Motel Fire Safety Act of 1990.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 94) to amend the Federal Fire Prevention and Control Act of 1974 to allow for the development and issuance of guidelines concerning the use and installation of automatic sprinkler systems and smoke detectors in places of public accommodation affecting commerce, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill.

Their being no objection the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Hotel and Motel Fire Safety Act of 1990".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) more than 400 Americans have lost their lives in multistory hotel fires over the last 5 years;

(2) when properly installed and maintained, automatic sprinklers and smoke detectors provide the most effective safeguards against the loss of life and property from fire;

(3) automatic sprinklers and smoke detectors should supplement and not supplant other fire protection measures, including existing requirements for fire resistive walls and fire retardant furnishings;

(4) some States and local governments and the hotel industry need to act more rapidly to require the installation and use of automatic sprinkler systems in hotels; and

(5) through the United States Fire Administration and the Center for Fire Research, the Federal Government has helped to develop and promote the use of residential sprinkler systems and other means of fire prevention and control.

(b) PURPOSE.—It is the purpose of this Act to save lives and protect property by promoting fire and life safety in hotels, motels, and all places of public accommodation affecting commerce.

SEC. 3. HOTEL AND MOTEL FIRE PREVENTION AND CONTROL.

(a) IN GENERAL.—The Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.) is amended by adding at the end the following new sections:

"LISTINGS OF CERTIFIED PLACES OF PUBLIC ACCOMMODATION

"SEC. 28. (a) SUBMISSIONS BY STATES.—(1) Not later than 2 years after the date of enactment of this section, each State shall, under procedures formulated by the Director, submit to the Director a list of those places of public accommodation affecting commerce located in the State which the Governor of the State or his designee certifies meets the requirements of the guidelines described in section 29.

"(2) The Director shall formulate procedures under which each State shall periodically update the list submitted pursuant to paragraph (1).

"(b) COMPILATION AND DISTRIBUTION OF MASTER LIST.—(1) Not later than 60 days after the expiration of the 2-year period referred to in subsection (a), the Director shall compile and publish in the Federal Register a national master list of all of the places of public accommodation affecting commerce located in each State that meets the requirements of the guidelines described in section 29, and shall distribute such list to each agency of the Federal Government and take steps to make the employees of such agencies aware of its existence and contents.

"(2) The Director shall periodically update the national master list compiled pursuant to paragraph (1) to reflect changes in the State lists submitted to the Director pursuant to subsection (a), and shall periodically redistribute the updated master list to each agency of the Federal Government.

"(3) For purposes of this subsection, the term 'agency' has the meaning given to it under section 5701(1) of title 5, United States Code.

"FIRE PREVENTION AND CONTROL GUIDELINES FOR PLACES OF PUBLIC ACCOMMODATION

"SEC. 29. (a) CONTENTS OF GUIDELINES.—The guidelines referred to in sections 28 and 30 consist of—

"(1) a requirement that hard-wired, single-station smoke detectors be installed in accordance with National Fire Protection Association Standard 74 in each guest room in each place of public accommodation affecting commerce; and

"(2) a requirement that an automatic sprinkler system be installed in accordance with National Fire Protection Association Standard 13 or 13-R, whichever is appropriate, in each place of public accommodation affecting commerce except those places that are 3 stories or lower.

"(b) EFFECT ON STATE AND LOCAL LAW.—The provisions of this section shall not be construed to limit the power of any State or political subdivision thereof to implement or enforce any law, rule, regulation, or standard concerning fire prevention and control.

"(c) DEFINITIONS.—For purposes of this section, the following definitions shall apply:

"(1) The term 'smoke detector' means an alarm that is designed to respond to the presence of visible or invisible particles of combustion.

"(2) The term 'automatic sprinkler system' means an electronically supervised, integrated system of piping to which sprinklers are attached in a systematic pattern, and which, when activated by heat from a fire, will protect human lives by discharging water over the fire area, and by providing appropriate warning signals (to the extent such signals are required by Federal, State,

or local laws or regulations) through the building's fire alarm system.

"DISSEMINATION OF FIRE PREVENTION AND CONTROL INFORMATION

"SEC. 30. The Director, acting through the Administrator, is authorized to take steps to encourage the States to promote the use of automatic sprinkler systems and automatic smoke detection systems, and to disseminate to the maximum extent possible information on the life safety value and use of such systems. Such steps may include, but need not be limited to, providing copies of the guidelines described in section 29 and of the master list compiled under section 28(b) to Federal agencies, State and local governments, and fire services throughout the United States, and making copies of the master list compiled under section 28(b) available upon request to interested private organizations and individuals.".

(b) DEFINITIONS.—(1) Section 4 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2203) is amended by redesignating paragraphs (4) and (5) as paragraphs (5) and (6), respectively, by redesignating paragraphs (6) and (7) as paragraphs (8) and (9), respectively, and by inserting immediately after paragraph (3) the following new paragraph:

"(4) 'Director' means the Director of the Federal Emergency Management Agency;".

(2) Section 4 of such Act (as amended by paragraph (1)) is further amended by inserting immediately after paragraph (6), as so redesignated, the following new paragraph:

"(7) 'place of public accommodation affecting commerce' means any inn, hotel, or other establishment not owned by the Federal Government that provides lodging to transient guests, except that such term does not include an establishment treated as an apartment building for purposes of any State or local law or regulation or an establishment located within a building that contains not more than 5 rooms for rent or hire and that is actually occupied as a residence by the proprietor of such establishment;".

SEC. 4. ADHERENCE TO FIRE SAFETY GUIDELINES IN ESTABLISHING RATES AND DISCOUNTS FOR LODGING EXPENSES.

(a) AMENDMENT TO TITLE 5.—Subchapter I of chapter 57 of title 5, United States Code, is amended by inserting immediately after section 5707 the following new section:

"§ 5707a. Adherence to fire safety guidelines in establishing rates and discounts for lodging expenses

"(a) Studies or surveys conducted for the purposes of establishing per diem rates for lodging expenses under this chapter shall be limited to places of public accommodation that meet the requirements of the fire prevention and control guidelines described in section 29 of the Federal Fire Prevention and Control Act of 1974. The provisions of this subsection shall not apply with respect to studies and surveys that are conducted in any jurisdiction that is not a State as defined in section 4 of the Federal Fire Prevention and Control Act of 1974.

"(b) The Administrator of General Services may not include in any directory which lists lodging accommodations any hotel, motel, or other place of public accommodation that does not meet the requirements of the fire prevention and control guidelines described in section 29 of the Federal Fire Prevention and Control Act of 1974.

"(c) The Administrator of General Services shall include in each directory which lists lodging accommodations a description of the access and safety devices, including appropriate emergency alerting devices, which each listed place of public accommodation provides for guests who are hearing-impaired or visually or physically handicapped.

"(d) The Administrator of General Services may take any additional actions the Administrator determines appropriate to encourage employees traveling on official business to stay at places of public accommodation that meet the requirements of the fire prevention and control guidelines described in section 29 of the Federal Fire Prevention and Control Act of 1974.".

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 57 of title 5, United States Code, is amended by inserting immediately after the item relating to section 5707 the following new item:

"5707a. Adherence to fire safety guidelines in establishing rates and discounts for lodging expenses.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect 60 days after the date of the publication in the Federal Register of the master list of certified places of public accommodation maintained by the Director of the Federal Emergency Management Agency pursuant to section 28(b) of the Federal Fire Prevention and Control Act of 1974 (as added by section 3 of this Act).

SEC. 5. ESTABLISHMENT OF APPROVED ACCOMMODATIONS PERCENTAGE FOR FEDERAL AGENCIES.

(a) APPROVED ACCOMMODATIONS PERCENTAGE.—

(1) IN GENERAL.—Section 5707 of title 5, United States Code, is amended by adding at the end the following new subsection:

"(d)(1) Each agency shall ensure that its approved accommodations percentage for a fiscal year shall be not less than—

"(A) 65 percent, for the first fiscal year that begins 4 years after the date of enactment of this subsection;

"(B) 75 percent, for the fiscal year that begins 5 years after the date of enactment of this subsection; and

"(C) 90 percent, for the fiscal year that begins 6 years after the date of enactment of this subsection and for each subsequent fiscal year.

"(2) In this subsection, an agency's 'approved accommodations percentage' for a fiscal year is the percentage determined by multiplying 100 by the quotient of—

"(A) the total number of nights spent by civilian employees of the agency (as described in section 5702(a)) for which payment was made under this chapter for lodging expenses incurred in any State at any approved hotel, motel, or other place of public accommodation not owned by the Federal Government; divided by

"(B) the total number of nights spent by such employees for which payment was made under this chapter for lodging expenses incurred in any State at any hotel, motel, or other place of public accommodation not owned by the Federal Government.

"(3) For purposes of this subsection, a hotel, motel, or other place of public accommodation is approved if it meets the requirements of the fire prevention and control guidelines described in section 29 of the Federal Fire Prevention and Control Act of 1974.

"(4) For purposes of this subsection—

"(A) the term 'agency' does not include the government of the District of Columbia; and

"(B) the term 'State' means any State, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, the Virgin Islands, the Canal Zone, Guam, American Samoa, or any other territory or possession.".

(2) CONFORMING AMENDMENT.—Section 5701 of such title is amended in the matter preceding paragraph (1) by striking "For the purpose" and inserting "Except as otherwise provided in section 5707(d), for the purpose".

(b) GAO AUDIT OF AGENCY COMPLIANCE.—Not later than 6 months after the last day of the first fiscal year during which lodging expenses are subject to the requirements of section 5707(d) of title 5, United States Code, as added by subsection (a), and not later than 6 months after the last day of every fiscal year thereafter, the Comptroller General shall conduct an audit of the compliance of agencies with the requirements of section 5707(d) of title 5, United States Code (as added by subsection (a)), and shall submit a report to Congress describing the results of such audit.

SEC. 6. PROHIBITING FEDERAL FUNDING OF CONFERENCES HELD AT NON-CERTIFIED PLACES OF PUBLIC ACCOMMODATION.

(a) IN GENERAL.—No Federal funds may be used to sponsor or fund in whole or in part a meeting, convention, conference, or training seminar that is conducted in, or that otherwise uses the rooms, facilities, or services of, a place of public accommodation that does not meet the requirements of the fire prevention and control guidelines described in section 29 of the Federal Fire Prevention and Control Act of 1974 (as added by section 3(a) of this Act).

(b) WAIVER.—

(1) IN GENERAL.—The head of an agency of the Federal Government sponsoring or funding a particular meeting, convention, conference, or training seminar may waive the prohibition described in subsection (a) if the head of such agency determines that a waiver of such prohibition is necessary in the public interest in the case of such particular event.

(2) DELEGATION OF AUTHORITY.—The head of an agency of the Federal Government may delegate the authority provided under paragraph (1) to waive the prohibition described in subsection (a) and to determine whether such a waiver is necessary in the public interest to an officer or employee of the agency if such officer or employee is given such authority with respect to all meetings, conventions, conferences, and training seminars sponsored or funded by the agency.

(c) NOTICE REQUIREMENTS.—

(1) ADVERTISEMENTS AND APPLICATIONS.—(A) Any advertisement for or application for attendance at a meeting, convention, conference, or training seminar sponsored or funded in whole or in part by the Federal Government shall include a notice regarding the prohibition described in subsection (a).

(B) The requirement described in subparagraph (A) shall not apply in the case of an event for which a head of an agency of the Federal Government, pursuant to subsection (b), waives the prohibition described in subsection (a).

(2) PROVIDING NOTICE TO RECIPIENTS OF FUNDS.—(A) Each Executive department, Government corporation, and independent establishment providing Federal funds to non-Federal entities shall notify recipients

of such funds of the prohibition described in subsection (a).

(B) In subparagraph (A), the terms "Executive department", "Government corporation", and "independent establishment" have the meanings given such terms in chapter 1 of title 5, United States Code.

(d) EFFECTIVE DATE.—The provisions of this section shall take effect on the first day of the first fiscal year that begins after the expiration of the 425-day period that begins on the date of the publication in the Federal Register of the master list referred to in section 28(b) of the Federal Fire Prevention and Control Act of 1974 (as added by section 3 of this Act).

SEC. 7. WAIVER OF FEDERAL LIABILITY.

In any action for damages resulting from a fire at a place of public accommodation, the Federal Government may not be found liable for the death of or injury to any person or damage to any property because an officer or employee of the Federal Government was negligent in carrying out any requirement under this Act or the amendments made by this Act.

SEC. 8. EFFECT ON CERTAIN REQUIREMENTS.

Nothing in this Act shall be construed to encourage model building code organizations, or State or local governments, to reduce requirements for fire resistive walls or other safety features.

Mr. HOLLINGS. Mr. President, as chairman of the Commerce Committee, and as a representative of a State that welcomes thousands of tourists each year, I support this important legislation. This bill will encourage hotels and motels to provide the traveling public with an even greater measure of fire protection through the use of automatic sprinkers and smoke detectors. Clearly, both sprinklers and smoke detectors are needed to ensure that our places of public accommodation are safe from the dangers of fire.

We worked hard on this bill in the Commerce Committee to find a reasonable balance which would improve fire safety without intolerably burdening the industry. The bill does not impose mandatory requirements but rather encourages the adoption of safety features through guidelines for use of hotels and motels by Federal agencies and employees. These guidelines apply to facilities over three stories in height. Provisions for use of hotels and motels by Federal employees are phased in over a reasonable period of time. I believe we have achieved the proper balance.

I commend the chairman of the Consumer Subcommittee, Senator BRYAN, for his diligent work toward this end. This is a good bill with an important public safety purpose. I urge my colleagues to support it.

Mr. BRYAN. Mr. President, as chairman of the Consumer Subcommittee, and cochairman of the Congressional Fire Service Caucus, I am pleased to recommend to the full Senate the Hotel and Motel Fire Safety Act of 1990. The purpose of this legislation is to promote fire safety in our Nation's hotels and motels and all places of public accommodation.

There is no doubt that hotel fire safety is a necessary goal in this country. Statistics show that the United States currently has one of the worst fire records of any country in the industrialized world. Each year an average of 6,000 Americans die from fires in this Nation, and reports show 36 percent of multiple fatalities occur in our Nation's hotels.

This bill attempts to address this problem by promoting the use of fire sprinklers and smoke detectors in our Nation's public accommodations. The evidence is clear that sprinklers and smoke detectors are an effective means of fire safety, and together provide one of the best safeguards against the dangers of fire for the traveling public.

As a resident of Nevada, I am particularly aware of the need for this legislation, and the effectiveness of these devices. In the early 1980's, the State of Nevada suffered several tragic hotel fires, including one that resulted in the loss of 85 lives, and injuries to about 600 people. At the time, I was serving as Nevada's Attorney General, and there is one scene I will never forget. The day after the fire, as we were inspecting the disaster, the evidence was clear. Where there were sprinklers, there was hardly any damage to the property and furnishings; where there were no sprinklers, the surrounding property was totally destroyed.

The State of Nevada responded by enacting one of the most stringent fire safety codes in the Nation which included a requirement for the installation of fire sprinklers. Since then, the State of Nevada has not experienced another major fire.

While many members of the hotel industry already have installed smoke detector devices in their facilities, most do not have sprinkler systems. The fire service community believes, however, that both fire sprinklers and smoke detectors are needed to ensure adequate fire safety in our Nation's hotels.

It should be made clear that the bill does not impose any mandatory requirements for the hotel industry. The bill instead seeks to encourage the adoption of these safety features through the issuance of certain guidelines for the use of hotel and motel facilities by Federal agencies and employees.

Specifically, the bill requires Federal agencies, through a certain phasein period, to ensure that an increasing percentage of its employees stay in facilities that meet the fire safety guidelines under the bill. The guidelines provide for automatic sprinkler and smoke detector systems, in accordance with the appropriate existing national standard in all facilities over three stories in height. The phasein period would not begin until the first fiscal year beginning 4 years after the date of the enactment of the bill, at which time Federal agencies would be required to insure that at least 65 percent of their accommodations were in facilities that meet the safety guidelines under the bill. That percentage would increase to 75 percent after the fifth year, and 90 percent each succeeding year.

To ensure proper notice and compliance with the guidelines, the Director of the Federal Emergency Management Agency would be required to collect from the States a list of all facilities in each State that complied with the fire safety guidelines. The Director then would be required to compile and publish in the Federal Register a master list of all facilities in each State that meet the safety guidelines. The Director also would be required to distribute the list to each Federal agency, and to take any other steps that are necessary to make the employees of each agency aware of the list.

The bill also would prohibit the General Services Administration [GSA] from listing in any directory of lodging for Federal employees the rates of any hotel or motel that does not meet the safety guidelines established in the bill. GSA also would be prohibited from including noncomplying facilities in any survey conducted to determine Federal employee per diem rates.

Also, beginning 1 year and 60 days after publication of the master list, no federally funded conference or meeting could be held in any hotel that does not meet the safety guidelines, unless a waiver is granted by the head of the agency involved in funding the event.

A suggestion was made during the course of the committee's consideration of the bill that we also include under the safety guidelines of the legislation, a requirement for use of certain fire separation materials in hotel construction. There is no doubt that certain fire separation materials could provide an additional element of fire safety in hotel and motel facilities. It was believed, however, that the inclusion of a guideline for certain construction materials would be construed by State and local governments as an intrusion on their local building code authority.

The committee did amend the bill to include a provision stating that the bill is not to be construed by State and local governments and building code organizations to reduce requirements for other safety features, such as fire resistive construction materials. This provision was added by the committee to recognize the importance of other fire safety measures, and to ensure that the bill would not be construed as implying that sprinklers and smoke

detectors were the only means of fire safety in hotel facilities.

I also should note that the committee made several other changes from the House-passed version of bill. As passed the House, the exemption for sprinkler systems was set at two stories or lower. However, concerns were expressed that small businesses, unable to bear significant increased costs, would be unnecessarily and unreasonably impacted by this provision.

In response to these concerns, the committee raised the exemption to three stories and eliminated requirements for adjoining interior corridors and immediate egress to ground level. We were convinced that raising the exemption to three stories would not have a serious impact on fire safety, since fires in hotels of that height are more easily handled by fire departments without exceptional equipment, and thus the need for sprinklers is reduced.

The committee also inceased the time within which States must compile their lists of facilities meeting these requirements from 1 to 2 years. This will give the hotel industry more time to come into compliance. Since the bill does not affect Federal travel until 4 years after enactment, this change should not impede the effectiveness of the bill.

The current version of the bill, in my opinion, strikes the proper balance between the Federal Government's desire to ensure effective fire safety in our Nation's hotels, and the authority and rights of States and local governments to establish fire and building codes.

I believe that this is a good bill and one that serves an important purpose. I should note that many members of the hotel industry already have begun to adopt these safety devices as part of their fire safety measures, and have indicated their support for this bill. I am also pleased that the bill is strongly supported by our Nation's fire chiefs, fire marshals, and firefighters. In my opinion, there is no better lead to follow on this subject than our Nation's fire safety leaders. Therefore, I would hope that we can proceed to approve this legislation, and I urge my colleagues to support it.

Mr. GORTON. Mr. President, today the Senate will consider H.R. 94, the Hotel and Motel Fire Safety Act of 1989. As the ranking Republican member of the Consumer Subcommittee, I am pleased to endorse this bill and recommend to my colleagues that they support it.

The fire safety community is unanimous in recommending sprinkler systems as the best way to save lives in hotel fires. According to testimony received by the Consumer Subcommittee, however, only one-half of all hotel rooms now have sprinklers.

H.R. 94 establishes fire safety guidelines for hotels and other public accommodations regarding automatic sprinkler systems and hard-wired smoke detectors. The bill directs the General Services Administration to include only those hotels and places of public accommodation that have satisfied these safety requirements in its official directory of lodging places for Federal employees. Travel by Federal employees to facilities that do not meet these standards will be severely restricted.

This bill will require the owners of the stock of existing hotel rooms that do not have sprinklers to decide whether to retrofit these facilities in order to comply with the safety guidelines. No hotel will be able to compete for a share of the Federal Government's business unless it complies. This is a powerful economic incentive as the Federal Government spends approximately $1.6 billion annually for lodging for its employees. However, the best reason for enacting this legislation is that it promotes safety. And, by making travel safer for Federal employees, this bill will make travel safer for all Americans.

Mr. President, this measure was not without controversy. Some expressed concern that the sprinkler retrofitting requirement went too far, and it would be a signal to state and local officials and model code organizations that this was a panacea to the exclusion of all other fire safety measures. In response to these concerns, the committee extended the exemption to the sprinkler requirement in the House-passed bill from two to three stories. And, the bill as reported by the committee contains a provision which states clearly that, while supporters of the bill endorse the safety guidelines, they are not to be construed as a replacement for fire-retardant building materials that are required in building codes or by a hotel's corporate policy.

Mr. President, I wish to commend Senator BRYAN, the chairman of the Consumer Subcommittee for his work in bringing this important issue to the Commerce Committee and the Senate. I share his interest in promoting the safety and well-being of the American people, and I join him in urging our colleagues to support H.R. 94.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall the bill pass?

So the bill (H.R. 94), as amended, was passed.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL INDIAN FOREST AND WOODLAND ENHANCEMENT ACT

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to immediate consideration of Calendar No. 748, S. 1289, to improve forest management on Indian lands.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1289) to improve the management of forest and woodlands and the production of forest resources on Indian lands, and other purposes, reported with an amendment.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Select Committee on Indian Affairs, with an amendment to strike all after the enacting clause, and inserting in lieu thereof the following:

TITLE I—GENERAL PROVISIONS

SEC. 101. SHORT TITLE.

This Act may be cited as the "National Indian Forest Resources Management Act".

SEC. 102. FINDINGS OF CONGRESS.

(a) FINDINGS.—The Congress finds and declares that—

(1) the forest lands of Indians are among their most valuable resources and Indian forest lands—

(A) encompass more than 15,990,000 acres, including more than 5,700,000 acres of commercial forest land and 8,500,000 acres of woodland,

(B) are a perpetually renewable and manageable resource,

(C) provide economic benefits, including income, employment, and subsistence, and

(D) provide natural benefits, including ecological, cultural, and esthetic values;

(2) the United States has a trust responsibility to protect, conserve, utilize, manage, and enhance Indian forest land and the economic and other benefits from Indian forest land, in perpetuity, including the provision of essential primary and secondary forest roads;

(3) existing Federal laws do not sufficiently assure the adequate and necessary trust management of Indian forest lands;

(4) Indian forest lands are, for the purposes of management, analogous to private lands, and as such Indian forest lands should not automatically be subject to Federal laws relative to Federal undertakings or federally assisted or approved undertakings;

(5) Federal investment in and the management of Indian forest land are significantly below the level of investment in and management of National Forest Service forest

land, Bureau of Land Management forest land, or private forest land;

(6) tribal governments make substantial contributions to the overall management of Indian forest land; and

(7) there is a serious threat to Indian forest lands arising from trespass and unauthorized harvesting of Indian forest land resources.

SEC. 103. PURPOSES.

The purposes of this Act are to—

(1) meet the trust responsibility of the United States for Indian forest lands, consistent with the participation and objectives of Indian forest lands' beneficial owners;

(2) clarify and secure application of forest management deductions back to the reservation from which they are derived solely for use in forest land management activities, and assure that no other deductions shall be collected;

(3) increase the number of professional Indian foresters, and related staff, in forestry programs on Indian forest land; and

(4) provide for fiscal years 1991 through 2006, authorization for appropriations to carry out this Act for the protection, conservation, utilization, management, and enhancement of Indian forest lands, in lieu of the provisions of the Snyder Act (25 U.S.C. 13).

SEC. 104. DEFINITIONS.

For the purposes of this Act, the term—

(1) "forest" means an ecosystem of at least one acre in size, including timberland and woodland, which—

(A) is characterized by a more or less dense and extensive tree cover;

(B) contains, or once contained, at least 10 percent tree crown cover; and

(C) is not developed or planned for exclusive nonforest use;

(2) "Indian forest land" means Indian lands, including commercial and noncommercial timberland and woodland, that are considered chiefly valuable for the production of forest products or to maintain watershed or other land values enhanced by a forest cover, regardless whether a formal inspection and land classification action has been taken;

(3) "forest land management activities" means all activities performed in the management of Indian forest lands pursuant to the trust responsibility of the United States to manage such lands, including—

(A) all aspects of program administration and executive direction such as—

(i) development and implementation of policy and operational procedures, program oversight, and evaluation;

(ii) securing of legal assistance and handling of legal matters;

(iii) budget, finance, and personnel management; and

(iv) development, improvement and maintenance of necessary data bases including tribal and Federal forest management information systems and program reports;

(B) all aspects of the development, preparation, and revision of forest inventory and forest management plans, including remote sensing, cadastral surveys, realty appraisals, mapping, field management inventories and reinventories, inventory analysis, growth studies, allowable annual cut calculations, environmental assessment, and forest history, consistent with and reflective of tribal integrated resource management plans;

(C) forest land development, including forestation, thinning, tree improvement activities, and the use of silvicultural treatments to restore or increase growth and yield to the full productive capacity of Indian forest lands;

(D) protection against losses from wildfire, including acquisition and maintenance of fire fighting equipment and fire detection systems, construction of firebreaks, hazard reduction, prescribed burning, and the development of cooperative wildfire management agreements;

(E) protection against insects and disease, including—

(i) all aspects of detection and evaluation;

(ii) preparation of project proposals containing project description, environmental assessments and statements, and cost-benefit analyses necessary to secure funding;

(iii) field suppression operations; and

(iv) reporting;

(F) assessment of damage to Indian forest land, including field examination and survey, damage appraisal, investigation assistance, and reports, demand letters, and testimony preparation;

(G) all aspects of the preparation, administration, and supervision of timber sale contracts, paid and free use permits, and other Indian forest product harvest documents, including—

(i) cruising, product marking, silvicultural prescription, appraisal, and harvest supervision;

(ii) forest product marketing assistance, including evaluation of marketing and business development opportunities related to Indian forest products and consultation and advice to tribes, tribal and Indian enterprises on maximization of return on forest products;

(iii) archeological, historical, environmental and other land management reviews, clearances, and analyses;

(iv) advertising, executing, and supervising contracts;

(v) marking and scaling of timber; and

(vi) collecting, recording, and distributing receipts from sales;

(H) provision of financial assistance for the education of Indians enrolled in accredited programs of postsecondary and postgraduate forestry and forestry-related fields of study, including the provision of scholarships, internships, relocation assistance, and other forms of assistance to cover educational expenses;

(I) participation in the development and implementation of tribal integrated resource management plans, including all activities to coordinate current and future multiple uses of Indian forest lands;

(J) improvement and maintenance of extended season primary and secondary Indian forest land road systems; and

(K) research activities to improve the basis for determining appropriate management measures to apply to Indian forest lands;

(4) "forest management plan" means the principal document, approved by the Secretary, reflecting and consistent with a tribal integrated resource management plan, which provides for the regulation of the detailed, multiple-use operation of Indian forest land by methods assuring that such lands remain in a perpetually productive state while meeting the objectives of the tribe and which shall include—

(A) standards setting forth the funding and staffing requirements necessary to fulfill the Federal trust responsibility for those Indian forest lands and forest resources as addressed in each management plan, with a report of current forestry funding and staffing levels; and

(B) standards providing quantitative criteria to evaluate performance against the objectives set forth in the plan;

(5) "forest product" means—

(A) timber;

(B) a timber product, including lumber, lath, crating, ties, bolts, logs, pulpwood, fuelwood, posts, poles and split products;

(C) bark;

(D) Christmas trees, stays, branches, firewood, berries, mosses, pinyon nuts, roots, acorns, syrups, wild rice, and herbs;

(E) other marketable material; and

(F) gravel which is extracted from, and utilized on, Indian forest lands;

(6) "forest resources" means all the benefits derived from Indian forest lands, including forest products, soil productivity, water, fisheries, wildlife, recreation, and aesthetic or other traditional values of Indian forest lands;

(7) "forest trespass" means the act of removing forest products illegally from Indian forest lands;

(8) "Indian" means a member of an Indian tribe;

(9) "Indian enterprise" means—

(A) an enterprise which—

(i) is engaged in construction (within the meaning of the Indian Self-Determination and Education Assistance Act), and

(ii) is entirely owned by one or more Indians, or Indian tribes, that receive 100 percent of the profits of the enterprise; or

(B) an enterprise—

(i) which is engaged in any business other than construction, and

(ii) at least 51 percent of which is owned by one or more Indian tribes that receive not less than 51 percent of the profits of the enterprise, or

(C) an enterprise—

(i) which is engaged in any business other than construction,

(ii) at least 51 percent of which is owned by one or more Indians who receive not less than 51 percent of the profits of the enterprise, and

(iii) which has an Indian owner who—

(I) acts as the chief executive officer of the enterprise, and

(II) has the experience and training to manage, and does in fact manage, the day-to-day activities of the enterprise;

(10) "Indian land" means land title to which is held by—

(A) the United States in trust for an Indian or Indian tribe;

(B) an Indian, Indian tribe, or Alaska Native subject to a restriction by the United States against alienation; or

(C) the United States in trust for the benefit of individuals of Indian or Alaska Native ancestry who are not enrolled as members of federally recognized Indian tribes;

(11) "Indian tribe" or "tribe" means any Indian tribe, band, nation, Pueblo, or other organized group or community which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians;

(12) "reservation" includes Indian reservations established pursuant to treaties, Acts of Congress or Executive orders, public domain Indian allotments, and former Indian reservations in Oklahoma.

(13) "Secretary" means the Secretary of the Interior or the Secretary's delegate;

(14) "sustained yield" means the yield of forest products that a forest can produce continuously at a given intensity of management; and

(15) "tribal integrated resource management plan" means a document, approved by a reservation's recognized tribal government and the Secretary, which provides coordina-

tion for the comprehensive management of such reservation's natural resources.

TITLE II—FOREST MANAGEMENT AND ADMINISTRATION

SEC. 201. MANAGEMENT OF INDIAN FOREST LAND.

(a) MANAGEMENT ACTIVITIES.—The Secretary shall undertake forest land management activities on Indian forest land, either directly or through contracts, cooperative agreements, or grants under the Indian Self-Determination and Education Assistance Act of 1974, as amended (25 U.S.C. 450 et seq.).

(b) MANAGEMENT OBJECTIVES.—Indian forest land management activities undertaken by the Secretary shall be designed to achieve the following objectives—

(1) the development, maintenance, and enhancement of Indian forest land in a perpetually productive state in accordance with the principles of sustained yield and with the standards and objectives set forth in forest management plans by providing effective management and protection through the application of sound silvicultural and economic principals to—

(A) the harvesting of forest products;

(B) forestation;

(C) timber stand improvement; and

(D) other forestry practices;

(2) the regulation of Indian forest lands through the development and implementation, with the full and active consultation and participation of a reservation's recognized tribal government, of forest management plans which are supported by written tribal objectives and forest marketing programs;

(3) the regulation of Indian forest lands in a manner that will ensure the use of good method and order in harvesting so as to make possible on a sustained yield basis continuous productivity and a perpetual forest business;

(4) the development of Indian forest lands and associated value added industries by Indians and Indian tribes to promote self-sustaining communities, so that Indians may receive from Indian forest land not only stumpage value, but also the benefit of all the labor and profit that such Indian forest land is capable of yielding;

(5) the retention of Indian forest land in its natural state when the reservation's recognized tribal government determines that the recreational, cultural, aesthetic, or traditional values of Indian forest land represents the highest and best use of the land;

(6) the management and protection of forest resources to retain the beneficial effects to Indian forest lands of regulating water run-off and minimizing soil erosion; and

(7) the maintenance and improvement of forest productivity, grazing, wildlife, fisheries, recreation, aesthetic, cultural and other traditional values.

SEC. 202. FOREST MANAGEMENT DEDUCTION.

(a) WITHHOLDING OF DEDUCTION.—Pursuant to the authority of section 1 of the Act of February 14, 1920 (41 Stat. 415; 25 U.S.C. 413), the Secretary shall withhold a reasonable deduction from the gross proceeds of sales of forest products harvested from Indian forest land under a timber sale contract, permit, or other harvest sale document which has been approved by the Secretary, to cover in whole or part the cost of managing and protecting such Indian forest land.

(b) AMOUNT OF DEDUCTION.—Deductions made pursuant to subsection (a) shall not exceed the lesser amount of—

(1) 10 percent of gross proceeds, or

(2) the percentage of gross proceeds collected on the date of enactment of this Act as forest management deductions by the Secretary on such sales of Indian forest products, unless the reservation's recognized tribal government consents to an increase in the deductions.

(c) USE OF DEDUCTION.—The full amount of any deduction collected by the Secretary shall be expended according to an expenditure plan approved by the Secretary and the reservation's recognized tribal government, for the performance of forest land management activities on the reservation from which such deductions are collected and shall be made available to the reservation's recognized tribal government, upon its request, by contract or agreement for the performance of such activities.

(d) LIMITATIONS.—(1) Forest management deductions withheld pursuant to this section shall not be available to—

(A) cover the costs that are paid from funds appropriated specifically for fire suppression or pest control; or

(B) otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands.

(2) No other forest management deductions derived from Indian forest lands shall be collected to be covered into the general funds of the United States Treasury.

(e) DIRECT PAYMENT TO TRIBES.—(1) Notwithstanding any other law, the Secretary shall, within 1 year from the date of the enactment of this Act, promulgate regulations providing for the payment of forest management deductions authorized by this section to the reservation's recognized tribal government.

(2) Upon the request of the reservation's recognized tribal government, the Secretary shall provide that a purchaser of forest products from Indian forest lands shall make prompt direct payments of forest management deductions into a bank depository account designated by such tribe. Funds so deposited shall be available for expenditure in accordance with subsection (c) of this section.

SEC. 203. FOREST TRESPASS.

(a) CIVIL PENALTIES; REGULATIONS.—Not later than 1 year from the date of enactment of this Act, the Secretary shall issue regulations that—

(1) establish civil penalties for the commission of Indian forest land trespass which provide for—

(A) collection of the value of the products illegally removed plus a penalty of double their value;

(B) collection of the costs associated with damage to the Indian forest land caused by the act of trespass; and

(C) collection of the costs associated with enforcement of the regulations, including field examination and survey, damage appraisal, investigation assistance and reports, witness expenses, demand letters, court costs, and attorney fees;

(2) designate responsibility within the Department of the Interior for the detection and investigation of Indian forest land trespass; and

(3) set forth responsibilities and procedures for the assessment and collection of civil penalties.

(b) TREATMENT OF PROCEEDS.—The proceeds of civil penalties collected under this section shall be treated as proceeds from the sale of forest products from the Indian forest land upon which such trespass occurred.

(c) CONCURRENT JURISDICTION.—Indian tribes which adopt the regulations promulgated by the Secretary pursuant to subsection (a) of this section shall have concurrent civil jurisdiction to enforce the provisions of this section and the regulations promulgated thereunder. The Bureau of Indian Affairs and other agencies of the Federal Government shall, at the request of the reservation's recognized tribal government, defer to tribal prosecutions of Indian forest land trespass cases. Tribal court judgments regarding forest trespass shall be entitled to full faith and credit in Federal and State courts to the same extent as a Federal court judgment obtained under this section.

SEC. 204. DIRECT PAYMENT OF FOREST PRODUCTS RECEIPTS.

(a) REGULATIONS.—Notwithstanding any other law, the Secretary shall, within 1 year from the date of enactment of this Act, promulgate regulations providing for the payment of receipts from the sale of Indian forest products as provided in this section.

(b) PAYMENT INTO A BANK DEPOSITORY.—Upon the request of the reservation's recognized tribal government, the Secretary shall provide that the purchaser of Indian forest products of such tribe which are harvested under a timber sale contract, permit or other harvest sale document which has been approved by the Secretary, shall make prompt direct payments of the gross proceeds of sales of such forest products, less any amounts segregated as forest management deductions pursuant to section 202, into a bank depository account designated by such Indian tribe.

SEC. 205. RECEIPTS FROM INDIAN ALLOTMENTS.

Except as provided by section 202 of this Act, the Secretary shall not pay or transfer any other portion of the gross proceeds of sales of forest products from Indian allotment lands to a reservation's recognized tribal government without the consent of the beneficial owner of such allotment land. In the event that there is more than one beneficial owner of an allotment, the consent required by this section shall be deemed to be granted if given by a majority of such beneficial owners.

SEC. 206. SECRETARIAL RECOGNITION OF TRIBAL LAWS.

(a) COMPLIANCE WITH TRIBAL LAWS; COOPERATION IN ENFORCEMENT.—Subject to the Secretary's responsibilities as reflected in section 102(2) and 104(3), the Secretary shall, to the extent feasible, comply with tribal laws pertaining to Indian forest lands, including laws regulating the environment or historic or cultural preservation, and shall cooperate with the enforcement of such laws on Indian forest lands. Such cooperation shall include—

(1) assistance in the enforcement of such laws;

(2) provision of notice of such laws to persons or entities undertaking activities on Indian forest lands; and

(3) upon the request of the reservation's recognized tribal government, the appearance in tribal forums of personnel of the Department of the Interior as witnesses.

(b) NATURE OF SECRETARIAL RESPONSIBILITIES AND ACTIONS.—The Secretary's responsibilities and actions on Indian forest lands under this Act or the Snyder Act (25 U.S.C. 13) or any other Act, shall not be deemed Federal undertakings or activities or federally-assisted undertakings or activities.

SEC. 207. INDIAN FOREST LAND ASSISTANCE ACCOUNT.

(a) ESTABLISHMENT.—The Secretary may establish an Indian forest land assistance account to fund any Indian forest land management activities authorized by this Act.

(b) DEPOSITS AND EXPENDITURES.—(1) The Secretary may deposit into the Indian forest land assistance account established pursuant to subsection (a) any unobligated annual appropriations available to him, for the purpose of conducting forest land management activities on Indian forest lands.

(2) Funds in the Indian forest land assistance account and any interest or other income earned thereon shall remain available until expended and shall not be available to otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands.

(c) AUDITS.—At the request of any Indian tribe or upon the Secretary's own volition, the Secretary shall conduct audits of the Indian forest land assistance account and shall publish the results of such audits.

SEC. 208. TRIBAL FORESTRY PROGRAMS.

(a) ESTABLISHMENT.—The Secretary shall establish within the Bureau of Indian Affairs a program to provide financial support to forestry programs established by a reservation's recognized tribal government.

(b) SUPPORT ALLOCATION FORMULA; CRITERIA.—(1) The Secretary, with the participation of Indian tribes with Indian forest lands, shall establish, and promulgate by regulations, a formula—

(A) for the determination of Indian tribes eligible for such support;

(B) for the provision of assistance for the forestry programs of such tribes; and

(C) the allocation of base support funds to such tribes under the program established pursuant to subsection (a).

(2) The formula established pursuant to this subsection shall provide funding necessary to support—

(A) one professional forester, including fringe benefits and support costs, for each eligible tribe; and

(B) one additional professional forester or forest technician, including fringe benefits and support costs, for each level of assistance for which an eligible Indian tribe qualifies.

(3) In any fiscal year that appropriations are not sufficient to fully fund tribal forestry programs at each level of assistance under the formula required to be established in this section, available funds for each level of assistance shall be evenly divided among the tribes qualifying for that level of assistance.

SEC. 209. TRIBAL FOREST LAND ACQUISITION GRANTS.

(a) AUTHORIZATION.—The Secretary is hereby authorized to make grants to a reservation's recognized tribal government for the purpose of acquiring forest land where such acquisition may be otherwise authorized by law. No funds may be made available by the Secretary pursuant to this section unless the Indian tribe applying for such grant provides an equal amount of funds, from any other source, for such land acquisition.

(b) BUREAU OF INDIAN AFFAIRS.—Within the Bureau of Indian Affairs, the Division of Forestry shall have the responsibility for appraisals of Indian forest lands, lands identified for acquisition, and any valuation of associated forest assets.

SEC. 210. ASSESSMENT OF INDIAN FOREST LAND AND MANAGEMENT PROGRAMS.

(a) INITIAL ASSESSMENT.—(1) Within 1 year after the date of enactment of this Act, the Secretary, in consultation with affected Indian tribes, shall enter into a contract with a non-Federal entity knowledgeable in forest management practices on Federal and private lands to conduct an independent assessment of Indian forest lands and Indian forest land management practices.

(2) Such assessment shall be national in scope and shall include—

(A) an in-depth analysis of management practices on, and the level of funding for, specific Indian forest land compared with similar Federal and private forest lands;

(B) a survey of the condition of Indian forest lands, including health and productivity levels;

(C) an evaluation of the staffing patterns of forestry organizations of the Bureau of Indian Affairs and of Indian tribes;

(D) an evaluation of procedures employed in timber sales administration, including preparation, field supervision, and accountability for proceeds;

(E) an analysis of the potential for reducing or eliminating relevant administrative procedures, rules and policies of the Bureau of Indian Affairs consistent with the Federal trust responsibility;

(F) a comprehensive review of the adequacy of Indian forest land management plans, including their compatibility with applicable tribal integrated resource management plans and their ability to meet tribal needs and priorities;

(G) an evaluation of the feasibility and desirability of establishing minimum standards against which the adequacy of the forestry programs of the Bureau of Indian Affairs in fulfilling its trust responsibility to Indian tribes can be measured; and

(H) recommendations on any reforms and funding levels necessary to bring Indian forest land management programs to a state-of-the-art condition.

(3) Such assessment shall include specific examples and comparisons from each of the regions of the United States where Indian forest lands are located.

(4) The initial assessment required by this subsection shall be completed no later than 36 months following the date of enactment of this Act. Upon completion, the assessment shall be submitted to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Select Committee on Indian Affairs of the United States Senate and shall be made available to Indian tribes.

(b) PERIODIC ASSESSMENTS.—On each 10-year anniversary of the date of enactment of this Act, the Secretary shall provide for an independent assessment of Indian forest lands and Indian forest land management practices under the criteria established in subsection (a) which shall include analyses measured against findings in previous assessments.

(c) STATUS REPORT TO CONGRESS.—The Secretary shall submit, within 1 year of the first full fiscal year after the date of enactment of this Act and within 6 months of the end of each succeeding fiscal year, to the Committee on Interior and Insular Affairs of the United States House of Representatives, the Select Committee on Indian Affairs of the United States Senate, and to the affected Indian tribes a report on the status of Indian forest lands with respect to the standards, goals, and objectives set forth in approved forest management plans for each Indian tribe with Indian forest lands. The report shall identify the amount of Indian forest land in need of forestation or other silviculture treatment and the quantity of timber available for sale, offered for sale, and sold from each Indian reservation.

(d) ASSISTANCE FROM SECRETARY OF AGRICULTURE.—The Secretary of Agriculture, through the Forest Service, is authorized to provide, upon the request of the Secretary of the Interior, on a nonreimbursable basis, technical assistance in the conduct of such research and evaluation activities as may be necessary for the completion of any reports or assessments required by this Act.

SEC. 211. ALASKA NATIVE TECHNICAL ASSISTANCE PROGRAM.

(a) The Secretary, in consultation with the village and regional corporations established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) shall establish a program of technical assistance for such corporations to promote the sustained yield management of their forest resources. Such technical assistance shall also be available to promote local processing and other value added activities associated with such forest resources.

(b) The technical assistance to be provided by the Secretary pursuant to subsection (a) shall be made available through contracts, grants or agreements entered into in accordance with, and made available to entities eligible for such contracts, grants or agreements under, Public Law 93-638 (25 U.S.C. 450 et seq.).

TITLE III—INDIAN AND ALASKA NATIVE FORESTRY EDUCATION ASSISTANCE PROGRAMS

SEC. 301. ESTABLISHMENT OF INDIAN AND ALASKA NATIVE FORESTRY EDUCATION ASSISTANCE.

(a) FORESTER INTERN PROGRAM.—

(1) Notwithstanding the provisions of title 5 of the United States Code governing appointments in the competitive service, the Secretary shall establish and maintain in the Bureau of Indian Affairs at least 20 forester intern positions for Indian and Alaska Native students.

(2) For purposes of this subsection; the term "forester intern" means an Indian or Alaska Native who—

(A) is acquiring necessary academic qualifications to become a forester or a professional trained in a forestry-related field; and

(B) is appointed to one of the positions established under subsection (a)(1).

(3) The Secretary shall pay all costs for tuition; books; fees and living expenses incurred by a forester intern while attending an approved postsecondary or graduate school in a full-time forestry-related curriculum.

(4) A forester intern shall be required to enter into an obligated service agreement to serve as a professional forester or other forestry-related professional with the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise for 2 years for each year of education for which the Secretary pays the intern's educational costs under paragraph (3) of this subsection.

(5) A forester intern shall be required to report for service with the Bureau of Indian Affairs during any break in attendance at school of more than 3 weeks duration. Time spent in such service shall be counted toward satisfaction of the intern's obligated service agreement.

(b) COOPERATIVE EDUCATION PROGRAM.—

(1) The Secretary shall maintain, through the Bureau of Indian Affairs, a cooperative education program for the purpose of recruiting promising Indian and Alaska Native students who are enrolled in secondary schools, tribally-controlled community colleges, and other postsecondary or graduate schools for employment as a professional forester or other forestry-related professional

in the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise.

(2) The cooperative educational program that is to be maintained under subsection (b)(1) shall be modeled on and shall have essentially the same features of the program operated on the date of enactment of this Act pursuant to chapter 308 of the Federal Personnel Manual of the Office of Personnel Management.

(3) Under the cooperative agreement program that is to be maintained under paragraph (1) of this subsection, the Secretary shall pay all costs for tuition, books, and fees of an Indian or Alaska Native student who—

(A) is enrolled in a course of study at an educational institution with which the Secretary has entered into a cooperative agreement; and

(B) is interested in a career with the Bureau of Indian Affairs, tribal government or tribal enterprise in the management of Indian forest land.

(4) Financial need shall not be a requirement to receive assistance under the cooperative agreement program that is to be maintained under this subsection.

(5) A recipient of assistance under the cooperative education program that is to be maintained under this subsection shall be required to enter into an obligated service agreement to serve as a professional forester or other forestry related professional with the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise for one year for each year for which the Secretary pays the recipient's educational costs pursuant to paragraph (3) of this subsection.

(c) SCHOLARSHIP PROGRAM.—

(1) The Secretary is authorized to grant forestry scholarships to Indians and Alaska Natives enrolled in accredited programs for postsecondary and graduate forestry and forestry-related programs of study as full-time students.

(2) A recipient of a scholarship under paragraph (1) shall be required to enter into an obligated service agreement with the Secretary in which the recipient agrees to accept employment for two years, following completion of the recipient's forestry or forestry-related course of study, with—

(A) the Bureau of Indian Affairs;

(B) a forestry program conducted under a contract, grant, or cooperative agreement entered into under the Indian Self-Determination and Education Assistance Act of 1974, as amended (25 U.S.C. 450 et seq.);

(C) an Indian enterprise engaged in a forestry or forestry-related business; or

(D) a reservation's recognized tribal government forestry-related program.

(3) The Secretary shall not deny scholarship assistance under this subsection solely on the basis of an applicant's scholastic achievement if the applicant has been admitted to and remains in good standing in an accredited postsecondary or graduate institution.

(d) FORESTRY EDUCATION OUTREACH.—The Secretary shall conduct, through the Bureau of Indian Affairs, and in consultation with other appropriate local, State and Federal agencies, and in consultation and coordination with Indian tribes, a forestry education outreach program for Indian and Alaska Native youth to explain and stimulate interest in all aspects of Indian forest land management and careers in forestry.

(e) ADEQUACY OF PROGRAMS.—The Secretary shall administer the programs described in this section until a sufficient number of Indians and Alaska Natives are trained to ensure that there is an adequate number of qualified, professional Indian and Alaska Native foresters to manage the Bureau of Indian Affairs forestry programs and forestry programs maintained by or for Indian tribes.

SEC. 302. POSTGRADUATION RECRUITMENT, EDUCATION AND TRAINING PROGRAMS.

(a) POSTGRADUATION RECRUITMENT.—The Secretary shall establish and maintain a program to attract Indian and Alaska Native professional foresters and forester technicians who have already graduated from their course of postsecondary or graduate education for employment in either the Bureau of Indian Affairs forestry program or, subject to the approval of a reservation's recognized tribal government, in tribal forestry programs. According to such regulations as the Secretary shall prescribe, such program shall provide for the employment of Indian and Alaska Native professional foresters or forestry technicians in exchange for the Secretary's assumption of the employee's outstanding student loans. The period of employment shall be determined by the amount of the loan that is assumed.

(b) POSTGRADUATE INTERGOVERNMENTAL INTERNSHIPS.—For the purposes of training, skill development and orientation of Indian, Alaska Native, and Federal forestry personnel, and the enhancement of tribal and Bureau of Indian Affairs forestry programs, the Secretary shall establish and, actively conduct a program for the cooperative internship of Federal, Indian, and Alaska Native forestry personnel. Such program shall—

(1) For agencies within the Department of the Interior—

(A) provide for the internship of Bureau of Indian Affairs, Alaska Native, and Indian forestry employees in the forestry-related programs of other agencies of the Department of the Interior;

(B) provide for forestry personnel from other Departments of the Interior agencies to serve within the Bureau of Indian Affairs and, with the consent of a reservation's recognized tribal government, to serve in tribal forestry programs.

(2) For agencies not within the Department of the Interior, the Secretary may by interagency agreement provide for the internship of other forestry personnel, not within the jurisdiction of the Department of the Interior and who are above their sixth year of Federal service, within the Bureau of Indian Affairs and, with the consent of a reservation's recognized tribal government, within tribal forestry programs;

(3) provide for the continuation of salary and benefits for participating Federal employees by their originating agency;

(4) provide for the salaries and benefits of participating Indian and Alaska Native forestry employees by the host agency; and

(5) provide for a bonus pay incentive at the conclusion of the internship for any participant.

(c) CONTINUING EDUCATION AND TRAINING.—The Secretary shall maintain a program within the Bureau of Indian Affairs Division of Forestry for the ongoing education and training of Bureau of Indian Affairs, Alaska Native, and Indian forestry personnel. Such program shall provide for—

(1) orientation training for Bureau of Indian Affairs forestry personnel in tribal-Federal relations and responsibilities;

(2) continuing technical forestry education for Bureau of Indian Affairs, Alaska Native, and Indian forestry personnel; and

(3) developmental training of Indian and Alaska Native personnel in forest land enterprises and marketing.

SEC. 303. COOPERATIVE AGREEMENTS BETWEEN THE DEPARTMENT OF THE INTERIOR AND INDIAN TRIBES.

(a) COOPERATIVE AGREEMENTS.—To facilitate the administration of the programs and activities of the Department of the Interior, the Secretary is authorized to negotiate and enter into cooperative agreements with Indian tribes to engage in cooperative manpower and job training and development programs; to develop and publish cooperative environmental education and natural resource planning materials; and to perform land and facility improvements, including forestry and other natural resources protection, fire protection, forestation, timber stand improvement, debris removal, and other activities related to land and natural resources management. The Secretary may enter into the aforesaid agreements when the Secretary determines the public interest will be benefited. In such cooperative agreements, the Secretary is authorized to advance or reimburse funds to contractors from any appropriated funds available for similar kinds of work or by furnishing or sharing materials, supplies, facilities or equipment without regard to the provisions of section 3324, title 31, United States Code, relating to the advance of public moneys.

(b) SUPERVISION.—In any agreement authorized by this section, Indian tribes and their employees may perform cooperative work under the supervision of the Department of the Interior in emergencies or otherwise as mutually agreed to, but shall not be deemed to be Federal employees other than for the purposes of sections 2671 through 2680 of title 28, United States Code, and sections 8101 through 8193 of title 5, United States Code.

(c) SAVINGS CLAUSE.—Nothing in this Act shall be construed to limit the authority of the Secretary to enter into cooperative agreements otherwise authorized by law.

TITLE IV—AUTHORIZATION OF APPROPRIATIONS

SEC. 401. AUTHORIZATIONS.

(a) AUTHORIZATIONS.—There are authorized to be appropriated the following sums—

(1) $60,000,000 for each of fiscal years 1991 through 1995, for the purpose of carrying out sections 201 through 207 of this Act;

(2) $65,000,000 for each of the fiscal years 1996 through 2006 for the purpose of carrying out sections 201 through 207 of this Act;

(3) $3,000,000 for each of the fiscal years 1991 through 2006 for purposes of carrying out section 208 of this Act;

(4) $6,000,000 for each of fiscal years 1991 through 2006 for the purposes of carrying out section 209 of this Act;

(5) $500,000 for the purposes of carrying out section 210(a) of this Act, to remain available until expended;

(6) such sums as are necessary for each of the fiscal years 1991 through 2006 for the purpose of carrying out subsections (b) and (c) of section 210 of this Act;

(7) $3,000,000 for each of the fiscal years 1991 through 2006 for the purpose of carrying out section 211 of this Act; and

(8) $3,000,000 for each of the fiscal years 1991 through 2006 for purposes of carrying out title III of this Act;

(b) ADJUSTMENT.—The amounts referred to in subsection (a) of this section shall be adjusted for each fiscal year by the percent which equals ⅔ of the percentage change in the United States Gross National Products

Implicit Price Deflator, or 7 percent, whichever is less in any 1 year, using fiscal year 1991 as the base.

(c) SNYDER ACT.—Appropriations made pursuant to the provisions of this Act shall be made in lieu of the provisions of the Snyder Act (25 U.S.C. 13).

TITLE V—MISCELLANEOUS

SEC. 501. REGULATIONS.

Except as otherwise provided by this Act, the Secretary is directed to promulgate final regulations for the implementation of the Act within eighteen months from the date of its enactment. All regulations promulgated pursuant to this Act shall be developed by the Secretary with the participation of the affected Indian tribes.

SEC. 502. SEVERABILITY.

If any provision of this Act, or the application of any provision of this Act to any person or circumstance, is held invalid, the application of such provision to other persons or circumstances and the remainder of this Act shall not be affected thereby.

AMENDMENT NO. 2577

(Purpose: To make a series of amendments to the bill)

Mr. SIMPSON. Mr. President, on behalf of Senator McCain I send an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] for Mr. MCCAIN, proposes an amendment numbered 2577.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 3, strike out "8,500,000" and insert in lieu thereof "8,700,000".

On page 28, line 23, immediately after "removing", add "or damaging".

On page 39, beginning with line 9, strike out all through line 2 on page 40 and insert in lieu thereof the following:

SEC. 207. SPECIAL INDIAN FOREST LAND ASSISTANCE ACCOUNT.

(a) ESTABLISHMENT.—At the request of any reservation's recongnized tribal government, the Secretary may establish a special Indian forest land assistance account for such tribal government to fund the Indian forest land management activities of such tribal government.

(b) DEPOSITS AND EXPENDITURES.—(1) The Secretary may deposit into an Indian forest land assistance account established pursuant to subsection (a) any funds in his possession or available to him, including any unobligated annual appropriations, for the purpose of conducting forest land management activities on Indian forest lands of such tribe. The Secretary shall notify the reservation's recognized tribal government of his intent to deposit funds into such account and shall not deposit Federal or tribal funds into such account without the consent of the reservation's recognized tribal government.

(2) Funds in the Indian forest land assistance account and any interest or other income earned thereon shall remain available until expended and shall not be available to otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands. No funds shall be expended from such account without the approval of the Indian tribe for which the account was established.

(c) AUDITS.—At the request of the Indian tribe for which the special Indian forest land assistance account was established or upon the Secretary's own violation, the Secretary shall conduct audits of the Indian forest land assistance account and shall make the results of such audits available to the Indian tribe for which the account was established.

On page 40, line 14, immediately after "of", insert "levels of".

On page 42, line 2, strike out "PROGRAMS" and insert in lieu thereof "ACTIVITIES".

On page 42, line 9, strike out "practices" and insert in lieu thereof "activities".

On page 43, line 15, strike out "programs" and insert in lieu thereof "activities".

On page 44, line 4, strike out "practices" and insert in lieu thereof "activities".

On page 49, strike out line 7 and insert in lieu thereof "agrees to accept employment for one year for each year for which the Secretary pays the recipient's educational costs,".

On page 51, line 9, strike out "Indian" and insert in lieu thereof "tribal".

On page 51, line 13, strike out "Indian" and insert in lieu thereof "tribal".

On page 51, line 18, strike out "Indian" and insert in lieu thereof "tribal".

On page 52, line 13, strike out "Indian" and insert in lieu thereof "tribal".

On page 52, line 21, strike out "Indian" and insert in lieu thereof "tribal".

On page 53, line 2, strike out "Indian" and insert in lieu thereof "tribal".

On page 53, line 4, strike out "Indian" and insert in lieu thereof "tribal".

The PRESIDING OFFICER. There being no further debate, the question is on agreeing to the amendment of the Senator from Arizona.

The amendment (No. 2577) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MCCAIN. Mr. President, I am pleased to bring S. 1289, the National Indian Forest Resources Management Act before the full Senate. This bill reflects nearly 3 years of very careful work by the Select Committee on Indian Affairs, interested Indian tribes and the Bureau of Indian Affairs.

Although the Congress has passed legislation relating to Indian Forest Resources on three occasions since 1910, we have never taken the time to consider the kind of comprehensive legislation necessary to ensure the proper management of Indian forest lands. One result of our failure to act has been confusion, ill-will and litigation between the tribes and the BIA. On several occasions, the courts have found the United States liable for damages resulting from improper or poor management of Indian forest lands.

I am very pleased that during the past year the tribes and the Bureau of Indian Affairs have worked together with the Select Committee on Indian Affairs to develop constructive solutions to a wide array of longstanding problems which have hampered the sound management of Indian forest lands. This spirit of cooperation is reflected in every provision of the bill. I am hopeful that this same spirit of cooperation will continue after the enactment of S. 1289.

I particularly want to express my gratitude to the Intertribal Timber Council and the many Indian tribes which participated in the development of this bill. Without their assistance, we would not be able to consider this bill today.

Mr. President, I am offering a series of technical amendments to the bill. These amendments have been cleared on both sides and primarily serve to provide consistency in the terms used in the bill. I would like to comment briefly on the amendment to section 207, relating to the forestry assistance accounts. As reported by the Select Committee on Indian Affairs, this section appeared to create one national account.

However, the intent has always been to authorize the Secretary to establish forestry assistance accounts, at the request of a reservation's recognized tribal government, on a reservation-by-reservation basis as stated in the report which accompanies the bill. These accounts are necessary to promote long-term management planning and to enable the Secretary and the tribes to promptly respond to market fluctuations or unforeseen problems such as fires or natural disasters. At present, both the Bureau of Land Management and the Forest Service enjoy the flexibility provided by these types of accounts. In our deliberations on S. 1289, tribal and federal witnesses testified to the need for similar flexibility in the management of Indian forest lands. The language of the amendment simply makes it clear that these accounts are to be tribal specific rather than national in character.

Mr. President, I thank my colleagues for their support of this legislation. I particularly appreciate the assistance of Senator INOUYE and his staff.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill (S. 1289) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1289

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—GENERAL PROVISIONS

SEC. 101. SHORT TITLE.

This Act may be cited as the "National Indian Forest Resources Management Act".

SEC. 102. FINDINGS OF CONGRESS.

(a) FINDINGS.—The Congress finds and declares that—

(1) the forest lands of Indians are among their most valuable resources and Indian forest lands—

(A) encompass more than 15,990,000 acres, including more than 5,700,000 acres of commercial forest land and 8,700,000 acres of woodland,

(B) are a perpetually renewable and manageable resource,

(C) provide economic benefits, including income, employment, and subsistence, and

(D) provide natural benefits, including ecological, cultural, and esthetic values;

(2) the United States has a trust responsibility to protect, conserve, utilize, manage, and enhance Indian forest land and the economic and other benefits from Indian forest land, in perpetuity, including the provision of essential primary and secondary forest roads;

(3) existing Federal laws do not sufficiently assure the adequate and necessary trust management of Indian forest lands;

(4) Indian forest lands are, for the purposes of management, analogous to private lands, and as such Indian forest lands should not automatically be subject to Federal laws relative to Federal undertakings or federally assisted or approved undertakings;

(5) Federal investment in and the management of Indian forest land are significantly below the level of investment in and management of National Forest Service forest land, Bureau of Land Management forest land, or private forest land;

(6) tribal governments make substantial contributions to the overall management of Indian forest land; and

(7) there is a serious threat to Indian forest lands arising from trespass and unauthorized harvesting of Indian forest land resources.

SEC. 103. PURPOSES.

The purposes of this Act are to—

(1) meet the trust responsibility of the United States for Indian forest lands, consistent with the participation and objectives of Indian forest lands' beneficial owners;

(2) clarify and secure application of forest management deductions back to the reservation from which they are derived solely for use in forest land management activities, and assure that no other deductions shall be collected;

(3) increase the number of professional Indian foresters, and related staff, in forestry programs on Indian forest land; and

(4) provide for fiscal years 1991 through 2006, authorization for appropriations to carry out this Act for the protection, conservation, utilization, management, and enhancement of Indian forest lands, in lieu of the provisions of the Snyder Act (25 U.S.C. 13).

SEC. 104. DEFINITIONS.

For the purposes of this Act, the term—

(1) "forest" means an ecosystem of at least one acre in size, including timberland and woodland, which—

(A) is characterized by a more or less dense and extensive tree cover;

(B) contains, or once contained, at least 10 percent tree crown cover; and

(C) is not developed or planned for exclusive nonforest use;

(2) "Indian forest land" means Indian lands, including commercial and noncommercial timberland and woodland, that are considered chiefly valuable for the production of forest products or to maintain watershed or other land values enhanced by a forest cover, regardless whether a formal inspection and land classification action has been taken;

(3) "forest land management activities" means all activities performed in the management of Indian forest lands pursuant to the trust responsibility of the United States to manage such lands, including—

(A) all aspects of program administration and executive direction such as—

(i) development and implementation of policy and operational procedures, program oversight, and evaluation;

(ii) securing of legal assistance and handling of legal matters;

(iii) budget, finance, and personnel management; and

(iv) development, improvement and maintenance of necessary data bases including tribal and Federal forest management information systems and program reports;

(B) all aspects of the development, preparation, and revision of forest inventory and forest management plans, including remote sensing, cadastral surveys, realty appraisals, mapping, field management inventories and reinventories, inventory analysis, growth studies, allowable annual cut calculations, environmental assessment, and forest history, consistent with and reflective of tribal integrated resource management plans;

(C) forest land development, including forestation, thinning, tree improvement activities, and the use of silvicultural treatments to restore or increase growth and yield to the full productive capacity of Indian forest lands;

(D) protection against losses from wildfire, including acquisition and maintenance of fire fighting equipment and fire detection systems, construction of firebreaks, hazard reduction, prescribed burning, and the development of cooperative wildfire management agreements;

(E) protection against insects and disease, including—

(i) all aspects of detection and evaluation;

(ii) preparation of project proposals containing project description, environmental assessments and statements, and cost-benefit analyses necessary to secure funding;

(iii) field suppression operations; and

(iv) reporting;

(F) assessment of damage to Indian forest land, including field examination and survey, damage appraisal, investigation assistance, and reports, demand letters, and testimony preparation;

(G) all aspects of the preparation, administration, and supervision of timber sale contracts, paid and free use permits, and other Indian forest product harvest documents, including—

(i) cruising, product marking, silvicultural prescription, appraisal, and harvest supervision;

(ii) forest product marketing assistance, including evaluation of marketing and business development opportunities related to Indian forest products and consultation and advice to tribes, tribal and Indian enterprises on maximization of return on forest products;

(iii) archeological, historical, environmental and other land management reviews, clearances, and analyses;

(iv) advertising, executing, and supervising contracts;

(v) marking and scaling of timber; and

(vi) collecting, recording, and distributing receipts from sales;

(H) provision of financial assistance for the education of Indians enrolled in accredited programs of postsecondary and postgraduate forestry and forestry-related fields of study, including the provision of scholarships, internships, relocation assistance, and other forms of assistance to cover educational expenses;

(I) participation in the development and implementation of tribal integrated resource management plans, including all activities to coordinate current and future multiple uses of Indian forest lands;

(J) improvement and maintenance of extended season primary and secondary Indian forest land road systems; and

(K) research activities to improve the basis for determining appropriate management measures to apply to Indian forest lands;

(4) "forest management plan" means the principal document, approved by the Secretary, reflecting and consistent with a tribal integrated resource management plan, which provides for the regulation of the detailed, multiple-use operation of Indian forest land by methods assuring that such lands remain in a perpetually productive state while meeting the objectives of the tribe and which shall include—

(A) standards setting forth the funding and staffing requirements necessary to fulfill the Federal trust responsibility for those Indian forest lands and forest resources as addressed in each management plan, with a report of current forestry funding and staffing levels; and

(B) standards providing quantitative criteria to evaluate performance against the objectives set forth in the plan;

(5) "forest product" means—

(A) timber;

(B) a timber product, including lumber, lath, crating, ties, bolts, logs, pulpwood, fuelwood, posts, poles and split products;

(C) bark;

(D) Christmas trees, stays, branches, firewood, berries, mosses, pinyon nuts, roots, acorns, syrups, wild rice, and herbs;

(E) other marketable material; and

(F) gravel which is extracted from, and utilized on, Indian forest lands;

(6) "forest resources" means all the benefits derived from Indian forest lands, including forest products, soil productivity, water, fisheries, wildlife, recreation, and aesthetic or other traditional values of Indian forest lands;

(7) "forest trespass" means the act of removing or damaging forest products illegally from Indian forest lands;

(8) "Indian" means a member of an Indian tribe;

(9) "Indian enterprise" means—

(A) an enterprise which—

(i) is engaged in construction (within the meaning of the Indian Self-Determination and Education Assistance Act), and

(ii) is entirely owned by one or more Indians, or Indian tribes, that receive 100 percent of the profits of the enterprise; or

(B) an enterprise—

(i) which is engaged in any business other than construction, and

(ii) at least 51 percent of which is owned by one or more Indian tribes that receive not less than 51 percent of the profits of the enterprise, or

(C) an enterprise—

(i) which is engaged in any business other than construction,

(ii) at least 51 percent of which is owned by one or more Indians who receive not less than 51 percent of the profits of the enterprise, and

(iii) which has an Indian owner who—

(I) acts as the chief executive officer of the enterprise, and

(II) has the experience and training to manage, and does in fact manage, the day-to-day activities of the enterprise;

(10) "Indian land" means land title to which is held by—

(A) the United States in trust for an Indian or Indian tribe;

(B) an Indian, Indian tribe, or Alaska Native subject to a restriction by the United States against alienation; or

(C) the United States in trust for the benefit of individuals of Indian or Alaska Native ancestry who are not enrolled as members of federally recognized Indian tribes;

(11) "Indian tribe" or "tribe" means any Indian tribe, band, nation, Pueblo, or other organized group or community which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians;

(12) "reservation" includes Indian reservations established pursuant to treaties, Acts of Congress or Executive orders, public domain Indian allotments, and former Indian reservations in Oklahoma.

(13) "Secretary" means the Secretary of the Interior or the Secretary's delegate;

(14) "sustained yield" means the yield of forest products that a forest can produce continuously at a given intensity of management; and

(15) "tribal integrated resource management plan" means a document, approved by a reservation's recognized tribal government and the Secretary, which provides coordination for the comprehensive management of such reservation's natural resources.

TITLE II—FOREST MANAGEMENT AND ADMINISTRATION

SEC. 201. MANAGEMENT OF INDIAN FOREST LAND.

(a) MANAGEMENT ACTIVITIES.—The Secretary shall undertake forest land management activities on Indian forest land, either directly or through contracts, cooperative agreements, or grants under the Indian Self-Determination and Education Assistance Act of 1974, as amended (25 U.S.C. 450 et seq.).

(b) MANAGEMENT OBJECTIVES.—Indian forest land management activities undertaken by the Secretary shall be designed to achieve the following objectives—

(1) the development, maintenance, and enhancement of Indian forest land in a perpetually productive state in accordance with the principles of sustained yield and with the standards and objectives set forth in forest management plans by providing effective management and protection through the application of sound silvicultural and economic principals to—

(A) the harvesting of forest products;

(B) forestation;

(C) timber stand improvement; and

(D) other forestry practices;

(2) the regulation of Indian forest lands through the development and implementation, with the full and active consultation and participation of a reservation's recognized tribal government, of forest management plans which are supported by written tribal objectives and forest marketing programs;

(3) the regulation of Indian forest lands in a manner that will ensure the use of good method and order in harvesting so as to make possible on a sustained yield basis continuous productivity and a perpetual forest business;

(4) the development of Indian forest lands and associated value added industries by Indians and Indian tribes to promote self-sustaining communities, so that Indians may receive from Indian forest land not only stumpage value, but also the benefit of all the labor and profit that such Indian forest land is capable of yielding;

(5) the retention of Indian forest land in its natural state when the reservation's recognized tribal government determines that the recreational, cultural, aesthetic, or traditional values of Indian forest land represents the highest and best use of the land;

(6) the management and protection of forest resources to retain the beneficial effects to Indian forest lands of regulating water run-off and minimizing soil erosion; and

(7) the maintenance and improvement of forest productivity, grazing, wildlife, fisheries, recreation, aesthetic, cultural and other traditional values.

SEC. 202. FOREST MANAGEMENT DEDUCTION.

(a) WITHHOLDING OF DEDUCTION.—Pursuant to the authority of section 1 of the Act of February 14, 1920 (41 Stat. 415; 25 U.S.C. 413), the Secretary shall withhold a reasonable deduction from the gross proceeds of sales of forest products harvested from Indian forest land under a timber sale contract, permit, or other harvest sale document which has been approved by the Secretary, to cover in whole or part the cost of managing and protecting such Indian forest land.

(b) AMOUNT OF DEDUCTION.—Deductions made pursuant to subsection (a) shall not exceed the lesser amount of—

(1) 10 percent of gross proceeds, or

(2) the percentage of gross proceeds collected on the date of enactment of this Act as forest management deductions by the Secretary on such sales of Indian forest products,

unless the reservation's recognized tribal government consents to an increase in the deductions.

(c) USE OF DEDUCTION.—The full amount of any deduction collected by the Secretary shall be expended according to an expenditure plan approved by the Secretary and the reservation's recognized tribal government, for the performance of forest land management activities on the reservation from which such deductions are collected and shall be made available to the reservation's recognized tribal government, upon its request, by contract or agreement for the performance of such activities.

(d) LIMITATIONS.—(1) Forest management deductions withheld pursuant to this section shall not be available to—

(A) cover the costs that are paid from funds appropriated specifically for fire suppression or pest control; or

(B) otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands.

(2) No other forest management deductions derived from Indian forest lands shall be collected to be covered into the general funds of the United States Treasury.

(e) DIRECT PAYMENT TO TRIBES.—(1) Notwithstanding any other law, the Secretary shall, within 1 year from the date of the enactment of this Act, promulgate regulations providing for the payment of forest management deductions authorized by this section to the reservation's recognized tribal government.

(2) Upon the request of the reservation's recognized tribal government, the Secretary shall provide that a purchaser of forest products from Indian forest lands shall make prompt direct payments of forest management deductions into a bank depository account designated by such tribe. Funds so deposited shall be available for expenditure in accordance with subsection (c) of this section.

SEC. 203. FOREST TRESPASS.

(a) CIVIL PENALTIES; REGULATIONS.—Not later than 1 year from the date of enactment of this Act, the Secretary shall issue regulations that—

(1) establish civil penalties for the commission of Indian forest land trespass which provide for—

(A) collection of the value of the products illegally removed plus a penalty of double their value;

(B) collection of the costs associated with damage to the Indian forest land caused by the act of trespass; and

(C) collection of the costs associated with enforcement of the regulations, including field examination and survey, damage appraisal, investigation assistance and reports, witness expenses, demand letters, court costs, and attorney fees;

(2) designate responsibility within the Department of the Interior for the detection and investigation of Indian forest land trespass; and

(3) set forth responsibilities and procedures for the assessment and collection of civil penalties.

(b) TREATMENT OF PROCEEDS.—The proceeds of civil penalties collected under this section shall be treated as proceeds from the sale of forest products from the Indian forest land upon which such trespass occurred.

(c) CONCURRENT JURISDICTION.—Indian tribes which adopt the regulations promulgated by the Secretary pursuant to subsection (a) of this section shall have concurrent civil jurisdiction to enforce the provisions of this section and the regulations promulgated thereunder. The Bureau of Indian Affairs and other agencies of the Federal Government shall, at the request of the reservation's recognized tribal government, defer to tribal prosecutions of Indian forest land trespass cases. Tribal court judgments regarding forest trespass shall be entitled to full faith and credit in Federal and State courts to the same extent as a Federal court judgment obtained under this section.

SEC. 204. DIRECT PAYMENT OF FOREST PRODUCTS RECEIPTS.

(a) REGULATIONS.—Notwithstanding any other law, the Secretary shall, within 1 year from the date of enactment of this Act, pro-

mulgate regulations providing for the payment of receipts from the sale of Indian forest products as provided in this section.

(b) PAYMENT INTO A BANK DEPOSITORY.—Upon the request of the reservation's recognized tribal government, the Secretary shall provide that the purchaser of Indian forest products of such tribe which are harvested under a timber sale contract, permit or other harvest sale document which has been approved by the Secretary, shall make prompt direct payments of the gross proceeds of sales of such forest products, less any amounts segregated as forest management deductions pursuant to section 202, into a bank depository account designated by such Indian tribe.

SEC. 205. RECEIPTS FROM INDIAN ALLOTMENTS.

Except as provided by section 202 of this Act, the Secretary shall not pay or transfer any other portion of the gross proceeds of sales of forest products from Indian allotment lands to a reservation's recognized tribal government without the consent of the beneficial owner of such allotment land. In the event that there is more than one beneficial owner of an allotment, the consent required by this section shall be deemed to be granted if given by a majority of such beneficial owners.

SEC. 206. SECRETARIAL RECOGNITION OF TRIBAL LAWS.

(a) COMPLIANCE WITH TRIBAL LAWS; COOPERATION IN ENFORCEMENT.—Subject to the Secretary's responsibilities as reflected in section 102(2) and 104(3), the Secretary shall, to the extent feasible, comply with tribal laws pertaining to Indian forest lands, including laws regulating the environment or historic or cultural preservation, and shall cooperate with the enforcement of such laws on Indian forest lands. Such cooperation shall include—

(1) assistance in the enforcement of such laws;

(2) provision of notice of such laws to persons or entities undertaking activities on Indian forest lands; and

(3) upon the request of the reservation's recognized tribal government, the appearance in tribal forums of personnel of the Department of the Interior as witnesses.

(b) NATURE OF SECRETARIAL RESPONSIBILITIES AND ACTIONS.—The Secretary's responsibilities and actions on Indian forest lands under this Act or the Snyder Act (25 U.S.C. 13) or any other Act, shall not be deemed Federal undertakings or activities or federally-assisted undertakings or activities.

SEC. 207. SPECIAL INDIAN FOREST LAND ASSISTANCE ACCOUNT.

(a) ESTABLISHMENT.—At the request of any reservation's recognized tribal government, the Secretary may establish a special Indian forest land assistance account for such tribal government to fund the Indian forest land management activities of such tribal government.

(b) DEPOSITS AND EXPENDITURES.—The Secretary may deposit into an Indian forest land assistance account established pursuant to subsection (a) any funds in his possession or available to him, including any unobligated annual appropriations, for the purpose of conducting forest land management activities on Indian forest lands of such tribe. The Secretary shall notify the reservation's recognized tribal government of his intent to deposit funds into such account and shall not deposit Federal or tribal funds into such account without the consent of the reservation's recognized tribal government.

(2) Funds in the Indian forest land assistance account and any interest or other income earned thereon shall remain available until expended and shall not be available to otherwise offset Federal appropriations for meeting the Federal trust responsibility for management of Indian forest lands. No funds shall be expended from such account without the approval of the Indian tribe for which the account was established.

(c) AUDITS.—At the request of the Indian tribe for which the special Indian forest land assistance account was established or upon the Secretary's own volitation, the Secretary shall conduct audits of the Indian forest land assistance account and shall make the results of such audits available to the Indian tribe for which the account was established.

SEC. 208. TRIBAL FORESTRY PROGRAMS.

(a) ESTABLISHMENT.—The Secretary shall establish within the Bureau of Indian Affairs a program to provide financial support to forestry programs established by a reservation's recognized tribal government.

(b) SUPPORT ALLOCATION FORMULA; CRITERIA.—(1) The Secretary, with the participation of Indian tribes with Indian forest lands, shall establish, and promulgate by regulations, a formula—

(A) for the determination of Indian tribes eligible for such support;

(B) for the provision of levels of assistance for the forestry programs of such tribes; and

(C) the allocation of base support funds to such tribes under the program established pursuant to subsection (a).

(2) The formula established pursuant to this subsection shall provide funding necessary to support—

(A) one professional forester, including fringe benefits and support costs, for each eligible tribe; and

(B) one additional professional forester or forest technician, including fringe benefits and support costs, for each level of assistance for which an eligible Indian tribe qualifies.

(3) In any fiscal year that appropriations are not sufficient to fully fund tribal forestry programs at each level of assistance under the formula required to be established in this section, available funds for each level of assistance shall be evenly divided among the tribes qualifying for that level of assistance.

SEC. 209. TRIBAL FOREST LAND ACQUISITION GRANTS.

(a) AUTHORIZATION.—The Secretary is hereby authorized to make grants to a reservation's recognized tribal government for the purpose of acquiring forest land where such acquisition may be otherwise authorized by law. No funds may be made available by the Secretary pursuant to this section unless the Indian tribe applying for such grant provides an equal amount of funds, from any other source, for such land acquisition.

(b) BUREAU OF INDIAN AFFAIRS.—Within the Bureau of Indian Affairs, the Division of Forestry shall have the responsibility for appraisals of Indian forest lands, lands identified for acquisition, and any valuation of associated forest assets.

SEC. 210. ASSESSMENT OF INDIAN FOREST LAND AND MANAGEMENT ACTIVITIES.

(a) INITIAL ASSESSMENT.—(1) Within 1 year after the date of enactment of this Act, the Secretary, in consultation with affected Indian tribes, shall enter into a contract with a non-Federal entity knowledgeable in forest management practices on Federal and private lands to conduct an independent assessment of Indian forest lands and Indian forest land management activities.

(2) Such assessment shall be national in scope and shall include—

(A) an in-depth analysis of management practices on, and the level of funding for, specific Indian forest land compared with similar Federal and private forest lands;

(B) a survey of the condition of Indian forest lands, including health and productivity levels;

(C) an evaluation of the staffing patterns of forestry organizations of the Bureau of Indian Affairs and of Indian tribes;

(D) an evaluation of procedures employed in timber sales administration, including preparation, field supervision, and accountability for proceeds;

(E) an analysis of the potential for reducing or eliminating relevant administrative procedures, rules and policies of the Bureau of Indian Affairs consistent with the Federal trust responsibility;

(F) a comprehensive review of the adequacy of Indian forest land management plans, including their compatibility with applicable tribal integrated resource management plans and their ability to meet tribal needs and priorities;

(G) an evaluation of the feasibility and desirability of establishing minimum standards against which the adequacy of the forestry programs of the Bureau of Indian Affairs in fulfilling its trust responsibility to Indian tribes can be measured; and

(H) recommendations on any reforms and funding levels necessary to bring Indian forest land management activities to a state-of-the-art condition.

(3) Such assessment shall include specific examples and comparisons from each of the regions of the United States where Indian forest lands are located.

(4) The initial assessment required by this subsection shall be completed no later than 36 months following the date of enactment of this Act. Upon completion, the assessment shall be submitted to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Select Committee on Indian Affairs of the United States Senate and shall be made available to Indian tribes.

(b) PERIODIC ASSESSMENTS.—On each 10-year anniversary of the date of enactment of this Act, the Secretary shall provide for an independent assessment of Indian forest lands and Indian forest land management activities under the criteria established in subsection (a) which shall include analyses measured against findings in previous assessments.

(c) STATUS REPORT TO CONGRESS.—The Secretary shall submit, within 1 year of the first full fiscal year after the date of enactment of this Act and within 6 months of the end of each succeeding fiscal year, to the Committee on Interior and Insular Affairs of the United States House of Representatives, the Select Committee on Indian Affairs of the United States Senate, and to the affected Indian tribes a report on the status of Indian forest lands with respect to the standards, goals, and objectives set forth in approved forest management plans for each Indian tribe with Indian forest lands. The report shall identify the amount of Indian forest land in need of forestation or other silviculture treatment and the quantity of timber available for sale, offered for sale, and sold from each Indian reservation.

(d) ASSISTANCE FROM SECRETARY OF AGRICULTURE.—The Secretary of Agriculture, through the Forest Service, is authorized to provide, upon the request of the Secretary of the Interior, on a nonreimbursable basis, technical assistance in the conduct of such research and evaluation activities as may be necessary for the completion of any reports or assessments required by this Act.

SEC. 211. ALASKA NATIVE TECHNICAL ASSISTANCE PROGRAM.

(a) The Secretary, in consultation with the village and regional corporations established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) shall establish a program of technical assistance for such corporations to promote the sustained yield management of their forest resources. Such technical assistance shall also be available to promote local processing and other value added activities associated with such forest resources.

(b) The technical assistance to be provided by the Secretary pursuant to subsection (a) shall be made available through contracts, grants or agreements entered into in accordance with, and made available to entities eligible for such contracts, grants or agreements under, Public Law 93-638 (25 U.S.C. 450 et seq.).

TITLE III—INDIAN AND ALASKA NATIVE FORESTRY EDUCATION ASSISTANCE PROGRAMS

SEC. 301. ESTABLISHMENT OF INDIAN AND ALASKA NATIVE FORESTRY EDUCATION ASSISTANCE.

(a) FORESTER INTERN PROGRAM.—

(1) Notwithstanding the provisions of title 5 of the United States Code governing appointments in the competitive service, the Secretary shall establish and maintain in the Bureau of Indian Affairs at least 20 forester intern positions for Indian and Alaska Native students.

(2) For purposes of this subsection; the term "forester intern" means an Indian or Alaska Native who—

(A) is acquiring necessary academic qualifications to become a forester or a professional trained in a forestry-related field; and

(B) is appointed to one of the positions established under subsection (a)(1).

(3) The Secretary shall pay all costs for tuition; books; fees and living expenses incurred by a forester intern while attending an approved postsecondary or graduate school in a full-time forestry-related curriculum.

(4) A forester intern shall be required to enter into an obligated service agreement to serve as a professional forester or other forestry-related professional with the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise for 2 years for each year of education for which the Secretary pays the intern's educational costs under paragraph (3) of this subsection.

(5) A forester intern shall be required to report for service with the Bureau of Indian Affairs during any break in attendance at school of more than 3 weeks duration. Time spent in such service shall be counted toward satisfaction of the intern's obligated service agreement.

(b) COOPERATIVE EDUCATION PROGRAM.—

(1) The Secretary shall maintain, through the Bureau of Indian Affairs, a cooperative education program for the purpose of recruiting promising Indian and Alaska Native students who are enrolled in secondary schools, tribally-controlled community colleges, and other postsecondary or graduate schools for employment as a professional forester or other forestry-related professional in the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise.

(2) The cooperative educational program that is to be maintained under subsection (b)(1) shall be modeled on and shall have essentially the same features of the program operated on the date of enactment of this Act pursuant to chapter 308 of the Federal Personnel Manual of the Office of Personnel Management.

(3) Under the cooperative agreement program that is to be maintained under paragraph (1) of this subsection, the Secretary shall pay all costs for tuition, books, and fees of an Indian or Alaska Native student who—

(A) is enrolled in a course of study at an educational institution with which the Secretary has entered into a cooperative agreement; and

(B) is interested in a career with the Bureau of Indian Affairs, tribal government or tribal enterprise in the management of Indian forest land.

(4) Financial need shall not be a requirement to receive assistance under the cooperative agreement program that is to be maintained under this subsection.

(5) A recipient of assistance under the cooperative education program that is to be maintained under this subsection shall be required to enter into an obligated service agreement to serve as a professional forester or other forestry related professional with the Bureau of Indian Affairs, a reservation's recognized tribal government, or tribal forest-related enterprise for one year for each year for which the Secretary pays the recipient's educational costs pursuant to paragraph (3) of this subsection.

(c) SCHOLARSHIP PROGRAM.—

(1) The Secretary is authorized to grant forestry scholarships to Indians and Alaska Natives enrolled in accredited programs for postsecondary and graduate forestry and forestry-related programs of study as full-time students.

(2) A recipient of a scholarship under paragraph (1) shall be required to enter into an obligated service agreement with the Secretary in which the recipient agrees to accept employment for one year for each year for which the Secretary pays the recipient's educational costs, completion of the recipient's forestry or forestry-related course of study, with—

(A) the Bureau of Indian Affairs;

(B) a forestry program conducted under a contract, grant, or cooperative agreement entered into under the Indian Self-Determination and Education Assistance Act of 1974, as amended (25 U.S.C. 450 et seq.);

(C) an Indian enterprise engaged in a forestry or forestry-related business; or

(D) a reservation's recognized tribal government forestry-related program.

(3) The Secretary shall not deny scholarship assistance under this subsection solely on the basis of an applicant's scholastic achievement if the applicant has been admitted to and remains in good standing in an accredited postsecondary or graduate institution.

(d) FORESTRY EDUCATION OUTREACH.—The Secretary shall conduct, through the Bureau of Indian Affairs, and in consultation with other appropriate local, State and Federal agencies, and in consultation and coordination with Indian tribes, a forestry education outreach program for Indian and Alaska Native youth to explain and stimulate interest in all aspects of Indian forest land management and careers in forestry.

(e) ADEQUACY OF PROGRAMS.—The Secretary shall administer the programs described in this section until a sufficient number of Indians and Alaska Natives are trained to ensure that there is an adequate number of qualified, professional Indian and Alaska Native foresters to manage the Bureau of Indian Affairs forestry programs and forestry programs maintained by or for Indian tribes.

SEC. 302. POSTGRADUATION RECRUITMENT, EDUCATION AND TRAINING PROGRAMS.

(a) POSTGRADUATION RECRUITMENT.—The Secretary shall establish and maintain a program to attract Indian and Alaska Native professional foresters and forester technicians who have already graduated from their course of postsecondary or graduate education for employment in either the Bureau of Indian Affairs forestry program or, subject to the approval of a reservation's recognized tribal government, in tribal forestry programs. According to such regulations as the Secretary shall prescribe, such program shall provide for the employment of Indian and Alaska Native professional foresters or forestry technicians in exchange for the Secretary's assumption of the employee's outstanding student loans. The period of employment shall be determined by the amount of the loan that is assumed.

(b) POSTGRADUATE INTERGOVERNMENTAL INTERNSHIPS.—For the purposes of training, skill development and orientation of tribal, Alaska Native, and Federal forestry personnel, and the enhancement of tribal and Bureau of Indian Affairs forestry programs, the Secretary shall establish and, actively conduct a program for the cooperative internship of Federal, tribal, and Alaska Native forestry personnel. Such program shall—

(1) For agencies within the Department of the Interior—

(A) provide for the internship of Bureau of Indian Affairs, Alaska Native, and tribal forestry employees in the forestry-related programs of other agencies of the Department of the Interior,

(B) provide for forestry personnel from other Department of the Interior agencies to serve within the Bureau of Indian Affairs and, with the consent of a reservation's recognized tribal government, to serve in tribal forestry programs.

(2) For agencies not within the Department of the Interior, the Secretary may by interagency agreement provide for the internship of other forestry personnel, not within the jurisdiction of the Department of the Interior and who are above their sixth year of Federal service, within the Bureau of Indian Affairs and, with the consent of a reservation's recognized tribal government, within tribal forestry programs;

(3) provide for the continuation of salary and benefits for participating Federal employees by their originating agency;

(4) provide for the salaries and benefits of participating tribal and Alaska Native forestry employees by the host agency; and

(5) provide for a bonus pay incentive at the conclusion of the internship for any participant.

(c) CONTINUING EDUCATION AND TRAINING.—The Secretary shall maintain a program within the Bureau of Indian Affairs Division of Forestry for the ongoing education and training of Bureau of Indian Affairs, Alaska Native, and tribal forestry personnel. Such program shall provide for—

(1) orientation training for Bureau of Indian Affairs forestry personnel in tribal-Federal relations and responsibilities;

(2) continuing technical forestry education for Bureau of Tribal Affairs, Alaska Native, and Indian forestry personnel; and

(3) developmental training of tribal and Alaska Native personnel in forest land enterprises and marketing.

SEC. 303. COOPERATIVE AGREEMENTS BETWEEN THE DEPARTMENT OF THE INTERIOR AND INDIAN TRIBES.

(a) COOPERATIVE AGREEMENTS.—To faciliate the administration of the programs and activities of the Department of the Interior, the Secretary is authorized to negotiate and enter into cooperative agreements with Indian tribes to engage in cooperative manpower and job training and development programs; to develop and publish cooperative environmental education and natural resource planning materials; and to perform land and facility improvements, including forestry and other natural resources protection, fire protection, forestation, timber stand improvement, debris removal, and other activities related to land and natural resources management. The Secretary may enter into the aforesaid agreements when the Secretary determines the public interest will be benefited. In such cooperative agreements, the Secretary is authorized to advance or reimburse funds to contractors from any appropriated funds available for similar kinds of work or by furnishing or sharing materials, supplies, facilities or equipment without regard to the provisions of section 3324, title 31, United States Code, relating to the advance of public moneys.

(b) SUPERVISION.—In any agreement authorized by this section, Indian tribes and their employees may perform cooperative work under the supervision of the Department of the Interior in emergencies or otherwise as mutually agreed to, but shall not be deemed to be Federal employees other than for the purposes of sections 2671 through 2680 of title 28, United States Code, and section 8101 through 8193 of title 5, United States Code.

(c) SAVINGS CLAUSE.—Nothing in this Act shall be construed to limit the authority of the Secretary to enter into cooperative agreements otherwise authorized by law.

TITLE IV—AUTHORIZATION OF APPROPRIATIONS

SEC. 401. AUTHORIZATIONS.

(a) AUTHORIZATIONS.—There are authorized to be appropriated the following sums—

(1) $60,000,000 for each of fiscal years 1991 through 1995, for the purpose of carrying out sections 201 through 207 of this Act;

(2) $65,000,000 for each of the fiscal years 1996 through 2006 for the purpose of carrying out sections 201 through 207 of this Act;

(3) $3,000,000 for each of the fiscal years 1991 through 2006 for purposes of carrying out section 208 of this Act;

(4) $6,000,000 for each of fiscal years 1991 through 2006 for the purposes of carrying out section 209 of this Act;

(5) $500,000 for the purposes of carrying out section 210(a) of this Act, to remain available until expended;

(6) such sums as are necessary for each of the fiscal years 1991 through 2006 for the purpose of carrying out subsections (b) and (c) of section 210 of this Act;

(7) $3,000,000 for each of the fiscal years 1991 through 2006 for the purpose of carrying out section 211 of this Act; and

(8) $3,000,000 for each of the fiscal years 1991 through 2006 for purposes of carrying out title III of this Act;

(b) ADJUSTMENT.—The amounts referred to in subsection (a) of this section shall be adjusted for each fiscal year by the percent which equals ⅔ of the percentage change in the United States Gross National Products Implicit Price Deflator, or 7 percent, whichever is less in any 1 year, using fiscal year 1991 as the base.

(c) SYNDER ACT.—Appropriations made pursuant to the provisions of this Act shall be made in lieu of the provisions of the Synder Act (25 U.S.C. 13).

TITLE V—MISCELLANEOUS

SEC. 501. REGULATIONS.

Except as otherwise provided by this Act, the Secretary is directed to promulgate final regulations for the implementation of the Act within eighteen months from the date of its enactment. All regulations promulgated pursuant to this Act shall be developed by the Secretary with the participation of the affected Indian tribes.

SEC. 502. SEVERABILITY.

If any provision of this Act, or the application of any provision of this Act to any person or circumstance, is held invalid, the application of such provision to other persons or circumstances and the remainder of this Act shall not be affected thereby.

VIRGINIA D. SMITH ANIMAL HEALTH RESEARCH LABORATORY

Mr. NUNN. I ask unanimous consent the Environment Committee be discharged from further consideration of H.R. 3048 designating "Virginia Smith Animal Health Research Laboratory," and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3048) to designate the Agricultural Research Service, United States Department of Agriculture, animal health research building in Clay Center, Nebraska, as the "Virginia D. Smith Animal Health Research Laboratory".

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3048) was ordered to a third reading, was read the third time, and passed.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO SALUTE AND CONGRATULATE THE PEOPLE OF POLAND AS THEY COMMEMORATE THE 200TH ANNIVERSARY OF THE ADOPTION OF THE POLISH CONSTITUTION

Mr. NUNN. Mr. President, on behalf of Senator MITCHELL, Senator DOLE, Senator DOMENICI, Senator SIMON, I send the following concurrent resolution to the desk and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

Assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 145) to salute and congratulate the people of Poland as they commemorate the 200th anniversary of the adoption of the Polish Constitution.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objection, the concurrent resolution (S. Con. Res. 145) was considered and agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 145

Whereas, the Polish Constitution of 1791 was designed to protect Poland's sovereignity and national unity, and replaced a feudal system of rule in Poland with a progressive constitutional monarchy;

Whereas, the Polish Constitution secured individual freedom for all persons in Poland and guaranteed religious tolerance by assuring "to all persuasions and religions freedom and liberty", and formed a government composed of three distinct powers: Legislative, Executive, and Judicial, while declaring that "all power in civil society should be derived from the will of the people";

Whereas, the Polish Constitution revitalized the parliamentary system by placing preeminent lawmaking power in a House of Deputies, by subjecting the legislative Diet to majority rule, and by granting the Diet the power to remove ministers, appoint commissars, and choose magistrtes;

Whereas, the Polish Constitution provided for significant economic, social, and political reforms for its time by removing inequalities between the nobility and bourgeois, recognizing town residents as "freemen" that had judicial autonomy and expanded rights, and extending the protection of law to the peasantry, which previously had no recourse against the arbitrary action of feudal lords;

Whereas, the principles of the Polish Constitution endured and became the symbol around which a powerful new national consciousness was born, helping the Polish nation to survive long periods of misfortune over the next two centuries: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring) that the people of the United States of America salute and congratulate the people of Poland as they commemorate the two-hundredth anniversary of the adoption of the Polish Constitution on May 3, 1991, and recognize that Po-

land's rebirth as a free nation is supported by the legacy of the Polish Constitution of 1791;

SEC. 2. The Library of Congress is authorized and directed to commemorate this anniversary with appropriate ceremonies and activities.

SEC. 3. The President is requested to issue a proclamation calling upon the governors of the several States, the chief officials of local governments, and the people of the United States to observe this anniversary with appropriate ceremonies and activities.

SEC. 4. The Secretary of the Senate is directed to transmit copies of this resolution to the President, the Secretary of State, and the Marshalls of the Senate and Sejm of Poland.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONGRESSIONAL MEDAL FOR VETERANS OF THE ATTACK ON PEARL HARBOR

Mr. SIMPSON. Mr. President, I send a bill to the desk on behalf of Senator HEINZ and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 3000) to strike coins for Congressional Medal for Pearl Harbor Veterans/Yosemite National Park Centennial Medal/Bicentennial coin commemorating the U.S. Constitution.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the second time by title, and, without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

CONGRESSIONAL MEDAL FOR PEARL HARBOR VETERANS/YOSEMITE NATIONAL PARK CENTENNIAL MEDAL

Mr. HEINZ. Mr. President, I rise to introduce a bill that incorporates two bills that have previously passed both the House and Senate. This bill authorizes the striking of two medals: One in recognition of the sacrifices made by the men and women in the Armed Forces who defended Pearl Harbor from enemy attack, the other in recognition of Yosemite National Park's centennial celebration.

This bill is the exact same language that was recently passed the House and is agreeable to both the Senate and House Banking Committees.

I ure my colleagues to support this important legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passsed as follows:

S. 3000

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—CONGRESSIONAL MEDAL FOR VENTERANS OF THE ATTACK ON PEARL HARBOR

SEC. 101. PURPOSE.

The purpose of this title are to—

(1) commemorate the sacrifices made and service rendered to the United States by those veterans of the Armed Forces who defended Pearl Harbor and other military installations in Hawaii against attack by the Japanese on December 7, 1941; and

(2) honor those veterans on the fiftieth anniversary of that attack.

SEC. 102. CONGRESSIONAL MEDAL.

(a) PRESENTATION AUTHORIZED.—The Speaker of the House of Representatives and the President pro tempore of the Senate are authorized jointly to present, on behalf of the Congress, to the individuals certified by the Secretary of Defense pursuant to section 103 a bronze medal 1½ inches in diameter commemorating their service to the United States. The presentation shall be made as close as feasible to the fiftieth anniversary of the attack on Pearl Harbor. The medal may be accepted by the next of kin of any such individual who was killed in action during that attack or who died thereafter.

(d) DESIGN AND STRIKING.—The Secretary of the Treasury shall strike the medal established by subsection (a) in bronze with suitable emblems, devices, and inscriptions to be determined by the Secretary.

SEC. 103. ELIGIBILITY TO RECEIVE MEDAL.

(a) IN GENERAL.—To be eligible to be presented the medal referred to in section 102(a), an individual must have been a member of the Armed Forces who was present in Hawaii on December 7, 1941, and who participated in combat operations that day against Japanese military forces attacking Hawaii. An individual who was killed or wounded in that attack shall be deemed to have participated in the combat operations.

(b) DOCUMENTATION.—To establish the eligibility required by subsection (a), an individual must present to the Secretary of Defense an application with such supporting documentation as the individual may have to support his or her eligibility or the eligibility of a next of kin. The Secretary shall determine, through the documentation provided and, if necessary, independent investigation whether an individual meets the criteria established in subsection (a).

(c) CERTIFICATION.—The Secretary of Defense shall, within 2 months after the date of enactment of this title, certify to the Speaker of the House of Representatives and the President pro tempore of the Senate the names of the individuals eligible to receive the medal.

(d) NEXT OF KIN.—If applications for a medal are filed by more than one next of kin of an individual who is eligible to receive a medal, the Secretary of Defense shall determine which next of kin will receive the medal.

SEC. 104. AUTHORIZATION OF APPROPRIATIONS.

Effective October 1, 1990, there are authorized to be appropriated such sums as are necessary to carry out the provisions of this title.

SEC 105. NATIONAL MEDALS.

The medals struck pursuant to this title are national medals for purposes of chapter 51 of title 31, United States Code.

TITLE II—YOSEMITE NATIONAL PARK CENTENNIAL MEDAL

SEC. 201. SHORT TITLE.

This title may be cited as the "Yosemite National Park Centennial Medal Act".

SEC. 202. YOSEMITE NATIONAL PARK CENTENNIAL MEDALS.

(a) STRIKING AND DESIGN OF MEDALS.—In commemoration of the centennial of Yosemite National Park in 1990, the Secretary of the Treasury (hereafter in this title referred to as the "Secretary") shall strike medals with suitable emblems, devices, and inscriptions capturing the scenic and historic significance of the park. The design of the medals shall be determined by the Secretary in consultation with the Secretary of the Interior and the Commission of Fine Arts.

(b) SALE OF MEDALS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, the medals issued under this title shall be sold by the Secretary at a price equal to the cost of designing and issuing such medals (including labor, materials, dies, use of machinery, and overhead expenses) and the surcharge provided for in paragraph (3).

(2) BULK SALES.—The Secretary shall make bulk sales at a reasonable discount.

(3) SURCHARGES.—All sales shall include a surcharge of $2 each.

SEC. 203. DISTRIBUTION OF SURCHARGES.

All surcharges which are received by the Secretary from the sale of medals issued under this title shall be promptly paid by the Secretary to a permanent endowment fund for the benefit of Yosemite National Park to be administered by the National Park Foundation. The net income from the fund shall be paid to the Secretary of the Interior for purposes of funding special supplemental projects relating to back country trail development and rehabilitation, and the preservation of Sequoia groves within the boundaries of Yosemite National Park.

SEC. 204. SALE OF MEDALS IN NATIONAL PARK FACILITIES.

The Secretary and the Secretary of the Interior shall enter into a memorandum of agreement to allow—

(1) The Secretary to deliver medals to the Secretary of the Interior; and

(2) The Secretary of the Interior to provide for the sale of medals in National Park facilities.

SEC. 205. METAL CONTENT AND SIZE OF MEDALS.

The medals authorized to be struck and delivered under this title shall be struck in bronze and in the size determined by the Secretary in consultation with the Secretary of the Interior.

SEC. 206. NATIONAL MEDALS.

The medals authorized by this title are national medals for purposes of chapter 51 of title 31, United States Code.

SEC. 207. EXAMINATION OF RECORDS.

The Comptroller General of the United States shall have the right to examine all books, documents, and other records of the National Park Foundation which are related to the medals authorized by this title.

TITLE III—BICENTENNIAL COIN COMMEMORATING THE UNITED STATES CONSTITUTION

SEC. 301. DENOMINATIONS, SPECIFICATIONS, AND DESIGN OF COINS.

Subsection (d)(1) of section 5112 of title 31, United States Code, is amended by striking the fourth sentence.

SEC. 302. DESIGN CHANGES REQUIRED FOR CERTAIN COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(3) The design on the reverse side of the half dollar, quarter dollar, dime coin, 5-cent coin and one-cent coin shall be selected for redesigning. One or more coins may be selected for redesign at the same time, but the first redesigned coin shall have a design commemorating the two hundredth anniversary of the United States Constitution for a period of 2 years after issuance. After the 2-year period, the bicentennial coin shall have its design changed in accordance with the provisions of this subsection. Such selection, and the minting and issuance of the first selected coin shall be made not later than 1 year after the date of the enactment of this paragraph. All such redesigned coins shall conform with the inscription requirements set forth in paragraph (1) of this subsection."

SEC. 303. DESIGN ON OBVERSE SIDE OF COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(4) Subject to paragraph (2), the design on the obverse side of the half dollar, quarter dollar, dime coin, 5-cent coin, and one-cent coin shall contain the likenesses of those currently displayed and shall be considered for redesign. All such coin obverse redesigns shall conform with the inscription requirements set forth in paragraph (1) of this subsection".

SEC. 304. SELECTION OF DESIGNS.

The design changes for each coin authorized by the amendments made by this Act shall take place at the discretion of the Secretary and shall be done at the rate of one or more coins per year, to be phased in over 6 years after the date of the enactment of this Act. In selecting new designs, the Secretary shall consider, among other factors, thematic representations of the following constitutional concepts: freedom of speech and assembly; freedom of the press; right to due process of law; right to a trial by jury; right to equal protection under the law; right to vote; themes from the Bill of Rights; and separation of powers, including the independence of the judiciary. The designs shall be selected by the Secretary upon consultation with the United States Commission on Fine Arts.

SEC. 305. REDUCTION OF THE NATIONAL DEBT.

Subsection (a)(1) of section 5132 of title 31, United States Code, is amended by inserting after the third sentence the following: "Any profits received from the sale of uncirculated and proof sets of coins shall be deposited by the Secretary in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.".

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INDIAN CHILD PROTECTIVE SERVICES AND FAMILY VIOLENCE PROTECTION ACT

Mr. NUNN. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 749, S. 2340, regarding programs to strengthen Indian families.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows.

A bill (S. 2340) to develop and improve child protective service programs on Indian reservations and to strengthen Indian families.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Indian Child Protective Services and Family Violence Prevention Act".

SEC. 2. PURPOSES.

The purposes of this Act are to—

(1) provide for technical assistance and training related to the investigation and treatment of cases of child abuse and neglect;

(2) establish Indian Child Resource and Family Services Centers in each Bureau of Indian Affairs Area Office which will consist of multidisciplinary teams of personnel with experience and training in the prevention, identification, investigation, and treatment of child abuse and neglect;

(3) provide for the treatment and prevention of incidents of family violence; and

(4) authorize other actions as necessary to ensure effective child protection on Indian reservations.

SEC. 3. DEFINITIONS.

For purposes of this Act—

(1) The term "child abuse and neglect" means the physical or mental injury, sexual abuse or exploitation, negligent treatment or maltreatment of a child by any person, including a person responsible for the child's welfare, under circumstances which indicate that the child's health or welfare is harmed or threatened thereby.

(2) The term "persons responsible for the child's welfare" includes—

(A) any employee of a children's residential facility, and

(B) any person providing out-of-home care, education, or services to children.

(3) The term "family violence" means any act, or threatened act, of violence, including any forceful detention of an individual, which—

(A) results, or threatens to result, in physical or mental injury, and

(B) is committed by an individual against another individual—

(i) to whom such person is, or was, related by blood or marriage or otherwise legally related, or

(ii) with whom such person is, or was, residing.

(4) The term "inter-tribal consortium" means a partnership between—

(A) an Indian tribe or tribal organization on an Indian reservation, and

(B) one or more Indian tribes or tribal organizations of other Indian tribes.

(5) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C.A. 1601, et seq.)), which is recognized as eligible for the special services provided by the United States to Indians because of their status as Indians.

(6) The term "tribal organization" means—

(A) the recognized governing body of any Indian tribe, or

(B) any legally established organization of Indians which—

(i) is controlled, sanctioned, or chartered by such governing body, or which

(ii) is democratically elected by the adult members of the Indian community to be served by such organization, and

(iii) which includes the maximum participation of Indians in all phases of its activities.

(7) The term "shelter" means the provision of temporary refuge and related assistance in compliance with applicable Federal and tribal laws and regulations governing the provision, on a regular basis, of shelter, safe homes, meals, and related assistance to victims of family violence or their dependents.

(8) The term "related assistance"—

(A) includes counseling and self-help services to abusers, victims, and dependents in family violence situations (which shall include counseling of all family members to the extent feasible) and referrals for appropriate health-care services (including alcohol and drug abuse treatment), and

(B) may include food, clothing, child care, transportation, and emergency services for victims of family violence and their dependents.

(9) The terms "child" and "juvenile" mean any individual who is under the age of 18 years.

(10) The term "Indian" means a person who is a member of an Indian tribe.

(11) The term "Indian country" has the meaning given to such term by section 1151 of title 18, United States Code.

(12) The term "Bureau" means the Bureau of Indian Affairs of the Department of the Interior.

(13) The term "Service" means the Indian Health Service of the Department of Health and Human Services.

(14) The term "Secretary" means the Secretary of the Interior.

SEC. 4. INDIAN CHILD RESOURCE AND FAMILY SERVICES CENTERS.

(a) The Secretary shall establish within each area office of the Bureau an Indian Child Resource and Family Services Center.

(b) The Secretary and the Secretary of Health and Human Services shall enter into a Memorandum of Agreement which provides for the staffing of the Indian Child Resource and Family Services Centers established under this section.

(c) Each Indian Child Resource and Family Services Center established under subsection (a) shall be staffed by multidisciplinary teams of personnel with experience and training in the prevention, identification, investigation, and treatment of incidents of family violence and child abuse and neglect.

(d) Each Indian Child Resource and Family Services Center established under subsection (a) shall—

(1) provide advice, technical assistance, and consultation to Indian tribes, Indian organizations, and inter-tribal consortia, upon request;

(2) provide training to Indian tribes, Indian organizations, personnel of the Bureau and personnel of the Service on the identification and investigation of cases of family violence and child abuse and neglect;

(3) develop training materials on the prevention, identification, investigation, and treatment of incidents of family violence and child abuse and neglect for distribution to Indian tribes, and Indian organizations;

(4) develop recommendations to assist Federal and tribal personnel to respond to cases of family violence and child abuse and neglect; and

(5) develop policies and procedures for each agency office of the Bureau and service unit of the Service within the area which, to the extent feasible, comply with tribal laws pertaining to cases of family violence and child abuse and neglect, including any criminal laws and which provide for maximum cooperation with the enforcement of such laws.

(e) Each multidisciplinary team established under this section shall include, but is not limited to, personnel with a background in—

(1) law enforcement,

(2) child protective services,

(3) juvenile counseling and adolescent mental health, or

(4) domestic violence.

(f) Indian Child Resource and Family Services Centers established under subsection (a) shall be subject to the provisions of the Indian Self-Determination and Education Assistance Act. If an Indian Child Resource and Family Services Center is located in an area office of the Bureau which serves more than one Indian tribe, any tribal application to enter into a contract to operate the Center pursuant to the Indian Self-Determination and Education Assistance Act must have the consent of each of the other tribes served by the area office, except that, in the Juneau Area, only the consent of such tribes or tribal consortia that are engaged in contracting of Child Protective Services and Family Violence Prevention programs pursuant to Public Law 93-638 shall be required.

(g) There are authorized to be appropriated to carry out the provisions of this section, $3,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 5. INDIAN CHILD PROTECTION AND FAMILY VIOLENCE PREVENTION PROGRAM.

(a) The Secretary shall establish within the Bureau an Indian Child Protection and Family Violence Prevention Program to provide financial assistance to any Indian tribe, tribal organization, or inter-tribal consortium, for the development of an Indian child protection and family violence prevention program.

(b) The Secretary is authorized to enter into agreements with Indian tribes, tribal organizations, or inter-tribal consortia, pursuant to the Indian Self-Determination Act for the establishment of Indian child protection and family violence prevention programs on Indian reservations.

(c) An Indian child protective services program established under this section shall be responsible for the investigation of reported cases of child abuse and neglect.

(d) An Indian family violence prevention and treatment program established under this section shall be responsible for the treatment and prevention of incidents of family violence and for the provision of immediate shelter and related assistance for victims of family violence and their dependents.

(e) Funds provided under subsection (i) may be used for—

(1) the establishment of a child protective services program which shall include—

(A) the employment of child protective services staff to investigate cases of child abuse and neglect;

(B) training programs for child protective services personnel, law enforcement personnel, and judicial personnel in the investigation, prevention, and treatment of cases of child abuse and neglect; and

(C) purchase of equipment to assist in the investigation of cases of child abuse and neglect;

(2) the establishment of a family violence prevention and treatment program which shall include—

(A) the employment of family violence prevention and treatment staff to respond to incidents of family violence;

(B) the provision of immediate shelter and related assistance for victims of family violence and their dependents;

(C) training programs for family violence prevention and treatment personnel, law enforcement personnel, and judicial personnel in the investigation, prevention, and treatment of cases of family violence; and

(D) construction or renovation of facilities for the establishment of family violence shelters;

(3) the development and implementation of a multidisciplinary child abuse investigation and prosecution program which shall—

(A) coordinate child abuse investigation, prosecution, treatment, and counseling services;

(B) develop protocols among related agencies to ensure that investigations of child abuse cases, to the extent practical, minimize the trauma to the child victim;

(4) the establishment of training programs for—

(A) professional and paraprofessional personnel in the fields of medicine, law, education, social work, and other relevant fields who are engaged in, or intend to work in, the field of prevention, identification, investigation, and treatment of Indian family violence or child abuse and neglect;

(B) instruction in methods of protecting children from child abuse and neglect of children and to persons responsible for the welfare of Indian children, including parents of and persons who work with Indian children; or

(C) educational, identification, prevention, and treatment services for child abuse and neglect in cooperation with preschool, elementary or secondary schools, or tribally controlled community colleges (within the meaning of section 2 of the Tribally Controlled Community Act of 1978 (25 U.S.C. 1801));

(5) other community education efforts for tribal members (including school children) regarding issues of family violence and child abuse and neglect; and

(6) such other innovative and culturally relevant programs and projects as the Secretary may approve, including programs and projects for—

(A) parental self-help;

(B) prevention and treatment of alcohol and drug-related family violence and child abuse and neglect, or

(C) home health visitor programs,

that show promise of successfully preventing and treating cases of family violence and child abuse and neglect.

(f)(1) The Secretary, with the participation of Indian tribes, shall establish, and promulgate by regulations, a formula which establishes base support funding for Indian child and family violence prevention programs.

(2) In the development of regulations for base support funding for Indian child protection and family violence prevention programs, the Secretary shall develop, in consultation with Indian tribes, appropriate caseload standards and staffing requirements for child protective services and family violence prevention and treatment programs which are comparable to standards developed by the National Association of Social Work, the Child Welfare League of America and other professional associations in the field of social work and child welfare. Each level of funding assistance shall correspond to the staffing requirements established by the Secretary pursuant to this section.

(3) Factors to be considered in the development of the base support funding formula shall include, but are not limited to—

(A) projected service population of the program;

(B) projected service area of the program;

(C) projected number of cases per month;

(D) special circumstances warranting additional program resources, such as high incidence of child sexual abuse, high incidence of violent crimes against women, or the existence of a significant victim population within the community.

(4) The formula established pursuant to this subsection shall provide funding necessary to support—

(A) one child protective services or family violence caseworker, including fringe benefits and support costs, for each tribe;

(B) an additional child protective services or family violence caseworker, including fringe benefits and support costs, for each level of assistance for which an Indian tribe qualifies.

(5) In any fiscal year that appropriations are not sufficient to fully fund Indian child protective services and family violence prevention and treatment programs at each level of assistance under the formula required to be established in this section, available funds for each level of assistance shall be evenly divided among the tribes qualifying for that level of assistance.

(g) Services provided under contracts made under this section shall supplement, not supplant, services from any other funds available for the same general purposes, including, but not limited to—

(1) treatment, including but not limited to—

(A) individual counseling;

(B) group counseling; or

(C) family counseling;

(2) social services and case management;

(3) training available to Indian tribes, tribal agencies, and Indian organizations regarding the identification, investigation, prevention, and treatment of family violence and child abuse and neglect;

(4) law enforcement services including investigations and prosecutions.

(h) Each recipient of funds awarded pursuant to subsection (a) shall—

(1) furnish the Secretary of the Interior with such information as the Secretary may require to—

(A) evaluate the program for which the award is made; and

(B) ensure that the funds are expended for the purposes for which the award was made; and

(2) submit to the Secretary at the end of each fiscal year an annual report which shall include such information as the Secretary may require.

(i) There are authorized to be appropriated to carry out the provisions of this section, $30,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 6. REPORT.

On or before March 1, 1991, and March 1 of each calendar year thereafter, the Secretary shall submit to the Congress a report involving the administration of this Act during the calendar year preceding the calendar year in which such report is submitted.

AMENDMENT NO. 2578

(Purpose: to make certain technical and clarifying amendments)

Mr. SIMPSON. I send an amendment to the desk for Mr. McCAIN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. McCAIN, proposes an amendment numbered 2578.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, line 16, strike out "and".

On page 16, between lines 16 and 17, insert the following:

(4) establish tribally operated programs to protect Indian children and reduce the incidences of family violence in Indian country; and

On page 16, line 17, strike out "(4)" and insert in lieu thereof "(5)".

On page 17, line 5, immediately after "employee", insert "or volunteer".

On page 21, line 7, immediately after "neglect", insert a comma and the following: "and to the extent practical, coordinate with institutions of higher education, including tribally controlled community colleges, to offer college-level credit to interested trainees"

On page 22, between lines 4 and 5, insert the following:

(f) The Secretary shall establish, for each Indian Child Resource and Family Services Center, an advisory board to advise and assist such Center in carrying out its activities under this Act. Each advisory board shall consist of 7 members appointed by the Secretary from Indian tribes and human service providers served by an area office of the Bureau of Indian Affairs. The advisory board shall assist the Center in coordinating programs, identifying training materials, developing policies and procedures relating to family violence and child abuse and neglect.

On page 22, line 5, strike out "(f)" and insert in lieu thereof "(g)".

On page 22, line 18 following the period insert the following "This section shall not preclude the designation of an existing child resource and family services center operated by a tribe or tribal organization as an Indian Child Resource and Family Services Center if all of the tribes to be served by the center agree to such designation."

On page 22, line 19, strike out "(g)" and insert in lieu thereof "(h)".

On page 22, line 13, beginning with "served", strike out all through "office" on line 14, and insert in lieu thereof "to be served under the contract".

On page 25, between lines 6 and 7, insert the following:

(C) provide for the coordination and cooperation of law enforcement, courts of competent jurisdiction, and tribal, Federal, and State agencies through intergovernmental or interagency agreements that define and specify each party's responsibilities;

On page 25, between lines 6 and 7, insert the following:

(4) the development of tribal child protection codes and regulations;

On page 25, line 7, strike out "(4)" and insert in lieu thereof "(5)".

On page 26, line 1, strike out "(5)" and insert in lieu thereof "(6)".

On page 26, line 4, strike out "(6)" and insert in lieu thereof "(7)".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment (No. 2578) was agreed to.

Mr. SIMPSON. I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCAIN. Mr. President, I rise today to express my gratitude to my colleagues for their prompt consideration of S. 2340, the Indian Child Protective Services and Family Violence Prevention Act. I would especially like to thank my good friend, Senator INOUYE, chairman of the Select Committee on Indian Affairs for his leadership on these very troubling issues.

Our committee has heard the alarming statistics regarding the growing problems of child abuse and family violence in Indian country and the tragic situations confronting Indian tribes where spousal or elder abuse continues without intervention or treatment options. This cycle of violence within the family destroys not only the family but because of the extensive tribal kinship system it affects the entire community. Because of our failure to address this issue, tremendous pain and suffering has been inflicted on Indian children and their families.

S. 2340, the Indian Child Protective Services and Family Violence Prevention Act will provide badly needed resources to Indian tribes for their efforts to provide effective child protection and to help alleviate the problems associated with family violence in Indian communities. S. 2340 would provide much needed relief to frustrated tribal officials and over-extended social workers. It would establish at the local level Indian child and family services resource centers to provide training and technical assistance to Indian tribes. Each BIA area would have a multidisciplinary team with experience and expertise in the prevention, identification, investigation, and treatment of child abuse and family violence.

S. 2340 will provide resources to Indian tribes to combat these very difficult problems. Indian tribes who enter into contracts under the Indian Child Protection and Family Violence Prevention Act would receive the resources necessary to fashion community-based programs to meet each community's unique needs. S. 2340 provides that an Indian tribe will receive funds based on actual needs so that tribal programs are not set up only to fail. S. 2340 provides the flexibility necessary for the development of child protective services and family violence prevention programs to meet tribal needs.

I am offering a series of minor amendments to S. 2340, which serve to further enhance and increase tribal control over the Indian child and family service centers created under this act. These amendments will provide tribes with greater flexibility in pursuing self-determination contracts as well as providing maximum coordination between Federal, tribal, and State agencies in investigating child abuse and neglect and family violence cases.

Mr. HATFIELD. Mr. President, I rise in support of S. 2340, a bill to develop and improve child protective service programs on Indian reservations and to strengthen Indian families. Senator McCAIN's bill offers Indian country an opportunity to protect Indian children from abuse and neglect and I applaud the Senate Select Committee on Indian Affairs in its efforts to address this growing problem. This bill will provide a fundamental service to Indian people by providing technical assistance and training related to the investigation and treatment of cases of family violence and child abuse and neglect. When enacted this legislation will establish programs which will allow for greater coordination between tribal agencies and Federal agencies in the provision of child protection and family violence prevention and treatment.

Greater coordination between tribal governments and the Federal Government is a policy I fully endorse. Under section 4 of S. 2340, the Bureau of Indian Affairs is responsible for the establishment of Indian child resource and family services centers. These centers are designed to be resources to the Inidan tribes and will require the Bureau of Indian Affairs and the Indian Health Service to coordinate services to Indian tribes. Senate Report 101-403, which accompanies this bill, notes that a vital part of coordination and participation of Indian tribes in the development of tribal laws, policies and procedures on the

identification, investigation, prevention and treatment of cases of family violence and child abuse or neglect.

Mr. President, I am pleased to recognize the Northwest Indian Child Welfare Institute of Portland, OR, and its exemplary efforts in serving as a resource to the Indian tribes of Washington, Oregon, and Idaho. The very same programs and solutions to child abuse and neglect which are suggested in S. 2340 have been addressed by the Northwest Indian Child Welfare Institute [NWICWI]. The NWICWI is the only organization in the Northwest that addresses child abuse and neglect issues specifically focused on Indian children. Furthermore, it is the only regional child welfare organization operated by and for people. Together, tribal programs and Indian professionals have created this fine institute. It is a central voice for Indian child welfare in the Northwest and because of its makeup, it must be responsive to the needs as defined by the tribes. Finally, Indian tribes in 5 of the 12 areas of the BIA are engaged in developing child welfare resource centers modeled after the Northwest Indian Child Welfare Institute.

For these reasons, I have offered an amendment to S. 2340 which will ensure that tribal organizations which offer the caliber of service provided by the Northwest Indian Chief Welfare Institute may be designated to serve as Indian child resource and family service centers. I want to extend the appreciation of tribes in the Northwest to Senator McCAIN for recognizing the importance of this amendment and look forward to working with the Committee on Indian Affairs in fulfiling the purposes of this bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 2340) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2340

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Indian Child Protective Services and Family Violence Prevention Act".

SEC. 2. PURPOSES.

The purposes of this Act are to—

(1) provide for technical assistance and training related to the investigation and treatment of cases of child abuse and neglect;

(2) establish Indian Child Resource and Family Services Centers in each Bureau of Indian Affairs Area Office which will consist of multidisciplinary teams of personnel with experience and training in the prevention, identification, investigation, and treatment of child abuse and neglect;

(3) provide for the treatment and prevention of incidents of family violence;

(4) establish tribally operated programs to protect Indian children and reduce the incidences of family violence in Indian country; and

(5) authorize other actions as necessary to ensure effective child protection on Indian reservations.

SEC. 3. DEFINITIONS.

For purposes of this Act—

(1) The term "child abuse and neglect" means the physical or mental injury, sexual abuse or exploitation, negligent treatment or maltreatment of a child by any person, including a person responsible for the child's welfare, under circumstances which indicate that the child's health or welfare is harmed or threatened thereby.

(2) The term "persons responsible for the child's welfare" includes—

(A) any employee or volunteer of a children's residential facility, and

(B) any person providing out-of-home care, education, or services to children.

(3) The term "family violence" means any act, or threatened act, of violence, including any forceful detention of an individual, which—

(A) results, or threatens to result, in physical or mental injury, and

(B) is committed by an individual against another individual—

(i) to whom such person is, or was, related by blood or marriage or otherwise legally related, or

(ii) with whom such person is, or was, residing.

(4) The term "inter-tribal consortium" means a partnership between—

(A) an Indian tribe or tribal organization on an Indian reservation, and

(B) one or more Indian tribes or tribal organizations of other Indian tribes.

(5) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C.A. 1601, et seq.)), which is recognized as eligible for the special services provided by the United States to Indians because of their status as Indians.

(6) The term "tribal organization" means—

(A) the recognized governing body of any Indian tribe, or

(B) any legally established organization of Indians which—

(i) is controlled, sanctioned, or chartered by such governing body, or which

(ii) is democratically elected by the adult members of the Indian community to be served by such organization, and

(iii) which includes the maximum participation of Indians in all phases of its activities,

(7) The term "shelter" means the provision of temporary refuge and related assistance in compliance with applicable Federal and tribal laws and regulations governing the provision, on a regular basis, of shelter, safe homes, meals, and related assistance to victims of family violence or their dependents.

(8) The terms "related assistance"—

(A) includes counseling and self-help services to abusers, victims, and dependents in family violence situations (which shall include counseling of all family members to the extent feasible) and referrals for appropriate health-care services (including alcohol and drug abuse treatment), and

(B) may include food, clothing, child care, transportation, and emergency services for victims of family violence and their dependents.

(9) The terms "child" and "juvenile" mean any individual who is under the age of 18 years.

(10) The term "Indian" means a person who is a member of an Indian tribe.

(11) The term "Indian country" has the meaning given to such term by section 1151 of title 18, United States Code.

(12) The term "Bureau" means the Bureau of Indian Affairs of the Department of the Interior.

(13) The term "Service" means the Indian Health Service of the Department of Health and Human Services.

(14) The term "Secretary" means the Secretary of the Interior.

SEC. 4. INDIAN CHILD RESOURCE AND FAMILY SERVICES CENTERS.

(a) The Secretary shall establish within each area office of the Bureau an Indian Child Resource and Family Services Center.

(b) The Secretary and the Secretary of Health and Human Services shall enter into a Memorandum of Agreement which provides for the staffing of the Indian Child Resource and Family Services Centers established under this section.

(c) Each Indian Child Resource and Family Services Center established under subsection (a) shall be staffed by multidisciplinary teams of personnel with experience and training in the prevention, identification, investigation, and treatment of incidents of family violence and child abuse and neglect.

(d) Each Indian Child Resource and Family Services Center established under subsection (a) shall—

(1) provide advice, technical assistance, and consultation to Indian tribes, Indian organizations, and inter-tribal consortia, upon request;

(2) provide training to Indian tribes, Indian organizations, personnel of the Bureau and personnel of the Service on the identification and investigation of cases of family violence and child abuse and neglect and to the extent practical, coordinate with institutions of higher education, including tribally controlled community colleges, to offer college-level credit to interested trainees;

(3) develop training materials on the prevention, identification, investigation, and treatment of incidents of family violence and child abuse and neglect for distribution to Indian tribes, and Indian organizations;

(4) develop recommendations to assist Federal and tribal personnel to respond to cases of family violence and child abuse and neglect; and

(5) develop policies and procedures for each agency office of the Bureau and service unit of the Service within the area which, to the extent feasible, comply with tribal laws pertaining to cases of family violence and child abuse and neglect, including any criminal laws and which provide for maximum cooperation with the enforcement of such laws.

(e) Each multidisciplinary team established under this section shall include, but is not limited to, personnel with a background in—

(1) law enforcement,
(2) child protective services,
(3) juvenile counseling and adolescent mental health, or
(4) domestic violence.

(f) The Secretary shall establish, for each Indian Child Resource and Family Services Center, an advisory board to advise and assist such Center in carrying out its activities under this Act. Each advisory board shall consist of 7 members appointed by the Secretary from Indian tribes and human service providers served by an area office of the Bureau of Indian Affairs. The advisory board shall assist the Center in coordinating programs, identifying training materials, developing policies and procedures relating to family violence and child abuse and neglect.

(g) Indian Child Resource and Family Services Centers established under subsection (a) shall be subject to the provisions of the Indian Self-Determination and Education Assistance Act. If an Indian Child Resource and Family Services Center is located in an area office of the Bureau which serves more than one Indian tribe, any tribal application to enter into a contract to operate the Center pursuant to the Indian Self-Determination and Education Assistance Act must have the consent of each of the other tribes to be served under the contract, except that, in the Juneau Area, only the consent of such tribes or tribal consortia that are engaged in contracting of Child Protective Services and Family Violence Prevention programs pursuant to Public Law 93-638 shall be required. This section shall not preclude the designation of an existing child resource and family services center operated by a tribe or tribal organization as an Indian Child Resource and Family Services Center if all of the tribes to be served by the center agree to such designation.

(h) There are authorized to be appropriated to carry out the provisions of this section, $3,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 5. INDIAN CHILD PROTECTION AND FAMILY VIOLENCE PREVENTION PROGRAM.

(a) The Secretary shall establish within the Bureau an Indian Child Protection and Family Violence Prevention Program to provide financial assistance to any Indian tribe, tribal organization, or inter-tribal consortium, for the development of an Indian child protection and family violence prevention program.

(b) The Secretary is authorized to enter into agreements with Indian tribes, tribal organizations, or inter-tribal consortia, pursuant to the Indian Self-Determination Act for the establishment of Indian child protection and family violence prevention programs on Indian reservations.

(c) An Indian child protective services program, established under this section shall be responsible for the investigation of reported cases of child abuse and neglect.

(d) An Indian family violence prevention and treatment program established under this section shall be responsible for the treatment and prevention of incidents of family violence and for the provision of immediate shelter and related assistance for victims of family violence and their dependents.

(e) Funds provided under subsection (i) may be used for—

(1) the establishment of a child protective services program which shall include—

(A) the employment of child protective services staff to investigate cases of child abuse and neglect;

(B) training programs for child protective services personnel, law enforcement personnel, and judicial personnel in the investigation, prevention, and treatment of cases of child abuse and neglect; and

(C) purchase of equipment to assist in the investigation of cases of child abuse and neglect;

(2) the establishment of a family violence prevention and treatment program which shall include—

(A) the employment of family violence prevention and treatment staff to respond to incidents of family violence;

(B) the provision of immediate shelter and related assistance for victims of family violence and their dependents;

(C) training programs for family violence prevention and treatment personnel, law enforcement personnel, and judicial personnel in the investigation, prevention, and treatment of cases of family violence; and

(D) construction or renovation of facilities for the establishment of family violence shelters;

(3) the development and implementation of a multidisciplinary child abuse investigation and prosecution program which shall—

(A) coordinate child abuse investigation, prosecution, treatment, and counseling services;

(B) develop protocols among related agencies to ensure that investigations of child abuse cases, to the extent practical, minimize the trauma to the child victim;

(C) provide for the coordination and cooperation of law enforcement, courts of competent jurisdiction, and tribal, Federal, and State agencies through intergovernmental or interagency agreements that define and specify each party's responsibilities;

(4) the development of tribal child protection codes and regulations;

(5) the establishment of training programs for—

(A) professional and paraprofessional personnel in the fields of medicine, law, education, social work, and other relevant fields who are engaged in, or intend to work in, the field of prevention, identification, investigation, and treatment of Indian family violence or child abuse and neglect;

(B) instruction in methods of protecting children from child abuse and neglect of children and to persons responsible for the welfare of Indian children, including parents of and persons who work with Indian children; or

(C) educational, identification, prevention, and treatment services for child abuse and neglect in cooperation with preschool, elementary or secondary schools, or tribally controlled community colleges (within the meaning of section 2 of the Tribally Controlled Community Act of 1978 (25 U.S.C. 1801));

(6) other community education efforts for tribal members (including school children) regarding issues of family violence and child abuse and neglect; and

(7) such other innovative and culturally relevant programs and projects as the Secretary may approve, including programs and projects for—

(A) parental self-help;

(B) prevention and treatment of alcohol and drug-related family violence and child abuse and neglect, or

(C) home health visitor programs,

that show promise of successfully preventing and treating cases of family violence and child abuse and neglect.

(f)(1) The Secretary, with the participation of Indian tribes, shall establish, and promulgate by regulations, a formula which establishes base support funding for Indian child and family violence prevention programs.

(2) In the development of regulations for base support funding for Indian child protection and family violence prevention programs, the Secretary shall develop, in consultation with Indian tribes, appropriate caseload standards and staffing requirements for child protective services and family violence prevention and treatment programs which are comparable to standards developed by the National Association of Social Work, the Child Welfare League of America and other professional associations in the field of social work and child welfare. Each level of funding assistance shall correspond to the staffing requirements established by the Secretary pursuant to this section.

(3) Factors to be considered in the development of the base support funding formula shall include, but are not limited to—

(A) projected service population of the program;

(B) projected service area of the program;

(C) projected number of cases per month;

(D) special circumstances warranting additional program resources, such as high incidence of child sexual abuse, high incidence of violent crimes against women, or the existence of a significant victim population within the community.

(4) The formula established pursuant to this subsection shall provide funding necessary to support—

(A) one child protective child protective services or family violence caseworker, including fringe benefits and support costs, for each tribe;

(B) an additional child protective services or family violence caseworker, including fringe benefits and support costs, for each level of assistance for which an Indian tribe qualifies.

(5) In any fiscal year that appropriations are not sufficient to fully fund Indian protective child protective services and family violence prevention and treatment programs at each level of assistance under the formula required to be established in this section, available funds for each level of assistance shall be evenly divided among the tribes qualifying for that level of assistance.

(g) Services provided under contracts made under this section shall supplement, not supplant, services from any other funds available for the same general purposes, including, but not limited to—

(1) treatment, including but not limited to—

(A) individual counseling;

(B) group counseling; or

(C) family counseling;

(2) social services and case management;

(3) training available to Indian tribes, tribal agencies, and Indian organizations regarding the identification, investigation, prevention, and treatment of family violence and child abuse and neglect;

(4) law enforcement services including investigations and prosecutions.

(h) Each recipient of funds awarded pursuant to subsection (a) shall—

(1) furnish the Secretary of the Interior with such information as the Secretary may require to—

(A) evaluate the program for which the award is made; and

(B) ensure that the funds are expended for the purposes for which the award was made; and

(2) submit to the Secretary at the end of each fiscal year an annual report which shall include such information as the Secretary may require.

(i) There are authorized to be appropriated to carry out the provisions of this section, $30,000,000 for each of the fiscal years 1991, 1992, 1993, 1994, and 1995.

SEC. 6. REPORT.

On or before March 1, 1991, and March 1 of each calendar year thereafter, the Secretary shall submit to the Congress a report involving the administration of this Act during the calendar year preceding the calender year in which such report is submitted.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1991

Mr. NUNN. I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 734, S. 2834, the Intelligence authorization bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2834) to authorize appropriations for fiscal 1991 for the intelligence activities of the United States Government, the intelligence community staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes which had been reported from the Committee on Armed Services with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 2834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intelligence Authorization Act for Fiscal Year 1991".

TITLE I—INTELLIGENCE ACTIVITIES

SEC. 101. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for fiscal year 1991 the amounts referred to in section 102 for the conduct of the intelligence activities of the following elements of the United States Government:

(1) the Central Intelligence Agency;

(2) the Department of Defense;

(3) the Defense Intelligence Agency;

(4) the National Security Agency;

(5) the Department of the Army, the Department of the Navy, and the Department of the Air Force;

(6) the Department of State;

(7) the Department of the Treasury;

(8) the Department of Energy; and

(9) the Federal Bureau of Investigation.

SEC. 102. CLASSIFIED SCHEDULE OF AUTHORIZATIONS.

(a) The amounts authorized to be appropriated by section 101, and the authorized personnel ceilings as of September 30, 1991, for the conduct of the intelligence activities of the elements listed in such section, are those specified in the classified Schedule of Authorizations to accompany ( ) of the One Hundredth First Congress. Such Schedule of Authorizations shall be considered to be a part of this Act, and any limitation, requirement, or condition contained in such Schedule pertaining to the amount specified for any project, program, or activity shall be considered to be a part of this Act.

(b) Such Schedule of Authorizations shall be made available to the Committee on Appropriations of the Senate, the Committee on Appropriations of the House of Representatives, and the President. The President shall provide for suitable distribution of the Schedule, or of appropriate portions of the Schedule, within the executive branch of the Government.

SEC. 103. PERSONNEL CEILING ADJUSTMENTS.

The Director of Central Intelligence may authorize employment of civilian personnel in excess of the numbers authorized for fiscal year 1991 under sections 102 and 202 of this Act if he determines that such action is necessary to the performance of important intelligence functions, except that such number may not, for any element of the Intelligence Community, exceed 2 percent of the number of civilian personnel authorized under such sections for such element. The Director of Central Intelligence shall promptly notify the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate whenever he exercises the authority granted by this section.

TITLE II—INTELLIGENCE COMMUNITY STAFF

SEC. 201. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the Intelligence Community Staff for fiscal year 1991 $28,900,000, of which amount $6,580,000 shall be available for the Security Evaluation Office of the Central Intelligence Agency.

SEC. 202. AUTHORIZATION OF PERSONNEL END-STRENGTH.

(a) AUTHORIZED PERSONNEL LEVEL.—The Intelligence Community Staff is authorized 240 full-time personnel as of September 30, 1991, including 50 full-time personnel who are authorized to serve in the Security Evaluation Office of the Central Intelligence Agency. Such personnel of the Intelligence Community Staff may be permanent employees of the Intelligence Community Staff or personnel detailed from other elements of the United States Government.

(b) REPRESENTATION OF INTELLIGENCE ELEMENTS.—During fiscal year 1991, personnel of the Intelligence Community Staff shall be selected so as to provide appropriate representation from elements of the United States Government engaged in intelligence activities.

(c) REIMBURSEMENT.—During fiscal year 1991, any officer or employee of the United States or a member of the Armed Forces who is detailed to the Intelligence Community Staff from another element of the United States Government shall be detailed on a reimbursable basis, except that any such officer, employee, or member may be detailed on a nonreimbursable basis for a period of less than one year for the performance of temporary functions as required by the Director of Central Intelligence.

SEC. 203. INTELLIGENCE COMMUNITY STAFF ADMINISTERED IN SAME MANNER AS CENTRAL INTELLIGENCE AGENCY.

During fiscal year 1991, activities and personnel of the Intelligence Community Staff shall be subject to the provisions of the National Security Act of 1947 (50 U.S.C. 401 et seq.) and the Central Intelligence Agency Act of 1949 (50 U.S.C. 403a et seq.) in the same manner as activities and personnel of the Central Intelligence Agency.

TITLE III—CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 301. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the Central Intelligence Agency Retirement and Disability Fund for fiscal year 1991 $164,600,000.

TITLE IV—CENTRAL INTELLIGENCE AGENCY ADMINISTRATIVE PROVISIONS

SEC 401. ELIMINATION OF 15-YEAR CAREER REVIEW FOR CIARDS AND FERS SPECIAL CATEGORY PARTICIPANTS.

Section 203 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended—

(1) by striking out the last sentence thereof; and

(2) by adding at the end thereof the following new sentences: "Any officer or employee who elects to accept designation as a participant entitled to the benefits of the system shall remain a participant of the system for the duration of his or her employment with the Agency. Such election shall be irrevocable except as, and to the extent, provided in section 301(d) of this Act and shall not be subject to review or approval by the Director.".

SEC. 402. QUALIFYING PERIOD FOR CIA FORMER SPOUSE.

Section 204(b)(4) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting before the period at the end thereof the following: "during the participant's service as an employee of the Central Intelligence Agency".

SEC. 403. SELECTION BETWEEN CIARDS ANNUITY AND OTHER SURVIVOR ANNUITIES.

Section 221(g) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new paragraph:

"(3) A surviving spouse who married a participant after his retirement shall be entitled to a survivor annuity payable from the fund under this title only upon electing this annuity instead of any other survivor benefit to which he or she may be entitled under this or any other retirement system for Government employees on the basis of a marriage to someone other than the participant.".

SEC. 404. SURVIVOR ANNUITIES UNDER CIARDS FOR SPOUSES OF REMARRIED, RETIRED PARTICIPANTS.

(a) CALCULATION OF REDUCTION IN ANNUITIES.—Section 221(n) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting "or elected under section 226(e)" after "(unless such reduction is adjusted under section 222(b)(5)".

(b) ELECTION OF REDUCTION IN ANNUITY.—Section 226 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(e) Upon a remarriage occurring on or after the date of enactment of this subsection to a spouse other than the spouse at the time of retirement, a retired participant

whose annuity was not reduced (or was not fully reduced) to provide a survivor annuity for the participant's spouse or former spouse as of the time of retirement may irrevocably elect, by means of a signed writing received by the Director within one year after such remarriage, a reduction in the retired participant's annuity for the purpose of providing an annuity for such retired participant's spouse in the event such spouse survives the retired participant. The reduction shall be effective the first day of the month which begins nine months after the date or remarriage. For any remarriage that occurred before the date of enactment of this subsection, the retired participant may make such an election within two years after such date. To the greatest extent practicable, the retired participant shall pay a deposit under the same terms and conditions as those prescribed for retired employees under the Civil Service Retirement and Disability System under section 8339(j)(5)(C)(ii) of title 5, United States Code. A survivor annuity elected under this subsection shall be treated in all respects as a survivor annuity under section 221(b).".

(c) CONFORMING AMENDMENT.—Section 226(d) of such Act is amended by striking out "This" and inserting in lieu thereof "Subsections (a) through (c) of this".

SEC. 405. RESTORATION OF CERTAIN FORMER SPOUSE BENEFITS AFTER DISSOLUTION OF REMARRIAGE.

(a) Section 224(b)(1) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting before the semicolon ", except that, if such survivor annuity is terminated because of remarriage, such annuity shall be restored at the same rate commencing on the date such remarriage is dissolved by death, annulment, or divorce".

(b) Section 225(b)(1) of the Central Intelligence Agency Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting before the semicolon ", except that the entitlement of a former spouse to benefits under this section shall be restored at the same rate commencing on the date such remarriage is dissolved by death, annulment, or divorce".

(c) Section 16(c) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403p(c)) is amended by adding at the end thereof the following new paragraph:

"(3) A former spouse who is not eligible to enroll in a health benefit plan under this section because of remarriage before the age of 55 shall be restored to such eligibility on the date such remarriage is dissolved by death, annulment, or divorce.".

(d) The amendment made by this section shall take effect on October 1, 1990, and no benefit shall be payable before such effective date.

(e) Any new spending authority (within the meaning of section 401(c) of the Congressional Budget Act of 1974) provided pursuant to the amendments made by this section shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

SEC. 406. CONFORMING CIARDS TO THE CIVIL SERVICE RETIREMENT SYSTEM.

Section 292 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding section 4(h) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615), Executive Order No. 12684 of July 27, 1989 (insofar as it conforms the Central Intelligence Agency Disability and Retirement System to the Civil Service Retirement System by lowering the remarriage age regarding the termination of surviving spouses' annuities from 60 to 55) shall be given effect as of its date of issuance.".

SEC. 407. TREATMENT OF CERTAIN ALIEN EMPLOYEES IN HONG KONG.

(a) AUTHORITY.—In applying the proviso of section 7 of the Central Intelligence Agency Act of 1949, in the case of an alien described in subsection (b), the Director may charge the entry of the alien against the numerical limitation for any fiscal year (beginning with fiscal year 1991 and ending with fiscal year 1996) notwithstanding that the alien's entry is not made to the United States in that fiscal year so long as such entry is made before the end of fiscal year 1997.

(b) ELIGIBLE ALIENS.—An alien eligible under subsection (a) is an alien who—

(1) is an employee of the Foreign Broadcast Information Service in Hong Kong; or

(2) is the spouse or child of an alien described in paragraph (1) if accompanying or following to join the alien in coming to the United States.

TITLE V—DEPARTMENT OF DEFENSE FOREIGN INTELLIGENCE ENHANCEMENTS

SEC. 501. DEPARTMENT OF DEFENSE COVER SUPPORT AUTHORITY.

(a) IN GENERAL.—Chapter 21 of title 10, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 22—SECURITY SUPPORT FOR DEPARTMENT OF DEFENSE INTELLIGENCE ACTIVITIES

"§ 431. Authority for certain commercial activity

"The Secretary of Defense, consistent with this chapter, may carry out certain commercial activities as may be necessary for the purpose of providing security for the conduct of intelligence collection activities undertaken by the Department of Defense. Such activities shall be carried out only with the approval of the Director of Central Intelligence and, to the extent such activities take place within the United States, shall also be coordinated with and, where appropriate, be supported by, the Director of the Federal Bureau of Investigation.

"§ 432. Use and disposition of funds

"Proceeds generated by a commercial activity carried out under this chapter may be used to offset necessary and reasonable expenses arising from that activity and shall be kept to the minimum necessary to operate such activity in a secure manner. Any proceeds in excess of those required for this purpose shall be deposited, as often as may be practicable, into the Treasury of the United States as miscellaneous receipts. The disposition of such proceeds shall be audited at least annually by the organization assigned auditing responsibility by the head of the military department or defense agency for the commercial activity concerned.

"§ 433. Relationship with other Federal laws

"(a) Except as provided by subsection (b), commercial activities conducted pursuant to this chapter shall be carried out in accordance with applicable Federal law.

"(b) Whenever the Secretary of Defense, an official of no lower rank than an Assistant Secretary of Defense who is designated by the Secretary for this purpose, or the head of a military department certifies that, in connection with the establishment or operation of a commercial activity pursuant to this chapter, compliance with Federal laws or regulations pertaining to the management and administration of Federal agencies would create an unacceptable risk of compromise of authorized intelligence collection activities, he may authorize the establishment and operation of such activities, notwithstanding such laws or regulations, to the extent necessary to prevent the disclosure of the commercial activity concerned as an instrumentality of the United States Government, except that such certification and authorization shall be in writing and shall specify the Federal laws or regulations for which compliance by the commercial activity concerned is not required consistent with this section.

"(c) As used in this section, the phrase 'Federal laws and regulations pertaining to the management and administration of Federal agencies' [includes—] *means only the following—*

"(A) Federal laws and regulations pertaining to the receipt and use of appropriated and nonappropriated funds;

"(B) the acquisition or management of property or services;

"(C) information disclosure, retention, and management;

"(D) the employment of personnel;

"(E) payments for travel and housing;

"(F) the establishment of legal entities or government instrumentalities; and

"(G) foreign trade or financial transaction restrictions that would reveal the commercial activity as an activity of the United States Government.

"§ 434. Reservation of defenses and immunities

"Commercial activity undertaken pursuant to this chapter, including the submission to judicial proceedings of any State, shall not constitute a waiver of the defenses and immunities of the United States.

"§ 435. Restrictions

"(a) No corporation, partnership, or other legal entity may be established to carry out commercial activities pursuant to this chapter except with the approval of the Secretary of Defense or the Deputy Secretary of Defense. Such approval may not be delegated.

"(b) Nothing in this chapter authorizes the conduct of any intelligence activity which is not otherwise authorized by law or Executive order.

"(c) Personnel conducting commercial activity authorized by this chapter may only engage in those activities in the United States necessary to support intelligence activities abroad.

"(d) A citizen of the United States or an alien admitted to permanent residence in the United States may not be employed by, or assigned or detailed to perform operational, managerial, or supervisory duties for, an entity engaged in commercial activity authorized by this chapter unless that person has been informed of the purpose of such activity.

"§ 436. Regulations, oversight, and legal review

"The Secretary of Defense shall issue regulations to implement the authority contained in this chapter within 180 days of its date of enactment. Copies of such regulations shall be provided to the *Committees on Armed Services of the Senate and House of Representatives and the* Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives prior to their issuance. Such regulations shall be consistent with this chapter and shall, at a minimum—

"(1) specify all officials authorized to approve commercial activities pursuant to this chapter and, where a determination is required pursuant to section 433(b) only the officials specified by such section may approve the establishment or operation of the commercial activity concerned;

"(2) designate a single office within the Defense Intelligence Agency to implement, and maintain accountability for, all activities authorized pursuant to this chapter;

"(3) require prior legal review of all commercial activities authorized pursuant to this chapter; and

"(4) provide for appropriate internal audit controls and oversight for such activities.

"§ 437. Reports to Congress

"(a)(1) The Secretary of Defense shall ensure that the *Committees on Armed Services of the Senate and House of Representatives and the* Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives (hereafter in this chapter referred to as 'the intelligence committees') are kept fully and currently informed of actions taken pursuant to this chapter, including any significant anticipated activity to be authorized pursuant to this chapter.

"(2) For purposes of paragraph (1), the Secretary of Defense shall provide [the intelligence] *all such* committees with prior notice of the establishment of any corporation, partnership, or other legal entity.

"(b) Not later than November 1 of each year, the Secretary of Defense shall submit to [the intelligence committees] *the committees described in subsection (a)* a report on all commercial activity undertaken pursuant to this chapter during the previous fiscal year. Such report shall include a description of any exercise of the authority provided by section 433(b) to the Secretary of Defense, or other authorized officials, as well as a description of any expenditure of appropriated or nonappropriated funds made pursuant to this chapter.

"§ 438. Definitions

"As used in this chapter—

"(1) the term 'commercial activities' means activities conducted in a manner consistent with prevailing commercial practice and includes—

"(A) the acquisition, use, sale, storage, and disposal of goods and services;

"(B) entering into employment contracts, leases, and other agreements for real and personal property;

"(C) depositing funds into and withdrawing funds from domestic and foreign commercial businesses or financial institutions; and

"(D) acquiring licenses, registrations, permits, and insurance; and

"(2) the term 'intelligence activities' means the collection of foreign intelligence and counterintelligence information.".

(b) CLERICAL AMENDMENTS.—The tables of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part I of subtitle A of such title, are each amended by inserting after the item relating to chapter 21 the following new item:

"22. Security Support for Department of Defense Intelligence Activities 431.".

SEC. 502. POST-EMPLOYMENT ASSISTANCE FOR CERTAIN NSA EMPLOYEES.

The National Security Agency Act of 1959 (50 U.S.C. 402 note) is amended by adding at the end thereof the following new section:

"SEC. 17. (a) Notwithstanding any other law, the Director of the National Security Agency may use appropriated funds to assist employees who have been in sensitive positions who are found to be ineligible for continued access to Sensitive Compartmented Information and employment with the Agency, or whose employment has been terminated—

"(1) in finding and qualifying for subsequent employment,

"(2) in receiving treatment of medical or psychological disabilities, and

"(3) in providing necessary financial support during periods of unemployment,

if the Director determines that such assistance is essential to maintain the judgment and emotional stability of such employee and avoid circumstances that might lead to the unlawful disclosure of classified information to which such employee had had access. Assistance provided under this section for an employee shall not be provided any longer than five years after the termination of the employment of the employee.

"(b) The Director of the National Security Agency shall report annually to the Appropriations Committees of the Senate and House of Representatives, the Select Committee on Intelligence of the Senate, and the Permanent Select Committee on Intelligence of the House of Representatives with respect to any expenditure made pursuant to this section.".

SEC. 503. REIMBURSEMENT RATE FOR CERTAIN AIRLIFT SERVICES.

(a) AUTHORITY.—The Secretary of Defense is authorized to grant the use of the Department of Defense reimbursement rate for military airlift services provided by the Department of Defense to the Central Intelligence Agency, if the Secretary of Defense determines that those military airlift services are provided for activities related to national security objectives.

(b) DEFINITION.—For purposes of subsection (a), the term "Department of Defense reimbursement rate" means the rate of reimbursement charged by the Department of Defense to the military departments.

TITLE VI—DEPARTMENT OF ENERGY PERSONNEL AUTHORITY

SEC. 601. EXCEPTED POSITIONS FROM THE COMPETITIVE SERVICE.

Section 621 of the Department of Energy Organization Act (42 U.S.C. 7231) is amended by adding at the end thereof the following new subsection:

"(f) All positions in the Department which the Secretary determines are devoted to intelligence or intelligence-related activities of the United States Government are excepted from the competitive service, and the individuals who occupy such positions as of the date of enactment of this Act shall, while employed in such positions, be exempt from the competitive service.

TITLE VII—OVERSIGHT OF INTELLIGENCE ACTIVITIES

SEC. 701. REPEAL.

Section 662 of the Foreign Assistance Act of 1961 (22 U.S.C. 2422) is hereby repealed.

SEC. 702. CONGRESSIONAL OVERSIGHT.

(a) IN GENERAL.—Section 501 of the National Security Act of 1947 (50 U.S.C. 413) is amended to read as follows:

"CONGRESSIONAL OVERSIGHT

"SEC. 501. (a) The President shall ensure that the Select Committee on Intelligence of the Senate and the Permanent Select Committee of the House of Representatives (hereafter in this title referred to as the 'intelligence committees') are kept fully and currently informed of the intelligence activities of the United States, including any significant anticipated intelligence activities, as required by this title, except that—

"(1) nothing contained in this title shall be construed as requiring the approval of the intelligence committees as a condition precedent to the initiation of such activities; and

"(2) nothing contained in this title shall be construed as a limitation on the power of the President to initiate such activities in a manner consistent with his powers conferred by the Constitution.

"(b) The President shall ensure that any illegal intelligence activity is reported to the intelligence committees, as well as any corrective action that has been taken or is planned in connection with such illegal activity.

"(c) The President and the intelligence committees shall each establish procedures as may be necessary to carry out the provisions of this title.

"(d) The House of Representatives and the Senate, in consultation with the Director of Central Intelligence, shall each establish, by rule or resolution of such House, procedures to protect from unauthorized disclosure all classified information and all information relating to intelligence sources and methods furnished to the intelligence committees or to Members of Congress under this title. In accordance with such procedures, each of the intelligence committees shall promptly call to the attention of its respective House, or to any appropriate committee or committees of its respective House, any matter relating to intelligence activities requiring the attention of such House or such committee or committees.

"(e) As used in this section, the term 'intelligence activities' includes 'covert actions', as defined in subsection 503(e).".

(b) INFORMATION REQUIRED TO BE DISCLOSED; FINDINGS.—The National Security Act of 1947 is amended—

(1) by redesignating sections 502 and 503 as sections 504 and 505, respectively; and

(2) by inserting after section 501 the following:

"REPORTING INTELLIGENCE ACTIVITIES OTHER THAN COVERT ACTIONS

"SEC. 502. To the extent consistent with due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters, the Director of Central Intelligence and the heads of all departments, agencies, and other entities of the United States Government involved in intelligence activities shall—

"(1) keep the intelligence committees fully and currently informed of all intelligence activities, other than covert actions, as defined in subsection 503(e), which are the responsibility of, are engaged in by, or are carried out for or on behalf of, any department, agency, or entity of the United States Government, including any significant anticipated intelligence activity and significant failures; and

"(2) furnish the intelligence committees any information or material concerning intelligence activities other than covert actions which is within their custody or control and which is requested by either of the intelligence committees in order to carry out its authorized responsibilities.

"PRESIDENTIAL APPROVAL AND REPORTING COVERT ACTIONS

"SEC. 503. (a) The President may authorize the conduct of covert actions by depart-

ments, agencies, or entities of the United States Government only when he determines that such activities are necessary to support the foreign policy objectives of the United States and are important to the national security of the United States, which determination shall be set forth in a finding that shall meet each of the following conditions:

"(1) Each finding shall be in writing, unless immediate action by the United States is required and time does not permit the preparation of a written finding, in which case a written record of the President's decision shall be contemporaneously made and shall be reduced to a written finding as soon as possible but in no event more than 48 hours after the decision is made.

"(2) A finding may not authorize or sanction covert actions, or any aspect of such activities, which have already occurred.

"(3) Each finding shall specify each and every department, agency, or entity of the United States Government authorized to fund or otherwise participate in any significant way in such activities, except that any employee, contractor, or contract agent of a department, agency, or entity of the United States Government (other than the Central Intelligence Agency) directed to participate in any way in a covert action shall be subject to the policies and regulations of the Central Intelligence Agency, or to written policies or regulations adopted by such department, agency, or entity, governing such participation.

"(4) Each finding shall specify whether it is contemplated that any third party which is not an element, contractor, or contract agent of the United States Government, or is not otherwise subject to United States Government policies or regulations, will be used to fund or otherwise participate in any significant way in the covert action concerned or be used to undertake the covert action concerned on behalf of the United States.

"(5) A finding may not authorize any action intended to influence United States political processes, public opinion, policies, or media.

"(6) A finding may not authorize any action which violates the Constitution of the United States or any statutes of the United States.

"(b) To the extent consistent with due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods, or other exceptionally sensitive matters, the Director of Central Intelligence and the heads of all departments, agencies, and other entities of the United States Government involved in a covert action shall—

"(1) keep the intelligence committees fully and currently informed of all covert actions which are the responsibility of, are engaged in by, or are carried out for or on behalf of, any department, agency, or entity of the United States Government, including significant failures; and

"(2) furnish to the intelligence community any information or material concerning covert actions which is in the possession, custody, or control of any department, agency, or entity of the United States Government and which is requested by either of the intelligence committees in order to carry out its authorized responsibilities.

"(c)(1) Except as provided by paragraphs (2) and (3), the President shall ensure that any finding approved, or determination made, pursuant to subsection (a) shall be reported to the intelligence committees before the initiation of the activities authorized.

"(2) On rare occasions, the President may direct that covert actions be initiated before reporting such actions to the intelligence committees. On such occasions, the President shall fully inform the intelligence committees in a timely fashion and shall provide a statement of the reasons for not giving prior notice.

"(3) If the President determines it is essential to meet extraordinary circumstances affecting vital interests of the United States, the President may limit the reporting of findings or determinations pursuant to paragraphs (1) and (2) to the chairmen and ranking minority members of the intelligence committees, the Speaker and Minority Leader of the House of Representatives, and the Majority and Minority leaders of the Senate. In any such case, the President shall provide a statement of the reasons for limiting access to such findings or determinations in accordance with this subsection.

"(4) In each case reported pursuant to paragraph (1), (2), or (3), a copy of the finding, signed by the President, shall be provided to the chairman of each intelligence committee.

"(d) The President shall ensure that the intelligence committees or, if applicable, the Members of Congress specified in subsection (c)(3) are notified of any significant change in a previously approved covert action, or any significant undertaking pursuant to a previously approved finding, in the same manner as findings are reported pursuant to subsection (c).

"(e) As used in this section, the term 'covert action' means an activity or activities conducted by an element of the United States Government to influence political, economic, or military conditions abroad so that the role of the United States Government is not intended to be apparent or acknowledged publicly, but does not include—

"(1) activities the primary purpose of which is to acquire intelligence, traditional counterintelligence activities, traditional activities to improve or maintain the operational security of the United States Government programs, or administrative activities;

"(2) traditional diplomatic or military activities or routine support to such activities;

"(3) traditional law enforcement activities conducted by United States Government law enforcement agencies or routine support to such activities; or

"(4) activities to provide routine support to the overt activities (other than activities described in paragraph (1), (2), or (3)) of other United States Government agencies abroad.".

(c) AVAILABILITY OF FUNDS SUBJECT TO FINDINGS.—Section 504 of the National Security Act of 1947, as amended by subsection (b)(2), is further amended—

(1) by striking out "501" in subsection (a)(2) and inserting in lieu thereof "503"; and

(2) by adding at the end thereof the following new subsection:

"(d) No funds appropriated for, or otherwise available to, any department, agency, or entity of the United States Government, may be obligated or expended, or may be directed to be obligated or expended, for any covert action, as defined in section 503(e), unless and until a Presidential finding required by section 503(a), has been signed or otherwise issued in accordance with that section.".

TITLE VIII—GENERAL PROVISIONS

SEC. 801. AUTHORIZATION OF APPROPRIATIONS FOR INCREASES IN EMPLOYEE COMPENSATION AND BENEFITS AUTHORIZED BY LAW.

There are authorized to be appropriated for fiscal year 1991 such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, and other benefits for Federal employees which are authorized by law.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. COHEN. Mr. President, first let me thank my good friend and colleague from Oklahoma and note how pleased and proud I am to have served with him. Senator BOREN makes every effort to forge a well-considered, bipartisan approach to the committee's work of overseeing the U.S. intelligence community and thereby does the country a great service.

This is the first in what augurs to be a number of difficult years for the U.S. defense and intelligence communities. As Senator BOREN has noted, we are recommending serious reductions to national and tactical intelligence programs.

We have done this with reservations, acknowledging the new budgetary reality, and with the conviction that intelligence becomes more important—not less—as military personnel strength and budgets decline and as our forces are withdrawn from foreign shores. In a time of defense cutbacks, knowing the capabilities and intentions of your potential adversaries becomes all the more important. Although we want to do our part, we continue to believe that intelligence should not take a so-called fair share of defense cuts, a view I know is supported by the chairman and ranking member of the Armed Services Committee. This is especially important as we spend less for weapons systems in order to make the most efficient use of our remaining defense dollars.

These budget pressures come at a time when one could easily argue that we need more, not less, intelligence. True, the Soviet Union has taken great strides in permitting freedom in Eastern Europe and advancing the cause of arms control. But the Soviet political and economic system—with or without Mikhail Gorbachev—is in crisis, and its future is highly uncertain. The collapse of Soviet domination of Eastern Europe has revealed faltering economies and fragile social structures and unleashed long-repressed ethnic tensions.

Beyond our traditional preoccupation with the Soviet Union and Europe, new threats are emerging, Counternarcotics, counterterrorism, chemical weapons, economic competitiveness, and the prospect of low-in-

tensity conflict have created new challenges for U.S. intelligence. Nuclear weapons are no longer limited to the super powers, and the proliferation of ballistic missiles represents an ever-increasing threat to stability throughout the world.

We also cannot ignore our traditional friends and the espionage threat they may represent in the ever more competitive world economy. There is growing evidence that longtime allies are as voracious in seeking to steal our technological secrets as our traditional adversaries. And we must continue to guard against the individual who is willing to sell out his country. It is critical that we sustain a commitment of resources and reorient our counterintelligence and security programs to meet the emerging challenges.

Given the undeniable, though unpalatable, combination of budget reductions and proliferating threats, we will have to achieve greater efficiences within the intelligence community. In this context, I would like to briefly address the issue of Department of Defense intelligence. Overall, the Department of Defense is the country's largest spender, collector, producer, and consumer of intelligence. Over 85 percent of U.S. investment in intelligence is spent by defense, and it is replete with intelligence agencies and entities, as Senator BOREN has noted.

Throughout the years, numerous individuals and reports have suggested that the proliferation of these agencies is as much tied to protecting rice bowls as it is to servicing a real need. Admiral Crowe, former JCS Chairman, is the latest to lament the state of DOD intelligence, citing significant duplication of effort, insufficient integration and sharing of information, and gaps in intelligence coverage and support.

The presence of as many organizations has a negative effect on maintaining our overall intelligence posture, particularly as we enter tight budget years. We cannot afford necessary collection systems because the Department of Defense is unable and unwilling to centralize and consolidate its operations.

I understand the Pentagon is looking into DOD intelligence to address these problems, but there is every reason to believe that the parochial interests within DOD are so powerful that little will come of the study. This is why I have urged that the Senate Intelligence and Armed Services Committee hold joint hearings with an eye toward creating legislation to consolidate activities, draft a charter for the Defense Intelligence Agency, and, above all, increase joint, and thus less parochial and more independent, intelligence activities. While such a reorganization may not save money immediately, I am confident that it will provide huge dividends in the out years, both in terms of intelligence and weapons acquisition savings.

There is another issue on which I would like to touch briefly, the section of the intelligence authorization bill dealing with covert action reporting requirements. Senator BOREN has already summarized title VII, which deals with congressional oversight, but I think it important to explain why we have again included this provision in the authorization bill, as we did a year ago.

I think my colleagues ought to be aware that this title would establish important requirements governing the approval of covert actions by the President, as well as requirements for reporting covert actions to the Congress.

Most of these were contained in a bill which I introduced in 1987 in the wake of the Iran-Contra affair. Indeed, the bill was perhaps the most direct and comprehensive legislative response to that affair considered by the Congress. It passed the Senate in March 1988 by a vote of 71 to 19. A counterpart bill was reported in the House of Representatives but never reached the floor.

The principal feature of that bill, and the one that raised the greatest controversy, was an absolute requirement that the President report to the intelligence committees within 48 hours any covert action that he had approved. This would have replaced with a time certain, the vague requirement in existing law that where prior notice to the committee had been withheld, the President provide notice "in a timely fashion."

President Reagan contended, however, that there would likely be circumstances where notice could not be provided within 48 hours, and to impose such a requirement would put him in the position of having to violate the law if he chose to withhold such notice. He asserted, indeed, that his constitutional responsibilities may give him authority to withhold beyond a 48-hour period. His Justice Department, in fact, stated that the President has "unfettered discretion" to interpret "timely" as he sees fit, that it could be as long as a year, as in the case of Iran-Contra.

In any case, it was clear that the President would veto any bill with a strict 48-hour limit imposed. Moreover, it was clear that there was not a two-thirds majority in the House of Representatives willing to override such a veto.

Given these realities, Senator BOREN and I undertook a series of discussions last summer with the Bush administration concerning the reporting of covert actions to the Intelligence Committee. Our goal was to obtain, at at minimum, a commitment from the President with respect to how he intended to implement the existing statutory requirement to provide notice "in a timely fashion."

These negotiations culminated in a letter from President Bush to the committees on October 30, 1989, in which he stated:

> I intend to provide notice in a fashion sensitive to congressional concerns. The statute requires prior notice or, when prior notice is not given, timely notice. I anticipate that in almost all circumstances, prior notice will be possible. In those rare instances where prior notice is not provided, I anticipate that notice will be provided within a few days. Any withholding beyond this period would be based upon my assertion of the authorities granted this office by the Constitution.

I interpret this letter to mean that if the President withholds notice for more than a few days after a covert action is approved, he will assert as his reason for doing so his authorities under the Constitution. He will not rely upon the wording of the statutory requirement as authorizing such latitude.

And quite clearly, Mr. President, the Congress never intended the statutory requirement for notice "in a timely fashion" to mean anything other than a few days after a covert action had been approved.

As a result of the President's commitment last fall, the committee decided to drop its insistence on a strict 48-hour notice requirement, and in the oversight language in last year's authorization bill, it opted to retain the "timely notice" formulation in existing law. The same approach is taken in title VII of this year's bill. But the report language makes clear that Congress in enacting this language intends to authorize withholding of notice for no more than a few days.

Whether or not the Constitution may authorize the President to withhold for longer periods is a matter that we can debate, but it is also one that we cannot resolve.

I would have preferred that a time certain for notice of covert actions to committees be established by law. I think this would have been the best way to ensure that the Congress is able to fulfill its own constitutional responsibilities. But, failing this, I think we have, nonetheless, with this bill and report, significantly clarified the institutional position of the Congress and enhanced notification procedures.

There are two other legislative initiatives in this bill that deserve special attention. The first is the authority in section 501 for the Defense Department to provide better commercial cover for its intelligence collection operations abroad. The Intelligence Committee has considered proposals of this sort by the administration for the last 5 years or so, and we have finally decided to go ahead on a very tightly controlled basis.

The main point is to keep these kinds of operations from growing to

unmanageable dimensions. There is a very limited area where Defense Department intelligence components have made their case, and I expect the Intelligence and Armed Services Committees will keep a very close watch over the Department's use of this authority to make sure it does not go beyond those narrow bounds.

The second legislative provision with particular significance is the authority for the NSA Director under section 502 to assist former NSA employees whose financial difficulties might lead them to consider espionage. As the chairman has described, this is one of the 13 recommendations made by the Jacobs panel for improvements in U.S. counterintelligene capabilities.

This particular proposal responds specificially to the lessons of the Ronald Pelton espionage case. Pelton was an NSA employee with access to very sensitive information who, after leaving the Agency, got into financial difficulties and gave in to the temptation to sell out his country. While no single measure can be guaranteed to prevent espionage, the Jacobs panel correctly identified NSA's need to have the same authority as the CIA to assist former employees in circumstances of this sort, before their situation becomes so desperate.

In closing, while considering the importance of intelligence issues in this new environment, it might be worth citing the words of noted diplomat David Bruce as he evaluated the lessons of Pearl Harbor. "The attack on Pearl Harbor," Bruce said, "startled us like some gigantic dissonant firebell in the night of our false security. We felt betrayed and indeed we were. We were betrayed by the complete failure of our intelligence agencies. Any intelligence service worthy of the name should have foretold this event."

Bruce ascribed this failure to America's "island state" psychology. "Our comparative geographic isolation," he said, "led us, erroneously, to consider ourselves invulnerable to attempts against our sovereignty. Our immediate concern was with internal affairs; the alarums and excursions of foreign wars seemed to us infinitely remote and somewhat ridiculous."

Today's world is far smaller than it was at the time of Pearl Harbor. If we could not afford to be isolationist then, we certainly cannot afford to be now. Budget reductions are justified, and they will be made, but they must be made responsibly. They must be made in a way that will not force us to abandon our international responsibilities. And, as they are made, as the margin for error becomes smaller, a robust intelligence capability is all the more essential.

Mr. President, let me conclude my remarks with the simple recommendation to my colleagues that they support this legislation. It has received the broad bipartisan approval of the committee and merits the support of our colleagues.

Mr. BOREN. Mr. President, it is an honor for me to present to the Senate the intelligence authorization bill for fiscal year 1991. This is the 14th consecutive year, dating back to the creation of the Senate Select Committee on Intelligence in 1976, that the Senate has had the opportunity to consider an intelligence authorization bill.

Joining me in offering this bill is the distinguished Senator from Maine, the vice chairman of the Intelligence Committee. This is Senator COHEN's last year of service on the Intelligence Committee and I can think of no one who has made a greater contribution to the work of the committee. During his 8 years on the committee, he has become extremely knowledgeable on intelligence matters and his insights and judgments have enormously benefited all of us on the committee and have been of great benefit to our country. It has been a privilege for me to work with him to fashion what I believe are sensible bipartisan policies and programs in this critical area of national security. He will be missed.

In addition to Senator COHEN, I also specifically want to thank those members of the Intelligence Committee who also serve on the Armed Services Committee—Senator NUNN, the distinguished chairman of that committee, Senator WARNER, the ranking member, and Senator GLENN. Without the interests, contribution, and support of these crossover members, the Intelligence Committee's work would be undoubtedly much more difficult and much less successful.

I should also note that the work of the strategic forces and nulcear deterrence subcommittee of the Armed Services Committee makes an important contribution to the review of U.S. intelligence activities. As such, I thank Senator EXON and Senator THURMOND, the chairman and ranking member of that subcommittee, for their careful review and continuing support of our efforts.

Mr. President, because of the sensitivity of the matters dealt with in the intelligence authorization bill, I cannot discuss many of the details in open session. However, the committee's recommendations on these matters have been set forth in the classified supplement to the committee's report on S. 2834 which has been available to Members since July 20, under the provisions of Senate Resolution 400.

U.S. intelligence is clearly in a period of transition. The late 1970's and early 1980's saw dramatic growth in virtually every aspect of the intelligence budget, and we continue to see improvements in our capabilities as the systems and activities suported by past investment come on line. These improved capabilities were designed to meet the intelligence requirements of the 1980's and, as a result of this growth, I believe that U.S. intelligence is stronger today than it was 10 years ago. Obviously, it is important that these capabilities be maintained and we continue to try to strengthen them.

It is clear, however, that this will be difficult to accomplish in the current and expected future budget environment. Resources are ever more scarce and the Department of Defense cannot be as generous in allocating funds for those new or improved intelligence programs deemed necessary by intelligence program managers. Given this situation and understanding that the budgetary picture is probably going to get worse before it gets better, the committee adoped an approach different from previous years.

Rather than having individual program managers appear before the committee to defend their respective budgets, the committee first heard testimony from various officials relating to the dramatic changes rapidly taking place in the world order. Following this series of presentations, senior officials in the intelligence community described how U.S. intelligence was responding, or was planning to respond, to such developments, with emphasis on any programmatic and budgetary shifts that may be necessary or desirable. While the committee recognizes that such adjustments need to be made at a deliberate pace and continue over several years, this year's authorization bill does, in fact, reflect the beginning of a process to reorder priorities and objectives of U.S. intelligence activities.

For example, over the last 40 years U.S. intelligence has been properly consumed with developing, delivering and operating intelligence systems and activities aimed at countering the Soviet Union and its surrogates. In view of recent world events, it is clear that the underlying rationale for many of these programs is in serious need of review. This is not to say that requirements for intelligence on the Soviet Union that are behind us, only that they are likely to be very different in the future. There is a vast amount of openly available information on the Soviet Union are behind us, only that they are likely to be very different in the future. There is a vast amount of openly available information on the Soviet Union and Eastern Europe that should offset the need for old strategies and investments. On the other hand, it is also clear that U.S. intelligence will have to cope with a more daunting arms control monitoring regime than heretofore envisioned that will require new investments.

In addition, there are other intelligence requirements demanding atten-

tion in the future that have not received adequate resources given the intelligence community's longstanding preoccupation with the Soviet threat. These include intelligence support to low-intensity conflict, counterterrorism, and counternarcotics, as well as intelligence on political and economic developments. We also need to contend with the worldwide proliferation of sophisticated weaponry, to include nuclear, chemical, and biological weapons, and the long-range missile systems to deliver them.

Finally, the committee believes that human intelligence—which can provide information on the intentions of both adversaries and friends—must be improved and has consequently funded an initiative to augment this type of collection.

As a result of this process—in which we sought to begin the process of shifting resources, reordering priorities, and meeting future needs within the context of the recognized need to reduce Federal spending wherever possible—the committee achieved a significant net savings in the intelligence budget compared to the administration's request.

Apart from its budgetary review, the committee—jointly with the armed Services Committee—is recommending that a major review of Department of Defense intelligence priorities, resources, organizations, roles, and functions be undertaken. Every echelon from the Office of the Secretary of Defense, to the U&S commands, individual services, and below, has its own intelligence capability. Each organization requires separate buildings, administration, and security. This has raised concerns, not only of significant duplication of effort, but also of insufficient integration and sharing of information, uneven security measures and regulations, parochial service and commend interests prevailing over national intelligence interests, and gaps in intelligence support and coverage, despite the number of intelligence organizations.

Another problem, which transcends strictly Department of Defense intelligence, is that the tactical and national intelligence communities appear to be excessively isolated from one another, leaving each free to pursue self-sufficiency in their particular realms. Military commanders seek self-sufficiency through organic systems and organizations on the argument that national systems cannot be relied upon for support. The national community, likewise, emphasizes its peacetime missions and pays scant attention to the commander's needs.

Accordingly, our two committees have directed the Secretary of Defense and the Director of Central Intelligence to review all Department of Defense inteligence and intelligence-related activities with the objective of consolidating redundant functions, programs, and entities, and strengthening joint intelligence organizations and operations. Both committees intend to initiate staff studies and to hold joint hearings to monitor the progress of these efforts and, if necessary, to draft legislation to achieve these objectives.

Now, Mr. President, let me turn to the bill itself and summarize very briefly what is accomplished by this legislation.

Title I of the bill authorizes the funds for the intelligence activities of the U.S. Government, incorporating by reference the classified schedule of authorizations.

Title II authorizes appropriations for the intelligence community staff for fiscal year 1991 at $28,880,000, and authorizes 240 personnel for that organization.

Title III authorizes appropriations for the CIA retirement and disability system for fiscal year 1991 in the amount of $164,600,000.

Title IV of the bill contains a series of seven relatively minor administrative authorities affecting the Central Intelligence Agency. The first six are amendments to CIA retirement programs. The most significant of these is section 405 which corrects an inconsistency in the treatment of former CIA spouses whose benefits were terminated because of remarriage before the age of 55. Under existing law, former spouses divorced after November 15, 1982, could have their benefits restored upon dissolution of their subsequent marriage, but former spouses divorced before this date could not. Section 405 would permit both groups to have their benefits restored in such circumstances.

Section 407 of the bill addresses a particular problem that CIA has with employees of the Foreign Broadcast Information Service who serve as translators of public broadcasts in Hong Kong. Without a guarantee that they will be able to immigrate to the United States when Hong Kong reverts to control of the PRC in 1997, many of these employees had indicated they would not remain in their positions. In consultation with the immigration subcommittees in both Houses, we have worked out a provision permitting the DCI to use unallocated portions of his annual allocation to permit up to 100 aliens to enter the United States to take care of these employees.

Another legislative provision in section 501 of the bill would provide authority to the Defense Department to engage in commercial activities to provide security for intelligence collection activities undertaken abroad by elements of the Defense Department. This legislation has been proposed by this administration and by the previous administration, and it has been subject to thorough scrutiny and careful revision by both the Armed Services and Intelligence Committees.

The intelligence components of the Defense Department have traditionally had a legitimate, but limited, role in carrying out intelligence collection operations abroad under commercial cover. The Intelligence Committee is satisfied that this legislation is necessary for the security of those operations and that the safeguards in the bill will ensure that the authority is properly controlled.

One of the major concerns of the Intelligence Committee this year has been legislation to strengthen U.S. counterintelligence capabilities. We have had the benefit of the recommendations of a distinguished panel of prominent Americans, chaired by Eli Jacobs, which proposed 13 different legislative initiatives based upon their analysis of the most serious espionage cases of the past 20 years. The vice chairman and I have introduced a bill, S. 2726, to implement those recommendations, and we have held public hearings leading to a mark up of that bill.

The Intelligence Committee decided that one of the Jacobs panel's recommendations should be reported as part of the Intelligence Authorization Act. Section 502 of the bill would allow the Director of the National Security Agency to provide assistance to former NSA employees for up to 5 years after leaving NSA employment where such assistance is essential to avoid circumstances that might lead that former employee to consider unlawful disclosure of classified information.

As far as the remainder of the Jacobs panel recommendations are concerned, we look forward to bringing S. 2726 to the Senate after the Intelligence Committee and the other committees with jurisdiction complete their consideration of that bill.

This brings us to title VI of the bill which provides authority for the Secretary of Energy to designate certain intelligence and intelligence-related positions on his staff as exempt from the requirements of the competitive service in order that the Department is able to fill these slots more expeditiously with qualified personnel.

Last, Mr. President, but certainly not least, title VII of the bill contains the provisions relating to congressional oversight of intelligence activities that has passed the Senate on two previous occasions: Once in 1988, as part of S. 1721, which Senator COHEN introduced; and once in 1989, as part of the Senate's action on the fiscal year 1990 intelligence authorization bill.

The House Intelligence Committee did not accept these provisions in conference on last year's bill, wanting to make what it considered as further im-

provements to the bill. They did agree to consider it again on this year's bill.

I know Senator COHEN is planning to cover this subject in more detail in his statement, but let me just say to my colleagues that this remains an important piece of legislation, and, indeed, perhaps the most important legislation growing out of the Iran-Contra affair of three summers ago. It would correct many of the shortcomings noted by the congressional investigating committees and preserve for the future a legislative framework that is both workable and more predictable.

Among other things, the bill would require that—

All covert action findings must be in writing and may not authorize covert actions retroactively;

All Government agencies who participate in covert actions must be identified;

The findings must also state whether there are third parties not subject to U.S. Government control who are participating in the covert action concerned; and

Findings may not authorize covert actions which violate U.S. statutes or the Constitution, or for the purpose of influencing events in the United States.

The bill also incorporates a new definition of the term "covert action" which should help to eliminate the confusion as to what is, and what is not, a covert action.

These are important provisions, Mr. President, not only to the members of the Intelligence Committee, but to all of our colleagues in the Senate and to the American people, for whom, as we are deeply aware, we act in a surrogate role.

In conclusion, Mr. President, let me simply acknowledge the contributions of all of the members of the committee, as well as our very competent and dedicated staff, to the development of this legislation.

It was a cooperative, productive, and bipartisan effort of which the committee and the Senate, as a whole, can be proud. I urge the passage of the legislation that is now before us.

Mr. President, I now relinquish the floor so that my colleague, the distinguished vice chairman, can make his opening remarks.

Mr. President, I ask unanimous consent that the letter from the Congressional Budget Office on cost estimate for S. 2834 be printed in the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, August 1, 1990.

Hon. DAVID L. BOREN,
Chairman, Select Committee on Intelligence, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached cost estimate of S. 2834, the Intelligence Authorization Act for Fiscal Year 1991, as reported by the Senate Select Committee on Intelligence on July 10, 1990.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ROBERT D. REISCHAUER.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: S. 2834

2. Bill title: Intelligence Authorization Act for Fiscal Year 1991

3. Bill status: As reported by the Senate Select Committee on Intelligence on July 10, 1990.

4. Bill purpose: To authorize appropriations for fiscal year 1991 for the intelligence activities of the United States Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes.

5. Estimated cost to the Federal Government of titles II through VII of S. 2834:

[By fiscal year, in millions of dollars]

	1991	1992	1993	1994	1995
Direct spending:					
Estimated budget authority	(1)	(1)	(1)	(1)	(1)
Estimated outlays	(1)	(1)	(1)	(1)	(1)
Amount subject to appropriations:					
Estimated authorization level	195	2	3	4	6
Estimated outlays	20	9	4	3	5
Bill total:					
Estimated BA/auth	195	2	3	4	6
Estimated outlays	20	9	4	3	5
Net revenues	(1)	(1)	(1)	(1)	(1)

[1] Less than $500,000.

BASIS FOR ESTIMATE

The CBO was unable to obtain the necessary information to estimate the costs for Titles I and VIII of this bill because of the classified nature of the material. The estimated costs in the table above, therefore, reflect only the costs of Titles II through VII of the bill. The information about the budget functions in which some of these costs would fall also is classified. Therefore, a functional distribution of these costs has been excluded from this estimate.

DIRECT SPENDING

Title IV contains several provisions that would directly change federal spending by altering entitlements of federal government employees. Most of these provisions would alter the requirements governing benefits for survivors of CIA employees. Changes would: Require that former spouse status under the CIA Retirement and Disability System (CIARDS) be granted only to those with five years of marriage while their spouse was employed outside the U.S. with the CIA; allow a CIARDS retiree who had not elected benefits for a former spouse to elect a survivor benefit upon remarriage; lower the age at which a former spouse can remarry without losing survivor benefits to 55; restore benefits to former spouses who had remarried but whose remarriage had dissolved; and, permit receipt of only one survivor benefit to surviving spouses who remarry and then become eligible for a second survivor annuity. Most of these provisions would conform the CIARDS with other federal retirement systems (such as the Foreign Service Retirement and Disability System or the Civil Service Retirement System), and none of these provisions would apply to more than ten people. Costs or savings to the federal government from enactment of these provisions are not likely to exceed $50 thousand annually.

AMOUNTS SUBJECT TO APPROPRIATION

This estimate assumes that funds will be appropriated for the full amount of the authorization and that all resources will be available for obligation by October 1, 1990. Outlays are estimated based on historical outlay rates.

Titles II and III of the bill state fiscal year 1991 authorizations for appropriations for the Intelligence Community Staff of $28.9 million and for the required contribution to the Central Intelligence Agency Retirement and Disability Fund of $164.6 million.

Section 401 of Title IV would eliminate a required review of retirement options after 15 years of employment at the Central Intelligence Agency (CIA). Many employees of the CIA are eligible to retire under the Central Intelligence Agency Retirement and Disability System (CIARDS) or under the Federal Employee Retirement System (FERS) Special Category. The initial reason for this review was to allow a CIA employee to switch to a different federal retirement system if the benefits under CIARDS or FERS Special Category had not kept pace with other federal systems. Since CIARDS and FERS Special Category are relatively more generous retirement systems, no one elects a change in status at this 15 year review point. Abolishing this review would reduce the administrative burden of the CIA, though savings are not expected to exceed $100 thousand throughout the next five years.

Section 501 of Title V would provide the Department of Defense (DOD) the authority to engage in commercial activities for cover purposes. The cost of this section will depend on the Defense Secretary's use of the authority provided and will be partly offset by any funds generated through the commercial activity. No amounts are specifically authorized to be appropriated for these activities. CBO's estimate of the funds needed beyond those produced by these activities is based on a plan of the Defense Intelligence Agency for an execution of this cover system that would require additional amounts of approximately $1 million in the first year increasing to $5.7 million by 1995.

Section 502 would allow the Director of the National Security Agency to use appropriated funds to aid ex-employees who had been in sensitive positions. This assistance could take many forms, but cannot be provided for longer than five years after the termination of employment of the employee concerned. This estimate assumes that there will be fewer than 10 such cases in any fiscal year and that the National Security Agency will be able to provide this assistance within its existing resources.

Section 503 would clarify the rules governing reimbursements to the DOD for military transportation provided to the CIA. Specifically, this provision would allow the DOD to exempt the CIA from paying indirect labor costs associated with military airlifts. Enactment of this section would result in no net cost to the federal government.

REVENUES

Section 404 of Title IV would permit a CIARDS retiree who had not elected benefits for a former spouse to elect a survivor benefit upon marriage. Retirees electing this option must remit an additional employee's survivor benefit contribution within two years of his election. This provision would apply to fewer than ten people.

The revenue effects of this bill would be negligible in 1991-1995.

6. Estimated cost to State and local governments: None.

7. Estimate comparison: None.

8. Previous CBO cost estimate: None.

9. Estimate prepared by: Barbara Hollinshead (226-2840); Maureen Griffin (226-2859).

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

Mr. GLENN. Mr. President, I rise in support of the fiscal year 1991 Intelligence Authorization Act. I would like to acknowledge the fine leadership of my good friend from Oklahoma, DAVID BOREN, the chairman of the Senate Select Committee on Intellingence, for bringing the administration's budget request for intelligence through the legislative review process.

I would also like to pay tribute to the excellent work of BILL COHEN, our committee's vice chairman. This is Senator COHEN's last year on the committee, and his departure is a significant loss for us. Senator COHEN and I have worked closely on many issues over the years, particularly since we share other committee assignments—in addition to the Senate Select Committee on Intelligence, we both serve on the Governmental Affairs Committee, which I chair, the Select Committee on Aging, and the Senate Armed Services Committee. I have great respect and admiration for his intelligence, integrity, and dedication as a public servant. BILL COHEN's hard work and commitment to a vigorous but responsible intelligence capability will be sorely missed from the Intelligence Committee.

Mr. President, I would like to discuss several elements of the committee's unclassified report.

The report contains a provision I sponsored along with Senator WARNER which requires that the Defense Intelligence Agency [DIA] submit an unclassified report to the Congress by next May 1 dealing with the proliferation of weapons of mass destruction. I am hopeful that this report will prove sufficiently useful to become an annual publication. The unclassified report will provide a global assessment of the current state of nuclear, chemical, and biological weapon and delivery vehicle proliferation, and an estimate of proliferation-related developments expected to occur within the next 5 to 10 years.

I am convinced that one of the most ominous threats facing the United States is the proliferation of weapons of mass destruction in the Third World. I believe that coming to terms with this difficult problem will require greater public awareness of the threat—an awareness that demands easier and more timely access to relevant information.

Because of my concern with public awareness of this important issue, the Senate Governmental Affairs Committee, which I chair, has begun a monthy newsletter entitled "Proliferation Watch." This newsletter will provide updates on the progress and setbacks in international efforts to halt the spread of these weapons of mass destruction. I believe that an unclassified intelligence community document assessing the proliferation threat will make a significant contribution to awareness of a problem that is certain to be a growing source of concern to the public as well as the intelligence community and policymakers.

Mr. President, I would also like to express my strong support for language in our report calling for a reorganization of defense intelligence and a reassessment of DOD collection and analytical priorities. Such a reorganization of DOD intelligence should consolidate disparate or redundant functions and programs and strengthen joint intelligence organizations and operations. As a member of both the Senate Select Committee on Intelligence and the Senate Armed Services Committee, I intend to pursue this issue closely as both committees hold hearings and review legislative proposals on this matter.

Also, I would like to take this opportunity to comment about S. 2726, the "Counterintelligence Improvements Act of 1990" which is currently pending before the Senate Select Committee on Intelligence. While I have concerns with various provisions of this legislation, I would like to express my particular concern with section 12 "Authorizing Access to Subscriber Information of Persons With Unlisted Numbers Who are Called by Foreign Powers of Agents of Foreign Powers." This provision has serious implications for protections currently afforded citizens under the Privacy Act. The disposition of personal information collected by the Government is inextricably linked with proposals for creating new means of Government access to personal information. The integrity of our Nation's privacy laws becomes jeopardized if we allow for the creation of such provisions without assurance of adequate protection.

Specific concerns include the following: How long will the records be kept? Will a data base, electronic or otherwise, be created? Who has access to the information? Is it accessible to other agencies? Is it available to the public? What privacy protections apply?

Mr. President, this provision raises additional questions of overbreadth as changes in the policies of the Soviet Union and recent developments in Eastern Europe have resulted in increased communications, including telephone contacts, between Americans and foreign officials and citizens. While I certainly share the concern with the ongoing threat posed to U.S. security by hostile intelligence services and the importance of a vigorous yet responsible U.S. counterintelligence program, it is important to balance legitimate national security concerns with the need to provide adequate protection for individual privacy rights. If this provision is separated out of the bill and included as a floor amendment to our authorization bill, I hope that these issues will be adequately addressed in conference with the House.

In conclusion, I would like to express my concern with what I consider to be a growing perception that with the apparent end of the cold war, we no longer have a need for a robust intelligence capability. I ask unanimous consent to have printed in the RECORD an editorial I wrote on this subject which appeared in the Columbus Dispatch on July 3 of this year.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NATION NEEDS INTELLIGENCE MORE THAN EVER BEFORE

(By John Glenn)

Accurate and timely intelligence is the foundation of America's national security. Intelligence provides us with information to define the constantly changing threat to American interest; it helps us determine what defense systems we should be acquiring based on that evolving threat; and it provides decision-makers with the data and analyses necessary to form a responsible national security strategy.

Intelligence plays perhaps its most vital role when the decision is made to commit U.S. forces into combat. Our most sophisticated weaponry and our most trained military personnel are useless unless we know where, when and how to deploy these resources for optimal effect in conflict. Indeed, accurate and timely intelligence is our greatest force-multiplier.

Yet with the dissolution of the Soviet empire and the decline of the Soviet threat, some believe that it is now safe to decrease the intelligence budget. Nothing could be further from the truth. In fact, our need for reliable intelligence is at its greatest during such periods of enormous change and uncertainty. The United States relies heavily on intelligence to detect and monitor these changes in the international system so we can reallocate increasingly scarce resources in a more efficient manner.

Calls for reductions in our intelligence spending are particularly troubling because America's preoccupation with the Soviet Union over the last several decades has minimized other threats to our national security. Perhaps the most ominous of these threats is the proliferation of weapons of mass destruction in the Third World—ballistic missiles, and nuclear, chemical and biological weapons. Iraq's recent attempt to obtain trigger devices to aid its nuclear program, the controversy over Libya's chemical facility at Rabta and the growing threat of war between India and Pakistan (both of which have nuclear programs and delivery systems of great concern to the United States), underscore the gravity of this threat. The proliferation of weapons of mass destruction is certain to be a growing source of concern to policy-makers and the intelligence community.

Another concern is the change taking place in the international economic system. America's international power and prestige are reflected not only in its political and military strength, but its economic vitality as well. Increasingly, our great power status will be defined in economic rather than military terms. If we are to remain competitive in the international marketplace with Japan and the European Community, we must focus our intelligence capabilities on economic objectives such as foreign trade activities and science and technology developments. The adage that "knowledge is power" is particularly true in the economic realm.

In addition, we must focus more of our intelligence capabilities on other emerging national security threats such as drug smuggling, terrorism, environmental change, low-intensity conflict in the Third World and the illicit export of high-technology items.

Besides these emerging threats, the need for intelligence gathering to cover developments within the Soviet Union remains significant. After decades of having a comparatively static political and economic system, the Soviet Union is now confronting a highly uncertain period of profound political change, economic restructuring, a declining military establishment, ethnic and religious turmoil, and growing secessionist pressure.

Most significant among these many problems may be the chaotic Soviet economy. In fact, it is likely that the Soviets will devote more of their intelligence assets than ever before to obtaining our high-technology secrets—a relatively easy way for the Soviets to leapfrog their stagnant 19th century economy into the 21st century. Our counterintelligence capabilities must remain strong in order to combat Soviet espionage efforts against America's science and technology base.

The changing international environment has also heightened expectations for the conclusion of a sweeping array of arms control agreements this year that will provide an important measure of predictability and stability to the superpower relationship—but only if verification concerns are adequately addressed by intelligence collection and analyses.

These arms control agreements will be highly complex and therefore very difficult to monitor. Enormously expensive intelligence systems that are necessary to monitor Soviet compliance with these agreements constitute the hidden cost of arms control. If these essential intelligence systems are sacrificed to narrow budgetary considerations, our ability to adequately monitor these agreements will be placed at risk—endangering our nation's security as well as the public's support of the arms control process.

Few realize the magnitude of the decision to cancel important systems needed for arms control monitoring and other essential intelligence functions. For example, last year the administration decided to terminate the SR-71, a high altitude, high speed long-range aerial reconnassance platform that brought a unique and reliable capability to America's intelligence community for decades. Such shortsighted action is often a result of the fact that the vast majority of our nation's intelligence resources cannot be fully discussed in public, if at all.

Indeed, relatively few members of the administration and Congress are even aware of the existence of many of these intelligence systems and programs. As a result, our intelligence capabilities have virtually no public constitency. In the years ahead, America can successfully navigate the turbulent waters of a rapidly changing world only with accurate and timely intelligence. Any effort to reduce our intelligence capability, particularly during this era of enormous change, would be both unwise and irresponsible.

Mr. NUNN. I ask unanimous consent that the committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intelligence Authorization Act for Fiscal Year 1991".

TITLE I—INTELLIGENCE ACTIVITIES

SEC. 101. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for fiscal year 1991 the amounts referred to in section 102 for the conduct of the intelligence activities of the following elements of the United States Government:

(1) the Central Intelligence Agency;

(2) the Department of Defense;

(3) the Defense Intelligence Agency;

(4) the National Security Agency;

(5) the Department of the Army, the Department of the Navy, and the Department of the Air Force;

(6) the Department of State;

(7) the Department of the Treasury;

(8) the Department of Energy; and

(9) the Federal Bureau of Investigation.

SEC. 102. CLASSIFIED SCHEDULE OF AUTHORIZATIONS.

(a) The amounts authorized to be appropriated by section 101, and the authorized personnel ceilings as of September 30, 1991, for the conduct of the intelligence activities of the elements listed in such section, are those specified in the classified Schedule of Authorizations to accompany ( ) of the One Hundredth First Congress. Such Schedule of Authorizations shall be considered to be a part of this Act, and any limitation, requirement, or condition contained in such Schedule pertaining to the amount specified for any project, program, or activity shall be considered to be a part of this Act.

(b) Such Schedule of Authorizations shall be made available to the Committee on Appropriations of the Senate, the Committee on Appropriations of the House of Representatives, and the President. The President shall provide for suitable distribution of the Schedule, or of appropriate portions of the Schedule, within the executive branch of the Government.

SEC. 103. PERSONNEL CEILING ADJUSTMENTS.

The Director of Central Intelligence may authorize employment of civilian personnel in excess of the numbers authorized for fiscal year 1991 under sections 102 and 202 of this Act if he determines that such action is necessary to the performance of important intelligence functions, except that such number may not, for any element of the Intelligence Community, exceed 2 percent of the number of civilian personnel authorized under such sections for such element. The Director of Central Intelligence shall promptly notify the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate whenever he exercises the authority granted by this section.

TITLE II—INTELLIGENCE COMMUNITY STAFF

SEC. 201. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the Intelligence Community Staff for fiscal year 1991 $28,900,000, of which amount $6,580,000 shall be available for the Security Evaluation Office of the Central Intelligence Agency.

SEC. 202. AUTHORIZATION OF PERSONNEL END-STRENGTH.

(a) AUTHORIZED PERSONNEL LEVEL.—The Intelligence Community Staff is authorized 240 full-time personnel as of September 30, 1991, including 50 full-time personnel who are authorized to serve in the Security Evaluation Office of the Central Intelligence Agency. Such personnel of the Intelligence Community Staff may be permanent employees of the Intelligence Community Staff or personnel detailed from other elements of the United States Government.

(b) REPRESENTATION OF INTELLIGENCE ELEMENTS.—During fiscal year 1991, personnel of the Intelligence Community Staff shall be selected so as to provide appropriate representation from elements of the United States Government engaged in intelligence activities.

(c) REIMBURSEMENT.—During fiscal year 1991, any officer or employee of the United States or a member of the Armed Forces who is detailed to the Intelligence Community Staff from another element of the United States Government shall be detailed on a reimbursable basis, except that any such officer, employee, or member may be detailed on a nonreimbursable basis for a period of less than one year for the performance of temporary functions as required by the Director of Central Intelligence.

SEC. 203. INTELLIGENCE COMMUNITY STAFF ADMINISTERED IN SAME MANNER AS CENTRAL INTELLIGENCE AGENCY.

During fiscal year 1991, activities and personnel of the Intelligence Community Staff shall be subject to the provisions of the National Security Act of 1947 (50 U.S.C. 401 et seq.) and the Central Intelligence Agency Act of 1949 (50 U.S.C. 403a et seq.) in the same manner as activities and personnel of the Central Intelligence Agency.

TITLE III—CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 301. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for the Central Intelligence Agency Retirement and Disability Fund for fiscal year 1991 $164,600,000.

TITLE IV—CENTRAL INTELLIGENCE AGENCY ADMINISTRATIVE PROVISIONS

SEC 401. ELIMINATION OF 15-YEAR CAREER REVIEW FOR CIARDS AND FERS SPECIAL CATEGORY PARTICIPANTS.

Section 203 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended—

(1) by striking out the last sentence thereof; and

(2) by adding at the end thereof the following new sentences: "Any officer or employee who elects to accept designation as a participant entitled to the benefits of the system shall remain a participant of the system for the duration of his or her employment with the Agency. Such election shall be irrevocable except as, and to the extent, provided in section 301(d) of this Act and shall not be subject to review or approval by the Director.".

SEC. 402. QUALIFYING PERIOD FOR CIA FORMER SPOUSE.

Section 204(b)(4) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C 403 note) is amended by inserting before the period at the end thereof the following: "during the participant's service as an employee of the Central Intelligence Agency".

SEC. 403. SELECTION BETWEEN CIARDS ANNUITY AND OTHER SURVIVOR ANNUITIES.

Section 221(g) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new paragraph:

"(3) A surviving spouse who married a participant after his retirement shall be entitled to a survivor annuity payable from the fund under this title only upon electing this annuity instead of any other survivor benefit to which he or she may be entitled under this or any other retirement system for Government employees on the basis of a marriage to someone other than the participant.".

SEC. 404. SURVIVOR ANNUITIES UNDER CIARDS FOR SPOUSES OF REMARRIED, RETIRED PARTICIPANTS.

(a) CALCULATION OF REDUCTION IN ANNUITIES.—Section 221(n) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting "or elected under section 226(e)" after "(unless such reduction is adjusted under section 222(b)(5)".

(b) ELECTION OF REDUCTION IN ANNUITY.—Section 226 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(e) Upon a remarriage occurring on or after the date of enactment of this subsection to a spouse other than the spouse at the time of retirement, a retired participant whose annuity was not reduced (or was not fully reduced) to provide a survivor annuity for the participant's spouse or former spouse as of the time of retirement may irrevocably elect, by means of a signed writing received by the Director within one year after such remarriage, a reduction in the retired participant's annuity for the purpose of providing an annuity for such retired participant's spouse in the event such spouse survives the retired participant. The reduction shall be effective the first day of the month which begins nine months after the date or remarriage. For any remarriage that occurred before the date of enactment of this subsection, the retired participant may make such an election within two years after such date. To the greatest extent practicable, the retired participant shall pay a deposit under the same terms and conditions as those prescribed for retired employees under the Civil Service Retirement and Disability System under section 8339(j)(5)(C)(ii) of title 5, United States Code. A survivor annuity elected under this subsection shall be treated in all respects as a survivor annuity under section 221(b).".

(c) CONFORMING AMENDMENT.—Section 226(d) of such Act is amended by striking out "This" and inserting in lieu thereof "Subsections (a) through (c) of this".

SEC. 405. RESTORATION OF CERTAIN FORMER SPOUSE BENEFITS AFTER DISSOLUTION OF REMARRIAGE.

(a) Section 224(b)(1) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting before the semicolon ", except that, if such survivor annuity is terminated because of remarriage, such annuity shall be restored at the same rate commencing on the date such remarriage is dissolved by death, annulment, or divorce".

(b) Section 225(b)(1) of the Central Intelligence Agency Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by inserting before the semicolon ", except that the entitlement of a former spouse to benefits under this section shall be restored at the same rate commencing on the date such remarriage is dissolved by death, annulment, or divorce".

(c) Section 16(c) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403p(c)) is amended by adding at the end thereof the following new paragraph:

"(3) A former spouse who is not eligible to enroll in a health benefit plan under this section because of remarriage before the age of 55 shall be restored to such eligibility on the date such remarriage is dissolved by death, annulment, or divorce.".

(d) The amendment made by this section shall take effect on October 1, 1990, and no benefit shall be payable before such effective date.

(e) Any new spending authority (within the meaning of section 401(c) of the Congressional Budget Act of 1974) provided pursuant to the amendments made by this section shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

SEC. 406. CONFORMING CIARDS TO THE CIVIL SERVICE RETIREMENT SYSTEM.

Section 292 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding section 4(h) of the Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615), Executive Order No. 12684 of July 27, 1989 (insofar as it conforms the Central Intelligence Agency Disability and Retirement System to the Civil Service Retirement System by lowering the remarriage age regarding the termination of surviving spouses' annuities from 60 to 55) shall be given effect as of its date of issuance.".

SEC. 407. TREATMENT OF CERTAIN ALIEN EMPLOYEES IN HONG KONG.

(a) AUTHORITY.—In applying the proviso of section 7 of the Central Intelligence Agency Act of 1949, in the case of an alien described in subsection (b), the Director may charge the entry of the alien against the numerical limitation for any fiscal year (beginning with fiscal year 1991 and ending with fiscal year 1996) notwithstanding that the alien's entry is not made to the United States in that fiscal year so long as such entry is made before the end of fiscal year 1997.

(b) ELIGIBLE ALIENS.—An alien eligible under subsection (a) is an alien who—

(1) is an employee of the Foreign Broadcast Information Service in Hong Kong; or

(2) is the spouse or child of an alien described in paragraph (1) if accompanying or following to join the alien in coming to the United States.

TITLE V—DEPARTMENT OF DEFENSE FOREIGN INTELLIGENCE ENHANCEMENTS

SEC. 501. DEPARTMENT OF DEFENSE COVER SUPPORT AUTHORITY.

(a) IN GENERAL.—Chapter 21 of title 10, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 22—SECURITY SUPPORT FOR DEPARTMENT OF DEFENSE INTELLIGENCE ACTIVITIES

"§ 431. Authority for certain commercial activity

"The Secretary of Defense, consistent with this chapter, may carry out certain commercial activities as may be necessary for the purpose of providing security for the conduct of intelligence collection activities undertaken by the Department of Defense. Such activities shall be carried out only with the approval of the Director of Central Intelligence and, to the extent such activities take place within the United States, shall also be coordinated with and, where appropriate, be supported by, the Director of the Federal Bureau of Investigation.

"§ 432. Use and disposition of funds

"Proceeds generated by a commercial activity carried out under this chapter may be used to offset necessary and reasonable expenses arising from that activity and shall be kept to the minimum necessary to operate such activity in a secure manner. Any proceeds in excess of those required for this purpose shall be deposited, as often as may be practicable, into the Treasury of the United States as miscellaneous receipts. The disposition of such proceeds shall be audited at least annually by the organization assigned auditing responsibility by the head of the military department or defense agency for the commercial activity concerned.

"§ 433. Relationship with other Federal laws

"(a) Except as provided by subsection (b), commercial activities conducted pursuant to this chapter shall be carried out in accordance with applicable Federal law.

"(b) Whenever the Secretary of Defense, an official of no lower rank than an Assistant Secretary of Defense who is designated by the Secretary for this purpose, or the head of a military department certifies that, in connection with the establishment or operation of a commercial activity pursuant to this chapter, compliance with Federal laws or regulations pertaining to the management and administration of Federal agencies would create an unacceptable risk of compromise of authorized intelligence collection activities, he may authorize the establishment and operation of such activities, notwithstanding such laws or regulations, to the extent necessary to prevent the disclosure of the commercial activity concerned as an instrumentality of the United States Government, except that such certification and authorization shall be in writing and shall specify the Federal laws or regulations for which compliance by the commercial activity concerned is not required consistent with this section.

"(c) As used in this section, the phrase 'Federal laws and regulations pertaining to the management and administration of Federal agencies' means only the following—

"(A) Federal laws and regulations pertaining to the receipt and use of appropriated and nonappropriated funds;

"(B) the acquisition or management of property or services;

"(C) information disclosure, retention, and management;

"(D) the employment of personnel;

"(E) payments for travel and housing;

"(F) the establishment of legal entities or government instrumentalities; and

"(G) foreign trade or financial transaction restrictions that would reveal the commercial activity as an activity of the United States Government.

"§ 434. Reservation of defenses and immunities

"Commercial activity undertaken pursuant to this chapter, including the submission to judicial proceedings of any State, shall not constitute a waiver of the defenses and immunities of the United States.

"§ 435. Restrictions

"(a) No corporation, partnership, or other legal entity may be established to carry out commercial activities pursuant to this chapter except with the approval of the Secretary of Defense or the Deputy Secretary of Defense. Such approval may not be delegated.

"(b) Nothing in this chapter authorizes the conduct of any intelligence activity which is not otherwise authorized by law or Executive order.

"(c) Personnel conducting commercial activity authorized by this chapter may only engage in those activities in the United States necessary to support intelligence activities abroad.

"(d) A citizen of the United States or an alien admitted to permanent residence in the United States may not be employed by, or assigned or detailed to perform operational, managerial, or supervisory duties for, an entity engaged in commercial activity authorized by this chapter unless that person has been informed of the purpose of such activity.

"§ 436. Regulations, oversight, and legal review

"The Secretary of Defense shall issue regulations to implement the authority contained in this chapter within 180 days of its date of enactment. Copies of such regulations shall be provided to the Committees on Armed Services of the Senate and House of Representatives and the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives prior to their issuance. Such regulations shall be consistent with this chapter and shall, at a minimum—

"(1) specify all officials authorized to approve commercial activities pursuant to this chapter and, where a determination is required pursuant to section 433(b) only the officials specified by such section may approve the establishment or operation of the commercial activity concerned;

"(2) designate a single office within the Defense Intelligence Agency to implement, and maintain accountability for, all activities authorized pursuant to this chapter;

"(3) require prior legal review of all commercial activities authorized pursuant to this chapter; and

"(4) provide for appropriate internal audit controls and oversight for such activities.

"§ 437. Reports to Congress

"(a)(1) The Secretary of Defense shall ensure that the Committees on Armed Services of the Senate and House of Representatives and the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives (hereafter in this chapter referred to as 'the intelligence committees') are kept fully and currently informed of actions taken pursuant to this chapter, including any significant anticipated activity to be authorized pursuant to this chapter.

"(2) For purposes of paragraph (1), the Secretary of Defense shall provide all such committees with prior notice of the establishment of any corporation, partnership, or other legal entity.

"(b) Not later than November 1 of each year, the Secretary of Defense shall submit to the committees described in subsection (a) a report on all commercial activity undertaken pursuant to this chapter during the previous fiscal year. Such report shall include a description of any exercise of the authority provided by section 433(b) to the Secretary of Defense, or other authorized officials, as well as a description of any expenditure of appropriated or nonappropriated funds made pursuant to this chapter.

"§ 438. Definitions

"As used in this chapter—

"(1) the term 'commercial activities' means activities conducted in a manner consistent with prevailing commercial practice and includes—

"(A) the acquisition, use, sale, storage, and disposal of goods and services;

"(B) entering into employment contracts, leases, and other agreements for real and personal property;

"(C) depositing funds into and withdrawing funds from domestic and foreign commercial businesses or financial institutions; and

"(D) acquiring licenses, registrations, permits, and insurance; and

"(2) the term 'intelligence activities' means the collection of foreign intelligence and counterintelligence information.

(b) CLERICAL AMENDMENTS.—The tables of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part I of subtitle A of such title, are each amended by inserting after the item relating to chapter 21 the following new item:

"22. Security Support for Department of Defense Intelligence Activities 431.".

SEC. 502. POST-EMPLOYMENT ASSISTANCE FOR CERTAIN NSA EMPLOYEES.

The National Security Agency Act of 1959 (50 U.S.C. 402 note) is amended by adding at the end thereof the following new section:

"SEC. 17. (a) Notwithstanding any other law, the Director of the National Security Agency may use appropriated funds to assist employees who have been in sensitive positions who are found to be ineligible for continued access to Sensitive Compartmented Information and employment with the Agency, or whose employment has been terminated—

"(1) in finding and qualifying for subsequent employment,

"(2) in receiving treatment of medical or psychological disabilities, and

"(3) in providing necessary financial support during periods of unemployment,

if the Director determines that such assistance is essential to maintain the judgment and emotional stability of such employee and avoid circumstances that might lead to the unlawful disclosure of classified information to which such employee had had access. Assistance provided under this section for an employee shall not be provided any longer than five years after the termination of the employment of the employee.

"(b) The Director of the National Security Agency shall report annually to the Appropriations Committees of the Senate and House of Representatives, the Select Committee on Intelligence of the Senate, and the Permanent Select Committee on Intelligence of the House of Representatives with respect to any expenditure made pursuant to this section.".

SEC. 503. REIMBURSEMENT RATE FOR CERTAIN AIRLIFT SERVICES.

(a) AUTHORITY.—The Secretary of Defense is authorized to grant the use of the Department of Defense reimbursement rate for military airlift services provided by the Department of Defense to the Central Intelligence Agency, if the Secretary of Defense determines that those military airlift services are provided for activities related to national security objectives.

(b) DEFINITION.—For purposes of subsection (a), the term "Department of Defense reimbursement rate" means the rate of reimbursement charged by the Department of Defense to the military departments.

TITLE VI—DEPARTMENT OF ENERGY PERSONNEL AUTHORITY

SEC. 601. EXCEPTED POSITIONS FROM THE COMPETITIVE SERVICE.

Section 621 of the Department of Energy Organization Act (42 U.S.C. 7231) is amended by adding at the end thereof the following new subsection:

"(f) All positions in the Department which the Secretary determines are devoted to intelligence or intelligence-related activities of the United States Government are excepted from the competitive service, and the individuals who occupy such positions as of the date of enactment of this Act shall, while employed in such positions, be exempt from the competitive service.

TITLE VII—OVERSIGHT OF INTELLIGENCE ACTIVITIES

SEC. 701. REPEAL.

Section 662 of the Foreign Assistance Act of 1961 (22 U.S.C. 2422) is hereby repealed.

SEC. 702. CONGRESSIONAL OVERSIGHT.

(a) IN GENERAL.—Section 501 of the National Security Act of 1947 (50 U.S.C. 413) is amended to read as follows:

"CONGRESSIONAL OVERSIGHT

"SEC. 501. (a) The President shall ensure that the Select Committee on Intelligence of the Senate and the Permanent Select Committee of the House of Representatives (hereafter in this title referred to as the 'intelligence committees') are kept fully and currently informed of the intelligence activities of the United States, including any significant anticipated intelligence activities, as required by this title, except that—

"(1) nothing contained in this title shall be construed as requiring the approval of the intelligence committees as a condition precedent to the initiation of such activities; and

"(2) nothing contained in this title shall be construed as a limitation on the power of the President to initiate such activities in a manner consistent with his powers conferred by the Constitution.

"(b) The President shall ensure that any illegal intelligence activity is reported to the intelligence committees, as well as any corrective action that has been taken or is planned in connection with such illegal activity.

"(c) The President and the intelligence committees shall each establish procedures as may be necessary to carry out the provisions of this title.

"(d) The House of Representatives and the Senate, in consultation with the Direc-

tor of Central Intelligence, shall each establish, by rule or resolution of such House, procedures to protect from unauthorized disclosure all classified information and all information relating to intelligence sources and methods furnished to the intelligence committees or to Members of Congress under this title. In accordance with such procedures, each of the intelligence committees shall promptly call to the attention of its respective House, or to any appropriate committee or committees of its respective House, any matter relating to intelligence activities requiring the attention of such House or such committee or committees.

"(e) As used in this section, the term 'intelligence activities' includes 'covert actions', as defined in subsection 503(e).".

(b) INFORMATION REQUIRED TO BE DISCLOSED; FINDINGS.—The National Security Act of 1947 is amended—

(1) by redesignating sections 502 and 503 as sections 504 and 505, respectively; and

(2) by inserting after section 501 the following:

"REPORTING INTELLIGENCE ACTIVITIES OTHER THAN COVERT ACTIONS

"SEC. 502. To the extent consistent with due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods or other exceptionally sensitive matters, the Director of Central Intelligence and the heads of all departments, agencies, and other entities of the United States Government involved in intelligence activities shall—

"(1) keep the intelligence committees fully and currently informed of all intelligence activities, other than covert actions, as defined in subsection 503(e), which are the responsibility of, are engaged in by, or are carried out for or on behalf of, any department, agency, or entity of the United States Government, including any significant anticipated intelligence activity and significant failures; and

"(2) furnish the intelligence committees any information or material concerning intelligence activities other than covert actions which is within their custody or control and which is requested by either of the intelligence committees in order to carry out its authorized responsibilities.

"PRESIDENTIAL APPROVAL AND REPORTING COVERT ACTIONS

"SEC. 503. (a) The President may authorize the conduct of covert actions by departments, agencies, or entities of the United States Government only when he determines that such activities are necessary to support the foreign policy objectives of the United States and are important to the national security of the United States, which determination shall be set forth in a finding that shall meet each of the following conditions:

"(1) Each finding shall be in writing, unless immediate action by the United States is required and time does not permit the preparation of a written finding, in which case a written record of the President's decision shall be contemporaneously made and shall be reduced to a written finding as soon as possible but in no event more than 48 hours after the decision is made.

"(2) A finding may not authorize or sanction covert actions, or any aspect of such activities, which have already occurred.

"(3) Each finding shall specify each and every department, agency, or entity of the United States Government authorized to fund or otherwise participate in any significant way in such activities, except that any employee, contractor, or contract agent of a department, agency, or entity of the United States Government (other than the Central Intelligence Agency) directed to participate in any way in a covert action shall be subject to the policies and regulations of the Central Intelligence Agency, or to written policies or regulations adopted by such department, agency, or entity, governing such participation.

"(4) Each finding shall specify whether it is contemplated that any third party which is not an element, contractor, or contract agent of the United States Government, or is not otherwise subject to United States Government policies or regulations, will be used to fund or otherwise participate in any significant way in the covert action concerned or be used to undertake the covert action concerned on behalf of the United States.

"(5) A finding may not authorize any action intended to influence United States political processes, public opinion, policies, or media.

"(6) A finding may not authorize any action which violates the Constitution of the United States or any statutes of the United States.

"(b) To the extent consistent with due regard for the protection from unauthorized disclosure of classified information relating to sensitive intelligence sources and methods, or other exceptionally sensitive matters, the Director of Central Intelligence and the heads of all departments, agencies, and other entities of the United States Government involved in a covert action shall—

"(1) keep the intelligence committees fully and currently informed of all intelligence activities, other than covert actions, as defined in subsection 503(e), which are the responsibility of, are engaged in by, or are carried out for or on behalf of, any department, agency, or entity of the United States Government, including any significant anticipated intelligence activity and significant failures; and

"(2) furnish the intelligence committees any information or material concerning intelligence activities other than covert actions which is within their custody or control and which is requested by either of the intelligence committees in order to carry out its authorized responsibilities.

"(c)(1) Except as provided by paragraphs (2) and (3), the President shall ensure that any finding approved, or determination made, pursuant to subsection (a) shall be reported to the intelligence committees before the initiation of the activities authorized.

"(2) On rare occasions, the President may direct that covert actions be initiated before reporting such actions to the intelligence committees. On such occasions, the President shall fully inform the intelligence committees in a timely fashion and shall provide a statement of the reasons for not giving prior notice.

"(3) If the President determines it is essential to meet extraordinary circumstances affecting vital interests of the United States, the President may limit the reporting of findings or determinations pursuant to paragraphs (1) and (2) to the chairmen and ranking minority members of the intelligence committees, the Speaker and Minority Leader of the House of Representatives, and the Majority and Minority leaders of the Senate. In any such case, the President shall provide a statement of the reasons for limiting access to such findings or determinations in accordance with this subsection.

"(4) In each case reported pursuant to paragraph (1), (2), or (3), a copy of the finding, signed by the President, shall be provided to the chairman of each intelligence committee.

"(d) The President shall ensure that the intelligence committees or, if applicable, the Members of Congress specified in subsection (c)(3) are notified of any significant change in a previously approved covert action, or any significant undertaking pursuant to a previously approved finding, in the same manner as findings are reported pursuant to subsection (c).

"(e) As used in this section, the term 'covert action' means an activity or activities conducted by an element of the United States Government to influence political, economic, or military conditions abroad so that the role of the United States Government is not intended to be apparent or acknowledged publicly, but does not include—

"(1) activities the primary purpose of which is to acquire intelligence, traditional counterintelligence activities, traditional activities to improve or maintain the operational security of the United States Government programs, or administrative activities;

"(2) traditional diplomatic or military activities or routine support to such activities;

"(3) traditional law enforcement activities conducted by United States Government law enforcement agencies or routine support to such activities; or

"(4) activities to provide routine support to the overt activities (other than activities described in paragraph (1), (2), or (3)) of other United States Government agencies abroad.".

(c) AVAILABILITY OF FUNDS SUBJECT TO FINDINGS.—Section 504 of the National Security Act of 1947, as amended by subsection (b)(2), is further amended—

(1) by striking out "501" in subsection (a)(2) and inserting in lieu thereof "503"; and

(2) by adding at the end thereof the following new subsection:

"(d) No funds appropriated for, or otherwise available to, any department, agency, or entity of the United States Government, may be obligated or expended, or may be directed to be obligated or expended, for any covert action, as defined in section 503(e), unless and until a Presidential finding required by section 503(a), has been signed or otherwise issued in accordance with that section.".

TITLE VIII—GENERAL PROVISIONS

SEC. 801. AUTHORIZATION OF APPROPRIATIONS FOR INCREASES IN EMPLOYEE COMPENSATION AND BENEFITS AUTHORIZED BY LAW.

There are authorized to be appropriated for fiscal year 1991 such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, and other benefits for Federal employees which are authorized by law.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STRIKING OF COMMEMORATIVE MEDALS

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate

proceed to the immediate consideration of Calendar No. 759, H.R. 2575 regarding congressional commemorative coins.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 2575) to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941, to provide for the striking of medals in commemoration of the centennial of Yosemite National Park, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2579

Mr. SIMPSON. Mr. President, on behalf of Senator HEINZ I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. HEINZ, proposes an amendment numbered 2579.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following:

COMMEMORATING THE UNITED STATES CONSTITUTION

SECTION . DENOMINATIONS, SPECIFICATIONS, AND DESIGN OF COINS.

Subsection (d)(1) of section 5112 of title 31, United States Code, is amended by striking the fourth sentence.

SEC. . DESIGN CHANGES REQUIRED FOR CERTAIN COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(3) The design on the reverse side of the half dollar, quarter dollar, dime coin, 5-cent coin and one-cent coin shall be selected for redesigning. One or more coins may be selected for redesign at the same time, but the first redesigned coin shall have a design commemorating the two hundredth anniversary of the United States Constitution for a period of 2 years after issuance. After that 2-year period, the bicentennial coin shall have its design changed in accordance with the provisions of this subsection. Such selection, and the minting and issuance of the first selected coin shall be made not later than 1 year after the date of the enactment of this paragraph. All such redesigned coins shall conform with the inscription requirements set forth in paragraph (1) of this subsection."

SEC. . DESIGN ON OBVERSE SIDE OF COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end of the following new paragraph:

"(4) Subject to paragraph (2), the design on the obverse side of the half dollar, quarter dollar, dime coin, 5-cent coin, and one-cent coin shall contain the likenesses of those currently displayed and shall be considered for redesign. All such coin obverse redesigns shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. . SELECTION OF DESIGNS.

The design changes for each coin authorized by the amendments made by this Act shall take place at the discretion of the Secretary and shall be done at the rate of one or more coins per year, to be phased in over 6 years after the date of the enactment of this Act. In selecting new designs, the Secretary shall consider, among other factors, thematic representations of the following constitutional concepts: freedom of speech and assembly; freedom of the press; right to due process of law; right to a trial by jury; right to equal protection under the law; right to vote; themes from the Bill of Rights; and separation of powers, including the independence of the judiciary. The designs shall be selected by the Secretary upon consultation with the United States Commission on Fine Arts.

SEC. . REDUCTION OF THE NATIONAL DEBT.

Subsection (a)(1) of section 5132 of title 31, United States Code, is amended by inserting after the third sentence the following: "Any profits received from the sale of uncirculated and proof sets of coins shall be deposited by the Secretary in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

So the amendment (No. 2579) was agreed to.

Mr. NUNN. Mr. President, I ask unanimous consent that the bill be advanced to third reading, and passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

So the bill (H.R. 2575), as amended, was passed.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BOUNDARY REVISIONS AT GETTYSBURG NATIONAL MILITARY PARK

Mr. NUNN. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 532, H.R. 3248, regarding Gettysburg National Military Park.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3248) to revise the boundary of Gettysburg National Military Park in the Commonwealth of Pennsylvania and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. McCLURE. Mr. President, I rise in reluctant support of this bill. I believe that several sections of the bill should be perfected particularly with respect to pay for Commission members, reimbursement of planning costs, and Federal action consistency review.

With respect to the latter, I believe the Pennsylvania delegation has bought into an unworkable provision. Federal agency action which the Secretary finds inconsistent with the purposes of the historic district must be sent to designated congressional committees and "an adequate time allowed for congressional comment" must be permitted. What this means, I know not. Is an agency action prohibited until all 535 Members of Congress have affirmatively commented? If an agency submits the required information and waits a day or two can they act? This provision is a lawyer's dream, which is totally unnecessary. The Energy and Natural Resources Committee has endorsed numerous other consistency provisions which work. This is the first one that I am aware of that clearly does not. My only justification for going along with this is that I will not have to live with it. The Pennsylvania delegation will. They seem willing to accept that fate. While I will defer to the Senate delegation this time on this bill, I hope that others will not follow this precedent in the future. If they do, I am not sure I will be so accommodating.

REVISION OF BOUNDARY OF GETTYSBURG NATIONAL MILITARY PARK

Mr. SPECTER. Mr. President, I am pleased to support the Senate's passage of H.R. 3248, a bill to authorize the implementation of the Gettysburg National Military Part boundary study which the Department of Interior transmitted to Congress on August 21, 1989.

On September 12, 1989, I was joined by my colleague from Pennsylvania, Senator HEINZ, in introducing S. 1594, the Senate's bill to revise the boundary of the Gettysburg National Military Park in the Commonwealth of Pennsylvania. Our colleagues in the House of Representatives, Congressmen GOODLING and KOSTMAYER, introduced the companion legislation in this matter. On January 24, 1990, the Senate passed S. 1594 after it was reported from the Commitee on Energy and Natural Resources. I want to express my appreciation to the Subcommittee on Public Lands, National Parks and Forests for all their efforts in this regard.

Mr. President, according to the Park Service, the original 1895 legislation establishing the Gettysburg National Military Park contained language and broad references to a map drawn by Maj. Gen. Daniel Sickles that have been the subject of uncertainty and various interpretations for many years. As a result, the Gettysburg National Military Park, although one of the most frequently visited military

parks in the country, has no formally recognized boundaries.

The boundary study identified the need for Congress to establish a permanent boundary through legislation and to support cooperative efforts for protection of the historic setting. The study depicted key battlefield areas that are currently not part of the park, monuments and important elements of the historic setting that require protection, and some areas that are no longer needed for park purposes.

Specifically, the bill we are passing here today responds to the boundary study and adds approximately 2,000 acres that include key sites and features of the battle not now adequately protected or interpreted; transfer approximately 25 acres which are no longer necessary to the Park Service's mission; and protect outlying monuments and markers primarily through cooperative agreements with landowners.

Widerly recognized as a turning point in the Civil War, the Battle of Gettysburg is perhaps one of the most significant historical events in this Nation's history. Much has been written about both military and personal dramas which were played out during the course of the 3-day battle. As one of the few Civil War conflicts fought on Northern soil, Gettysburg offered a rare opportunity for the Confederacy and presented the Union with new and unanticipated challenges. After three days of fierce fighting, however, the Confederates were forced to retreat, and Gen. Robert E. Lee's Army of northern Virginia was never again strong enough to launch a major invasion into the North.

Gettysburg is significant also as the site at which President Abraham Lincoln delivered a short but eloquent address to dedicate a national cemetry in honor of Union dead. The brief remarks, which he ironically believed the world would "little note, nor long remember," later became known as the Gettysburg Address. President Lincoln foresaw that the actions of those who had died at that battlefield could never be forgotten. The establishment of accurate boundaries for the Gettysburg National Military Park represents a continuing effort to ensure that the deeds of those who fought at Gettysberg are carefully recorded and preserved for future generations.

Mr. President, it is essential that resources necessary to maintain and interpret the significance of the Battle of Gettysburg be made available to the Park Service. Accordingly, I urge my colleagues to join Senator HEINZ and me in supporting passage of this legislation to protect our Nation's resources.

Mr. NUNN. Mr. President, I ask unanimous consent the bill be advanced to third reading, and passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 3248) was passed.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MORNING BUSINESS

Mr. NUNN. Mr. President, I ask unanimous consent the Senate actions on items just passed be considered as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEAVE OF ABSENCE

Mr. SIMPSON. Mr. President, this weekend, the Coast Guard is celebrating its 200th anniversary. The very first event this year to celebrate the Coast Guard's 200th anniversary will occur in Unalaska where the Coast Guard anthem was penned. The Senator from Alaska [Mr. MURKOWSKI] made an early commitment to participate in this official event. Unalaska/Dutch Harbor is some 5,000 miles from Washington, DC, difficult travel arrangements using both official Coast Guard and private aircraft have been made so that he may arrive on the Aleutian chain in time for the scheduled events. In addition to participating in the celebration in Unalaska/Dutch Harbor, Senator MURKOWSKI will help the community of St. Paul dedicate its new harbor project this weekend. Arrangements have been made so that he may fly on an official Coast Guard plane from Unalaska to St. Paul accompanied by Capt. Jeff Hartman of the U.S. Coast Guard.

Mr. President, as Senator MURKOWSKI noted in previous statements to his colleagues, those of us privileged to serve in the Senate representing western States must do the best we can to anticipate Senate schedules to that we may travel long distances to our States to meet obligations to our constituents. This is especially difficult when trying to arrange travel to remote locations in Alaska.

During this entire session, he has missed only one vote while traveling back from Alaska. If the Senate continues to work next week, he will, of course, return and participate with his colleagues on Monday.

Mr. President, on behalf of Senator MURKOWSKI, I ask permission under the rules of the Senate for him to be absent from the Senate on official business after 9:15 p.m. Friday. This will enable Senator MURKOWSKI to participate in the official functions in Unalaska/Dutch Harbor and St. Paul, AK, on Saturday, August 4, 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, if I may, I see two colleagues seeking recognition. I intend to speak for 5 minutes or so on the Reid amendment when we get back to that item of business.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The Senate resumed consideration of the bill.

Mr. METZENBAUM. Will the Senator from Wyoming be good enough to let me proceed for 1 minute?

Mr. SIMPSON. I yield the floor.

Mr. METZENBAUM. Mr. President, I ask unanimous consent the pending amendment be set aside in order to consider this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2580

(Purpose: To improve the effectiveness of economic sanctions against the Republic of Iraq in response to its invasion of the State of Kuwait)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk will read as follows:

The Senator from Ohio [Mr. METZENBAUM], for himself, Mr. D'Amato, Mr. PELL, Mr. DOLE, and Mr. MCCAIN, proposes an amendment numbered 2580.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following section:

"Notwithstanding any other provision of law, the President shall have the authority to restrict the importation of goods and services to the United States from any nation which continues to maintain economic relations with the Republic of Iraq in violation of economic sanctions against the Republic of Iraq imposed by the international community as a whole, or by the United States.".

Mr. METZENBAUM. Mr. President, this amendment is sent to the desk on behalf of myself, Senators D'AMATO, PELL, DOLE, and MCCAIN. It gives the President the authority to restrict the importation of goods and services into the United States from any Nation which continues to maintain economic relations with the Republic of Iraq in violation of economic sanctions against the Republic of Iraq imposed by the international community as a whole, or by the United States.

It is my understanding there is no objection to the amendment. I hope it can be accepted.

Mr. NUNN. Mr. President, this is not in the jurisdiction of the Armed Services Committee. I want everyone to understand that the reason this is being accepted is because the Senator from Rhode Island has cosponsored it. He is chairman of the Foreign Relations Committee.

I want everyone to understand this is very far-reaching authority. It is not mandatory, but it is far-reaching authority. I believe also that Mr. DOLE, the Republican leader, cosponsored this, but it is not an insignificant act. I do want to note that.

The PRESIDING OFFICER. Is there further debate?

Mr. McCAIN. Mr. President, I think this is an appropriate amendment, given the gravity of the situation as it exists today. I thank the Senator from Ohio for bringing it forward at this very propitious time. I think it sends a proper signal that the American people, and the United States Senate, are ready to support President Bush in every action he needs to take to bring this aggressor to heel. Once again, I thank the Senator from Ohio for bringing this amendment before the Senate.

Mr. METZENBAUM. I thank the Senator.

Mr. NUNN. Mr. President, I urge its adoption.

The PRESIDING OFFICER. Is there further debate? If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2580) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM. Mr. President, I want to publicly express my appreciation to the Senator from Wyoming for permitting me to go forward.

AMENDMENT NO. 2574

The PRESIDING OFFICER. The question recurs on the Reid amendment.

Mr. SIMPSON. Mr. President, I yield to my friend from Nebraska, if he has business, and then, I will go forward after his remarks.

Mr. EXON. I thank my colleague from Wyoming. I have been patiently waiting for the same purpose. I will let him proceed, but that we continue without further interruption on the matter before us, the amendment of Senator REID.

Mr. GLENN. Question, Mr. President. I wonder how long people are planning to speak? We are waiting for another amendment. Do they have any idea how long we will be tied up?

Mr. SIMPSON. I have two amendments. They are both going to be accepted and then go to voice vote. I would think 5, 6, 8 minutes.

Mr. EXON. May I inquire of the Senator from Wyoming, I assume that he was going to speak on the amendment which is before the Senate.

Mr. SIMPSON. The Senator is correct; the Reid amendment.

Mr. EXON. Mr. President, I am going to speak briefly on this amendment. I have no other business. I would appeal to the Chair, if we could, to follow the regular order and allow us to wind up the debate as quickly as possible. I will object, in other words, for any other measures to be brought up until we dispose of this, which I think we can dispose of in short order, as far as this Senator is concerned.

Mr. GLENN. The amendment we were discussing here I believe will take 2 or 3 minutes.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, let the RECORD disclose the interjection was for the purpose of doing business so that the House of Representatives can deal with it tonight while they are still in session, and will soon go out of session. That was the only purpose for the break in dealing with the Reid amendment. I think that is a very important part of this.

Mr. NUNN. Mr. President, I am glad the Senator from Wyoming made that comment, and I hate to do this to my colleagues. On behalf of the majority leader I have another brief item.

The reason we are doing this is because the House of Representatives is going home, and if we do not do it now, we will not get it passed for 6 weeks. This is very important.

AMERICAN INDIAN, ALASKA NATIVE, AND NATIVE HAWAIIAN CULTURE AND ART DEVELOPMENT ACT AMENDMENTS

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 747, H.R. 5256, the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act amendments.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5256) to amend the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act, and for other purposes, which had been reported from the Select Committee on Indian Affairs, with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets and the parts of the bill intended to be inserted are shown in italic.)

H.R. 5256

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. GENERAL POWERS OF BOARD OF INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT.

(a) INTEREST AND INVESTMENT INCOME.—(1) Section 1507(a)(12) of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4414(a)(12)) is amended by inserting before the semicolon the following: ", including the authority to designate on an annual basis a portion of the funds appropriated pursuant to section 1531(a) for **[**investment without regard to any other provision of law regarding the investment of federally appropriated funds on a short term basis for the purpose of maximizing the yield and liquidity of such funds**]** *investment in obligations of the United States or obligations guaranteed as to principal and interest by the United States or by an agency of the United States, including short term obligations of the United States, for the purpose of maximizing the yield and liquidity of such funds*".

(2) Section 1507 of such Act is amended by adding at the end the following new subsection:

"(c) INTEREST AND INVESTMENTS.—Interest and earnings on amounts received by the Institute pursuant to section 1531 invested under subsection (a)(12) shall be the property of the Institute and may be expended to carry out this title. The Board shall be held to a reasonable and prudent standard of care, given such information and circumstances as existed when the decision is made, in decisions involving investment of funds under subsection (a)(12).".

(b) INSURANCE.—**[**(1)**]** Section 1507(a)(11) of such Act (20 U.S.C. 4414(a)(11)) is amended to read as follows:

"(11) to the extent not already provided by law, to obtain insurance to cover all activities of the Institute, including coverage relating to property and liability, or make other provisions against losses.".

[(2) Not later than January 1, 1991, the Attorney General of the United States, after consultation with the President of the Institute of American Indian and Alaska Native Culture and Arts Development, shall issue an opinion to the President of the Institute as to the applicability to the Institute, its officers, employees, and students of all Federal laws providing protection against loss and liability, and the areas in which there is no coverage.

[SEC. 2. COMPENSATION OF STAFF.

[Section 1509(b)(2) of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4416(b)(2)) is amended to read as follows:

["(2) The President of the Institute may fix the basic compensation for officers and employees of the Institute at rates comparable to the rates of compensation at similar institutions of higher education.".**]**

SEC. **[**3.**]** 2. ESTABLISHMENTS WITHIN THE INSTITUTE.

Section 1510(b) of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4417(b)) is amended—

(1) in paragraph (2), by striking subparagraph (A) and redesignating subparagraphs (B) through (I) as subparagraphs (A) through (H), respectively;

(2) by striking "and" at the end of paragraph (1);

(3) by striking the period at the end of paragraph (2) and inserting "; and"; and

(4) by inserting after paragraph (2) the following:

"(3) a Museum of American Indian and Alaska Native Arts, which shall be under the direction of the President of the Institute.".

SEC. [4.] 3. TRANSFER OF FUNCTIONS.

Section 1514 of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4421) is amended—

(1) by striking subsections (d), (e), and (f); and

(2) by adding at the end the following new subsection (d):

"(d) FORGIVENESS OF AMOUNTS OWED; HOLD HARMLESS.—(1) Subject to paragraph (2)—

"(A) the Institute shall be responsible for all obligations of the Institute incurred after June 2, 1988, and

"(B) the Secretary shall be responsible for all obligations of the Institute incurred on or before June 2, 1988, including those which accrued by reason of any statutory, contractual, or other reason prior to June 2, 1988, which became payable within two years of June 2, 1988.

"(2) With respect to all programs of the Federal government, in whatever form or from whatever source derived, the Institute shall only be held responsible for actions and requirements, either administrative, regulatory, or statutory in nature, for events which occurred after July 1, 1988, including the submission of reports, audits, and other required information. The United States may not seek any monetary damage or repayment for the commission of events, or omission to comply with either administrative or regulatory requirements, for any action which occurred prior to June 2, 1988.".

SEC. [5.] 4. COMPLIANCE WITH OTHER ACTS.

Section 1517 of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4424) is amended by adding at the end the following:

[("(c) OTHER FEDERAL ASSISTANCE.—The Institute shall not be subject to any provision of Federal law requiring that non-Federal or other monies be used in part to fund a project or grant as a condition for the application for or the receipt of Federal assistance. This subsection shall not be construed to effect in a negative manner the review, prioritization, or acceptance of any application or proposal, solicited or unsolicited.".]

"(c) OTHER FEDERAL ASSISTANCE.—Funds received by the institute pursuant to this Act shall not be regarded as Federal money for purposes of meeting any matching requirements for any Federal grant, contract or cooperative agreement.".

SEC. [6.] 5. ENDOWMENT PROGRAMS.

Section [518] *1518* of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4425) is amended to read as follows:

"SEC. 1518. ENDOWMENT PROGRAMS.

"(a) PROGRAM ENHANCEMENT ENDOWMENT.—

"(1)(A) [From the amount reserved] *From the total amount appropriated* for this subsection pursuant to section 1531(a), funds may be deposited into a trust fund maintained by the Institute at a federally insured banking or savings institution.

"(B) The President of the Institute shall provide—

"(i) for the deposit into the trust fund referred to in subparagraph (A)—

"(I) of a capital contribution by the Institute in an amount equal to the amount of each Federal contribution; and

"(II) any earnings on the funds deposited under this paragraph; or

"(ii) for the reservation for the sole use of the Institute of any noncash, in-kind contributions of real or personal property, which property may at any time be converted to cash, which shall be deposited as a capital contribution into the trust fund referred to in subparagraph (A).

"(C) If at any time the Institute withdraws any capital contribution (as described in subparagraph (B)(i)) made by the Institute to the trust fund referred to in subparagraph (A) or puts any property (as described in subparagraph (B)(ii)) to a use which is not for the sole benefit of the Institute, an amount equal to the value of the Federal contribution shall be withdrawn from such trust fund and returned to the Treasury as miscellaneous receipts.

"(2) Interest deposited into the trust fund pursuant to paragraph (1)(B)(ii) may be periodically withdrawn and used, at the direction of the Board or its designee, to defray any expense associated with the operation of the Institute, including the expense of operations and maintenance, administration, academic and support personnel, community and student services programs, and technical assistance.

"(3) For the purpose of complying with the contribution requirement of paragraph (1)(B), the Institute may use funds or in-kind contributions of real or personal property fairly valued which are made available from any private or tribal source, including interest earned by the funds invested under this subsection. In-kind contributions shall be other than fully depreciable property or property which is designated for addition to the permanent collection of the Museum and shall be valued according to the procedures established for such purpose by the Secretary of the Treasury. For purposes of this paragraph, all contributions, including in-kind and real estate, which are on-hand as of the date of enactment of this Act and which have been received after June 2, 1988, but which have not been included in computations under this provision shall be eligible for matching with Federal funds appropriated in any fiscal year.

"(4) Amounts appropriated under section 1531(a) for use under this subsection shall be paid by the Secretary of the Treasury to the Institute as a Federal capital contribution equal to the amount of funds or the value of the in-kind contributions which the Institute demonstrates have been placed within the control of, or irrevocably committed to the use of, the Institute as a capital contribution of the Institute in accordance with this subsection.

"(b) CAPITAL IMPROVEMENT ENDOWMENT.—

"(1) In addition to the trust fund established under subsection (a), funds may be deposited into a trust fund maintained by the Institute at a federally insured banking or savings institution from the amount reserved for this subsection pursuant to section 1531(a) for the purpose of establishing a separate special endowment for capital improvement, (hereafter in this subsection referred to as the 'capital endowment fund') to pay expenses associated with site selection and preparation, site planning and architectural design and planning, new construction, materials and equipment procurement, renovation, alteration, repair, and other building and expansion costs of the Institute.

"(2) The President of the Institute shall provide for the deposit into the capital endowment fund of a capital contribution by the Institute in an amount equal to the amount of each Federal contribution and any earnings on amounts in the capital endowment fund.

"(3) Funds deposited by the Institute as a match for Federal contributions under paragraph (5) shall remain in the capital endowment fund for a period of not less than two years. If at any time the Institute withdraws any capital contribution to the capital endowment fund before the funds have been deposited for this two-year period, an equal amount of the Federal contribution shall be withdrawn from the capital endowment fund and returned to the Treasury as miscellaneous receipts. At the end of the two-year period, the entire principal and interest of the funds deposited for this period, including the Federal matching portion, shall accrue, without reservation, to the Institute and may be withdrawn, in whole or in part, to defray expenses associated with capital acquisition and improvement of the Institute referred to in paragraph (1).

"(4) For the purpose of complying with the contribution requirement of paragraph (2), the Institute may use funds which are available from any private or tribal source.

"(5) Subject to paragraph (3), amounts appropriated under section 1531(a) for use under this subsection shall be paid by the Secretary of the Treasury to the Institute as a Federal capital contribution equal to the amount which the Institute demonstrates has been placed within the control of, or irrevocably committed to the use of, the Institute and is available for deposit as a capital contribution of the Institute in accordance with this subsection.

"(c) GENERAL ADMINISTRATIVE PROVISIONS.—(1) Funds in the trust funds described in subsections (a) and (b) shall be invested at a rate not less than that generally available for similar funds deposited at the same banking institution for the same period or periods of time.

"(2) No part of the net earnings of the trust funds established under this section shall inure to the benefit of any private person.

"(3) The President of the Institute shall provide for such other provisions governing the trust funds established under this section as may be necessary to protect the financial interest of the United States and to promote the purpose of this title as agreed to by the Secretary of the Treasury and the Board or its designee, including recordkeeping procedures for the investment of funds received under the trust fund established under subsection (b) and such other recordkeeping procedures for the expenditure of accumulated interest for the trust fund under subsection (a) as will allow the Secretary of the Treasury to audit and monitor activities under this section.".

SEC. [7.] 6. AUTHORIZATION OF APPROPRIATIONS.

Section 1531(a) of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4451(a)) is amended by adding at the end the following new paragraphs:

"(4) Funds appropriated under this subsection for the fiscal year 1992 and for each succeeding fiscal year shall be transferred by the Secretary of the Treasury through the most expeditious method available with the Institute being designated as its own certifying agency.

"(5) Funds are authorized to be appropriated for programs for more than one fiscal year. For the purpose of affording adequate notice of funding available under this Act, amounts appropriated in an appropriations Act for any fiscal year to carry out this Act may, subject to the appropriation, become available for obligations on July 1 of that fiscal year.".

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2581

(Purpose: To amend the bill so as to authorize the establishment of the Richard Jewell Ka'ilihiwa-Gladys Ainoa Brandt Fellowship Program for Studies in Excellence)

Mr. NUNN. Mr. President, I send to the desk an amendment on behalf of Senator INOUYE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for Mr. INOUYE, proposes an amendment numbered 2581.

Mr. McCAIN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. . FINDINGS.

The Congress finds that—

(1) previous research into the history of Native Hawaiians, including their migration to the area now known as the Hawaiian Islands, their culture, and their practices, is being found to be inaccurate and inadequate;

(2) the oral history and traditions of Native Hawaiians are becoming lost as older generations pass on before they can hand down their knowledge;

(3) when the Hawaiian language became a written language, Native Hawaiians became highly literate and produced extensive literature, including newspapers, journals, and other writings about their history and their culture; however, few people today speak the Hawaiian language and many of these documents have not been translated and therefore have not been studied;

(4) since the overthrow of the Hawaiian monarchy in 1893, the socioeconomic status of the Native Hawaiian people has been steadily declining, and as Hawaiians have become increasingly aware of their loss of culture and knowledge about their past they are endeavoring to preserve and revitalize their culture;

(5) unless the history and traditions of the Native Hawaiian people are studied and understood from a Native Hawaiian perspective, and the knowledge of the older generations are preserved, the Native Hawaiian people may never fully know their history and understand their past; and

(6) it is appropriate that the Federal Government participate in the commitment of the Native Hawaiian people to correct historical inaccuracies and to fully research all historical material about the history of the Native Hawaiian people and their culture and practices to assure that Native Hawaiians have the same opportunities as other Americans to learn about their past.

SEC. . FELLOWSHIP PROGRAM.

(a) ESTABLISHMENT.—The Secretary of Education shall establish the Richard Jewell Ka'ilihiwa-Gladys Ainoa Brandt Fellowship Program for Studies in Excellence (hereinafter referred to as the "Fellowship Program").

(b) In establishing the Fellowship Program, the Secretary shall provide for fellowships for—

(1) research into Native Hawaiian history and culture;

(2) Native Hawaiian cultural practitioners;

(3) translating Hawaiian language documents into English;

(4) researching history or cultural practices;

(5) writing workshops;

(6) video production;

(7) teaching; and

(8) other similar or like purposes.

(c) AWARDS.—Fellowships may be awarded by the Secretary of Education to individuals nominated by the Fellowship Selection Committee for a maximum of 2 years; except that teaching fellowships may be awarded on a 6-week basis. Fellowships under this section shall be awarded at such times, in such amounts, and for such purposes as the Secretary of Education, by regulation, shall prescribe, and shall be awarded only to Native Hawaiians as defined in section 4009(1) of the Act of April 28, 1988 (20 U.S.C. 4909(1)).

(d) SELECTION COMMITTEE.—(1) There is established the "Fellowship Selection Committee" which shall be composed of 5 individuals appointed by the Secretary of Education as follows:

(A) one designated by the Board of Trustees of the Native Hawaiian Culture and Arts program (authorized under Public Law 99-498; 20 U.S.C. 4441);

(B) one designated by the Board of Trustees of the Kamehameha Schools/Bernice Pauahi Bishop Estate;

(C) one designated by the Board of Trustees of the Office of Hawaiian Affairs (established by the constitution of the State of Hawaii);

(D) one designated by the Center of Hawaiian Studies of the University of Hawaii at Manoa, Honolulu, Hawaii; and

(E) one designated by the Board of Directors of 'Aha Punana Leo Inc., a nonprofit organization incorporated under the laws of the State of Hawaii by that name on February 14, 1983, for educational purposes relating to the Hawaiian language.

(2) Nothing in this section shall be construed as prohibiting any member of an entity referred to in paragraph (1) from serving on the Fellowship Selection Committee.

(3) A member of the Fellowship Selection Committee shall serve for a term of 2 years, but may be reappointed. A vacancy on the committee shall be filled in the same manner as the original appointment.

(4) The Committee shall—

(A) advise and make recommendations to the Secretary of Education regarding the establishment of general policies for the program pursuant to this section and assist in overseeing its operation;

(B) advise and make recommendations to the Secretary of Education regarding the establishment of general criteria for the distribution of fellowships; and

(C) prepare and submit to the Congress, at least once in every 3-year period, a report on any modifications in the program that the Committee determines are appropriate.

(5) In carrying out its responsibilities, the Committee shall consult on a regular basis with the Secretary of Education and representatives of institutions of higher education and associations of such institutions, learned societies, and professional and other appropriate organizations.

(6) The Secretary shall call the first meeting of the Committee, at which the first order of business shall be the election of a Chairman and a Vice Chairman, who shall serve until one year after the date of their appointment. Thereafter each officer shall be elected for a term of 2 years. In case a vacancy occurs in either office, the Committee shall elect an individual from among the members of the Committee to fill such vacancy.

(7) A majority of the members of the Committee shall constitute a quorum.

(8) The Committee shall establish such policies and adopt such bylaws as it determines necessary to carry out its functions.

(9) The Committee shall meet at the call of the chairman, and as provided in its bylaws.

(e) EXECUTIVE DIRECTOR.—The Committee shall appoint an executive director. The executive director shall serve at the pleasure of the Committee. Subject to the availability of funds, the executive director shall be compensated in an amount determined by the Committee. Subject to the availability of funds, the Committee is authorized to hire such employees as it determines necessary.

(f) CONTRACTS.—Subject to the availability of funds the Secretary of Education is authorized to enter into a contract with the Kamehameha Schools Association for the purpose of utilizing such Association in assisting the Secretary in carrying out the purposes of this section, including the administration of the fellowship program.

(g) AWARDS.—The Secretary of Education is authorized to make grants in connection with subsection (f) and in connection with fellowships awarded under this section. Such grants shall be in such amounts and subject to such terms and conditions as the Secretary of Education shall prescribe. Grants pursuant to subsection (f) may be conditioned—

(1) on the Kamehameha Schools Association establishing an endowment fund for use in carrying out programs within the purview of this Act, or similar thereto; and

(2) on such Association providing matching funds from a non-Federal source.

(h) AUTHORIZATIONS.—(1) For the purpose of assisting the Fellowship Selection Committee in carrying out its functions under this Act for fiscal year 1991, there is authorized to be appropriated to the Secretary of Education $1,000,000, to remain available until expended.

(2) For the purpose of carrying out the provisions of subsection (f) and making grants under this section, there is authorized to be appropriated to the Secretary of Education $2,500,000, to remain available until expended.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2581) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendments and third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill, having been read the third time, the question is, Shall the bill pass?

So the bill (H.R. 5256), as amended, was passed.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The Senate continued with the consideration of the bill.

AMENDMENT NO. 2574

Mr. SIMPSON. Mr. President, we go back now to the Reid amendment. Let me just say I cannot support that amendment. I hope my colleagues hear me when I say this; it is not because I have no compassion for those people who can prove their cases and are entitled to compensation.

This bill does not compensate, it only passes the buck. This bill attempts something indirectly that Congress can do directly if we had true conviction that there needed to be corrective actions taken. Current law allows claimants to sue the Government directly.

If we accept the sponsor's arguments, current law apparently prevents some of these people from recovery because the Government has stronger affirmative defenses to these claims than the private contractors do.

If that is the case, these private contractors, as a practical matter, were the agents of the Government. These lawsuits should be prosecuted against the Government. If there is merit to the claims, the appropriate remedy for Congress to pursue would be to eliminate unfair affirmative defenses for these cases.

AMENDMENT NO. 2582 TO AMENDMENT NO. 2574

Mr. SIMPSON. Mr. President, because of the lateness of the hour, we really, I think, should not trivialize the claims of the truly deserving people by doing this. I think that we have just hatched a lawyer's bonanza. The remarks of the Senator from New Mexico are very real.

Therefore, I send an amendment to the desk in relation to attorneys fees under this measure and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] proposes an amendment numbered 2582 to amendment No. 2574.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. 4. (a) *Provided, however,* That in no event shall an award of attorney fees for actions brought under this Title exceed 10 percent of the award of actual damages;

(b) *Provided further,* That nothing in this section shall act to preclude a contract for legal representation for a lesser amount.

Mr. SIMPSON. Mr. President, this limits attorneys fees to 10 percent of the amount. It is a simple amendment. It sets a cap on fees that can be recovered in these lawsuits.

The purpose behind the underlying bill is to remedy an injustice. The injustice is that deserving people are not being compensated for grievous injuries. I believe it would be an ever greater injustice to allow significant percentages of the awards to be siphoned off by overeager plaintiffs' attorneys.

I practiced law for a number of years. I know some things have changed. Some things are complex. Once you do one of these cases, you drag the forms out of the book and crank out a lot of them. At least we ought to limit them to 10 percent. It recognizes they deserve fair compensation, but certainly not excessive. I urge adoption of the amendment.

The PRESIDING OFFICER. The Senator will suspend for one moment. Is it the Senator's intention to be offering these as amendments to the underlying Reid amendment?

Mr. SIMPSON. That is correct.

The PRESIDING OFFICER. The unanimous-consent agreement previously entered into precludes second-degree amendments.

Mr. SIMPSON. I leave that to my colleagues.

Mr. REID. Mr. President, it was certainly the intent of all the parties who were working on these amendments that these two amendments would be offered. I ask, with permission of the manager, unanimous consent to allow the Senator from Wyoming to offer these two amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2582) was agreed to.

AMENDMENT NO. 2583 TO AMENDMENT NO. 2574

Mr. SIMPSON. Mr. President, I send a second-degree amendment to the Reid amendment to the desk and ask for its immediate consideration. This is an amendment on indemnification.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] proposes an amendment numbered 2583 to amendment No. 2574.

Mr. SIMPSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the pending amendment, insert the following:

SEC. 5. (a) With respect to actions filed under this section, the United States shall forever indemnify, hold harmless, and guarantee payment of any judgments entered for any claimant;

(b) In the event that any private contractor to the United States is successful in defending a claim brought under this act, the United States shall likewise indemnify and reimburse said contractor for all costs, attorney fees, and litigation related expenses incurred in defending said action;

(c) *Provided further,* That in the event an action is settled prior to litigation or a consent decree is entered pursuant to a settlement agreement, the United States shall reimburse said contractors for all reasonable costs associated with the settlement.

Mr. SIMPSON. Perhaps two portions of this amendment would be a little redundant. The third part is with regard to the issue of settling of claims and compensation. I have cleared those with the sponsor. I ask adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2583) was agreed to.

Mr. SIMPSON. Mr. President, I have no further remarks on the measure.

The PRESIDING OFFICER. The question would recur on the Reid amendment.

Mr. BINGAMAN. Mr. President, we have a responsibility as a nation to provide compensation to downwinders and others exposed to radiation as a result of Government nuclear testing. But the amendment offered by Senator REID is the wrong approach.

If this amendment becomes law, the contractors will still remain with a formidable array of defenses which make reaching a settlement very difficult. In addition, plaintiffs could have serious problems establishing contractor's fault and the essential link between their cancers and their radiation exposure.

Earlier this week the Senate passed H.R. 2372, the Radiation Exposure Compensation Act, which establishes a $100 million trust fund to compensate downwinders and uranium miners.

In 1988, we passed the Atomic Veterans Compensation Act to provide disability payments through the VA for

servicemen who were exposed to radiation during testing.

I was a cosponsor of both of those bills.

I strongly believe that we have a responsibility to radiation victims, and that we should meet that responsibility in a fair and straightforward manner. Putting these people through the compensation lottery of litigation, rather than providing them an administrative solution, is not fair.

The sole accomplishment of the amendment offered by Senator REID would be to create a job program for lawyers. It would not provide fair and equitable treatment for radiation victims, it would create a morass of legal battles involving at least 180 contractors, 217 different atmospheric tests and a potential pool of at least 133,000 claimants.

Let us reject this approach. Let us move forward with the Radiation Exposure Compensation Act, and not go back and argue in court over testing decisions made almost 40 years ago. Let us provide a real administrative remedy for radiation victims, not an empty promise of litigation.

Mr. EXON. Mr. President, I am going to be very brief but I had wanted to make a statement or two about the amendment offered by my friend and colleague from the State of Nevada. This amendment was brought to my attention for the first time for the purpose of clearance of this matter on the present defense authorization bill.

My first question when I saw this was, I am not sure this is a matter for the defense authorization bill, and has this measure been referred to what I would assume would be the proper committee of jurisdiction, the Judiciary Committee. I was advised at that time by staff that, indeed, it had been referred to the Judiciary Committee, but the Judiciary Committee, for whatever reason, had not seen fit to act on the measure at that time.

I was then advised that there was appropriate precedent for this since the measure which was passed in 1985 on the defense authorization bill was, indeed, the measure that the Senator from Nevada was trying to correct. I think that we therefore could not argue with that.

I did refer, shortly before we took this up, this matter to the Judiciary Committee leadership, and they advised me that they had held a hearing but had not moved the bill further, and they would not therefore object to this being taken up tonight.

I had a conversation earlier in the evening with my friend and colleague from Nevada, and I suspected that he assumed that this Senator knew and had been talking to the other people who have appeared in opposition to this measure tonight. That is not the case. I did not know of this. I did not know of the opposition. As far as I knew, I was the only Member of the Senate who had to make a decision on it.

I compliment my friend from Nevada once again for having the compassion and understanding, and I listened with keen interest to the remarks he made about what had happened to people in his State and whom he represents. I suspect that if I were in his shoes, I would have done the same thing he did with the introduction of this piece of legislation.

I first want to say that I am not a lawyer, so I do not understand all the technicalities of the law, and not being a lawyer I thought very quickly I recognized some real problems with this piece of legislation because as it has been very articulately discussed by the Senator from New Mexico, the senior Senator, and by the Senator from Wyoming, I was also fearful of attorney fees. However, if this measure becomes law, I would hope we could move in an expeditious fashion because I, too, care about those people and give them another avenue that some of them might want to take rather than going through the long, tremendously expensive court action that many of these cases would obviously require. Some of them might be settled very promptly, I suspect, as the Senator from Nevada earlier indicated. But I think for the most part this would take long, drawn out, very expensive procedures in the court, which in the end might not mean a great deal of real compensation for those who were, unfortunately, ill-affected. I believe that the Government should stand up. I believe the Government should pay where it is adjudged it was responsible for the action for which it contracted.

I would simply say I hope some consideration would be given—and I made that suggestion earlier this evening to the Senator from Nevada—to let us possibly give these people another option that some of them might want to take, some kind of claims commission that was referred to earlier by the senior Senator from New Mexico and others. A claims commission that we have approached similar problems with in other cases just might be something that many of those people who have claims might do much better in than in a long, drawn out lawsuit.

In any event, I thank my friend for bringing the matter up to me. At least now I know about it and I sympathize certainly with the people who have been adversely affected.

Mr. President, I yield the floor.

Mr. REID. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the Reid amendment, as amended.

The amendment (No. 2574), as amended, was agreed to.

Mr. McCAIN. I move to reconsider the vote.

Mr. REID. I move to lay that motion on the table.

AMENDMENT NO. 2584

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS, for himself, Mr. FORD, Mr. THURMOND, Mr. INOUYE, Mr. DECONCINI, Mr. BOND, Mr. JOHNSTON, Mr. KASTEN, Mr. LOTT, Mr. BUMPERS, and Mr. COCHRAN] proposes an amendment numbered 2584.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike the text from page 36, line 1, thru page 37, line 9, and insert in lieu thereof:

(A) The Army National Guard of the United States, 24,820.

(B) The Army Reserve, 12,673.

(C) The Naval Reserve, 21,848.

(D) The Marine Corps Reserve, 2,781.

(E) The Air National Guard of the United States, 8,045.

(F) The Air Force Reserve, 623.

(2) In order to meet the national security requirements of the United States, the Secretary of Defense may reallocate the numbers authorized for the reserve component specified in paragraph (1) in such manner as the Secretary determines appropriate, except that the total numbers reallocated may not exceed the number equal to 10 percent of the total number authorized for the reserve components under such paragraph.

The table referred to in subsection (b) is as follows:

Reserves on Active Duty in Support of Reserves

Fiscal year:	
1992	66,664
1993	62,959
1994	59,255
1995	55,550
1996	51,845

(b)(1) Within the end strengths authorized by legislation enacted after the date of enactment of this Act for each of the fiscal years listed in the table in paragraph (2), the Reserve components of the Armed Forces are authorized the total number of members specified in such table for such fiscal year to be serving on full-time active duty or, in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the Reserve components.

(c)(1) IMPLEMENTATION OF REDUCTIONS.—In implementing the reduction in the end strengths for Reserves on active duty in support of the Reserves required in this section, no member of the Reserves serving on full-time active duty on the date of enactment of this Act, or in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, instructing or training the Reserve components may be involuntarily separated.

(2) DEFINITION.—As used in this section, the term "involuntarily separated" shall have the same meaning as the meaning of that term under Section 844 of this Act.

(3) AUTHORITY TO EXCEED PRESCRIBED END STRENGTHS.—The end strengths prescribed in subsections (a) and (b) may be exceeded to the extent necessary to comply with this subsection, as determined under regulations prescribed by the Secretary of Defense.

(4) ACTIVE DUTY IN SUPPORT OF THE RESERVES.—Accessing of members of the Reserves to be serving on full-time active duty or, in the case of members of the National Guard on full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the Reserve components for a fiscal year shall be two percent of the total authorized end strengths provided in this section for such fiscal year.

Mr. STEVENS. Mr. President, I am pleased to announce to the Senate that this is a modification of the provisions of the bill pertaining to the Active Duty Guard and Reserve that I believe will be acceptable to the members of the Armed Services Committee. What it does is provide a cushion for the Active Duty Guard and Reserve of at least 2 percent of the vacancies that will occur so that there will be a chance for promotion and accession to the Guard and Reserve. It reduces the percentage of the Guard and Reserve strength that is reserved for attached members of the Regular Air Force and Army to the National Guard and Reserve to 5 percent rather than 10 percent that is in the bill. It has other provisions that have been worked out with the members of the committee and I will not burden the Senate with those.

I do want to again raise a series of questions, though, that I hope will be understood by my friends. They pertain to the problems that are in this bill that have been mentioned to me in the course of my discussions.

One of those items is the question of whether these personnel from the Active Air Force and Army may be used in State callups due to their status under title 10.

I also have had questions raised to me as to whether the National Guards' ability to meet the demands of the current narcotics efforts in which they are playing a leading role now may be pursued with members of the active services from Army and Air Force while they are on detached status to the Guard and Reserve.

Mr. NUNN. Mr. President, I think the Senator posed two questions there.

Mr. STEVENS. I am raising a further explanation by the committee.

Mr. NUNN. I see. The Senator does not need an answer at this moment.

Mr. STEVENS. I am not seeking an answer to those. I believe there are questions about the utilization of these Active Duty Air Force and Army people to the Active Duty Guard and Reserve, the AGR positions that need to be reviewed before this plan goes into effect.

I compliment the Armed Services Committee on the plan. It is just that I think there are other provisions of existing law that ought to be reviewed before the plan goes into effect.

Mr. NUNN. Mr. President, let me say to my friend that I appreciate him pointing out these areas. We will take each one of these questions he poses, and we will research and make sure that we are on target with what we believe to be the law. If we are not on target, we will try to make such changes as necessary in the conference.

Mr. STEVENS. I thank the chairman of the committee.

Mr. President, I would be most willing to answer any questions concerning the amendment. I know my good friend from Ohio has waited here at length to see to it that it is offered. I would be happy to have any comments he might make on the matter.

Mr. GLENN. Mr. President, very briefly, our distinguished colleague from Alaska has done so much in this area. It sets 10 percent a year, phases it in at 5 percent a year, and guarantees it not be less than 2 percent. That is basically the changes made. It stretches it out so it is not done quite so precipitously as it might otherwise have been done. I think that is a quite reasonable change. It was a good compromise. It addressed all concerns. We would be happy to move to adopt the proposed amendment.

FULL-TIME SUPPORT OF THE GUARD AND RESERVE

Mr. INOUYE. Mr. President, I strongly support many of the Guard and Reserve initiatives that have been proposed in the fiscal year 1991 defense authorization bill. In this period of declining budgets, it simply makes good sense to rely on our most cost-effective forces, the National Guard and Reserve. The Armed Services Committee has recognized this fact and has proposed many initiatives, such as freezing Guard and Reserve force structure, rather than adopting the share the pain approach proposed by the administration's budget.

However, with respect to full-time manning of the Guard and Reserve I cannot support the Armed Services Committee's approach. I support the amendment proposed by my cochairman on the Defense Appropriations Subcommittee, Senator STEVENS.

The defense authorization bill, as currently proposed, would reduce full-time personnel under the command and control of the Guard and Reserve by 30 percent in 3 years. The bill proposes to transition these positions to manning by active personnel on detail to Guard and Reserve units.

Mr. President, I fully appreciate the intention of the Armed Services Committee in taking this action. It seeks to achieve greater integration between reserve and active components to achieve a true "Total Force." However, I am concerned that the defense authorization bill attempts to force such integration too quickly. I am concerned that transitioning one-third of all full-time positions within 3 years will cause havoc in the Guard and Reserve forces we have worked so hard to build-up during the past decade.

We must be aware when embarking upon this personnel change that the Army and Air National Guard are not solely Federal forces. They also have important State missions. We need to ensure that full-time National Guard soldiers and airmen are available to address non-Federal missions such as disaster relief. We need to ensure that these personnel are able to fully participate in the "War on Drugs."

The amendment offered by Senator STEVENS doubles the time available to achieve the transition in the Guard and Reserve personnel forces. It ensures that new positions will be available for Guard and Reserve full-time personnel who join the reserve components.

I urge my colleagues to support Senator STEVENS' amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 2584) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2585

(Purpose: To authorize direct communications between Air Force scientists conducting the Ranch Hand Study and the Ranch Hand Study Advisory Committee, to limit intervention into such communications by other employees of the Government, to require annual reports on the activities of such scientists, and for other purposes)

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for Mr. DASCHLE, proposes an amendment numbered 2585.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, below line 24, insert the following new section:

SEC. 1216. CONSULTATION AND REPORT REQUIREMENTS RELATING TO RANCH HAND STUDY OF DEPARTMENT OF AIR FORCE

(a) CONSULTATION WITH ADVISORY COMMITTEE.—The Ranch Hand Advisory Committee may consult directly with and provide information and recommendations directly to the Department of the Air Force scientists conducting the Ranch Hand Study, and such scientists may consult directly with and provide information and recommendations directly to the Ranch Hand Advisory Committee. No officer or employee of the Federal Government may intervene in or impair direct communication between the Ranch Hand Advisory Committee and such scientists under this section except as may be necessary to prevent an inappropriate disclosure of classified information.

(b) ANNUAL REPORTS.—(1) Not later than February 1 of each year, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the activities of the Air Force scientists referred to in subsection (a) during the calendar year preceding the year in which a report is submitted. The first such report shall be submitted not later than February 1, 1991.

(2) Each report referred to in paragraph (1) shall include the following:

(A) A discussion of the progress made in the Ranch Hand Study during the period covered by the report.

(B) A summary of the scientific activities conducted during that period and the findings resulting from those activities, to be prepared by the scientists conducting those activities.

(3) Such a report need not contain (A) a discussion of progress discussed in any other report prepared by the Department of Defense (under this section or otherwise) regarding the Ranch Hand Study, or (B) a scientific summary included in any other such report, unless modification of such discussion or summary is appropriate for completeness, accuracy, and currency.

(c) DEFINITIONS.—In this section:

(1) The term "Ranch Hand Advisory Committee" means the committee known as the "Advisory Committee on Special Studies Relating to the Possible Long-term Health Effects of Phenoxy Herbicides and Contaminants" established by the Secretary of Health and Human Services to monitor the conduct of the Ranch Hand Study.

(2) The term "Ranch Hand Study" means the special study conducted by the Secretary of the Air Force relating to the possible long-term effects of phenoxy herbicides and contaminants on Air Force personnel who participated in Operation Ranch Hand in the Republic of Vietnam during the Vietnam era.

Mr. DASCHLE. Mr. President, the amendment I am offering tonight is designed to address a serious issue related to the Air Force's ongoing ranch hand study, which is intended to explore the potential health effects of certain military personnel's exposure to herbicides used in Vietnam. The study was initiated by the Air Force in response to concerns about the toxic effects of the components of agent orange and other herbicides used by the Air Force's crop destruction and defoliation spray missions, Operation Ranch Hand.

From the beginning, many, including the National Academy of Sciences and the Air Force itself, have been concerned about the public's and scientific community's perception of the study's independence. Many doubted the Air Force's objectivity on this issue, and still others doubted the Air Force's ability to appear objective. Those concerns were first offered in 1979, when the study was initiated, and they have continued to this day.

To address the issue of objectivity, the Air Force scientists wrote a protocol for their study that clearly defined the lines of authority and responsibility related to the ranch hand study. That seemed a good plan, but, unfortunately, the protocol has not always been followed.

This amendment is simple. It does two things.

First, it prohibits interference by officers or employees of the Federal Government in the direct communication between the Air Force scientists and the Ranch Hand Advisory Committee appointed by the Secretary of Health and Human Services to peer review the scientists' work. This provision is consistent with the ranch hand study protocol, and the Air Force scientists themselves have documented cases of such interference in the past.

Second, it requires the Secretary of Defense to submit annual, nonduplicative progress reports on the ranch hand study. The Air Force consistently submits Ranch Hand reports years later than they are due. This provision is intended to push the Air Force to keep to their schedule or at least explain why reports are held up.

Finally, Mr. President, I should point out that the provisions of this amendment have passed the Senate three times as part of omnibus agent orange bills: on October 18, 1988, by voice vote as part of an amendment to S. 2011, the fiscal year 1989 omnibus veterans' compensation bill; on August 3, 1989, as part of S. 1153, the Daschle-Kerry-Cranston agent orange bill, after a motion to table failed 8 to 92; and on October 3, 1989, by voice vote as part of an amendment to S. 13, the fiscal year 1990 omnibus veterans' compensation bill. The provisions were also included in the Senate Veterans' Affairs Committee's reported version of S. 2100 the fiscal year omnibus veterans' compensation bill.

I urge adoption of the amendment and yield the floor.

Mr. NUNN. Mr. President, this amendment prohibits Government employee interference in the direct communication between the Ranch Hand Advisory Committee, a peer review body and Air Force scientists conducting the Ranch Hand agent orange study. This has been cleared on both sides.

RANCH HAND ADVISORY COMMITTEE

Mr. SIMPSON. Mr. President, I rise in opposition to the amendment offered by the Senator from South Dakota [Mr. DASCHLE].

This amendment is an expansion of a provision that has been passed by the Senate three times and is now pending in S. 2100. It is, however, not identical to the provisions the Senate has already passed and the Veterans Affairs Committee has approved.

The provision says that the Ranch Hand Advisory Committee may communicate directly with the Ranch Hand scientists and vice versa. It says that no Federal Government officer of employee may interfere with or impair that direct communication.

There is no evidence that this provision is needed. Senator DASCHLE wrote to Col. William Wolfe, one of the ranch hand scientists, in July 1987 to ask what contacts the scientists had had with administration officials and what effect the contacts has on "free flow of data and the scientific validity" of the work.

Colonel Wolfe responded by detailing two specific contacts and continuing administrative action. And this is what he reported:

First, a doctor with the Office of Science and Technology Policy of the White House asked the scientists to verify baseline report results—an effort that was already underway;

Second, the scientists met with staff of the Office of Science and Technology Policy to provide an update on the study, but no technical direction was offered; and

Third, the Air Force Surgeon General and Air Force Systems Command have had no control over the science of the study although AFSC does manage funding and personnel resources.

There is simply no reason to adopt this provision at this time. Not only is there no evidence that it is needed, to do so is simply overkill and unnecessary.

I suppose the idea is to pass this piece of agent organge legislation—which the House has never approved, and hopefully will not—in bits and pieces in the hopes that the House will overlook them and eventually find that it has approved the whole package.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 2585) was agreed to.

Mr. McCAIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2586

Mr. NUNN. Mr. President, Senator WARNER and I have an amendment that has been cleared on both sides. We are joined by Senator INOUYE on this amendment.

Since we marked up the authorization bill, the committee has determined that funds requested for fiscal year 1991 are excess to the needs of several programs.

Also the committee has determined that several meritorious programs are not accurate funding in the President's budget for fiscal year 1991, and in the case of another program, the NBC reconnaissance system, NBCRS, which committee terminated due to the apparent lack of service support, the Army since persuaded the committee of its commitment to this program.

The amendment we propose would rectify this funding and balances.

AMENDMENT NO. 2586

(Purpose: To authorize additional funds for certain programs)

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for himself, Mr. WARNER, and Mr. INOUYE proposes an amendment numbered 2586.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 216, between lines 9 and 10, insert the following new section:

SEC. 1206. ADDITIONAL AUTHORIZATION OF APPROPRIATIONS.

(a) ARMY.—(1) In addition to the amount authorized to be appropriated by section 101(5), there is hereby authorized to be appropriated for fiscal year 1991 for the Army for procurement of the Nuclear Biological, Chemical Reconnaissance System $36,914,000.

(2) Notwithstanding section 201(1), not more than $5,691,000 is authorized to be appropriated for the Army for fiscal year 1991 for research, development, test, and evaluation.

(b) NAVY.—In addition to the amount authorized to be appropriated by section 102(a)(1), there is hereby authorized to be appropriated for fiscal year 1991 for the Navy for procurement of the Battle Group Passive Horizon Extension System $5,163,000.

(c) AIR FORCE.—(1) Notwithstanding section 103(2), not more than $6,728,957,000 is authorized to be appropriated for fiscal year 1991 for the procurement of missiles.

(2)(A) In addition to the amount authorized to be appropriated by section 201(3), there is hereby authorized to be appropriated for fiscal year 1991 for the Air Force for the research, development, test, and evaluation $4,000,000.

(B) Of the amount authorized to be appropriated pursuant to subparagraph (A) of this paragraph and section 201(3), not more that $15,000,000 shall be available for the Advanced Electro-Optical System.

(d) DEFENSE AGENCIES.—In addition to the amount authorized to be appropriated by section 201(4), there is hereby authorized to be appropriated for fiscal year 1991 for the Defense Agencies for research, development, test, and evaluation for single-pulse excimer laser technology $30,000,000.

Mr. NUNN. Mr. President, since we marked up the authorization bill, the committee has detemined that funds requested for fiscal year 1991 are excess to the needs of several programs. Also, the committee has determined that several meritorious programs are not adequately funded in the President's request for fiscal year 1991. In the case of another program, the NBC reconnaissance system [NBCRS], which the committee terminated due to an apparent lack of service support, the Army has since persuaded the committee of its commitment to this program. The amendment we propose would rectify these funding imbalances.

The Army has recently restructured its Antisatellite Weapon Program. As a result, $6 million in fiscal year 1990 and $49.4 million of the funds requested for fiscal year 1991 are excess to program needs. In addition, the fiscal year 1991 request for advance procurement for long-lead items for the Defense Meteorological Satellite Program [DMSP] is larger than required. Also a reduction of $5 million to the TR-1 Reconnaissance Aircraft Research and Development Program, described in the classified annex to the report, was inadvertently left out of the tables in the report.

The amendment we proposed would reduce the amount authorized for fiscal year 1991 for Army research, development, test, and evaluation [RDT&E] for the Asat Program by $55.4 million; for Air Force RDT&E for the TR-1 by $5 million; and Air Force missile procurement for the DMSP by $20.7 million, for a total reduction of $8.1 million. These reductions would be offset by authorizing additional funds for four programs totaling $8.1 million.

The first of these programs is a modification aboard the ES-3A aircraft which will allow automatic passive electronic reconnaissance: the battle group passive horizon extension system [BGPHES].

The Armed Services Committee denied the fiscal year 1991 funding request for both procurement of the airborne payloads and research and devlopment of the associated surface terminals due to the fact that full funding of the teminals was not presented in the current 6-year defense plan.

Subsequently, the Navy has indicated that restoration of the procurement funding will allow completion of the operational evaluation and ready the system for fleet implementation during fiscal year 1992, an action required independently from surface terminal installation.

By providing the $5.2 million requested for this purpose, this amendment will ensure that operational introduction occurs on the original Navy schedule.

The amendment also authorizes an additional $9 million for the Air Force's Spacetrack Program to enhance the Nation's capabilities to detect, identify, and characterize satellites, other space objects, and space debris. These funds, together with $6 million already recommended in this bill for this purpose above the requested level, begin an upgrade of the telescope and facilities of the Service's Maui Optical Station, know as AMOS. This upgrade project has been designated the Advanced Electro-Optical System by the Air Force.

The contract savings in the antisatellite program give the Senate the opportunity to more adequately fund this needed project.

The AMOS upgrade can contribute to meeting the Air Force's research, development, and operational requirements in the space surveillance area. It also will address the needs of the National Aeronautics and Space Administration and other Federal agencies. AMOS has a long history of fulfilling these requirements, and this enhancement will strengthen its capabilities for the next decade and the 21st century.

The amendment also would restore funding for procurement of the Army's NBC Reconnaissance System [NBCRS], which the Armed Services Committee denied due to concerns that the Army had not planned to procure enough vehicles to justify adding another logistical burden. Since the committee marked up the authorization bill, however, Mr. Stephen Conver, the Assistant Secretary of the Army for Research, Development, and Acquisition, has written the committee explaining the Army's position on the importance of this vehicle and its rationale for planned procurement quantities. Mr. Conver also stated: "NBCRS ranks high on our list of those items of modern equipment we would procure should additional funds become available in the future." The committee recommends restoring funding for this program.

Finally, the amendment would authorize $30 million for single-pulse excimer laser technology development and experimentation. The committee believes this technology represents an important alternative to other laser technologies now being pursued. The committee directs that DARPA administer these funds for the following purposes on a competitive basis: First, DARPA should provide funds, in cooperation with the Air Force, the Army, and the national laboratories to demonstrate the capability to construct a low-cost, single-pulse laser device at

higher power levels than those devices currently existing; second, DARPA should augment, as necessary, programmed funds from the Navy and the Army to construct and demonstrate a system to image space objects at low Earth orbits at high resolution, and ensure that the Army and Navy efforts are coordinated and complimentary; and third, DARPA should conduct atmospheric conversion and compensation experiments at ultraviolet wavelengths.

Mr. INOUYE. Mr. President, this amendment includes, at my suggestion, an additional $9 million authorization for the Air Force's Spacetrack Program. These funds would enhance the Nation's capabilities to detect, identify, and characterize satellites, other space objects, and space debris.

The funds, added to the $6 million already recommended in this bill for this purpose at my request, being an upgrade of the telescope and facilities of the service's Maui Optical Station, known as AMOS. This upgrade project has been designated the Advanced Electro-Optical System by the Air Force.

I want to thank the distinguished chairman and ranking minority member of the Senate Armed Services Committee for their cooperation on this matter. The Armed Services Committee's willingness to authorize a total of $15 million above the budget request for my initiative testifies to the important contribution this project can make to our national security.

I also am gratified that at least 60 percent of the funds we have allocated for this project in fiscal year 1991 can be financed through contract savings from other defense projects.

The AMOS upgrade can contribute to meeting the Air Force's research, development, and operational requirements in the space surveillance area. It also will address the needs of the National Aeronautics and Space Administration, other Federal agencies, and civilian universities throughout the Nation.

AMOS has a long history of fulfilling these requirements. AMOS and its associated installation, the Air Force's Maui Optical Tracking and Identification Facility [MOTIF], make significant contributions to the Air Force's space surveillance Network.

The advanced electro-optical system enhancement will strengthen AMOS' capabilities for the next decade and the 21st century.

Mr. President, the AEOS upgrade project would increase the size of AMOS' current 1.6-meter telescope to one which is almost 4 meters in diameter. This new, more sensitive and precise instrument would be installed in a special modular facility designed to undertake several space tracking experiments almost simultaneously.

More modern and effective sensor and data measurement packages would replace the current, performance-limited instrumentation.

The results of this upgrade include much higher resolution of space objects for imaging and identification purposes; increased sensitivity for measuring key satellite characteristics; and increased mission availability.

Mr. President, the Air Force already has invested funds for preliminary design of this project, and I have been informed that the full $15 million can be obligated during fiscal year 1991.

The AMOS Advanced Electro-Optical System project is a militarily wise and fiscally prudent investment. It deserves the Senate's strong endorsement.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Georgia.

The amendment (No. 2586) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HISTORICALLY BLACK COLLEGES AND UNIVERSITIES

Mr. WARNER. Mr. President, I have cosponsored the timely amendment to support historically black colleges and universities introduced by my colleague and dear friend Senator NUNN. The provisions in this amendment provide the Secretary of Defense with new authority to provide aggressive assistance to those historically black colleges and universities that are striving to participate in defense research and development programs and contracts. This new authority has been added to the 1207 program instituted in 1986 to achieve participation by small and disadvantaged businesses, historically black colleges and universities and minority institutions in at least 5 percent of the value of Department of Defense contracts.

I am priviledged to represent in Virginia five of our Nation's historically black colleges and universities. They are: Hampton University of Hampton, Norfolk State University of Norfolk, St. Paul's College of Lawrenceville, Virginia State University of Petersburg, and Virginia Union University of Richmond.

Over the years I have closely monitoried the achievements of the President's White House Initiative on Historically Black Colleges and Universities. Federal agencies across the board have worked to include such institutions in important research, education, and development programs. Furthermore, the White House Initiative, particularly under former Director Dr. Margaret Seagears, has served as a catalyst in drawing support from the private sector.

I am, therefore, very pleased to lend my support to this important amendment. We have a total of 115 historically black colleges and universities in the Nation; it is my hope that they will all stand to benefit from this increased commitment on the part of the Department of Defense.

Mr. KERRY. Mr. President, I rise today to raise a problem that is in urgent need of remedy if we are to avert a crisis situation in the fishing port of New Bedford. The IRS is asking 100 boat owners in the port to pay over $10 million in taxes that might possibly be owed by former crew members on their boats, effectively driving them out of business. The loss of this port, the No. 1 dollar fishing port in the Nation last year, would be a great tragedy for the Nation. Furthermore, Mr. President, if the IRS is successful in their current audit, other fishing communities around the Nation will certainly follow.

The heart of the issue is whether crew members on small fishing boats are self-employed, in which case they pay their own taxes, or employees, in which case boat owners are required to withhold taxes. Congress already answered this question in 1976, when the Internal Revenue Code was amended to explicity state that crew members on small fishing boats are self-employed. Two conditions were imposed. The boats must normally carry less than 10 crew members and payment must be made based on a share of the catch.

This system has worked just fine for 10 years, with the IRS conducting audits and upholding the self-employment status. Then in a recent audit, IRS suddenly ruled that crew members were really employees and have assessed 100 boat owners $11 to $12 million in taxes.

According to the IRS, a boat of "normally" less than 10 has less than 10 people "more often than not" in any given quarter of the year. The industry interpreted normally to mean "on average" over the full year, a perfectly legitimate definition. IRS based their definition of normally on an internal IRS General Council Memoradum (G.C.M. 39148). This document was not something that the fishing industry was aware of. It was never published in the Federal Register. The IRS publication "Guide to Commercial Fishing" says that the crew must normally be fewer than 10, but does not define normally or mention the memorandum. Even if they had known about it, the memorandum clearly states at the top that the document "is not to be relied upon or otherwise cited as a precedent by taxpayers."

The second issue has to do with payment based on the share of the catch. In fact, most crew members are compensated exclusively on the basis of catch. However, it has for hundreds of years been customary to pay the cook, first mate, and engineer a small payment in addition to the share of the catch in recognition of additional duties. This custom is common around the country. In New Bedford, it is called a "pers" payment and it accounts for only 1.5 percent to 5 percent of a crew members salary. So for example, a crew member making $30,000 a year received $500 in pers. Let me repeat this to be clear. Even in the limited cases where some compensation above the share of the catch payment is received, it is a tiny fraction of their total compensation.

In 1977, IRS issued Revenue Ruling 77-102 stating that a pers payment would subject the entire salary to withholding. In response to this, the industry initiated a "sliding scale" per from $24.50 to $25.50 depending on catch. IRS again conducted audits without questioning this. Now they have ruled that this sliding scale is a sham and that entire salaries, not just the pers portion, were subject to withholding.

Let me emphasize here that the boat owners conducted their business as they always have. They paid crew members without any withholding and filed 1099 forms with the IRS. This is how it has always been. This is how Congress said it should be.

Allow me to explain what really happened here. The IRS in conducting their audit discovered that 45 percent of crew members were not even filing their taxes. This is a very serious problem which no one condones and which IRS must remedy. IRS is going after many of these crew members telling them, by the way, that they were self-employed and were, therefore, liable for their own taxes. But because it is difficult to track down many of these people, they turned instead to the boat owners. But the boat owners have already paid out this money and asking them to pay again will drive most of them out of business. Furthermore, they did not ask the boat owners to pay just for the 45 percent of crew members who did not pay. They asked them to pay for all crew members unless the boat owners could prove that these taxes had been paid.

Let me be a bit more clear. The IRS is demanding that these boat owners pay all of the taxes for all of the crew members back to 1985, despite the fact that these crew members were paid on the assumption that they would pay their own taxes. Mr. President, these boat owners are very small businesses. They do not have the capablity of paying these taxes and mass bankruptcy will certainly ensue if the IRS insists on following through on this.

The amendment that I am proposing takes care of this problem by changing the normally provision to read "ten or fewer" rather than "fewer than ten." This allows the boat owners, who usually carry 9 or 10 crew members, to meet the normally requirement. The amendment also allows a de minimus pers payment to allow for these small payments that have been given for hundreds of years. And it is retroactive to tax year 1985, the initial year of this audit. There is precedence for retroactivity. When Congress changed the Tax Code in 1976, it was made retroactive to take care of the massive confusion that occurred when IRS tried to change the rules the first time.

It is with great urgency that I bring this matter to the attention of the Senate. IRS is already placing liens on properties and is awaiting a signal from Congress before seizing boats. If IRS is successful in their actions, it will virtually close the port of New Bedford, as well as set a precedent that will threaten many other fishing ports around the country. In New Bedford, such damage to the fishing port will be devastating to this important city's economy, an economy already suffering a deep recession with an 8.3 percent unemployment rate and growing.

Mr. President, I wanted to bring this problem to the attention of the Senate and specifically ask the chairman of the Finance Committee for his help in working on a solution to this difficult problem. Senators PACKWOOD and MITCHELL have already shown strong support, as has Senator KENNEDY.

Senator BENTSEN. I understand the seriousness of the situation these fishermen are facing and the need to get this matter resolved in a timely fashion. I would be happy to work closely with the Senator from Massachusetts to try to develop a solution that could be included in a more appropriate vehicle this fall.

COHEN-BIDEN HIGH-TECHNOLOGY ANTIDRUG AMENDMENT

Mr. BIDEN. Mr. President, the purpose of the Cohen-Biden amendment is very simple: To harness the expertise of America's leading scientists and engineers in the fight against the international drug trade.

The notion of harnessing high-technology weapons in our fight against drugs is not far fetched. In testimony before my committee, leading scientists previewed their work on advanced counterdrug technologies.

Scientists at Los Alamos National Laboratory are investigating how lasers can be used to detect remote cocaine processing sites in the Andean jungle.

Experts at the Defense Advanced Research Projects Agency [DARPA], the research arm of the Pentagon, are examining super-sensors that can be used to detect the chemical "smell" of cocaine in cargo shipments; and officials at the Customs Service are exploring look-through radar imaging to detect false compartments in aircraft, boats, and containers.

The Defense authorization bill is an appropriate vehicle for this amendment. Many of the most promising technologies have already been developed by the Pentagon for military purposes. U.S. taxpayers have already footed the bill for this research. Now it's time to adapt these innovations to our fight against drugs.

In conclusion, Mr. President, I want to say that new weapons to fight drug traffickers are no substitute for reducing the demand for drugs through prevention and treatment. But until demand can be reduced our battle against the traffickers must continue.

These technologies offer new promise that our undermanned, underarmed, and underfunded forces will soon have new weapons to control the drug flow into this country.

Finally, I want to thank Senator COHEN for his effort and leadership on this amendment.

SOME UNCLASSIFIED QUESTIONS SETTING A FRAMEWORK FOR THE START DEBATE

Mr. HELMS. Mr. President, on June 13 I wrote to Secretary of State Baker setting forth a series of unclassified questions intended to establish a framework for the upcoming debate on the START Treaty.

Indications are that such a treaty may be signed by President Bush and President Gorbachev in November or December. Much work remains to be done, not merely on the technical details of the treaty, but on fundamental conceptual problems which have been deferred. The questions which I posed to Secretary Baker are designed to focus the debate—and the current negotiations—on various contradictions and ambiguities in the framework of discussion.

In my view, Mr. President, the time to resolve these ambiguities is before the negotiations are completed and not after. Unfortunately, I have not received a substantive reply to my unclassified questions.

I now realize that these questions are not easily answered—that is to say, not easy if the ambiguities and contradictions are not resolved, or if there is no intent to resolve them. But I believe that the American people are more interested in a clear and unambiguous treaty, even if it takes a bit longer, than a muddled and imprecise treaty—if that is all we can get by November.

Mr. President, I have tried to make these questions as accurate and as informed as they can be in an unclassified mode. Of course, there could be more detail in classified questions, but it would not change the basic issues

raised by each series of questions. What worries me is that an unnamed State Department official was quoted in a press account as saying that these questions were "appallingly well-informed."

Mr. President, I reiterate that the American people should be well-informed, and that the questions should be answered. The American people want and deserve a treaty that will not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union. In fact, that is exactly what the law states—thanks to the Jackson amendment to SALT I in 1972.

Earlier this year, a group of eight Senators wrote to the President's National Security Adviser, General Scowrcroft, raising the question of whether the proposed START Treaty would limit the United States to inferior levels. General Scowcroft replied as follows:

I can assure you that the administration is fully cognizant of the provisions of the Jackson amendment. Any [START] Treaty the President submits to the Senate for its advice and consent will not limit the United States to levels of strategic forces inferior to the limits provided for the Soviet Union.

Mr. President, General Scowcroft's reply is important, and a step in the right direction. Yet it is difficult to reconcile this lofty goal with the ambiguities and imprecisions which currently pervade the negotiations. The questions which I have sent to Secretary Baker are an important first step in establishing a dialog between the administration and those Senators who are deeply concerned with the inequalities inherent in the terms of the negotiations.

The constitutional obligation of advice and consent does not begin only when the treaty is signed and sent to the Senate; rather this obligation is intended to obtain a treaty which will generate the widest possible agreement and speedy approval in the Senate. That is why it is important that these questions be answered promptly.

Mr. President, I ask unanimous consent that the following items be printed in the RECORD at the conclusion of my remarks:

First, my letter of June 13, 1990, to Secretary Baker;

Second, the sequence of unclassified questions attached to that letter.

Third, the letter on May 23, 1990, signed by eight Senators and sent to General Scowcroft;

Fourth, General Scowcroft's reply on May 30, 1990.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington DC, June 13, 1990.

Hon. JAMES A. BAKER III,
Secretary of State, Department of State, Washington, DC.

DEAR JIM: I was glad to be able to speak with you yesterday at the Republican Policy Lunch, even though I had to miss the Foreign Relations Committee hearing on the Washington Summit.

Jim, the attached questions on START are designed to set a framework for the Senate's debate on this forthcoming, important Treaty. As you know, the Jackson Amendment to SALT I required equal levels of forces in any future U.S.-Soviet strategic arms control treaty. General Scowcroft, in a recent letter to me, fully embraced the Jackson Amendment's requirements for equal levels of forces in START. I hope that we can start a dialogue on this issue.

I thank you for addressing these START questions on equality.

Sincerely,

JESSE HELMS.

SEQUENCE OF UNCLASSIFIED QUESTIONS

I greatly appreciate General Scowcroft's prompt May 30, 1990 letter to me. General Scowcroft's letter was in answer to the letter of May 23, 1990, co-signed by myself and eight other Senators, to President Bush about the Secretary of State's recent pre-Summit Ministerial negotiations in Moscow on a proposed START Treaty.

I am pleased that we are in full agreement with the President and his Administration that the Jackson Amendment to SALT I in 1972 must be fulfilled in the provisions of any proposed START Treaty.

The Jackson Amendment states the following main point:

". . . the Congress recognizes the principle of United States-Soviet Union equality reflected in the Anti-Ballistic Missile Treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union . . ."

ADDITIONAL UNCLASSIFIED QUESTIONS ON THE PROBLEM OF ENSURING EQUALITY IN A PROPOSED START TREATY

I. Heavy ICBM Inequalities: Soviet Modernization of Their Monopoly on Heavy ICBMs

1. Do press reports indicate that the new Soviet heavy ICBM first flight-tested in early 1986, when SALT II compliance was still politically required on both sides, now called the "SS-18 Mod 5," has the following new characteristics:

Totally new boosters; completely new propellants; a totally new silo; a completely new silo shock isolation system; much higher accuracy; and especially, up to 20 per cent greater throw-weight than the earlier models of the SS-18?

2. Do these new characteristics make this Soviet missile a "new type" ICBM under the definition of a "new type" ICBM specified by the original 1979-1985 SALT II Treaty, which was not ratified but which both sides declared a "political commitment" to comply with until November, 1986? Do the Soviets still falsely claim to be complying fully with SALT II?

3. Under SALT II, was any new Soviet missile having more than a 5 per cent increase in throw-weight to be considered a "new type" missile?

4. In addition, of course, was there also an absolute prohibition under SALT II of any increase whatsoever in the throwweight of the Soviet SS-18 class of missiles?

5. Thus why should this new-type Soviet heavy missile not also be considered another multiple violation of SALT II, because it was reportedly designed and developed during the original SALT II 1979-1985 period, and was reportedly first flight-tested in early 1986, when SALT II was still in effect?

6. Did these press reports also indicate that there was a severe dispute among U.S. Intelligence agencies over whether or not to declare this new Soviet heavy missile a "new type" ICBM, and therefore whether to designate it the "SS-26?

7. Was this dispute resolved in favor of avoiding admitting that the SS-26 violated SALT II in several ways and would be a START ratification problem, by simply calling it the "SS-18 Mod-5?"

8. Should this new heavy missile be designated a "net type" ICBM under START, and should it therefore have a new designator, the "SS-26?"

9. According to press reports, did U.S. Intelligence recently confirm other evidence that the SS-18 class of missiles indeed has the capability to carry 14 warheads?

10. Can the up to 20 per cent increase in throw-weight in the SS-26 ICBM give this missile the capability to carry more than 14 warheads?

11. In the face of this reported evidence on the capacity of the SS-18 class and the SS-26 to carry at least 14 warheads, why did the U.S. agree that under START the SS-18 class of ICBMs can only carry 10 warheads?

12. The Defense Department's publication *Soviet Military Power* 1989 edition states on page 45: "The increase in the [SS-18] Mod 5's warhead yield, along with improved accuracy, would, under a START Treaty, help allow the Soviets to maintain their hard-target-kill wartime requirements even with the 50 percent cut in heavy ICBMs START requires." Does the Administration agree that the SS-26, if allowed to replace 154 SS-18 class missiles under START, can provide a capability equal to or even greater than the capability of the original Soviet force of 308 SS-18's, as the Defense Department has officially stated?

13. Are 154 SS-26 ICBMs each carrying 10 warheads just as dangerous as 308 SS-18s each carrying 10 warheads, because with the SS-26's greater accuracy and higher yield warheads, this force can use 1 rather than 2 warheads to attack each U.S. hard target, and still achieve the same probability of kill? Is an SS-26 force of 154 in which each missile carries 14 warheads even more dangerous than an SS-18 force of 308 in which each missile carries only 10 warheads? Is a modernized SS-26 force of 154 in which each missile is capable of carrying 20 warheads still more dangerous than an SS-18 force of 308 in which each missile carries only 10 warheads? Will START allow the SS-26 to be further modernized to the point that it could carry 20 warheads, even without demonstrating more than 10 in actual flight tests?

14. Why will the reload/refire capability or the further modernization of the SS-26 not be constrained by START?

15. Why does START, like SALT I and SALT II before it, allow the U.S. absolutely zero heavy ICBMs?

16. Do press reports that the Soviet SS-24 mobile ICBM clearly has greater launch-weight and probably also has greater throw-

weight than the Soviet SS-19 ICBM, the standards for defining heavy ICBMs under SALT II, not make the Soviet SS-24 a heavy ICBM also in further violation of SALT II?

17. Why have both the Reagan and the Bush Administrations not reported to Congress that there is a high likelihood that the Soviet SS-24 is a heavy ICBM under SALT II's definition?

18. If not, why not?

19. Did the U.S. agree at the Washington Summit of 1990 to ban mobile heavy ICBMs under START?

20. Will the Soviet rail-mobile and also silo-deployed heavy SS-24 ICBM be banned under START as an illegal heavy ICBM?

21. If not, why not?

22. If the SALT II standards for defining heavy and new type ICBMs are not to be used in START, what are the new START standards for defining heavy and new type ICBMs?

23. If there are no agreed START standards for defining heavy and new-type missiles, why not use the SALT II standards?

24. Would the SALT II standards make the SS-24, SS-N-23, and SS-26 illegal new-type and also illegal heavy missiles under both SALT II and START?

25. Will START make legal six missiles—the covert mobile SS-16, the heavy SS-19, the super-extra-heavy SS-26, the extra-heavy SS-24, the mobile illegal new type SS-25, and the extra-heavy SS-N-23 SLBM—all of which were illegal under SALT I and SALT II?

II. Inequality in Mobile ICBMs

Background: At the June, 1990 Washington Summit, the U.S. agreed to allow up to 1,100 warheads on mobile ICBMs under START. Since the Soviets reportedly are estimated to be planning to deploy 3,300 ICBM warheads under START, that means almost exactly one third of these will be mobile ICBM warheads. But so far, the Soviets have a total monopoly on mobile ICBM deployment.

Questions:

1. According to press reports, do the Soviets already have deployed about 200 totally covert SS-16 truck-mobile ICBMs, and are they reportedly planning to deploy by 1991 about 310 SS-25 camouflaged and concealed truck-mobile ICBMs, both with single warheads each, and possibly almost 70 totally undetectable, deceptively concealed SS-24 10-MIRV rail-mobile ICBMs?

2. Thus have the Soviets probably already deployed or planned to deploy at least about 1,210 mobile ICBM warheads, and are they therefore probably already very close to the 1,100 START sublimit on mobile ICBM warheads?

3. How will the Soviets probably comprise their mobile ICBM force allowed under START, between truck-mobile single warhead ICBMs and rail-mobile 10-MIRV ICBMs?

4. According to open sources, does U.S. Intelligence estimate that each Soviet truck or rail-mobile ICBM launcher has up to 5 refire missiles?

5. How will refire missiles on Soviet mobile ICBM launchers be constrained in START? Will camouflage, concealment, and deception of Soviet refire missiles for mobile ICBMs be allowed? According to press reports, is there any evidence that Soviet ICBM storage and support facilities are associated with stockpiled mobile ICBMs that have concealed, mobile command and control capabilities nearby?

6. According to press reports, do SS-24 rail-mobile ICBM launchers have long sheds to conceal their trains at their support bases, and are there a large number of remote railspurs and over 1,000 rail tunnels that could also be used for concealment and deception by the rail-mobile SS-24?

7. Will camouflage, concealment, and deception be allowed in the operation of Soviet mobile ICBM forces allowed under START? How well will the U.S. be able to monitor and verify Soviet mobile ICBM deployments under START, in precise terms of probability of detection percentages, in particular the rail-mobile SS-24 carrying 10 warheads on each missile?

8. How confident can the U.S. be in our monitoring and verification of Soviet deployment of the concealed and deceptive rail-mobile SS-24 ICBM? Will the Soviets have a high pay-off in maintaining a covert force of 10 MIRV SS-24s? If the Soviets declare that they have stopped deploying SS-24 rail-mobile ICBM launchers, can U.S. Intelligence rule out the possibility that such deployment has continued covertly?

9. According to press reports, have the Soviets been camouflaging and concealing for several years their SS-25 mobile ICBM launchers deployed at more than seven former bases for the SS-20 missiles banned under the INF Treaty, even during co-operative U.S. National Technical Means inspections required six times a year under the INF Treaty?

10. Does this repeated Soviet non-co-operative concealment and camouflage of SS-25s at former SS-20 bases constitute multiple clear violations of the INF Treaty?

11. Why has this clearly non-compliant Soviet INF activity not been reported in the last two annual Presidential Reports to Congress on Soviet Non-compliance with Arms Control Agreements?

12. Are the Soviets refusing to cease this illegal INF camouflage and concealment?

13. Has the U.S. reportedly demarched the Soviets twice asking them to cease this illegal activity in clear violation of the INF Treaty?

14. Why have the Soviets reportedly twice refused to comply with the INF Treaty, citing an in-applicable section of the INF Treaty allowing concealment during routine missile operations?

15. Does this reported illegal Soviet concealment and camouflage activity in clear violation of the INF Treaty increase our confidence that they will comply with constraints on mobile ICBM deployment under a proposed START Treaty?

16. Will the Administration support and even fight for Congressional funding for deployment of both the U.S. rail-garrison MX and the truck-mobile Midgetman mobile ICBM programs, given the fact that the Soviets currently have a total monopoly on both truck and rail-mobile ICBMs?

17. Was the U.S. negotiating concession in START that mobile ICBMs could be allowed under START contingent upon Congressional funding of deployment of both U.S. ICBM programs? If Congress does not fund deployment of both U.S. mobile ICBM programs in the FY 1991 Defense Authorization and Appropriations Bills, will the U.S. withdraw its START negotiating proposal that mobile ICBMs can be allowed under START?

18. If not, how will this U.S. inequality in the face of a total Soviet monopoly of over 1,100 mobile ICBM warheads impact upon the U.S. ratification debate on a proposed START Treaty?

19. Can a proposed START Treaty be ratified with total and relentlessly growing Soviet superiority in mobile ICBMs?

III. Inequality in Bombers: Over About 510 Soviet Backfire Intercontinental Bombers Excluded From START

Background: According to press reports, the Soviets have already produced about 510 Backfire intercontinental bombers. The U.S. reportedly proposed to the Soviets just before the recent Washington Summit that the Soviets be allowed to have up to 400 Backfire bombers totally outside of START, if the Soviets would only give the U.S. assurances that the Backfire was not capable of intercontinental missions.

Questions:

1. Did the U.S. make such a START proposal?

2. If so, why, when a total of over about 510 Backfires have reportedly already been produced?

3. How could we make such a proposal, and monitor and verify that the Backfire was not intercontinental, when open sources indicate that since 1979 U.S. Intelligence reportedly has evidence to the contrary—that the Backfire bomber has greater range than the Soviet Bison bomber heretofore counted as intercontinental in SALT II, and further, that the Backfire bomber has refueling capability? Did the first edition of *Soviet Military Power,* published in September, 1981, state that the Backfire had both range and radius greater than the Soviet Bison bomber, which counted in SALT II? According to press reports, were both of these facts recently re-inforced by technical and range information on the Backfire from an important Soviet defector?

4. DIA states officially in its unclassified February 1990 Soviet *Force Structure Summary* publication on page 6 that: "The Backfire has an intercontinental strike capability when equipped with a refueling probe." According to press reports, is the Backfire's refueling probe a screw-in tube that can be installed in a matter of hours on every Backfire? Has DIA even more recently reportedly increased its estimate of Backfire's range, due to the defector's new evidence? According to press reports, did the defector confirm that the Backfire: was regularly exercised at intercontinental range, that this intercontinental range was greater than the Bison's, that the Backfire had a screw-in type refueling probe, that this screw-in refueling probe was stockpiled for every Backfire at all bomber bases, and that the Soviets had an active program of camouflage, concealment, and deception to mislead the West about the intercontinental range capability of the Backfire?

5. Is the Backfire's "TU-22M" designator part of the Soviet deception operation, designed to make the Backfire appear merely as a modification to the medium range TU-22 Blinder bomber? In early 1979 according to press reports, as the Backfire's exclusion became an issue in the final stages of the SALT II negotiations, did the Soviets remove the Backfire's refueling probes and fly them so they could be observed in the West, as part of this deception operation?

6. Are the Soviets again trying to exclude all their Backfires, not only their over 200 naval Backfires, from START, in order to be able to continue to produce more than 510 Backfires outside of START?

7. Is the definition of a heavy bomber under SALT II any bomber which has launched an ALCM with range greater than 600 kilometers? According to press reports, was the Soviet Backfire bomber used as the platform for multiple Soviet tests of an ALCM which flew to ranges of about 1,000 kilometers between 1976 and 1978? Did CIA

reportedly cover-up the evidence of these tests, by claiming that since U.S. Intelligence could not identify the type of ALCM involved, the tests were not significant?

8. The second edition of the Defense Department publication *Soviet Military Power* published in March, 1983, states on page 26 that: "The Soviets are developing at least one long-range air-launched cruise missile (ALCM) with a range of some 3,000 kilometers. Carried by the Backfire, the Blackjack, and possibly the Bear, it would provide the Soviets with greatly improved capabilities for low-level and standoff attack in both theater and intercontinental operations." (Emphasis supplied.) Was this reference to a long-range ALCM being carried on Backfire based upon the testing of long-range ALCMs on Backfires during the late 1970s?

9. Has CIA stated in an unclassified letter to Congress that in the absence of SALT II, the Soviets should be assumed to have deployed long-range ALCMs on Backfires? Has SALT II been discarded by the U.S. since November, 1986, due to multiple Soviet violations? Despite the even recent Soviet claims that they are complying fully with SALT II, have the multiple confirmed Soviet violations of SALT II indicated that the Soviets have long been ignoring SALT II?

10. Did the reported Soviet refusal of the reported U.S. concession on allowing 400 Backfires to be excluded from START suggest that the Soviets plan to produce many more than the 510 already produced intercontinental Backfire bombers? Are Soviet START proposals to exclude about 200 naval Backfires even above the U.S.-proposed exclusion statement for 400 Long Range Air Force Backfires, coupled with reported Soviet production of at least 510 Backfires, designed to allow the Soviet to produce over 710 Backfires, or an almost unlimited number of Backfires all outside of START?

11. Why are the Soviets insisting that up to over 710 intercontinental Backfires not be counted in START or in any other arms control agreement?

12. How can the U.S. accept more than 710 intercontinental Soviet Backfire bombers completely outside of any proposed START Treaty?

13. How many more Backfires could the Soviets produce outside of START during the 15 year term of START?

14. If Backfires are excluded from START, will they be constrained under a CFE Treaty, or any other arms control treaty?

IV. Inequality in Bombers: About 95 To 150 Bear-Class Naval Bombers Also Excluded From START

1. Do the Soviets have up to about 95 to 150 ostensibly naval intercontinental Bear D, Bear F, and Bear J aircraft that have Reconnaissance, Anti-Submarine Warfare, Electronic Warfare, and Command and Control/Naval Surveillance missions?

2. Could these intercontinental aircraft also carry nuclear weapons either internally or externally, or both?

3. Are the Bear F and Bear J intercontinental aircraft reportedly actually still in production, like the START-accountable Bear H?

4. Will these three classes of naval Bear-class bombers, the Bear D, F, and J, be excluded from START? If so, why? Will their exclusion be accompanied by required Functionally-Related Observable Differences [FRODs]?

5. How many more Bear Fs and Js could the Soviets produce outside of START during the proposed 15 year term of START?

V. Inequality in Bombers: Over 45 to 150 Existing LRA Bears May Also Be Excluded From START

1. Do the Soviets also have over 45 to 150 Long Range Air Force Bear A/B/C and G intercontinental bombers, also all capable of carrying long-range ALCMs both internally and externally?

2. Will these four classes of 45 to 150 intercontinental, older Bear bombers also be excluded from START ALCM limits?

3. If so, why? Will FRODs be required?

4. Background: The first edition of *Soviet Military Power*, published in September, 1981, stated that the range of the AS-3 Kangaroo ALCM was 650 kilometers, and that the AS-3 Kangaroo was carried on the Bear G class. Thus the AS-3 Kangaroo's 650 kilometer range should have caused the approximately 90 Soviet Bear Gs to be classed as "heavy bombers equipped for cruise missiles capable of a range in excess of 600 kilometers" under the Data Exchanges of the SALT II Treaty. Instead, in their SALT II Statements of Data of both November 1, 1978, and June 18, 1979, the Soviets *falsely* stated that they had "*zero* heavy bombers equipped for cruise missiles capable of a range in excess of 600 kilometers."

Questions:

1. Were these false Soviet statements examples of Soviet negotiating deception in SALT II? Should the Soviet Bear G class of bombers be counted ALCM carriers in START ALCM limits, which also has the same ALCM range threshold of 600 kilometers for counting ALCM-carriers? Can the Bear A/B/C also carry the AS-3, or the AS-15, or the AS-X-19? Will the Bear G be counted as a SNDV under START? Will the Bear A/B/Cs be counted as START SNDVs?

2. What happened to the 45 to 150 older Bears in the A/B/C classes? Will these be entirely excluded from START? If so, why? Will FRODs be required?

3. Are any of the original 90 Soviet Bison bombers still operational as tankers? Why will these not be counted in START? What happened to the Bison force of bombers and tankers? Will Bison tankers be required to have FRODs, or to be dismantled under on-site inspection?

VI. Overall START Inequalities: Soviet Covert START Forces

Background: In its published unclassified study dated May 24, 1988, entitled *Breakout, Verification and Force Structure: Dealing With the Full Implications of START*, the Defense Policy Panel of the U.S. House of Representatives Committee on Armed Services concluded that the Administration's claim that START would reduce the Soviets to 6,000 intercontinental nuclear warheads is seriously misleading. The House Armed Services Committee Report stated:

"In summary, the purported START limit of 6,000 weapons is an illusion. In addition to the limit of 6,000 weapons, the Soviets could 'legally'—and are likely to—deploy another nearly 3,000 weapons and could 'legally' have available nearly 11,000 additional weapons that are a source of sudden breakout from START. And, according to that rough yardstick of potential cheating, there could be an additional force of as many as 4,300 more weapons available to the Soviet attack planner.

Conclusion: While these figures can be debated, the message remains. Under a START agreement, the United States must plan for a Soviet force not of 6,000 weapons, but of many, many more." (Emphasis in the original.)

Questions:

1. Does the Bush Administration agree with this conclusion?

2. How does the Administration specifically rebut this conclusion?

3. Will the agreed START counting rule of only 10 warheads on the Soviet SS-18 or SS-26, when they can reportedly carry 14 or 20; the agreed START counting rule of 4 warheads on the Soviet SS-N-23, when it can carry 10; the agreed START counting rule of 8 ALCMs on the Soviet heavy bombers when they can reportedly 18; combine to result in *thousands of Soviet covert or bonus warheads* not constrained by START?

4. Why will stockpiled "non-deployed" mobile-based ICBM missiles be allowed in START, when we know that Soviet mobile ICBMs reportedly have a multiple refire capability? Can their number be effectively monitored?

5. Will "non-deployed" silo-based ICBM missiles be allowed in START? Can their number or their absence be effectively monitored?

6. Will the Soviets be required to destroy the six or more strategic submarine tunnels that the press reports they have constructed? How many stockpiled, "non-deployed," refire SLBMs can these reported six or more submarine tunnels hold? How many stockpiled, "non-deployed," SLBMs will be allowed under START? Will there be constraints on SLBM reload-refire capabilities under START? If not, why not?

7. In addition to covert or bonus warheads, will the Soviets also be able to exclude from START constraints:

Hundreds of stockpiled, "non-deployed," mobile ICBM refire missiles; hundreds of stockpiled, "non-deployed," ICBM silo refire missiles; hundreds of stockpiled, "non-deployed," refire SLBM missiles; hundreds of bombers capable of intercontinental nuclear-delivery; hundreds of concealed and covert road and rail mobile ICBM launchers; and hundreds of concealed and covert air and sea-launched cruise missiles? Will several thousand additional Soviet missiles, bombers, and their warheads thus be excluded from START? Will the Soviets thus be able to have thousands of covert START forces, much as they have now-confirmed covert INF forces?

8. Will the Soviets be able to maintain outside of START covert stockpiled, "non-deployed," ICBM, SLBMs, mobile ICBM launchers, nuclear-delivery bomber aircraft, and strategic cruise missiles? Can U.S. Intelligence monitoring rule this possibility out?

VII. Inequalities in Bombers and ALCMs Under START

Background: General Scowcroft stated in his unclassified letter to Senators of May 30, 1990, that "the 150/210 numbers are *not limits*, but rather *points* beyond which there is no 'discounting' and every additional ALCM counts as one against the START 6,000 warhead limit." Gen. Scowcroft also stated that these 150/210 numbers are merely "an ALCM counting rule."

Questions:

1. Do these alleged discounting "points" or "counting rules" not define or entail *de facto* START constraints?

2. Do they not define levels of forces?

3. Are they not multiple parameters that result in limits?

4. Do they not therefore constitute limits?

5. Does the Administration really seriously intend to make the argument that these obviously unequal "points" or "counting rules" somehow are *not* "levels" or "limits"

that are required to equal under the Jackson Amendment?

6. Why does the Administration use 8 as the START-agreed Soviet ALCM counting rule, and 12 as the maximum number of ALCMs that Soviet heavy bombers can carry, when according to press reports, *the U.S. has visually observed several times that Soviet heavy bombers have a capacity of at least 18 ALCMs?* Does *Soviet Military Power* volume 1989 state that the Soviet Blackjack can carry 24 missiles?

7. Is the U.S. planning to have under START only 90 heavy bombers equipped with ALCMs, all ancient B-52Hs mostly over 30 years old, which would count as carrying only 900 stand-off bomber ALCM weapons?

8. According to press reports, did the U.S. offer the Soviets the 40 percent advantage in heavy bombers with ALCMs as an inducement in order to "sweeten the deal" and get the Soviets to agree to the START bomber/ALCM package?

9. If the U.S. is planning only 90 B-52H ALCM-carrying heavy bombers under START, does the U.S. not forfeit 60 ALCM-carrying heavy bombers with 600 "discounted" or bonus ALCMs, all allowed under START? Why did the U.S. not design its START negotiating position in order to maximize our existing or planned strategic forces, as the Soviets always seem to do?

10. Background: Neither the B-1 nor the B-2 bombers were designed to be ALCM-carrying, stand-off bombers. The B-1 was planned to be an interim penetrating bomber. And the B-2 was also planned to be the future penetrating bomber. Thus neither the B-1 nor the B-2 were planned to be ALCM-carrying-stand-off bombers. Because START implies a sublimit of 1,100 on accountable bomber weapons, the 90 existing deployed B-1 non-ALCM carriers and the up to 75 B-2 non-ALCM carriers now planned for deployment by the Administration will fill out the remaining 200 bomber weapons slots above our 900 planned accountable ALCMs on 90 B-52Hs with a total of only 165 additional bombers, counting as single delivery vehicles and also as single weapons. Thus assuming that we deploy all 75 currently planned B-2s, we would still have a shortfall in our allowed START bomber weapon slots of at least 35 bombers and weapons.

Questions:

1. How do we plan to fill this apparent U.S. shortfall of at least 35 allowed bombers/weapons under START, especially since the original U.S. concept of START "discounting" of ALCM-equipped bombers was supposed to encourage the maximum deployment of more stabilizing bombers? Are these U.S. bomber force "gaps" among the reasons why the U.S. Commander of the Strategic Air Command stated publically that he could not support START unless at least 75 or more B-2s were deployed?

2. In contrast, what will the probable Soviet START heavy bomber/ALCM and non-ALCM bomber force look like? Will the Soviets maximize their existing and planned bomber forces under START? Will they also exclude significant bomber forces from all START constraints?

3. To fill this START bomber shortfall, does the Administration plan new penetrating bomber development programs beyond the B-1 and the B-2?

4. Will the 90 U.S. B-52H ALCM carriers, most of which are already over 30 years old, endure in the U.S. bomber force throughout the planned 15 year duration of START? Does the Administration therefore plan a new heavy bomber stand-off ALCM carrier program beyond the ancient B-52H?

5. Finally, how does the Administration plan to compensate under START for the deactivation of several thousands of previously operational U.S. SRAMs, now reportedly taken off line from alert bombers for questionable safety reasons?

6. According to press reports, the original U.S. program for ALCMs and ACMs was planned to procure 4,400. Under START constraints and bonus "discounting," the U.S. in effect can deploy only 1,800 ALCM/ACMs, a cut of 2,600 ALCM/ACMs. What will the U.S. do with the 2,600 ALCMs and ACMs already procured, programmed, or funded by Congress but prohibited by START?

7. With the continued reported in-operability of all U.S. nuclear weapons production facilities, will the U.S. be able to equip its D-5 Trident II new SLBMs with the required number of warheads in a timely schedule? Can the U.S. currently manufacture components of nuclear weapons? If not, why not? Will this reported nuclear weapons production shortfall cause further delays in the Trident submarine sea trials and Trident II missile programs? How will these nuclear weapons manufacturing problems impact upon the U.S. force structure under START?

VIII. Inequality in Short-range SLCMs

1. According to open sources, does the Soviet Union have seven classes of SLCMs with short-range (range less than 600 kilometers) that are nuclear and non-nuclear equipped—the SS-N-2, the SS-N-3B Mod 2, the SS-N-7, the SS-N-9, the SS-N-12, the SS-N-14, and the SS-N-19?

2. Has U.S. Intelligence reportedly estimated that the Soviets have produced over 14,500 of these short-range SLCMs? Does a recent unclassified letter from Defense Secretary Cheney state that the Soviets produced over 15,000 SLCMs during the 1980s?

3. How many of these SCLMs are estimated to be deployed? According to press reports, do the Soviets reportedly have over 1,000 launchers for short-range SLCMs?

4. What are their ranges?

5. Does the U.S. have any comparable short-range nuclear or non-nuclear SLCMs?

6. What is the status of a "politically binding" commitment on SLCMs in international law and domestic law?

7. What are the origins of this new genre of international agreement? Was the 1981-1982 joint U.S.-Soviet "political agreement" to observe most of the provisions of the unratified SALT II Treaty one of the first agreements in this new genre?

8. The Senate was not even consulted on the 1981-1982 joint U.S.-Soviet "political agreement" on SALT II, and a total of 34 Senators wrote letters to the President stating that they did not approve of it. What role will the Senate have in approving this new kind of "political" agreement on SLCMs?

9. How can such an unusual, new-type "political commitment" agreement be enforced?

IX. TACIT RAINBOW: Inequality in Side Constraints

Background: According to unclassified information from U.S. defense contractors, the ground-launched version of the U.S. nonnuclear TACIT RAINBOW ALCM had a design range of only 430 kilometers, and is therefore well below the newly agreed START threshold of 600 kilometer range for counting ALCMs.

Questions:

1. Due to its apparent short range, why did the U.S. agree to special constraints on modernization or no nuclear-warheads for this ALCM at all?

2. Before any proposed START Treaty is signed, will the Administration provide the Senate Committee on Foreign Relations with a copy of the "side letter" on TACIT RAINBOW that Secretary of State Baker recently gave to the Soviets in Moscow?

3. If not, why not?

4. Will such a "side letter" be submitted to the Senate as part of any proposed START Treaty?

5. Have the Soviets provided the U.S. with any similar "side letters" in START?

6. If so, will they be submitted to the Senate as well before any proposed START Treaty is signed?

X. Overall START Inequalities

1. Will START further enhance the Soviet capability to strike first, by legalizing six already illegal Soviet first strike missiles that violated SALT I and SALT II—the older Soviet heavy SS-19, the covert mobile SS-16, the new extra-heavy SS-24, the new mobile SS-25, and the new super-extra-heavy SS-26 ICBMs, and the new extra-heavy SS-N-23 SLBM?

2. Under START, will the Soviets maintain and expand their rights to deploy six types of several hundred already illegal super-extra-heavy, extra-heavy, heavy, and first-strike ICBMs and SLBMs, while in contrast, will the United States not be allowed any heavy ICBMs and SLBMs whatsoever under START?

3. Will the asymmetrical force structures resulting from the uneven strategic force cutbacks in a proposed START Treaty, when combined with the unequal targeting requirements of the sides, make it easier for the Soviets to strike first with nuclear weapons against American missile, bomber, and submarine bases?

4. Will START also make it easier for the Soviet Union to hit first because it will not even count or reduce several kinds of missiles, bombers, and nuclear weapons that the Soviets have and we do not have?

5. Even with augmented United States' National Technical Means of monitoring and verification, and on-site inspections and other co-operative measures, does the confirmed history of Soviet cheating on all existing arms control treaties, including even the recent INF Treaty, suggest that Soviet cheating will persist under START? Does the allowance under START of continued Soviet camouflage, concealment, and deception also suggest that we will continue to have great difficulty detecting and analyzing Soviet cheating?

6. Could START result in a situation in which the Soviets might have a more than 5 to 1 advantage over the United States in the overall number of nuclear weapons—about 26,000 Soviet weapons compared to only about 5,000 weapons for the U.S.?

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, May 23, 1990.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: Reports of Secretary Baker's trip to the Soviet Union last week for the purpose of drafting a proposed framework statement for a START treaty have raised two profound concerns.

The first is that the Jackson Amendment to the 1972 SALT I Agreement requires, in the language of the Amendment, "equal

levels" of strategic forces in any future treaty between the United States and the Soviet Union limiting intercontinental strategic forces.

Of course, this is still the law of the land on the fundamental U.S. objective in strategic arms control treaties. Yet reports of the meeting between Secretary Baker and Foreign Minister Shevardnadze suggest that the United States conceded to the Soviets a 40% advantage [210 vs. 150] in the number of heavy bombers carrying air-launched cruise missiles (ALCMs), and also a more than two-to-one advantage over the United States [3,700 vs. 1,800] in the potential number of ALCMs carried by these bombers.

Are these reports correct, and, if so, do they meet the spirit and legal requirements of the Jackson Amendment?

Similarly, did the United States agree to a Soviet-proposed range-limitation on sea-launched cruise missiles (SLCMs) which allowed the Soviets to keep several thousand short-range SLCMs against which the U.S. has no equivalent force?

If so, does this agreement meet the spirit and legal requirements of the Jackson Amendment?

Secondly, the Helms Amendment to the INF Treaty states:

"Any joint statement by the United States with the USSR of a framework for the negotiation of strategic arms treaties contemplated hereby, and such framework itself, shall serve for the purpose only of guiding the conduct of negotiations which the United States herein has declared its desire to pursue expeditiously, and shall not constrain any military programs of the United States [emphasis supplied] unless otherwise provided for in accordance with Section 33 of the Arms Control and Disarmament Act."

Section 33 of the Arms Control and Disarmament Act, of course, states that U.S. armed forces may be limited only through the treaty-making power or through further affirmative legislation. Nevertheless, press reports state that Secretary Baker did agree to constrain U.S. military programs in a so-called "side letter" to the proposed START framework statement in which the United States agrees not to modernize the U.S. "Tacit Rainbow" ALCM, and also not to equip this ALCM with a nuclear warhead.

Is it correct that Secretary Baker did agree to such a side letter constraining U.S. military programs? If so, does such a letter meet the spirit and legal requirements of the Helms Amendment to the INF Treaty and to Section 33 of the Arms Control and Disarmament Act?

Mr. President, we would appreciate a response on these matters before the framework statement with the Soviet Union is signed at the forthcoming summit.

Sincerely,

JESSE HELMS, CHUCK GRASSLEY, JIM MCCLURE, STROM THURMOND, TRENT LOTT, STEVE SYMMS, ORRIN G. HATCH, LARRY PRESSLER, MALCOLM WALLOP.

THE WHITE HOUSE,
Washington, May 30, 1990.

Hon. JESSE HELMS,
U.S. Senate,
Washington, DC.

DEAR SENATOR HELMS: This is in response to your May 23 letter to the President asking about the tentative agreements made with the Soviet Union on strategic forces during the May Ministerial in Moscow.

At the outset, I can assure you that the Administration is fully cognizant of the provisions of the Jackson Amendment. Any treaty the President submits to the Senate for its advice and consent will not limit the United States to levels of strategic forces inferior to the limits provided for the Soviet Union.

With respect to ALCMs, let me correct an error that has appeared in certain press reports on this issue. START will not specifically limit the number of ALCMs nor ALCM-carrying heavy bombers. We, like the Soviets, will be allowed to deploy as many ALCM carriers as we choose within the overall START limits of 1600 delivery vehicles and 6000 weapons.

We have agreed to an ALCM counting rule that is clearly in our interest. Up to 150 U.S. bombers could carry 20 ALCMs, but would only count as carrying 10. Up to 210 Soviet bombers could carry as many as 12 ALCMs, but they would count as 8. This counting rule would exclude from the 6000 warhead limit a maximum of 1500 U.S. ALCMs and 840 Soviet ALCMs. The 150/210 numbers are not limits, rather points beyond which there is no "discounting" and every additional ALCM counts as one against the START 6000 warhead limit.

Finally, we have informed the Soviets of the fact that we have no plans to convert the non-nuclear Tacit Rainbow ALCM to a nuclear ALCM. However, nothing in START nor in any other commitment we have made would prohibit such a conversion if that becomes in our interest at some point in the future. If a non-nuclear ALCM were ever converted to a nuclear ALCM, that missile would of course become subject to all of the START provisions on nuclear ALCMs.

With respect to SLCMs, we have achieved the key U.S. negotiating objective. The Soviets sought a provision in the START Treaty that would limit nuclear SLCMs, which we could not accept because there is no effective and acceptable way to verify any such limit. They have now agreed to our proposal for separate U.S. and Soviet political declarations of the numbers of deployed nuclear SLCMs with a range greater than 600 kilometers. We did agree to a maximum number the U.S. could declare at any one time that is well above the number of nuclear SLCMs we have today and expect to have during the period of the treaty.

The Soviets wanted all SLCMs with a range in excess of 600 km included in the declaration. We wanted to restrict the declaration to nuclear SLCMs whose range was above a 300 km threshold. In the end, we reached a compromise: all nuclear SLCMs above 600 km are included in the declaration but the two sides will also exchange data about nuclear SLCMs with ranges between 300 km and 600 km. Since this approach is limited to nuclear SLCMs, it would have no effect on our more than 3000 conventional SLCMs.

We have made good progress in negotiating START. The major, substantive limits have been agreed. That said, there remains much to do before an agreement is complete and can be submitted to the Senate. The President greatly appreciates your interest and hopes that you will support this solid agreement that is in our national interest.

Sincerely,

BRENT SCOWCROFT.

SIMON-BINGAMAN AMENDMENT

Mr. SIMON. Mr. President, now more than ever, the real test of our Nation's strength as a world power is our ability to compete in a global economy. The economic competitiveness of the United States is dependent upon our ability to educate our young people to prepare for the challenges of the future. Our educational achievements, however, do not bode well for the future. In international comparisions, U.S. students rank well below the average in math and science skills. Even our best students ranked next to last in a test involving 13 nations.

Our great research institutions, public and private, need to take greater responsibility for promoting scientific literacy and for educating America's next generation of engineers, scientists, and mathematicians. On June 26, my colleague from New Mexico [Mr. BINGAMAN] and I introduced a bill to encourage Federal agencies and laboratories involved in science and engineering activities to play a leading role in recruiting and training our next generation of science and engineers.

Mr. President, I would like to thank the Armed Services Committee for including many of the provisions of our legislation, as applied to the defense laboratories and the defense-related energy laboratories, in this Defense bill. The amendment I am now offering will simply expand this authorization of education activities to allow the Department of Energy itself to establish education programs.

DOE already has an impressive array of education programs, perhaps more than any agency other than the Department of Education and the National Science Foundation. But when DOE presented its most recent plans for expanded education programs to its lawyers, there were some questions about the breadth of Secretary of Energy's legal authority in this area. This amendment is intended to make the Secretary's authority clear, to allow new education appropriations recently approved by the Senate to go forward.

One of the projects delayed by these legal questions is an innovative effort to provide intensive math and science training to every teacher in the Chicago Public Schools who has any responsibility for math and science education, about 15,000 teachers. This new academy, which had its opening ceremony last week, will tap the human and technological resources of the Argonne and Fermi Laboratories, with some financial assistance from the Secretary of Energy. This project could provide a model for reversing our Nation's declining technological literacy.

Mr. President, my amendment makes one other change in the education provisions already in the Defense bill. For the partnerships between laboratories and elementary and secondary schools, my amendment establishes a priority for programs focusing on women and minorities and others who are underrepresented in science

and engineering professions. We will not be able to meet our growing need for scientists and engineers if we do not dramatically increase the participation of women and minorities in the sciences.

Mr. President, I would like to thank my colleagues from Georgia, Mr. NUNN, and Virginia, Mr. WARNER, and the chairman of the Energy Committee, Mr. JOHNSTON, for working with me on this amendment. I urge its adoption.

DEFENSE DRUG INTERDICTION ASSISTANCE ACT

Mr. D'AMATO. Mr. President, I would like to take this opportunity to thank the chairman and the ranking member of the Senate Armed Services Committee, Senators NUNN and WARNER, for including a version of my bill, the Defense Drug Interdiction Assistance Act, in the fiscal year 1991 National Defense Authorization Act.

The Defense Drug Interdiction Assistance Act, S. 2728, was designed to permit the Defense Department to take a more active role in providing counternarcotics support to civilian law enforcement agencies without violating posse comitatus provisions which prohibit direct military participation in law enforcement activities.

This legislation was drafted due to my concern that the military's ability to assist law enforcement had been hampered by outdated and counterproductive statutes and regulations. The bill would streamline Defense Department procedures and enhance their efforts to support our beleaguered law enforcement agencies.

If we are committed to using the military in the drug war—and let's be clear, this is war—it's absurd to hamstring it from planning, training, or providing reasonable types of assistance.

In March of 1990, I sent this legislation over to the Department of Defense for comment. On May 24, 1990, I filed the bill as an amendment to S. 1970, the crime bill. Unfortunately, it was not part of the final amendment list considered on the crime bill.

Finally, on June 13, 1990, along with 5 cosponsors, I introduced it as a free-standing bill. At that time, I expressed my hope that when the bill was referred to the Senate Armed Services Committee for consideration, the committee would include our language in the Defense authorization bill and report.

Subsequently, my staff met with committee staff a number of times to work on language that would meet the intent of my bill. I would like to commend the committee for their efforts to accommodate my legislation. It is my understanding, that due to a misinterpretation by the Defense Department general counsel of the current language as reported out by the committee, a technical amendment will have to be submitted by the committee to ensure that the intent of my bill is preserved.

I ask unanimous consent that a copy of my June 13, 1990 statement in the CONGRESSIONAL RECORD and a side-by-side analysis of my bill, S. 2728, and counternarcotics provisions contained in S. 2884 be printed in the RECORD.

Again, I thank the committee for their consideration of, and inclusion of, this important legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPARISON OF D'AMATO DEFENSE DRUG INTERDICTION ASSISTANCE ACT AND LANGUAGE INCLUDED IN THE FISCAL YEAR 1991 DEFENSE AUTHORIZATION BILL AND REPORT

D'Amato bill	Fiscal year 1991 Defense authorization
1. Allows the Secretary of Defense to plan and execute military training or operations for the primary purpose of aiding civilian law enforcement agencies.	1. Allows the Secretary of Defense to plan and execute otherwise valid military training or operations for the purpose of aiding civilian agencies.
2. Authorizes the Secretary to provide support (including the provision of any equipment or facility or personnel) to a civilian law enforcement agency if he determines the importance of providing such support outweighs any short-term adverse effect that the provision of such support may have on military preparedness.	2. Authorizes the Secretary to provide support in any case in which the provision of such support would adversely effect in the short term U.S. military preparedness if he determines that the importance of providing such support outweights any short-term adverse effect that the provision of such support might have on military preparedness.
3. Grants a local commander the authority to approve:	3. Encourages approval of requests from civilian agencies to the field level whenever feasible:
A. Transportation by civilian law enforcement personnel by military aircraft within the United States in connection with drug law enforcement programs;.	A. Provides for the transportation of U.S. and foreign personnel and supplies and equipment for the purpose of facilitating counter-drug activities within or outside of the United States.
B. Flight training exercises for civilian law enforcement personnel;	B. Provides for counter-drug related training of law enforcement personnel including support expenses and material necessary to carry out such training.
C. Aerial surveillance of any area in connection with law enforcement programs.	C. Aerial and ground reconnaissance outside, at, or near U.S. borders.
4. Permits the Secretary to provide military personnel to Federal, State, or local law enforcement to operate equipment without regard to the likelihood that an armed confrontation may occur.	4. Continues restrictions on direct participation of military personnel in law enforcement activities, but the Committee acknowledges that military personnel may be exposed to the threat of the use of force against them, particularly on the Southwest border.

[From the Congressional Record, June 13, 1990]

Mr. D'AMATO. Mr. President, I rise today, on behalf of myself and Senators GORTON, DECONCINI, COATS, LOTT, and SPECTER, to introduce the Defense Drug Interdiction Assistance Act.

Congress has continually and substantially increased the resources and activity level of the Defense Department's counternarcotics effort. The commitment of President Bush and Secretary Cheney to an enhanced and expanded role for the Department of Defense in the detection and monitoring of drug trafficking is one which I strongly support.

I am concerned, however, that our military's ability to be a key player in the war on drugs has been hampered by statutes and Defense Department regulations which are either counterproductive or have become outdated. This legislation is designed to enable the Defense Department to take a more active role in providing counternarcotics support to law enforcement agencies.

My legislation does not alter existing posse comitatus statutes and regulations, which prohibit the Armed Forces from directly engaging in law enforcement activities. The bill does refine and clarify the existing statutory language to facilitate the Defense Department's assistance and support to law enforcement agencies. The legislation includes provisions to:

First allow the Defense Department to plan and create missions and training for the primary purpose of aiding civilian law enforcement agencies. Currently, the Defense Department may support law enforcement agencies if such support is incidental to military training. This section raises the priority of the counternarcotics mission, in a way that is compatible with Secretary's Cheney's defense guidance, to a level that it deserves;

Second, authorize the Secretary of Defense to determine whether specific assistance to law enforcement agencies is of sufficient priority to outweigh short-term effects

on military preparedness. The current statute states that any Defense Department support must not adversely affect military preparedness;

Third, grant a local commander the authority to approve the use of military aircraft to provide point-to-point transportation and training flights for civilian enforcement officials within the continental United States. Such authority, according to the present law, is subject to joint approval by the Secretary of Defense and the Attorney General, and, in the case of a law enforcement operation outside of the land area of the United States, the Secretary of State. This process is too cumbersome and should be streamlined;

Fourth, give clear authority for the use of military personnel to surveil areas in which law enforcement agencies support illicit narcotics trafficking;

Fifth, permit Defense Department assistance to law enforcement agencies at any location even if there is a reasonable likelihood of armed confrontation. Military personnel are presently limited to locations where there is not a reasonable likelihood of confrontation. The term "reasonable likelihood" lends itself to broad interpretation and results in unnecessary restrictions on military assistance; and

Sixth, exclude Reserve enlisted members and officers who aid civilian law enforcement agencies from endstrength computations. This provision gives the Reserve Forces an incentive to increase their participation in the counternarcotics mission.

On March 30, 1990, I wrote to Assistant Secretary of Defense Stephen Duncan, the Defense Department's drug coordinator, to request a review of a draft of this legislation. I had further requested that we receive comment by April 17, 1990, in order to prepare for an April 24 Appropriations Subcommittee on Defense hearing on the topic of our military's counternarcotics efforts. Unfortunately, this review is still not complete, although, it is my understanding that comments will be forthcoming shortly.

On May 24, 1990, I filed this legislation as an amendment to S. 1970, the crime bill, which was the pending business during that week. It was my intention to have this legislation discussed and vote on its merits. Unfortunately, it now appears that amendment will not be included on a shortened list of amendments when the Senate resumes debate on the crime bill.

It is my hope that, when this bill is referred to the Senate Armed Services Committee for consideration, the committee will include our language in the defense authorization bill and report. I look forward to working with the committee on achieving this goal.

Mr. President, real wars involve total national commitment, a comprehensive strategy, and enough resources to win. I believe that this bill is a step in the right direction. I urge my colleagues to support this important legislation.

NEW FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTER

Mr. LEVIN. Mr. President, I rise to express my concerns about a provision in the DOD authorization bill which calls for the establishment of a new Federally Funded Research and Development Center [FFRDC] to support the White House Office of Science and Technology Policy. This new FFRDC, established by section 802 of the bill, would be known as the Critical Technologies Institute.

While the goal of this section is a good one, the means to the end are troubling. The goal is to create an entity whose mission would be to identify critical technologies, both defense and civilian, and to develop strategies for the Federal Government to assist in their development. The country needs this type of technological analysis, and I salute Senator BINGAMAN—who is the author of the provision—in his untiring efforts to obtain it. He and I both believe that this country needs to develop a national industrial agenda which will allow us to compete more effectively with Japan and other countries. That includes identifying and developing critical technologies. So I have no quarrel with the purpose and goal of section 802. I am concerned about how is proposes to accomplish that purpose and goal.

For the past 4 years, I have been active in issues involving FFRDC's. FFRDC's are private research centers that provide independent, high-quality advice to the government on complex issues. They receive at least 70 percent of their funding from the Federal Government, operate under a long-term contractural relationship with a sponsoring agency, and provide state-of-the-art expertise. Examples, chosen at random, are the Los Alamos National Laboratory, MITRE Corp. and the Institute for Defense Analysis. Because of the special, high-quality research provided by these centers, they enjoy unusually free access to Government data, are exempt from Government salary controls, and are exempt from procurement requirements applicable to other Government contractors.

In 1987, I held two hearings on FFRDC-related issues. The first examined a situation in which an agency improperly diverted work from a small, high-tech firm to an FFRDC simply to avoid procurement requirements. The second critized a DOD proposal to create a new FFRDC for the strategic defense initiative, because the specific plan for this institute created the possibility of establishing a weak institution which might tell DOD what it wanted to hear as opposed to providing the unbiased advice that is the traditional product of an FFRDC. In 1988 and 1989, I participated in the development and implementation of new regulations on the creation, use and termination of FFRDC's.

These efforts taught me a lot about FFRDC's—both their benefits and costs to the country. That is why I find aspects of the proposal in section 802 disturbing.

First, the section bypasses all of the existing regulations and guidelines for establishing a new FFRDC. These require an agency that is considering establishing an FFRDC to first conduct a "thorough assessment" of existing FFRDC's, agencies and private sector firms to determine whether they could perform the proposed work; to announce and solicit comments on the proposal by placing at least 3 notices over a 90-day period in the Federal Register and Commerce Business Daily; and to produce a written justification, after conducting this assessment and reviewing any comments, for going ahead with the new FFRDC. Section 802 ignores all of these steps without substituting any other procedure for evaluating the plans for this FFRDC, and that disturbs me.

Second, the selection selects the sponsoring agency for the FFRDC. Normally, the sponsoring agency requests and champions the creation of its FFRDC. We're in the reverse situation, and we're not sure that the sponsoring agency actually wants the research center. That uncertainty raises questions about whether the FFRDC will be fully and property utilized.

A third problem is that there is no precedent for linking an FFRDC to an office within the Executive Office of the President. The White House has never before had its own FFRDC. It strikes me that the proximity of a private, well-paid research center may create temptations for the White House to use this center for purposes beyond those for which it was created. I have qualms about creating this temptation. A related problem is the vagueness of the mission assigned to the new FFRDC, as presently worded. Experience has shown that a tightly worded mission statement is critical to avoiding inappropriate use of an FFRDC.

I have discussed concerns about this section with my friend and colleague, Senator BINGAMAN. Because I agree with his objective—to get serious work started on a comprehensive and effective policy of public-private voluntary partnerships to develop future technologies—I will not move to strike sectoin 802 from the bill. I have real concerns, however, about whether this is the appropriate vehicle to get us where we want to go. That is why I am expressing my reservations at this time.

ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT FUNDS AND THE PROTECTION OF LOCAL DRINKING WATERS

Mr. WIRTH. Mr. President, I rise to speak about language in the Committee Report which authorizes protection of local water supplies. The legislation would authorize the Secretary of Energy to reimburse cities whose water is affected by Rocky Flats' runoff for actions those cities take to protect their water supplies. The affected Colorado cities are Broomfield, Federal Heights, Northglenn, Thornton, Arvada, and Westminster. This

legislation was requested by those cities.

For the information of my colleagues, Rocky Flats is located immediately west of Great Western Reservoir and just northwest of Standley Lake. Together, these reservoirs provide drinking water for nearly a quarter of a million people. Historically, runoff from 51 percent of the plant site drains into Walnut Creek, and from there into Great Western Reservoir. Of the site 35 percent drains into Woman Creek, and then into Standley Lake.

The history of the plant is characterized by numerous problems and accidents, which have resulted in on- and off-site contamination. Both of these drinking water reservoirs have plutonium contamination in the sediment at the bottom of the reservoirs and on the surface soils surrounding the reservoirs. Surface water contaminants from the plant have included nitrates, heavy metals, radionuclides, and fecal coliform bacteria. Past management and operation of the plant created a profound mistrust of the public water supplies in these communities. It is time that we did something to restore public confidence.

In 1989 there were a series of incidents that drove public mistrust of the drinking water to a new high. Principal among these were the chromium incident—which resulted in television reports warning of imminent contamination of Great Western Reservoir—the FBI raid, and the atrazine incident. All of these incidents were well-publicized and created a situation approaching panic among some residents.

Following last year's FBI raid, the City of Broomfield built a temporary diversion ditch to channel water from the plant's "Pond B-5" around Great Western Reservoir. This spring, the Department of Energy built a temporary pipeline to channel the plant's "Pond C-2" water into the temporary Broomfield ditch, protecting Standley Lake. These are temporary measures to protect the reservoirs from planned releases. They cannot protect against accidents or storm events.

At the most basic level, it is clear that runoff from a nuclear weapons plant should not drain into public drinking water supplies. This language encourages local projects to change that physical relationship, to alter the structural, big-picture relationship between the Rocky Flats plant and the public water supplies.

The cities involved are ready to embark on the first step toward a permanent solution. When they are finished, Great Western Reservoir would no longer be used as a drinking water supply, and Standley Lake would be protected against runoff from the plant, up to and including a 100-year storm event. This first step allows for an interim solution that is consistent with that ultimate solution, but that will not require lengthy procedural reviews. It accomplishes much of the protection of the permanent solution, but at half the current cost. The anticipated costs of these first steps, which can be done immediately, are $34.7 million. This includes $21.5 million for replacement of water rights from Great Western Reservoir, and $13.2 million for structural barriers to protect Standley Lake.

As I indicated, these projects are the first part of a larger design which severs the physical connection between Rocky Flats and the cities' drinking water. It is expected that the final design will require future funds for additional structures protecting Standley Lake and for construction of a pipeline, reservoir, and treatment plant to fully replace the Great Western Reservoir municipal water supply system. These projects provide interim protection of the region's municipal water supplies, avoiding the possibility of accidental contamination from existing contaminants, from cleanup related activities, or from continuing operations of the Rocky Flats plant. With the increased funding made available to the Environmental Restoration and Waste Management account, the affected cities can apply to DOE for reimbursement of these costs.

The solution to the water problem was identified by a series of working groups pulled together by Congressman DAVID SKAGGS, in whose district—my former district—Rocky Flats is located. The group included Representatives of the Department of Energy's Rocky Flats Office, the Colorado Department of Health, the Colorado Governor's Office, the U.S. EPA, Jefferson County, and the affected cities. The ultimate solution, identified by the working group as "Option B" will ultimately cost some $70 million, so the $34.7 million that can be done now represents about half of what ultimately will be needed.

The Secretary of Energy may use funds in the Environmental Protection and Waste Management account to reimburse the cities for costs borne in implementing the projects, provided that the projects are consistent with "Option B" as identified in the final report of Congressman Skaggs' option identification group. This package does not involve DOE property or facilities, and does not require DOE to play more than an administrative role. Because of this, the cities anticipate that no NEPA review will be required. This means that steps can be taken immediately to correct the water problem of the northern metro cities.

In addition to "Option B" the cities, DOE, EPA, and the Colorado Department of Health agree that a water management plan should be implemented to attempt to achieve zero discharge of contaminants from Rocky Flats plant. This water management plan was identified in the Skaggs group's report as "Option J" and is estimated by DOE's Rocky Flats office at $49 million. However, when "Option B" and "Option J" are both installed, there is a $9 million savings as compared to the two projects viewed separately.

I believe that the Federal Government bears a substantial responsibility for protecting drinking water supplies affected by defense nuclear facilities. I think it is reasonable to ask the Federal Government to assist in funding projects essential to protect drinking water supplies from contaminants of upstream defense nuclear facilities.

Mr. President, in closing I would like to thank Mr. Matthew Glasser, the city attorney for Broomfield, CO. Matt's assistance in working on this issue has been invaluable. I also want to thank Mayors George Hovorka, Lynn Easton, Don Parsons, Margaret Carpenter, and Bob Schulze for their leadership in representing the interests of the north metropolitan cities. By working together, these municipal leaders have proven to be very effective in protecting the health of their constituents.

AIR FORCE GEOPHYSICS LABORATORY

Mr. KENNEDY. Mr. President, I had an amendment that I had planned to offer at this time.

Mr. President, the continued enhancement and analysis of data from high-performance seismic networks in the U.S.S.R. and other countries is essential to the improvement of our nuclear test verification capabilities.

The nuclear test verification mission has long been performed by the Air Force.

To improve Air Force capabilities to monitor treaties, the Department of Defense supports a number of seismic research programs. A program of considerable interest to Members of Congress involved in verification issues is the U.S.-Eurasian Seismic Studies Program [SSP]. This cooperative university research program with the Soviet Academy of Sciences is supported by grants from the National Science Foundation.

For the last 3 years, this NSF support has been augmented by a congressionally initiated increase to DARPA's Nuclear Monitoring Program.

This Seismic Studies Program is carried out by a nonprofit national consortium of 71 colleges, universities, and institutes known as the Incorporated Research Institutions for Seismology, commonly known by its acronym, IRIS. The seismic data being collected by this program is useful for basic geophysical research, monitoring of United States and Soviet underground nuclear explosions, earthquake

prediction, and earthquake hazards assessment, particularly in Soviet Armenia and other geologically unstable regions of the U.S.S.R.

However, as the chairman knows, despite the multipurpose value of this scientific research, and the high level of congressional interest as expressed by significant add-ons to DARPA's seismic research budget, there have been recurring difficulties with DARPA's management and level of support for the United States-Soviet program and associated university research efforts.

One result of DARPA's management is that only about one-third of the total add-on for the program as appropriated by Congress has been made available to the IRIS Seismic Studies Program. Purchase and installation of equipment in the U.S.S.R. has been funded, but support has been denied for other critical activities, including archiving, management, and distribution of the recorded data by the responsible university researchers. DARPA support has also been denied for analysis of the data and associated research by project scientists. These capricious budgetary actions, which have the effect of suppressing research, were taken outside the normal scientific peer review process.

Further, DARPA's Nuclear Monitoring Research Office has not increased its normal basic sesimic research budget to reflect either the additional funds made available by Congress, or the need for more basic research support to the IRIS Seismic Studies Program, to capitalize on the new stream of data coming from the stations in the Soviet Union.

Despite a 75-percent congressional increase in funding for the Nuclear Monitoring Program, from $20 million requested in fiscal year 1988 to $36 million provided in fiscal year 1990, support for university basic research in seismology has remained near $2 million, representing only 6 to 7 percent of the total Nuclear Monitoring Research Office Budget.

Equally disturbing is DARPA's apparent willingness to phase out its support of the United States-Soviet cooperative program by fiscal year 1993. What is the point of deploying a prototype monitoring network of some 20 stations in the U.S.S.R. only to phase it out a year or two later? These stations are designed to be operated for 10 to 20 years.

The net effect of all these difficulties and uncertainties on the scientific community has been to produce a widespread lack of confidence in DARPA's administration of this program. There is also a perception that despite the considerable sums expended on the DARPA Nuclear Monitoring Program over the years, the research has not been managed in a way that would systematically resolve the remaining test ban monitoring issues. The university researchers involved in this program believe that a change of agency is necessary if the U.S.-Eurasian Seismic Studies Program is to continue to develop as the Congress intended.

It is also clear that DARPA's charter does not encompass providing support for long-term university research programs, the kind of support the IRIS consortium program requires.

Consolidating management of the IRIS Seismic Studies and university research programs at the Air Force Geophysics Laboratory would simplify program administration, reduce overhead costs, and increase the value of the research results to the components of the Air Force entrusted with the seismic monitoring mission.

My amendment reduces funding for two DARPA seismic research programs—Nuclear Monitoring and Defense Research Sciences DRG-01—by a total of $14.7 million and increases funding for the Air Force Geophysics Laboratory by $10.3 million.

The increase in Air Force R&D funds includes $7 million for the Joint U.S.-U.S.S.R. Seismic program administered by the IRIS university consortium.

The remaining $3.3 millin—$2.7 million from the DARPA university research program and a $600,000 add-on for Air Force Seismic data interpretation—is in addition to the $1.8 million request for existing Air Force research into crustal motion, and is intended to be used to support university-based seismic research. These funds are to be used to ensure that strong basic research programs is seismology and geophysics are maintained that will continually improve U.S. capabilities, in seismic detection, indentification, location, and yield estimation of underground nuclear explosions. A significant component of this program should be the funding of university research that will address the important technical verification issues and ensure an adequate supply of well-trained graduates to lead future U.S. efforts in this area.

In essence, my amendment would return DARPA's Nuclear Monitoring Program to the $22 million level of funding that prevailed 3 years ago before the congressionally initiated increases for the U.S.-Eurasian Seismic Studies Program. This transfer would therefore not affect DARPA's ongoing program to produce a prototype of an integrated, computer-based capability for processing data from multiple seismic arrays.

Mr. President, at this time I would be pleased to yield to the senior Senator from Georgia, the distinguished chairman of the Armed Services Committee, to hear his views on this matter.

Mr. NUNN. Mr. President, the program involved in the amendment offered by the senior Senator from Massachusetts is the Nuclear Monitoring Program of the Defense Advanced Research Projects Agency [DARPA]. This program conducts research and development to enhance U.S. capabilities for monitoring nuclear explosions and remotely detecting the presence of nuclear materials. The committee has authorized $36.626 million for this program in fiscal year 1991, the full amount requested in the administration's amended budget request.

I want to take this opportunity to advise the Senator from Massachusetts that I share his strong support for the U.S.-Eurasian Seismic Studies Program administered by the Incorporated Research Institutions for Seismology. The IRIS Program has added significantly to our knowledge of the seismic characteristics of the Soviet Union and hence to our abilities for monitoring compliance with limitations on nuclear testing.

I am concerned by the apparent misunderstandings in previous years as to congressional intent with regard to the level of DARPA funding for the IRIS Program.

On this point, I received a letter on July 10, 1990, from Dr. Victor H. Reis, Acting Director of DARPA, stating:

> DARPA is fully committed to supporting all aspects of the ESSP until the completion of the program; and specifically, DARPA is committed to supporting directly the Incorporated Research Institutions for Seismology [IRIS] at the level of $7,000,000 or more in FY 1991.

Should funding for the IRIS Program remain at DARPA, I fully expect DARPA to fulfill this commitment.

I am also concerned by indications that an unusual level of friction and mistrust has developed between IRIS and DARPA that is hampering the effectivness of the ESSP project. I intend at an early date to look into these problems and consider appropriate remedies, including the option of transferring funding and program management for the project to another agency of the Government.

As the Senator from Massachusetts may know, the House Armed Services Committee has already adopted an amendment very similar to his in its markup of the fiscal year 1991 budget request.

Given the assurance that we will have to revisit this issue in conference, and that I share his concerns over the difficulties that have developed between DARPA and the research community involved in this program, I am wondering if the Senator from Massachusetts would be willing to withhold his amendment.

I recognize the problem the Senator is raising, but I think we need more time to identify the most appropriate solution. I hope that by the time we

get to conference, we will have identified an appropriate course of action which gets this program back on track. I yield to the Senator from Masschusetts.

Mr. KENNEDY. I thank the chairman for his remarks, and for his continuing support for the IRIS Seismic Studies Program.

I agree that we should be able to work out an appropriate resolution of this matter in conference. I will not offer the amendment, but I ask unanimous consent that it be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

In section 201, subsection (3) (page 9, line 14), replace the number "$12,271,578,000" with the number "$12,281,878,000";

In section 201, subsection (4) (page 9, line 15) replace the number "$9,237,293,000," with the number "$9,222,593,000".

At the end of part B of title II (page 13, after line 25), add the following new section, and conform the table of contents accordingly):

SEC. . TRANSFER OF SEISMIC RESEARCH FUNDING.

(a) LIMITATION ON USE OF FISCAL YEAR 1991 FUNDS.—Of the funds authorized to be appropriated pursuant to section 201 for Defense Agencies, not more than $22,000,000 may be obligated for research, development, test, and evaluation in connection with the Nuclear Monitoring Program (PE 0602714E) of the Defense Advanced Research Projects Agency.

(b) AIR FORCE SEISMIC RESEARCH.—Of the funds authorized to be appropriated pursuant to section 201 for the Air Force, $46,757,000 shall be available for the Air Force Geophysics Laboratory (PE 0602101F), of which $10,300,000 shall be used to support Project 7600.

SOVIET MILITARY SPENDING STILL ON THE RISE

Mr. HELMS. Mr. President, in listening to statements by some Senators on this bill, I have the uneasy feeling that the U.S. Senate is drifting out of touch with reality. To hear some tell it, the military threat presented by the Soviet Union has been declining, and a new era of peace is at hand.

While we must be attentive to the new diplomatic drive of President Gorbachev, we must at the same time follow his deeds even more closely.

Let us look at some acknowledged facts: Since 1985, when Gorbachev came into power, U.S. defense spending has been declining in real terms. At the same time, the Soviet military buildup has been rising at the rate of about 8 percent per year. Testimony by intelligence experts clearly indicates that the Soviets have been spending 26 percent of their GNP on military resources, and 60 percent of their yearly budget.

Mr. President, these were decisions made by Gorbachev, and we can assume that this enormous military spending was made for a well-planned purpose. It is not surprising that the Soviet economy collapsed. Gorbachev took the scarce resources at his disposal, and placed a disproportionate share into military spending. This destroyed his civilian economy, but provided him with the military power to press his country's only claim to be a superpower. That military strength has placed him in a position to blackmail economic assistance from the West. If he gets that assistance, then he can have both a strong military and a strong economy.

But in 1988 and 1989, Gorbachev was forced to cut the rate of growth of defense because of the bankruptcy of the Soviet economy. Note that I say he cut the rate of growth; it would be wrong to assume that the cuts are so massive as actually to cut the absolute levels of spending. If we unilaterally make massive cuts in our own defense, what happens if the Soviets, after getting economic help from the West, resume the growth of their military spending?

In fact, Mr. President, there is new evidence suggesting that Gorbachev intends to resume the rate of growth of defense spending in 1991 and 1992 at a more modest rate—2.7 percent and 3.4 percent—and in 1993 to increase it at the enormous rate of 22.3 percent. I realize that the 1993 figure appears to be exaggerated, but it is projected for a period which comes after the target for receiving massive Western economic aid.

This new evidence is contained in an unclassified GOSPLAN document on the Soviet economy recently provided to the Department of State by a senior Soviet economic official, and is still being studied by United States intelligence. However, it is consistent with other evidence that Gorbachev intends to resume the growth of defense spending in 1991 through 1995 in the new 5-year plan being prepared this year.

It was only last September that President Bush stated that the Soviet Union was modernizing and expanding its strategic forces at—and I quote—"a furious pace." The Armed Services Committee stated in its report that it recently received intelligence from the intelligence community that verified and expanded upon the President's statement.

On July 20, 1990, President Bush stated that "we must maintain an effective deterrent, especially in the face of continuing across-the-board modernization of Soviet strategic forces." Again, the President was correct.

In a July report to Congress this year, Secretary of Defense Cheney stated that "the Soviet leadership has repeatedly stated its commitment to strategic modernization and President Gorbachev has taken steps to improve the Kremlin's nuclear forces and strategic defense capability."

The committee report on this bill notes as follows: "The Soviet strategic program is a matter of continued serious concern, and it continues to represent the paramount threat to United States national security."

Mr. President, I cannot believe that any reasonable person could disagree with that statement. The problem is, however, that it is understated—in at least six important respects.

First, the committee report fails to mention the fact that the Soviet Union has more than a three-to-one advantage over the United States in the number of strategic missiles and intercontinental bombers and the nuclear warheads and bombs that they carry. Moreover, this enormous Soviet strategic numerical advantage is still relentlessly expanding, as the Soviets deploy hundreds of new strategic missiles and bombers each year.

Second, according to press reports, the Soviets have almost doubled their number of mobile ICBM's just during the past year and a half. By 1991, the Soviets probably will have deployed about 55 to 70 rail-mobile SS-24 ICBM launchers, and up to about 310 road-mobile SS-25 ICBM launchers. This is not mentioned in the committee report, and the fiscal year 1991 Senate defense bill does not authorize any funds for deployment of either the U.S. rail-garrison MX or the Midgetman mobile ICBM programs. The House Armed Services Committee has just completely cut out even the R&D funds for both U.S. mobile ICBM systems. Thus, under a proposed START Treaty, the Soviets could have over 380 mobile ICBM's, while, in stark contrast, the United States would have zero.

Third: The Soviets are currently deploying three strategic bombers, not two, as the majority report states. The Soviets are producing scores of new Blackjack, Bear H, and Backfire bombers each year. According to press reports, the Soviets have already produced a total of almost 655 of these three types of new bombers. Meanwhile, U.S. deployment even of a token force of new B-2 Stealth bombers remains in doubt. The House Armed Services Committee has voted to cancel deployment of the B-2. This is an issue that will be fought out vigorously in conference.

Fourth: The Soviets are currently deploying hundreds of 15 new types of strategic offensive and defensive systems, compared to United States deployment of only one new strategic system with only a handful of delivery vehicles. I am referring, of course, to the Trident II submarine system. I am amazed that the committee report completely ignores this disparity.

Fifth: The committee report ignores the fact that the United States currently is not capable of manufacturing the components necessary to build nuclear weapons. Reportedly, we cannot now build the new nuclear warheads

necessary for the single new strategic system that the United States is deploying.

Sixth: The Soviets are deploying their new SS-26 super extra-heavy ICBM to replace their SS-18's, and their extra-heavy SS-24 Mod 1 and Mod 2 ICBM's in both silos and rail-mobile launchers—thereby increasing the first-strike potential where the Soviets already have a six-to-one advantage. In contrast, the majority report ignores the fact that the United States will not be allowed any heavy ICBM's whatsoever under the proposed START Treaty.

As Secretary Cheney said recently: "Last year alone, the Soviet Union produced 140 new ICBM's while the United States produced just 12. Even for the Soviets the simultaneous deployment of four new types of ICBMs is unprecedented."

Mr. President, I regret that while the committee report is correct, it fails to portray the stark reality of the situation in detail. If I may quote Secretary Cheney once again:

> The Soviet Union is still embarked on a deliberate and vigorous modernization of its strategic nuclear forces. . . . The disparity between apparent Soviet good intentions and the improving capabilities of Soviet strategic nuclear forces is indeed stark. It is still very clear that the Soviets are firmly committed to producing a nuclear force that is far more modern, mobile, and lethal. Under START, the Soviets will field a completely modernized ICBM force, as well as largely modernized SLBM and bomber forces. The Soviet Union by the turn of the century will have a strategic nuclear force that is in many ways more effective than their current force.

Mr. President, I can add only one thing to these alarming remarks of the Secretary of Defense. And that is the recently declassified paper given to a State Department seminar by Dr. Alexi Shevyakov on July 16. Dr. Shevyakov is the deputy director of the central institute on economics and mathematics of the U.S.S.R. Academy of Science.

Dr. Shevyakov's paper was an analysis of the Soviet civilian and defense budget by the Soviet central planning agency, GOSPLAN. The GOSPLAN document shows that the next five-year plan has planned for Soviet increases in the Soviet military budget of 2.7 percent in 1991, 3.4 percent in 1992, and 22.3 percent in 1993. The GOSPLAN document is highly significant because it demonstrates the Soviet intention to regain the momentum of increases in military spending.

If these intentions are fulfilled, then the United States will be greatly endangered if we continue to unilaterally cut defense spending.

Mr. President, this information is consistent with the entire history of Soviet military planning and spending. Last month, the Senate Foreign Relations Committee heard testimony from experts on the Soviet economy. One of those was William T. Lee, who has spent his career within the United States intelligence community developing his expertise on Soviet military expenditures.

Mr. Lee presented to the committee a lengthy document entitled "Trends in Soviet Military Outlays and Economic Priorities, 1970-1988." In this document he demonstrates conclusively that his analyses have been correct while other, more highly publicized estimates, were completely wrong.

Mr. President, the minority staff has included this Lee study in a memorandum which has been sent to every Senator, along with an introduction by the Senator from North Carolina. The document is too long to print in the RECORD, but I recommend it to every Senator's attention.

Mr. President, I also ask unanimous consent that some unclassified tables prepared by the Foreign Relations Committee minority staff, entitled "The Three Main Elements of the Nuclear Threat and Other Military Comparisons," be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE COMMITTEE ON FOREIGN RELATIONS REPUBLICAN STAFF MEMORANDUM

To: Republican Senators.
From: Senator Jesse Helms, Ranking Minority Member.
Date: July 30, 1990.
Re: Trends in Soviet Military Outlays and Economic Priorities, 1970-1988.

The attached monograph, Trends in Soviet Military Outlays and Economic Priorities, 1970-1988, was prepared by Mr. William T. Lee and was the subject of his testimony before the Committee on Foreign Relations on July 16, 1990. Although Mr. Lee is an emloyee of the Defense Intelligence Agency, and the DIA has declared that the contents are unclassified, the views are those of Mr. Lee alone and do not necessarily represent those of the DIA.

TRENDS IN SOVIET MILITARY OUTLAYS AND ECONOMIC PRIORITIES 1970-1988

(By William T. Lee)

(Introduction by U.S. Senator Jesse Helms)

WHY HAS U.S. INTELLIGENCE UNDERESTIMATED SOVIET DEFENSE SPENDING FOR THIRTY YEARS?

This study describes in detail how Soviet President Gorbachev continued to commandeer the scarce resources of the Soviet Union and concentrate them in the military sector of the Soviet economy. Gorbachev's decision to continue to devote about 25 percent of the Soviet Gross National Product to the military has nearly bankrupted his country. But as a result of this military priority, Gorbachev has achieved military superiority over the West.

Gorbachev is now trying to use his military superiority, especially his advantages in strategic forces, to blackmail or leverage the West into providing economic subsidies to the Soviet Union.

The key question facing Congress in its deliberations regarding how much to cut American defense spending is whether the Soviet military threat may be diminishing, and if so, by how much. The question being posed is clear—is the Soviet military threat going down, and if so, by how much?

The Soviet Union already has a 3-to-2 advantage over the United States in the number of intercontinental missiles and bombers and the nuclear warheads loaded on them, and a 6-to-1 advantage in nuclear first-strike potential, together with a total monopoly on strategic defenses.

In September 1989, President Bush declared that the Soviet Union was modernizing its strategic forces "at a furious pace." This presidential assessment is still true—this year alone the Soviets continue furiously to produce *hundreds* of 3 types of new Inter-Continental Ballistic Missiles, 3 types of new intercontinental bombers, and 2 types of Submarine-Launched Ballistic Missiles. The Soviet strategic forces buildup continues relentlessly. The Soviets have a total monopoly on mobile ICBMs and heavy ICBMs. In contrast, the United States is deploying only a few of just one strategic system.

On July 5, 1990, at the London NATO Summit, British Prime Minister Margaret Thatcher gave an impassioned plea for caution in Western defense budgeting. Mrs. Thatcher stated that the Soviets were still producing—4 strategic missiles and 100 tactical air-to-surface missiles per week, 6 tanks and 2 combat aircraft each day, and a new submarine every six weeks. She warned that "Soviet military might remains formidable."

The Department of Defense states that since Soviet leader Gorbachev came to power in March, 1985, the Soviet Union has produced more tanks, more artillery, and more armored personnel carriers than the combined armies of Britain, France, and West Germany.

The Department of Defense has also stated recently in a letter to the Congress that the Warsaw Pact still retains "a significant military capability." The Joint Chiefs of Staff have testified that "The United States must recognize that the Soviet Union's restructured military will still be formidable."

It is also a fact that U.S. defense spending has been declining in real terms every year since 1985—the year that Gorbachev came to power.

While the Soviet conventional military threat may be beginning to decline, Soviet superiority in strategic forces has never been greater.

FACTS ON THE SOVIET THREAT THAT ARE IGNORED

Here are some facts about the Soviet threat that are often overlooked or ignored, but which must be addressed:

Communists are still in control of key posts throughout Eastern Europe, and especially in Bulgaria and Rumania the party still runs the state;

Gorbachev is reinforcing his 400,000-plus Soviet troop strength in East Germany, both in numbers, and also with top of the line air defense missiles, in an effort to blackmail Germany into providing over $15 billion in economic aid to perestroika;

A massive Soviet military reorganization is going on guised as unilateral military reductions, and Gorbachev has admitted that these difficult-to-monitor military re-deployments are designed to make the Soviet military leaner, more efficient, and more lethal;

Many Soviet army troops are not being demobilized at all, but are instead being transferred into MVD and KGB units, and much

of the Soviet military equipment being withdrawn from Eastern Europe is being stockpiled as covert strategic reserves beyond the Urals;

In 19 out of 28 key categories of Soviet weapons production, the Defense Department states that the Soviets are either maintaining their previous high production rates or are *increasing* these rates;

For example, the Defense Department states that the Soviets alone are still outproducing all of NATO 2 to 1 in tanks, 3 to 1 in armored troop carriers, and 10 to 1 in artillery;

The Soviets are still building Deep Underground Bunkers to shelter the leadership and key military factories from the effects of nuclear war, and they are still building more than six coastal tunnels to shelter their strategic submarines from the effects of nuclear war;

Gorbachev is confirmed to have violated the 1988 INF Treaty more than 300 times, and several even more serious Soviet INF violations involving covert INF forces are reportedly now under study at the White House.

If the Cold War is indeed over, why is the Soviet strategic forces buildup still being pursued so relentlessly? So Prime Minister Thatcher is correct; we should be cautious in assessing the Soviet military threat.

THE LEE ESTIMATES OF SOVIET DEFENSE SPENDING

A very serious failure by U.S. Intelligence is involved in the severe Western misperception of Gorbachev's intentions and capabilities. The inteligence failure has been the thirty-year inability of U.S. Intelligence to perceive the magnitude of the Soviet economic commitment to its military, and this intelligence failure could have historic consequences to the detriment of the West.

William T. Lee, formerly an analyst at the Central Intelligence Agency, now a senior officer of the Defense Intelligence Agency, has been analyzing the Soviet economy for the last thirty-five years. Bill Lee's estimates of Soviet spending on the military have a long track record of accuracy. In fact, Bill Lee's estimates of Soviet military spending are the *only* accurate estimates that exist in the West, because they are the only estimates that have been repeatedly corroborated by independent data from Soviet sources.

In recognition of this fact, the Defense Intelligence Agency has agreed to allow Mr. Lee, over the years, to brief and publish his findings as an independent check on official Intelligence community estimates.

Using only unclassified examples, at least two times since 1970, U.S. Intelligence [the Central Intelligence Agency (CIA) and the Defense Intelligence Agency (DIA)] has acquired direct evidence, referred to as "benchmark data," of the magnitude of Soviet military spending. After each of these two bodies of direct evidence, U.S. Intelligence twice (in 1976 and 1982) had to double or nearly double their estimates of Soviet military spending in real terms.

But in each case, Bill Lee's estimate of Soviet military spending was right on the mark, and he did not have to change a bit. Nevertheless, even after doubling Soviet military spending repeatedly, CIA and DIA still continued to be off the mark, because they did not change their erroneous methodology. Bill Lee's methodology did not have to be changed, mainly because his is based upon direct evidence from Soviet economic statistics, all of which are unclassified.

In order to improve the quality and accuracy of intelligence conclusions, it has long been the goal of American foreign policymakers in both the Executive and Legislative branches to encourage competitive intelligence analysis. Competitive analysis should occur both between CIA and DIA, and also within these two main agencies of the intelligence community. But unfortunately, CIA and DIA became so defensive about their errors and the accuracy of Bill Lee's methodology that in 1982 they agreed to combine forces and present a single CIA-DIA estimate on Soviet military spending to Congress. Instead of pursuing competitive analysis between the agencies after the repeated CIA revisions, the Department of Defense mistakenly agreed that DIA would in effect combine its estimates with CIA's estimates in order to avoid any conflict in testimony to Congress.

NEW CORROBORATION FOR LEE'S ESTIMATES

Now there is a third case of direct evidence confirming Bill Lee's estimates of Soviet military spending. In a speech on April 27, 1990, Soviet President Gorbachev himself revealed for the first time the planned rate of growth for a Soviet military outlays for the entire decade of the 1980s. Gorbachev stated explicitly:

"In the 11th Five Year Plan [1981-85] and even still in the 12th [1986-90], what kind of ratio did we have? The national income was to grow by some 21-22 percent, while the military expenditure by 45%."

Gorbachev thus admitted that the Soviet leadership planned military outlays to grow by 45 percent in real terms during each of the two Five Year Plans of the 1980s. This is an average planned rate of growth in military outlays of just under 8 percent per annum.

But the CIA-DIA estimates claimed that Soviet military outlays grew only 2 to 3 percent each year of the 1980s in real terms. In contrast, long before Gorbachev's speech, Bill Lee estimated that Soviet military outlays grew by over 7 percent per year on the average from 1980 through 1988. Bill Lee's estimate is almost precisely consistent with Gorbachev's planned growth of just under 8 percent per year in military spending.

It is worth re-emphasizing that Bill Lee's estimate is almost identical to Gorbachev's revelation. But the CIA-DIA estimators are highly embarrassed once again by this third case of direct evidence, "benchmark data," which should again cause them to more than double their estimate of the growth rate of Soviet military outlays. Proof of the CIA-DIA's confusion is the fact that they are still trying to figure out what to say about Gorbachev's revelation, and have not yet faced up to these key facts in Gorbachev's speech.

There are other reasons to doubt the accuracy of CIA-DIA estimates of Soviet military outlays. We now have a fourth case of the error of the combined CIA-DIA estimates and the accuracy of Bill Lee's estimates.

Soviet economists themselves have recently declared that the CIA-DIA methodology has long grossly underestimated the military's share of the Soviet Gross National Product. A group of Soviet economists attending a conference on Soviet economics at the American Enterprise Institute in Washington on April 23, 1990, made another important revelation. The Soviet economists criticized the CIA-DIA estimates of the Soviet GNP as much too high. Similar estimates surfaced in the new Supreme Soviet early this year.

This corroborates the research of an emigre Soviet economist, Igor Birman, who for years has been documenting CIA's gross overestimates of the standard of living of Soviet citizens compared to U.S. citizens.

The CIA-DIA methods have consistently estimated Soviet GNP as about 50 to 60 percent of the United States' GNP, but Soviet economists Viktor Belkin, Oleg Bogomolov, and Vladimir Tikhonov estimate that the Soviet GNP, is at most, only about 28 percent of that of the U.S. Not only was the CIA-DIA estimate apparently grossly wrong on the size of the Soviet GNP, but more importantly, it has also grossly under-estimated the percentage of Soviet GNP going to the military. The Soviet economists estimated that the Soviet Union spends 20 to 25 percent of its GNP on the military, while in contrast, the CIA-DIA estimate placed the Soviet military's share of GNP at only 15 to 17 percent.

What does Bill Lee estimate? The high, inclusive side of Bill Lee's estimates are that 23 to 25 percent of the Soviet GNP goes to the military, consistent with what the Soviet economists revealed.

Thus Bill Lee is confirmed again for the fourth time, and the CIA-DIA estimators will again have to increase significantly their estimate of the Soviet military's share of Soviet GNP in order to be consistent with the evidence.

LONG HISTORY OF U.S. INTELLIGENCE UNDERESTIMATES OF THE SOVIETS

There is a long history of CIA and DIA underestimating the Soviet military. In the mid-1970s, Dr. Albert Wohlstetter used declassified CIA-DIA National Intelligence Estimates of the 1960s and early 1970s on Soviet strategic forces to provide that the CIA and DIA systematically and grossly under-estimated Soviet strategic force deployments throughout this period.

Wohlstetter's critique caused the famous "B Team" exercise in competitive intelligence analysis in 1976. A group of outside U.S. defense experts was appointed to analyze the same raw intelligence data as the CIA-DIA and predicted that by 1980, U.S. strategic forces would be at their most vulnerable level ever to a relentlessly growing Soviet first strike capability. By 1980, it was clear that the "B Team" was correct, and that the CIA had continued to grossly under-estimate Soviet strategic forces throughout the 1970s as well.

Roughly coincident with the "B Team" analysis, DIA broke ranks with CIA on Soviet strategic missile estimates. But regrettably, DIA continued its subservience to CIA on Soviet defense spending and the military burden on the Soviet economy.

This CIA gross underestimate of Soviet strategic missiles was even conceded by Dr. William Perry, former Under Secretary of Defense for Research and Development under the Carter Administration, in a Washington Post article of early 1981. Perry confessed that in 1977, as result of believing the CIA underestimate and not the accurate "B Team" estimate, the Carter Administration grossly under-estimated the rapidity of both Soviet MIRV missile deployments and accuracy improvements. He also conceded the grave consequences of this misjudgment-the still open window of American vulnerability.

There have been many other CIA underestimates of the Soviets, such as CIA's failure to believe, the evidence of Soviet support for international terrorism and drug trafficking, CIA's resistance to the evidence

of Soviet diplomatic forgeries (CIA has reportedly just abolished its monthly analysis of Soviet active measures world-wide), and CIA's longstanding suppression of evidence of Soviet strategic deceptions and violations of arms control treaties.

CIA thus has a long history of serious intelligence failures related to their main target, the Soviet Union. One could say that if CIA does not understand the Soviet economy and Soviet military outlays and deployments, the main sector of the Soviet economy, how can the CIA understand Soviet internal politics or foreign policy?

It is a proven fact from four serious espionage cases reported publicly that in the mid-1970s the Soviet KGB penetrated all four main streams of CIA-DIA strategic intelligence: Signals Intelligence collection sources and methods were compromised to the KGB by the Boyce and Lee espionage case, Satellite Imagery sources and methods were compromised to the KGB by the Kampiles case, communications Intelligence sources and methods were compromised to the KGB by the Prime case, and Human Intelligence sources and methods were penetrated for the KGB by the case of the Koecher husband and wife team.

Thus one of the problems still facing the CIA-DIA estimators in their efforts to understand the Soviet Union may be compromised sources, or worse, sources tainted by Soviet disinformation. Gorbachev is contining his active measures and disinformation operations, despite his 1987 promise to stop, and despite CIA's decision to stop reporting them. It is possible that CIA's main sources of intelligence on the Soviet Union may be controlled by the Soviets?

CONCLUSION: SOVIET MILITARY OUTLAYS ARE STILL THREATENINGLY HIGH

To return to the focus of this introduction, Bill Lee has credibility when it comes to estimates of Soviet military spending. The CIA-DIA estimates do not.

It is clear that Soviet military spending has increased at a rate of almost 8 percent per year from 1970 through 1988 in real terms. In contrast, U.S. defense spending has declined each year since 1985 in real terms U.S. defense spending remains less than 6% of U.S. GNP, as compared to nearly 14% in the 1950s and 1960s, while the Soviet military's share of Soviet GNP has soared to about 19 to 25%.

As noted, according to the Department of Defense, 19 out of 28 main categories of Soviet defense production either remained constant at a high rate, or increased, through 1989. Even after Gorbachev's 1988-1989 defense cutbacks, the Soviets alone are still out-producing all of NATO by about 2 to 1 in tanks, 3 to 1 in armored personnel carriers, and 10 to 1 in artillery. And again, as President Bush stated in 1989, the Soviets continue to modernize their strategic forces at a "furious pace." For example, this year alone the Soviets are producing for deployment hundreds of 3 types of ICBMs, 3 types of bombers, and 2 types of SLBMs, compared to only a handful of 1 U.S. strategic program being produced for deployment, the Trident II SLBM system.

Finally, it is important to note that the distinguished statesman and arms control negotiator, Paul H. Nitze, also has high praise for Bill Lee's estimates. In his memoirs *From Hiroshima to Glasnost* (page 400), Nitze states:

It had become evident that the intelligence agencies had long underestimated the percentage of the Soviet GNP going into defense. From about 1970 on, the consensus in the intelligence community had been that some 7 to 8% of Soviet GNP had been allocated to defense. One of the intelligence experts in this field, Bill Lee (on whose expertise I had called before), had long thought it was closer to 12 to 13%. In the mid-70s, a man active in the Soviet Gosplan (the Soviet economic planning agency) managed to get out of the Soviet Union. He gave our experts new insights into how the Soviets kept their national accounts. It turned out that most of the cost for Soviet procurement of munitions was accounted for in Soviet statistics under the production of industrial goods. The accuracy of Bill Lee's previous estimates thus appeared to be confirmed.

Paul Nitze's assessment of the accuracy and confirmation of Bill Lee's estimates should be taken very seriously.

To summarize: The United States must be able to rely upon credible methods of estimating Soviet military outlays with a proven track record—if we are to deal rationally with such important questions as the magnitude of the Soviet military threat and the required level of U.S. defense spending in response. Bill Lee's study, attached, offers the best, most credible, most accurate method and estimate available in the West on this important question.

FOREWORD AND ACKNOWLEDGMENT

The author is deeply indebted to former Defense Intelligence Agency Director, Lieutenant General Perroots, USAF Ret., who granted the author resident dissident status on this subject, and to the former Executive Director of DIA, Mr. Gordon Negus. Support for the independent analysis by several other former senior DIA officials is equally acknowledged.

The author also is grateful to DIA for typing and editorial support, most specifically to Mrs. Mary Yanofchick and to Mrs. Debra Brown.

All research, analysis, and composition of this paper was performed on the author's own time, and the author is solely responsible for all findings and shortcomings.

Information cut-off date was August 1989 for the bulk of the paper. The appendices update certain critical issues with information extending into April 1989, and the main document has been amended accordingly. This somewhat clumsy arrangement was dictated by circumstances beyond the author's control.

DEFENSE INTELLIGENCE AGENCY,
Washington, DC., June 1, 1990.

Hon. JESSE A. HELMS,
U.S. Senate, Washington, DC.

DEAR SENATOR HELMS: In response to your letter of 9 May 1990, please find enclosed the three papers you requested.

It is the Defense Intelligence Agency's judgment that these papers are unclassified.

It should be noted that these papers represent Mr. Lee's personal views and are not necessarily those of the Department of Defense or the Defense Intelligence Agency.

If you have any questions, please feel free to contact my Legislative Liaison office at 697-5101.

Sincerely,

HARRY E. SOYSTER,
Lieutenant General, U.S. Army, Director

EXECUTIVE SUMMARY

Sovdata estimates are derived from official Soviet economic statistics. Standard Sovdata estimates approximate U.S.S.R. outlays for: procurement; operations and maintenance (O&M); and research and development, test, and evaluation (RDT&E), which includes all space programs. Standard Sovdata estimates do not include pensions, O&M of Party (KGB) and Ministry of Internal Affairs (MVD) troops, and the nuclear war management system. Consequently, Sovdata estimates are a minimum measure—probably about 80-85 percent—of the military's claim on Soviet economic resources.

Over the past two decades independent evidence from Soviet sources ("benchmark data") have corroborated the standard Sovdata estimates, which also are compatible with gross national product (GNP) accounts for the USSR from 1955 to date. Premier Ryzhkov and 1st Deputy Chairman of the Council of Ministers Voronin have confirmed the Sovdata finding the Soviets deliberately increased the military's share of Soviet national income/GNP at the expense of consumption, explicitly in each Five Year Plan (FYP) since 1975 and implicitly since 1958.

Most importantly, Gorbachev has stated that Soviet defense expenditures were planned to increase by 45 percent (in real terms) in both the 11th (1981-85) and (original) 12th (1986-90) FYPs, as compared to Sovdata estimates of actual Soviet defense expenditures; benchmark data confirmed the estimate of actual Soviet defense expenditures; Gorbachev confirmed the estimate of planned growth; the Sovdata estimates, in 1982 prices, of Soviet defense expenditures grew at the rate of about 7.2 percent per annum in 1980-88, as compared to Gorbachev's planned growth of about 7.7 percent annually.

All Sovdata estimates were made prior to the author's access to the corroborating data. Sovdata are the only Western estimates of Soviet defense spending—in constant rubles prices—that have been confirmed by the benchmark data and by these recent statements by Soviet leaders.

In real terms, during 1970-85 Soviet military outlays grew at the rate of 8-9 percent per annum while procurement growth averaged about 12 percent annually. Both growth rates have declined over the past two decades as overall Soviet economic growth has slowed. Nevertheless, growth of Soviet military outlays continued to outpace Soviet economic growth at least through 1988.

The military's claim on Soviet economic resources has been increasingly steady since the late 1950s but particularly since 1970. Sovdata estimates constituted 10-11 percent of Soviet GNP in 1970, rising to 18-19 percent in 1985-88, or from about one-third to about 40 percent of the Soviet budget. From 1970 to 1985-88 procurement of weapons and associated military hardware rose from about 40 to about 60 percent of total Soviet machinery production for all purposes. When the cost of activities not included in these standard Sovdata estimates—pensions, war management, the conservative interpretation of O&M outlays—are taken into account, the military's claim in 1985-88 rises to 23-26 percent of Soviet GNP,[1] or up to 55 percent of the Soviet budget) in 1985-88. Consequently, consumption declined from about 55 percent of Soviet GNP in 1970 to about 48 percent in 1988—all according to plan.

Gorbachev's economic priorities in the original 12th Five Year Plan (FYP), 1986-90, and in the 15 Year Plan 1986-2000, were

[1] Midpoint to high side.

to increase the standard Sovdata measure of Soviet military outlays 6-8 percent annually, with corresponding growth of 8-10 percent per annum in procurement outlays. (Premier Ryzhkov stated that the original 12th FYP provided more than 4 percent annual—real—growth in military outlays.) Consequently, the standard Sovdata estimates were scheduled to rise from about 18 percent of Soviet GNP in 1985 to about 23-25 percent by 2000.

Perestroyka's failure to rejuvenate Soviet economic growth forced Gorbachev to abandon this course in 1988-89. No confident measure of the growth in Soviet military outlays is possible since 1988; subsequent data and statements are confused, contradictory and often misleading. Nevertheless, the era of ever increasing military claims on Soviet economic resources is over. At most, the 1991-95 FYP will stabilize the military's share. More likely, military outlays will decline as a share of Soviet GNP for the first time since the mid-1950s.

Rhetoric notwithstanding, real reductions in Soviet military outlays in the next few years will be very difficult to achieve without more drastic cuts in military forces and programs than have been publicly announced because of the continuing rapid rise in the cost of advanced technologies incorporated into Soviet weapon systems. Furthermore, perestroyka is introducing inflationary pressures into military procurement which previously had been largely insulated from inflation elsewhere in the Soviet economy.

The information that has corroborated the Sovdata estimates has resulted in major revisions in CIA estimates. CIA has nearly doubled its estimates twice in the past 15 years. Each revision has brought CIA's estimates into approximate agreement with both the Sovdata estimates and the "benchmark data" from Soviet sources, but only for the base years 1970 and 1982, because CIA's flawed Soviet cost analysis model (SCAM) systematically underestimates the real growth of Soviet military outlays.

Consequently, Sovdata estimates of the real growth in the Soviet military's claim on economic resources contrast sharply with CIA's estimates. Since 1970 SCAM shows only 2-3 percent annual real growth in military outlays, and about 2 percent average growth in procurement outlays. Consequently, according to SCAM, the military's claim on resources has been essentially constant at some 15 to 17 percent of Soviet GNP over the past two or three decades despite the enormous Soviet military buildup of the past three decades.

First, in 1976 CIA admitted that Soviet defense expenditures and military procurement were not inflated prior to 1970. CIA has yet to explain how the same institutional factors that had failed to produce double digit "hidden inflation" prior to 1970 suddenly introduced such falsification after 1970. This entire argument should have ceased in 1976 when the CIA admitted its prior estimates—in 1970 prices—were wrong by factors of two to four.

Second, CIA alleges that Soviet constant prices simultaneously *overstate* the real resource cost of Soviet military procurement subsequent to CIA base years (1970 and 1982), while equally *understating* the real resource cost trend prior to these CIA base years. Conceptually, this is impossible. Empirically, the evidence contradicts it.

Third, CIA's predicted values for the magnitude of "hidden inflation" in Soviet procurement outlays are contradicted, by large margins, by special Soviet surveys. Thus, projected from the base year 1970, SCAM estimated "hidden inflation" in Soviet military procurement at some 50 billion rubles in 1979, and, projected from the base year 1982, at some 30 billion in 1985. Soviet surveys showed that the ruble value of the alleged "hidden inflation" was less than R0.1 billion in each year. Furthermore, there is no evidence that any of the "hidden inflation" identified by the Soviet surveys originated in weapons production.

Fourth, the alleged military contribution to inflation in Soviet GNP is, in fact, simply an error in CIA's GNP model.

Fifth, glasnost is providing even more evidence that weapons prices have, if anything, been understated rather than grossly inflated. CIA now admits that the Ministry of Defense "pays artificially low prices when it purchases many weapons and services."

Sixth, Premier N.I. Ryzhkov has stated that the military's share of Soviet national income has been rising for some time, implicitly since 1958.

Seventh, Soviet publication on military procurement pricing—previously taboo—under glasnost state that historically the MOD had used its position as a "monopolistic customer" to keep weapon prices low, below production costs in some cases. Substantial price increases are now expected.

Last but not finally, Western advocates of double digit inflation in the official Soviet data on weapons production now are saying that the MOD pays "artificially low prices" for many weapons and services. The CIA may not have it both ways: prices cannot be simultaneously understated and grossly inflated. The CIA, and other advocates of "hidden inflation," have hoisted themselves with their own petard.

Most of the differences between SCAM and Sovdata measures of the real growth in Soviet procurement outlays are the result of SCAM's failure to account for the cost of incorporating advanced technologies into Soviet weapon systems. In the West, advanced technology typically has increased weapons procurement costs, net of price inflation, 5 to 6 percent per annum since World War II. Such real cost growth probably has been even more rapid in Soviet procurement, probably at the rate of at least 6 to 7 percent annually. CIA imputes "hidden inflation" in Soviet procurement primarily because SCAM's dollar costs do not adequately measure the cost of technological advances that improve the military capabilities of successive generations of Soviet weapon systems.

The policy implications of the differences between Sovdata and SCAM estimates of Soviet military outlays and their economic impact are not trivial. Sovdata analysis finds the growth and magnitude of the military's claim on Soviet economic resources, along with the perennial failures of Soviet socialized agriculture, to be the two key causes of the Soviet economic crisis. Virtually all other serious economic problems, rising inflation, the budget deficit, the enormous gap between unrequited consumer purchasing power (at least 30 percent of GNP), and the empty shelves in the stores, all are but symptoms of the growing military burden at the expense of the Soviet consumer, and of the failures of Soviet socialized agriculture.

With no real increase in the military's claim on Soviet economic resources over the past three decades, SCAM neither can explain Gorbachev's economic woes nor track the twists and turns in Gorbachev's priorities as he has tried to deal with these problems. SCAM gives a completely inverted picture of policy shifts as when SCAM showed the first significant growth in Soviet military procurement precisely (1986-87) when Gorbachev shifted priority to civilian output for the first time in two decades.

According to SCAM, Gorbachev had no cause to shift investment priorities from weapons production to civilian machinery output because (according to SCAM) military hardware was a declining (constant at worst) share of Soviet machinery output. Sovdata analysis, on the other hand, showed a dramatic shift in the military's share of Soviet machinery output from the end of the 1950s through 1985, particularly in the 1981-85 period when the Soviets devoted virtually all of the increase in their total machinery output to the military for the first time since the Korean War. SCAM showed precisely the opposite trend.

Since 1970 the Soviets have been increasingly dependent upon imports of machinery and equipment to compensate for the shift in domestic resources to weapons output. Gorbachev, and problably the Soviet military as well, are acutely aware of the long run implications of this trend—the U.S.S.R. could become a second rate military as well as economic power—and is trying to reverse it. According to SCAM, none of this happened. The vast Soviet military buildup since the late 1950s has had no necessary economic or political consequences.

In sum, Sovdata estimates are the only Western estimates of Soviet military outlays that have been corroborated by independent evidence from Soviet sources that proved all other estimates to be wrong. Sovdata estimates also are the only estimates that are pertinent to policy analysis because they approximate the view from the Kremlin.

Table A summarizes the standard and expanded Sovdata estimates for 1985 and 1988.

TABLE A.—SOVDATA ESTIMATES OF SOVIET MILITARY OUTLAYS—1985, 1988

[Billions of 1982 rubles]

	1985	1988
Standard:		
O&M (MOD only) [1]	45–70	54–78
Procurement	75–78	95–96
RDT&E (and space)	19–30	22–33
Total	139–178	169–206
Expanded:		
Pensions	3–5	3–5
KGB and MVD O&M	5–10	5–10
Total	147–193	180–224
War management	20	20
Total	167–213	[2] 197–241
Expanded Sovdata outlays as a share of GNP (percent) [3]	20–26	22–26

[1] Includes military construction.
[2] Preliminary.
[3] Soviet constant prices.

THE 3 MAIN ELEMENTS OF THE NUCLEAR THREAT

	U.S.	U.S.S.R.
I. INTERCONTINENTAL BALLISTIC MISSILES		
ICBM silos	1,000	1,093. [1]
ICBM train launchers	0	70 plus. [1]
ICBM truck launchers	0	300 plus. [1]
Total ICBM launchers	1,000	1,463 plus. [2]
ICBM warheads	2,450	8,362. [3]
ICBM warheads if refires counted	2,450	Up to 16,724.
II. SUBMARINE LAUNCHED BALLISTIC MISSILES		
SLBM's always within range of 328 [4] enemy targets.		726.

THE 3 MAIN ELEMENTS OF THE NUCLEAR THREAT—Continued

	U.S.	U.S.S.R.
Warheads on SLBM's always within range of enemy targets.	About 2,600	4,014.[5]
III. INTERCONTINENTAL BOMBERS		
Intercontinental range bombers	276	700.[6]
Nuclear weapons on intercontinental range bombers (nuclear missiles and nuclear bombs).	3,118 to 4,550	4,410.[7]
IV. ANTI-NUCLEAR DEFENSES		
Ground launched missiles to shoot down bombers and cruise missiles.	0	14,750.
Of the above, ground launched missiles probably capable of destroying incoming missile warheads.	0	9,030.[8]
Ground launched missiles with admitted nuclear warhead destroying capability.	0	100.
U.S. Joint Chiefs of Staff estimate of ground launched missiles with admitted nuclear warhead destroying capability, by 1993, without ABM Treaty constraints.	0	250.
Air defense radars for defending against incoming bombers.	117	10,000 plus.
Of the above, those radars also capable of defending against ballistic missile warheads.	0	3,720.
Dedicated air defense interceptor aircraft.	Less than 300	2,190.
Giant phased-array radars for long-distance detection, tracking, and defense against missiles and warheads.	0	25.
V. OTHER MILITARY COMPARISONS		
Ballistic missile submarines	37	70.
Total SLBM's	584	954 to 1,030.
Total SLBM warheads	5,024	4,218.
Total intercontinental strategic nuclear delivery vehicles.	1,860	3,073.
Total intercontinental nuclear warheads.	10,592 to 12,024	16,990.
Attack submarines capable of launching cruise missiles.	101	256.
Estimated sea-launched cruise missiles.	400–600	15,000.
Predominant age of intercontinental nuclear systems.	Average over 20 years.	Average 4 or fewer years.
Operational anti-satellite systems	0	6 system types.[9]
Naval battle force ships	546	914.

[1] Does not count about 125 Soviet test and training ICBM launchers or about 200 Soviet covert SS–16 mobile ICBM launchers. According to the U.S. Strategic Air Command unclassified publication "Soviet Military Capabilities 1986:" "The Soviets do have contingency plans to deliver reserve missiles, warheads and propellants to surviving silos to reconstitute their ICBM force in order to regain their strategic advantage in the post-war period. The U.S. philosophy has always been 'one missile for one silo'; as our silos are not designed to be reloaded." Soviet mobile missiles are clearly also intended for multiple reloads and refires. The Soviets thus have a significant ICBM launcher reload and refire capability. This capability approximately doubles the Soviet missile force. The United States has no ICBM launcher reload and refire capability.

[2] The Soviets have up to 2,926 ICBM's or double the original force, if their ICBM launcher reload and refire capability is considered. The United States has no ICBM launcher reload and refire capability.

[3] Based upon maximum number of warheads seen in flight testing. Ratio: about 3 or 7 to 1 numerical first strike advantage in Soviet favor; at least 6 to 1 if Soviet warhead accuracy advantage is counted.

[4] Roughly half of all United States submarines are in port at any one time, and cannot reach Soviet targets for probably about a week or more. In contrast, most Soviet SLBM's are designed to have enough range to reach U.S. targets even from home ports. For total U.S. SLBM's, see below.

[5] Based upon the maximum number of warheads seen in flight testing. Does not count significant Soviet SLBM refire capabilities.

[6] Includes all Soviet naval Backfires, but does not count over 100 nuclear-delivery-capable Bear D, F and J naval reconnaissance, Anti-Submarine Warfare, and command/control aircraft.

[7] Assumes maximum loading on Soviet Bear H and Blackjack bombers.

[8] U.S. Defense Department estimate of anti-bomber missiles also possessing anti-missile warhead capablity.

[9] First, Moscow ABM system; Second, SL–11 operational ASAT system; Third, Soviet ground-based electronic jamming ("REC") capabilities; Fourth, Sary Shagan and Moscow ABM lasers; Fifth, probable Project "Astrophysica" covert space-satellite laser weapons; Sixth, probable "Dome of Light" temporary ABM and ASAT capability.

Note.—Soviet Strategic Offensive Capabilities in Cuba: 12 (36 eventually to be delivered) Soviet MIG–29 nuclear-delivery capable fighter-bombers; 2 Soviet diesel-powered Foxtrot submarines capable for launching nuclear-armed Soviet SS–N–21 cruise missiles; apron space for 4 to 12 Soviet Bear type intercontinental bombers capable of delivering nuclear weapons; over 55 MIG–23/27 nuclear-delivery capable fighter-bombers; over 200 MIG–21 nuclear-delivery-capable fighter-bombers, berthing piers for several types (Golf, Echo, and Victor Classes) of Soviet nuclear and diesel-powered submarines carrying nuclear missiles; Soviet nuclear weapons storage and handling facility at Cienfuegos Naval Base; Soviet Chemical and Biological Warfare storage and training facilities; and the Soviet Combat Brigade.

SSN–21 (SEA-WOLF)

Mr. LIEBERMAN. Mr. President, I would like to make some remarks about one of the most important new weapons systems that will be entering the U.S. inventory during the 1990's: the SSN–21 or Sea-Wolf. At a time of budget austerity, it is imperative that we get the most mileage out of our defense dollars. Because of its dramatic technological improvements over our existing submarines, the Sea-Wolf will allow us to maintain our command of the sea. And as a maritime nation, control of the seas is a fundamental national security requirement for the United States.

We have heard much talk about the declining Soviet military threat. And it is true that with the collapse of the Warsaw Pact, the threat of a Soviet invasion of Western Europe has decreased dramatically.

On the other hand, perestroika has stopped short of the Soviet submarine yards. The Soviets are currently building six classes of submarines: the Kilo diesel-electric-powered submarine; the Victor III; Sierra; and Akula nuclear-powered attack submarines, the Oscar II nuclear-powered cruise missile attack submarine, and the Delta IV nuclear-powered ballistic missile submarine. This compares with only three classes currently under construction in the United States, of which two—the 688 and the Trident class—are now winding down.

To support their massive submarine effort, the Soviets are employing no less than five submarine construction yards, as opposed to only two in this country. One of those Soviet yards is so big that it could contain our two yards. In fact, the nine submarines launched by the Soviets last year, including five nuclear-powered units and four diesel boats, equals or exceeds their production since 1982.

Moreover, the Soviets have substantially narrowed the qualitative gap between their boats and ours. These advances are largely due to the crucial intelligence that they procured through the Walker spy case and the illegal diversion of Toshiba-Kongsberg technology during the 1980's. What they could not achieve through their own research, they accomplished through guile.

As of now, the Soviets' newest submarines constitute only a modest portion of their total submarine fleet. But at current construction rates they will soon constitute the majority of the Soviet undersea force. And lest we think that Soviet economic difficulties will force a slowdown in construction, Soviet military adviser Sergei Akhromeyev said only last May before the Senate Armed Services Committee that the current construction rate—four to five nuclear-powered submarines a year—will continue indefinitely.

As if this was not worrisome enough, Third World countries are increasingly purchasing submarines from the industrial powers. At the end of World War II, 6 countries had submarines; today, 43 countries do, including Libya, Iran, Syria, and North Korea. Iraq is now negotiating to acquire submarines. Aside from those operated by the U.S. and U.S.S.R., there are some 400 operating submarines, nearly half of which are owned by 19 third world nations. These countries are becoming naval powers through the purchase of relatively inexpensive but very quiet diesel submarines, carrying crews of only 125 to 150 men. The diesel submarine is becoming the poor man's aircraft carrier.

In light of the continued threat from the Soviet Union and growing Third World submarine forces, the need for the Sea-Wolf, with its dramatic advantages over our best attack, submarine, the improved 688, is clear. Let us now turn to these advantages.

Because of its increased size, the Sea-Wolf can carry twice as many torpedoes and cruise missiles as the improved 688. And unlike the improved 688's, it will also be able carry the new generation of improved torpedoes and cruise missiles that are now being planned.

The Sea-Wolf's larger cruise missile capacity will be particularly important against Third World targets. Advances in electronic systems have produced cruise missiles that are extremely accurate over ranges of hundreds of miles. If such cruise missiles had been fully operational in 1986, for example, we could have attacked Libyan military targets without risking the lives of pilots or innocent civilians. And while surface ships can also fire cruise missiles, they are vulnerable to retaliation. The Sea-Wolf will be the true Stealth bomber of the 21st century.

The Sea-Wolf's second major advantage over the improved 688 is in the electronics system. The Sea-Wolf's sensor capability will have three times the detection capability of the I–688. This will allow it to detect, track and attack Soviet submarines before being attacked.

Improved sensors will also improve the ability of the Sea-Wolf to determine which navy a submarine that it is tracking belongs to. It is not enough, for example, for a United States submarine to know that a given submarine was built in Germany. It must know whether that submarine belongs to our NATO ally or to a potentially hostile Third World country that has bought a German submarine. With the proliferation of submarines throughout the Third World, this ability to distinguish will be increasingly important.

Third, the Sea-Wolf's propulsion system will make it 10 times more

quiet over its full range of operating speeds than the I-688 and 70 times more quiet than the initial generation of 688's. And noise is the key factor in reducing a submarine's vulnerability to other attack submarines and ship-launched torpedoes.

Last but certainly not least, the Sea-Wolf's superior and quieter propulsion system will enable it to have twice the tactical sped as the I-688. Tactical speed is the speed at which a submarine is still quiet enough to remain undetected while tracking enemy submarines effectively. Overall, the Sea-Wolf's propulsion system represents a 75-percent improvement over the I-688's—that is, the Sea-wolf can operate 75 percent faster before being detected.

Given the dramatic advantages of the Sea-Wolf over the I-688, it is not surprising that few observers have questioned the need for the Sea-Wolf. The reservations that have been expressed have focused on the optimal rate of deployment. Specifically, the General Accounting Office has recommended a slower rate of deployment because of possible problems with the Sea-Wolf's software, the BSY-2 system. The GAO is basing its analysis on the fact that the Improved-688's software, the BSY-1 system was not fully ready when the first 688 was launched.

But it is precisely because the Navy has learned from the mistakes made in the BSY-1 system that it is so much better positioned to manage the BSY-2 software development effort today. Unlike its approach to the BSY-1, the Navy has designed the new software as a combination of modules that can be worked on separately. So, problems with one part of the software development will not hold up work on the other parts. Moreover, the schedule calls for delivery of the software to be completed 6 months before the boat is commissioned. Finally, the Navy inserted an extra year between the start of design and the lead ship award to avoid delay if problems arise with the BSY-2 or any other components of the submarine. This represents twice the time devoted to the highly successful Trident Program.

Not only would an undue delay of the Sea-Wolf Program be unnecessary, it would also be damaging. The work crews that have begun work on the Sea-Wolf that was funded in the fiscal year 1989 budget would not be able to transfer quickly their knowledge to the follow-on Sea-Wolfs. The so-called learning curve would suffer. Moreover, the Sea-Wolf's vendor base would undergo serious attrition. Vendors who would go out of the business because of delay would have to be replaced by other manufacturers at significant cost. Submarine construction is like other complex industrial production: To obtain quality, efficiency, high productivity, and cut production costs, once you put an assembly line in place, you should keep it in place. Overall, the Navy estimates that deferring one fiscal year 1991 Sea-Wolf to fiscal year 1992 would increase the cost by at least $100 million.

Mr. President, I believe that the Sea-Wolf's advantages in weapons capacity, electronics, and tactical speed make a cogent case. And I believe that the Navy's careful approach to the BSY-2 software issue will avoid any major problems.

We need the Sea-Wolf's advances because the United States is a maritime nation and control of the seas will remain a key component of our defense strategy. As the U.S. withdraws from its bases overseas—as appears to be inevitable in a number of cases—we will need to project power from our home bases. And a robust submarine force, as embodied by the Sea-Wolf, is one of the main means of doing this. And so I hope that the Senate conferees will give a sympathetic consideration to the Sea-Wolf when they meet. The time for the Sea-Wolf is now.

GARN CHEM DEMIL AMENDMENT

Mr. NUNN. Mr. President, although the conference report on the fiscal year 1990 Defense authorization act directed the Secretary of Defense to "proceed as expeditiously as possible with the project to develop an operational cryofracture facility at the Tooele Army Depot, Utah," the administration requested no funding in fiscal year 1991 for the cryofracture program. However, on January 25 the Army did restart the cryofracture test program using unobligated fiscal year 1989 funds that were available for this purpose. The Army is presently conducting an 18-24 month test to verify the design of the cryofracture/incineration process and to gather data that can be used to compare cryofracture with the Army's "baseline" disassembly/incineration process.

The committee has been advised by the Army that it has an unfunded requirement for $11.3 million for the cryofracture program in fiscal year 1991. According to the Army, these funds are needed to complete the development and testing of the cryofracture/incineration process, complete process design and initiate and complete the design of a full-scale cryofracture demonstration facility. The amendment by the Senator from Utah would authorize $11.3 million for these purposes using as an offset $11.3 million in funds no longer needed in fiscal year 1991 for two programs: $6.3 million from the Air Force Defense Meteorological Satellite Program [DMSP] and $5 million from the Army R&D line for electronics and electronic devices.

None of the funds authorized by this amendment are to be used to begin construction of a full-scale cryofracture demonstration facility or to conduct site preparations for such a facility. However, if the Army completes the current demonstration/evaluation tests and desires to proceed with site preparation for this facility, the committee would be willing to carefully consider a reprogramming request.

Mr. President, I urge adoption of the amendment.

FULL-TIME MANNING OF THE NATIONAL GUARD AND RESERVE COMPONENTS

Mr. BRYAN. Mr. President, I support the increased assignment of Active Force military personnel to the National Guard and Reserve components in order to improve the integration of the Active and Reserve components. I think this is very important as we rely more and more on our National Guard and Reserve components as our overall military force levels come down.

Mr. President, I have one concern that I want to address to the chairman of the Armed Services Committee that is in regard to the use of these personnel in the National Guard. I want to ask the chairman if he sees any problems with these personnel participating in State missions of the National Guard because of their active military status.

Mr. NUNN. Mr. President, I want to assure the Senator from Nevada that we looked into the matter of the utilization of Active Force personnel in the National Guard.

Section 315 of Title 32 of the United States Code authorizes the Secretary of the Army and the Secretary of the Air Force to detail officer and enlisted personnel to duty in the National Guard. The section further provides that officers so detailed may be appointed in the National Guard without vacating a regular appointment in the Active Force.

I am not aware of any restrictions that have been placed on Active Force personnel assigned to the National Guard under this authority. If I become aware of any problems with the utilization of these personnel in National Guard State missions, I assure the Senator that I will address them when we go to conference with the House.

I appreciate the Senator's interest in and support of the provision in this bill which I believe is essential to strengthening the relationship between the Active and Reserve components.

DEFENSE DIVERSIFICATION

Mr. LIEBERMAN. Mr. President, I rise today to speak on the issue of defense diversification, or simply the issue of facilitating an orderly transition to a period of lower defense spending.

Throughout our history the level of U.S. defense spending has fluctuated greatly in response to a variety of

threats to our national security. In 1944, during the peak of World War II, defense spending represented approximately 39.2 percent of our total GNP; in 1953, during the Korean war, defense spending represented approximately 14.4 percent of total GNP; and in 1968, during the Vietnam war, defense spending rose to 9.6 percent of GNP.

More recently, between the years 1979 and 1986, the United States waged what we may now be able to describe as the final battle of the cold war. United States defense spending rose from 4.8 to 6.5 percent of GNP—the largest peace time buildup in our history. In fact, Mr. President, in 1989 the Federal Government spent approximately $300 billion for defense, and if we adjust this figure for inflation it represents roughly the same amount as at the 1953 Korean war peak and the 1968 Vietnam war peak.

Unlike most other conflicts, however, the cold war was not fought on the battlefields, on the oceans, or in the skies. This was a war of wills and minds. Our strategy rested on the premise that the United States must have a technological edge in order to offset either the numerical advantage or unpredictable nature of our adversaries. As such, an important part of the war was fought in factories and laboratories throughout the country, and the soldiers included not only the armed services, but some of America's finest engineers, and scientists, and skilled workers.

Now, in significant part due to their efforts, democratization and economic reform are emerging in both Eastern Europe and the Soviet Union, and the United States may be on the verge of declaring victory in this first cold war.

If so, the United States no longer needs to place the containment of communism as our top spending priority. We will have the opportunity to reevaluate our national defense needs and reorder our national spending priorities. I believe, as others have indicated, that we may be able to reduce the Defense budget by as much as 25 percent over the next 5 years. If this is accomplished we will surely have the opportunity to address many domestic issues that have for too long been ignored—the budget deficit, education, housing, health care, and the like.

These opportunities will be both refreshing and exciting, but, it is important to remember that the actions we take to reduce the level of defense spending will have broad and direct ramifications for the workers, communities, and businesses who, for reasons of national security, have become economically dependent of defense programs.

I have spent much time reading about the defense adjustment debate, assessing both the potential macro and microeconomic effects, reviewing the policy options, and speaking to many groups—large and small defense contractors, labor unions, academics, defense experts, economists, and others. As a result, a few weeks ago Senator DODD and I introduced the Defense Realignment and Worker Assistance Act of 1990, a bill designed to assist in the economic adjustment of workers, communities, and businesses adversely effected by the reduction of U.S. defense spending.

My legislation attempts to minimize this impact by creating a bridge, if you will, to provide for an orderly transition, and a unified governmental response to reduced levels of defense spending.

Mr. President, I believe diversification initiatives are important for many reasons.

First, we have already made an enormous investment, both directly and indirectly, in our defense infrastructure. In the past we have evaluated levels of defense spending on either national security or budgetary grounds. It is clear, however, that since defense industries now represent a major part of our remaining industrial, technological, and manufacturing base, that it will be essential to make these decisions on economic grounds as well.

While Japan and Germany have been pouring capital into their civilian industrial base, we have been pouring it into our defense base. We are now considering scrapping a big piece of what's left of the most advanced part of our industrial base. Unless we do this intelligently and provide for a careful transition, the American economy and American competitiveness may be permanently scared.

Thus, in order to protect this investment and our economic future, we will need to appraise our manufacturing and industrial base and then assess how best to effectuate a successful transition. If possible, cutbacks in this area should be undertaken so as to not adversely affect, and whenever possible to enhance, our industrial and technological capabilities. If we disregard this step, an important part of our economic future will surely be at risk.

Second, there has been much discussion in the media, among scholars, and in Congress about how ill-prepared our work force is to perform the jobs businesses need done, and how this gap between jobs and the skills of workers will continue to grow as we approach the 21st century. The significant growth in the U.S. economy in the first half of the 20th century has been attributed to increases in human capital or the expansion of workers' knowledge. In order for us to grow in the first half of the 21st century, we must have a work force prepared to meet the technical requirements of the workplace of the future.

Thus, as our inability to compete in the international marketplace becomes more and more apparent, it is clearly in our best interest to retain and reuse one of the finest trained and highly skilled work forces in the world—our defense workers—highly qualified and motivated—a pearl of the American work force. They can and should play an important role in the peaceful economic wars that lay ahead.

And finally, I simply believe the Federal Government has a compelling obligation to mitigate the economic distress caused directly by its actions. I believe America's defense workers are, in a way, veterans of the cold war and thus deserve our assistance during this time of transition. Why should those who worked so hard to guarantee our security during times of conflict now be forced to pay the price for peace?

Just as it was in our national interest to spend billions and billions of dollars on defense over the last decade, I believe, for the reasons I have outlined, that it is now very much in our national interest to provide for an orderly transition and to enact diversification legislation concurrent with reductions in defense spending.

Mr. President, I know of the need to assist in the transition of defense workers and industries from firsthand experience. Throughout the cold war, as it was in the Revolutionary War and in other conflicts involving our Nation, Connecticut has been an arsenal of democracy. My State receives approximately $5.8 billion in direct defense expenditures and another $4.2 billion in indirect defense expenditures. On a per capita basis, that amounts to approximately $3,100 per resident which results in approximately 5.5 percent of Connecticut's work force employed in defense or defense-related jobs.

Thousands of my constituents have been working in round-the-clock shifts to produce submarines, tanks, helicopters, and military aircraft engines—all the best in the world.

In my legislation I have attempted to address the diversification issue in a well balanced and comprehensive manner that addresses industrial, business, work force, and community issues. This legislation I have introduced:

Calls for a study so we can better understand the extent to which and how diversification of defense industries to nondefense production can be accomplished;

Creates a Presidential Council on Economic Diversification to coordinate the efforts of Federal agencies and programs for the purpose of assisting communities, workers, and businesses in economic diversification;

Establishes a defense industrial diversification account for businesses wishing to diversify from relying primarily on defense contracts to becoming more integrated into the civilian sector. This account would function much like an IRA;

Establishes within the Small Business Administration a permanent Office of Small Business Diversification, and creates a small business diversification guaranteed loan or grant program;

Requires employee notification be given for qualified employees 90 days prior to any layoff, provides severence pay for 1 year equal to 65 percent of average State manufacturing salary for durable goods, and provides basic health benefits for 1 year;

Amends title III of the Job Training Partnership Act to increase the Federal set-aside for displaced workers and modifies the formula used to disburse funds to States;

Allows qualified defense workers who have been laid off to withdraw funds from their individual retirement account to pay the principal or interest on a mortgage of his or her primary residence or for the rental costs of his or her primary residence;

Identifies communities that will be substantially and seriously affected by defense layoffs and allows impacted communities to be eligible for title IX community planning grants under the Economic Development Administration;

Establishes an Office of Commercial and Defense Product Integration in the Department of Defense to implement policies and procedures designed to achieve a better integration of commercial production processes and defense procurement practices which will promote diversification by defense firms, as well as reduce the cost of defense products; and

And finally, establishes a Commission on Military Budget Reform to study the desirability and feasibility of Congress instituting a 3-year budget cycle for defense contracting. This multiyear approach can have the effect of reducing unit costs, increasing efficiency, and protecting jobs.

Mr. President, I would like to applaud the work the majority leader, Mr. MITCHELL, has done on defense adjustment. His decision to appoint the Task Force on the U.S. Economy in the 1990's was instrumental in raising the awareness of this issue and bringing us to where we are today.

I would also like to commend Senator RIEGLE, and the members of the task force for their hard work on the issue, and Senator BINGAMAN for holding preliminary hearings on defense adjustment in his Subcommittee on Defense Industry and Technology in early May. I would also like to commend Senator PELL who introduced the Defense Diversification and Adjustment Act earlier this year.

Mr. President, we will face a number of issues as we debate the fiscal year 1991 budget—a crippling budget deficit, a chronic trade deficit, the savings and loan bailout, and an array of domestic issues demanding our time and attention. This, in combination with the global crumbling of communism, suggests that our defense budget must be reduced. What I am saying with my legislation is that we can do this one of two ways—either we can cut programs, troops, and contracts without regard for the consequences of our actions, or for a relatively low cost, we can protect our investment in both our work force and our industrial base and provide for an orderly, less painful, transition to the more peaceful environment that lies ahead.

I strongly support the work done on defense adjustment by the task force, and was pleased to see many of the proposals and themes contained in my legislation included in their proposal. The work done thus far represents a good beginning for a much larger national security and economic security debate that lies ahead.

I would also like to commend the work the House of Representatives has done on this issue under the leadership of Mr. GEPHARDT, GEJDENSON, MAVROULES, and Ms. OAKAR. I understand it is likely that the House will pass a more expansive program than we will enact here, and I would urge the conferees to recognize the prudence of good solid planning at all levels and give the House proposal every consideration.

I see Senator BINGAMAN on the floor who chairs the Armed Services Subcommittee on Defense Industry and Technology. Senator BINGAMAN has been a true leader on these issues and I commend him for the effort he has put forth both through his subcommittee and on Senator RIEGLE's task force.

I know Senator BINGAMAN is interested in exploring the potential industrial and technological impact of defense reductions—reductions which can adversely impact our military readiness, specifically, and our economic and industrial competitiveness, generally.

Senator BINGAMAN held initial hearings in his subcommittee earlier this year, and even though I know some of what is in my legislation is outside his specific jurisdiction, at this point I would like to request that he continue the work he has done so far and agree to hold additional hearings next year so we can further explore our many options and continue the work accomplished this year.

Mr. BINGAMAN. I agree with Senator LIEBERMAN that this is an important issue, and would like to join him in commending Senator RIEGLE for his leadership on the Task Force on the U.S. Economy in the 1990's.

Adjusting to new and lower levels of defense spending provides a great opportunity for America to move ahead and focus on pressing domestic issues that have not received the attention they deserve over the last decade. In particular, it is an opportunity for us to focus on competitiveness in the global marketplace. Unfortunately, the declining defense budget will adversely affect local communities that have become dependent on defense spending over the last decade. I hope that we can utilize existing programs such as the Economic Development Administration, the Office of Economic Adjustment, and the Job Training Partnership Act to assist affected communities and workers, just as we should be assisting communities and workers impacted for other economic reasons.

As Senator LIEBERMAN noted, I held a hearing in my Armed Services Subcommittee earlier this year on this issue. I believe that there is more we can do in Armed Services Committee jurisdiction to better integrate the civilian and military industrial sectors and ease the transition for many companies. I also believe that we as a country need to do a better job of researching, developing, and producing critical technologies, particularly dual-use technologies that will impact both defense and competitiveness, and that the defense industry has a role to play in this area.

I believe that we will hold further hearings on these issues in the years to come, and I look forward to working with Senator LIEBERMAN on this matter and taking a close look at the legislation he has proposed.

BUILDING ADDITIONAL NUCLEAR REACTORS

Mr. SIMON. Mr. President, one of the really fine members of the House of Representatives is Congressman LANE EVANS from Illinois.

He has shown compassion, common sense, and courage.

Recently, he had an op ed piece in the Washington Post about the contruction of two nuclear reactors that the Energy Department has asked for.

What he says makes so much sense that I urge my colleagues in the House and Senate to look at this. I know this battle is probably lost for this fiscal year, but it must be fought again.

The Energy Department estimates the cost of these two, large reactors at $7.4 billion, but a recent congressional study shows that figure could be as high as $40 billion.

With all the problems that we have on the deficit, here is an excellent place to start saving some money.

I ask unanimous consent to have the LANE EVANS piece printed in the RECORD, and I urge my colleagues to read it.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 31, 1990]

WATKINS AND WEAPONS: DON'T TAKE THAT $90 BILLION PATH

(By Lane Evans)

Secretary of Energy James Watkins has informed the Senate Armed Services Committee that he wants to build and operate two new nuclear reactors to produce warhead materials. He also wants to restart the three remaining aging production reactors that have been shut down for safety reasons and to operate them until the new reactors are ready. The price tag for this strategy could run to $90 billion.

In fact, the Energy Department is marching ahead with its plan prior to any persuasive analysis of what our nuclear-weapon materials requirements will be in a post-Cold War world. Before Congress follows the administration down this multibillion-dollar path, it should explore an alternative course that would safeguard our national security at a fraction of the cost.

At issue is the need for continued production of two ingredients of modern weapons—plutonium and tritium. Unless we plan to enlarge our arsenal, further production of plutonium—which last for tens of thousands of years and is already in oversupply—is pointless.

Tritium, on the other hand, decays at a relatively rapid pace—half of a given amount disappears in 12 years. Thus, the tritium used in nuclear weapons must be replenished every few years to keep the warheads operational. At a time of arms reductions, however, new tritium need be produced for this purpose only if reductions fail to keep pace with tritium's decay. If the number of nuclear weapons is reduced by at least one-half every 12 years—we can get by without new tritium production by using instead the tritium recovered from retired weapons.

Construction of new reactors should be deferred until it becomes clear how much smaller our future nuclear arsenal will be and how much new tritium will actually be needed to sustain it. Substantial quantities of tritium needed to replenish our remaining nuclear weapons are already being recovered from weapons now being retired, such as the obsolete naval tactical missiles, and the process can be continued with soon-to-be-retired weapons, including short-range nuclear artillery shells that have no target in a unified Germany and strategic warheads to be retired under START.

Assuming we continue to reduce our nuclear arsenal, enough tritium can be recovered from retired weapons to meet the tritium requirements of 3,000 warheads for more than 50 years. Clearly, we need not rush into restarting the reactors at Savannah River, S.C., or into building two replacements.

To be safe, we must be prepared to restart tritium production in the event that arms reduction breaks down. We should continue to repair and restore the three Savannah River reactors at a relative bargain-basement price of $2.5 billion and hold them on "cold standby." Once repaired, these three reactors have "no life-limiting features," according to the Department of Energy. Operating at half power, they would provide more than enough tritium to replenish our entire existing nuclear arsenal.

The Energy Department estimates the cost of two new large rectors it wants at $7.4 billion (in 1990 dollars), but a recent congressional study of Energy Department construction projects suggests the price will come in as much as 500 percent higher—at about $40 billion. Add to this the $42 billion cost (in 1990 dollars) of operating these reactors over their 40-year lives, and the total cost becomes $80 billion. Add to this the $2.5 billion for repairing the Savannah River reactors and the $10 billion cost of operating them for 10 years until the new reactors are ready, and taxpayers can look forward to spending $90 billion for resuming tritium production we may never need.

In the face of the federal deficit, the savings and loan bailout, the costs of cleaning up our nuclear-weapons production sites and the calls to shift defense spending into social and environmental programs, the prudent course is to avoid premature commitment to renewed production of nuclear weapons materials. That is why Congress should cut back sharply on initial funding for the two new production reactors and require the Energy Department to certify that there is a real need for new tritium or plutonium before restarting the existing reactors or breaking ground for their replacements.

ORDER OF PROCEDURE

Mr. NUNN. Mr. President, I ask unanimous consent that any amendment previously agreed to that changed figures already amended be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I believe that is all the business we are going to be able to conduct this evening. We have had a long day and a very productive day.

I thank all Members who have been here and worked long and hard and that includes the floor manager, Senator WARNER, certainly includes Senator MCCAIN, who has been here late hours of the evening.

ORDERS FOR TOMORROW

Mr. NUNN. Mr. President, I ask unanimous consent that when the Senate adjourns today, it stand in adjournment until 9 a.m., on Saturday, August 4; and that, when the Senate reconvenes on August 4, the Journal of Proceedings be deemed to have been approved to date; the call of the calendar be waived, and no motions or resolutions come over under the rule; I further ask unanimous consent that the time for the two leaders, be reserved for their use later in the day, that the morning hour be deemed expired, and that the Senate resume consideration of the unfinished business, S. 2884.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT

Mr. NUNN. I move that the Senate stand in adjournment under the previous order.

The motion was agreed to, and the Senate at 3:08 a.m., adjourned until Saturday, August 4, 1990, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate August 3, 1990:

DEPARTMENT OF STATE

JULIETTE CLAGETT MCLENNAN, OF THE DISTRICT OF COLUMBIA, FOR THE RANK OF AMBASSADOR DURING HER TENURE OF SERVICE AS THE U.S. REPRESENTATIVE ON THE COMMISSION ON THE STATUS OF WOMEN OF THE ECONOMIC AND SOCIAL COUNCIL OF THE UNITED NATIONS.

THE FOLLOWING-NAMED PERSONS TO BE THE REPRESENTATIVE AND ALTERNATE REPRESENTATIVES OF THE UNITED STATES OF AMERICA TO THE 34TH SESSION OF THE GENERAL CONFERENCE OF THE INTERNATIONAL ATOMIC ENERGY AGENCY:

REPRESENTATIVE:

JAMES D. WATKINS, OF CALIFORNIA.

ALTERNATE REPRESENTATIVES:

RICHARD T. KENNEDY, OF THE DISTRICT OF COLUMBIA.

MICHAEL H. NEWLIN, OF MARYLAND.

KENNETH M. CARR, OF CALIFORNIA.

U.S. INFORMATION AGENCY

PAULA J. DOBRIANSKY, OF VIRGINIA, TO BE AN ASSOCIATE DIRECTOR OF THE UNITED STATES INFORMATION AGENCY, VICE CHARLES EDWARD HORNER, RESIGNED.

PEACE CORPS NATIONAL ADVISORY COUNCIL

THE FOLLOWING-NAMED PERSONS TO BE MEMBERS OF THE PEACE CORPS NATIONAL ADVISORY COUNCIL FOR THE TERMS INDICATED:

FOR THE REMAINDER OF THE TERM EXPIRING OCTOBER 6, 1990:

MEREDITH MORGAN DALE, OF THE DISTRICT OF COLUMBIA, VICE MARC L. HOLTZMAN.

FOR A TERM EXPIRING OCTOBER 6, 1991:

RUTH GARDNER COX, OF TEXAS, VICE ALICE ROXANA THOMPSON, TERM EXPIRED.

TAHLMAN KRUMM, JR., OF OHIO, VICE COLLEEN TOY WHITE, TERM EXPIRED.

FOR A TERM EXPIRING OCTOBER 6, 1992:

MEREDITH MORGAN DALE, OF THE DISTRICT OF COLUMBIA. (REAPPOINTMENT.)

THE JUDICIARY

WILLIAM B. SHUBB, OF CALIFORNIA, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF CALIFORNIA VICE RAUL A. RAMERIZ, RESIGNED.

GARY L. TAYLOR, OF CALIFORNIA, TO BE U.S. DISTRICT JUDGE FOR THE CENTRAL DISTRICT OF CALIFORNIA VICE FERDINAND F. FERNANDEZ, ELEVATED.

JAMES WARE, OF CALIFORNIA, TO BE U.S. DISTRICT JUDGE FOR THE NORTHERN DISTRICT OF CALIFORNIA VICE ROBERT F. PECKHAM, RETIRED.

JEAN C. HAMILTON, OF MISSOURI, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF MISSOURI VICE JOHN F. NANGLE, RETIRED.

LEGAL SERVICES CORPORATION

THOMAS D. RATH, OF NEW HAMPSHIRE, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE LEGAL SERVICES CORPORATION FOR A TERM EXPIRING JULY 13, 1993, VICE JOHN N. ERLENBORN, RESIGNED.

THE FOLLOWING NAMED PERSONS TO BE MEMBERS OF THE BOARD OF DIRECTORS OF THE LEGAL SERVICES CORPORATION FOR THE TERMS INDICATED, TO WHICH POSITIONS THEY WERE APPOINTED DURING THE RECESS OF THE SENATE FROM NOVEMBER 22, 1989, TO JANUARY 23, 1990.

FOR A TERM EXPIRING JULY 13, 1992:

JO BETTS LOVE, OF MISSISSIPPI, VICE LORAIN MILLER, TERM EXPIRED.

GUY VINCENT MOLINARI, OF NEW YORK, VICE CLAUDE GALBREATH SWAFFORD, TERM EXPIRED.

JEANINE E. WOLBECK, OF MINNESOTA, VICE HORTENCIA BENAVIDEZ, TERM EXPIRED.

FOR A TERM EXPIRING JULY 13, 1993:

HOWARD H. DANA, JR., OF MAINE, VICE THOMAS F. SMEGAL, JR., TERM EXPIRED.

LUIS GUINOT, JR., OF PUERTO RICO, VICE MICHAEL B. WALLACE, TERM EXPIRED.

PENNY L. PULLEN, OF ILLINOIS, VICE WILLIAM CLARK DURANT III, TERM EXPIRED.

GEORGE W. WITTGRAF, OF IOWA, VICE PAUL B. EAGLIN, TERMS EXPIRED.

MERIT SYSTEMS PROTECTION BOARD

ANTONIO C. AMADOR, OF CALIFORNIA, TO BE A MEMBER OF THE MERIT SYSTEMS PROTECTION BOARD FOR THE TERM OF 7 YEARS EXPIRING MARCH 1, 1997, VICE MARIA LUIA JOHNSON, TERM EXPIRED.

SECURITIES AND EXCHANGE COMMISSION

RICHARD Y. ROBERTS, OF VIRGINIA, TO BE A MEMBER OF THE SECURITIES AND EXCHANGE COM-

MISSION FOR THE TERM EXPIRING JUNE 5, 1995, VICE JOSEPH A. GRUNDFEST, RESIGNED.

IN THE AIR FORCE

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL ON THE RETIRED LIST PURSUANT TO THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. HARRY A. GOODALL, [redacted], U.S. AIR FORCE.

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL ON THE RETIRED LIST PURSUANT TO THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. CRAVEN C. ROPGERS, JR., [redacted], U.S. AIR FORCE.

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL ON THE RETIRED LIST PURSUANT TO THE PROVISIONS OF TITLE 10, UNITED STATES CODE, SECTION 1370:

To be lieutenant general

LT. GEN. CARL R. SMITH, [redacted], U.S. AIR FORCE.

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, UNITED STATES CODE, SECTION 601:

To be lieutenant general

MAJ. GEN. JAMES T. CALLAGHAN, [redacted], U.S. AIR FORCE.

DEPARTMENT OF STATE

ARLENE RENDER, OF VIRGINIA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF THE GAMBIA.

HERBERT DONALD GELBER, OF FLORIDA, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF MALI.

GORDON L. STREEB, OF COLORADO, A CAREER MEMBER OF THE SENIOR FOREIGN SERVICE, CLASS OF MINISTER-COUNSELOR, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF ZAMBIA.

LINTON F. BROOKS, OF VIRGINIA, FOR THE RANK OF AMBASSADOR DURING HIS TENURE OF SERVICE AS DEPUTY HEAD OF DELEGATION TO THE NUCLEAR AND SPACE TALKS.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

SCOTT M. SPANGLER, OF ARIZONA, TO BE AN ASSISTANT ADMINISTRATOR OF THE AGENCY FOR INTERNATIONAL DEVELOPMENT, VICE CHARLES L. GLADSON, RESIGNED.

BOARD FOR INTERNATIONAL BROADCASTING

THE FOLLOWING NAMED PERSONS TO BE MEMBERS OF THE BOARD FOR INTERNATIONAL BROADCASTING FOR TERMS EXPIRING APRIL 28, 1991:

CHER FELDMAN HALPERN, OF NEW JERSEY, VICE CLAIR W. BURGENER, TERM EXPIRED.

KARL C. ROVER, OF TEXAS, VICE EDWARD NOONAN NEY, TERM EXPIRED.

U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY

THE FOLLOWING NAMED PERSONS TO BE MEMBERS OF THE U.S. ADVISORY COMMISSION ON PUBLIC DIPLOMACY FOR THE TERMS INDICATED:

FOR A TERM EXPIRING JULY 1, 1992:

FITZHUGH GREEN, OF THE DISTRICT OF COLUMBIA, VICE PRISCILLA L. BUCKLEY, TERM EXPIRED.

FOR A TERM EXPIRING JULY 1, 1993:

TOM C. KOROLOGOS, OF VIRGINIA. (REAPPOINTMENT)

THE JUDICIARY

DAVID F. LEVI, OF CALIFORNIA, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF CALIFORNIA, VICE EDWARD DEAN PRICE, RETIRED.

SAMUEL B. KENT, OF TEXAS, TO BE U.S. DISTRICT JUDGE FOR THE SOUTHERN DISTRICT OF TEXAS, VICE HUGH GIBSON, JR., RETIRED.

DEPARTMENT OF JUSTICE

STEPHEN B. HIGGINS, OF MISSOURI, TO BE U.S. ATTORNEY FOR THE EASTERN DISTRICT OF MISSOURI FOR THE TERM OF 4 YEARS VICE THOMAS E. DITTMEIER, TERM EXPIRED.

DORIS SWORDS POPPLER, OF MONTANA, TO BE U.S. ATTORNEY FOR THE DISTRICT OF MONTANA FOR THE TERM OF 4 YEARS VICE BYRON H. DUNBAR, RESIGNED.

DONNA M. OWENS, OF OHIO, TO BE DIRECTOR OF THE BUREAU OF JUSTICE ASSISTANCE. (NEW POSITION)

CHARLES B. DEWITT, OF THE DISTRICT OF COLUMBIA, TO BE DIRECTOR OF THE NATIONAL INSTITUTE OF JUSTICE, VICE JAMES K. STEWART, RESIGNED.

INTERSTATE COMMERCE COMMISSION

GAIL C. MCDONALD, OF OKLAHOMA, TO BE A MEMBER OF THE INTERSTATE COMMERCE COMMISSION FOR A TERM EXPIRING DECEMBER 31, 1994, VICE PAUL H. LAMBOLEY, TERM EXPIRED.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

THE FOLLOWING NAMED PERSONS TO BE MEMBERS OF THE NATIONAL COUNCIL ON THE HUMANITIES FOR TERMS EXPIRING JANUARY 26, 1996;

HELEN GRAY CRAWFORD, OF LOUISIANA, VICE JEAN VAUGHAN SMITH, TERM EXPIRED.

MARGARET P. DUCKETT, OF PENNSYLVANIA, VICE JAMES V. SCHALL, TERM EXPIRED.

HENRY H. HIGUERA, OF MARYLAND, VICE GEORGE D. HART, TERM EXPIRED.

PETER SHAW, OF NEW YORK, VICE CHARLES RAY RITCHESON, TERM EXPIRED.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

THE FOLLOWING NAMED PERSONS TO BE MEMBERS OF THE NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE FOR THE TERMS INDICATED:

FOR THE REMAINDER OF THE TERM EXPIRING JULY 19, 1991:

CAROL K. DIPRETE, OF RHODE ISLAND, VICE GEORGE H. NASH, RESIGNED.

FOR THE REMAINDER OF THE TERM EXPIRING JULY 19, 1992:

J. MICHAEL FARRELL, OF THE DISTRICT OF COLUMBIA, VICE SALLY JO VASICKO.

NATIONAL SCIENCE FOUNDATION

HOWARD E. SIMMONS, OF DELAWARE, TO BE A MEMBER OF THE NATIONAL SCIENCE BOARD, NATIONAL SCIENCE FOUNDATION, FOR A TERM EXPIRING MAY 10, 1996, VICE CRAIG C. BLACK, TERM EXPIRED.

RAILROAD RETIREMENT BOARD

ANDREW F. REARDON, OF ILLINOIS, TO BE A MEMBER OF THE RAILROAD RETIREMENT BOARD FOR THE TERM OF 5 YEARS FROM AUGUST 29, 1988, VICE JOHN D. CRAWFORD, TERM EXPIRED.

U.S. INSTITUTE OF PEACE

MARY LOUISE SMITH, OF IOWA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE U.S. INSTITUTE OF PEACE FOR THE REMAINDER OF THE TERM EXPIRING JANUARY 19, 1991, VICE W. BRUCE WEINROD, RESIGNED.

MARY LOUISE SMITH, OF IOWA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE U.S. INSTITUTE OF PEACE FOR A TERM EXPIRING JANUARY 19, 1995. (REAPPOINTMENT)

CONFIRMATIONS

EXTENSIONS OF REMARKS

THE TRIBULATIONS OF JOE DOHERTY

HON. GARY L. ACKERMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ACKERMAN. Mr. Speaker, I would like to bring your attention to Alexander Cockburn's excellent article in the Wall Street Journal about the plight of Joe Doherty. When you examine the judicial system treatment of the Joe Doherty case, and compare it to the treatment of convicted terrorist Orlando Bosch, you too will wonder if the Justice Department has a screw loose.

As Cockburn eloquently states, "Orlando Bosch is Cuban." In 1968, his terrorist cell, Accion Cubana, initiated a number of terrorist attacks against various diplomatic, tourist, and commerce targets, to deter countries from doing business with Cuba and Castro. Convicted that same year in the United States for trying to blow up a Polish freighter off of Florida, Bosch was sentenced to 10 years in Federal prison. In 1988, after a stint in a Venezuelan jail for bombing a Cuban airliner en route to Venezuela in which 73 people died, Bosch returned to the United States, where he was arrested for violation of his parole. Cuba pressed the Justice Department to have Bosch extradited, but the application was denied on the grounds that Bosch would not get a fair trial.

Joe Doherty is Irish. He was arrested in 1983 for illegally entering the United States and has been in jail ever since. The British have sought his extradition on charges relating to the death of a member of a British commando unit. Doherty's repeated applications have consistently been denied by the Justice Department. Both the courts and the Justice Department's own Board of Immigration Appeals ruled that Doherty merits asylum and should not be deported to the United Kingdom because he will certainly not receive a fair trial. Yet the Justice Department refuses to grant Doherty asylum.

Doherty has been imprisoned since 1983. Bosch, who received parole, lives at home.

Doherty has been accused of killing a British soldier, but even a United States district court judge said, "Had this conduct occurred during the course of more traditional military hostilities there could be little doubt that it would fall within the political offense exception." Orlando Bosch was accused of, among numerous other terrorist activities, blowing up a plane and killing 73 people aboard.

Doherty is wanted by the British who are friends and allies of the United States. Bosch is wanted by Castro, one of the last scourges of communism in the world today. Doherty is now in his 8th year of imprisonment as his case continues to work its way through our court system. Bosch is free.

The full article follows. I commend it to all my colleagues.

AN IRISHMAN IN JAIL EQUALS A CUBAN OUT ON BAIL

(By Alexander Cockburn)

Orlando Bosch is a Cuban, convicted felon, a man once charged with masterminding the bombing of a civilian airliner in which 73 people died. On July 17 he was paroled in Miami and is now, somewhat relatively speaking, a free man. He has to wear an electronic ankle trace bracelet, can go outside only three hours a day, must not speak to anti-Castro militants, and has his phone tapped.

Joe Doherty is an Irishman, neither charged with nor convicted of any offense against U.S. criminal law. On June 18 he began his eighth year in a tiny cell in the Metropolitan Correctional Center in Manhattan; he is now the longest-held prisoner in the history of that institution. No less than eight times—most recently only a few weeks ago in the U.S. Court of Appeals for the Second Circuit—he has prevailed in court and immigration and Naturalization Service hearings against attempts by the U.S. government to deport him.

Yet today, Bosch is free on parole and Doherty, denied bail, is confined to a matchbox cell in a prison never designed for long-term occupancy, hence offering none of the facilities other prisons are compelled to offer. See the double standard maintained by the Bush administration eager to pander to political friends in Miami's Cuban-American community, and in London.

Start with Bosch. In 1968, his anti-Castro group Accion Cubana blew up a Japanese freighter in Tampa, damaged a British vessel off Key West and bombed eight diplomatic or tourist offices in New York and Los Angeles. The aim was to punish nations doing business with Cuba. Bosch was convicted that same year of firing a bazooka at a Polish freighter in Miami harbor and sentenced to 10 years in federal prison. He was paroled four years later and in 1974 fled the country rather than honor a subpoena in a murder case. Though both the Venezeulan and Costa Rican governments offered to send him back as a parole violator, the Justice Department exhibited no interest in his return.

In June 1976, Bosch's Accion Cubana met in the Dominican Republic with other emigre organizations such as Alpha 66. They issued a "war communique" saying Cuban civilian airliners would be attacked. Later that year a Cubana airliner, en route from Venezuela to Havana, blew up in midair shortly after a takeoff from Barbados; 73 civilians died, including all of Cuba's Olympic fencing team.

Venezuela arrested Bosch and three others and charged them with the bombing. Bosch and two others were convicted then subsequently acquitted on appeal, but nonetheless held in prison. The other accused, Luis Posada Carriles, had escaped. In view of the Bush administration's later clemency toward Bosch, we should note that during the Iran-Contra scandal. Posada surfaced in the Ilopango base in El Salvador, working alongside President Bush's old CIA buddy Felix Rodriguez in funneling illegal arms shipments to the Nicaraguan Contras. Mr. Bush was CIA director at the time Bosch and his conferees were hatching terror schemes in the Dominican Republic.

On his release from a Venezuelan prison in 1987, Bosch announced he was ready to "rejoin the struggle" and, regarding the Cubana bombing, that "all of Castro's airplanes are warplanes." In 1988 he was released and returned to the U.S., where he was arrested as a parole violator. Cuba applied to have him deported to face proceedings, but the application was denied on the grounds that Bosch would not get a fair trial. In rejecting Bosch's request for political asylum in January 1989, the acting associate attorney general wrote that "For 30 years Bosch has been resolute and unwavering in his advocacy of terrorist violence. . . . He has repeatedly expressed and demonstrated a willingness to cause indiscriminate injury and death."

In July, after a campaign by Cuban emigres in Miami in which President Bush's son Jeb expressed his support, Bosch was granted parole.

Joe Doherty was imprisoned on June 18, 1983, for having entered the U.S. illegally. The British government sought his extradition on charges arising from the shooting death of a member of the S.A.S., the British commando unit. In 1984, federal district Judge John Sprizzo held that Doherty could not be extradited under the then-existing treaty and, addressing himself explicitly to the death of the S.A.S. man, said that "The death of Captain Westmacott, while a most tragic event, occurred in the context of an attempted ambush of a British army patrol. It was the British response to that action that gave rise to Captain Westmacott's death. Had this conduct occurred during the course of more traditional military hostilities there could be little doubt that it would fall within the political offense exception."

Though the history of Joe Doherty's legal battles is long, it is also simple. He has prevailed repeatedly in court battles and in Board of Immigration Appeal hearings. Under U.S. law he merits asylum, and should not be deported to the U.K., where he would not have the certainty of a fair trial. The force of this latter point was of course much enhanced last year by the revelations of perversions of justice in the case of the "Guilford Four," released after many years in prison when a panel of British judges rules their convictions were not "safe." Nonetheless, Attorney Generals Edwin Meese and now Richard Thornburgh have repeatedly controverted both federal courts and Board of Immigration Appeals decisions, and ordered Doherty's deportation, thus seeking to circumvent the law on asylum. As Rep. Henry J. Hyde wrote to Mr. Thornburgh in May: "I believe the handling of this case involves an indefensible violation of the spirit, if not the letter, of the basic guarantees of equal justice and due processes of law. . . . The United States has never, ever, handled an extradition or de-

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.
Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

portation case the way it has handled this one."

On June 29, a federal appeals court panel granted Doherty the right to apply for asylum here, thus handing the Justice Department yet another setback. The judges concluded that Mr. Thornburgh's reversal of his own INS Appeals Board decision had been improperly influenced by geopolitical and foreign-policy considerations. Though ample sureties have been offered, Doherty's lawyer, Mary Pike, received her copy of the Justice Department's letter to a New York judge urging denial of bail to Doherty on the same day Orlando Bosch was released.

So Doherty can't get bail, even though he manifestly doesn't want to flee, given that he is litigating his ability to stay in the U.S. Bosch got 10 years for bombing a Polish vessel and for conveying by telegraph threats to the president of Mexico and Prime Minister Harold Wilson. He violated parole and became a fugitive under U.S. law. Despite this, Bosch is released and Doherty held in his cell. The Irishman should hispanicize his name, make more influential friends in Miami and start threatening Fidel Castro. This is the essential extrajudicial factor he has overlooked.

THE RENEWABLE ENERGY TECHNOLOGY TRANSFER ACT OF 1990

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROWN of California. Mr. Speaker, I am pleased to introduce the Renewable Energy Technology Transfer Act of 1990 which will enhance the movement of technology developed by Federal research programs to State and local governments and the U.S. renewable and energy efficiency industries.

During the 8 years of the previous administration, solar and renewable energy R&D suffered severe cuts and was relegated to long-term, high-risk research. During that time, our international competitors, sensing a lack of resolve by the United States to commercialize our technology, began pumping resources into Government R&D programs for short-term applied research. As a result, they have all increased their world market share in technologies in which the United States still barely holds the technical lead.

The first section of the bill provides increased authorization for the U.S. Department of Energy's State and Local Government Assistance Programs, from $5 to $6.6 million between fiscal year 1991-93, to allow U.S. industry and State governments to joint venture emerging technology projects. Government/industry joint ventures have proven themselves as an effective tool to accelerate the acceptance of new technologies in the marketplace. This legislation will encourage the U.S. Department of Energy, State governments, and the U.S. renewable energy and energy efficiency market development effort. This section also provides additional funds to existing State research entities that have proven themselves as "Centers of Excellence" for solar, renewable energy, and technology transfer.

The second section encourages further innovation in the existing Department of Energy-supported Federal laboratories in providing more aggressive outreach for and with industry, local governments, and the general public. A modest increase of $5 to $6.6 million between fiscal year 1991-93 will begin to establish a sorely needed information network geared to the applied research and actual use of these energy saving technologies. While the solar and renewable technologies have become mature and cost effective, few know about these advances in the technologies. In addition, this section provides minor funding to identify existing successful technology transfer models as a way to more broadly replicate the best mechanisms that have pushed these innovations in the marketplace.

The final section provides resources to U.S. industry to access market development information and provide overseas market outreach for the U.S. renewable energy and energy efficiency industry. Our competitors overseas currently access U.S. information to help build their technical expertise and market share. Our industry has been unable to access our own government information as quickly. These provisions allow the development of a computer information network for industry and State and local governments. The provisions also call for establishing overseas outreach offices for the U.S. industry in the key market development areas of the Pacific Rim and Caribbean Basin and Latin America which will provide a long-term industry presence to build market share.

This bill I am introducing requires less than $20 million per year over 3 years. This amount of money will leverage according to industry experts over $100 million in sales of U.S. renewable energy equipment. Expansion of renewable energy sales represents one government policy that not only promotes environmentally sound applications but results in increased American jobs and a decreased trade deficit due to its supplanting of oil imports.

The administration's request for increased solar and renewable energy R&D funding for fiscal year 1991 is a welcome sign. But research and development alone will not build markets for these technologies. More effective and aggressive technology transfer programs are the important linkage to effectively commercialize emerging technologies. This modest legislation provides a good start in that direction.

With increasing tensions in the Middle East between Iraq and Kuwait, the United States would be well advised in building our domestic alternative energy sources. Solar and renewable energy now comprise over 10 percent of U.S. energy and with greater market development incentives, could supply over 20 percent by the year 2000. Let's get on with it.

HONORING THE 25TH ANNIVERSARY OF THE SHUTESBURY, MA, ATHLETIC CLUB

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CONTE. Mr. Speaker, I rise today to extend my sincere congratulations to the Shutesbury Athletic Club located in Shutesbury, MA, on the occasion of its 25th anniversary. The club is celebrating this occasion with a dinner dance on August 25, 1990, and this affair promises to be a smashing event.

From the days of the clubs first president, Mike Plaza and friends, playing ball behind a fire shed in 1957, to the day of the club's incorporation in 1965, the Shutesbury Athletic Club has more than served its purpose of promoting athletics such as softball, baseball, basketball, bowling and pool in the community. The many trophies adorning the building can attest to that fact.

The Shutesbury Athletic Club not only promotes athletics, but also encourages community involvement in group projects and the need to share trials and triumphs among family and friends. Indeed, many of the current active members regard the club as their home away from home.

Truly the club has produced some marvelous athletic teams such as Robert Carey's 1989 softball squad, which traveled to Detroit to compete in the United States Slo-Pitch Softball Association Championship and the women's softball team which won the USSSA Massachusetts State Championship in 1985.

Many of the club's members have been around since its formation in 1957 and some of the men's softball team members have fathers who played on the same team before them. However, all of the members have strived to make the Shutesbury Athletic Club the prosperous, family-oriented place it is today.

Mr. Speaker, the town of Shutesbury and the Shutesbury Athletic Club clearly demonstrates that some of life's simple pleasures such as sports, camaraderie, and an appreciation of friendly competition are alive and well, especially, in this great little town in western Massachusetts.

Again, I give the Shutesbury Athletic Club my heartfelt congratulations on its 25 years of accomplishments, my warmest regards, and my best wishes for the club's continued existence for future generations.

TRIBUTE TO THE WORK OF REEF RELIEF'S DEEVON AND CRAIG QUIROLO

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FASCELL. Mr. Speaker, I would like to take this opportunity to call to our colleagues' attention the work of two people who are making a difference, DeeVon and Craig Quirolo. Their efforts to save Florida's fragile coral reefs can, and should, serve as an example to any volunteer efforts to improve their community.

DeeVon and Craig Quirolo have enjoyed the water resources surrounding Key West, FL, for many years, but they have also witnessed the destruction to, and slow death of, the reefs. In response to these events, the Quirolos founded Reef Relief in 1986—a nonprofit organization aimed at educating residents and visitors as well as protecting the coral reefs from fur-

ther damage. Their efforts to protect the reefs, including their work to prohibit offshore drilling near the Florida Keys, are being noticed. In fact, they were given the 123d Point of Light Award by the President during his April visit to Key Largo.

As one who has enjoyed the reefs in the Florida Keys, I thank the Quirolos for their work to preserve this precious resource for the enjoyment of future generations, I commend to our colleagues' attention John Cole's article on DeeVon and Craig Quirolo in the July issue of the Florida Keys magazine.

[From Florida Keys magazine, July 1990]

IN THE EYE OF THE STORM: DEEVON AND CRAIG QUIROLO

(By John Cole)

It was her great-great grandfather, General George C. Meade of the U.S. Army Corps of Engineers, who designed the lighthouse at Sand Key, as well as those at Sombrero and Carysfort. Four generations later, when DeeVon Quirolo of Key West and her husband, Craig, took a boat ride to Sand Key on a special mission, she went with a sense of family pride as well as a firm sense of purpose.

Their mission was launched on behalf of Reef Relief, the non-profit environmental organization founded by the Quirolos in Key West late in 1986, and it involved placing the first of what would soon total 21 permanent mooring buoys on the Sand Key coral reef. Because of the buoys, the reef's fragile coral is spared the damage of dropped or dragged anchors.

It is precisely living coral's fragility, and the several varieties of recent assaults against it, that prompted the Quirolos to put their energies where their ideals are. A licensed ocean skipper who has logged more than 40,000 ocean miles in both the Pacific and Atlantic, Craig, like many sailors, loves the sea. For the past 15 years, as the skipper of the John Alden sloop *Stormy Weather*, he has come to know the Keys unique coral reef better than most. And as a snorkeler and diver, and experienced underwater cinematographer, he has been an eyewitness to the reef's persistent degradation.

The day came in 1986 when both Craig and DeeVon looked at each other and said, "Someone has got to do something." The Quirolos became those someones. Craig began as founder and chairman of the board, DeeVon got her start as a founding board member and secretary/treasurer. Three years later she became Reef Relief's administrator, meaning that she is behind the desk the public sees first at the organization's new, waterfront headquarters at 201 William Street in Key West. With the help of Reef Relief's first grant, a small one from the Elizabeth Ordway Dunn Foundation, and donations from several concerned citizens, the headquarters is a public outreach effort, designed to inform each visitor about the current state of the reef, the nature of the several threats to its future, and some of the steps that can be taken to protect the nation's only living coral reef from even greater harm.

DeeVon finds herself spending more and more time with Reef Relief, less and less with her business. "There is more to do here," she said recently at her waterfront office, "than any of us ever imagined. I just can't find any time for the rest of my professional life."

With good reason. Reef Relief is one of those organizations born with a rocket on its back. No sooner had it produced its first bumper sticker but concerned citizens the length of the Keys began asking for more, trying to get information about how they could help, and hoping Reef Relief could lead them toward the solution to a coral crisis many Keys residents had seen coming, but felt helpless to slow.

It was Reef Relief's organizational skills and energies, perhaps more than any other single community force, that galvanized Keys' residents to take action against the suddenly very real threat of oil and gas drilling in the Gulf and offshore drilling in the Atlantic. As unthinkable as the possibility of a disaster in the fragile reef environment may have seemed, a plan was pushed to award drilling leases that included submerged lands just a few miles from backcountry hammocks already declared forever wild by the Department of the Interior. Reef Relief's campaign to articulate what was to become all but unanimous opposition from Key West to Tallahassee is a pivotal reason why the petro-threat has significantly receded during the past months. The organization's ability to respond so capably has moved it more and more into the front lines of the battles to preserve and improve water quality, now a top priority on Reef Relief's busy agenda.

Now executive director, Craig spends much of his time on the reef, investigating complaints and checking on mooring buoy maintenance. Ashore, he attends hearings, writes lawmakers and raises sustenance funds for an organization that has a host of critical regional environmental problems crying for a solution.

Aware almost from the start of the importance of what the Quirolos have wrought, citizens groups and environmental organizations have been joined by no less than the President of the United States in the rush to commend Reef Relief for its good works. Making a visit to the Keys on Earth Day, a determinedly cheerful George Bush cited the organization as one of his "thousand points of light . . .", praise which was politely accepted, although Craig Quirolo spoke forthrightly of his hope that the President would make a blanket "no-drilling-in-the-Keys" decision while he was at it. And while that step appears to have been presidentially postponed, more awards and citations are piled on a shelf at William Street, including two handsome plaques from the Key West Chamber of Commerce, an International Marine Festival of the Americas environmental protection award, a citation from the International Oceanographic Foundation and an "Organization of the Year" award from Last Stand.

"I'm going to have to get those organized and up on the wall one of these days when we're not so busy," DeeVon says between phone calls. Anyone familiar with what Reef Relief has done in four years knows those awards may stay where they are for a good, long time.

PRESERVING STATE FLEXIBILITY IN FUNDING MEDICAID

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WALGREN. Mr. Speaker, I want to urge my colleagues to cosponsor Congressman COOPER's bill, H.R. 4181, which protect States' rights to use funds raised through voluntary contributions or special taxes in meeting their responsibilities under the Medicaid program.

In recent years, Congress has placed several new mandates on States, requiring them to provide additional Medicaid health services and to bring into the program people not previously eligible. Yet HCFA proposed a regulation in February tying the States' hands in the way they raise revenues to pay the State's share of Medicaid funding. Congress placed a 1-year moratorium on HCFA which will expire on December 31, 1990. I think it is imperative that Congress act before we conclude this session to extend this moratorium or permanently prevent HCFA from further blocking the States.

Virtually every State is struggling to provide adequate health care for the poor and elderly in its Medicaid program. Yet Medicaid only covers 50 percent of the poor now. After requiring the States to meet stringent new Federal mandates, I thing it is wrong to then turn around and limit the ways a State can raise revenue to meet those mandates. The Cooper bill includes appropriate safeguards against possible abuse.

Congress approved a provision similar to this bill last year, but it was dropped from the conference committee because of a technicality. I hope the Congress can move quickly to enact this bill.

FRED SANDERS, DEVELOPER OF MODERN COLOR COPYING TECHNIQUES

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. McEWEN. Mr. Speaker, I rise today in tribute to a gentleman who may truly be considered a modern Renaissance man, Mr. Fred Sanders of Chillicothe, OH. Aside from the various community groups and organizations of which he is a member, Fred Sanders is perhaps more noted for his many patents with the Mead Corp. Were it not for the intellect, ingenuity and creativity of this man, the process of color copying would not be what it is today. It is only fitting that we honor him for the achievements he has made in bringing this technology, and several others, to our front door.

In 1939, Fred Sanders invented a coating process called "spotted paint" which is still in use today. This was the first of many inventions to follow. He attended Hendrix College in Conway, AK where he earned a bachelor of science degree in chemistry. His post-graduate work was done at the Institute of Paper Chemistry in Appleton, WI where Fred began to hone his skills and to make advancements in the copying field.

Mr. Sanders joined the Mead Corp. as a research chemist in 1958. It was not until 1980 when he first developed and tested the concept that would later lead to what is now called Cycolor. Mr. Sanders was a scientist with Mead Central Research in Chillicothe, OH and believed that images could be formed on paper by employing a microencapsulation

technique similar to that used in carbonless paper.

The minds of the other researchers and scientists were brought together and by 1984, the research team had demonstrated the process with an 8" x 10" picture of good color quality. The advancements continued throughout the next few months and in October of 1985, a fundamental scientific breakthrough was made that allowed affordable, visible light sources to be used. This discovery elevated Cycolor to a true panchromatic color process.

Cycolor products consists of a polyester film base which is coated with billions of light-sensitive microcapsules called cylith. Each cylith resembles a water-filled balloon and contains a liquid called a monomer, in which is dissolved a light-sensitive photoinitiator and either a cyan, magenta, or yellow color-forming leuco dye.

An image resembling the negative in conventional photography if formed on the Cycolor film when it is exposed to light. This exposure hardens the cyliths on the film in proportion to the amount of exposure and makes them resistant to physical rupture. The cyliths which are not exposed, do not harden.

The final image is created by bringing the cylith-coated film into direct contact with a sheet of Cycolor paper or overhead transparency material and compressing them through a set of pressure rollers. The unexposed or nonhardened cyliths break and transfer their contents to the paper or transparency material where they blend to produce a brilliant, full-color reproduction of the original.

Cycolor was the latest of over 20 patents that Fred Sanders holds as a result of his work at Mead in the fields of pulping technology, chemical recovery processes, and copy papers.

In 1982, Mr. Sanders became disabled but continued with his work at Mead until his retirement in 1986. Since then, Mr. Sanders has taken time out to enjoy his retirement with his lovely wife Greta, but still devotes a great portion of his spare time to community service.

Mr. Speaker, I join my colleagues today in honoring Mr. Fred Sanders for the progress that he and others at the Mead Corp. have made and for the American ingenuity and determination that make this country great. And so when we spell the word "America," let us not forget to dot the "I," for the inventors.

INTRODUCTION OF THE NATIONAL ENERGY POLICY ACT OF 1990

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. LLOYD. Mr. Speaker, today I join my friend and colleague the Honorable. PHILIP SHARP in introducing the National Energy Policy Act of 1990. The bill seeks to establish a national energy policy to reduce global warming. The bill is similar to, but not identical to S. 324, introduced by Senator TIM WIRTH. The legislation was recently reported out of the Senate Committee on Energy and Natural Resources.

The issue of global warming is complex. Despite the recent flurry of publicity over the issue, I believe uncertainty still exists in our scientific understanding of the long-term effects of ozone depletion and the interaction of "greenhouse gases" with clouds, ocean currents, and other complex natural phenomena. Another unresolved issue is the nature of the global environment and where the responsibilities lie for reduction of greenhouse gas emissions vis-a-vis needed economic development in Third World countries.

However, to me it seems reasonable and responsible that one focus of a global warming mitigation bill might begin with the development of innovative technologies that will not only be more efficient but will also reduce generation of carbon dioxide and other polluting gases. We do know that nuclear, solar, and renewable and energy conservation technologies are environmentally benign. But I think we also need to look at newer technologies such as fuel cells that may meet the criteria of nonpolluting and efficient power producers.

The bill includes four titles that outline energy policy initiatives, energy efficiency initiatives, and energy research and development initiatives.

I applaud the hard work and the accomplishments by Senator WIRTH to bring the bill out of the Senate Energy and Natural Resources Committee. However, as I introduce the bill today I want to stress that it is only a foundation on which to begin our extensive deliberations on global warming. Our Subcommittee on Energy Research and Development will begin a series of hearings this year to gain a better understanding of the intricacies of establishing a global warming mitigation strategy.

I believe that the bill as reported by the Senate Energy Committee can be improved in title III, the energy research and development initiatives. I intend that a major focus of our subcommittee efforts will be on technology development and an integrated research strategy that will consider the most effective technologies to meet social, environmental, and economic needs associated with the global warming issue.

I look forward to working with Congressman SHARP and other Members to create an energy policy that will enhance our environment, direct our energy technology development, and help to set our Nation on a stable energy development course, that will reduce the threat of global warming.

TRIBUTE TO MARIA MORALES

HON.GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SANGMEISTER. Mr. Speaker, I would like to take this time to recognize and honor one of my constituents, Maria Morales, for her recent appointment as alderwoman to the Aurora City Council. With this historic selection by Mayor David Pierce, Ms. Morales becomes the first Hispanic to serve on the Aurora City Council in its 153-year history.

She was raised in San Sebastian, Puerto Rico, where her family was active in local politics. She is an outstanding example of American citizenship. She received her master's degree in education from the National College of Education in Evanston, IL. She currently serves as a bilingual teacher at the Oak Park Elementary School.

Among her other accomplishments, she is the former executive director of Neighborhood Housing Services, Inc. She has also participated in numerous Hispanic and civic organizations. She is described by all who know her and by those who have worked with her as hard working and as a person devoted to her community.

Ms. Morales is an outstanding example of an American citizen and we can all take great pride in Maria's contributions. I ask all of my colleagues to join me in honoring this fine citizen and public servant.

HONORING THE ACCOMPLISHMENTS OF SPARTA PRIMARY ATTENDANCE CENTER

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. POSHARD. Mr. Speaker, take a moment and think about our Nation's educational system. Do you see a system of disaster? Do you see empty classrooms, hallways polluted by graffiti, torn and worn books, struggling minds, and as a result, unmotivated teachers? Do you see our "Nation at Risk?" Some Americans do.

Then imagine an American educational system erected on the soil of prosperity, on the grounds of determination and bearing the roots of intergrity. There is a place in my district which offers a model for others to follow. This place, alive and vivid, is Sparta Attendance Primary Attendance Center, Sparta, IL.

I take great pleasure in commending Sparta Primary Attendance Center for its prosperity, determination and integrity. These are the virtues that we believe in and support. It is not easy to uphold such virtues when the budgets are tight, and it is not generally the small town schools that America hears about in situations such as this. This is why I am proud to recognize Sparta Primary for being named the "1989-1990 Blue Ribbon School of Illinois."

The Sparta Primary Attendance Center, located in the eastern half of Randolph County, IL, opened its doors to the first students on August 25, 1978. Today, 523 students are enrolled. It is a prekindergarten through third grade school, serving approximately 25 special education students as well.

Since those doors opened, a decade of excellence has characterized the Sparta Primary Attendance Center. A noteworthy tradition is being established which will serve the community well for years to come.

This success is displayed in many ways throughout the school. Student achivement is improving each year. A high percentage of students are above grade level in reading and mathematics, in the science research associaties tests and the Illinois statewide tests. It is important to honor the principal, Betty G. Luthy, who was designated a distinguished

administrator by the Illinois State Board, and other staff who have been recognized for their excellence. They have become the spark of flame that shines throughout the school and the community alike.

Sparta Primary furnishes "A Sound Beginning." It offers excellence through its academic program, and individual attention is allowed because of the low student/teacher ratio.

The school supports a climate of positive self-esteem for students and staff. There is significant community support that includes parent volunteers, retired teacher volunteers and business support for student achievement awards.

In commending Sparta Primary Attendance Center on its honorable selection of the Blue Ribbon Award, John D. Hendrickson commented:

It is believed and demonstrated in the school through the philosophy that all students have worth and dignity. All the children demonstrate positive self-esteem and an attitude of success. The school has a vision and mission, it is meeting its goals and objectives. It is truly distinguished.

Mr. Speaker, let me take this opportunity to commend Sparta Primary Attendance Center on its well articulated goals, its administrative leadership, and its community support and involvement. A "Blue Ribbon" indeed.

INTRODUCTION OF H.R. 5456, THE RESEARCH FREEDOM ACT OF 1990

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WAXMAN. Mr. Speaker, today I join with my colleagues NANCY JOHNSON and TED WEISS to introduce H.R. 5456, the "Research Freedom Act of 1990."

Spinal cord injury, Parkinson's disease, and diabetes cripple and kill millions of Americans. For years people with these conditions have hoped for medical breakthroughs and for years nothing was found.

Breakthroughs are now being found. But the Bush administration has ordered the National Institutes of Health to ignore them—not because of concern about their scientific merit but because of misplaced allegiance to the most extreme elements of the antiabortion movement. Because these research projects involved the transplantation of fetal tissue, rather than organs or tissue from adults, the Bush administration has decided to abandon all such research and give up hope.

This is wrong, scientifically and ethically.

Let us be clear at the outset: This is not research on living fetuses, on potentially viable fetuses, or on newborn babies. This is research on tissue of fetuses that are dead, with no viability, and not even potential life.

Such research has genuine potential for saving lives. Preliminary results indicate progress using fetal tissue toward curing—not just treating, but actually curing—metabolic diseases, neurological diseases, and even those genetic disorders that affect living fetuses and newborns.

When NIH funding of such research was first begun, questions of ethics were raised by the Reagan administration. A moratorium on such projects was instituted and a panel of reviewers was chosen by the NIH—many of them opposed to keeping abortion legal.

That review concluded that fetal transplantation research has great promise, that only the most abstract risk of abuse exists, and that ethics guidelines are in place to prevent such abuses from taking place.

But the Bush administration overturned the NIH recommendation to fund such research under any condition. By doing so, the administration has shown greater respect for the most radical members of its antiabortion constituency than for those Americans afflicted with such disabilities and diseases. The administration has implicitly told these Americans that the cure for their disease is too controversial to study, too political to pursue. The administration has abandoned scientific inquiry in favor of right-wing dogma.

The rationalization of this know-nothing policy is that, despite all scientific evidence and advice to the contrary, the administration fears that American women might have more abortions so that they can contribute tissue to science. The administration has concluded this with no evidence, no backing in the NIH Director's Advisory Committee, and against the recommendation of its own expert panel. The policy is comparable to one of banning life-saving organ transplants to limit traffic accidents, and it is equally ludicrous.

The administration decided, reviewers notwithstanding, that this is only a moral issue—and not a moral issue about science to save lives, but one about abortion. It was decided that, whatever else is done with tissue from legal abortions, no one should learn anything from it. Do not research it, do not study it, do not find cures for diseases in it. Instead, unlike a life-saving organ transplanted from a brain-dead adult, the fetal tissue will just be buried.

There are legal questions regarding the administration's ability to issue such far-reaching prohibitions with no authority, no publication, and no procedures. There are policy questions on censorship, chilling of research, and scientific freedom. But most important, there are questions of science and morality regarding the decision to abandon research and hope for millions of Americans.

The Research Freedom Act of 1990 would overturn this ban on fetal tissue transplantation research. It would codify the protections recommended by the "Human Fetal Tissue Transplantation Advisory Panel" to protect against any possible abuses of this research, including a ban on sale of such tissue and requirements that the decision to have an abortion and to donate fetal tissue be strictly separated. It would also establish a procedure which the Secretary must follow if the administration seeks to ban other research that is approved by scientific review and ethical committees. A detailed summary of the legislation follows:

We should not hold greater reverence for dead tissue than for living people. And we should not resign our public health responsibilities in favor of political rhetoric. This ban should be rescinded and research should go on.

SUMMARY OF H.R. 5456, THE RESEARCH FREEDOM ACT OF 1990

H.R. 5456 is designed to achieve three goals. First, the legislation overturns the Bush Administration's ban on fetal tissue transplantation research sponsored by the National Institutes of Health (NIH). Second, the legislation establishes a separate authority to allow NIH to support fetal tissue transplantation research. Such research could not be conducted in accordance with the requirements specified in the bill. Finally, the legislation establishes limitations on arbitrary bans and restrictions on NIH-approved and recommended research.

NULLIFICATION OF MORATORIUM (SECTION 203)

Section 203 nullifies the moratorium on fetal tissue transplantation research that was imposed by the Secretary on November 2, 1989. Section 203 also restricts officials of the Executive branch from imposing such a policy on NIH (or on any other agency within the Department of Health and Human Services).

RESEARCH ON TRANSPLANTATION OF FETAL TISSUES (SECTIONS 201 AND 202)

Section 201 establishes a specific authority within current law for the support of fetal tissue transplantation research by or through NIH. Under this authority, fetal tissue transplantation research may be conducted only if the following requirements are met: (1) the tissue must be donated for research without any restrictions regarding the identity of the individuals who may be transplant recipients, *i.e.*, there may be no "directed donations"; (2) the individual donating the tissue may not be informed of the identity of any transplant recipient; and (3) the research must be conducted in accordance with applicable State and local law. In the case where the fetal tissue to be used in such research is obtained pursuant to an induced abortion, the following additional requirements must also be met: (1) documentation must be made to indicate that the decision to undergo an abortion was not made in order to provide fetal tissue for research; (2) documentation must be made to indicate that the decision to donate fetal tissue was made separately and independently of the decision to undergo an abortion; and (3) individuals participating in the research, including the transplant recipient, must be informed that the tissue being used in the research may have been obtained pursuant to an induced abortion.

With respect to all fetal tissue—regardless of its origin—Section 202 prohibits the sale of human fetal tissue. As also provided by current law governing the sale of other human organs, the sale of fetal tissue constitute a criminal act, punishable by fine or imprisonment.

REVIEW OF PROPOSALS FOR BIOMEDICAL AND BEHAVIORAL RESEARCH (SECTION 101)

Section 101 establishes the conditions under which all research proposals are to be approved and recommended for NIH funding by the Secretary. These conditions, which reflect current practice, include (1) the requirement that a research proposal undergo review by an Institutional Review Board and be recommended for approval by such Board; and (2) the requirement that a research proposal undergo scientific and technical review by a peer review group and be recommended for approval by such group.

Once a research proposal has been reviewed and recommended for approval by both of these organizations, Section 101 pro-

hibits the Secretary from withholding funding for the project on ethical grounds unless (1) the Secretary convenes an ethics advisory board to study the ethical implications of the project; and (2) the ethics advisory board recommends, on ethical grounds, that the Secretary withhold funding for the project. The ethics advisory board, which is to be comprised of legal, medical, religious, and scientific experts, is required to report back to the Secretary with its recommendation within 6 months after the Secretary has announced his intention to convene the Board.

GRANDMOTHERS OF THE PLAZA DE MAYO

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ACKERMAN. Mr. Speaker, Argentina was governed by a vicious and brutal military dictatorship from 1976 to 1983, a time known as the "Dirty War." During that period of time, one of the consistent forms of human rights violations which the government perpetrated upon the people was the abduction of thousands and thousands of citizens.

In 1977, a group of concerned Argentinians formed "the Grandmothers" or, as they are known in Spanish, "Abuelas." Abuelas was literally a group of grandmothers who dedicated themselves to investigate the events surrounding the disappearance of their children and grandchildren, and secure their return.

After 1983 the new government of President Raul Alfonsin supported the activities of the Abuelas. Along with that backing, Abuelas received assistance in applying advanced scientific techniques from volunteers in the United States. With the help of the Argentinian government and the American volunteers, in 1983 Abuelas was able to identify 41 minors as children of missing parents, and facilitate the return of these children to their families.

Since 1983 the Abuelas have continued their quest to reunite families with their lost children. Although the group has not lately received the kind of attention that it has in the past, members of Abuelas still work today to find children who were kidnapped, illegally adopted, or abducted at birth from their parents, and return them to their families.

It is important that we recognize the accomplishments of this organization, and remember that it is incumbent upon all of us, in Argentina or in the United States, to work to eradicate the types of human rights abuses that are still in practice around the world today.

BEHAVIORAL AND SOCIAL SCIENCE DIRECTORATE ACT OF 1990

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROWN of California. Mr. Speaker, I am pleased to join my colleage, Mr. WALGREN in introducing the Behavioral and Social Science Directorate Act of 1990. This legislation would consolidate the National Science Foundation's [NSF] behavioral and social science research activities within a separate directorate to be headed by a member of one of the relevant disciplines. It is my hope that by establishing this directorate, we will remove the structural biases that appear to have created permanent disparate funding for the behavioral and social sciences at the Foundation.

There is great potential for rapid advancement on a number of fronts within the behavioral and social science, among them how children learn mathematics; how biology affects learning; how attitudes affect behavior; artificial intelligence; factors influencing social development in children, and the biology of emotions. Despite this, funding for these disciplines has decreased by almost 40 percent in constant dollars over the past decade while funding for the NSF as a while has increased by nearly 30 percent.

As a former Chair of the Science, Research and Technology Subcommittee, I can speak to the fact there is a perennial problem of insufficient and comparatively low NSF funding for behavioral and social science research. Originally, this funding problem was thought to be the result of the overt ideological criticism expressed by the White House in the early 1980's.

Now, however, I have come to believe that it is the result of a structural problem within NSF. These problems are housed administratively with the Biological, Behavioral, and Social Science Directorate, which has always been headed by a biologist—and as a consequence, those within the highest levels of NSF who speak for the behavioral and social sciences are not from those disciplines and do not have the requisite understanding of them.

It is clear that in organizations where psychologists and other behavioral and social scientists have a greater role—for example, in the National Academy of Sciences, the National Institutes of Health, and the Alcohol, Drug Abuse and Mental Health Administration—support for psychological, behavioral, and social science research has been more stable.

I would also note that the concept of a separate directorate was considered by over 65 psychological and behavioral science organizations during the 1990 National Behavioral Science Summit Meeting, held under the auspices of the American Psychological Society. The groups voted overwhelmingly that establishing a separate behavioral and social science directorate at NSF would be a priority for these disciplines.

The NSF as a whole has enjoyed a relatively large increase in funding over the past decade, and should be a strong source of support for behavioral and social science research. However, rather than sharing in the Foundation's good fortune, these areas of science have been languishing. This bill will ensure that critical decisions about research and funding are being made by those most familiar with the science, and will be an important step in establishing more equitable funding policies at the NSF.

HONORING THE DEDICATION OF MT. GREYLOCK REGIONAL HIGH SCHOOL'S JOHN T. ALLEN FIELD

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 3, 1990

Mr. CONTE. Mr. Speaker, I rise today to recognize a man who has dedicated his life to the future of our Nation. Mr. John T. Allen has been the head football coach and athletic director of Mt. Greylock Regional High School for the past 24 years. Mr. Allen is being recognized by his peers, students, and community as the Mt. Greylock football field is renamed the "John T. Allen Field."

Though coaching may not seem to be worthy of Congressional recognition, in this case it most certainly is. The values of hard work, dedication, team work, and pride are at the foundations of our country. These are the same values that young man learn as part of a strong high school football program.

Football is one of the most rigorous high school sports, and the camaraderie that is built in those long practices and grueling games is something that can last a lifetime. It is this feeling that truly teaches its players, and helps the boys who begin the season, grow into young men who will carry the lessons that they learned on the field through the rest of their lives. Only a football coach can create this feeling, and as a coach, Mr. Allen has been able to share his strength, virtue, and love with literally hundreds of children during his 27 years at Mt. Greylock High School.

Many of these boys will never forget Coach Allen's lessons, and will grow to be active and productive members of our society, each striving to play his part in the growth and progress that has made our Nation great. For one man to instill these values in our children is an extraordinary gift, not only to his community, but to the Nation as a whole.

It is a proud job to be a successful coach, and John T. Allen has succeeded in the most important of ways. He has not only won three intercounty league championships, six Kosior League championships, and been twice named Berkshire County Coach of the Year but has also earned the respect of his athletes, peers, and community.

Mr. Speaker, I am proud to recognize the dediction of the John T. Allen Field, and to express my highest regards and most sincere praise for everything that Mr. Allen has accomplished, both on and off the field. You are truly deserving of this honor, John, and I wish you and the Mt. Greylock High School football team many more years of continued success on the newly named John T. Allen Field.

THE BANKING LAW ENFORCEMENT ACT

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FASCELL. Mr. Speaker, I am pleased that a majority of our colleagues joined earlier this week approving the Banking Law Enforcement Act, which will provide for the effective prosecution of crimes involving financial institutions.

This action sends an important message to the criminals who have contributed to a disaster of enormous consequence to the taxpayers of this country. It tells these criminals that we are serious about the pursuit of justice. It lets them know that we are serious about recovering taxpayer money lost to white collar crime. And it demonstrates that we are serious about seeking the larger causes of the savings and loan disaster, in order to prevent a repeat of this debacle.

We all know that financial crimes are complex, difficult and costly to investigate. The crimes in this bill involve subtle maneuvers, complicated paperwork, and extraordinary sums of money: This is no smoking gun, and no conventional crime scene. We also know that thousands upon thousands of such cases have been referred to the Department of Justice, which is understandably overwhelmed.

We believe, however, that these cases are worth pursuing. We are willing to provide the authority and the funding to enable the comprehensive investigation of these crimes. As I have joined our colleagues in stating before, "Since the American people will be paying for the bailout of the thrift industry, they should be able to expect that justice will be served." This legislation will provide the tools needed to bring the offenders to justice.

Finally, this bill also demonstrates our commitment to discovering what negligence, or what misdeeds, may have permitted these crimes to occur. It shows our willingness to identify the real cause of this mess and, ultimately, what steps the Government could have taken to avoid it. If we wish to avoid fiscal disasters of this kind in the future, this information is clearly crucial.

The Banking Law Enforcement Act demonstrates our commitment to pursuing and investigating the mistakes and criminal actions that caused the savings and loan disaster. It furnishes the means to prosecute and punish those who caused and those who profited criminally from thrift failures. But above all, it provides an assurance to the American people that such crimes will not go unpunished.

JIM CAIN—A MANAGER RETIRES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WALGREN. Mr. Speaker, I want to take a few moments to pay special tribute to the municipal manager of my hometown in Pennsylvania who retired this summer after years of public service.

James P. Cain is an example of solid government service at the local level which, we all know, is truly where quality counts and performance is judged on a day-to-day basis by your neighbors.

Since 1982, Jim Cain has been the municipal manager of Mount Lebanon, a suburb of 34,000 people just south of Pittsburgh. I grew up in Mount Lebanon and know that we demand a great deal from our local township officials. Jim Cain has been responding to those local challenges with skill and good humor for many, many years—first as chief building inspector in Mount Lebanon, then director of public works, and then assistant manager before being appointed to the top position 8 years ago.

We will miss Jim Cain in Mount Lebanon.

Under Jim's management, Mount Lebanon has maintained its high reputation for quality local services in one of the outstanding suburban communities of Pittsburgh—no easy task during the 1980's when the Federal Government reduced its direct support for local municipalities. Jim's particular focus on infrastructure development leaves a solid legacy for years to come.

I know my colleagues join me in saluting Jim Cain on his retirement from municipal government. We wish him many years without emergency phone calls, constituent inquiries, and budget crises. For all he has done for us over the decades, he deserves at least that and much more.

A SALUTE TO CAPITOL HILL EMPLOYEES

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. McEWEN. Mr. Speaker, "Never have so few done so much for so many."

Throughout the year, hundreds of thousands of guests come to our Nation's Capital to experience firsthand the history, beauty, and excitement that this city has to offer. These people come from all walks of life and all parts of the country. Nowhere else in the Nation is the average citizen capable of exploring so many vast and fascinating aspects of this great land. This is especially true during the summer months when Washington, DC, abounds with tourists.

On Friday, July 13, 1990, approximately 300 visitors from Michigan and Ohio came to Washington, DC, as part of an annual convention and requested a tour of the Capitol. In the time that these guests were allowed to explore the building, it took nearly 150 workers to help organize and guide the visitors. Some people opened doors, cleared hallways, assisted with directions, and even offered information on some of the specific rooms. No part of the building was left untouched and because of this, all of the Capitol's employees had some form of contact with the group. It is because of this that I commend them for their patient and gracious assistance.

Were it not for the organization and teamwork of all those involved, this tour would not have been successful. There are certain individuals who every day work tirelessly to insure that all things run smoothly. All too often these people go without recognition and thanks though their work is above and beyond the call of duty. Please allow me this time to thank some specific individuals who have proven to be reliable, courteous, and helpful additions to the work force.

I would like to thank Diane Hampton of the House Speaker's Offfice; Tom Keating of the House Sergeant of Arms; Pat Gould and Jim Kaelin of the House Doorkeepers Office; Elizabeth Martin of the Senate Sergeant of Arms; James Dameron, Inspector of the Capitol Hill Police; Tom Nottingham, Chief of the U.S. Capitol Guide Services; George M. White, Architect of the Capitol; and David Pead and Bob Shea of Office Equipment. Their work and efforts are greatly appreciated.

Day in and day out the ladies and gentlemen who work in the House Doorkeeper's Office greet hundreds of visitors and help them with seating and information about this body of Congress. Jim Jenkins, Supervisor and Ray Bethea, Assistant Supervisor, have trained these men and women to be not only helpful, but kind, courteous and respectful as well. On this specific day, as on all occasions, the staff was at their usual excellent level of performance and deserve commendation for their work.

Arthur Curran, Supervisor of the Senate Doorkeepers, and Donn Larson, Assistant Supervisor of the Senate Doorkeepers, can always be found with a smile on their face and a helpful hand. These gentlemen are a living example that a job worth doing is worth doing well.

In addition, there were countless others behind the scenes whose work requires exceptional levels of organization, cooperation, and courtesy. Again, words of praise are often few and far between. I would like to take this opportunity to express to them my sincere thanks for a job well done.

I respectfully request that a list of those people employed throughout the Capitol Building who helped with the tour be included in my remarks.

The U.S. Congress can stand proud knowing that all Americans are welcomed to the Capitol with open and kind hearts.

CAPITOL HILL EMPLOYEES

U.S. CAPITOL POLICE

Captain L.R. Hill, Captain R.F. Reginaldi, Lieutenant R.V. Howse, Sergeant K.M. Allen, Sergeant R.A. Burtt, Jr., Sergeant G.E. Fields, Sergeant H.C. Geary, Sergeant C.C. Johnson, and Technician Z.J. Tomlin.

Officers

W.E. Cochran, Sr., T.D. Smith, C.C. White, D.N. Coles, C.N. Williams, L.C. Williams, A.Y. Jordan, V. Cerverizzo, Jr., J.A. Soltys, Jr., W.V. Summers, Jr., K.N. Talbot, C.Y. Lassiter Norris, R.E. Wilson, W.H. Ashton, W.M. Amezcua, D.R. Farrar, L.P. Swanson, P.J. Connell, H.L. Turner, O.P. Anders, Jr.

W.D. Bagis, M.T. Dejames, J.T. Konczos, R.J. Kaptur, Sr., K.A. Rich, J.M. Turgel, R.A. Gillus, J.P. Pinnix, Jr., W.A. Schwenger, W.J. Diggs, H.N. Bond, F.E. Hensley, R.I. Morey, E. Brown, Jr., C.S. McElwain, M.R. Moore, Jr., J.J. Morelli, J.T.

Snyder, W.D. White, R.B. Peacock, E.D. Goddard, R.L. Gillum, W.F. Hynes.

Security aides

T.A. Bethel, D.L. Church, J.A. Simmons, A.G. Naves, I.W. Austin, S.L. Hollingsworth, L.S. Mihilis, J.A. Meerman, J.L. Torregrossa, R.K. Morris, Jr.

TOUR GUIDES WITH THE CAPITOL GUIDE SERVICES

Ted Daniels, Beth Hipps, Madaline Allen, Kia Banks, Berry Beaumont, Sandy Blessley, Alice Burridge, Peter Byrd, Dicken Corrada, Mary Doaling, Laura Gable, Betty Gigioli, Tripp Jones, Donald Kearns, Mary Ellen Kimball, Richard Klein, Adrian Norman, Alise Orloff, Christian Scanniela, Jeannie Slevin, Pete Snyuen, Andrea Stephens, Thomas Stevens, Jackie White.

DOORKEEPERS FOR THE SENATE

Matthew O'Brien, Shirley Herath, William Selander, John Tohtsoni, David Giordanco.

ARCHIETECT OF THE CAPITOL

John F. Hackett.

CLERK OF THE HOUSE

Ann Fletcher.

HOUSE DOORKEEPER'S OFFICE

Joseph Jarboe, Doyle Evans, Rick Villa, Bob Gray, Kenneth Sullivan, Mike Butler, Darius Holmes, Susan Salb, Nicki Mayes.

A DETERMINED YOUNG VOTER

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. LLOYD. Mr. Speaker, this summer, I had the pleasure of having an outstanding young woman from the Third Congressional District work in my office as an intern. Miss Lorri Chambers was such an asset that I asked her to stay for several weeks beyond what has been originally planned. Her cheerful disposition will long be remembered and appreciated.

Because Lorri was so good as to extend her internship for 2 additional weeks, she could not be at home to vote on Tennessee's primary election day. Her efforts to ensure that her ballot was counted are exemplary of the fine spirit and motivation that she demonstrated during her tenure as an intern on my staff. A newspaper account which appeared in the Cleveland Daily Banner on August 2 is a wonderful account of her work to see that her vote was cast and counted.

Lorri is a true example of the best of America's youth and she deserves to be commended. I wish her all the best for success at the University of Tennessee during the coming year.

The August 2 Cleveland Banner article on Lorri Chambers is as follows:

A DETERMINED YOUNG VOTER

An interesting event has just come to our attention.

Although we don't yet have her name, a local young woman, only recently of voting age, has been working out of town. Originally, her job was to have ended in time for her to get home and vote today.

But things changed. Her job was extended, which means that she is several hundred miles from home this election day.

When she learned of the change of events sometime back, she called local election officials to inquire about absentee voting. She learned that only a few days remained to get her application in, receive her ballot and get it back to the election commission office by absentee voting deadline. There was simply not time to get it all done through the conventional mail service.

We are told that she was so interested in the election, and so determined to cast her vote that she resorted to the expense of overnight delivery in the back-and-forth mailings required to beat the deadline. In all, it is said to have cost her the better part of $100.

How's that for determination to practice good citizenship, She had a good excuse for not voting, but she was so determined to have her opinion count that she got her ballot in, if only after considerable effort and at considerable expense.

Do you have a good excuse for not voting today?

TRIBUTE TO MAURICE A. FRANK

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SANGMEISTER. Mr. Speaker, it is with great pride that I rise today to recognize and honor a fine citizen and outstanding attorney, Maurice A. Frank.

Mr. Frank is a lifelong resident of Illinois. He was born in Chicago, IL, on January 1, 1910. He later attended DePaul University School of Law and was admitted to the Illinois Bar in 1933. During World War II he served with Army Intelligence.

Mr. Frank is a loving husband and caring father. He has been married to his wife Betty for 44 years and has three children, Arthur, Judy, and Charles, as well as four grandchildren, Rebecca, Lauren, Matthew, and Kristine.

He has practiced law in Chicago for over 50 years. During this time he has provided legal service of the highest caliber to his clients. He has also been extensively published in legal journals, as well as serving on numerous committees of both the Chicago and Illinois Bar Associations. He is also a frequent contributor of legal book reviews for the Chicago Daily Law Bulletin.

In addition, Maurice Frank also has a long history of community involvement and service. Among his accomplishments, he has served on the board of the Friends of the Glencoe Public Library, is a past president of the Austin Chapter of B'nai B'rith, and is a member of the Decalogue Society of Lawyers.

Mr. Speaker, I ask that my colleagues join me in honoring this fine citizen and outstanding attorney.

CONGRATULATIONS TO THE 1990 PINCKNEYVILLE PANTHERS

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. POSHARD. Mr. Speaker, it is with great pride that I rise before the House of Representatives to commend the outstanding performance of a great girls softball team, the Panthers of Pinckneyville, IL.

Throughout the season the Panthers displayed enormous perseverance in the face of possible defeat. Refusing to accept the predictions of those who doubted their ability, they marched forward to rack up one victory after another. Their determination and loyalty reflects southern Illinois pride.

The dedicated Pinckneyville fans watched with elation as their home team made headlines with a stunning string of successes. Under the leadership of Head Coach Greg B. Hale and Assistant Coach Linda Rudolph, the Panthers overcame stiff opposition in the Southwestern Egyptian Conference to post an 11-0 record, going on to become Invitational, Regional and Sectional Champions. They finished the season with a spectacular 27-4 record, establishing a school record.

The team and their fans never lost faith as they battled valiantly in the class A Illinois High School State Finals, coming within 1 run of winning the championship against Casey in an electrifying 3-2 finish.

The Panthers have set an example through their determination to stand tall and to push themselves to the limit even when the outlook appeared dim. Certainly, we can all learn from that. Their spirit reflects that of the community they so proudly represent, Pinckneyville, IL. Pinckneyville High School, has an enrollment of 555 students from the city's population of 3,500. These young people are role models of the values and traditions of the people in my district, which they so enthusiastically represent and I so proudly dedicate.

Mr. Speaker, please join me in congratulating the Panthers of Pinckneyville for a job well done.

I hereby submit these champion's names into the CONGRESSIONAL RECORD:

THE PINCKNEYVILLE PANTHERS

Kari Weatherford, Becky Brand, Jenny Hagel, Carrie Kellerman, Kandi Newton, Jennifer Lunnemann, Julie Isaacs, Heather Opp, Heather Bronke, Andrea Clarke, Jennifer Chapman, Nicole Rule, Audree Dauksch, Kim Gendron, Michelle Sullivan, Lisa Biley, Amanda Weatherford, Julie Roe, Jennifer Brand and Statistician, Oren Loos and Manager, Jeanne Rheinecker.

ADDRESS OF MAJ. GEN. DANIEL R. SCHROEDER AT THE ARMY ENGINEER CENTER DEDICATION

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SKELTON. Mr. Speaker, on April 24, 1990 at the Army Engineer Center at Ft. Leonard Wood, MO, I had the opportunity to give the principle address at the dedication ceremony. I congratulate the U.S. Army at this milestone achievement.

The commanding general, Daniel R. Schroeder, gave an excellent address and highlighted the individuals who were honored by the various buildings and points of significance. His address memorialized seven distinguished soliders, and I include his remarks herewith:

REMARKS BY GEN. DANIEL R. SCHROEDER

Governor Ashcroft, Congressman SKELTON, Congressman EMERSON, Honored Guests, Ladies and Gentlemen:

It's a great day for the army, a great day for Fort Leonard Wood and a great day for engineer soldiers everywhere.

We are pleased to have with us today a number of special guests, whom I would like to recognize. Some risk in that—not naming all—no less important.

We are also pleased to have with us today individuals to whom this site has particular significance in a very poignant way. For they were born in the former Army Hospital which stood at this site for many years. I would like to ask them to stand and be recognized.

We are especially honored to have so many family members of those to whom we dedicate the facilities with us.

Since ancient times warriors have been memorialized in song and verse. Their exploits depicted on cave walls, in tombs, and on monuments. The ancients did this because they knew that unless this was done the lessons of courage and valor these warriors had to teach would be lost.

That tradition of honoring those who have gone before us continues today. We are gathered to dedicate these great facilities and in so doing to appropriately memoralize some of yesterday's soldiers as examples of loyal and dedicated service to our great nation.

In our own way we are continuing the ancient tradition. It is important that we do so because without that the rich heritage of our engineer regiment and the achievements of its soldiers could not be passed to future generations.

The main gate you came through this morning, our training facilities, reception complex and noncommissioned officers academy all bear the names of fellow soldiers whose demonstrated values and unselfish service exemplify the character we want to impart to our young soldiers.

Today we are gathered to memoralize not the passing of seven distinguished soldiers (one is still living), but rather the principles by which they lived. In their service they demonstrated a love of country, unselfish sacrifice and integrity that will be a source of inspiration to all those whom we train here and who will work here well into the 21st century.

By dedicating these magnificent facilities to those soliders, we remind ourselves that freedom isn't free; and that throughout our nation's great history it has been citizen soldiers from humble beginnings, such as those whom we honor today, who have made our country a beacon light in the world today. The commitment of those of us who serve today has to be to keep their contributions in front of us and to preserve that beacon.

It is fitting that the 48th governor of the great state of Missouri is with us this morning.

John Ashcroft is a neighbor and a friend. This part of the state is home for him. He attended public schools in Springfield, farmed there and practiced law with his wife, Janet.

As governor and Commander-In-Chief of the Missouri National Guard, John Ashcroft has visited Fort Leonard Wood on several occasions in recent years. He has visited troops in training and operated some of our biggest engineer equipment. He joins us regularly to demonstrate remarkable athletic skill on the basketball court to benefit Missouri's Special Olympics.

General William Morris Hoge (1894–1979), was born and raised in Missouri. General Hoge had a distinguished career as an engineer and commander in the U.S. Army. During World War I Hoge received the Distinguished Service Cross and the Silver Star for Heroism at Buieulles, France, in 1918. Just prior to America's involvement in World War II, General Hoge commanded the troops that built the Alcan Highway linking Alaska with the lower 48 states. On June 6, 1944, as American soldiers landed on the beaches of Normandy, Hoge commanded the 1st Provisional Engineer Brigade securing Omaha Beach. He also commanded Combat Command B, of the 9th Armored Division at St. Vith during the Battle of the Bulge. His unit later was to take the famous Ludendorf bridge at Remagen. His WWII decorations included a second Distinguished Service Cross, two Distinguished Service Medals, two additional Silver Stars, a Legion of Merit, a Bronze Star, and a Purple Heart. From 1946 to 1948 General Hoge commanded the engineer school at Fort Belvoir, Virginia. During the Korean conflict Hoge received another Distinguished Service Medal and an Air Medal while commanding the 9th Corps. Hoge rose to the rank of General as the Commander-In-Chief of all U.S. Army Forces in Europe from 1953 until 1955 when he retired.

George A. Lincoln (1907–1975).—Rhodes Scholar,—a Brigadier General at the age of 38 and prominent as a planner with Marshall and Eisenhower during WWII. After the War, he became a professor (1947–1969) and head (1954–1969) of the Social Science Department at West Point. General Lincoln is noted for his writings on international politics and economic aspects of national security. Lincoln served as a consultant to NATO and the Agency for International Development (AID). He was director of the Office of Emergency Preparedness and a member of the National Security Council. In 1971 he managed President Nixon's 90-day wage and price freeze. His awards include two Distinguished Service Medals and two Legions of Merit.

Bruce Cooper Clarke (1901–1988), was born in Adams, New York and at the age of 17 enlisted in the Army as a Private. Following WWI, Clarke received an appointment to the U.S. Military Academy and graduated in the class of 1925. Although commissioned as an engineer, it was as an Armored Officer that Clarke distinguished himself in WWII. For his significant contributions to the war effort Clarke received the Distinguished Service Cross, a Distinguished Service Medal, three Silver Stars, a Legion of Merit, three Bronze Stars, and an Air Medal. Following WWII, Clarke served as Assistant Commandant of the Armor School and Commander of the 1st Armored Division. During the Korean Conflict Clarke again saw combat as commander of the 1st Corps and later 10th Corps. In 1958, Clark was promoted to the rank of a four-star general to take charge of the U.S. Continental Army Command. Beginning in 1960, General Clarke was the Commander-In-Chief of all U.S. Army Forces in Europe until 1962 when he retired.

Maj. Gen. Donald Ray Morelli (1933–1984), a chief architect of the Army's fighting doctrine called Airland Battle, was born in Greensburg, Pennsylvania. He served more than 28 years in the U.S. Army. Upon graduation from the U.S. Military Academy at West Point in 1956, he received a bachelor's degree in engineering, and was commissioned a Second Lieutenant in the Army. He later earned a master of science degree in civil engineering from the university of Illinois. His military education included attendance of the engineer school's basic and advanced courses, the U.S. Army Command and General Staff College, and the Army War college. After having served in combat with the Army's 9th infantry division in Veitnam, he commanded the 10th engineer battalion of the 3rd infantry division, and was the commander of the 2nd engineer training brigade here at Fort Leonard Wood, Missouri. General Morelli also held staff positions with the army's corps of engineers at headquarters, department of the army and the training and doctrine command, Fort Monroe, Virginia. He retired as Tradoc's Deputy Chief of Staff for doctrine. Durign his career Gneral Morelli was awarded the Distinguished Service Medal with one Oak Leaf Cluster, the Bronze Star with two Oak Leaf Clusters, the Meritorious Service Medal with Oak Leaf Cluster, the army Commendation Medal with the Combat Infantryman's Badge, and Distinguished Service Awards from the governments of Brazil and West Germany.

Thomas Jay Hayes, the fourth, was born in Texas, Hayes graduated from the U.S. Military Academy with the class of 1966. Although awarded a Rhodes Scholarship and accepted at Oxford, England young Hayes chose to be commissioned as an engineer. He was assigned to the 307th Engineer Battalion of the 82nd Airborne Division. His tour at Fort Bragg was interspersed with paratrooper, ranger, and pathfinder courses at the infantry school. In May of 1967, Hayes went to Vietnam to serve as a platoon leader in the 1st Engineer Battalion of the 1st Infantry division. Several months later Hayes volunteered for the 1st Cavalry Division's long range reconnaissance patrol, Troop D, 1st squadron, 4th Cavalry, as leader of the 1st Infantry Division's aero rifle platoon. On April 17, 1968 Thomas Hayes' unit engaged the enemy and a fierce daylight battle ensured. Lieutenant Hayes repeatedly risked his own life to save wounded members of his unit. He was finally killed by a burst of North Vietnamese automatic weapons fire. Posthumously promoted to Captain, Hayes was awarded two Silver Stars, four Bronze Stars, six Air Medals, four Commendation Medals, and a Purple Heart.

Louis John Storck was born in China. He graduated from the U.S. Military Academy, class of 1951 where he excelled in football and track. After commissioning as an engineer Storck served as a First Lieutenant with Company B, 2nd Engineer Combat Battalion, 2nd Infantry Division. On October 6, 1952, at Hill 281 in Korea, Lieutenant Storck and several of his men were cut off while occupying an outpost well in front of friendly lines. Though outnumbered he and his men continued to resist, finally engaging the enemy in fierce hand-to-hand fighting before the assault was thrown back. During that night, Stork's position was overrun by the enemy. With his four remaining men Storck led an attempt to fight their way through to friendly lines. Although he and all of his men were wounded, Storck continued fighting valiantly until he was killed.

Robert Putnam Ross was born on November 14, 1917 in Milwaukee, Wisconsin. Ross enlisted in 1941 and quickly rose to the rank of corporal. In June of the following year, he was commissioned in the Corps of Engineers. Ross participated in the Amphibious landing in North Africa, Sicily, and Italy before wading ashore as commander of Company B, 36th Engineer Battalion, on D Day June 6, 1944. For his actions in the amphibious assault, Ross was awarded the Distinguished Service Cross and the French Croix de Guerre. After being wounded on June 7, Ross was hospitalized in England until he was able to resume his combat efforts and move through Europe to eventual occupation duty in Germany. In 1945 Ross, still a 1st Lieutenant, was released from active service. He retired as a Captain in the reserves in 1958.

Hugh Barbee Mott, was born on August 14, 1920, in Nashville, Tennessee. Mott enlisted in 1942 as a Private in the infantry. After completing Officers Candidate School at Camp Davidson, North Carolina, he was commissioned as a Second Lieutenant in the anti aircraft artillery. Mott soon transferred to the Engineers as a platoon leader in Company B, 9th Armored Engineer Battalion, 9th Armored Division. Soon after the Allied landings in the summer of 1944, Mott and his 2nd Platoon of combat engineers arrived in France. On March 7, 1945, in the town of Remagen, Second Lieutenant Mott, and his men succeeded in removing enemy explosives and secured the only remaining bridge across the Rhine. After serving with the occupation forces in post war Germany, Mott returned to his home in Tennessee separation from the service as a First Lieutenant. In 1949 Mott was elected to the Tennessee State Legislature. After commanding the 30th Armored Division, Mott was appointed adjutant General for the state of Tennessee in 1968. Upon retiring from the Tennessee National Guard in 1972 Mott became Nashville's Chief of Police, retiring in 1975.

Thank you all for joining us today to commemorate this important event. The assurance I give you is that we take our heritage seriously and the eight soldiers whom we honored are an important part of that heritage. The commitment we who serve today is to make that service worthy of the sacrifices of those who preceded us. An engineer officer, Robert E. Lee said it best—This is a true honor and a true Glory—The honor of integrity and the glory of duty done.

NARUC RESOLUTION TO AMEND SECTION 5 OF THE NATURAL GAS ACT IS DEFEATED

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. RICHARDSON. Mr. Speaker, I have been concerned in recent months about efforts that would affect the complicated operations of the production, sale, and delivery of natural gas in our economy. This has largely involved legislative attempts or threats to provide retroactive rate refunds by regulated pipelines. I am pleased to note that a group who has expertise in this area—namely the State regulators themselves—have spoken out.

On July 24, 1990, the Gas Committee of the National Association of Regulatory Utility Commissioners [NARUC] at their Los Angeles meeting rejected a resolution to amend section 5 of the Natural Gas Act [NGA]. The resolution advocated amendments of the NGA to permit the Federal Energy Regulatory Commission to make natural gas pipelines provide rate refunds, with interest, on a retroactive basis.

Under the defeated resolution, when FERC reviews a rate under section 5 of the NGA, it could find that the rate is no longer just and reasonable and could require refunds from a much earlier date prior to the determination. These are rates which FERC has already determined to be just and reasonable pursuant to its section 4 authority. The resolution would not have allowed FERC to increase rates retroactively, merely to decrease them. The resolution was defeated by the full gas committee on a vote of 4 to 13.

The commissioners who spoke out in opposition to the resolution on retroactive rate refunds gave some of the following reasons for rejecting the resolution. First, several commissioners said that if FERC is to have the authority to decrease gas pipeline rates retroactively, it should also have the power to increase them retroactively as well. Because they did not support proposals which would allow unforeseeable increases in rates, they could not support legislation to reduce rates retroactively. Second, commissioners emphasized the need for certainty and rate finality. All parties to a FERC rate proceeding should be able to rely on rates which are found to be just and reasonable unless, and until, they are found to be excessive. Third, several commissioners said they were reluctant to propose any legislative changes to the NGA.

The NARUC Gas Committee is made up of State regulatory commissioners from throughout the United States. Among the purposes for NARUC is "to protect the common interest of the people with respect to the regulation of public utilities and carriers, and the promotion of cooperation of the commissioners of the several States with each other and the Federal commissions represented in the Association."

Mr. Speaker, I commend the Gas Committee of NARUC for its action, and I am happy to bring this information to the attention of my colleagues and the public.

NATIONAL HUNTINGTON'S DISEASE AWARENESS MONTH

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WEISS. Mr. Speaker, I rise today to introduce a resolution designating May 1991 as "National Huntington's Disease Awareness Month."

Huntington's disease is a terminal and degenerative brain disorder whose victims lose gradual control over both mind and body. Beginning in barely perceptive ways, often with minor muscle twitches and a general lack of coordination, the disease progresses relentlessly for 10 to 25 years.

At advanced stages, afflicted individuals experience personality changes, spastic contortions, decreased mental capability, memory loss, and slurred speech. Eventually, the loss of nerve cells in the brain causes individuals to become entirely incapacitated and the disease ultimately results in death.

Huntington's disease has already afflicted 25,000 Americans and an additional 125,000 individuals are considered "at-risk" due to the disease's hereditary nature. Although there are no available means of retarding, reversing, or curing this killer's effects, experts are confident that they are on the verge of a breakthrough.

Recent advances in the field of molecular genetics have enabled scientists to approximate the gene site responsible for Huntington's disease. Increased Federal funding of medical research could result in discovery of the cure for Huntington's disease. I firmly believe the designation of a National Huntington's Disease Awareness Month will generate the interest and momentum necessary to combat this devastating killer.

Below is a printed copy of the resolution:

H.J. RES. —

Whereas 25,000 Americans are victims of Huntington's Disease, a fatal, hereditary, neurological disorder;

Whereas an additional 125,000 Americans have a 50 percent chance of inheriting the gene responsible for Huntington's Disease from an affected parent, and are considered to be "at-risk" for the disease;

Whereas tens of thousands of other Americans experience the destructive effects of the disease, including suffering from the social stigma associated with the disease, assuming the difficult role of caring for a loved victim of the disease, witnessing the prolonged, irreversible physical and mental deterioration of a loved one, and agonizing over the death of a loved one;

Whereas at present there is no cure for Huntington's Disease and no means available to retard or reverse the effects of the disease;

Whereas a victim of the later stages of Huntington's Disease invariably requires total personal care, the provision of which often results in devastating financial consequences for the victim and the victim's family;

Whereas recent advances in the field of molecular genetics have enabled scientists to locate approximately the gene-site responsible for Huntington's Disease;

Whereas many of the novel techniques resulting from these advances have also been instrumental in locating the gene-sites responsible for familial Alzheimer's Disease, manic depression, kidney cancer, and other disorders;

Whereas increased Federal funding of medical research could facilitate additional advances and result in the discovery of the cause and chemical processes of Huntington's Disease and the development of strategies to stop and reverse the progress of the disease;

Whereas Huntington's Disease typifies other late-onset, behavioral genetic disorders by presenting the victim and the victim's family with a broad range of biomedical, psychological, social, and economic problems; and

Whereas in the absence of a cure for Huntington's Disease, victims of the disease deserve to live with dignity and be regarded as full and respected family members and members of society: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of May 1991, is designated as "National Huntington's Disease Awareness Month," and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such month with appropriate programs, ceremonies, and activities.

THE RENEWABLE ENERGY TECHNOLOGY TRANSFER ACT OF 1990

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROWN of California. Mr. Speaker, I am pleased to introduce the "Renewable Energy Technology Transfer Act of 1990" which will enhance the movement of technology developed by Federal research programs to State and local governments and the U.S. renewable and energy efficiency industries.

During the 8 years of the previous administration, solar and renewable energy R&D suffered severe cuts and was relegated to long-term, high-risk research. During that time, our international competitors, sensing a lack of resolve by the United States to commercialize our technology, began pumping resources into Government R&D programs for short-term applied research. As a result, they have all increased their world market share in technologies in which the United States still barely hold the technical lead.

The first section of the bill provides increased authorization for the U.S. Department of Energy's State and local government assistance programs, from $5 to $6.6 million between fiscal years 1991–93, to allow U.S. industry and State governments to joint venture emerging technology projects. Government-industry joint ventures have proven themselves as an effective tool to accelerate the acceptance of new technologies in the marketplace. This legislation will encourage the U.S. Department of Energy, State governments, and the U.S. renewable energy and energy efficiency market development effort. This section also provides additional funds to existing State research entities that have proven themselves as centers of excellence for solar, renewable energy, and technology transfer.

The second section encourages further innovation in the existing Department of Energy-supported Federal laboratories in providing more aggressive outreach for and with industry, local governments, and the general public. A modest increase of $5 to $6.6 million between fiscal years 1991–93 will begin to establish a sorely needed information network geared to the applied research and actual use of these energy saving technologies. While the solar and renewable technologies have become mature and cost effective, few know about these advances in the technologies. In addition, this section provides minor funding to identify existing successful technology transfer models as a way to more broadly replicate the best mechanisms that have pushed these innovations in the marketplace.

The final section provides resources to U.S. industry to access market development information and provide overseas market outreach for the U.S. renewable energy and energy efficiency industry. Our competitors overseas currently access U.S. information to help build their technical expertise and market share. Our industry has been unable to access our own Government information as quickly. These provisions allow the development of a computer information network for industry and State and local governments. The provisions also call for establishing overseas outreach offices for the U.S. industry in the key market development areas of the Pacific Rim and Caribbean Basin and Latin America which will provide a long-term industry presence to build market share.

This bill I am introducing requires less than $20 million per year over 3 years. This amount of money will leverage according to industry experts over $100 million in sales of U.S. renewable energy equipment. Expansion of renewable energy sales represents one government policy that not only promotes environmentally sound applications, but results in increased American jobs and a decreased trade deficit due to its supplanting of oil imports.

The administration's request for increased solar and renewable energy R&D funding for fiscal year 1991 is a welcome sign. But research and development alone will not build markets for these technologies. More effective and aggressive technology transfer programs are the important linkage to effectively commercialize emerging technologies. This modest legislation provides a good start in that direction.

With increasing tensions in the Middle East between Iraq and Kuwait, the United States would be well advised in building our domestic alternative energy sources. Solar and renewable energy now compromise over 10 percent of U.S. energy and with greater market development incentives, could supply over 20 percent by the year 2000. Let's get on with it.

TRAUMA CARE: A STEP IN THE RIGHT DIRECTION

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FASCELL. Mr. Speaker, I rise to call our colleagues' attention to the trauma-care crisis facing our Nation. The war on drugs must include care for its victims. However, this care simply cannot be met by already overburdened public medical facilities.

Drug and substance related violence has swamped our public hospitals with patients injured by the drug war, leaving many hospitals with uncompensated medical expenses. In the past 2 years, trauma centers have closed in Chicago, Miami, Philadelphia, Houston, and Los Angeles.

The real drug war is not being fought in the halls of the Justice Department, but on the streets of our local neighborhoods. That is where the war is and that is where the casualties are.

I have joined the distinguished chairman of the Subcommittee on Health and the Environment in consponsoring H.R. 4701, the Trauma-Care Revitalization Act of 1990. This legislation would provide $650 million over 3 years in Federal grants for trauma-care centers to be administered under the National Drug Abuse Control Program. This bill will help to alleviate the crisis in our Nation's trauma-care system and place it on the path to recovery. I urge our colleagues to join us in enacting this piece of legislation.

TRIBUTE TO SAFETY TOWN

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SANGMEISTER. Mr. Speaker, I rise today to give tribute to the village of Romeoville in the Fourth Congressional District of Illinois. This Sunday, August 5, 1990, the village will dedicate "Safety Town," a miniature town designed to teach children a lesson in safety. The replica includes everything from homes to a fire station, the idea is to teach children how to handle various emergency situations in their everyday surroundings.

"Safety Town" is yet another example of the hard work and cooperation typical of the people of the Fourth District of Illinois. The labor, money and materials to build "Safety Town," were donated by the residents, business people and local government workers of Romeoville and the surrounding communities. Children will now have the opportunity to learn an important and hands on lesson in safety because of the generosity and teamwork of these people.

The "Safety Town" facility will be used by schools, service organizations, and even some businesses to instruct children in the basic rules of traffic, home, and other types of safety. This variety of education will serve to prevent many accidents from happening, as

well as preparing the children of Romeoville and the surrounding communities to act quickly and correctly in case of an emergency.

I commend the designers, laborers, contributors and workers of "Safety Town" who are making a noticeable and necessary contribution to the education of our young people. Mr. Speaker, I ask that my colleagues join me in extending our congratulations to all of them for making a difference.

TRUST FUND TREATMENT IS HIGHWAY ROBBERY

HON. J. DENNIS HASTERT

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HASTERT. Mr. Speaker, I rise today to introduce legislation to move the highway and aviation trust funds off-budget.

By moving these funds off-budget we ensure that they are spent for the purpose for which consumers paid the taxes instead of being borrowed for nontransportation projects.

The highway and aviation trust funds are supported 100 percent by highway and airport users, and yet, because of the way these funds are treated in the Federal budget, billions of dollars never get spent on needed improvements.

Administrations as far back as that of President Lyndon Johnson have engaged in the practice of maintaining high balances in the transportation trust funds, using annual net increases to mask the true size of the deficit in the general fund.

Masking the size of the deficit with the surpluses in these trust funds is a deception of the American taxpayer. It's time to end this smoke and mirrors approach to accounting for the public's money.

In my district, consumers pay their Federal gas tax at the pump and then return to congested roads and sit with their engines idling and their time wasting because their tax dollars are not being translated into road improvements. It's time we give people what they are paying for.

What Member of this body can say his or her district does not have a serious need for road improvements, new and refurbished bridges and more mass transportation. More and more we find State and local taxes having to be raised to meet these serious needs because the Federal Government refuses to return to States the gas tax dollars it has collected from consumers. It is time that unfair policy is changed.

The Federal Government must stop breaking the faith with the users of the Nation's highways and airports. We pay these taxes specifically for capital improvements to these systems, and our constitutents deserve a much greater return on their investment than they now receive.

I ask that you join me ending this highway robbery.

THE MEDICAID OUTREACH AND CHILD HEALTH ACT OF 1990

HON. RICHARD J. DURBIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DURBIN. Mr. Speaker, today I am introducing legislation, along with my colleagues Mrs. MORELLA and Mr. MILLER of California, to strengthen our Nation's Medicaid Program by improving our outreach efforts to pregnant women and children and by providing more secure Medicaid coverage for pregnant women and children already receiving the vital health care services provided by this program.

As of April 1 of this year, as a result of a provision adopted in the Omnibus Budget Reconciliation Act of 1989, pregnant women and children up to age 6 with family incomes below 133 percent of the poverty level are eligible for Medicaid coverage. This provision is an important step in the effort to reduce our Nation's unnecessarily high rate of infant mortality and improve child health. Medicaid coverage can provide pregnant women and children the health care they need to foster a healthy birth and a good start in life for low-income children.

However, this significant health care expansion is of little use if eligible people don't know they are eligible for Medicaid or face barriers that inhibit enrollment. Expanded Medicaid outreach efforts are essential to assure Medicaid services to eligible pregnant women and children.

To encourage outreach to this vulnerable population, the Medicaid Outreach and Child Health Act of 1990 includes the following provisions:

First. Provide a 75-percent matching rate to States for the cost of outreach efforts to identify and enroll pregnant women and children who are eligible for Medicaid. This provision would provide an enhanced match of 75 percent for outreach activities to identify pregnant women and children who are eligible for Medicaid and assist them in applying for and obtaining Medicaid services, Outreach activities must include "outstationing" eligibility workers in public health clinics or other community locations outside of the county welfare office, and other activities that assist pregnant women and children in obtaining Medicaid coverage. Under current law, the Federal funding match for outreach is limited to the 50-percent match for administrative costs.

Second. Establish a $10 million Federal grant program to fund demonstration projects to increase the enrollment of eligible pregnant women and children in Medicaid. This provision would fund outreach demonstration projects operated by private nonprofit organizations and local public agencies which have strong community support and demonstrated linkages to other community programs serving low-income women and children. The projects would demonstrate innovative approaches to increasing the participation of pregnant women and children in the Medicaid Program, with special emphasis on children.

Projects would have to be designed to make personal contacts with potentially eligible persons, including efforts to identify eligible persons, encourage and assist them in applying for Medicaid coverage, and provide followup assistance to help them overcome any barriers to obtaining enrollment and continuing to receive Medicaid services. In addition to establishing successful enrollment programs in the local project areas, these projects would provide a base of experience that could lead to improved Medicaid enrollment efforts nationwide. The grants would be administered by the Bureau of Maternal and Child Health.

Third. Mandate continuous Medicaid eligibility for pregnant women for 60 days after giving birth and for eligible infants for 1 year after birth. This provision would allow a pregnant woman who has established Medicaid eligibility to remain eligible until 60 days after giving birth, and would allow her newborn baby to remain eligible for 1 year after birth, even if a short-term rise in family income would otherwise bump her and the infant off the program and force them to reapply. Currently, 44 States have adopted the existing Medicaid option that provides continuous eligibility for pregnant women for 60 days after giving birth and for infants for up to 1 year while the mother remains eligible.

In the absence of this provision, when a mother becomes ineligible for Medicaid when the special coverage for pregnant women ends 60 days after giving birth, the infant automatically loses eligibility as well and must reapply. Almost all of the infants are in fact still eligible, because the 133 percent of poverty level income standard that covered their mother while she was pregnant remains in effect for children up to age 6. However, if a new application for the baby is not successfully completed, the baby loses Medicaid coverage. Even if the new application is made, reestablishing eligibility can often take several months, during which time the baby is not eligible for Medicaid. This provision would ensure continued coverage of infants for a full year even when the mother loses eligibility after giving birth.

Fourth. Establish a State option allowing States to continue Medicaid eligibility for children for a 1-year period. This provision would give States the option of allowing children to maintain eligibility for a 1-year period when a change in income might otherwise terminate their eligibility for at least 1 month. Several States have expressed an interest in experimenting with this alternative approach to Medicaid eligibility. It would reduce the amount of paperwork associated with Medicaid by allowing children to be enrolled for 1 year at a time instead of requiring monthly income verification.

This provision would improve child health by permitting uninterrupted medical coverage in the many cases in which a 1-month or short-term income rise would otherwise terminate the child's coverage and force a later reapplication for coverage when the family's income fell again. Since the paperwork involved in establishing and maintaining enrollment in Medicaid is considered a significant deterrent to Medicaid enrollment, this approach could help in the effort to maintain Medicaid coverage for all eligible children.

SECURITY IN THE PACIFIC: THE VIEW FROM CONGRESS

HON. CHRISTOPHER C. COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. COX. Mr. Speaker, I would like to introduce the following speech, entitled "In Defense of Freedom: Pacific Security in the 1990s," by my colleague DANA ROHRABACHER of California, into the CONGRESSIONAL RECORD. It was delivered at a conference in Los Angeles sponsored by the Claremont Institute's Asian Studies Center and the Institute of International Relations. We can all benefit from Mr. ROHRABACHER's insightful analysis:

SECURITY IN THE PACIFIC: THE VIEW FROM CONGRESS

(By Congressman Dana Rohrabacher)

We live in momentous times. Historic changes are transforming our world's political landscape—not merely from month to month, or even from week to week, but quite literally from day to day.

We are witnessing the passing of an era of tyranny and scarcity, and the dawning of a new era of liberty, progress, and global enterprise. Freedom's tide is rising, and one needn't be an optimist to predict that the world our children will inherit will be far different than our own. New opportunities and challenges will emerge that the previous generation could find only on the pages of a Jules Verne science-fiction novel or tucked deep in the imagination of an Edward Teller.

The chance for a lasting peace has never seemed more achievable. The positive spinoffs of democratic capitalism are rewriting the history of mankind. Innovations in communications and information, in ceramics and materials, in genetics and fiber optics, are transforming the planet. By the second decade of the new millennium, we will travel from Los Angeles to Sydney, Australia, in sixty minutes! In less time than it takes to get to the airport today, we will cross the Pacific Ocean tomorrow.

Let me note here that what I am forecasting concerns the lives of people who will live in relatively free and democratic countries. Those societies that too severely restrict the liberties of their people will fade into irrelevance, as free people in the far reaches of the world establish business relationships and supply each other with goods and services within a global marketplace.

Future peace will be maintained by alliances of free peoples, and these bonds and promises will neutralize the threat of tyranny. Unfree regimes will rely on unwilling conscripts, antiquated weapons, and third-rate technology, while free peoples will have SDI, handheld lasers, and cruise missiles that can be programmed to fly into Colonel Quadhafi's bedroom window.

The traditional balance of power and *realpolitik* will still be part of preserving the peace and maintaining stability—as will our ability and willingness to resort to unilateral military action. Increasingly, however, the United States will depend on multilateral actions and unified economic strategies as the means of influencing events.

Even today's international challenges, ranging from terrorism and narcotics trafficking to the preservation of our global ecosystem, cannot be resolved by a few dominant nations acting in isolation. Soon we will see a world shaped more by economic alliances than by military alliances. Witness the recent Free Trade Agreement between the United States and Canada, soon to be followed by European economic integration in 1992. In the years ahead, such agreements will be part of the commerical landscape in the Pacific.

Growth rates in East Asia and the Pacific Rim captured the imagination of the world of a few years ago. Although today this region is going through a period of economic retrenchment, optimism should remain high. In the last century, Henry David Thoreau said, "We go East to realize history and study the works of art and literature; we go westward as into the future, with a spirit of enterprise and adventure."

As the political leaders of Japan, Korea, Taiwan, and ASEAN nations are learning, with economic success comes greter international responsibilities. Many of these leaders still look to the United States, rather than recognizing that they themselves must become champions of human rights and democracy, and bulwarks of regional security.

The post-Second World War era is over. Decisions in Tokyo, Taipei, Bangkok, Singapore, Sydney, and Jakarta will be on an equal par with those made in Washington. ASEAN provides us with a great model of what Pacific cooperation can achieve, yet even here more action and less talk should be the order of the day.

The United States has a large stake in Asia. In 1988, our transpacific trade amounted to $271 billion, far exceeding transatlantic commerce of $186 billion. Just as the role of the United States in Europe is changing, so too will the role of the United States in the Pacific. Just as we have discussed "burden sharing" in NATO over the years, our allies in the Pacifc must share the load of protecting peace and freedom in that region.

This is especially true of Japan. I predict continued friendship and goodwill between the United States and Japan, but let's not deny that strains exist. It will be to everyone's benefit to solidify and strengthen our ties. This means that Japan must further open its market at home and increase its commitments to freedom and stability abroad, especially in the Pacific.

Korea is now struggling to establish a legitimate democracy. The last Korean election was free and fair, and I expect Korea will come out of its present turmoil a stronger and better nation. It, too, must open its markets if it expects to sell its products in American markets.

But the true test of whether the more gradiose predictions of a Pacific Era are to come true will depend largely upon mainland China. China's repression of the Tiananmen protesters one year ago has cast doubt on some of the more enthusiastic forecasts. But China's younger generation will not indefinitely continue to endure the humiliation of despotism and backwardness the elder generation has imposed upon it.

We must welcome China's younger generation to our world. As President Bush has observed, "The process of democratization in Communist countries will not be a smooth one, and we must react to setbacks in a way that stimulates rather than stifles progress." I would suggest that America should be taking a step away from China as it steps away from democracy. Simultaneously we would be taking a step toward the Republic of China on Taiwan, as an enclave of Chinese enterprise and ingenuity that is, I might add, steadily adopting practices to match its ideals.

Let us turn to the other great obstacle to progress in the Pacific, the ongoing violence in Indochina. Over the years, I have spent considerable time in Southeast Asia. To most Americans this corner of the world seems at first utterly foreign and chaotic, with its ancient culture and haunting beauty contrasting with its raw energy and political intrigue. But romanticism should not dull one's outrage over the needless suffering and bloodshed that continues in the region. The situation in Burma and Cambodia is particularly lamentable and disturbing.

In November 1988, shortly after I was elected to office, I visited Burmese students in the remote jungle along the border with Thailand where they had fled for their lives. These brave young people, independent of any foreign support and operating on a shoestring, had organized massive, nationwide demonstrations in August and September of that year, in which hundreds of thousands of unarmed citizens had protested peacefully against the military dictatorship. The uprising was reminiscent of the Prague Spring, which I witnessed firsthand in 1968, or the Tiananmen Square demonstrations of 1989.

Nine months before Tiananmen Square, the Burmese regime unleashed its military and killed thousands of protestors, including schoolchildren and housewives, in a bloody crackdown. Those who managed to escape the massacre found sanctuary in border areas. There they were protected by ethnic minorities, many of whom had been fighting the central government for four decades.

Last year I spent considerable political capital securing humanitarian assistance for these courageous students. Congress appropriated $250,000 for them. I am now working to ensure these funds reach these young heroes and toward the provision of more help for the upcoming year. Such aid, though small in amount, is a statement of principle to the people of Burma and to the world.

In Burma, as elsewhere, we have a moral imperative to stand with those who long for freedom and not with their oppressors. This is especially true now that the brutal Rangoon regime has sunk to new moral lows. Forced resettlement has reached a scale not seen in the region since Pol Pot's Communists turned PhNom Penh into a ghost town.

The Khmer Rouge, of course, win the prize for the decivilization of society and the debasement of humanity. The Vietnamese, using opposition to Khmer Rouge genocide as a cover, invaded Cambodia in a power maneuver aimed at ensuring their dominance in the region. Contrary to press reports of Vietnamese withdrawal, Hanoi is presently involved in a reinvasion of its western neighbor. Approximately 65,000 (PAVN) troops are on Cambodian soil at this moment.

Furthermore, Vietnam has de facto annexed significant parts of Cambodia. Hundreds of thousands of Vietnamese settlers were brought into Cambodia during Hanoi's ongoing occupation, and have filled villages left vacant by Pol Pot's mass murders. In many parts of the Cambodian countryside, the Khmer culture, music, tradition, and people are gone. If Vietnam has anything to say about it, they will never return.

The twin objectives of the United States must be independence and democracy for Cambodian people. I strongly support increased overt and covert aid to noncommu-

nist resistance groups. Had we offered such aid earlier, the Khmer Rouge would have dwindled to nothing. Instead, with China's help, the Khmer Rouge have become a rallying point for Cambodian nationalists who oppose Vietnamese domination.

We must continue to demand the total withdrawal of all Vietnamese forces from Cambodia and the exclusion of Pol Pot and his henchmen from any future role in the Cambodian government. Australia has proposed an internationally supervised election for Cambodia. We should support this proposal.

Communism has been an evil, anti-human force in Southeast Asia, used as an excuse for the slaughter of millions and for the most beastly of acts. Cambodia, Laos, and Vietnam remain one-party Communist dictatorships with none of the human fredoms or democratic liberties which are necessary for peace and prosperity. Vietnam's parroting of Moscow's *glasnost* and *perestroika* is a cruel joke to the hundreds of Vietnamese who pile into leaky boats each month, preferring to face murderous pirates and uncertain seas rather than remain captives of communism. One out of three die in the attempt.

Today, we hear much talk of normalizing relations between Washington and Hanoi. I say that there should be no normalization until all political prisoners are free. Moreover, I would not consider having diplomatic relations with a government that continues to use the remains of our fallen fighting men as bargaining chips to influence our policy, and that continues to hold in captivity, I believe, American prisoners of war.

Our interests do not lie with improving relations with such regimes, but in keeping faith with the humble people of Burma, Cambodia, Laos, Vietnam, and mainland China who are determined to be free.

CLARE CHERRY: OUTSTANDING LEADER IN EARLY CHILDHOOD EDUCATION

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROWN of California. Mr. Speaker, Clare Cherry, of my congressional district in San Bernardino, CA, who devoted her life to the well-being of our Nation's children, passed away on Tuesday, July 31, 1990. As her son, Neeli Cherry Cherkovski, so aptly said, "she was an advocate for children 30 years before it became a national concern."

Our deep loss at Clare Cherry's passing is, and always will be, overshadowed by her legacy and contribution to a strong and healthful foundation for our Nation's children.

Clare Cherry founded a small, experimental preschool at Congregation Emanu-El in San Bernardino in 1953–54. The school was open to all, regardless of race or religious affiliation.

From that modest beginning, under Clare's firm but loving guidance, that school has grown into one of the premier centers for early childhood education in the United States.

Named in her honor, following her retirement, the Congregation Emanu-El Clare Cherry Day School, has beome a center for educators worldwide to observe her imprint on the nurturing of children so that they will have a solid foundation to realize their greatest potential in life.

Clare died at St. Bernardine's Medicaid Center at age 70, after a 2-year battle with lymphoma. She died as she lived, fighting every step of the way with her family and her extended family of millions of children uppermost in her heart and mind.

Only a month ago, according to her son, Neeli, "She was really excited that even in the midst of her illness, she was working on a new book. She never stopped talking about how important early childhood education is to society."

Clare Cherry authored and coauthored 12 books, many of which have been translated into Spanish, German, French, and Portugese. Her books include "Parents, Please Don't Sit on Your Kids," a guide to nonpunitive discipline and to the rights of young children; "Creative Movement for the Developing Child," her motor development activities; "Is the Left Brain always Right?," a pioneering sourcebook in furthering the frontiers of education; and "The Nursery School and Day Care Management Guide," an important textbook utilized nationwide.

The editor of Fearon Books states that more than 700,000 copies of Clare Cherry's books are in print and that they continue to sell in large numbers. Clare Cherry's forthcoming book from Simon and Schuster's Fearon Teachers' Aid Division is focused on the vital subject of home day care for young children.

During the past thirty years she had lectured and held workshops throughout the country and in Canada. Since 1972 she had been an instructor in the continuing education department at San Bernardino State University and since 1970 she has operated her own educational consulting business, CATEC Associates.

Clare Cherry's philosophy of educating and rearing children was centered on her belief that each child is a unique person whose special talents should be nurtured for a creative life. She lived and taught by what she called mutuality, or the golden rule of awareness: "What I want for myself, I also must want for you; what I want from you, I also must be willing to give." She believed in an open classroom, in which children work at whatever activities they desire at a given time.

Foremost, Clare Cherry believed that each child deserved the respect of a unique individual. Only in this way, could each child be able to develop the potential that is in all of us; develop the potential that is the nucleus of a strong, free, democratic society.

Clare Cherry will be missed by all of us. The candle she lit in countless children, parents, and teachers, will serve as a beacon for us all for generations to come.

In a speech entitled, "What Moves Me," she said:

It is the right of a child to be able to do childish things. Rather than to be pushed to be old before his time. I think that we as a nation have to get back to the recognition of this fact. We adults in this country really do act sometimes as though the only reason for having given birth to a child in the first place is so that he can be taught how to read. Surely there is more to living. Surely there is more to growing. Surely there is more to loving than this.

In "Creative Art for the Developing Child," now in its second edition, she wrote about the importance of art in the educational curriculum:

Art education is a meaningful force in the total learning program. By sensitive planning, the children are motivated to pursue art activities and enjoy experiences that lead to general overall development. Having plenty of time to move from one step of growth to another at their own pace and in accordance with their own abilities and interests helps the children develop strong feelings of self-esteem and self-confidence.

Clare Cherry was born in Los Angeles, CA, in 1919. In 1940 she married Sam Cherry, whose photographs of life in this country in the latter part of the Great Depression hang in the Oakland Museum. Sam Cherry devoted his life to his wife's endeavors in early childhood education. His photographs illustrate most of her books.

Their daughter Tany Tull is the founder-president of Para Los Ninos, the world famous child care center on Los Angeles' skid row. Their son Neeli's biography of Charles Bukowski will be published by Random House in the winter of 1990.

REBUILDING THE MEDICARE RELATIONSHIP

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ROYBAL. Mr. Speaker, today I, along with my distinguished colleagues, Representatives HENRY WAXMAN, MATTHEW RINALDO, and RALPH REGULA, am introducing the Medicare Beneficiary Assistance Act. We propose the Beneficiary Assistance Act as a critical step toward rebuilding the relationship between Medicare and its beneficiaries, a relationship that is greatly strained as Medicare beneficiaries feel increasingly estranged from their program.

At this time, we want to express our deep appreciation to the Health Care Financing Administration as well at the overall Department of Health and Human Services for their advice on this proposal. Just a few days ago at my Committee on Aging hearing on the 25th anniversary of Medicare and Medicaid, Dr. Gail Wilensky, the administrator of these two programs, stated her firm commitment to building a stronger and more positive relationship between Medicare and its beneficiaries. Secretary Sullivan has also made a firm commitment of the Department to one-stop shopping and one-stop service when it comes to Medicare and Social Security. We look forward to working with both of them on this effort and believe, as they do, that our bill will be a vital contribution to that effort.

Working closely with the administration and other Members of Congress, it is our intent to make the Medicare Beneficiary Assistance Act part of Medicare legislation to be passed this year, including the possibility of enacting it as

part of this year's budget reconciliation package.

Over a decade ago, Medicare and Social Security had a system in place in each Social Security district office to help Medicare beneficiaries deal with their problems with and the complexities of the Medicare Program. Sadly, not only was that vital service not strengthened, but was allowed to atrophy. Today, Medicare beneficiaries are at a loss when they try to get help. Nobody has it as their primary responsibility to make sure that beneficiaries can appropriately access and adequately understand Medicare and Medicaid, a program for which many Medicare beneficiaries may be qualified. This must change before current and future beneficiaries lose even more of their confidence in these two programs.

Beneficiaries during their working and retirement years have paid in substantial amounts of money to support the Medicare and Medicaid Programs. Their children and grandchildren are doing the same. When the system fails, an increased burden falls on the beneficiary and, in many cases, also falls on the children and grandchildren who must help their parents and grandparents to find their way through the Medicare and Medicaid mazes. While beneficiaries and their families have the personal responsibility to appropriately use these programs, they will be unable to effectively carry out their responsibility without Medicare and Medicaid as working partners.

No private company could survive long with customer relations as poor as are Medicare and Medicaid's. In our view Medicare and Medicaid cannot be allowed to continue their poor performance and survive politically.

In the Medicare Beneficiary Assistance Act, we have an opportunity to begin to rebuild the strained relationship between Medicare and its beneficiaries. Upon enactment, the bill directs the Secretary to establish a health insurance advisory service, first, to operate within each Social Security District Office, second, to conduct community outreach programs, and third, to provide a complimentary toll-free telephone service. The Secretary is also to ensure that sufficient and additional staff are provided to carry out these functions.

More specifically with respect to the Medicare program, this service is to provide information counseling and assistance on eligibility, benefits—covered and not covered, the process for paying for services, rights and process of appeal, other Medicare-related resources, including the Peer Review Organizations, carriers, intermediaries, recent legislative and administrative changes in Medicare. As for the Medicaid Program, the service is to increase Medicare beneficiary awareness of the Medicaid Program, advise Medicare beneficiaries of linkages between the Medicare and Medicaid Programs, make referrals to appropriate State and local agencies involved in Medicaid, and advise Medicare beneficiaries who might be eligible for Medicaid as to benefits, eligibility, and the application process.

In the case of Medicare supplemental insurance policies, the service is to provide information, counseling and assistance to Medicare beneficiaries with regard to the voluntary certification program and accepted standards for such insurance policies, how to make informed decisions on whether to purchase such policies and what criteria to use in evaluating different policies, appropriate Federal, State, and private agencies providing information and assistance, and other private health and long-term care insurance issues deemed appropriate by the Secretary. Finally, this service is to provide other services which help increase current and potential Medicare beneficiary understanding of and confidence in the Medicare Program and improve the relationship between the beneficiary and the Medicare Program.

Mr. Speaker, I respectfully insert the bill's summary and legislative language in the CONGRESSIONAL RECORD at this point:

SUMMARY OF THE MEDICARE BENEFICIARY ASSISTANCE ACT OF 1990

REBUILDING THE RELATIONSHIP

(Health insurance advisory service in Social Security offices, through community outreach programs and through a toll-free telephone service for Medicare beneficiaries.)

The Secretary shall establish a health insurance advisory service (1) to operate within each Social Security District Office, (2) to conduct community outreach programs and (3) to provide a complementary toll-free telephone service and shall provide sufficient additional staff to carry out at least the following functions:

(a) with respect to the Medicare program, provide information, counseling and assistance with respect to eligibility, benefits (covered and not covered), the process for paying for services, rights and process of appeal, other Medicare-related resources (including the Peer Review Organizations, carriers, intermediaries), recent legislative and administrative changes in Medicare;

(b) with respect to the Medicaid program, increase Medicare beneficiary awareness of the Medicaid program, advise Medicare beneficiaries of linkages between the Medicare and Medicaid programs, make referrals to appropriate State and local agencies involved in Medicaid, and advise Medicare beneficiaries who might be eligible for Medicaid as to benefits, eligibility, and the application process;

(c) with respect to Medicare supplemental insurance policies, provide information, counseling and assistance to Medicare beneficiaries with regard to the voluntary certification program and accepted standards for such insurance policies, how to make informed decisions on whether to purchase such policies and what criteria to use in evaluating different policies, appropriate Federal, State and private agencies providing information and assistance, and other private health and long-term care insurance issues deemed appropriate by the Secretary; and

(d) other services which help increase current and potential Medicare beneficiary understanding of and confidence in the Medicare program and improve the relationship between the beneficiary and the Medicare program.

The Secretary, through the Health Care Financing Administration, shall develop the appropriate educational materials and other appropriate tools to assist District Office personnel and toll-free telephone service personnel and to be made available to beneficiaries. The Secretary shall take the appropriate measures to inform current Medicare beneficiaries and the general public about this service.

The Secretary shall provide an annual report on Medicare beneficiary services, including those covered under this act, and provide recommendations for changes which would improve the relationship between Medicare and its beneficiaries.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medicare Beneficiary Assistance Act of 1990".

SEC. 2. HEALTH INSURANCE ADVISORY SERVICE FOR MEDICARE BENEFICIARIES.

(a) IN GENERAL.—The Secretary of Health and Human Services shall establish a health insurance advisory services program (in this section referred to as the "beneficiary assistance program") to assist medicare-eligible individuals with the receipt of services under the medicare and medicaid programs and other health insurance programs.

(b) OUTREACH ELEMENTS.—The beneficiary assistance program shall provide assistance—

(1) through operation within each district office of the Social Security Administration,

(2) using community outreach programs, and

(3) using a toll-free telephone information service.

(c) ASSISTANCE PROVIDED.—The beneficiary assistance program shall provide for information, counseling, and assistance for medicare-eligible individuals with respect to at least the following:

(1) With respect to the medicare program—

(A) eligibility,

(B) benefits (both covered and not covered),

(C) the process of payment for services,

(D) rights and process for appeals of determinations,

(E) other medicare-related entities (such as peer review organizations, fiscal intermediaries, and carriers), and

(F) recent legislative and administrative changes in the medicare program.

(2) With respect to the medicaid program—

(A) eligibility, benefits, and the application process,

(B) linkages between the medicaid and medicare programs, and

(C) referral to appropriate State and local agencies involved in the medicaid program.

(3) With respect to medicare supplemental policies—

(A) the voluntary certification program under section 1882 of the Social Security Act and standards required under such program,

(B) how to make informed decisions on whether to purchase such policies and on what criteria to use in evaluating different policies,

(C) appropriate Federal, State, and private agencies that provide information and assistance in obtaining benefits under such policies, and

(D) other issues deemed appropriate by the Secretary.

The beneficiary assistance program also shall provide such other services as the Secretary deems appropriate to increase beneficiary understanding of, and confidence in, the medicare program and to improve the relationship between beneficiaries and the program.

(d) EDUCATIONAL MATERIAL.—The Secretary, through the Administrator of the Health Care Financing Administration, shall develop appropriate educational materials and other appropriate techniques to assist employees in carrying out this section.

(e) NOTICE TO BENEFICIARIES.—The Secretary shall take such steps as are necessary to assure that medicare-eligible beneficiaries and the general public are made aware of the beneficiary assistance program.

(f) REPORT.—The Secretary shall include, in an annual report transmitted to the Congress, a report on the beneficiary assistance program and on other health insurance informational and counseling services made available to medicare-eligible individuals. The Secretary shall include in the report recommendations for such changes as may be desirable to improve the relationship between the medicare program and medicare-eligible individuals.

SALUTING THE 1990 DUPO TIGERS

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. POSHARD. Mr. Speaker, at a time when the sports pages are filled with news of fallen heroes, I want to call attention to young people whose actions reflect the image we respect. I am proud to congratulate the Tigers of Dupo, IL. Their unselfish loyalty to their school and community deserve heroic status. For a nation where the fallen hero has seized the headlines, it's important to honor the achievers who serve as role models for all. So I salute the Dupo Tigers for their second place finish in the Illinois Class A Baseball Championship.

Dupo is a town of 3,000 people located in southwestern Illinois. It is a town that epitomizes everything that is good and right about small town America.

The Tigers finished the season with a 20–6 record, winning the Cahokia Conference title, and earning a ticket to the Columbia Regional where roaring fans witnessed their exciting victories. They then marched on to the Freeburg sectional where they experienced one of their most deserving wins. The game was against Trenton High School, lasting 10 long innings. Finally, the Tigers fired up and ultimately defeated their opponents by an exciting 1–0 victory.

I am extremely proud to say I represent the citizens of Dupo in the U.S. Congress. Without their dreams, we would never be reminded of how wonderful it is to watch people accomplish great things.

Please allow me to include these names of the people who made this possible in the RECORD so they may receive the recognition due to them:

1990 DUPO HIGH SCHOOL TIGERS

Head coach: Jerry Devany.

Assistant coach: Robert Mason.

Captains: Bubby Moore and Steve Diel.

Roster: Bubby Moore, Ervie Dugan, Mike Dejarnette, Travis Ducherich, Cole Proffer, Robert Bagsby, Cliff Ticer, Josh Markert, Mark Furlow, Shawn Antoniou, Chris Burch, Shawn Flemming, Kenny Rodenberg, Travis Kelling, Dale Daniel, and Steve Diel.

Administration: Patrick Mudd, Superintendent; William E. Reynolds, Principal; and Richard Bright, Athletic Director.

HONORING RABBI PHILLIP FRANKEL ON HIS 80TH BIRTHDAY

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CARR. Mr. Speaker, I want to take a moment today to call your attention to a gentleman in my district who has given his life in service to the community as rabbi and as an educator.

Rabbi Phillip Frankel has served Lansing, MI as rabbi to Congregation Shaarey Zedek since 1954. Before coming to Lansing, he held pulpits in Charlotte, NC and Mount Lebanon, PA.

Rabbi Frankel, ordained after graduation from Hebrew Union College in Cincinnati, continued on to receive a master of Hebrew laws and a doctor of divinity from Hebrew Union College.

He was a member of the faculty at Michigan State, where for a number of years he taught in the department of religion and also taught classes in Judaism and Bible at Lansing Community College.

A noted lecturer, Rabbi Frankel was often invited to address churches and community groups. He was also visiting rabbi to congregations in Saginaw, Traverse City and Jackson, MI, and served as rabbi in residence at Temple Beth Israel in Longboat Key, FL for part of the year.

Many honors have been bestowed upon Rabbi Frankel, in large part for his activity in community organizations. He is past president of the Lansing Community Planning Council and the Ingham County Medical Rehabilitation Center and Commission.

He was the first chairman of the Lansing Human Relations Commission, a vice president of the Greater Lansing Inter-Faith Council on Religion and Race, and was a founder of the Lansing Urban League. And he has served on the executive boards of the American Red Cross, the Urban League and of Lincoln Center.

In recognition of his selfless service to the community, he was named the Greater Lansing Chamber of Commerce's Man of the Year, a title well earned.

Rabbi Frankel is someone of which everyone in Lansing and Michigan are deservedly proud. I rise today on the occasion of his 80th year to wish him well, and to ask you to join me in that wish and in giving him the congressional recognition he so clearly deserves.

COMMUNITY CENTER MONTH

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GILMAN. Mr. Speaker, it is an honor and privilege to introduce today legislation, House Joint Resolution 636, that would designate September 15, 1990, through October 15, 1990, as "Community Center Month."

Community centers provide cultural, social, and recreational facilities to a large segment of the American population. They are dedicated to preserving the well-being of our vital and vibrant communities across this great Nation.

Our community centers serve as a gathering place for all age groups as well as persons of all denominations. Community centers also offer a variety of intellectual, social, and recreational activities. They provide a myriad of programs for the elderly and disabled as well as child care.

The first community centers came into prominence during the second half of the 19th century and became a haven for thousands of people fleeing oppression in Eastern Europe. Through the services rendered by community centers these new immigrants were given the tools necessary to assimilate into the American way of life.

Mr. Speaker, as our community centers enter their second century they have become large, complex facilities meeting the specific needs of our communities. Whether it is providing health care related services like the Rockland Community Development Council in Rockland County, NY, or youth support and drug education programs like the Band Wagon in Orange County, NY, community centers have responded to the ever changing needs of our society.

Accordingly, I urge my colleagues to join with me in recognizing the important contributions of our community centers by cosponsoring this legislation.

Mr. Speaker, for my colleagues' edification, I insert the full text of my resolution (House Joint Resolution 636) at this point in the RECORD:

H.J. RES. 636

Whereas Community Centers are large and complex cultural, social, and recreational institutions dedicated to preserving the well-being of a vital and vibrant segment of the United States;

Whereas there are Community Centers, branches, and camps serving a clientele of more than a million people across the continent;

Whereas Community Centers feature programs and services for all age groups, from infants through the elderly, and for people with disabilities and special needs;

Whereas Community Centers serve as gathering places for peoples of all denominations and offer a rich and varied program of educational and cultural opportunities;

Whereas the first Community Centers came into being during the second half of the nineteenth century to provide social, recreational, and intellectual activities for community members in the United States;

Whereas, as the nineteenth century progressed into the twentieth and the United States became a haven for hundreds of

thousands of peoples fleeing the oppression and pogroms of Eastern Europe, Community Centers turned their energies and attention to the enormous task of acculturating the new immigrants, teaching English and the meaning of United States citizenship;

Whereas after the influx diminished and Community Centers evolved once again into institutions dedicated to preserving good citizenship through educational, cultrual, social, and recreational programs; and

Whereas, as Community Centers enter their second century of providing service, it is most fitting that we recognize their important contribution to the fabric of life in the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 15, 1990 to October 15, 1990, is designated as "Community Center Month", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe the month with appropriate ceremonies and activities.

ECONOMIC ROADBLOCK: INFRASTRUCTURE NEGLECT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDERSON. Mr. Speaker, a recent Wall Street Journal article says it all: "Economic Roadblock: Infrastructure Neglect."

This news should come as no surprise. Clearly, infrastructure is not just potholes or concrete. It is productivity and competitiveness.

Recent studies show a direct link between our economy and our infrastructure spending. The more we spend on basic services such as transportation, waste disposal and water resources, the higher our annual productivity growth.

The article concludes by stating, and I quote: "for a healthy economy as the new decade unfolds, the infrastructure deserves far greater attention than it has received of late."

Well, today I, along with Barbara Boxer, my good friend, colleague and enthusiastic supporter of the infrastructure cause, along with a number of other Members, are providing that opportunity by introducing a resolution that specifies 1991 as "Rebuild America Year" and calls upon the President and Congress to develop a comprehensive national infrastructure program.

I encourage all of our colleagues to join in support of this resolution and to work with us as we begin to draft a national rebuild America infrastructure bill.

Some may question whether we can afford to create a new infrastructure program given the deficit situation. I submit that the real question is whether we can afford not to.

Mr. Speaker, I ask unanimous consent that the article I referred to be printed in the RECORD immediately following my remarks:

ECONOMIC ROADBLOCK: INFRASTRUCTURE NEGLECT

NEW YORK.—Infrastructure.

The word hardly rolls off the tongue or grabs headlines. It's far more arresting to warn in big black letters of a budget or trade deficit than of an infrastructure deficit. Not so very long ago dictionaries that carried the word infrastructure at all defined it—to quote from a 1961 edition of Webster's—as a term for "permanent bases or supporting installations for military purposes."

No longer. Nowadays defined as the physical system behind such basic services as transportation, waste disposal and water resources, the word is gaining considerable attention, at least among economists and policy makers concerned about the nation's lackluster productivity performance. They call the condition of the infrastructure America's "third" deficit, after trade and the budget, and they greatly fear that this deficit can only worsen, placing an increasing burden on an economy already struggling to expand in healthy fashion.

The link between productivity and investment in a nation's infrastructure is apparent, among other places, in data compiled by David A. Aschauer, senior economist of the Chicago Federal Reserve Bank.

In a recent 20-year period, he notes, the annual growth of productivity in the U.S. was a dismal 0.6 percent, compared to 1.8 percent in Britain, 2.3 percent in France, 2.4 percent in West Germany and 3 percent in Japan. Meanwhile, he adds, nonmilitary public investment averaged only 0.3 percent of national output in the U.S., against rates of 1.8 percent in Britain, 2 percent in France, 2.5 percent in West Germany and 5.1 percent in Japan.

The Fed economist attributes "as much as 60% of the productivity slump" in the U.S. to "neglect of our core infrastructure," by which he means streets and highways, mass transit, airports, water and sewer systems and electrical and gas facilities.

Notwithstanding the apparent link between infrastructure and productivity, President Bush's budget for fiscal 1991 "suggests that infrastructure is not a priority for this administration," says Peggy L. Cuciti, a researcher at the University of Colorado's Center for Public-Private Sector Cooperation.

She notes that the budget includes $43.8 billion for nonmilitary physical capital, or about the same amount, adjusted for inflation, that was spent in 1979, even though the economy has grown some 40 percent since then. The 1991 infrastructure outlay comes to 3.6 percent of all proposed spending, she adds, sharply below the 1979 rate of 5.3 percent.

Since "the first theme of the president's budget is investing in our future, one might expect that infrastructure programs would fare well," Ms. Cuciti remarks, "but they clearly do not."

It's no help that most infrastructure spending is undertaken at state and local levels where, as Donald H. Strazheim, chief economist of Merrill Lynch & Co., observes, "governments are increasingly strapped for funds and awash in red ink." The combined operating deficit for state and local governments is running at a record annual rate of about $45 billion and "is likely to get worse before it gets better," the economist adds.

In the Bush administration's fiscal 1991 budget, grants to state and local governments for infrastructure projects amount to 23 percent less than in 1979, after adjusting for inflation. Not surprisingly, state and local officials "express considerable anger and sarcasm about national policy," says Alan Alshuler, director of Harvard University's Center for State and Local Government. As many as 18 states have raised their gasoline taxes so far this year, he adds, and "some of the increases were by quite large amounts."

The deteriorating condition of the U.S. infrastructure is amply documented. After a recent three-year study, the National Council on Public Works Improvement concluded that "if our public works were graded on an academic scale, their recent performance would earn a scant C."

The Federal Highway Administration has estimated that 23 percent of the nation's 575,000 bridges are structurally deficient and more than 25 percent of interstate roadway has deteriorated. Meanwhile, more than a third of the country's solid-waste landfills are expected to be exhausted by 1993 and due to airport congestion airplanes are delayed an average of 2,000 hours daily.

Such developments, it should be added, can complicate gauging with precision the effect of a neglected infrastructure on the economy. For example, if poor roads cause traffic jams and overburdened airports cause arriving aircraft to be delayed, it's likely that more gasoline will be consumed and more overtime paid. This will tend, at least in the short run, to increase the gross national product. But it hardly represents a desirable economic trend.

With such measurement difficulties, it's no surprise that economists disagree over the exact relationship between the state of the infrastructure and productivity gains. Some analysts maintain, for instance, that Mr. Aschauer's estimate is too high and that far less than 60 percent of the nation's productivity slowdown can be traced to neglect of the infrastructure.

There is, however, wide agreement on the larger issue that, for a healthy economy as the new decade unfolds, the infrastructure deserves far greater attention than it has received of late. Unfortunately, with the budget so deep in red ink, the likelihood is for continuing neglect.—Alfred L. Malabre Jr.

DOMESTIC TEXTILE PROTECTION BILL

HON. JOHN MILLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MILLER of Washington. Mr. Speaker, our world is changing rapidly. New markets are developing around the globe. Yet the Senate has passed H.R. 4328, this year's domestic textile protection bill. Now, the House will consider the textile bill, which I strongly oppose. Protection should be reserved for industries truly in need of protection. And, Mr. Speaker, this is not the case with the textile industry.

Let me pose three questions? Does the textile industry need this bill? Does the American consumer need this bill? Does the United States need this bill to guide trade policy? By my count, Mr. Speaker, the answer to these questions is no, no, and no.

Does the domestic textile industry need this protection?

It is incredulous that the most protected industry in America is asking for more protection. It is not dying; profits are way up. KSA, a respected industry analyst, reported: "Fiscal

year 1988 produced the highest return on equity in the 18 years KSA has issued Textile Profiles."

Companies are not making just double digit profits, they are making profits as high as 27 percent or 28 percent or 29 percent. Not bad. Not the story of an industry needing more and more protection.

True, there has been a modest decline in overall employment. But that is because of new investment, plant modernization, and other factors, including the general economy. Additional protection is merely to keep profit margins high.

Does the American consumer need this bill?

We will hear that H.R. 4328 is necessary to protect consumers. Two years ago, when this House sustained President Reagan's veto of a similar bill, we saved the American consumer more than $25 billion over 5 years. That bill and H.R. 4328 is like writing a dividend check to the domestic textile industry signed by consumers across the United States.

Like many of my colleagues, I am concerned about helping low-income and single-parent families make ends meet. And H.R. 4328 would adversely affect these low-income consumers with children. This bill substantially limits the ability of main street stores like K-mart to import inexpensive children's clothing. This bill will hit the low- and moderate-income families who rely on imports for less expensive quality products.

Does the United States need this bill to guide trade policy?

Mr. Speaker, we will hear that we need this bill because the United States has failed to impose global quotas and to solve the problem of runaway imports. The truth is the United States has negotiated the toughest renewal ever of the Multifiber Arrangement, extending coverage of virtually all textile and apparel products. Our Government has been so vigilant in enforcing the terms of bilateral agreements that since 1985 there has been no change in the ratio of imports to domestic consumption of textile products.

Moreover, Mr. Speaker, the United States' current proposal before GATT would lead to a comprehensive limit on textile goods, by product category. This limit would be divided between countries with whom we have agreements. We should let these negotiations work.

In 1789, when we were a developing country, Congress imposed tariffs on imports of raw cotton, yarn tanned leather, ready-made clothing, shoes, boots, and other clothing items. New provisions were added in 1816, 1824, 1827, 1828, 1832, and on and on. Each new layer of protection is met with cries from the industry for more protections. Let's look at this bill. Is it really needed?

Mr. Speaker, surely an industry in need of help would not earn profits as high as our textile industry. Certainly, consumers nationwide don't need an extra $25 or $30 billion in new costs. And, our negotiators are already doing their job in presenting a case for tighter regulation within the GATT negotiations. Let's consider our global future and defeat this bill. Let's put an end to 18th century protectionism.

NORTON AIR FORCE BASE AND THE MILITARY AIRPORT PROGRAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROWN of California. Mr. Speaker, in passing H.R. 5170, the Aviation Safety and Capacity Expansion Act of 1990, the House of Representatives has taken a strong step toward providing for air traffic growth while balancing concerns about safety and the compatibility of airport facilities with local community needs. My colleagues, Mr. ANDERSON, chairman of the Committee on Public Works and Transportation and Mr. OBERSTAR, chairman of the Subcommittee on Aviation, are to be commended for their farsightedness and leadership on this legislation.

Of particular importance to my district, and to the surrounding region of southern California, is section 107, the Military Airport Program. California was especially hard hit by the recommendations of the Defense Secretary's Commission on Base Realignments and Closures which are leading to the closure of three large Air Force bases in the State—two in southern California—including Norton Air Force Base in my district. At the same time, southern California is in critical need of increased airport capacity.

Section 107 will authorize funds to assist in the conversion of up to eight former military airports to civilian use. It makes great sense to evaluate closing military airports for future civilian airport use. Some will be found to be unsuitable, sometimes for the same reasons they were recommended for closure by the Commission. However, some will also be found to be very suitable for reuse as airfields, and the communities struggling with the economic loss of a military base should take comfort in the opportunity to add civilian airport uses.

Mr. Speaker, I am particularly pleased about the Military Airport Program because of my close association with Norton Air Force Base. In my district, community leaders are grappling with the issue of reuse of Norton AFB. Though further study is necessary, Norton may quite well be suitable for a variety of civilian aviation uses, including a civilian airport terminal. In fact, a series of contracts between the Norton reuse authorities, the Air Force, and Lockheed Corp., have just been signed that will allow Lockheed to begin using Norton as an industrial facility for aircraft repair and retrofitting even as the Air Force continues its mission at Norton through 1994.

I again thank the full committee leaders for their outstanding initiative and look forward to working with them toward final enactment. Should those directly responsible for Norton's reuse seek to pursue funding under the Military Airport Program, I look forward to working with my colleagues in Congress and with the Secretary of Transportation to include Norton in the group to be selected for participation in the program.

RECOGNIZING THE EDUCATIONAL ADVANCEMENTS AT DUPO HIGH SCHOOL

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. POSHARD. Mr. Speaker, our world is slowly coming together. Generations, young and old, are excited about what the future might offer. We are witnessing their concern for global unity and global communication, the excitement of our future. However, the polls currently illustrate that the American population is "handicapped." The American ignorance of other tongues has jeopardized the quality of global communication.

Mr. Speaker, I rise to commend an innovative educational program at Dupo High School, Dupo, IL. Since last September, the program has been funded by a grant the school received in 1989 from TI–IN United Star. The program was also given a generous donation of $10,000 from the Elmer Oerter Foundation.

The success of this program deserves praise. The school has taken the necessary steps to start focusing on the future of global communication. Since Dupo currently does not have a German foreign language class, they have taken the initiative to recognize the importance of overcoming our American handicap by accessing another system. Via satellite, the system allows the students from Dupo to take an active part in another school's unique classes through interactive video broadcasts. It allows instantaneous communication between the teacher and the student at separate schools. During the classes the teacher is able to ask questions and receive instant responses from the students. A FAX machine also allows the students and teacher to transmit tests and other written work to each other on a moment's notice.

Not only is the interactive cable working at Dupo and Columbia High Schools, but satellite education transmitted from places like San Antonio and other American cities is also part of the learning process at Dupo. Diverse classes such as business writing and self-esteem shops are available for students and teachers. A two-way telephone system has been set up so students from Dupo can talk to their instructor anywhere in the country.

Dupo High School Principal William Reynolds have worked to expand the system for homebound students, allowing them to stay current with classes originating from both Dupo and Columbia high schools.

Students are celebrating the future. Through unification of culture and language, our children become enriched by the virtue of knowledge and education. Since it takes a communicative effort to learn about our neighbors, I'm excited to see our youth take part in programs such as this.

As a former history teacher and a current member of the Education and Labor Committee in the U.S. House of Representatives, I have always believed that a good education is what leads to success. I am proud to rise today and recognize the students, faculty, and

supporters of the Dupo High School Satellite Program for the steps they have taken toward our country's future.

CAMPAIGN REFORM

HON. J. DENNIS HASTERT

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HASTERT. Mr. Speaker, I rise today to appeal to the Democratic leadership to open the Halls of Congress to democracy and justice by allowing an open rule on campaign reform.

I can understand their fear of true reform. Congress might actually return to being a citizen-legislature, instead of the Washington bureaucracy which it has become. No longer would those Members who have become Washington bureaucrats be protected from their constituents' ideas and values. Surely campaign reform is overdue when even the Politiburo in Moscow has a higher rate of turnover than the U.S. House of Representatives.

The American people agree with Republican Leader BOB MICHEL, that serious campaign reform is a necessity. They believe the amount of money spent on campaigns and the way it is raised is unconscionable. They abhore the spending of vast sums of money to perpetuate the tenure of professional politicians. They hold to the ideal that Government should be "of the people, by the people, for the people."

The Republican Party wants to return Government back to the people by increasing competition in elections and limiting special interest influence. Unfortunately, it appears the Democratic leadership is content with phony, showboat reform.

THE NEW HITLER OF THE MIDDLE EAST

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. LANTOS. Mr. Speaker, I would like to share two remarkable articles with my colleagues about the Iraqi dictator, the new Hitler of the Middle East. I respectfully request that they be placed in the RECORD.

[From the Washington Post, Aug. 3, 1990]

A FESTIVAL OF APPEASEMENT

(By Charles Krauthammer)

"The events currently occurring in Kuwait are an internal affair with which Iraq has no relation." Iraq's Ambassador to the United States, on Iraq's invasion of Kuwait.

Iraq has promised to withdraw from Kuwait as soon as order is restored. Of course Kuwait was doing rather well, otherwise, until Saddam Hussein of Iraq dispatched 100,000 men (a tenth of his standing army) to overrun it. But we must not quibble. The man has his reasons. He invaded Kuwait, says Saddam Hussein, in support of "the free government of Kuwait" installed by his invasion troops.

Such cynicism is more than amusing. It is a measure not just of Hussein's ruthlessness but of his confidence. He is a thug on the loose with no one to stop him. And he knows it.

What does he want? A lot. He wants Kuwait's Bubiyan island, which commands his outlet to the Persian Gulf. He wants Kuwait's part of the Rumaila oil fields. He wants Kuwait's money. In short, he wants Kuwait. Which he now has and will keep. When he withdraws his forces, he will leave a puppet behind.

Then he wants Saudi Arabia. He might invade. But he need not. The Saudis respond well to intimidation. The other gulf states will fall quickly into place. That makes Hussein leader of the Arab world, dictator of the gulf and the single most powerful arbiter in the world of oil.

He will get what he wants because there is no one to stop him. The United States is far away, and George Bush is not eager to get bogged down in a land war in a God-forsaken patch of desert, even if oil-rich. Moreover, Hussein knows that he has little to fear from a country that has been shamelessly propitiating him since it helped him win the Iran-Iraq war in 1988.

At the time, the U.S. tilt toward Iraq was justified given the alternative. (Remember, we also chose Stalin over Hitler.) But that policy became obsolete the day the war ended in August of 1988. Yet the Bush administration carried on regardless. Despite Iraq's growing truculence and obvious hostility to the United States, the administration persisted in its pro-Iraqi policy. As late as last week, when Iraq first sent troops to the Kuwait border, the administration was fiercely resisting the imposition of sanctions by Congress.

With Iraq's "naked aggression" (President Bush's words) against Kuwait, all this has changed. The administration has frozen Iraqi assets, imposed a trade ban and sent an aircraft carrier to the region. That is a good start, although we have lost two years in trying to build an anti-Iraqi coalition.

What next? First, exert severe pressure on our allies to join a total quarantine of trade, especially military and high-tech trade, with Iraq. Then tell our friends in the gulf that if they want American protection they are finally going to have to (1) ask for it openly and (2) offer the United States facilities on the ground. Today, Kuwait pathetically requests help from all quarters. But for many years it had resolutely denied the United States any ground facilities because of the fear of being too closely associated with Washington.

We should say: No more. Can't have it both ways. Last week, for example, the United Arab Emirates begged the United States for a joint military exercise in response to Iraq's initial threats. We obliged. The Emirate ambassador then immediately announced that "there are no joint military maneuvers," that "all statements and comments issued so far are unjustified exaggerations," and that, yes, "there is some technical exercises as far as the air refueling to our tankers," but "this is basically an annual exercise which just happened to coincide with the unfortunate new developments in the area." First annual exercise, no doubt.

The mendacity of the smaller gulf states in their dealings with the United States is characteristic of Arab diplomacy. Egypt's presidential spokesman referred to the invasion as "the outbreak of hostilities in Kuwait at dawn today." Syria called for a meeting of the Arab League. The other members are mulling over the idea. Meanwhile, Arab foreign ministers meeting in Cairo deliberated and failed even to make a statement "pending consultations with their governments."

The Arab world is where Europe was in the 1930s. Everyone is playing his part. The Arab League is playing the League of Nations, which stood by while Mussolini attacked Abyssinia. President Mubarak of Egypt is playing Chamberlain, flying to Iraq to appease the unappeasable, then announcing that his mediation has bought peace for our time.

And Jordan, now engaged in rather ominous military cooperation with Iraq, is trying out the role of Mussolini's Italy to Hitler's Germany: slavish partner to the regional thug. This is ominous because an Iraqi-Jordanian alliance against Israel is the only way in which the current unpleasantness could explode into a general Arab-Israeli war.

So much for the myth of the "moderate Arabs." For several years now Iraq has been touted by the administration as part of the moderate coalition. If "naked aggression" is the way of the moderate Arabs, one wonders what the immoderates are up to.

[From the Washington Post, Aug. 3, 1990]

WOLF OUT OF BABYLON

(By George F. Will)

The anesthetizing tranquillity of the post-Cold War world has suddenly been driven away by Iraq's emphatic reminder of the nature of the pre-Cold War world. This echo of the preceding 30 or so centuries suggests how much like the past the future may be.

It is tempting, but misleading, to compare the strutting Saddam Hussein to Mussolini, and thereby diminish Hussein, making him seem, as Mussolini now does through the obscuring mists of history, more absurd than menacing. Mussolini was the very junior partner in the Axis and was last seen hanging from his heels at a Milan gas station. Hussein too is unlikely to die old, venerated, in dignified retirement or in his sleep. But he is unlike Mussolini in two significant particulars.

Hussein radiates a more virulent and personal viciousness than Mussolini did. (Mussolini's internal-security apparatus was evil but not as brutal as Hussein's, and it is unimaginable that Mussolini would have used poison gas against Italians as Hussein has against Iraq's Kurds.) And Hussein disposes of far more military might, relative to neighbors, than Mussolini did.

However, Hussein is a very 1930s figure. He issues ultimatums. He masses troops on international borders ostensibly to give weight to the diplomacy of ultimatums but actually to demonstrate, with contemptuous clarity, that ultimatums are perfunctory precludes to the crossing of borders.

The U.S. response to this, particularly regarding reassurances to Saudi Arabia, will probably be influenced, and for the better, by the fact that today's president is the last of a well-schooled line. Unless Lloyd Bentsen, the former bomber pilot, runs and wins in 1992, George Bush, the former fighter pilot, will be America's last president from the World War II generation. For that generation, war was the enveloping, formative experience, and the word "Munich" is freighted with warning when it denotes analogies.

The lesson of Munich was: When it is necessary to confront an expansionist dictator, sooner is better than later. As Douglas MacArthur said, in war all tragedy can be sum-

marized in two words—"too late." Too late perceiving, too late preparing for danger.

Democracy is not, as Ronald Reagn and others seem to assume, the certain solvent of danger. Democracy does not necessarily render a society pacific, just as a dictatorship (for example, Franco's Spain) does not necessarily manifest aggressive dynamism. But democracy does generally help domesticate nations. Therefore it is well to note the following:

Democracy has recently been sprouting here, there and, it almost seems, everywhere between the cracks in the crumbling concrete of despotisms. It has been sprouting not only in the Soviet Union and Eastern Europe, but in Latin America, too. However, the world still waits and watches, without grounds for near-term hope, for the first democracy in the so-called "Arab world."

In the 42 years since Israel was established on one-sixth of 1 percent of the land in "the Arab world," the reaction in the region to the existence of Israel has been unanimously hostile, and this unanimity has obscured the fact that the phrase "the Arab world" is only a geographic, not a political expression. The most envenomed and bloody relationships, and most volatile confrontations, do not involve Israel.

The "blame Israel first (and last, and in between)" brigade is large and growing, here and abroad. But it should be given pause by Hussein. Iraq's act is redundant evidence of this truth:

The existence of Israel, and of "the Palestinian question," usually has precious little—and often, as in this case, nothing—to do with the largest and most dangerous doings in the Middle East. Today it is especially apparent that Israel is the all-purpose but implausible alibi for the various pathologies that convulse many Arab nations and relations between them.

History will record more clearly than did contemporary journalism the fact that in the 1980s Iraq and Iran fought one of the major wars of this century of big wars. The war raged most of the time outside the range of television cameras and therefore largely outside the consciousness of the West.

This week, however, the West should remember with gratitude recent history's single most effective and beneficial act of arms control, Israel's 1981 bombing of Iraq's embryonic nuclear-weapon program. And this week it is wise to acknowledge that the world became more dangerous because nothing much happened after Iraq used poison gas against Iran. The regime of international restraint, sometimes called international law, was significantly weakened by the weakness—the virtual invisibility—of the world's response.

Israel noted that non-response and concluded, not for the first time, this: The unthinkable isn't.

Stephen Crane once wrote:

A man said to the universe:
"Sir, I exist!"
"However," replied the universe,
"The fact has not created in me
A sense of obligation."

Hussein has demonstrated the sincerity of his bellicose rhetoric. This demonstrates why Crane's poem expresses the essence, and correctness, of the statecraft of the only democracy in that unhappy region.

IS THE NUCLEAR POWER OPTION VIABLE?

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HANSEN. Mr. Speaker, is the United States about to walk away from one of its most viable energy options—the nuclear power option? The answer may be "yes."

To address this question, the importance of the nuclear power option to the United States should be understood. Presently, almost 20 percent of the Nation's electricity comes from nuclear power, and more will be needed. Why? During 1989 the U.S. utility industry ran close to or below its minimum acceptable capacity margins. The industry has calculated that a potential for brownouts now exists in the Northeast, Southeast, and mid-Atlantic regions unless additional generating capacity is brought on line. A recent Gallup poll indicated that nearly 70 percent of the American public now believe that nuclear energy should play an important role in meeting our future electricity needs. Media analyses suggest that acceptance of nuclear power is gaining strength as the public becomes more knowledgeable about the limited near term contribution of renewable energy sources and the environmental limitations of fossil energy.

If nuclear power is important to our energy future, it also must be environmentally acceptable, and that means finding a viable solution to the disposal of the nuclear waste produced in nuclear power plants.

During the past 20 years we have achieved a national consensus that disposal of nuclear waste in deep underground repositories can be a safe solution. Significantly, the consensus for underground disposal has reached beyond the United States. France, Sweden, the United Kingdom, and Japan—all are making progress toward implementing underground repositories. In the United States, this approach was first recommended by the National Academy of Sciences in 1967. The repository concept become national policy in 1982 through a generic environmental impact statement process which including public hearings across the country, during which all disposal options were evaluated. Congress then passed the Nuclear Waste Policy Act in 1982 and subsequent amendments in 1987, which established the process by which the Nation would select, characterize, investigate, and license an underground repository for nuclear energy.

The resolution of this issue became more urgent when the Nuclear Regulatory Commission stated that nuclear power plants would not be licensed in the future unless there is confidence that the waste problem can be resolved. The Commission's deliberations on this point are documented in the "Nuclear Regulatory Commission Confidence Rule Making." With this background, it is not surprising that the utility industry has been reluctant to pursue nuclear power unless the waste produced by such plants could be permanently stored.

The 1987 amendments to the Nuclear Waste Policy Act [NWPA] narrowed the sites for study as a potential repository to Yucca Mountain, NV, about 100 miles northwest of Las Vegas. To date, $750 million has been spent on preliminary work. The Department of Energy [DOE] is now ready to begin specific studies to determine the viability of that site and, if it proves acceptable, proceed toward submitting the site for acceptance by the Nuclear Regulatory Commission and the Congress. Unfortunately, for the past 2 years, the State of Nevada has refused to allow the DOE to implement the NWPA process to determine Yucca Montain's suitability for an underground repository. The DOE is prepared to begin site investigation activities, but the State of Nevada has refused to issue environmental permits for new field work. Both Nevada and DOE have filed lawsuits and the issue is now before the court. Thus, the State of Nevada has prematurely halted the site investigation process before DOE can obtain sufficient data to determine site suitability.

The United States must not allow the process of selecting a site for nuclear waste disposal to be stalemated. The question is not whether Yucca Mountain is a suitable site, but rather whether the process that Congress defined for investigating the site should proceed. The NWPA process provides the opportunity for Nevada scientists, as well as other independent groups, to conduct oversight of the site's scientific investigations and challenge the suitability of the site before any determination is made to proceed with actual design and construction of a repository. If a State can effectively preempt this study phase, we may never have the opportunity to find a site in this country that would be suitable for underground disposal.

The 1987 amendments to NWPA provides that the President appoint "a negotiator to seek a State or Indian tribe willing to host a permanent repository—at a suitable site." The negotiator is authorized to negotiate the financial terms and conditions under which the States or Indian tribe is willing to host the repository. Such a negotiator could address this important set of conditions with officials of the State of Nevada. However, 3 years after the 1987 amendments, no negotiator has been appointed, and no one with authority has approached the people of Nevada to discuss the benefits which might make siting of the repository in their State an acceptable action.

There are potentially great benefits to a State hosting the repository, both in terms of financial assistance and long-term economic gain. Roads and bridges could be built and water projects could be accomplished. Thousands of jobs would be created. These benefits could well override the perceived negative aspects. Assignment of a negotiator to work diligently with the people of Nevada to find a mutually acceptable solution is imperative.

If Nevada cannot be convinced to allow the Department of Energy to proceed, then the Congress should intervene to provide a legislative solution. This Nation cannot allow the fate of its nuclear power option to be decided by a State government. Our national security and economic well-being may depend, in part, on its availability into the next century. But without an underground repository for disposal of high level waste, the nuclear option can be

lost. The time has come for the State of Nevada, the Department of Energy, and the Congress to join hands and find a solution that will clear the way for investigating a site which may be suitable for the Nation's underground nuclear waste repository and keep the nuclear option open.

PROGRAM THAT HAS RESULTED FROM GLASNOST

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MAVROULES. Mr. Speaker, I would like to enter into the CONGRESSIONAL RECORD a unique exchange program that has resulted from glasnost. On July 25, I had the pleasure of meeting with four teenagers from the Soviet Union who want to establish an alcohol and drug prevention curriculum in their country. They are on a six-State tour to learn and exchange information about combatting drug and alcohol abuse. The delegation is headed by Dr. Maya Ermolova, head of chemical toxicology at Moscow's Hospital No. 17, the Soviet Union's major hospital for the treatment of alcoholism and chemical dependency. Youth to Youth, a Columbus, OH, based national nonprofit antidrug program, is the chief sponsor of the program.

While in the Nation's Capital, the Soviet teens visited with other congressional leaders and representatives of the Federal drug czar's office to afford Soviet and American teenagers the opportunity to work cooperatively toward the goal of introducing the Youth-to-Youth Program into the Soviet Union. These students were able to interact with many American youths through panels and forums, and learn about American drug abuse education, treatment, and prevention programs that can be implemented in the Soviet Union. Plans are underway for a reciprocal visit of a team of American Youth-to-Youth members to the Soviet Union next year.

In an interview with Dr. Edvard Drozdov, Moscow's Ministry of Health, he stated that standard practice for the treatment of alcoholics had been to use procedures such as blood transfusions, acupuncture, hypnosis, and so-called work therapy. Obviously, the Soviet Union could benefit greatly from the information United States researchers have attained on the proven success of alcohol and drug abuse education programs in this country. Only within the last couple of months have doctors in Soviet hospitals begun to offer psychological and socially based treatment like group therapy and individual counseling, similar to Alcoholics Anonymous. The implementation of Youth-to-Youth, a mentor program, and the peer leadership program are excellent examples of substance abuse education programs that provide American students with the skills and knowledge to resist the temptation of drugs and alcohol.

One of Soviet President Mikhail Gorbachev's early initiatives 5 years ago was a crackdown on alcoholism, imposing higher fines for drunken drivers, shorter hours for liquor stores, and a reduction in the production of vodka and other strong drinks. It appears as though these young Soviet teenagers recognize an urgency of their mission and for this we are all appreciative.

I commend to my colleagues an article from a newspaper in my district, the Peabody Times, that highlights the visit of these Soviet teens to my office.

[From the Peabody Times, Saturday, July 28, 1990]

MAVROULES, SOVIETS DISCUSS DRUG ABUSE PROGRAMS

(By Pamela Glass)

WASHINGTON—A group of Soviet teenagers, in the United States to learn more about American drug treatment and prevention programs, got a few tips this week from U.S. Rep. Nicholas Mavroules.

The Peabody Democrat invited the teens to his Capitol Hill office Wednesday afternoon to exchange ideas and learn more about what this country and the Soviet Union are doing to combat drug and alcohol abuse. The meeting was suggested by Julie Kiricopolis, a drug-free workplace consultant from Salem.

"We spend $11 billion for drug programs and an additional $1 billion for military interdiction programs," Marvroules told the four teens and their chaperone, who heads the chemical toxicology department at a Moscow hospital. "We could put the Soviet Union, the Warsaw Pact countries, the NATO alliance and the United States together and you'll never stop the problem because of the greed and the profit associated with the drug trade.

"We need to begin (drug) education in the kindergarten.

Mavroules said he wanted to share his views on the drug problem with the teens and give them information about successful U.S. programs that prevent and treat drug abusers, such as the Project-Kids-Care, which is used in North Shore schools.

The drug war has become a top priority for Mavroules in Congress. He has used his seat on the House Armed Services Committee to argue for a wider role for the military in drug interdiction and has traveled the country talking to law enforcement officials and educators about the drug problem as a member of the National Commission on Drug-Free Schools.

The teen-agers, who attend an elite high school in Moscow where they learn English, told Mavroules that the Soviet Union is only now beginning to acknowledge and discuss the breath of substance abuse among its citizens.

Glasnost—the policy of openness that is encouraged by Soviet leader Mikhail Gorbachev—has created better opportunities to treat those suffering from alcohol and drug abuse, they said.

Until recently, most alcoholics have been treated in psychiatric hospitals with blood transfusions, glucose injections and hypnosis. Last week, Moscow's Ministry of Health announced an agreement with a U.S. foundation to set up an American-style alcohol and drug treatment program, similar to the one used by Alcoholics Anonymous, in Moscow that emphasizes group therapy and individual counseling.

But despite these changes, treatment and education programs are few and reach only a small number of those in need. The teens said there is no active effort in Soviet schools to educate children and teens about the dangers of taking drugs or drinking too much liquor.

"In the schools we don't explain why it's bad," said Igor Ermolov, 15. He said he'd like to start a national anti-drug program in the Soviet Union, similar to Youth to Youth, an Ohio-based nonprofit anti-drug project. The Soviet teens are touring the U.S. at the invitation of that program and plans are under way for a reciprocal visit of American teens to the Soviet Union next year.

Dr. Maya Ermolova, head of chemical toxicology at Moscow Hospital No. 17, said 150,000 people are registered in Moscow's sustance abuse treatment centers. Most are men, she said but drinking problems among women are on the rise.

Drug abuse has not been a major problem, she said, but the potential is there for greater abuse. Today there are about 120,000 registered drug addicts, most of them teenagers, and 30,000 drug-related crimes a year.

Ermolova said heroin is widely available because it is homegrown. But crack cocaine is virtually nonexistent.

Ermolova was not too optimistic, however, that the huge Soviet bureaucracy, already burdened with other pressing problems, can deal effectively with drug and alcohol abuse. The initiative must come from families she said, but that, too, will be difficult.

"Our country is a great political club," she said. "Every night we have great political discussions in our homes. Our teen-agers and our children are out of our real attention."

ACCOUNTING REFORMS NECESSARY TO AVOID FUTURE FINANCIAL DEBACLES

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WYDEN. Mr. Speaker, 2 weeks ago, the Resolution Trust Corporation stated that, "40 percent of the savings and loan failures were caused by fraud and abuse by insiders * * * by criminal action by the owners, directors, and managers." The RTC found widespread evidence of kickbacks, worthless loans, falsified appraisals, excessive loans to insiders, and criminal activity at almost half of the S&L's that have been taken over by the Government.

Each of these insolvent institutions were supposed to have had important accounting safeguards in place to deter such wrongdoing. Each institution had in-house accountants charged with implementing responsible internal controls for their S&L. Each institution had outside accountants charged with making an independent assessment of the institution's books to ensure the financial statements correctly reflecting the condition of the S&L's.

Together, these accountants were supposed to have been the Nation's first line of defense against fraud and illegality at S&L's. Clearly, these defenses failed. Accountants did not cause the S&L mess, but the breakdown of these so-called accounting safeguards will cost taxpayers billions in the years ahead.

I am particularly disturbed by the evidence that the auditors did not promptly inform Government regulators of the horrifying acts of

fraud and illegality at S&L's that now fill up our morning newspapers. Why didn't they?

The current financial reporting system simply doesn't require accountants to directly inform regulators when their clients engages in fraud or illegalities. The current system is a convoluted morass that consists of little more than accountants telling management they've uncovered fraud at the company. It does virtually nothing to protect the public from the kind of ripoffs that took place with the S&L's.

The S&L scandal shows the consequences of our loophole-ridden system of financial reporting:

Twenty-nine of thirty-one insolvent California S&L's had clean audits shortly before they were taken over by the Government. The Office of Thrift Supervision told Congress last year that faulty 1986 and 1987 audits of California-based Lincoln Savings and Loan were "proof positive that any thrift in America could obtain a clean audit opinion despite being grossly insolvent."

The GAO, in a 1989 study of 11 failed S&L's, found that in more than half of those cases, "CPA's did not adequately audit and/or report the S&L's financial or internal control problems in accordance with professional standards."

The FDIC is now alleging in court that, by delaying regulatory action, Arthur Young & Co.'s faulty audits of Western Savings Association in Dallas cost taxpayers an additional $500 million. The FDIC now has more than 20 suits pending against accounting firms for fraud, negligence and other professional failures in auditing insolvent S&L's.

Congress now has the opportunity to reform the financial reporting system and prevent another debacle. There are several areas we should zero in on to correct the system's flaws.

First, let us understand who an accountant is ultimately responsible to. The U.S. Supreme Court has made it clear that even though a private client pays for a CPA's services, the accountant's obligation is first to the public. In the 1984 case, United States versus Arthur Young & Co., the Court summed it up succinctly: "By certifying the public reports that collectively depict a corporation's financial status, the independent auditor assumes a public responsibility transcending any employment relationship with the client."

Second, direct reporting of fraud is working well elsewhere—both in the United States and overseas. In the United States, precedents already exist for direct reporting. Accountants of broker dealers are currently required to report fraud to the SEC if the broker dealer does not itself report to the SEC within 24 hours of notification by the accountant.

And overseas, England's Banking Act of 1987 clearly states that auditors are required to report frauds by top management directly and confidentially to the Bank of England. If this report is done in good faith, the act provides the auditor protection from liability for any violations of confidentiality or other agreements.

Third, accountants who report fraud are not becoming representatives of the U.S. Government, regulators, or prosecutors. Besides discharging the obligations laid out by the Supreme Court, accountants will be providing an early warning system, an alarm bell, so that those with law enforcement responsibilities—such as the power to prosecute—can step in before enormous public harm has been done.

Had accountants sounded an early alarm about S&L fraud, the billions American taxpayers are going to have to pay would be far less.

And I ask my colleagues, if accountants aren't the ones to sound the early warning bells, who is?

Energy and Commerce Committee chairman, JOHN DINGELL, through his Subcommittee on Oversight and Investigations, has held more than 25 hearings over the last 5 years to examine these issues.

In 1985, the subcommittee held five public hearings on accounting abuses at Beverly Hills Savings & Loan and found that: First, senior managers were involved in substantial conflicts of interest, and received payments from real estate developers for high-risk commercial projects; second, Beverly Hills did not have adequate books and records, proper internal control systems, proper appraisals for its commercial projects, or sound loan closing and documentation procedures; third, Beverly Hills management used accounting gimmicks to turn huge losses from major commercial real estate investments into instant "paper profits"; fourth, management booked $1.7 million of profit for the third quarter of 1983 on an apartment project sale later found to be false; and fifth, Beverly Hills management responded to a hostile takeover attempt by inflating reported earnings, which apparently harmed Beverly Hills as an institution.

None of these matters were reported by the institution's independent auditor and the Government is now seeking $300 million in compensatory damages from the Big Six Firm Touche, Ross.

Shortly after those hearings, I introduced with Chairman DINGELL, the Financial Fraud Detection and Disclosure Act to prevent the problems the subcommittee found from happening again. After further consultation with the accounting profession, I introduced a second version with changes made to accommodate additional concerns of the profession.

A revised version of that legislation was the focus of a hearing yesterday before the Subcommittee on Telecommunications and Finance, chaired by EDWARD MARKEY. During the remaining days of this session, I will be working with Mr. MARKEY and the subcommittee's ranking Republican, MATTHEW RINALDO, Chairman DINGELL, Congressman LENT and other committee members to fashion legislation that would reform our financial reporting systems so Congress won't be back in a few years facing another calamity like the S&L disaster.

Under the Leadership of Chairman MARKEY and Congressman RINALDO, the Telecommunications and Finance Subcommittee has passed vitally important legislation this session to protect the integrity of our financial markets, strengthen the enforcement powers of the Securities and Exchange Commission, and protect purchasers of worthless penny stocks. I am very hopeful that the bipartisan approach that produced these reforms can be duplicated in the accounting area, so that accounting reform legislation can be enacted before Congress adjourns in October.

Our job is made easier because at yesterday's hearing, Charles A. Bowsher, Comptroller General of the United States, supported each of the concepts proposed in the legislation I am circulating to committee members and other interested parties. Mr. Bowsher, a leader in the accounting field at the Big Six firm Arthur Andersen before he went into public service, said it was now in the public interest to enact legislation including these reforms:

Public companies should be required to periodically evaluate and report on the effectiveness of their internal accounting controls and management controls.

Auditors should be required to evaluate internal control systems established by corporate managers to ensure that the internal controls are sufficient so that corporate assets are handled properly and lawfully.

Auditors should be required to file a separate report on their evaluation of internal control systems and those reports should be included in the annual reports filed by public companies.

All audits of public companies should be conducted in a manner that reasonably ensures the detection of substantial illegalities that would have a material impact on the financial statements or operations of the audited company.

Audits of public companies should include procedures designed to identify related party transactions which are material to the financial statements or which otherwise require disclosure under the 1934 Securities Exchange Act.

Audits should include procedures designed to review risks, uncertainties, and other conditions which may affect the issuer's ability to continue its business, and which permit the auditor to conclude whether there is substantial doubt about the issuer's ability to continue as a going concern over the ensuing fiscal year.

Auditors of public companies should be required to report substantial illegalities detected during the course of an audit to regulators, if the auditor first reports the illegality to the appropriate level of the company's management and action is not taken promptly to terminate and correct the illegality.

Auditors who in good faith inform regulators of substantial illegalities on the part of management, that management has refused to correct, should be provided protection against liability.

I am very pleased that Mr. Bowsher supports these important reforms that are much needed to prevent future debacles like the savings and loan mess, and I look forward to working with all my colleagues to see them enacted.

KEEP THE NORTHWEST'S WATER IN THE NORTHWEST

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DENNY SMITH. Mr. Speaker, today I am introducing a resolution that reaffirms Federal law concerning the allocation of water from the Columbia River Basin. Once again, southern California is eyeing the Pacific Northwest's resources.

Currently, it is illegal for the Federal Government even to participate in any study that has as its objective the transfer of water from the Columbia River Basin to any other region of the United States, unless such study is approved by the Governors of all affected States. Despite this prohibition, the Los Angeles County Board of Supervisors has passed a resolution calling for a study of the construction of aqueducts from the Columbia and Snake Rivers, claiming that the Pacific Northwest is just wasting its water by letting it flow to the ocean.

The Northwest is not the energy or water farm for southern California. The water in the Northwest is not wasted. It is used for fish flows, for navigation, for power production, and for irrigation. Southern California is doing little to control growth or conserve water. It is only looking to extend its tentacles even further outside the region to meet its own requirements, at a significant environmental cost to other areas.

I would urge my colleagues to join me in reaffirming current Federal law prohibiting the study of this massive water transfer.

The resolution follows:

H. CON. RES. —

Whereas it is longstanding policy that States lying wholly or partially within a river basin have primacy in allocating that river's water;

Whereas current law prohibits the Federal Government from studying the transfer of Columbia River Basin water to other river basins or to other regions without the consent of the Governors of all of the affected States;

Whereas the board of supervisors of a certain county in California recently resolved that despite the statutory prohibitions on Federal participation, aqueducts should be built to carry Columbia River and Snake River water to California; and

Whereas Columbia River water is fully utilized: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the requirements of Public Law 99-662 concerning Columbia River Basin transfers are reaffirmed and that no water should be transferred from the Columbia River Basin to other river basins or to other regions, nor should the Federal Government participate in any studies of such transfers, without the consent of the Governors of all of the affected States.

BRENNAN: THE GIANT

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. KOSTMAYER. Mr. Speaker, I rise to honor Justice William J. Brennan and his enormous contributions to the constitutional principles under which all of us are protected. Still waters run deep, Mr. Speaker, and so it is that the warm and gracious William J. Brennan can, upon closer reflection, be seen for the constitutional titan that he is. In 1984, the conservative magazine National Review conceded that "No individual in this country, on or off the Court, has had a more profound and sustained impact upon public policy in the United States for the past 27 years." For once, Mr. Speaker, the National Review was right.

Mr. Speaker, Justice Brennan has been a champion of those individual rights that most concerned the Constitution's framers, the rights of individuals to be free of the unbridled power of the State. Soon after the Constitution's ratification, James Madison wrote of his concern regarding "essential rights, particularly the rights of conscience in the fullest latitude, the freedom of the press, trials by jury, and security against general warrants * * *," and Justice Brennan recognized that these concerns are just as relevant today.

He understood that forcing a college professor to comply with various loyalty requirements by inhibiting his or her ability to speak freely, conflicted with Madison's "rights of Conscience in the fullest latitude." He understood that allowing a local sheriff to use State libel laws to silence newspaper articles on the civil rights movement profoundly violated Madison's vision of a free press. He understood that strip searching a 13-year-old school girl to search for drugs where no prior suspicion of drug use existed—and where no drugs were found—substantiated Madison's fear of general warrants. It is Brennan's detractors, not Justice Brennan, who have declared the Bill of Rights and original intent obsolete.

The Constitutional Convention delegates often invoked posterity and crafted a Constitution that would adapt to the country's changes. Pennsylvanian James Wilson's words were typical of many when he said that "we are providing a Constitution for future generations and not merely for the circumstances of the moment." Justice Brennan understands this central concept. Mr. Speaker, it is ironic that Justice Brennan is criticized by the so-called conservatives as a "judicial legislator" precisely because of his willingness to give life to the Constitution's original design.

Was Justice Brennan a radical judicial legislator when he sought to extend the protections of the Constitution to minorities and women? He committed the sin of interpreting the Constitution because he believed that its amendments were intended to have meaning and effect for all people and for all time. He believed that "The citizens of all our States are also and no less citizens of our United States," and that in the United States, no form of Government power could act with impunity against an individual where the Bill of Rights had promised its protections.

Mr. Speaker, the President and the Senate are faced with the nomination and confirmation of a replacement for Justice Brennan; David H. Souter of New Hampshire has been nominated by President Bush. Current trends in the Supreme Court's decisions threaten many of our most cherished liberties, and it is on this appointment that many of our freedoms may turn for years to come.

Members of the Senate must not take excessive comfort in the notion that Supreme Court Justices are unpredictable. The surprise factor must not become a prescription for abdicating the responsibility to determine what can be determined with regard to the views of the nominee. While it may be inappropriate to ask a nominee his views on hypothetical situations, it is appropriate to ask a prospective Justice to comment on the reasoning set forth in cases previously decided. What are Mr. Souter's feelings about the rights to privacy articulated in Griswold versus Connecticut and Roe versus Wade? Does he concur in the reasoning pertaining to the right to free speech set forth in the flag burning case known as Texas versus Johnson? And what about the recent religious free exercise case of Employment Division of Oregon versus Smith?

The Senate has both the right and the duty to ask these political questions, despite the notion currently in vogue that would limit advice and consent inquiries to basic issues of character and competence. Indeed, the Federalist papers describe the Senate as a coequal partner with the President in the nominating process, to provide a measure of democratic control on that branch of Government, the judicial branch, otherwise more remote from the people. In the words of Justice Brennan, "There's absolutely nothing in the Constitution which limits the advice and consent function of the Senate. Nothing. * * * And any Senator, furthermore, is entitled to ask any damn question he wants—about ideology or whatever the hell it may be."

Ultimately, each Senator must cast his or her vote regarding nomination in a manner that is consistent with that Senator's views on the substantive legal rights hanging in the balance. No person should claim to be a proponent of the right to free speech or privacy or religious freedom and at the same time vote to confirm a nominee with opposing views.

We can best honor William J. Brennan, our Constitution, and the original intent of its framers, by choosing a new member of the Supreme Court who will continue William Brennan's legacy. Let us discharge our duty as honorably as he discharged his.

CULTURAL EXCHANGE ARE GOOD FOREIGN AID

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BEREUTER. Mr. Speaker, in recent years we have witnessed a heartening trend toward democracy worldwide. In Latin Amer-

ica, dictatorships in Nicaragua, Panama, and Chile have been replaced by democratically elected Governments. The openings in Eastern and Central Europe have been equally encouraging. We can only hope that other countries will follow their lead.

But the transition to true democracy will not be achieved overnight; nor will the road be free of obstacles. We, as champions of democracy, must do all that we can to assist these nations in their struggle for democracy and help them to achieve the economic and social stability necessary for that democracy to survive and flourish.

There is a tendency in this body, whenever we mention foreign assistance, to think about monetary aid. Though financial assistance and guarantees are a necessary part of any aid program, this Member would like to call attention to another, equally vital aspect of any successful program—that is, the human factor. Without dedicated men and women, working together with the men and women of other nations, the U.S. foreign aid effort could not succeed. It is people who help us understand each other and help us work together in building a better world for all of our children. For that reason, this Member strongly supports cultural and volunteer exchange programs such as the Sister City Program and the Peace Corps, as a means to aid these countries and promote better relations.

As the United States and the newly democratic nations become friends, we must break down the barriers that years of hostility and misinformation have created. And it is the men and women who go to these nations, as Peace Corps or Farmer-to-Farmer volunteers, as technical advisors and as exchange students, who will bring back an understanding of these cultures to those of us who remain at home. By their example, as well as through their direct assistance, American exchange representatives will show the people of these nations that Americans are neither Yankee imperialists nor mindless materialists. Reciprocal exchanges, in which Europeans or Latin Americans come to the United States, would further increase mutual understanding.

Mr. Speaker, the August 2 edition of the Lincoln Star contains an insightful editorial on the expanded role of the Peace Corps Program in meeting this new cultural challenge. This Member would call it to the attention of my colleagues.

[From the Lincoln Star, Aug. 2, 1990]

GLOBAL PUSH FOR FREEDOM REVIVES THE PEACE CORPS

You could say that the Peace Corps is back by popular demand.

It has aged and shrunk since its heyday in the '60s when John Kennedy led an idealistic nation and created the corps to spread capitalist expertise with a friendly face. The average age of volunteers back then was 22; today it is 31.

Rural initiatives in Third World nations once drew the lion's share of projects. They're still important, but today the Peace Corps is increasingly involved in urban projects and environmental protection. And it is going where no Peace Corps volunteer has ever gone before—into Eastern Europe—literally following the emergence of liberalization and democratic yearnings around the globe.

Peace Corps Director Paul Coverdell will accompany Secretary of State James Baker on a historic visit to Mongolia, a reclusive, formerly Soviet-dominated nation that seeks broadened trade with the West and Peace Corps volunteers.

With the addition of Hungary and Poland in June, Peace Corps volunteers are at work in 70 countries (political instability in the Philippines and Liberia has caused the temporary withdrawal of volunteers from those nations). A delegation plans to visit Nicaragua; the corps is exploring relations with a bevy of African nations that have never had or have rejected Peace Corps aid in the past.

The Peace Corps says it expects to be invited into more countries in the next 18 months than in the last 18 years combined. This is heavy stuff and a credit to a program that has weathered a couple decades of indifference and cynicism.

So where has the Peace Corps been?

The Peace Corps never exactly went anywhere. But its directive of self-sacrificing voluntarism and idealism got buried by the juggernaut of greed and self-aggrandizement that to a large extent defined the Me Decade of the '70s and the I'll-get-mine motto of the deregulated 1980s.

And the Peace Corps lost some of its identity when it was merged for a time under an umbrella agency called ACTION; it also lost funding and volunteers. From a high of 15,500 in the late '60s, the Peace Corps dropped to under 5,000 volunteers in '82-'83.

But now President Bush has proposed a 10 percent increase in Peace Corps funding, $16 million in 1990, bringing its budget to $181 million. The Peace Corps hopes to double its volunteer army to 12,000 by the end of the decade. It shouldn't be hard with increased funding—last year some 14,000 individuals interviewed for 3,200 openings.

We should be proud of the quiet, good work done by Peace Corps volunteers, who selflessly give up a year or two or even more of their lives to help others.

Their pay? Living expenses while they're in the Peace Corps and a stipend of $200 a month for every month of service after they leave the corps.

Clearly volunteers aren't in it for the money. The real pay-off is the ability to make a difference in another's life, to make this world a better place.

A RESOLUTION DESIGNATING THE FIRST WEEK OF OCTOBER AS NATIONAL CUSTOMER SERVICE WEEK

HON. JOHN HILER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HILER. Mr. Speaker, I rise today to introduce a bill designating October 1 through 7 as "National Customer Service Week."

The intent of this legislation is to focus on the importance of the customer and the customer service profession to corporate success. As we are all aware, in a free-market economy the quality of customer service and the value placed on the satisfaction of the consumer will win markets for a company. The lack of these qualities can tarnish a company's reputation and cause a loss of markets.

In this economy, it is the customer who keeps things going. It is the customer who keeps people employed, and it is the customer who keeps us strong. The customer service profession is dedicated to keeping customers happy. To addressing their concerns when they arise, and to keep them interested in pursuing and using the goods and services that American workers provide.

Thus, I believe it is high time to pay tribute to both the customer and those who dedicate their lives to keeping customers happy—the customer service industry. I hope my colleagues will join me in this effort and support the designation of a National Customer Service Week.

Mr. Speaker, I ask that the full text of the bill be printed in the RECORD at this point, and yield back the balance of my time.

H.J. RES. —

Whereas recognizing the value and importance of the customer drives the quality of customer service;

Whereas excellent customer service distinguishes those companies that understand the importance and influence a customer has on success;

Whereas today's high cost of attracting new customers further emphasizes the need to keep existing customers through effective service;

Whereas excellent customer service contributes to the growth and success of every company; and

Whereas when customer service is recognized as contributing to a company's profit, the professional status of customer service continues to increase: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 1 through 7, 1990, is designated as "National Customer Service Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate ceremonies and activities.

HUMAN RIGHTS IN ROMANIA

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HOYER. Mr. Speaker, today the Helsinki Commission, of which I am cochair, learned of the release of Romanian student leader Marian Munteanu, who was detained during the violent suppression of the Romanian opposition in Bucharest in mid-June. The release, while long overdue, is welcome.

The commission remains concerned, however, about the approximately 185 other detainees taken into custody during and after the June violence. In July, my fellow commissioners and I alerted President Iliescu to our disquiet over reports that the detainees have not had adequate access to their families or legal counsel, and that some require urgent medical care. We asked President Iliescu for information on the detainees' whereabouts and condition, but have received no answer. One particularly disturbing aspect of the situation is that there are minor-age children among the detainees being deprived of their rights under Romanian law. In any case, non of those in detention should be held if charges have not been filed against them.

The cloud of injustice still hangs heavily over Romania. Mr. Munteanu still is under investigation. Members of the democratic opposition remain subject to threats and intimidation. A new draft media law reportedly imperils Romania's nascent press freedom.

The Helsinki Commission urges the Romanian Government to take further concrete steps to demonstrate its commitment to the principle adopted this past June in Copenhagen by the 35 CSCE participating States that "* * * the rule of law does not mean merely a formal legality which assures regularity and consistency in the achievement and enforcement of democratic order, but justice based on the recognition and full acceptance of the supreme value of the human personality and guaranteed by institutions providing a framework for its fullest expression."

We call on the Romanian Government to institutionalize respect for human dignity and human rights in accordance with its CSCE commitments.

RECIPROCITY IN INTERNATIONAL GOVERNMENT PROCUREMENT ENFORCEMENT ACT OF 1990

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HORTON. Mr. Speaker, yesterday, I joined with Chairman JOHN CONYERS of the Committee on Government Operations and a number of our House colleagues in introducing legislation aimed at providing American companies with increased access to the $200 billion international government procurement market.

The bill we introduced, the "Reciprocity in International Government Procurement Enforcement Act of 1990," attempts to get to the heart of the problem of discrimination against American firms in foreign government procurement.

On May 1, 1990, the Subcommittee on Legislation and National Security of the Committee on Government Operations received testimony from the Deputy U.S. Trade Representative regarding section 7003 of the Trade and Competitiveness Act of 1988 (Public Law 100–418). Section 7003 requires the President to submit an annual report to Congress on the extent to which foreign countries discriminate against U.S. products or services in making government procurements.

At the May hearing, the subcommittee was told that several of our trading partners were discriminating against U.S. companies with regard to Government procurements. The U.S. Trade Representative found that United States suppliers will not enter European markets because of "the uncertain use of fair procurement procedures"; that United States suppliers are not provided with fair procurement practices in the Italian heavy electrical equipment sector; and that certain Japanese Government procurement practices have also been discriminatory in a manner that has hurt United States industry.

Despite these findings, the U.S. Trade Representative failed to name a single country as discriminating against American industry. Section 305(d)(3) of the Trade Agreements Act of 1979 was invoked as authority not to make a formal identification. That section allows the President to use any other additional criteria deemed appropriate when making the identification required by the Trade Act. The reason given was that negotiations to liberalize trade were underway and that formally identifying such countries, which is what the law requires, could undermine overall policy goals.

Quite frankly, this is a misinterpretation of the purpose of the statute. Instead of providing the President with the flexibility to consider other criteria necessary to determining if a country is discriminating, the provision has been used as a loophole to disregard evidence of discrimination. The bill we introduced yesterday removes this loophole.

The bill also establishes a mechanism to effectively coordinate defense trade policy with overall U.S. trade policy goals. This would be accomplished by amending the Buy American Act of 1933 to require any agency head seeking a public interest waiver of the act to obtain the concurrence of the U.S. Trade Representative.

The subcommittee's comprehensive review of procurement issues revealed that the Department of Defense has been unilaterally waiving the Buy American Act when signing procurement agreements with other nations. The result has been greater access to American procurement markets for foreign contractors, without necessarily gaining reciprocal access to foreign procurement markets for American firms. Requiring the approval of the U.S. Trade Representative will ensure greater coordination of defense and nondefense trade policy, and will put an end to the undercutting of larger trade policy goals.

Finally, the bill requires the Office of Federal Procurement Policy to submit an annual report to Congress on the number and value of Federal procurement contracts and subcontracts awarded to foreign firms. The annual report will identify the number and value of Federal procurement contracts and subcontracts performed outside the United States, as well those awarded under the International Procurement Code. Timely and accurate information relating to the effectiveness of the International Government Procurement Code and Federal procurement policy, is critical to maintaining a strong and efficient American defense industrial base and ensuring American access to foreign procurement markets.

Mr. Speaker, the Reciprocity in Internatioal Government Procurement Enforcement Act addresses serious shortcomings in existing procurement law which were identified during a series of extensive hearings held by the Government Operations Committee. As the ranking minority member of the committee, I sincerely hope that my House colleagues will take the time to review the bill's provisions and then join with me and Chairman CONYERS in working for the speedy enactment of this important legislation.

FEDERAL EMPLOYEES ASSISTANCE ACT OF 1990

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FAZIO. Mr. Speaker, I rise today to introduce the Federal Employees Assistance Act of 1990 to help employees who are affected by major reorganizations, reductions in force or transfers of functions in any department or agency of the Federal Government.

In the coming months, Congress will have to address the many issues associated with reductions in the Department of Defense. These issues include the placement of Federal employees and military members, the impact of base and plant closings on communities throughout the Nation, and the need for diversification of the defense industry. We welcome the changes in the world that have brought us to this point. But, now we face a whole new set of problems. We have the opportunity, however, to address these problems, and the problems which may be faced by other Federal agencies, in a proactive rather than a reactive fashion. The Federal Employees Assistance Act establishes a variety of initiatives to help employees find continuing employment.

While many DOD-related measures have already been introduced, most deal with the problems of the private sector, or provide assistance after a Federal employee is separated. This act covers employees in any Federal agency which is facing a major reduction. The Assistance Act will stimulate placement before employees are separated. These provisions are funded from agency savings attributable to the reductions.

TRAINING

For the first time, the Government would be allowed to train employees for jobs in the public and private sector. The Employees Assistance Act would also provide training grants to enable employees to complete training to gain skills for a job in demand in the private or public sector.

JOB PLACEMENT

The media has made the peace dividend a household word. One definition of dividend is "gift or bonus". It is disconcerting that the outcome of the events in Europe may be just the opposite. I'm concerned about the number of employees, both Federal and private, who will saturate the work place looking for jobs.

This legislation addresses this concern by allowing agencies, by contract, to take advantage of outside professional placement and counseling services. These professionals know where the jobs are and how to help workers through turbulent times. Federal agencies should be able to capitalize on their expertise.

The act also encourages employers to hire Federal employees who face reduction by providing that rather than receiving severance pay, the employee may elect to have periodic payments made to a non-Government employer. The employer must agree to hire the employee on a full-time basis for at least 1

year at a rate of pay not less than the rate the employee was paid by the Government.

In addition, when an employee who is faced with separation must relocate to a different geographic area to find work, the new employer may be reimbursed for a portion of the employee's travel, transporation and subsistence expenses.

Federal agencies, State, local, and private employers are charged to cooperate to try to minimize the unemployment of individuals separated from the Government during major reductions.

RETIREMENT

To encourage a reduction of employees through means other than reduction in force, this bill allows employees to retire and return immediately to their position on a part-time, temporary basis—not to exceed 2 years—without a salary offset. Pay or grade levels are not caped, however total compensation—salary plus annuity—may not exceed the previously earned salary.

I believe this provision will encourage the retirement of employees who may be considering leaving the work force but are not sure of their future plans or financial status. It will give them the opportunity to enjoy part-time work and part-time retirement with no loss of income and gives the Government flexibility and stability. For each two employees who take this opportunity, the agency saves one space.

Mr. Speaker, I realize the Employee Assistance Act will be expensive. But we must accept the fact that if we are unable to place employees separated in major reductions, we will have to pay the high cost of severance pay and unemployment compensation—not to mention the untold financial and emotional cost to the employees and their families. It is in everyone's best economic interest to find continuing employment for civil servants, particularly the thousands in the Department of Defense who may have to pay the price of the peace dividend through unemployment.

Peace is priceless, but peace is also costly. We've effectively spent money over the years to deter the threat. Now we must spend money for the good of those individuals who have given so much in the defense of this great country. And we must prepare for other major changes that may occur in the Federal workplace.

I urge each of you to favorably consider this important bill.

FEDERAL EMPLOYEES ASSISTANCE ACT—SECTION ANALYSIS

SUMMARY

The Federal Employees Assistance Act provides for retraining and other forms of assistance to employees who may be separated from Government service as a result of a major reorganization, reduction-in-force, or transfer of function. The Act encourages placement of employees before they are separated. The provisions of this Act are funded from agency savings attributable to the reductions.

SECTION 1. SHORT TITLE.

The Act may be cited as the "Federal Employees Assistance Act of 1990."

SECTION. 2. TRAINING.

When there is a major reduction-in-force (RIF) that is likely to have substantial adverse economic impact within one or more geographic areas, employees who are likely to be separated may be retrained for non-Government jobs.

SECTION. 3. TRAINING GRANTS.

Employees who may be separated under the conditions described in Section 2 may receive grants to defray the cost of training for another job. The grants are limited to 15% of the employee's salary or $5,000, whichever is lower.

SECTION. 4. SEVERANCE PAY AND COOPERATIVE EFFORTS.

Severance Pay. Rather than receive severance pay, an employee separated under the conditions described in Section 2 may elect to waive their right to severance pay and instead have periodic payments made to a non-Government employer. The employer must agree to hire the employee on a full-time basis for at least one year at a rate of pay not less than the employee was paid by the Government.

Cooperative Efforts. Agencies shall, in cooperation with State and local employment offices, and other commercial and private employment agencies, seek to minimize unemployment of individuals separated from the Government under the circumstances described in Section 2.

SECTION. 5. TEMPORARY SERVICES OF EXPERTS AND CONSULTANTS.

Agencies may use professional placement or recruiting services to find continuing jobs for employees who are to be separated because of RIF.

SECTION. 6. RELOCATION EXPENSES.

The Government may reimburse private employers for some moving expenses when they hire an employee who may be separated under the conditions described in Section 2. The amount of the reimbursement is limited to $5000.00 or 10% of the employees salary, whichever is lower.

SECTION. 7. WAIVER OF CERTAIN DUAL COMPENSATION PROVISIONS.

To encourage reductions through means other than RIF, agencies may allow retirement eligibles to retire and draw their full annuity plus salary while working part-time for periods up to 24 months. Salary plus annuity is limited to the amount of salary payable before retirement.

SECTION. 8. REPORTING REQUIREMENT.

Agencies will report to Congress annually on the number of major reorganizations, reductions-in-force, or transfers of function. The report will include the types of measures taken under the provisions of this Act to reduce the number of separations and assist in the retraining and continuing employment of employees.

A SECURE AND WELL-FUNDED PRIVATE PENSION SYSTEM

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. VISCLOSKY. Mr. Speaker, I am introducing legislation to encourage the growth and enhance the security of our Nation's private pension system. My bill, the Retirement Security Protection Act of 1990, would allow employers to more adequately fund their defined benefit pension plans on a tax-deductible basis to ensure that they have sufficient assets to deliver the benefits promised to employees when they retire.

Specifically, this legislation would modify the full-funding limitation established by the Omnibus Budget Reconciliation Act of 1987 [OBRA '87]. OBRA '87 prohibits deductions for pension contributions if they would cause the assets of the plan to exceed 150 percent of current liabilities. This full-funding limit is often inadequate for young companies with new pension plans since there is no consideration of future salary increases for future service. In many cases, current liability is often less than half of projected liabilities, which take into account anticipated salary increases.

A 1989 study prepared by Hay/Huggins for the U.S. Department of Labor found that a number of plans, which have sufficient assets to provide benefits for their termination liabilities, would not be able to fund for future projected benefits to the degree required by the Employee Retirement Income Security Act of 1974 [ERISA]. For example, the study showed that by 1992, the limits on maximum contributions were estimated to be below the minimum contributions needed to meet ERISA's funding requirements for at least 25 percent of all plans.

My bill would permit employers to consider future salary growth in funding their defined benefit pension plans. It would offer employers the choice of funding their plans at the greater of 150 percent of current liabilities—the current limit—or 90 percent of projected current liability. Projected current liability is based on current liability with the liabilities for active employees increased to allow for salary growth. The salary growth assumption would be no greater than the current liability interest rate, that is, 30-year Treasury, less 3 percentage points.

This legislation would also increase the excise tax on pension asset reversions from the current 15 percent to 30 percent. This component of the bill will send the message to plan sponsors that, while they will be permitted to more fully fund their plans on a tax-deductible basis, they will not be permitted to terminate their plans and recover surplus asets that contain a Federal subsidy if the money is not to be used for retiree pensions. The General Accounting Office has determined that for the majority of cases, the 15-percent excise tax does not fully recapture the tax advantage accrued by the employer.

The genesis of this proposal came from discussions I have had with members of the business community in the context of how Congress could improve the health of the private pension system. I would also like to thank the Pension Committee of the American Academy of Actuaries, the Employee Benefit Research Institute, and the Congressional Research Service for their unfailing courtesy and cooperation in providing sound technical advice and for critiquing a number of draft proposals. The bill being introduced today is much improved because of their help.

Further, I am pleased to announce that CRS has prepared an analysis which provides background on the full-funding limitation, identifies the nature of the problem, and describes how this legislation would improve the system.

As our population grows older, there will be additional demands upon our already strained entitlement programs. Accordingly, we must refine our national savings policy to relieve the pressure on Social Security, for example. Taking a long-term perspective, my bill strives to enhance pension plan formation and health rather than allowing pension policy to be driven exclusively by short-term budgetary considerations.

We can all appreciate the importance of a secure and well-funded private pension system. After a careful examination of this bill and the CRS analysis, I am convinced that the merits of the proposal will be evident. I would hope to have your support for this important legislation.

RECYCLING OF THIRD-CLASS MAIL

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. BYRON. Mr. Speaker, today I am introducing legislation to study the feasibility and encourage the use of recycled paper for third class mail, which is comprised of bulk business mail and advertisements.

It is necessary that we move in the direction of recycling in order to protect both our energy and environmental resources. Americans produce more waste per capita than other industrialized nations. It is estimated that we will produce about 180 billion pounds of waste by the year 2000; 40 percent of this waste is paper and paper products. Part of this is produced by discarded mail. In 1989, the Postal Service delivered 62.8 billion pieces of mail, weighing 7.5 billion pounds. It is also estimated that each recycled ton of paper saves 17 trees. If we can recycle a part, or better still, all of this mail, the sheer numbers involved would make it quite significant.

The legislation I am proposing would authorize the Postal Service to study and report to Congress, in writing, on ways to encourage greater use of recycled paper by third class mailers. The study would provide a description of alternatives, the advantage and disadvantage of each, and recommendations of appropriate legislation or administrative actions. The alternatives may include preferential rates or other recommendations the Postal Service sees fit. The bill would be a necessary step in our efforts to clean the environment and put our resources to better use.

I urge my colleagues to join me in the passage of this legislation.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the United States Postal Service shall study and report to Congress, in writing, on ways to encourage the greater use of recycled paper by mailers of third-class mail matter. The alternatives studied may include preferential postal rates and any other means within the jurisdiction of the Postal Service.

(b) The report shall include—

(1) a brief description of each proposed method;

(2) the advantages and disadvantages of each; and

(3) recommendations for any legislation or administrative action which may be necessary.

NORTH-SOUTH CENTER BILL

HON. ALBERT G. BUSTAMANTE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BUSTAMANTE. Mr. Speaker, I rise before you today to introduce a piece of legislation which will create in the State of Texas, a North-South Center for the Study of Western Hemispheric Trade.

This Center would serve as an academic research institute which would study the advantages and disadvantages of liberalized trade relations among countries from North, Central and South America. The North-South Center will study topics such as the effects of increased trade on the American worker, and the impact of illegal Latin American immigration, from an interdisciplinary approach.

The North-South Center will help us make more knowledgeable decisions about the future role of the United States within our global economy. As we consider whether or not we will enter into free trade agreements with Mexico and other Latin American countries, an academic institution like the North-South Center could serve as a very useful, objective tool.

The Center will be affiliated with a Texas university or college which the U.S. International Trade Commission will help select. And what better place to locate a North-South Center than in Texas, through whose ports flowed approximately one-half of all United States-Mexican trade. More imports from, and more exports to Mexico, pass through Texas more than any other State.

The advantages to the North-South Center are multifold. It will provide information not only to Government policymakers, but also to companies which seek to do business in neighboring countries. This will facilitate business activity, and ultimately economic growth, within our hemisphere. Although the legislation appropriates $10 million to establish the Center, businesses will also pay for the information they receive. In doing so, they will partially subsidize it. In this way, the Center will not have to depend wholly on Federal support, and will ideally, pay for itself after only a few years.

The North-South Center is something we do not get very often, a great return for a good price. I encourage my colleagues to consider the legislation and invite them to join me and Congressmen MIKE ANDREWS, JOHN BRYANT, and SOLOMON ORTIZ in sponsoring this bill.

THE U.S. COAST GUARD: 200 YEARS OF SERVICE

HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HOCHBRUECKNER. Mr. Speaker, it gives me great pleasure to rise before you today to honor the U.S. Coast Guard as it celebrates its 200th anniversary on August 4, 1990.

The U.S. Coast Guard began its tour of duty in 1790. At that time it was known as the Revenue Marine and served as the Federal maritime law enforcement agency. Today, the Coast Guard provides Americans with countless services in such areas as search and rescue, marine inspection, marine environmental response, port safety and security, waterways management, and bridge administration.

As the Congressman of the First Congressional District of New York, situated on Long Island, and as a member of the Subcommittee on Coast Guard and Navigation, I have had a firsthand view of the invaluable services of our Coast Guard. This organization plays a prominent role in maintaining the safety of the Long Island community as well as the many visitors who frequent our beautiful island. The Coast Guard's impeccable rescue record is a credit to the selfless dedication of the men and women who represent this organization.

Aware, as we all are, of the importance of the U.S. Coast Guard, it is almost infeasible that a cutback in their budget could be suggested. Yet in 1988 such cuts were imposed and I, along with many of my colleagues, fought to ensure that the Coast Guard's indispensable services would not be impaired. We succeeded in restoring $60 million to the agency's budget.

Through the years the Coast Guard has shown its versatility and its quick ability to take on new responsibilities in an ever changing world. Whether helping to fight the war on drugs or aiding in the cleanup of an oilspill, the Coast Guard has been a shining star and a tribute to the American way.

Mr. Speaker, please join me in congratulating the Coast Guard on its 200th anniversary. It has admirably served the United States in all of its areas of jurisdiction. I commend the Coast Guard on a job well done.

TRIBUTE TO CAPT. LEO BERGER

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. LANTOS. Mr. Speaker, I rise today to pay tribute to a dear friend, Capt. Leo V. Berger, who was described in Barons magazine as "an old sea salt in businessman's garb." His story is a typical American success story—a story I would like to share with my colleagues in the Congress today, Mr. Speaker, as Leo marks his 70th birthday.

Leo Berger was an impoverished immigrant from Hungary, who spent his youth in an American orphanage. He rose to become one of the top independent shipowners in America. Along the way, he benefited from good timing and a bit of luck, but Leo's success is unmistakably the result of his sharp business mind.

In 1970, Leo heeded the call of our Government to help resurrect our Nation's dying merchant fleet. Larger ship operators were hesitant to participate in the new program, but he boldly took the lead in building American-flag bulk cargo fleet to compete directly with foreign-flag vessels.

As Barons said: "He built a fleet on a shoestring, avoided the agonies of a risk-laden industry, and reached the top rank of independent American shipowners." Those of us from Hungary are used to accomplishing remarkable things, but what Leo has done is incredible—even by Hungarian standards.

Leo Berger is an American patriot. He loves his adopted country, and he has made an important contribution to strengthening our Nation's shipping. He has always been ready when there is a need for his help. In 1983, the U.S. Navy was interested in transforming two existing vessels into floating "Bethesda Naval Hospitals" to serve American wounded in combat. Although one of his ships had been lost at sea the previous year, Leo rebounded from the loss by making a landmark deal with the Navy to remodel two of his ships into such floating hospitals. Once again, Captain Berger's success story was a success for America.

Mr. Speaker, I invite my colleagues to join me in paying tribute to Capt. Leo Berger—he is a dedicated patriot and his example should serve as an inspiration to all Americans in showing that they can help our Nation and at the same time be successful in business.

THE U.N. POHL WASH

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DYMALLY. Mr. Speaker, last January, the Special Representative of the United Nations, Reynaldo Galindo Pohl, traveled to Iran to make a first time 8-day investigation into the human rights situation. His report, however, resulted in concealing and occasionally reversing the truth of the atrocites committed by the Khomeini regime, and thus, served the interests of the dictatorship ruling Iran. As a result of such encouragement, the leaders of the Iranian regime found their hands freer than before, to violate human rights in that country and wage an unbridled campaign of terrorism abroad.

Immediate consequences of the report were: A surge in the number of executions and arrests, stepped up harassment of women and assassination of dissidents in exile. Iranian state-run newspapers Jomhouri Islami on February 17, 1990, and Kayhan on February 18, 1990, reported the execution of three persons in Hamedan:

1. Mohammad-Hossein Golzar Kabir, age: 27, sentenced to 173 lashes and beheading by a sword.

2. Gholam-Hossein Golzar Kabir, age: 28, sentenced to 148 lashes, being stabbed three times with a knife in the upper half of his body, and beheading by a sword.

3. Reza Khanian, age: 23, sentenced to 148 lashes, being stabbled three times with a knife in the upper half of his body, and beheading by a sword.

The verdicts carried out, in the matter of a few hours after being issued, at 8:30 a.m. on Thursday in the presence of a number of national officials, near the site of the crime * * *. The cut-off heads of two of the alleged criminals * * * were placed on the top of Bou Ali Sina's tomb (a sightseeing and tourist attraction). The corpses were driven around the city on a crane.

In reporting on his 8-day visit to Iran, Mr. Galindo Pohl contends that the Iranian regime has abandoned the practice of public executions. Tehran leaders, however, reported 206 public executions, carried out in less than 5 months, published in the state-run newspapers.

On the issue of terrorism abroad, on April 24, in Geneva, the Khomeini regime's agents assassinated Dr. Kazem Rajavi, the leading defender of human rights in Iran, and brother of Mr. Massoud Rajavi, leader of the Iranian Resistance, as he was driving home. The Mojahedin's Resistance movement immediately announced the names of the operatives involved, which included Tehran's Ambassador and chargé d'affaires in Switzerland.

On June 22, a Swiss judge identified the murderers: Thirteen agents "from more than one service of the Tehran regime" who had come to Europe using government service passports.

In fact, Galindo Pohl's report never remained committed to its crucial international mandate of investigating one of the most horrifying records of atrocity in contemporary times. The report as a whole, is a collection of counterfeit evidence, distorted facts and repetitions of statements by criminals like Lajevardi, infamous as the Butcher of Evin Prison. Under the banner of human rights, the basis and objectives of the report had been predetermined to justify the crimes of the regime ruling Iran.

The Iranian Resistance has recently criticized Mr. Galindo Pohl's 76-page report in a 354-page documentary book entitled, "Human Rights Betrayed; Galindo Pohl's Report Under Scrutiny." Excerpts of that book are enlightening as to what has taken place in the name of the United Nations.

Of the total number of paragraphs in the report, 28 percent are devoted to violations of human rights, 61 percent to the regime's witnesses and officials, and 11 percent to general statements and definitions which refer to the objectivity of the mission. Disregarding the 11 percent of general statements, we find that 69 percent of the report is in favor of the Tehran regime.

Citing statements by the Special Prosecutor for Drug Trafficking, paragraph 244 of Mr. Galindo Pohl's report states that "there have been—no executions—in public for 5 months."

A simple reference to the information provided by the Iranian Resistance, would have revealed that only on the basis of the Iranian regime's official announcements in the state-run newspapers, public and mass executions had been carried out on October 8, 12, 17, 24, 30, and 31, November 11, 18, and 27, and on December 6 and 9. In response to this distortion of the truth, Mr. Galindo Pohl conceded in his Geneva press conference that there could be some inaccuracies.

Prior to the report, Mr. Galindo Pohl was repeatedly cautioned that the Tehran regime would clean up Evin Prison, leaving only a selected number of prisoners in order to prepare it for exhibition for reporters. He had also received addresses and floor plans of other secret and nonsecret prisons in Tehran, as well as information on the location of mass graves in the vicinity of the capital. Yet, he sufficed to only visit the workshop of Evin Prison.

In reality, the Khomeini regime brought several individuals before Galindo Pohl who gave testimony that, albeit their names were included as victims of execution, they were, indeed, alive. Therefore, it is obvious that the Khomeini regime attempted to undermine facts and findings provided Mr. Galindo Pohl, by the Iranian Resistance regarding the execution of more than 16,000 individuals. Unfortunately, the Special Representative succumbed to these tactics, resulting in no reference whatsoever, to the findings by the Iranian Resistance and furthermore, did not even attempt, to investigate the remaining 16,000 names and particulars.

Interestingly enough, if he had examined the list, he would have found that two of the four names provided by the regime, Mr. Mohmoud Reza Said Nejad and Mr. Behman Garai, never even appeared in the list of execution victims published by the Iranian Resistance. Furthermore, the names of two other individuals, Mr. Ismail Zarei and Mr. Soghra Farhadi, had been officially announced as being executed by the regime itself.

Again the Special Representative is given false information, yet he confidently cites it as a true statement without further attempts to verify it. He does the same with regards to the statements of Lajevardi, infamous as the Butcher of Evin, and mullah Moghtada'i, whose verdict on the forms of executions—beheading by sword, stoning to death, casting from a height, demolishing a wall on the convict's head, and burning alive—once shocked the world. Statements made by such high level officials are included in the conclusion of the report as the Special Representative's new discoveries in Iran.

Additionally, as cited in paragraph 237, additional witnesses were not able to see the Special Representative, because the regime had "literally blocked the way for anyone who wanted to enter."

Based on article 11 of the 46th session of the Human Rights Commission's resolution, Geneva—March 1990, periodic inspections by the International Red Cross were to be made of all prisons in Iran. Based on this same resolution, Galindo Pohl has been given a mandate to again visit Iran. It is unclear, however, why no Red Cross inspections have taken place while the Special Representative was preparing for his second visit.

Certainly, the repercussions of Galindo Pohl's mandate will prove to benefit the Khomeini regime and will contradict the objectives of the both the United Nations in general and the Universal Declaration of Human Rights. Futhermore, experience has proven that Galindo Pohl's mandate opens the door to additional assassinations and attacks such as those against Dr. Kazem Rajavi, and Mr. Hossein Abedini.

Hence, the Iranian Resistance has not exaggerated its evaluation of Galindo Pohl's report as a complete and false account of the situation and a green light to the regime's policy of human rights abuse. It is, therefore, understandable that the Iranian Resistance will have no choice but to discredit Galindo Pohl's next visit to Iran, scheduled within the next few weeks.

It is undeniable that the Iranian people and their democratic resistance have the right, and indeed, it is their responsibility, to insist that a new Special Representative be appointed by the United Nations and the Human Rights Commission. An individual is required who will take on this task with the utmost objectiveness. Also compelling, is the need for the presence of an observer and an interpreter, representing the resistance, to ensure an impartial examination and reporting of the different aspects of the violations of human rights in Iran.

TRIBUTE TO THE LATE DR. ALBERT E. QUARTON

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HERTEL. Mr. Speaker, I rise today to pay tribute to the memory of a man who truly spent his life making the world a better place for others, Albert E. Quarton, Jr., M.D. Dr. Quarton died on Monday at the age of 76 and left behind a legacy of love and caring that will long remain with those who knew him. He will be mourned this morning at Holy mass at St. Fabian Catholic Church in Farmington, MI.

Assembled there, will be his devoted wife, Helen, his children Albert, John, Tom, and Mary, his grandchildren and many friends and professional associates. My thoughts will be with them as they reflect upon the richness and value of the life that this exceptional human being led.

Dr. Quarton lived his life guided by values and ideals from another era. He practiced medicine for 50 years and had a warm and personal approach toward each patient. He was proud to say that he made house calls when in need, until the moment of his retirement. He was chief of medicine and chief of inpatient diagnostic service at William Beaumont Hospital in Royal Oak, MI.
